## Goal

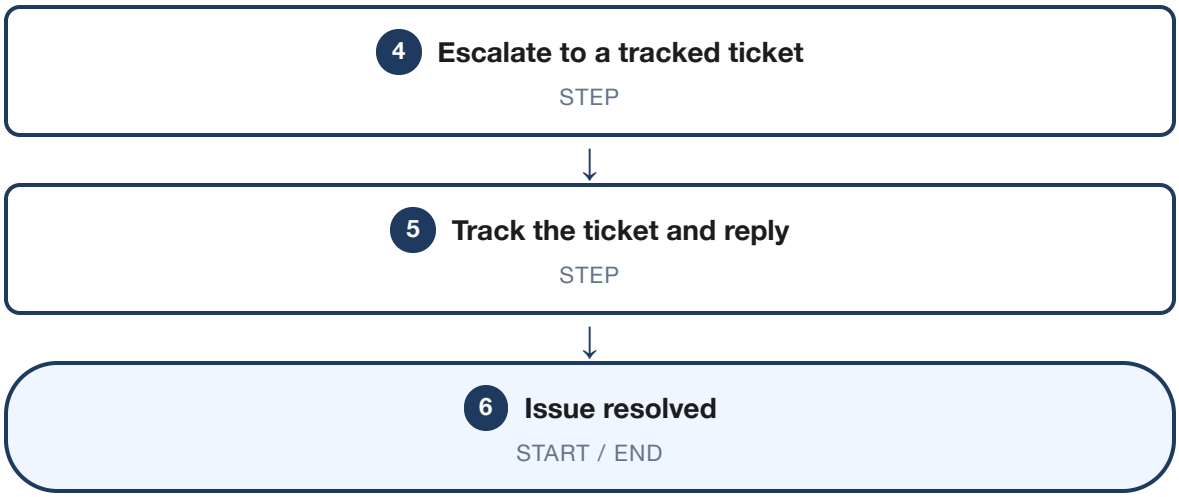

Start a support conversation, escalate it to a tracked ticket, and follow it to resolution.

## Before you start

1. Know the job, booking, or order the issue is about, and have photos or receipts ready.

## Process map

- *Guest:* Guests verify with an email code → Enter name and email to continue
- Enter name and email to continue → Escalate to a tracked ticket

**Text version.** 1. Open /support. 2. Start a support conversation and describe the issue; guests verify with an email code first. 3. If the issue needs human follow-up, it is escalated into a tracked ticket and you get a ticket identifier. 4. Track the ticket on /support/my-tickets/:ticketId: read replies under Messages, answer with the Reply box ("Write your reply..."), and reopen it if needed. 5. The ticket closes when the issue is resolved.

# Steps

## Step 1: Open the support page and start a conversation

Open /support (the Help menu links here). Start a new support conversation and describe what went wrong. The page tells you when escalation is best: "Urgent booking or support failures where normal chat was not enough." Attach an image with "Attach image" when the issue is visible.

> **Expected result:** A support conversation opens and your first message is sent.

## Step 2: Escalate to a tracked ticket when needed

For issues that need a human decision (payment or refund problems, safety or trust issues), escalate the conversation. The page explains "What happens after you submit": the escalation becomes a tracked ticket, the team can follow up by email, and "You get a ticket identifier to reference if the issue continues." Save that identifier.

> **Expected result:** You receive a ticket identifier for the tracked ticket.

### Step 3: Track the ticket and reply to the team

Open your ticket (signed-in users: your tickets list; guests: the ticket link from email). The ticket page shows Category, Priority, and Created, with the "Messages" thread. Write in the Reply box (placeholder "Write your reply...") and choose Reply. If the ticket was closed but the issue continues, reopen it from the support center.

> **Expected result:** Your reply appears in the Messages thread and the team is notified.

## Confirm it worked

The ticket page shows your messages and the team's replies; closed tickets say so and can be reopened.

## If something goes wrong

| Problem | What to do |
| --- | --- |

| | |
|---|---|
| The conversation will not verify (guest). | Use the exact email you started the conversation with and enter the code before it expires. Choose the resend option if nothing arrives. |
| The ticket page fails to load. | Reload and check you opened the current ticket link. If the error persists, start a fresh conversation and reference your ticket identifier. |

## Need help?

For urgent safety issues, use the direct contact option on the escalation page ("Need a faster response?").
