SOP LIBRARY / DELIVERY **ENGLISH**

Request and track deliveries

Guide ID	**other-delivery**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper (driver)
Availability	**Supported**
Online version	/how-it-works/delivery/request-delivery

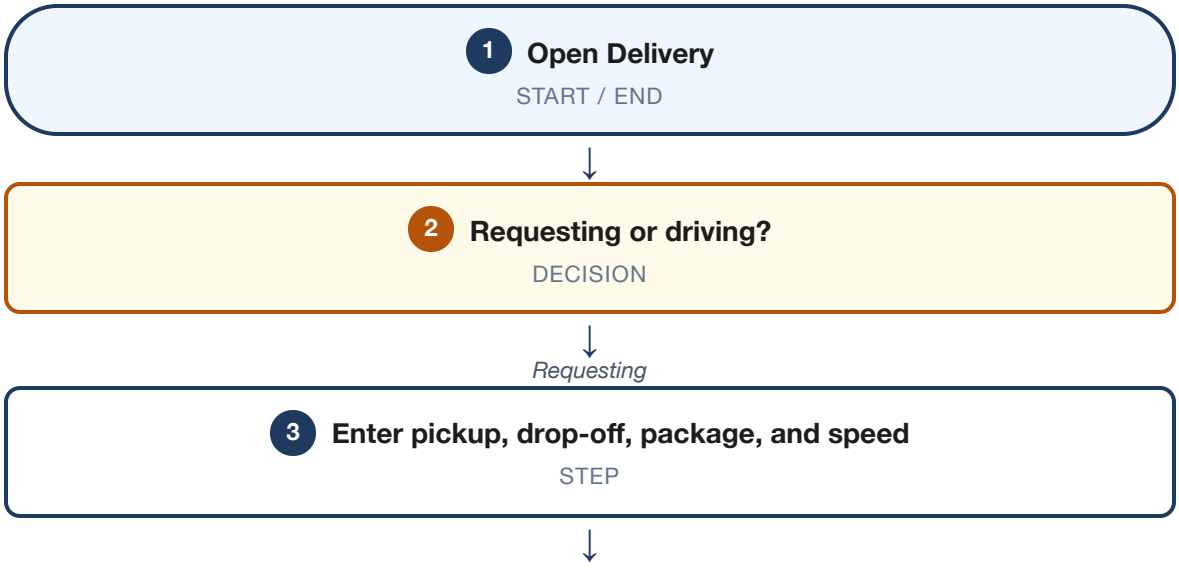

Goal

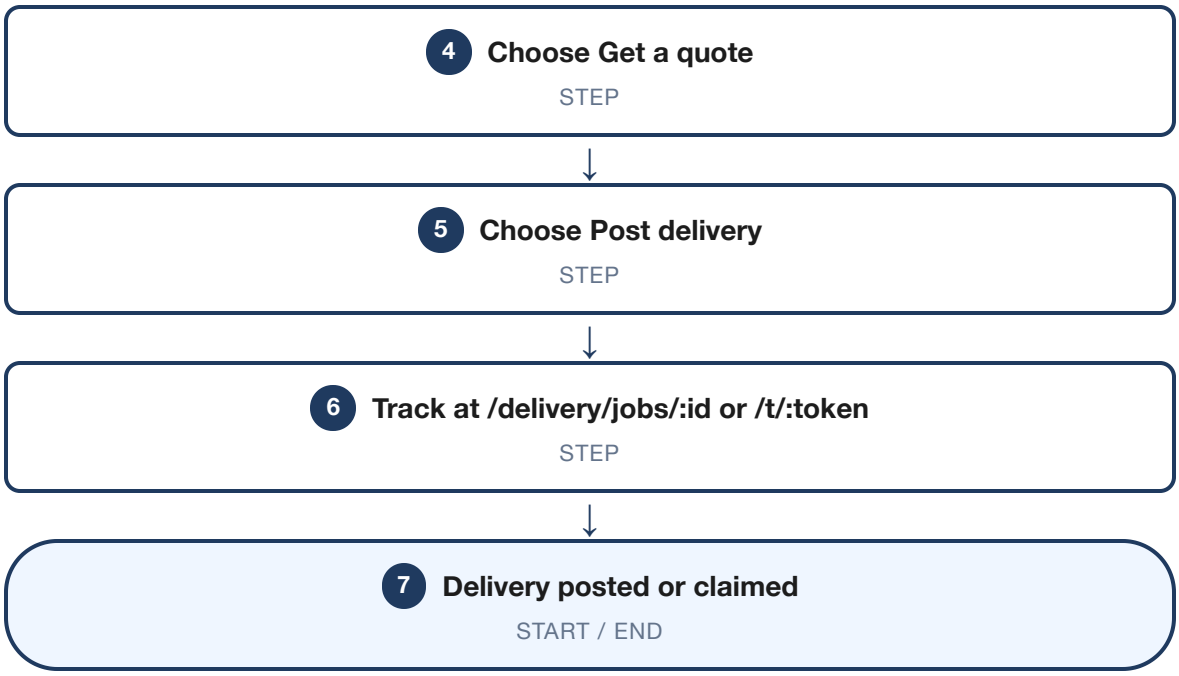

Get a delivery quote, post the delivery job, and track it; or claim a delivery job as a driver.

Before you start

1. Guests can see the landing and get quotes. Sign in to post or claim delivery jobs.

Process map

- *Driving:* Requesting or driving? → Choose Claim delivery on an open job
- Choose Claim delivery on an open job → Delivery posted or claimed

Text version. 1. Open Delivery at /delivery. Guests see the landing page; signed-in users see the delivery workspace. 2. If you are requesting a delivery: enter the Pickup and Drop-off addresses, Package size, Weight (lb), Speed, and Delivery notes. 3. Choose "Get a quote" to see "Your estimated price" with the route distance, duration, and breakdown. 4. Choose "Post delivery" to publish the job. 5. Track it at /delivery/jobs/:id, or share the public tracking link /t/:token. If you are driving: open the driver view titled "Deliver nearby work", choose "Claim delivery" on an open job, and move it through pickup, transit, and drop-off.

Steps

Step 1: Open Delivery and enter the route

Open /delivery. The customer form is titled "Book a delivery" with the body "Tell us where it starts, where it is going, and how quickly it needs to arrive." Enter "Pickup" ("Choose a pickup address") and "Drop-off" ("Choose a drop-off address"). Choose an address suggestion for both stops so the route can be priced accurately.

> **Expected result:** Both stops show selected addresses.

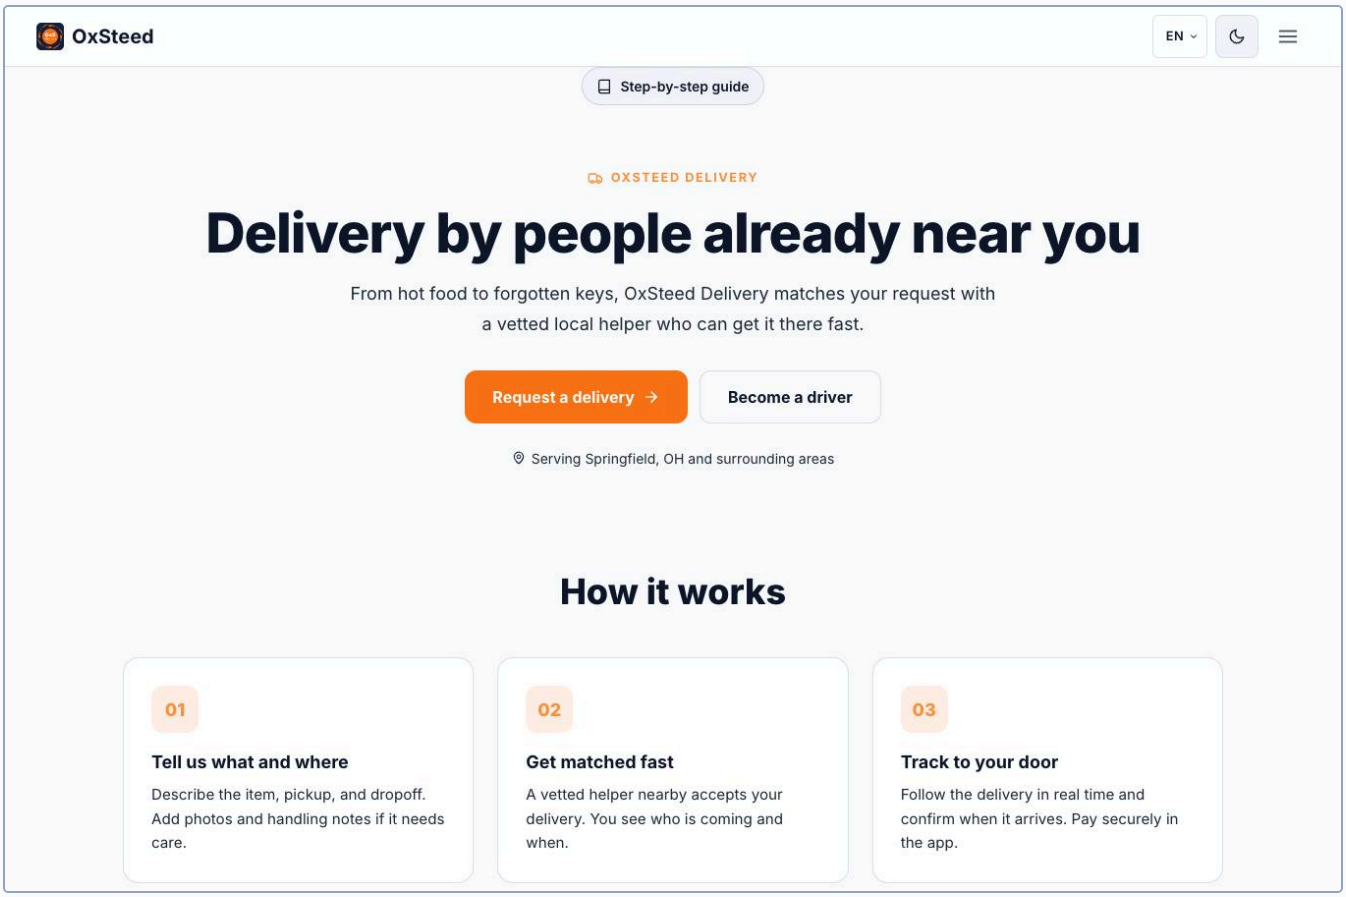

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Delivery by people already near you)*

Step 2: Set package details and get a quote

Set "Package size", "Weight (lb)", "Speed", and "Delivery notes" ("Access instructions, landmarks, or special handling"). Choose "Get a quote". The panel "Your estimated price" shows the route ("{{miles}} mi route", "About {{minutes}} min") and the breakdown: Delivery, Platform fee, Tolls and parking, and Customer total. Quotes expire: "Quote valid for {{minutes}} minutes".

> **Expected result:** The estimated price panel shows the route and the customer total.

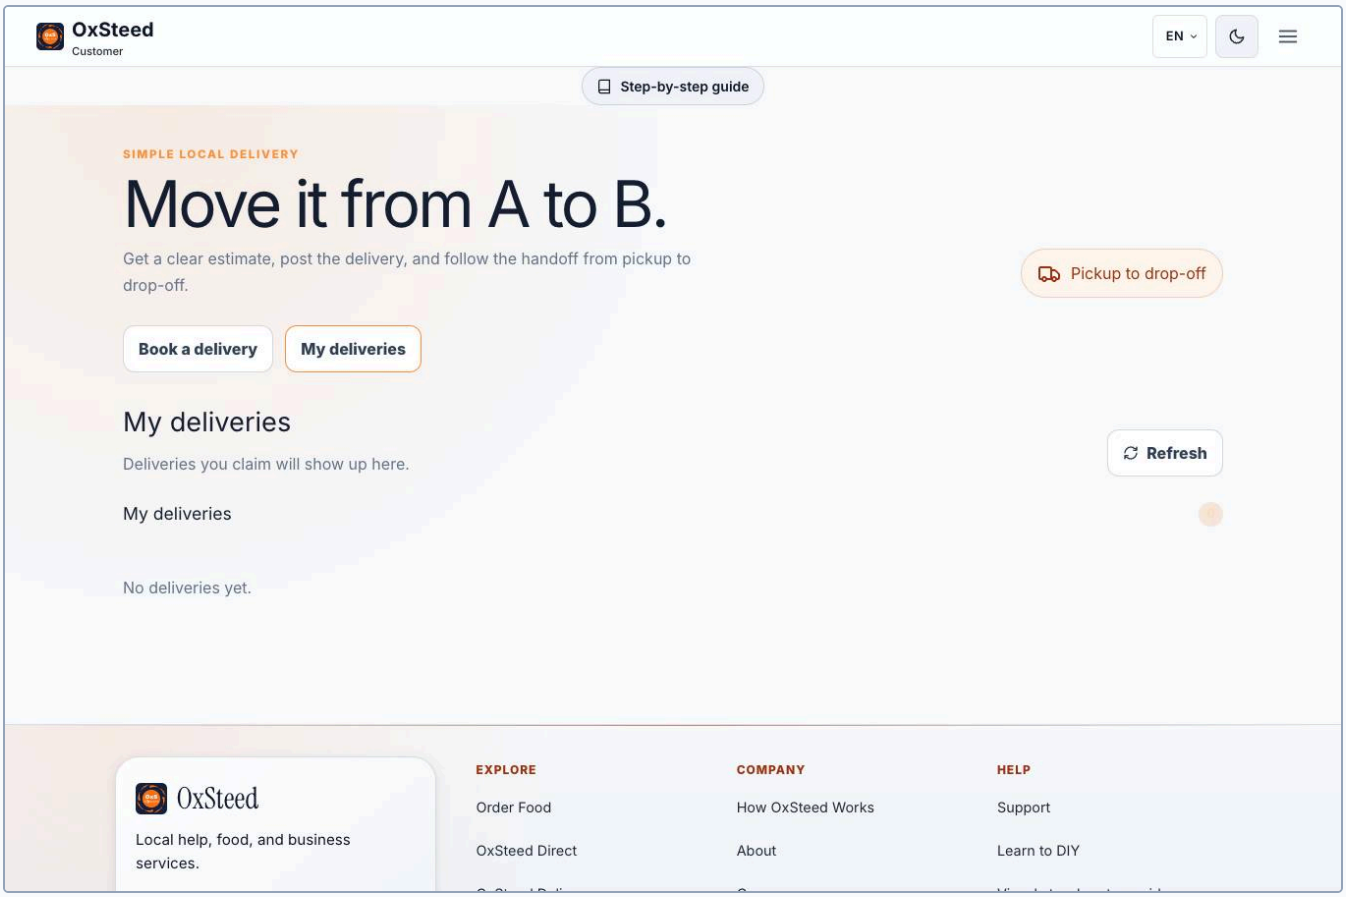

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Move it from A to B.)*

Step 3: Post the delivery and track it

Choose "Post delivery". You see "Delivery posted". Open the job at /delivery/jobs/:id to follow the timeline, message the driver with "Open messages", or cancel with "Cancel delivery" ("Cancelling releases the job and notifies the other party. This cannot be undone."). Share the public tracking link /t/:token with the recipient so they can follow without signing in.

> **Expected result:** The delivery job is posted and tracking is available.

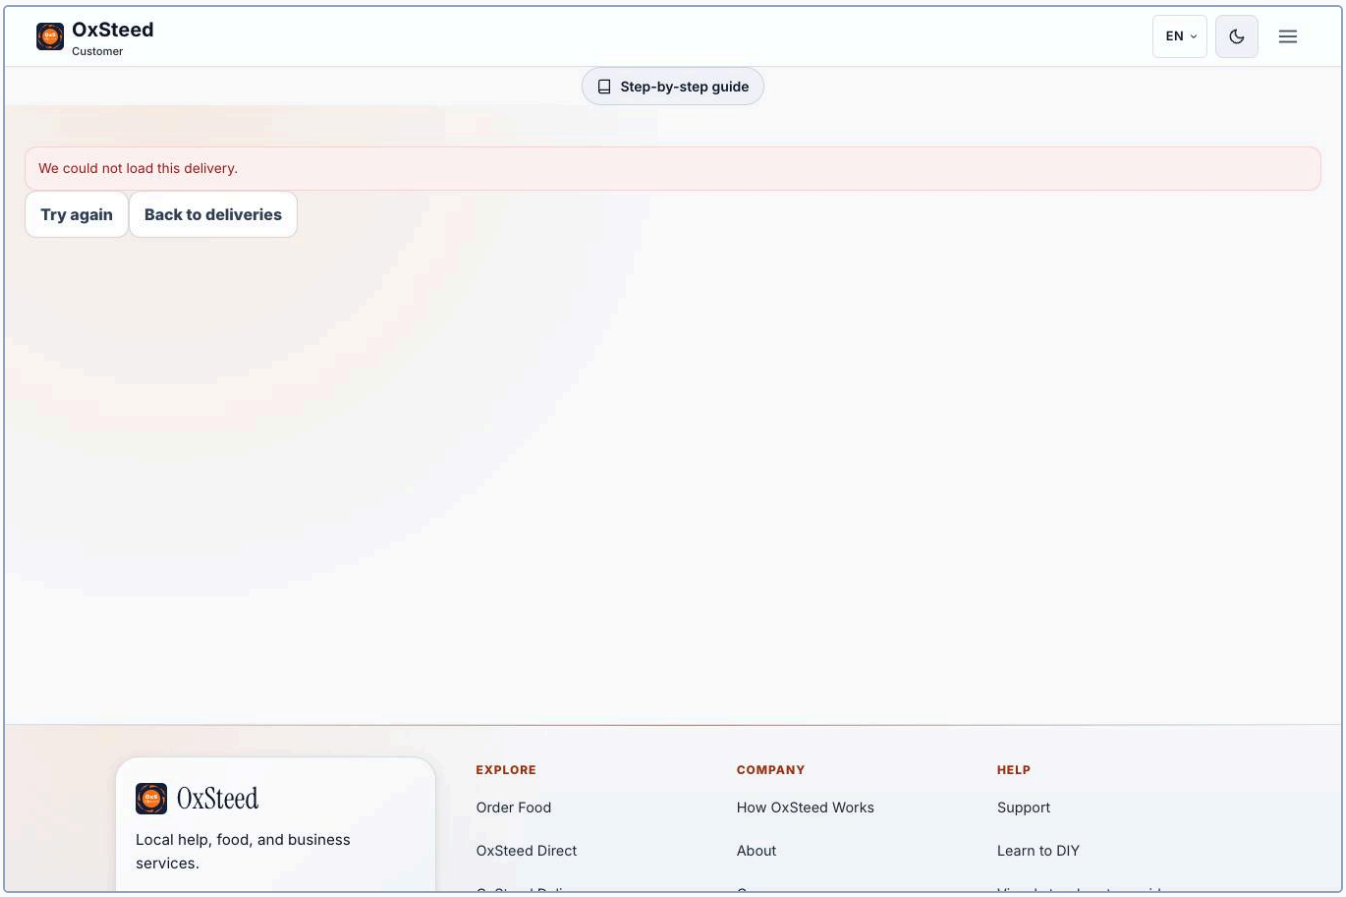

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Delivery job detail with the tracking timeline)*

Step 4: Claim a delivery as a driver

Drivers: open /delivery while signed in as a helper to see the driver view titled "Deliver nearby work" with the body "Claim a route that fits your day and move it through pickup, transit, and drop-off." Open "My deliveries" for your claimed jobs. On an open job choose "Claim delivery", then move it through pickup, transit, and drop-off using the status actions.

> **Expected result:** The job is claimed and appears under "My deliveries".

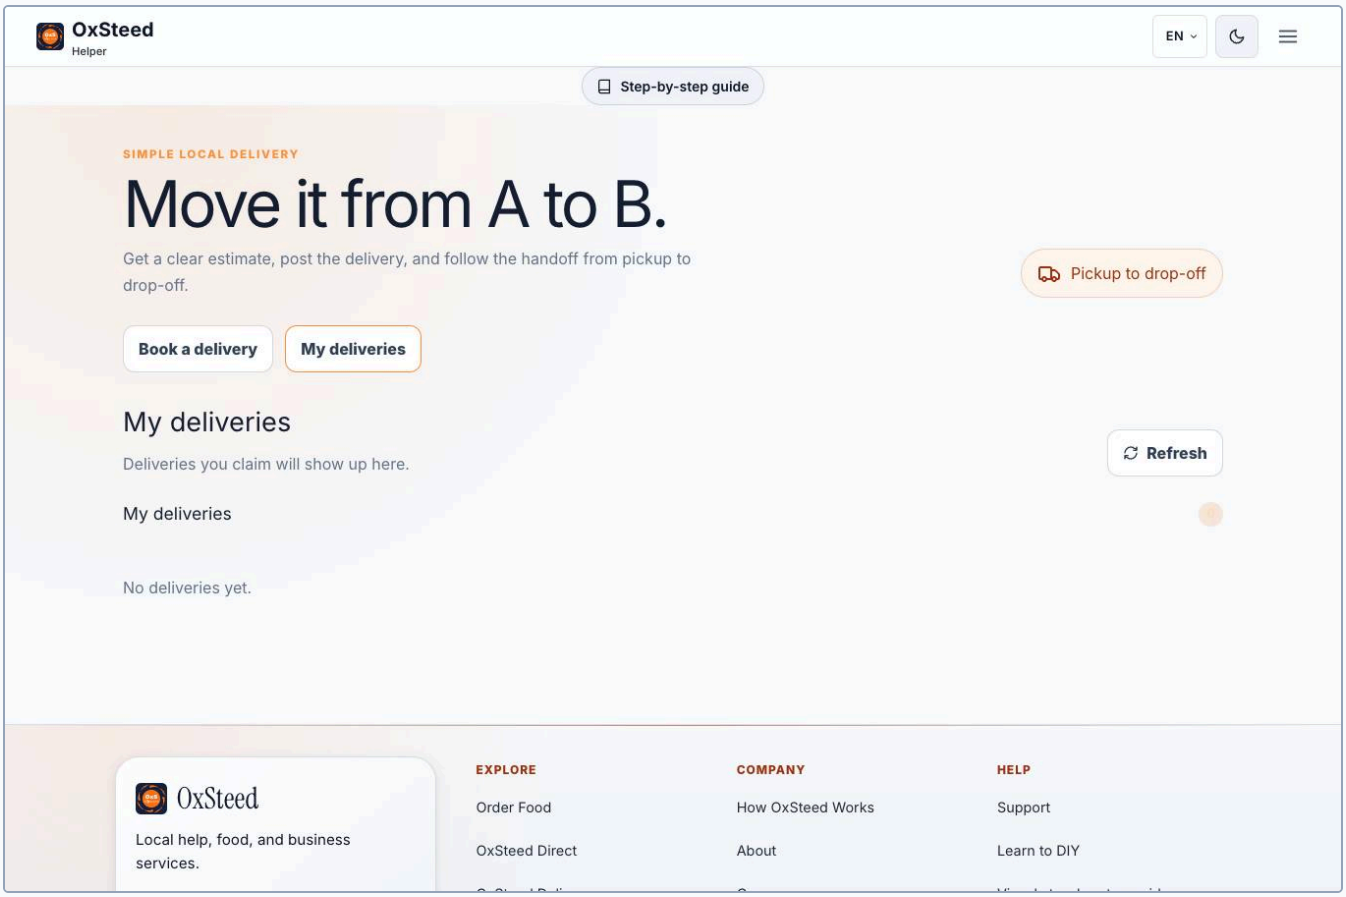

Figure 4. The driver view, desktop view. *(Image description: Synthetic example: Move it from A to B.)*

Confirm it worked

The delivery job is posted and trackable, or claimed and listed under "My deliveries".

If something goes wrong

Problem	What to do

You see "This delivery quote has expired. Get a new quote to continue."	Choose "Get a quote" again to refresh the price, then post.
You see "The delivery details changed after pricing. Get a new quote before posting."	Re-check the stops and package details, then get a fresh quote before posting.
