Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/sign-in

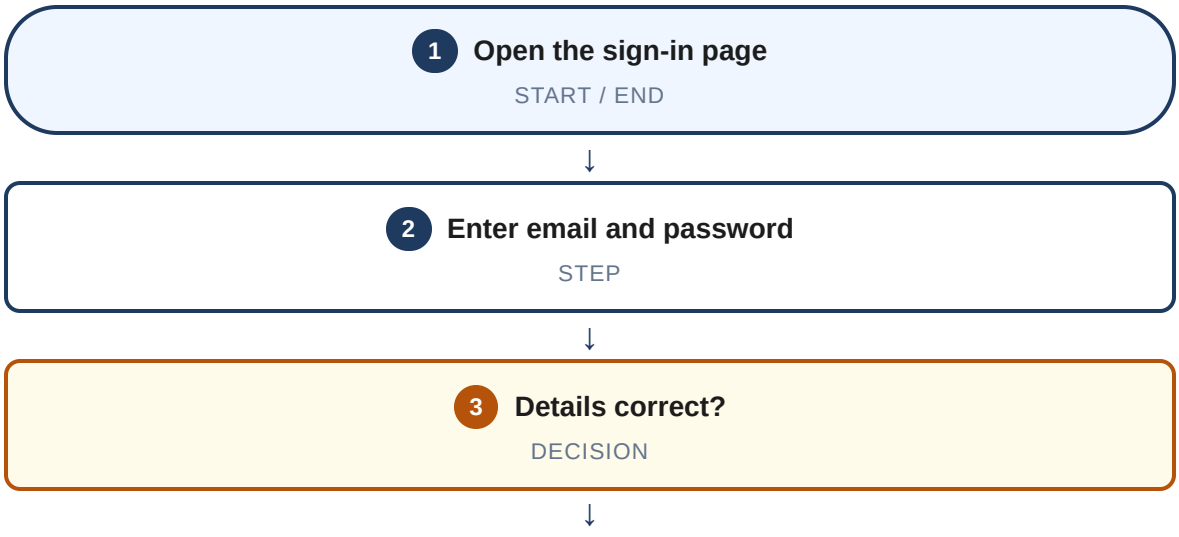

Goal

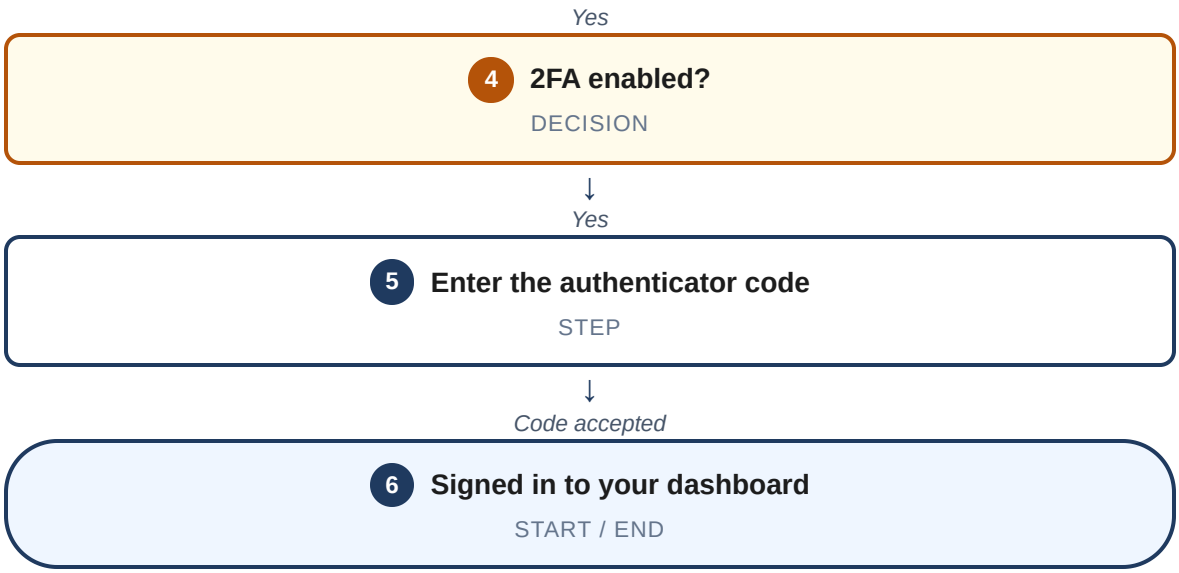

Sign in to your OxSteed account with your email and password, including two-factor and passkey options.

Before you start

1. Have an OxSteed account.
2. If you enabled two-factor authentication, have your authenticator app ready.

Process map

- *No:* Details correct? → Use Forgot password?
- *No:* 2FA enabled? → Signed in to your dashboard
- *Password reset:* Use Forgot password? → Enter email and password

Text version. 1. Open the sign-in page. 2. Enter your email address and password, then choose "Sign in". 3. If the details are wrong, use "Forgot password?" to reset. 4. If two-factor authentication is on, the page switches to "Verify it's you"; enter your Authentication code. 5. You land on your dashboard. Passkey users can sign in with their device instead of typing a password.

Steps

Step 1: Open the sign-in page

Choose "Sign In" in the top navigation, or open /login directly. The page shows the heading "Welcome back" and the subtitle "Sign in to access your local skills marketplace", with an Email address field, a Password field, and a "Sign in" button. New users see a "Join OxSteed" link instead.

> **Expected result:** The sign-in form is visible with empty Email address and Password fields.

1. **1.** Email address field
2. **2.** Password field
3. **3.** Sign in button

Step 2: Enter your email and password

Type the email address you registered with into the Email address field (placeholder "you@example.com") and your password into the Password field (placeholder "Enter your password"). Passwords are case sensitive. Use "Show password" if you want to check your typing, then choose "Sign in". The "Forgot password?" link sits next to the password field.

> **Expected result:** The Sign in button shows a loading state, then you are redirected.

1. **1.** Password field
2. **2.** Forgot password? link
3. **3.** Sign in button

Step 3: Complete the two-factor check if prompted

If you enabled two-factor authentication, the page changes to "Verify it's you". Enter the current code from your authenticator app into the Authentication code field and submit. Users with a passkey can choose the passkey option instead of typing a password.

> **Expected result:** The code is accepted and you continue to your dashboard.

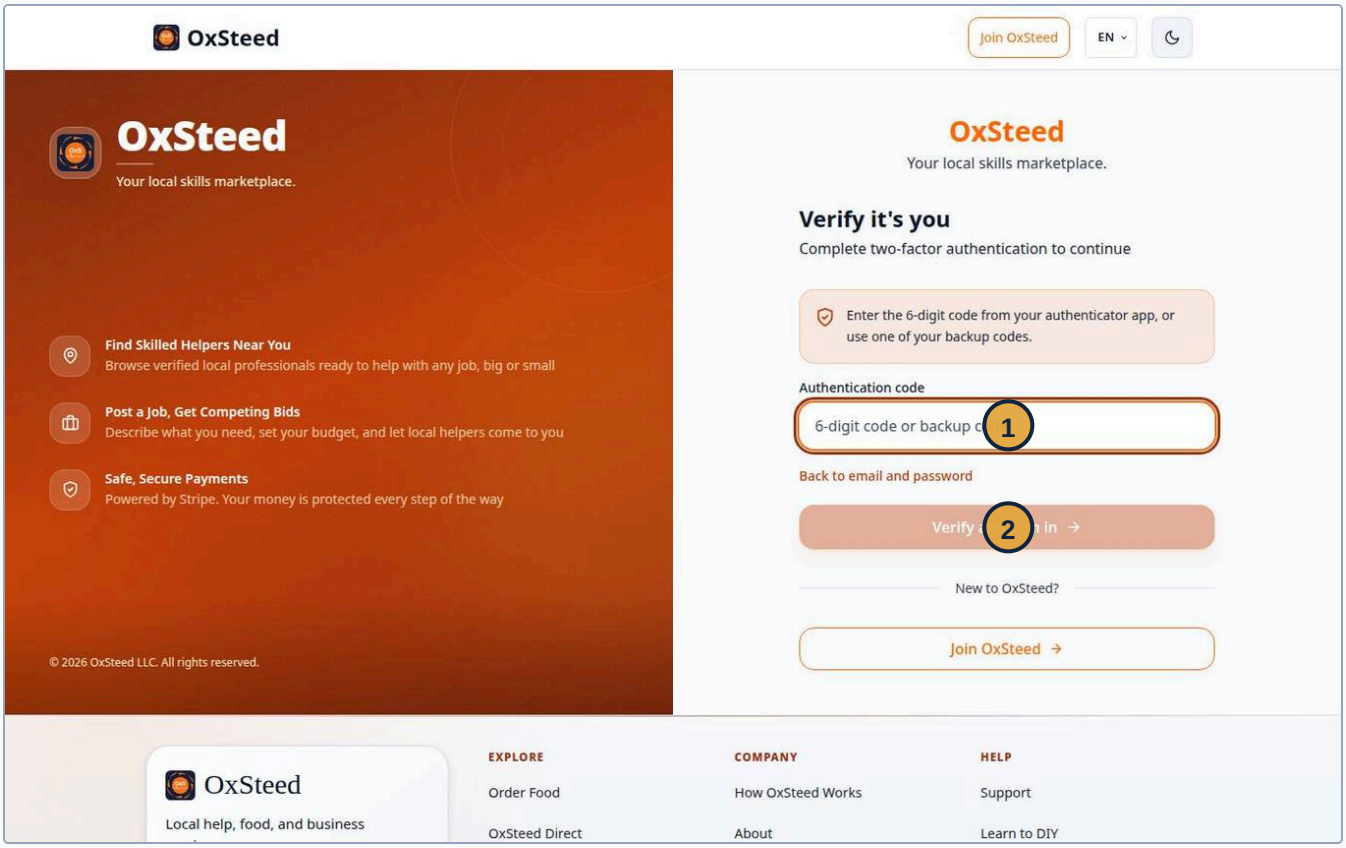

Figure 3. The two-factor step, shown only when 2FA is enabled. *(Image description: Two-factor page titled Verify it is you with an authentication code field)*

1. **1.** Authentication code field
2. **2.** Submit button

Step 4: Confirm you landed on your dashboard

After sign in, your dashboard loads. Open the account menu in the navigation to confirm it shows your name or email. If you expected a different mode (for example Helper instead of Customer), use the mode switcher in the navigation.

> **Expected result:** Your dashboard is visible and the account menu shows your name or email.

1. **1.** Account menu

Confirm it worked

Your dashboard loads and the account menu shows your name or email. Review active sessions anytime under Settings, Security.

If something goes wrong

Problem	What to do
You see "Invalid email or password".	Check for typos and caps lock, then try again. After several failed attempts the sign-in is rate-limited; wait a few minutes or reset the password.
Your two-factor code is rejected.	Make sure your phone clock is set automatically; authenticator codes drift when the clock is off. If you lost the authenticator, use your saved recovery code from the Security tab in Settings.
Passkey sign in fails.	Make sure your browser and device support passkeys and that you use the same device or synced profile where the passkey was created. Fall back to email and password.

Need help?

If you cannot access your account after a password reset, contact support from the Help menu or visit /support.
