Plan recurring needs

Guide ID	**other-planned-needs**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/other/plan-recurring-needs

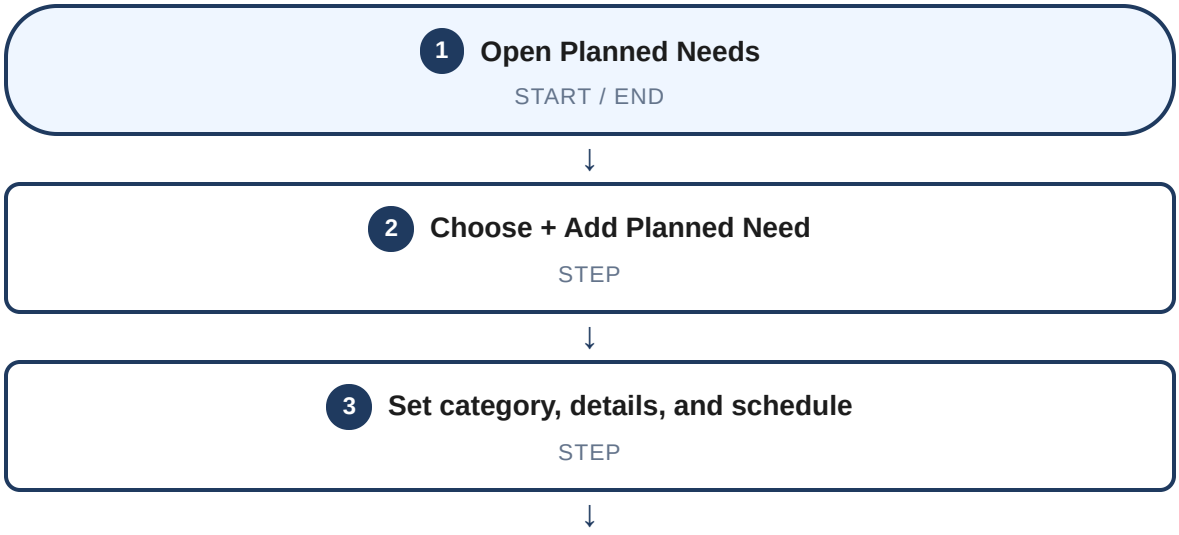

Goal

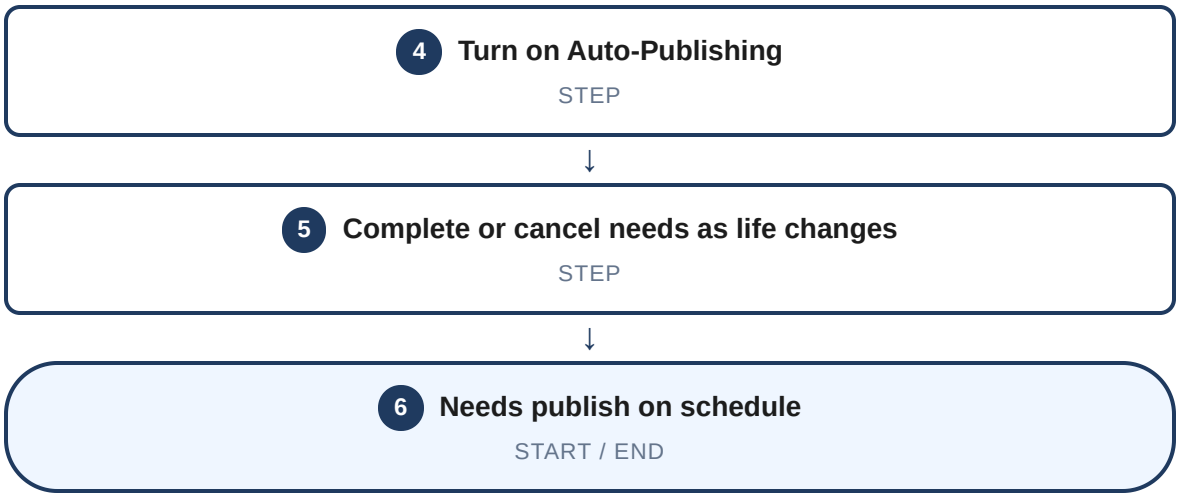

Create recurring household needs that auto-publish as job posts on your schedule.

Before you start

1. A signed-in OxSteed account.

Process map

Text version. 1. Open /planned-needs, titled "Planned Needs". 2. Choose "+ Add Planned Need". 3. Fill in the need: category (for example "Car Care" or "Personal Care"), details, and recurrence. 4. Turn on "Auto-Publishing" so the need posts as a job on schedule. 5. Use "Complete" to finish a need, or "Cancel Planned Need" to stop it. 6. "Browse helpers" connects you with preferred helpers for the work.

Steps

Step 1: Open Planned Needs

Open /planned-needs while signed in. The page is titled "Planned Needs". Existing needs show with their categories, schedules, and auto-publish status. The "+ Add Planned Need" button starts a new one.

Expected result: Your current planned needs are listed.

Screenshot planned

Screen: **/planned-needs**
State: Planned Needs with existing needs, signed in, light mode

Step 2: Add a planned need

Choose "+ Add Planned Need" to open the "Add Planned Need" form. Set the "Category" (for example "Car Care", "Personal Care", or "Other"), describe the need, and choose how often it recurs. Choose "Add Need" to save.

> **Expected result:** The new need appears in your list.

Screenshot planned

Screen: **/planned-needs**
State: Add Planned Need form, light mode

Step 3: Turn on auto-publishing

Open the need and turn on "Auto-Publishing". With it on, the need automatically publishes as a job post on your schedule, so recurring work posts itself. The page shows the next auto-publish date and count.

> **Expected result:** Auto-publishing is on and the next publish date is shown.

Screenshot planned

Screen: **/planned-needs**
State: Auto-publishing enabled on a need, light mode

Step 4: Complete or cancel a need

Use "Complete" to finish a need you no longer need to repeat, or "Cancel Planned Need" to stop it entirely ("Cancel Planned Need" asks for confirmation). Use "Browse helpers" to find preferred helpers for recurring work.

> **Expected result:** The need is completed or cancelled and stops publishing.

Screenshot planned

Screen: **/planned-needs**
State: Need actions visible, light mode

Confirm it worked

Your need is listed with auto-publishing on and a next publish date, and it posts as a job on schedule.

If something goes wrong

Problem	What to do
A need published when you did not want it to.	Open the need and turn off "Auto-Publishing", or use "Cancel Planned Need" to stop it entirely.
Auto-publishing is on but nothing posted.	Check the need schedule and next publish date. If the date passed with no post, contact support at /support.

Need help?

Planned needs issues: contact support from the in-app support page at /support.
