About this PDF. This PDF was generated from the online guide at **/how-it-works/messages/send-messages**. The online version is the primary, most current edition.

SOP LIBRARY / MESSAGES **ENGLISH**

Message across the platform

Guide ID	**other-messages**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/messages/send-messages

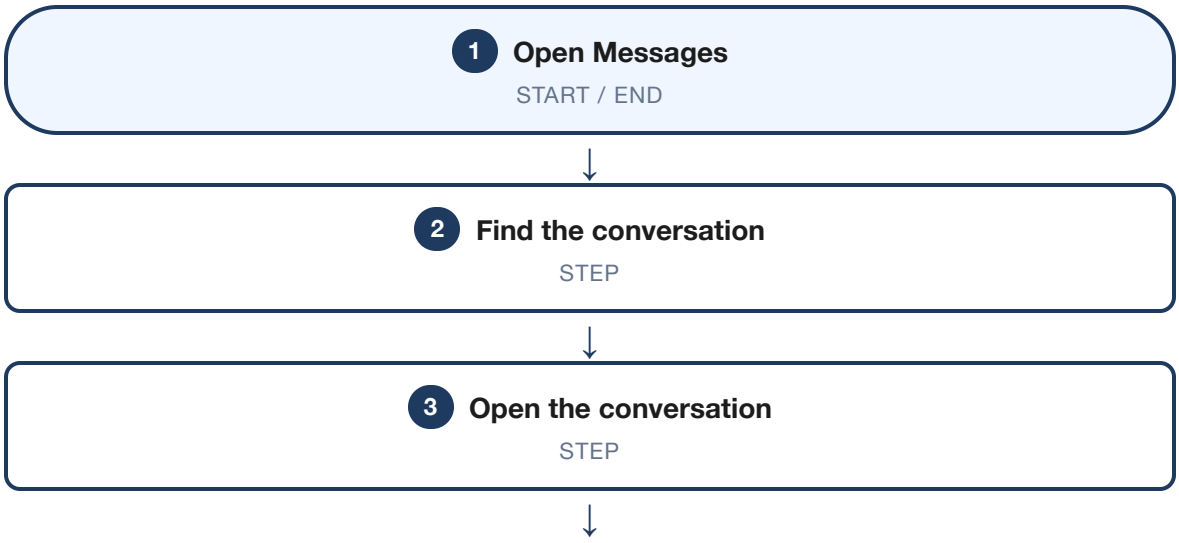

Goal

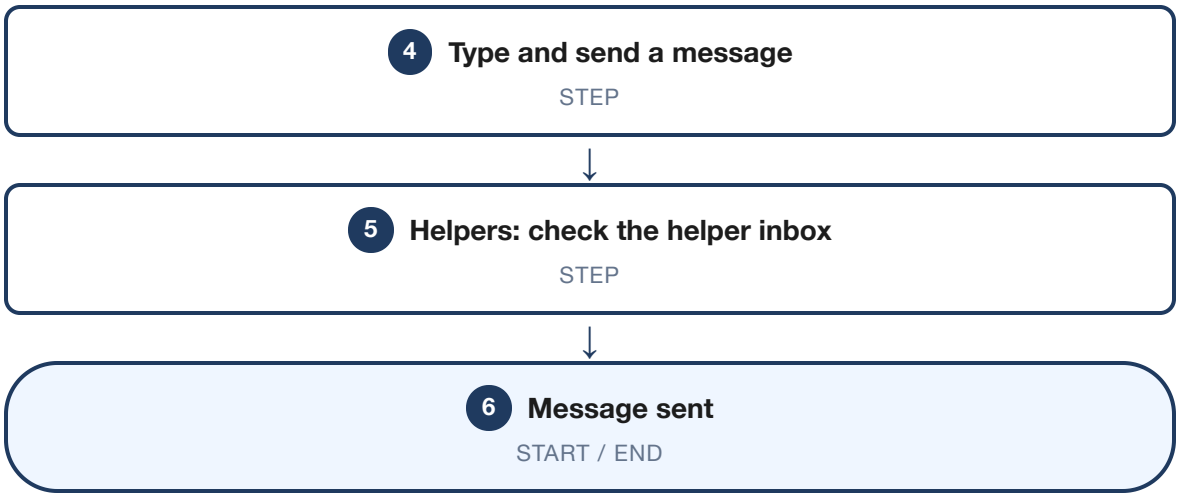

Find a conversation, read messages, and send replies across customer and helper inboxes.

Before you start

1. A signed-in OxSteed account.
2. A job, booking, or inquiry that created a conversation.

Process map

Text version. 1. Open Messages at /messages. 2. Find the conversation in the list; an empty inbox shows "No conversations yet". 3. Open the conversation at /messages/:conversationId. 4. Type in the "Type a message…" box and choose "Send". 5. Helpers have a separate inbox at /helper/messages with the same flow. 6. Your message is delivered and marked seen when read.

Steps

Step 1: Open the Messages inbox

Open /messages while signed in. The page is titled "Messages". The conversation list shows recent threads with unread badges. An empty inbox shows "No conversations yet". Helpers also have a dedicated inbox at /helper/messages with the same layout.

> **Expected result:** Your conversations are listed, newest first.

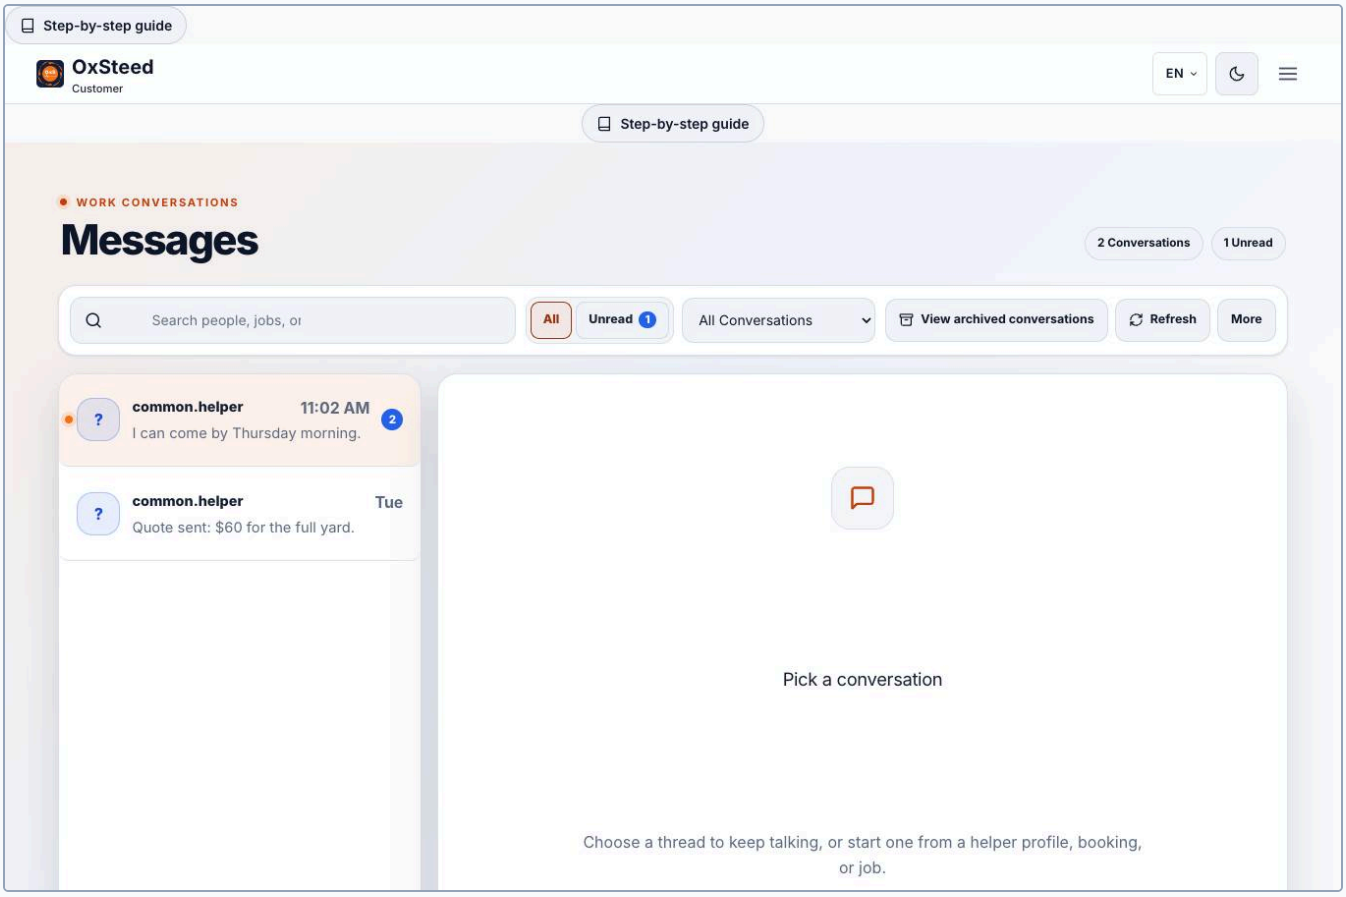

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Step 2: Open a conversation

Choose a conversation to open /messages/:conversationId. The thread shows message history with timestamps ("Today", "Yesterday") and seen indicators. If the conversation is missing, the page shows a not-found message.

> **Expected result:** The full message thread loads.

Step 3: Type and send a message

Type in the "Type a message…" box at the bottom and choose "Send". The other party sees a typing indicator while you write. Your sent message appears in the thread and shows as seen once read.

> **Expected result:** Your message appears in the thread immediately.

Step 4: Check the helper inbox

Helpers: open /helper/messages for the helper inbox, which mirrors the same flow with helper-context threads (guest inquiries, job conversations). Switch back to /messages for customer-context threads.

> **Expected result:** You see helper-context conversations separately from customer ones.

Confirm it worked

Your message appears in the thread and is marked seen when the other party reads it.

If something goes wrong

Problem	What to do

A conversation is missing from the list.	Check the other inbox (customer vs helper). Guest inquiries also appear under their own entry.
Messages fail to send.	Check your connection and try again. If the thread still fails, contact support at /support.

Need help?

Messaging issues: contact support from the in-app support page at /support.
