Standard Operating Procedures

Customer Handbook

Language: **English**

Revision date: **October 16, 2026**

Guides included: **44**

About this PDF. This handbook was generated from the online guides in the SOP library at **/how-it-works**. The online versions are the primary, most current editions.

Revision info: this edition was generated on 2026-10-16 from the guide data files. Each guide section below carries its own revision line (guide ID and revision number).

Contents

Select a guide to jump to its section.

Account

Verify identity (Didit) (rev 2)
Create an account (rev 2)
Switch between customer, helper, business and other modes (rev 1)
Recover a forgotten password (rev 2)
Privacy controls, data export, account deletion (rev 2)
Manage account settings (rev 3)
Sign in (rev 3)
Get help and track support tickets (rev 2)

Business

Submit specialized intake requests (maintenance, trades, beauty, creative, professional, continuity) (rev 2)

Financial records

Browse archived statements (rev 2)
Download statement exports (rev 3)
Use OxSteed Credit (top-ups, transfers, withdrawals, cards) (rev 2)
Get paid by QR and pay by QR (rev 2)
View receipts (rev 2)
Use Restaurant Credit (per-restaurant wallets) (rev 2)
View statements (rev 2)
View the wallet overview (rev 2)

Hiring

Book a helper, business, or service slot (rev 2)
Cancel a booking or job (rev 2)
Compare bids on a job (rev 2)
Mark a job complete (rev 2)
Open and manage a dispute (rev 2)
Find helpers and services (rev 2)
Manage posted jobs (rev 2)
Message about a job or booking (rev 2)
See payment and order records (rev 2)

Post a job (rev 2)

Request a quote (Direct) (rev 2)

Leave and respond to reviews (rev 2)

Create and sign work agreements (rev 2)

Logistics

Browse logistics campaigns and lanes (rev 2)

Calendar

Manage the calendar (rev 2)

More guides

Get help with vehicle care (rev 2)

Consulting

Request business consulting (rev 3)

Delivery

Request and track deliveries (rev 2)

Direct

Use Direct (OxSteed-operated services) (rev 2)

Media

Use OxSteed Media (feed, posts, communities) (rev 2)

Messages

Message across the platform (rev 2)

More guides

Arrange recurring household work (rev 2)

Rentals

Rent and list tools (rev 2)

Restaurants

Cancel a food order (rev 2)

Order food as a customer (rev 2)
Hand off pickup and delivery orders (rev 2)
Request refunds on restaurant credit and orders (rev 2)

Guide ID: account-identity-verification | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Verify identity (Didit)

Guide ID	**account-identity-verification**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/account/verify-identity

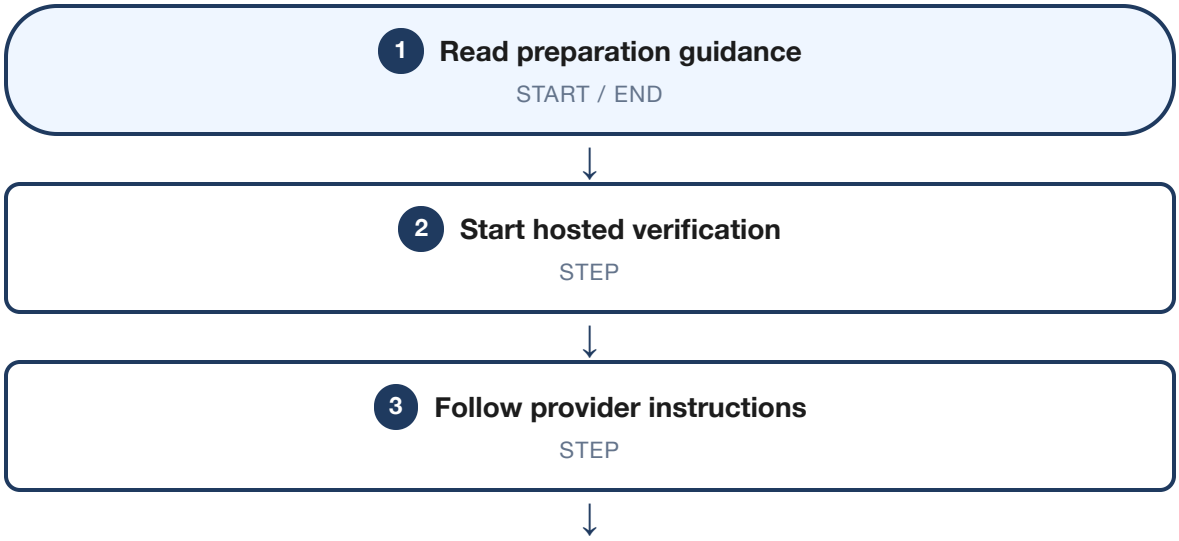

Goal

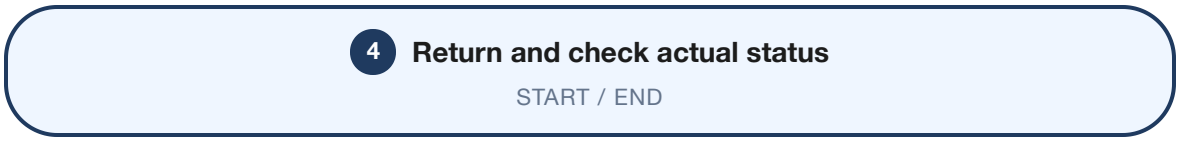

Start hosted identity verification when required, then check the status returned to OxSteed. Other onboarding requirements remain separate.

Before you start

1. Be signed in to your OxSteed account.
2. Have a government ID (passport, driver's license, or national ID) and a camera ready.

Process map

Text version. 1. Read preparation guidance → 2. Start hosted verification → 3. Follow provider instructions → 4. Return and check actual status

Steps

Step 1: Read the OxSteed verification guidance

Open Verify identity and read the document and camera requirements. Identity checks may be required for listing or particular activities. An authorized identity override or skip is separate from other onboarding requirements.

Expected result: You understand the next verification step; no verification is implied by this example.

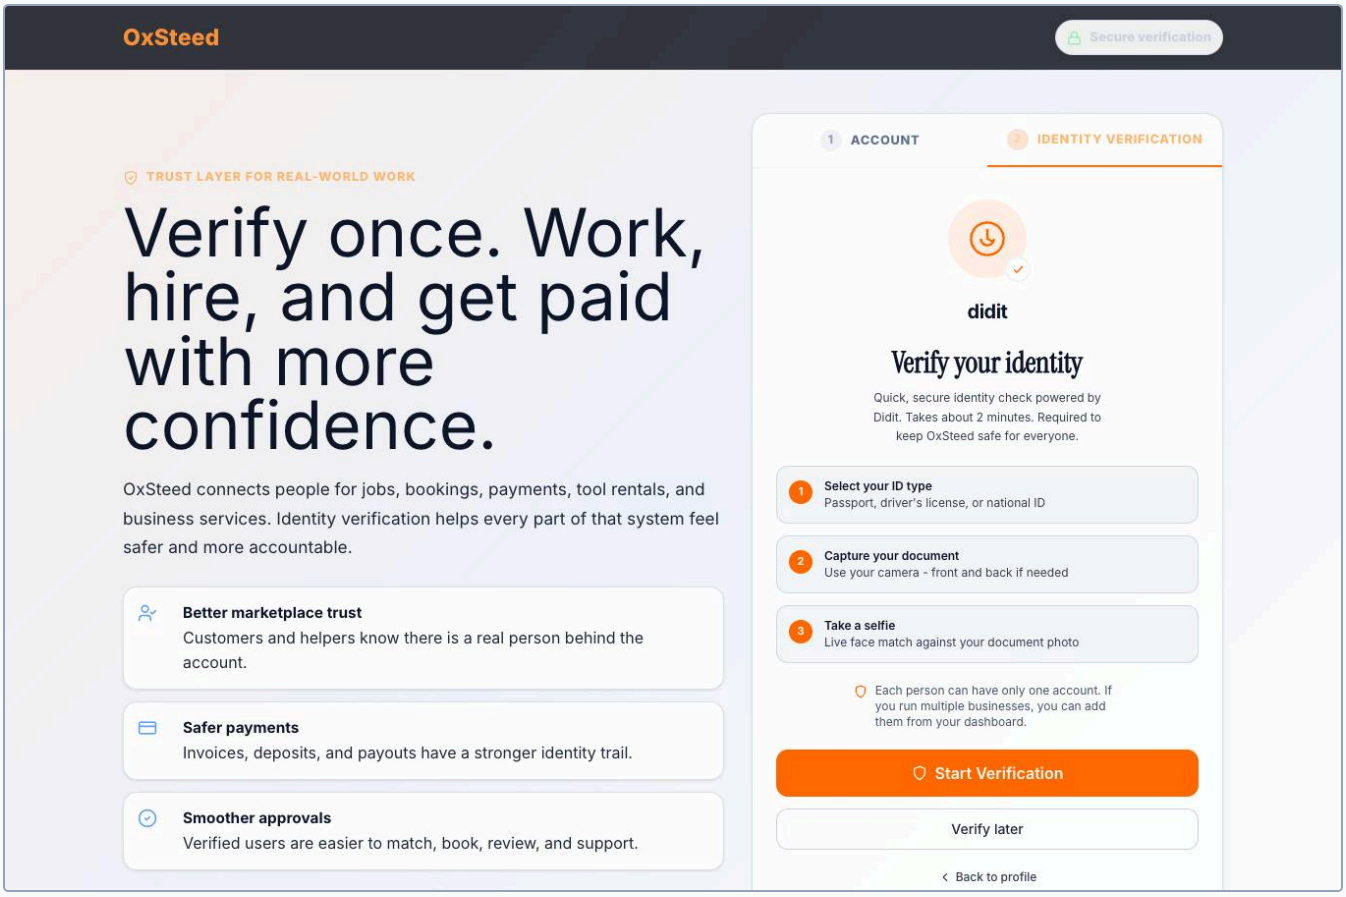

Figure 1. OxSteed preparation and hosted-verification handoff. Provider document and selfie screens are not shown. Synthetic example; no live account data. *(Image description: Synthetic example: Verify once. Work, hire, and get paid with more confidence.)*

Step 2: Start the hosted verification

Choose Start Verification to request a hosted Didit session. If the service is unavailable, follow the error guidance or contact Support. The example shows the OxSteed handoff, not the provider document picker.

> **Expected result:** You understand the next verification step; no verification is implied by this example.

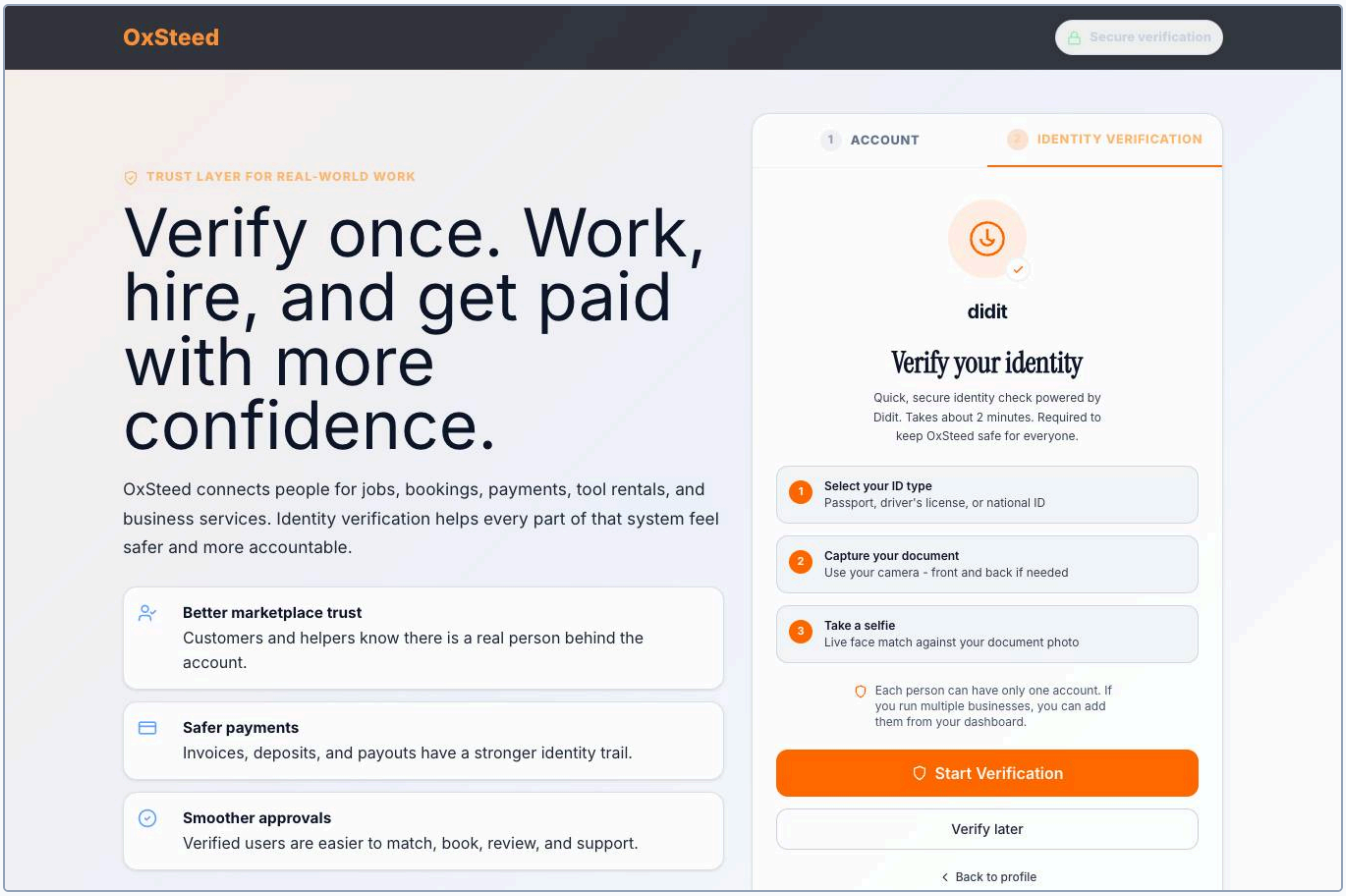

Figure 2. OxSteed preparation and hosted-verification handoff. Provider document and selfie screens are not shown. Synthetic example; no live account data. *(Image description: Synthetic example: Verify once. Work, hire, and get paid with more confidence.)*

Step 3: Follow the provider instructions

In the hosted session, follow the document and selfie instructions shown by Didit. Accepted documents and camera prompts can vary. OxSteed cannot complete those steps by checking this guide. The illustration is the OxSteed preparation screen, not a provider capture screen.

> **Expected result:** You understand the next verification step; no verification is implied by this example.

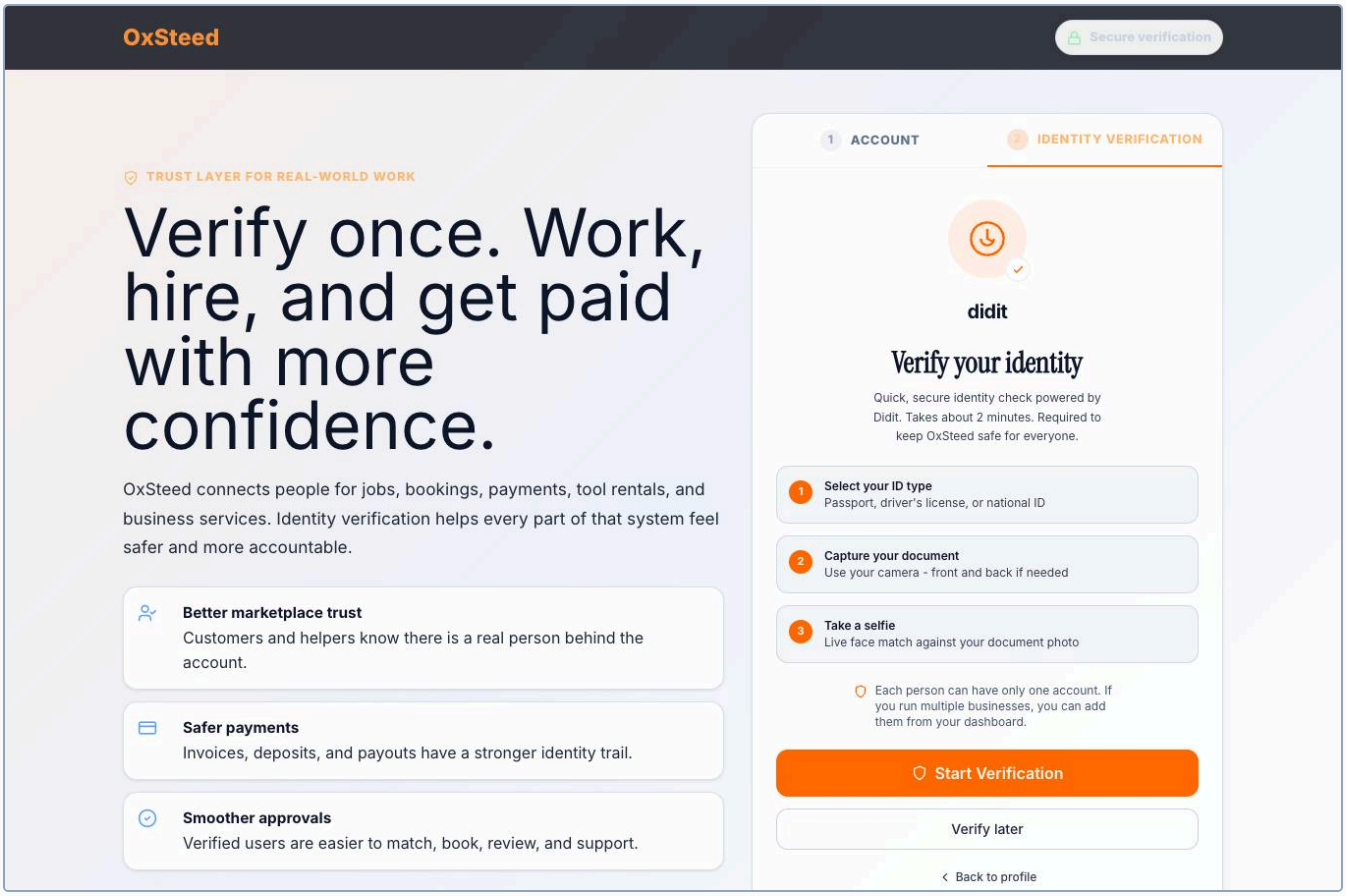

Figure 3. OxSteed preparation and hosted-verification handoff. Provider document and selfie screens are not shown. Synthetic example; no live account data. *(Image description: Synthetic example: Verify once. Work, hire, and get paid with more confidence.)*

Step 4: Return and check your actual status

Return to OxSteed after the hosted session and check the current verification or onboarding status. A pending result needs time or support follow-up; do not treat the return alone as verified.

> **Expected result:** OxSteed shows the latest verification status; remaining onboarding checks are still separate.

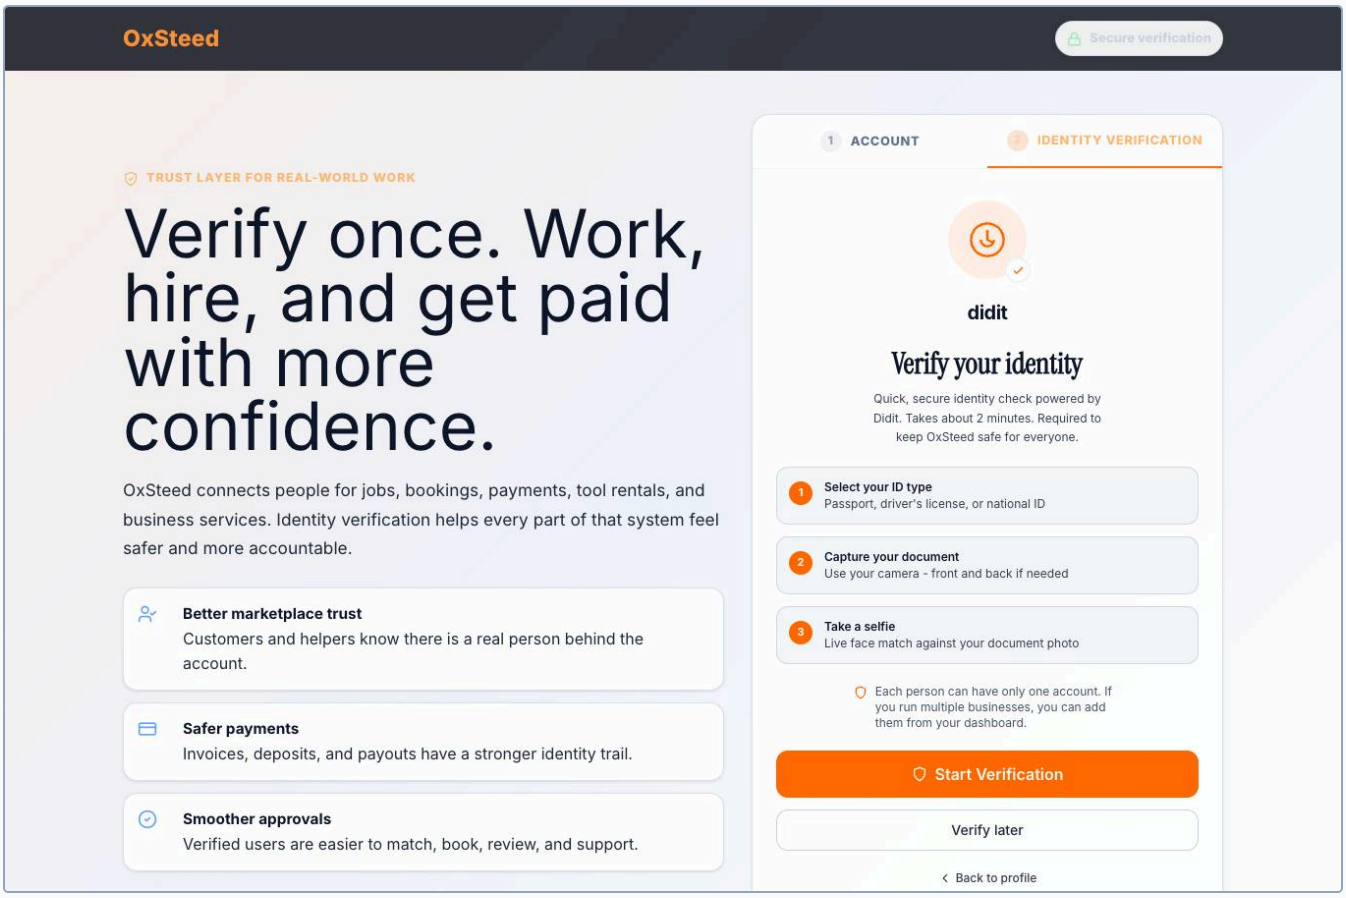

Figure 4. OxSteed preparation and hosted-verification handoff. Provider document and selfie screens are not shown. Synthetic example; no live account data. *(Image description: Synthetic example: Verify once. Work, hire, and get paid with more confidence.)*

Confirm it worked

Confirm the actual identity status in OxSteed. Identity approval does not complete email, terms, profile, background-check, or other work requirements.

If something goes wrong

Problem	What to do
Verification fails repeatedly.	Use a clear, uncreased photo of the ID in good lighting, remove glare, and make sure the selfie matches the document photo. Try again with better lighting.
You see "Account Already Exists" (This identity is already linked to an existing OxSteed account).	Each person can have only one account. Sign in to that account instead of creating a new one; run multiple businesses from the same dashboard.
The verification cannot start ("Could not start verification").	Reload the page and try again. If it still fails, the verification service may be unavailable; choose "Verify later" and return another time.

Need help?

If your ID is valid but verification keeps failing, contact support from the Help menu or visit /support.

Guide ID: account-join | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Create an account

Guide ID	**account-join**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/account/join-oxsteed

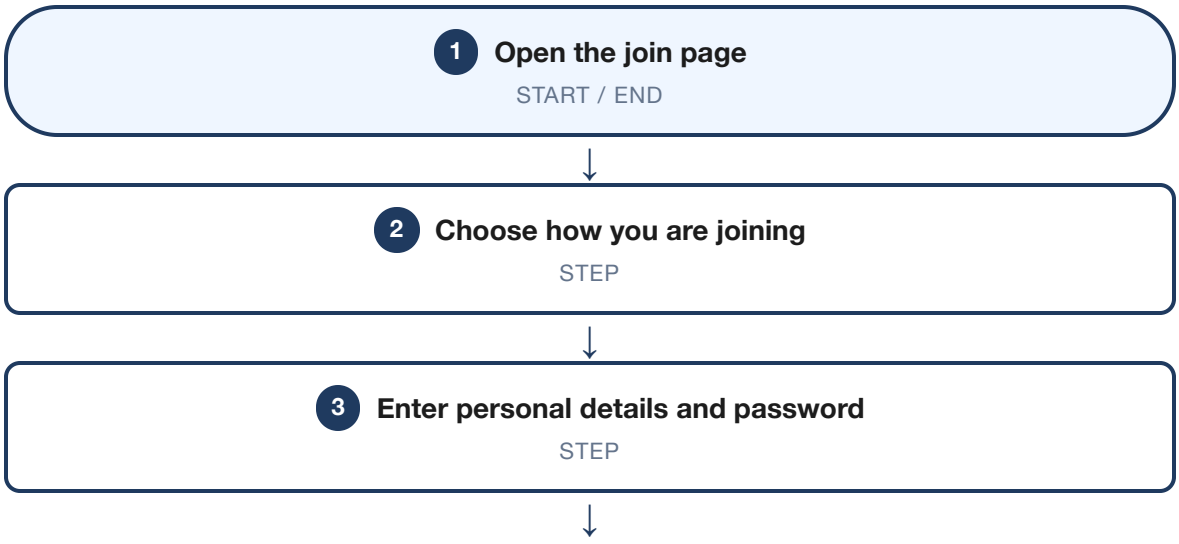

Goal

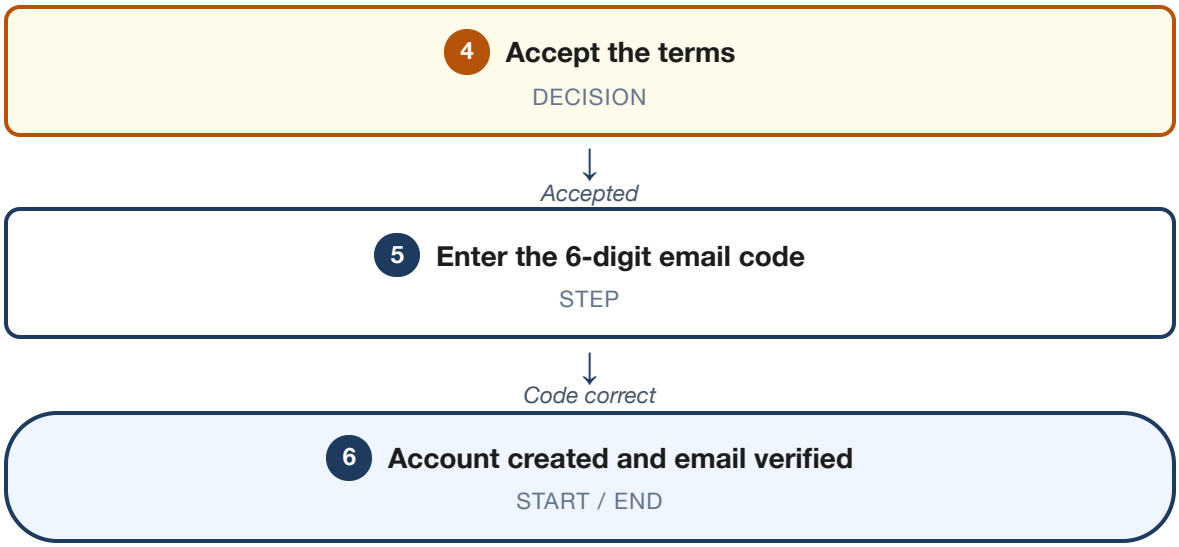

Create your OxSteed account so you can hire helpers, offer services, or run a business.

Before you start

1. Have an email address you can open right away; you will receive a 6-digit verification code.
2. Know your ZIP code; it is used to match you with nearby helpers and jobs.

Process map

- *Not accepted:* Accept the terms → Enter personal details and password
- *No code received:* Enter the 6-digit email code → Resend the code or edit details
- Resend the code or edit details → Enter the 6-digit email code

Text version. 1. Open the Join OxSteed page. 2. Under "I'm joining as", pick Customer, Helper, or Business Owner. 3. Enter your personal details and a password. 4. Accept the terms to continue. 5. Open the email OxSteed sent you and enter the 6-digit code. If the code never arrives, use "Resend code" or "Wrong email or phone? Edit details". 6. Your account is created and your email is verified.

Steps

Step 1: Open the join page and choose how you are joining

Choose Join in the top navigation, or open /join directly. The page heading is "Join OxSteed" with the subtitle "One account. Pick how you want to show up." Under "I'm joining as", select one of the mode cards: Customer ("Post jobs, hire helpers, shop the marketplace."), Helper ("Offer services, bid on jobs, build your reputation."), or Business Owner ("Run a service business with clients, invoices, and a team.").

> **Expected result:** The mode card you picked shows a check mark as the selected mode.

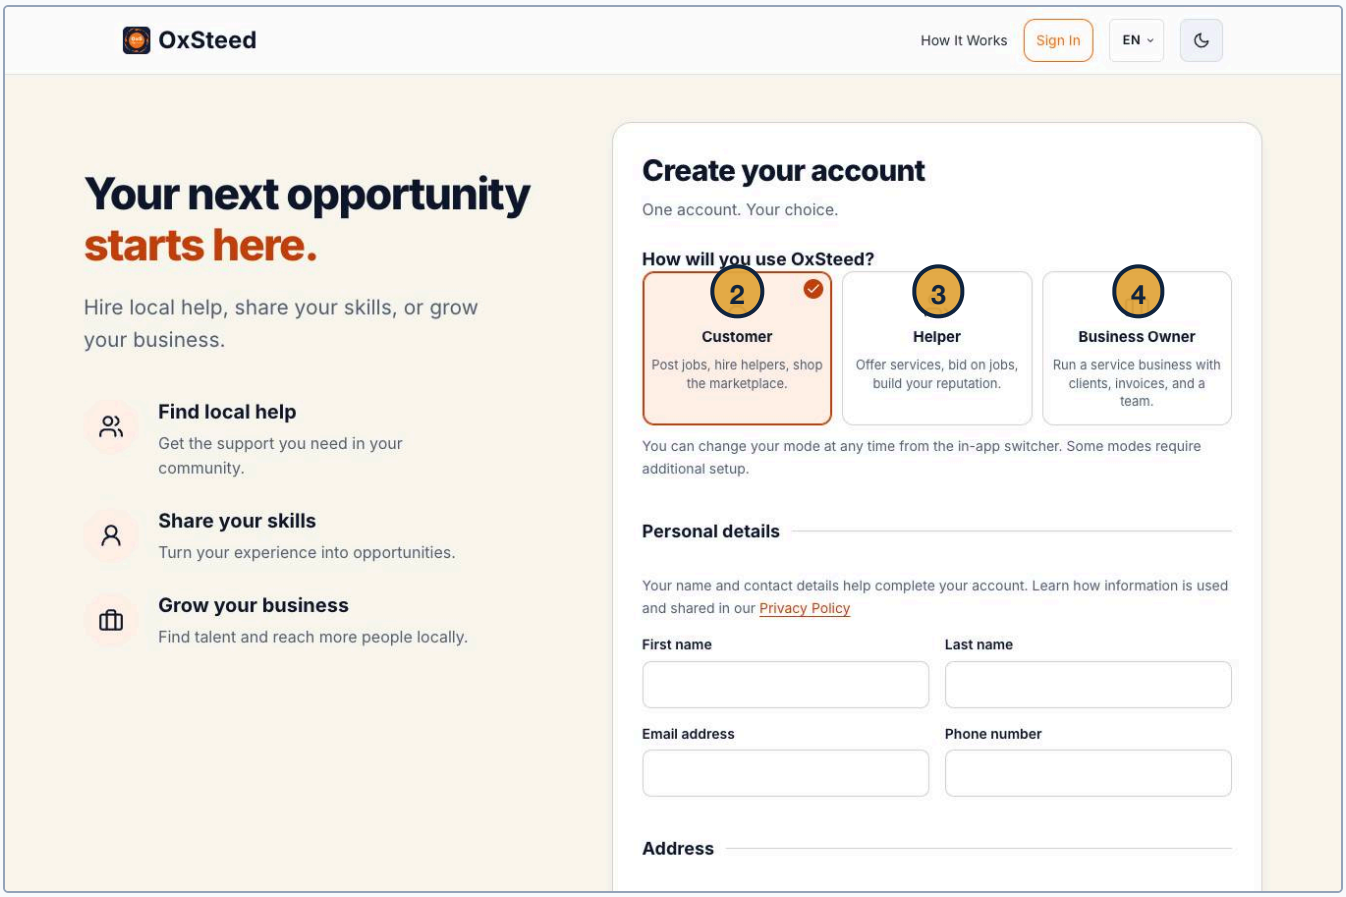

Figure 1. Choose how you are joining before you fill in the form. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **2.** Customer card
2. **3.** Helper card
3. **4.** Business Owner card

Step 2: Enter your personal details and a password

Fill in First name, Last name, Email address, and Phone number. Then complete the address section: Country, Street address, City, State, and ZIP code. Choose a password in the password field (a show-password toggle is available). Email availability is checked as you type.

> **Expected result:** Every field shows an entered value and no red validation errors.

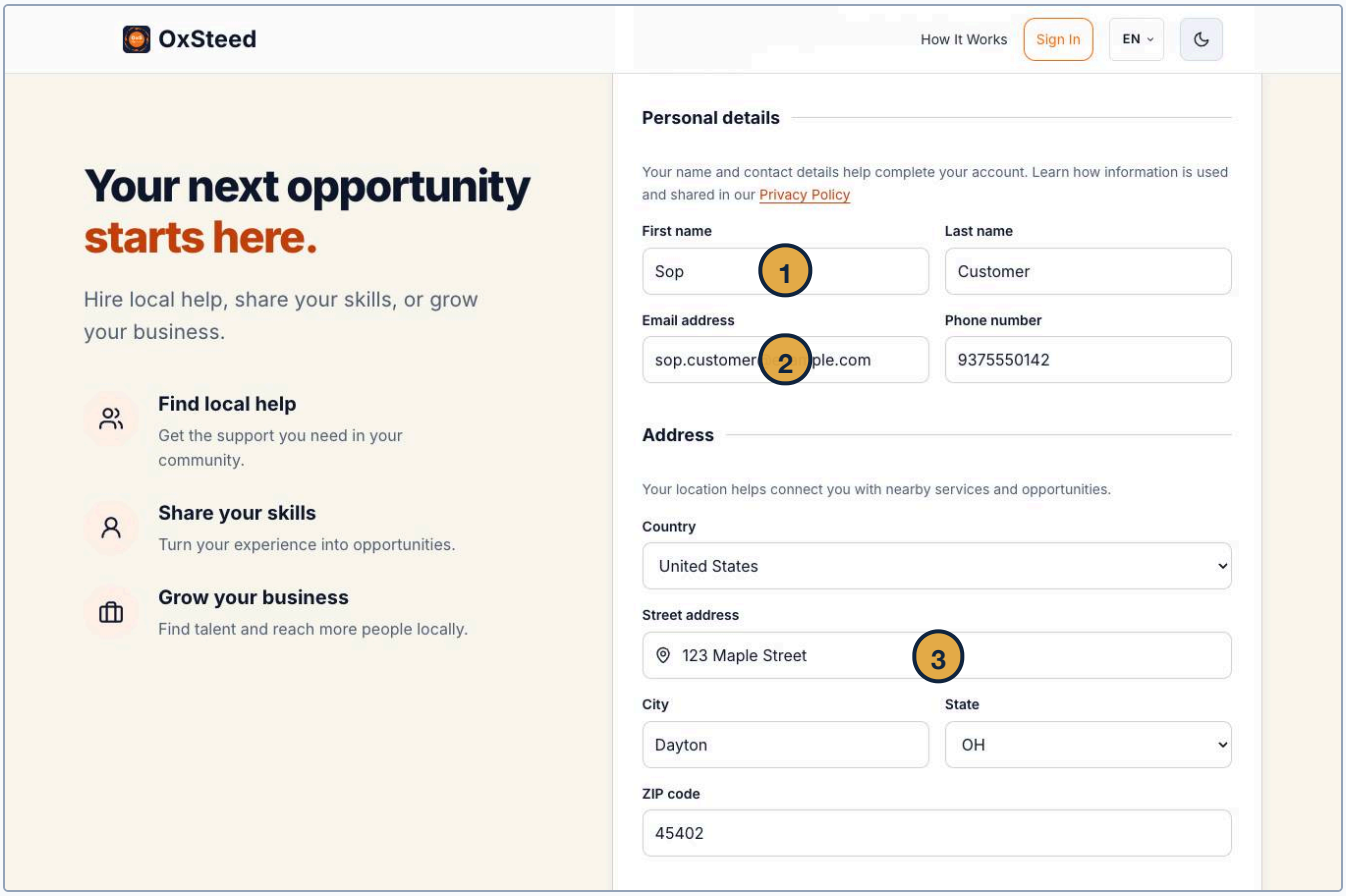

Figure 2. The personal details section of the join form. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **1.** First name and Last name
2. **2.** Email address
3. **3.** Address fields

Step 3: Accept the terms and continue

Tick the checkbox next to "I agree to OxSteed's" terms and privacy links, then choose Continue. Without the checkbox ticked, the form will not submit.

> **Expected result:** The form submits and the "Check your email" step appears.

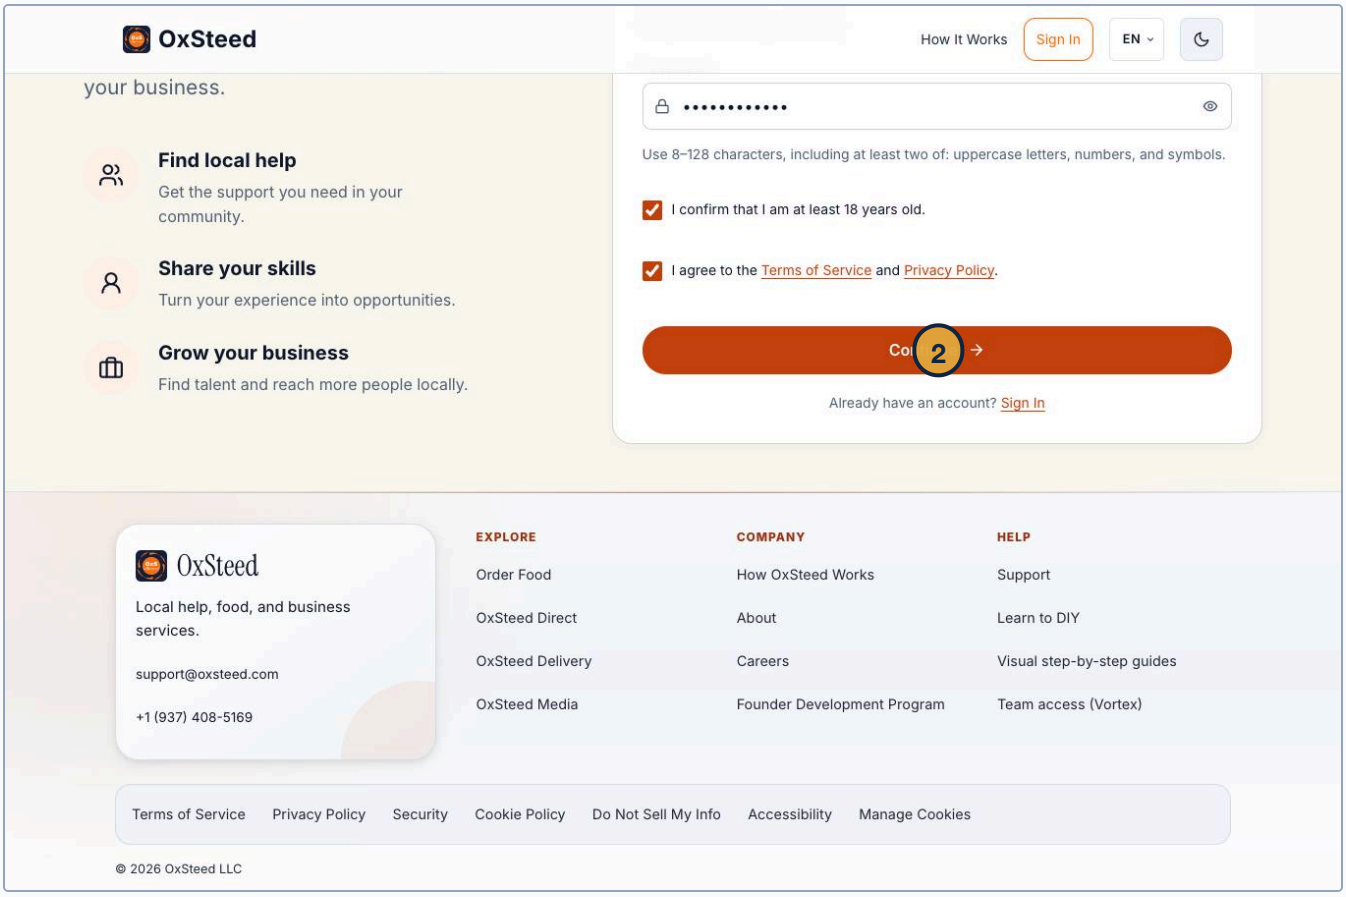

Figure 3. Accept the terms, then choose Continue. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **2.** Continue button

Step 4: Verify your email with the 6-digit code

The page now shows "Check your email" with the hint "We sent a 6-digit code to" your address. Open the email and type the code into the code boxes, then choose "Verify Email & Continue". If nothing arrives, choose "Resend code". If you typed the wrong address, choose "Wrong email or phone? Edit details" to go back and fix it.

> **Expected result:** The code is accepted and you are signed in to your new account.

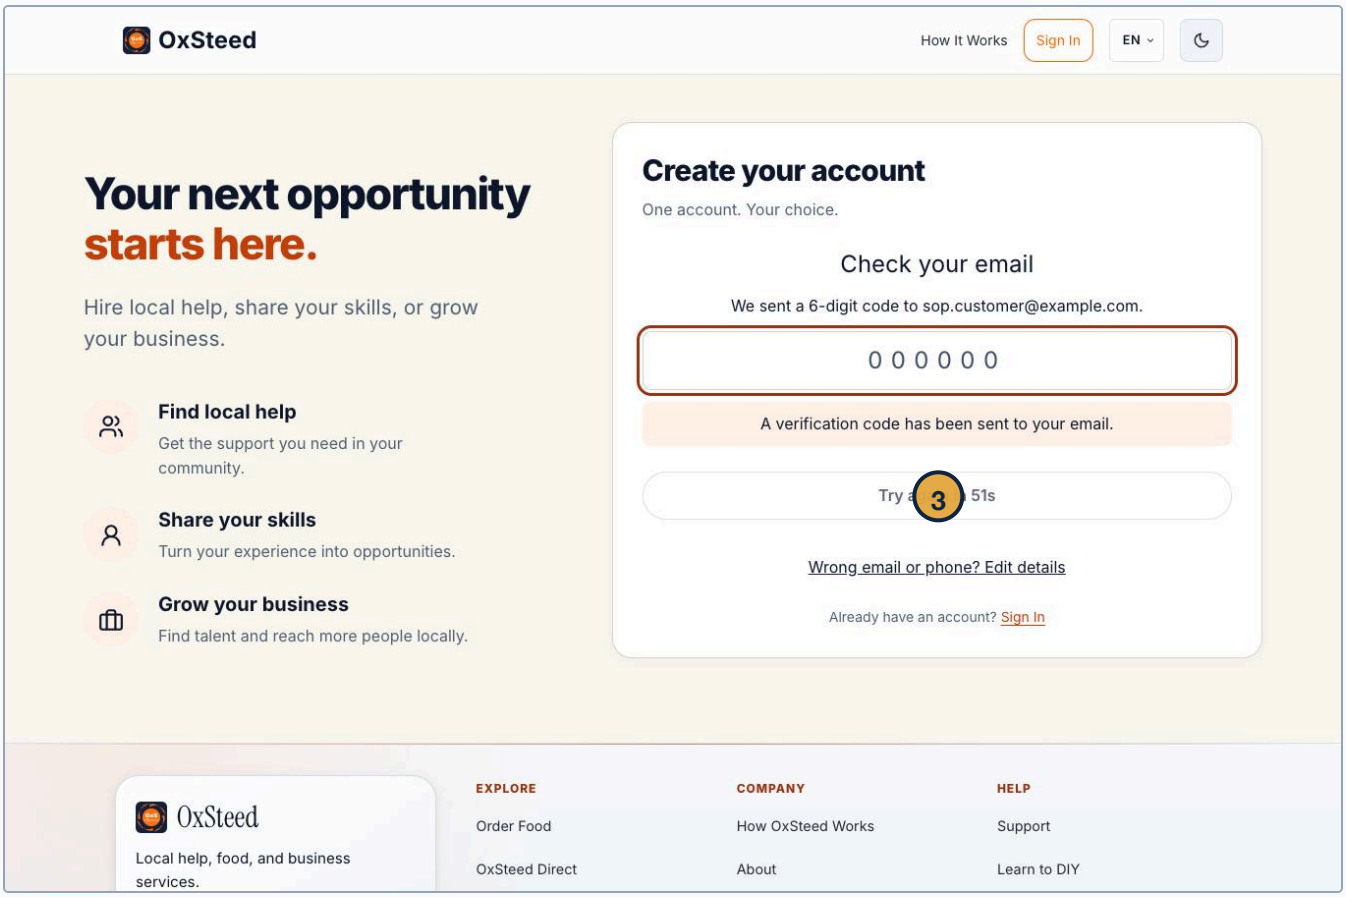

Figure 4. Enter the 6-digit code from your email. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **3.** Resend code link

Confirm it worked

You land on your dashboard, signed in, and your email shows as verified. Your selected mode (Customer, Helper, or Business Owner) is active.

If something goes wrong

Problem	What to do
The email address is reported as already taken.	That address already has an OxSteed account. Use the sign-in guide instead, or choose "Forgot password?" if you cannot get in.
The 6-digit code never arrives.	Check your spam folder, confirm the address is spelled correctly with "Wrong email or phone? Edit details", then choose "Resend code". Wait a few minutes before requesting again.
The Continue button does nothing.	Look for a highlighted field: the terms checkbox must be ticked, and every required field must be filled. The ZIP code must be valid.

Need help?

If you cannot create an account after retrying, contact support from the Help menu or visit /support.

Guide ID: account-mode-switching | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Switch between customer, helper, business and other modes

Guide ID	**account-mode-switching**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/switch-modes

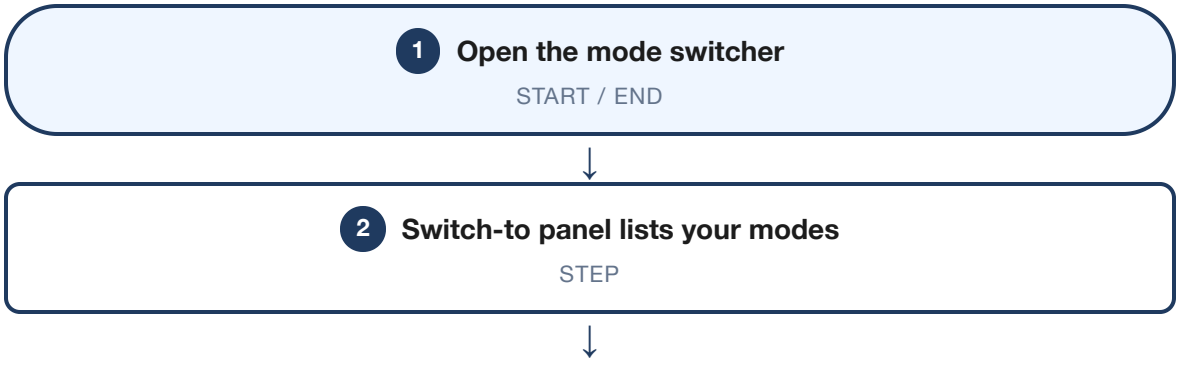

Goal

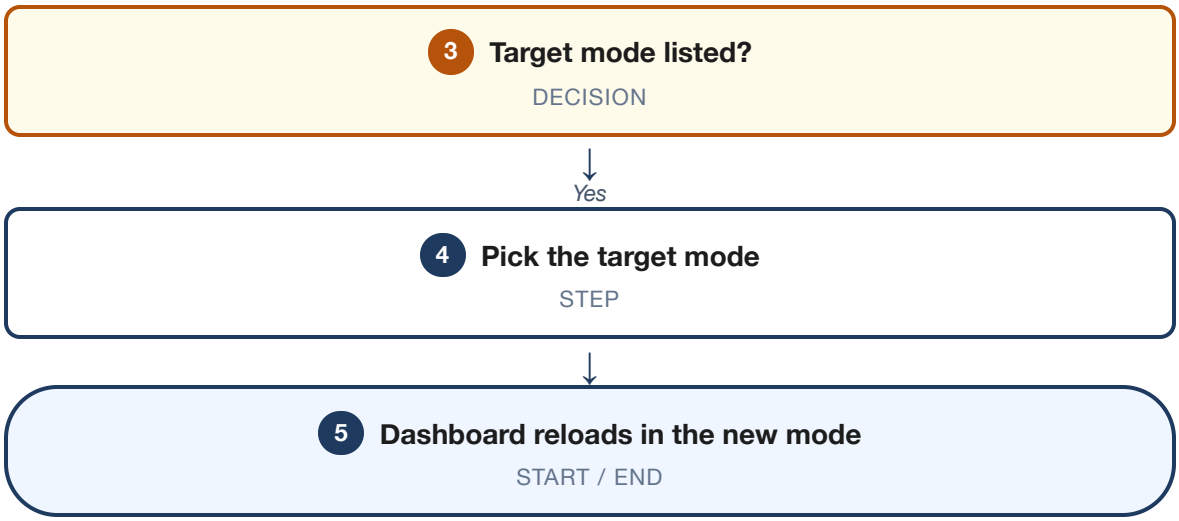

Switch between the modes you belong to (Customer, Helper, Business Owner and granted team modes) without signing out.

Before you start

1. Be signed in to your OxSteed account.
2. Granted modes (business team roles) require a workspace invitation; they do not appear until you accept it.

Process map

- *No:* Target mode listed? → Request or accept a workspace invitation
- *After grant accepted:* Request or accept a workspace invitation → Switch-to panel lists your modes

Text version. 1. In the top navigation, choose the mode button that shows "Mode" and your current mode. 2. The "Switch to" panel lists every mode available to you; your current mode carries a "Current" badge. 3. Choose the mode you want. The button briefly shows "Switching..." and a "Switched to" toast confirms it. 4. Your dashboard reloads for the new mode. If a mode is missing, it is granted by a workspace owner; accept the invitation first.

Steps

Step 1: Open the mode switcher in the navigation

Find the mode switcher button in the top navigation: it shows the label "Mode" with your current mode name next to a colored dot. Choose it to open the switcher panel.

> **Expected result:** The "Switch to" panel opens beneath the button.

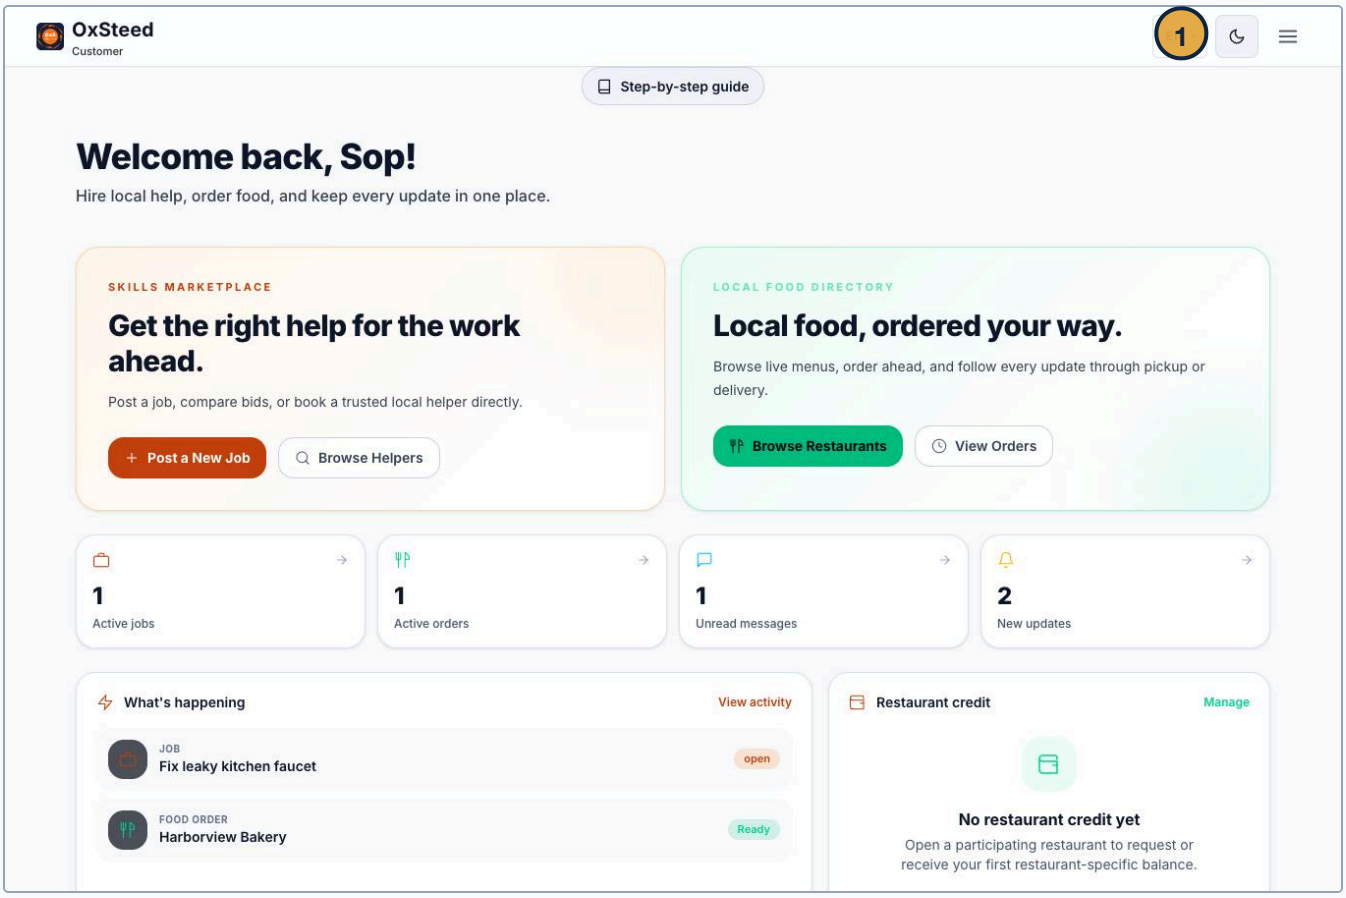

Figure 1. The mode switcher in the top navigation. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Mode switcher button

Step 2: Pick the mode you want to use

The panel is titled "Switch to" and lists your available modes: self-selectable modes such as Customer, Helper, and Business Owner, plus any granted modes (business team roles) a workspace owner gave you. Your current mode shows a "Current" badge and is disabled. Choose the target mode row; it briefly shows "Switching...".

> **Expected result:** A "Switched to" toast confirms the change and the dashboard reloads.

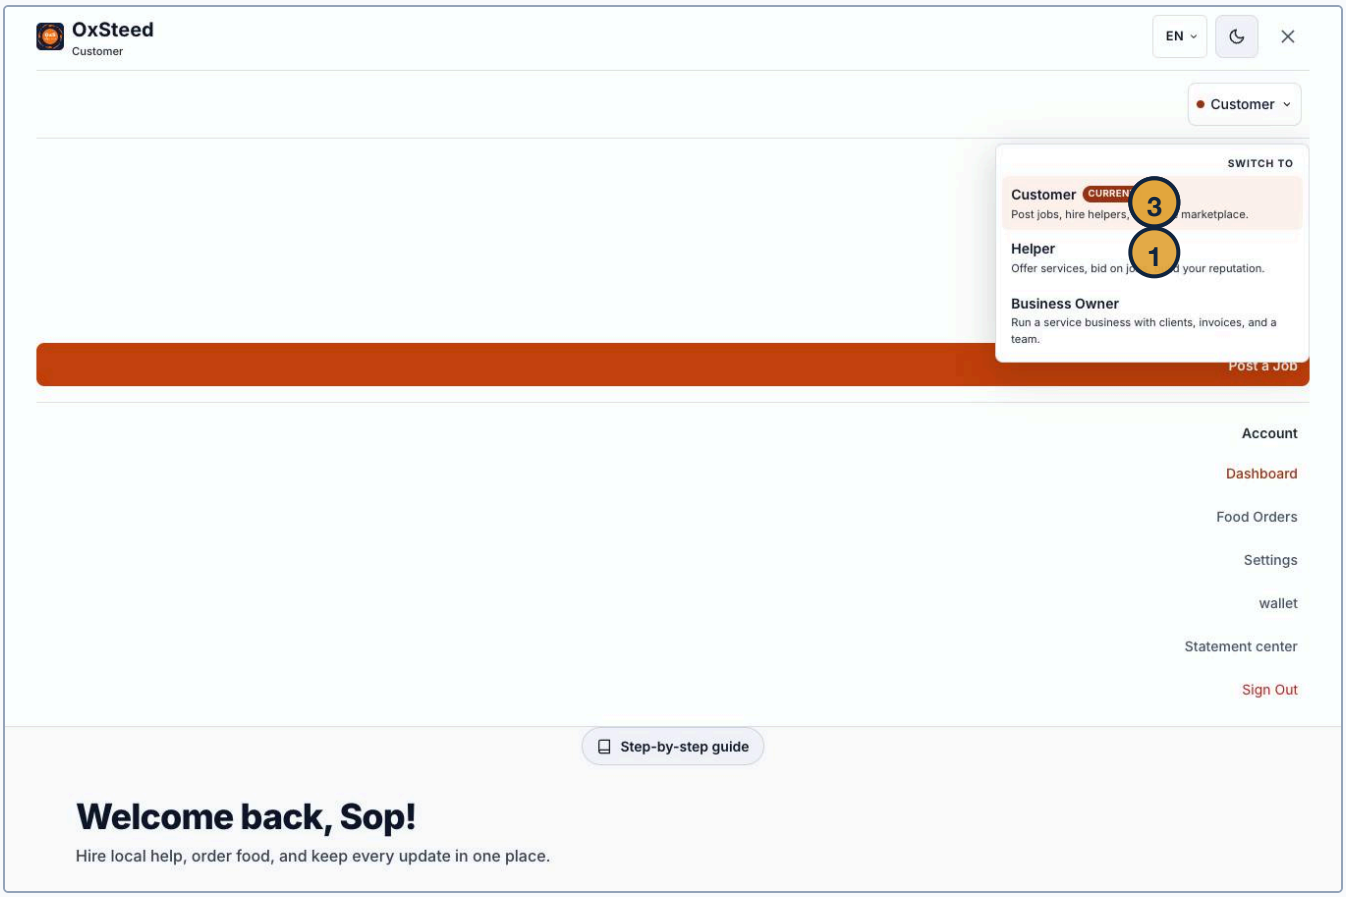

Figure 2. The Switch to panel with your available modes. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Switch to panel
2. **2.** Current badge
3. **3.** Target mode row

Step 3: Confirm the new mode is active

The mode button in the navigation now shows the new mode name, and the dashboard renders that mode's home screen (for example, Helper shows the helper dashboard). If the wrong dashboard appears, your effective mode may fall back to your original account type; check Settings, Account Type.

> **Expected result:** The navigation shows the new mode and the dashboard matches it.

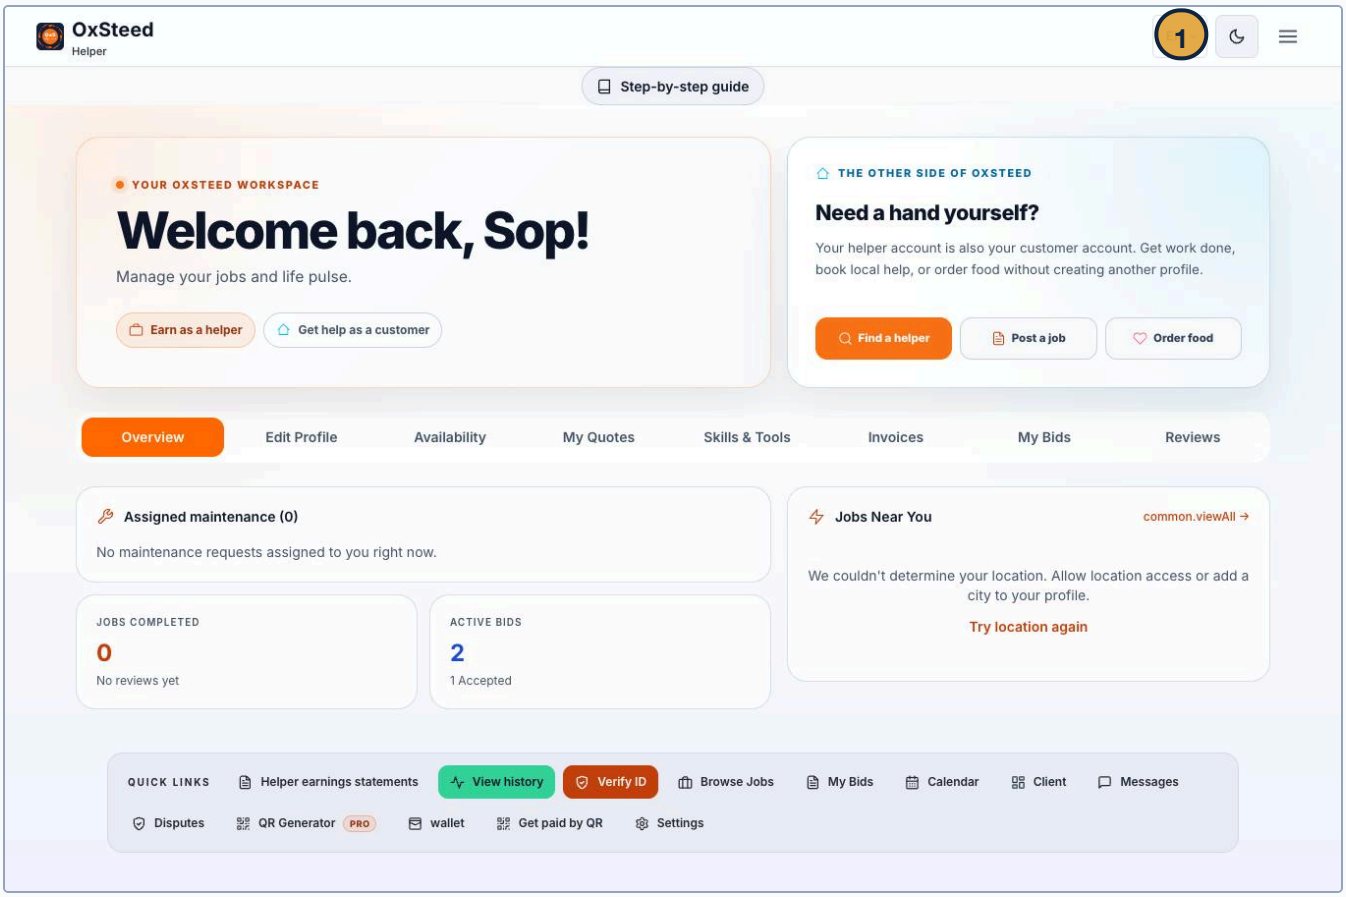

Figure 3. The switcher confirms the new active mode. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** New current mode

Confirm it worked

The mode button shows the new mode and the dashboard content matches it. A "Switched to" toast appeared at the moment of switching.

If something goes wrong

Problem	What to do
The mode you want is not listed.	Self-selectable modes are Customer, Helper, and Business Owner. Business team roles (Manager, Representative, Employee) are granted, not self-selected: a workspace owner must invite you and you must accept the invitation.
You see "Could not switch."	Reload the page and try again. If it persists, sign out and back in; your granted roles are reloaded on sign in.

Need help?

If a granted mode never appears after you accepted an invitation, contact support from the Help menu or visit /support.

Guide ID: account-password-recovery | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Recover a forgotten password

Guide ID	**account-password-recovery**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/recover-password

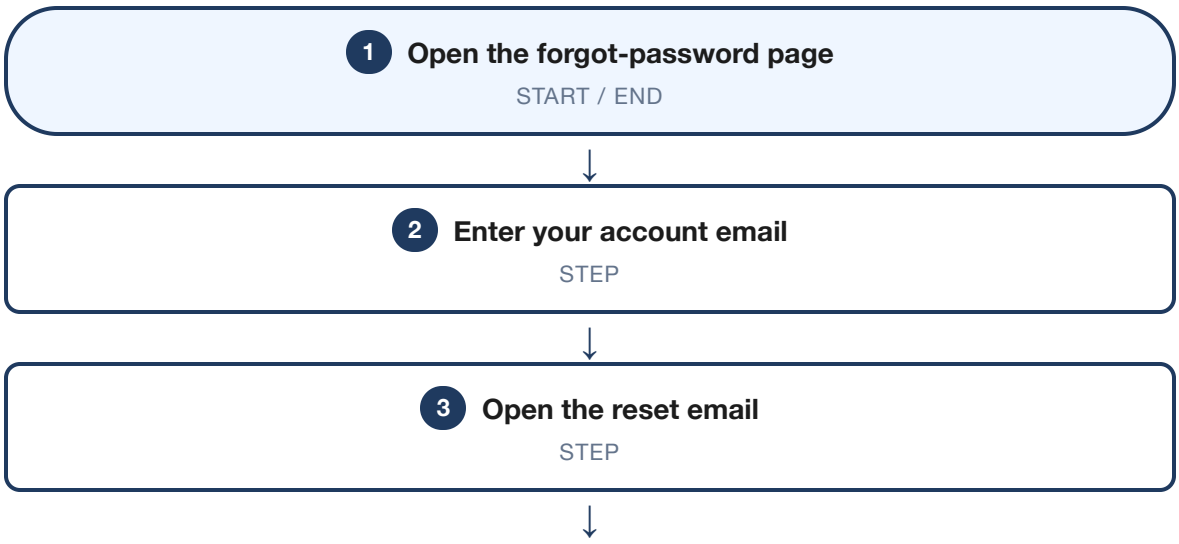

Goal

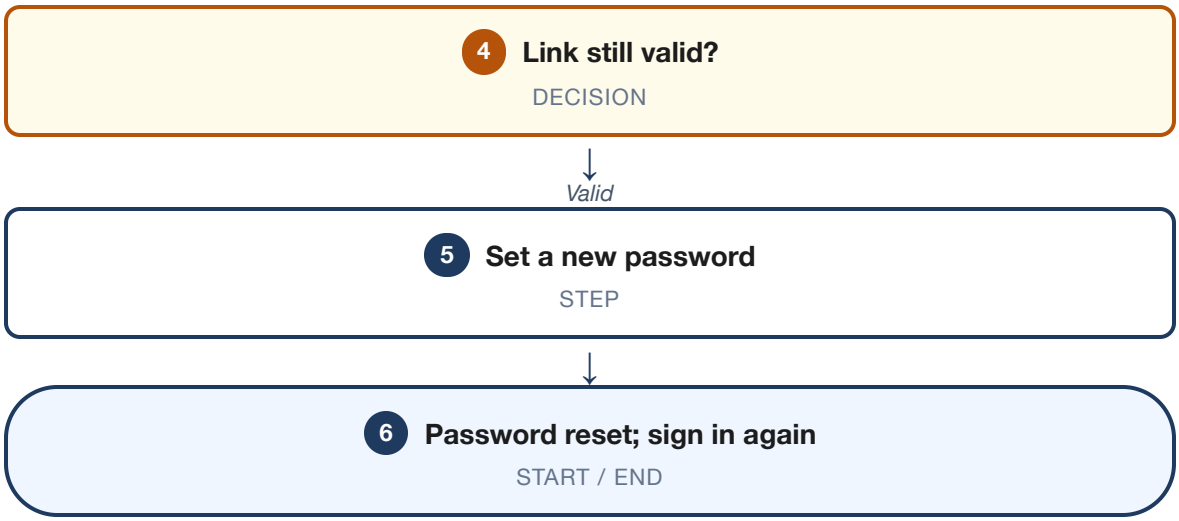

Reset your password with an email link when you cannot sign in.

Before you start

1. Access to the email inbox of your OxSteed account.

Process map

- *Expired or invalid:* Link still valid? → Request a new link
- Request a new link → Open the reset email

Text version. 1. Open the forgot-password page from the sign-in screen. 2. Enter the email address of your account and choose "Send Reset Link". 3. Open the reset email and choose the link. 4. If the link is expired or invalid, request a new one. 5. Enter a new password twice on the "Set New Password" page. 6. Sign in with the new password.

Steps

Step 1: Open the password reset page

From the sign-in page, choose "Forgot password?", or open /forgot-password directly. The page heading is "Reset your password" with the subtitle "Enter your email and we'll send you a link to reset your password."

> **Expected result:** The reset page shows a single Email address field and a "Send Reset Link" button.

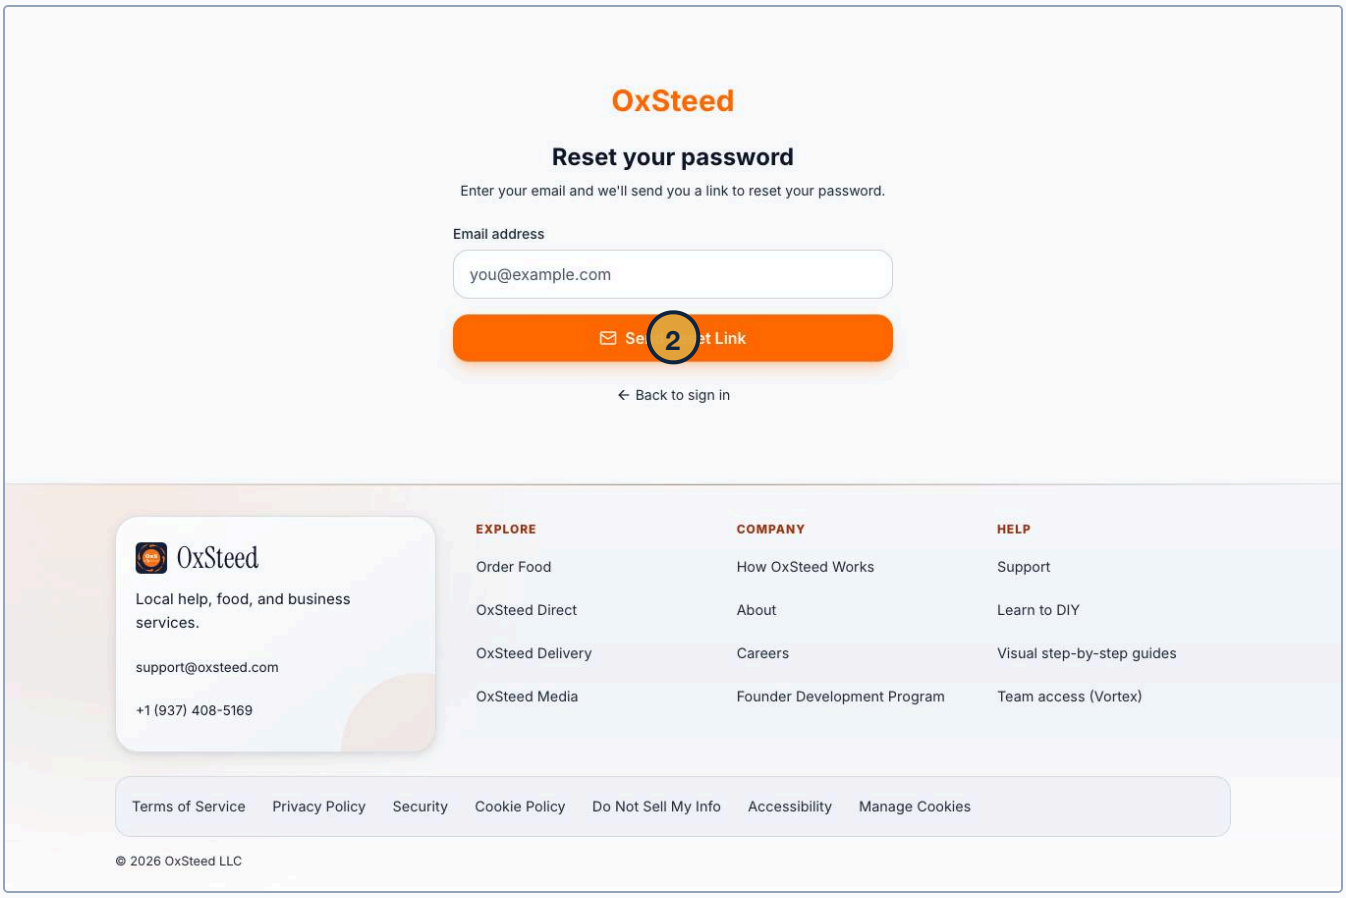

Figure 1. The password reset page, desktop view. *(Image description: Reset your password page with an email field and Send Reset Link button)*

1. **2.** Send Reset Link button

Step 2: Request the reset link

Type your account email address (placeholder "you@example.com") and choose "Send Reset Link". A confirmation tells you the link was sent. If you never get it, check your spam folder, then come back and choose "Try again".

> **Expected result:** A confirmation appears that the reset link was sent to your email.

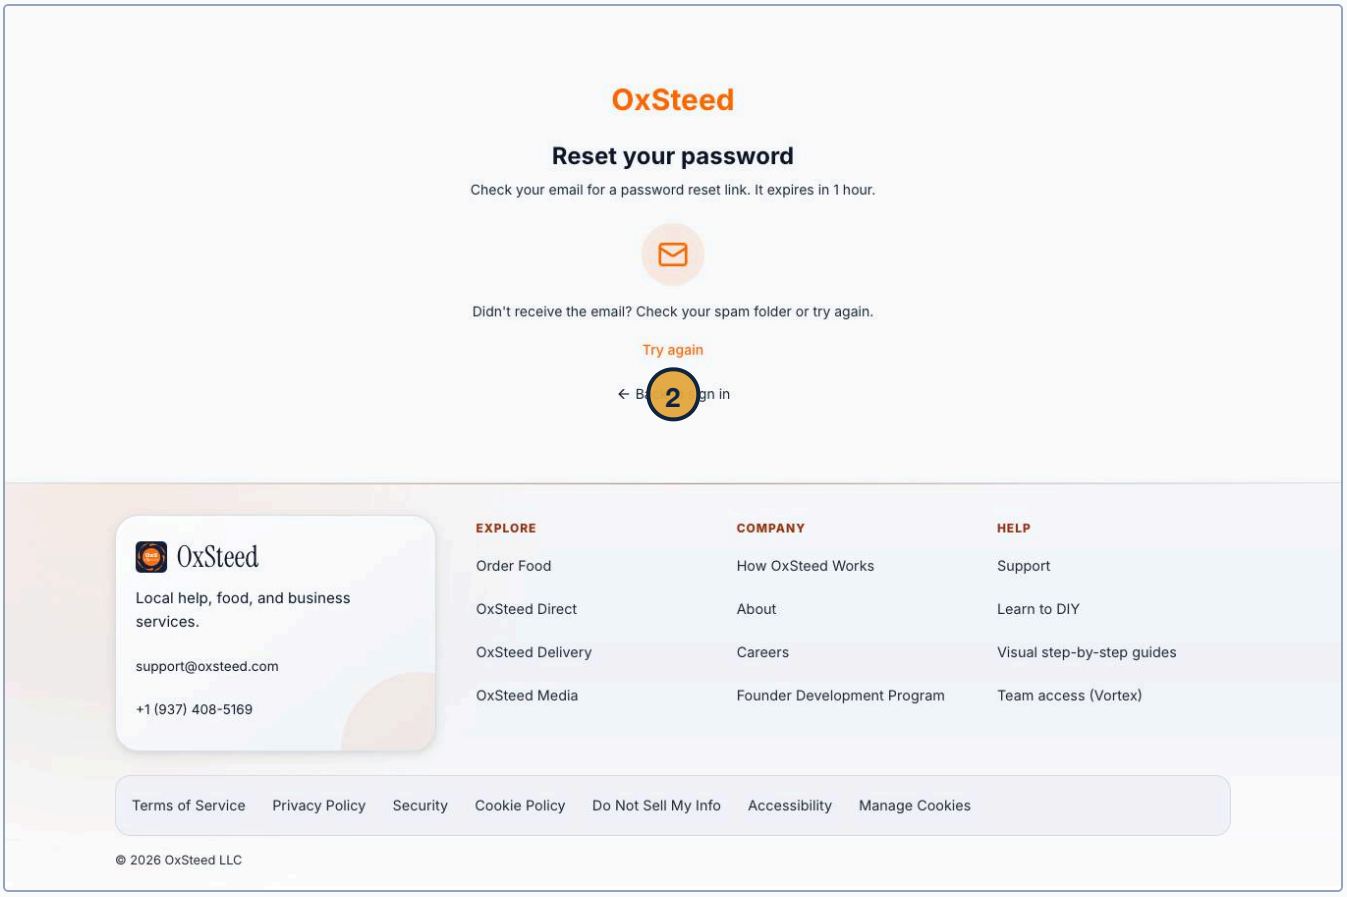

Figure 2. The sent confirmation after requesting the link. *(Image description: Confirmation that the reset link was sent)*

1. **2.** Back to sign in link

Step 3: Set a new password from the email link

Open the email and choose the reset link, which opens /reset-password/:token. The page heading is "Set New Password". Type your new password in the New password field and repeat it in the Confirm password field, then choose "Reset Password". The new password must meet the minimum length shown.

> **Expected result:** A success message appears and a "Go to Sign In now" option is shown.

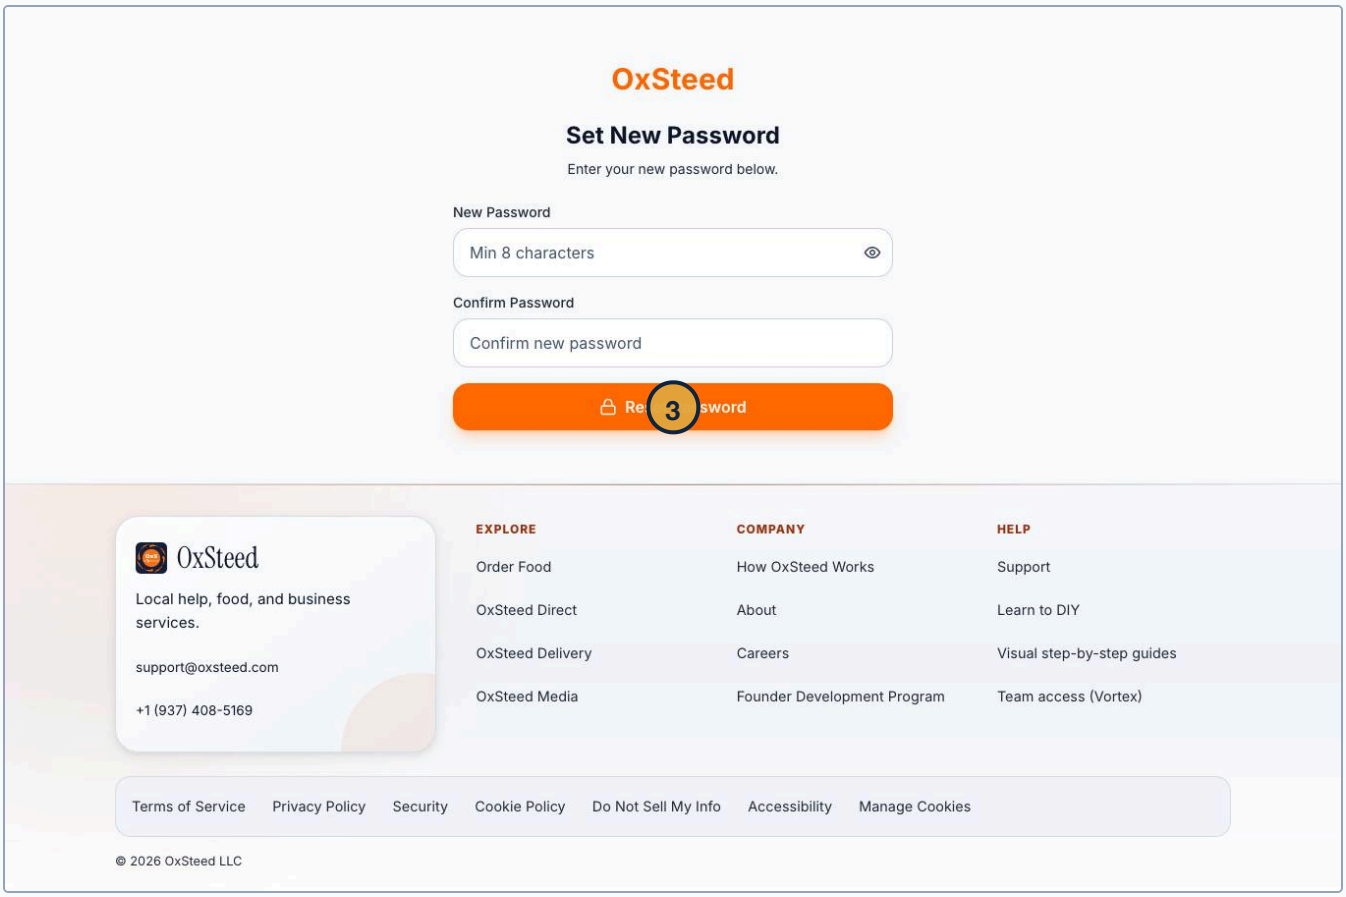

Figure 3. The new password form, desktop view. *(Image description: Set New Password page with new and confirm password fields)*

1. **3.** Reset Password button

Confirm it worked

The success screen appears; sign in at /login with your new password. If the link shows as invalid, request a fresh link.

If something goes wrong

Problem	What to do
The reset link shows as invalid or expired.	Reset links expire for security. Request a new one from /forgot-password and use it right away.
No reset email arrives.	Check the spam folder and confirm you typed the exact email registered on the account. Wait a few minutes before requesting again.
The new password is rejected.	Both fields must match and meet the minimum length. Avoid reusing your most recent passwords.

Need help?

If you no longer have access to the registered email, contact support from the Help menu or visit /support.

Guide ID: account-privacy | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Privacy controls, data export, account deletion

Guide ID	**account-privacy**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/privacy-and-data

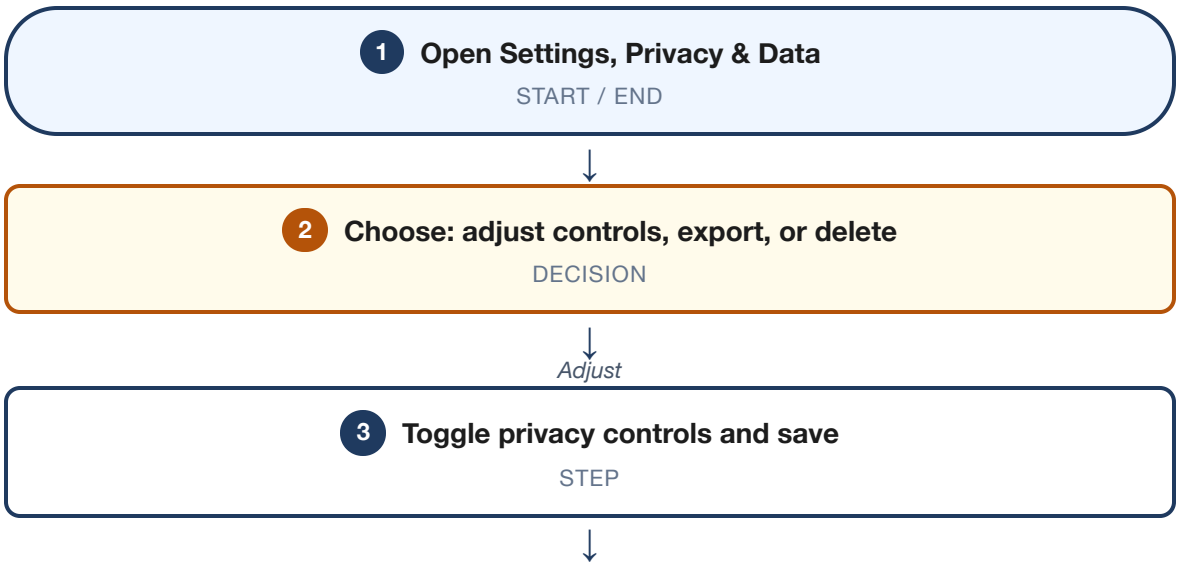

Goal

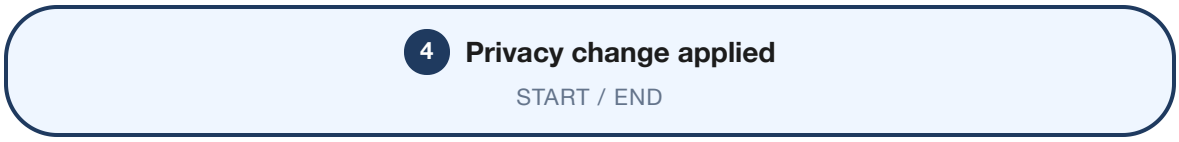

Control your privacy settings, export your data, or delete your account.

Before you start

1. Be signed in for export and deletion; the policy pages are public.

Process map

- *Export:* Choose: adjust controls, export, or delete → Verify password and email code, download export
- *Delete:* Choose: adjust controls, export, or delete → Danger Zone: Delete Account with confirmation
- Verify password and email code, download export → Privacy change applied
- Danger Zone: Delete Account with confirmation → Privacy change applied

Text version. 1. Open Settings and choose the "Privacy & Data" tab. 2. Decide what you want: adjust privacy controls, export your data, or delete your account. 3. For controls, toggle the options (communication, job, live chat, booking visibility) and save. 4. For export, confirm your current password, then enter the six-digit code sent to your email; the export downloads. 5. For deletion, use the "Danger Zone" tab, choose "Delete Account", and confirm in the "Delete Your Account" dialog.

Steps

Step 1: Open the Privacy & Data tab

Choose Settings from your account menu and pick the "Privacy & Data" tab. The page shows privacy preference toggles (for example communication controls, job controls, live chat, and booking visibility). The public legal pages (/privacy, /do-not-sell, /cookie-policy, /terms) are readable without signing in.

> **Expected result:** The privacy toggles load with their current saved states.

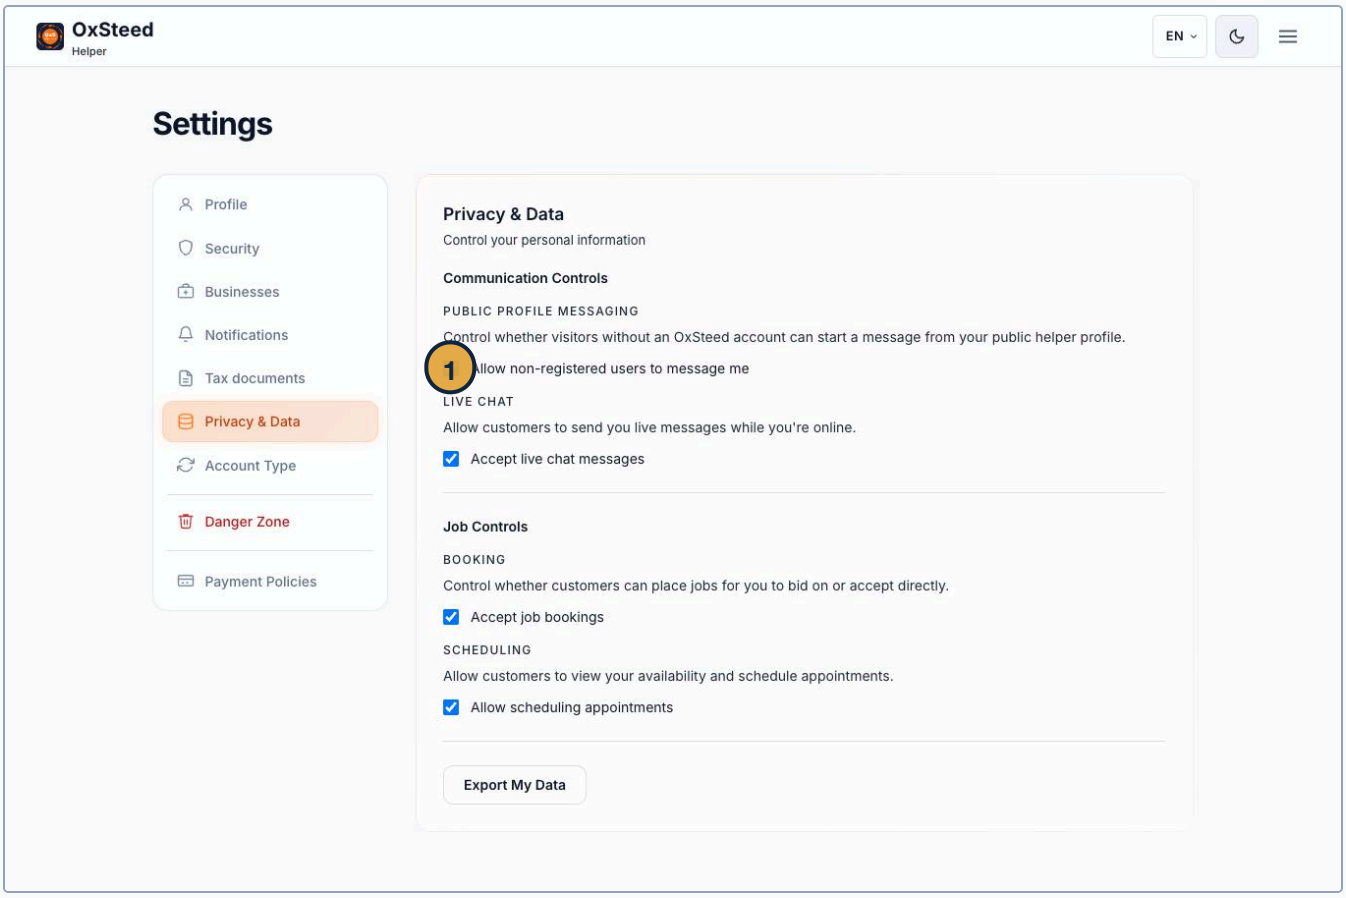

Figure 1. The Privacy & Data tab, desktop view. *(Image description: Synthetic example: Settings)*

1. **1.** Privacy toggles

Step 2: Adjust privacy controls and save

Toggle the controls you want to change (for example who can contact you or see your activity) and choose Save. A confirmation toast shows when the update is stored.

> **Expected result:** The saved states persist after you reload the page.

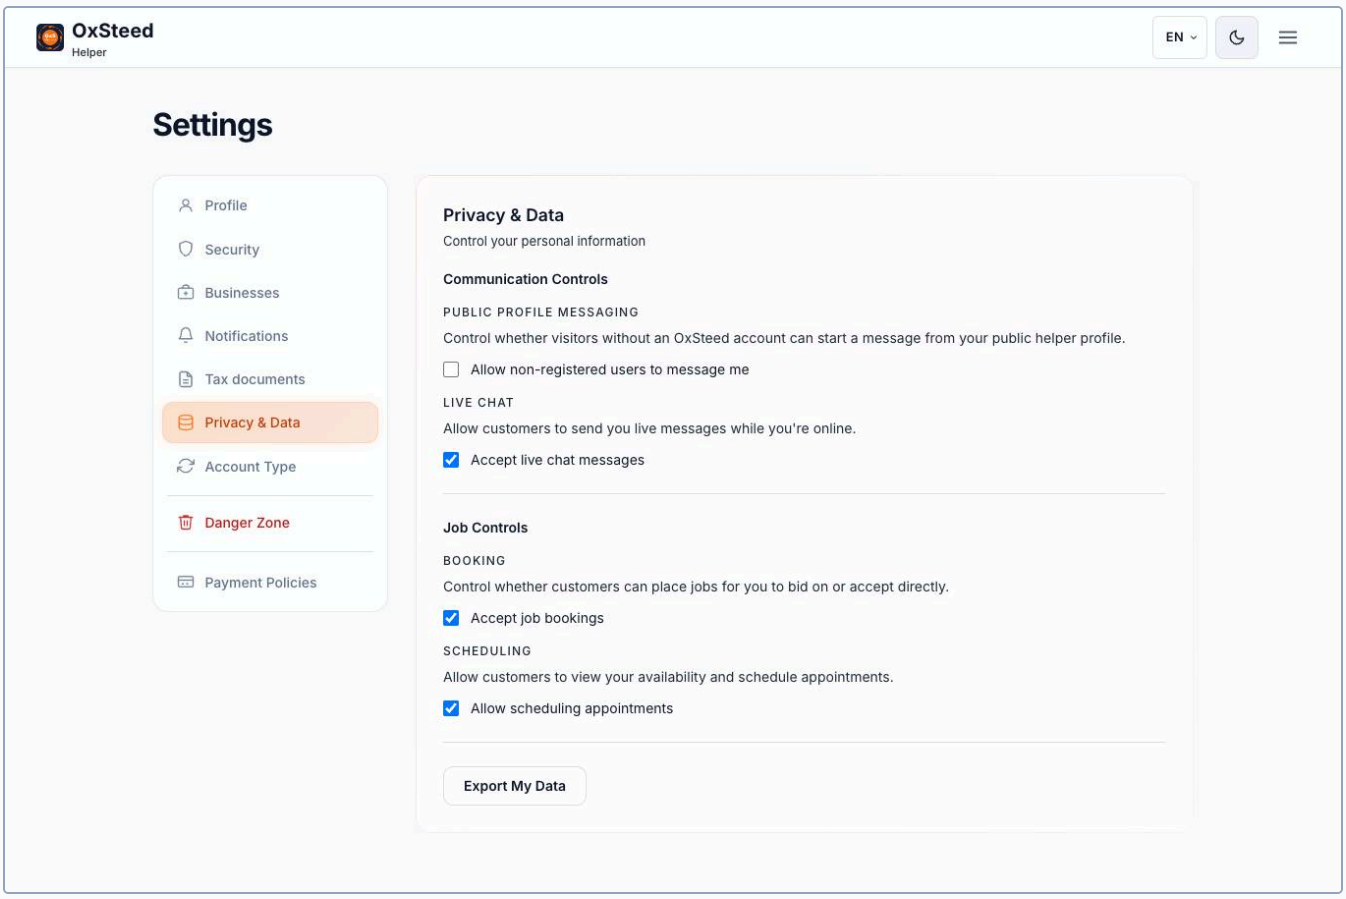

Figure 2. Adjusting privacy controls. *(Image description: Synthetic example: Settings)*

Step 3: Export your data with two-step verification

In the Privacy & Data tab, start the data export. First confirm your current password; a verification code is sent to your email ("A verification code was sent to your email."). Enter the six-digit code, then choose the verify-and-export option to download your data export.

> **Expected result:** The export file downloads to your device.

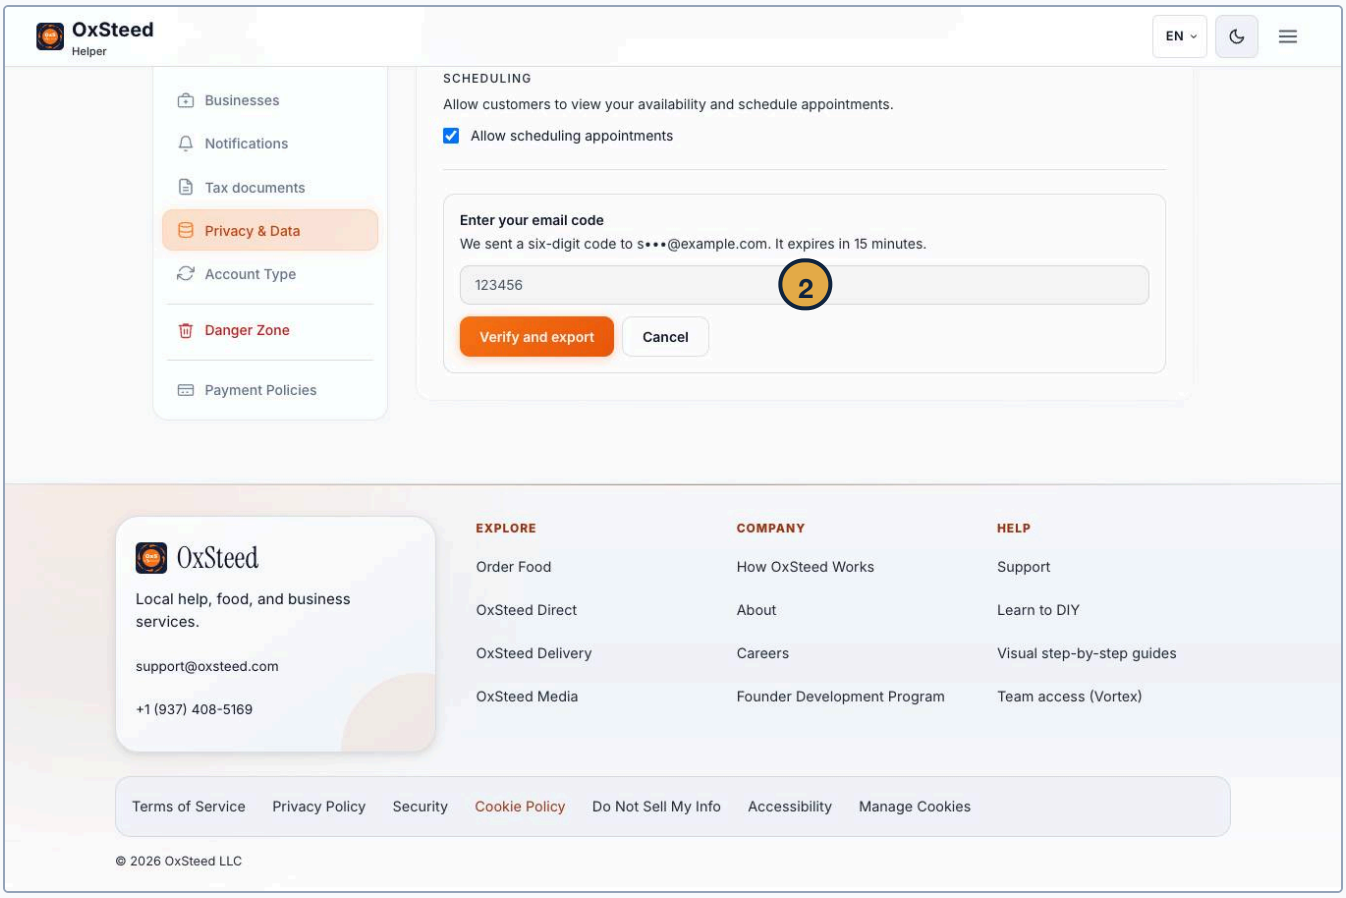

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Settings)*

1. **2.** Six-digit code field

Step 4: Delete your account from the Danger Zone

Choose the "Danger Zone" tab and choose "Delete Account". A confirmation dialog titled "Delete Your Account" explains what is removed (including active jobs and pending balances if any). Type the confirmation as requested and confirm the deletion. This cannot be undone.

> **Expected result:** Your account is deleted and you are signed out.

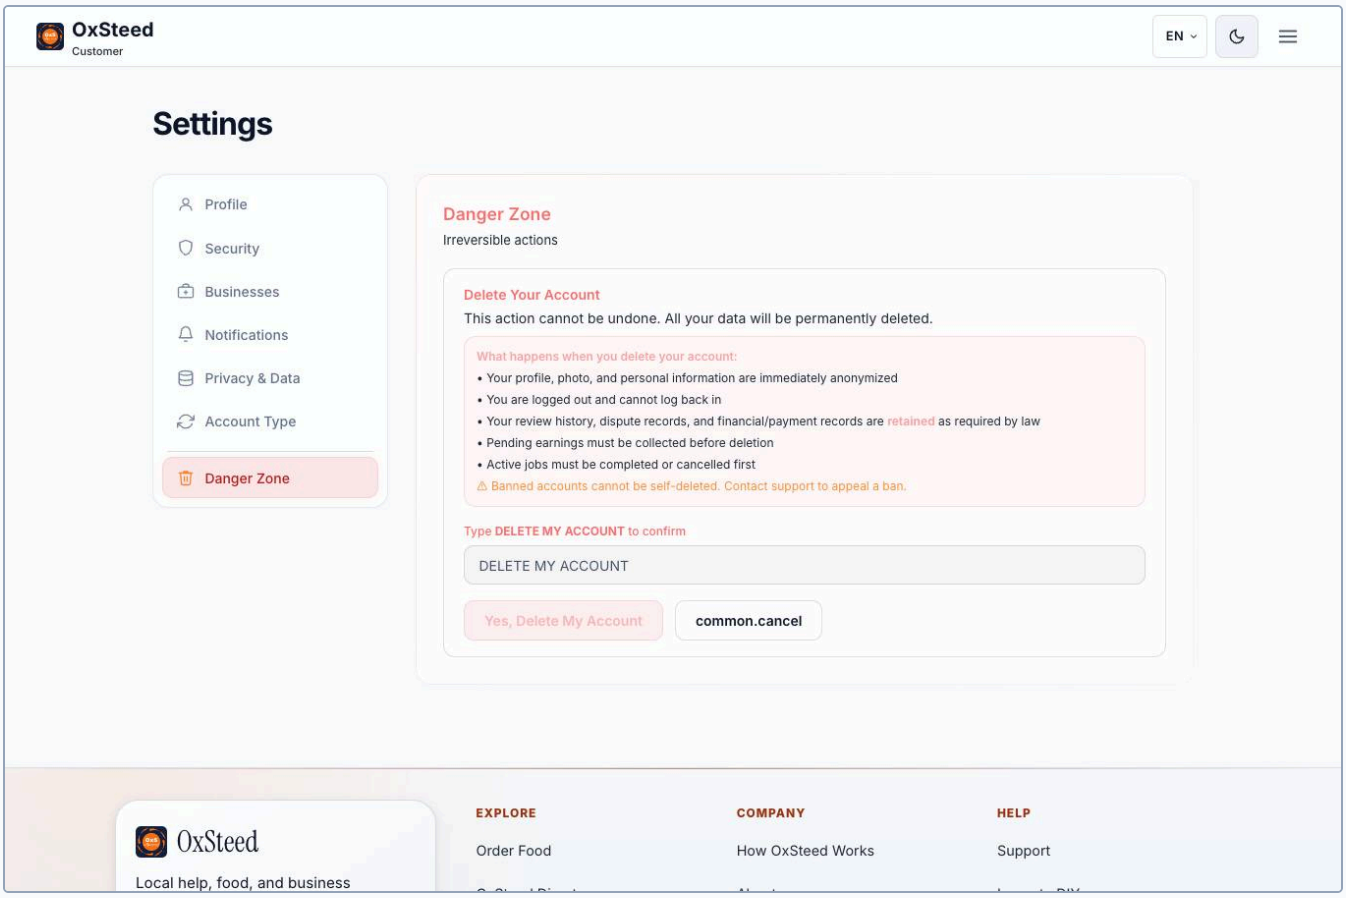

Figure 4. The Delete Your Account confirmation. *(Image description: Synthetic example: Settings)*

Confirm it worked

Privacy toggles keep their new values after a reload; exports download; after deletion you can no longer sign in with that account.

If something goes wrong

Problem	What to do

The export code never arrives.	Check spam, then request a new code. You must enter your current password first; without it no code is sent.
Account deletion is blocked.	The dialog lists blockers such as active jobs or a remaining balance. Finish or cancel those jobs and withdraw balances first, then retry deletion.

Need help?

For data requests you cannot complete yourself, contact support from the Help menu or visit /support.

Guide ID: account-settings | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Manage account settings

Guide ID	**account-settings**
Revision	Revision 3 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/manage-settings

Goal

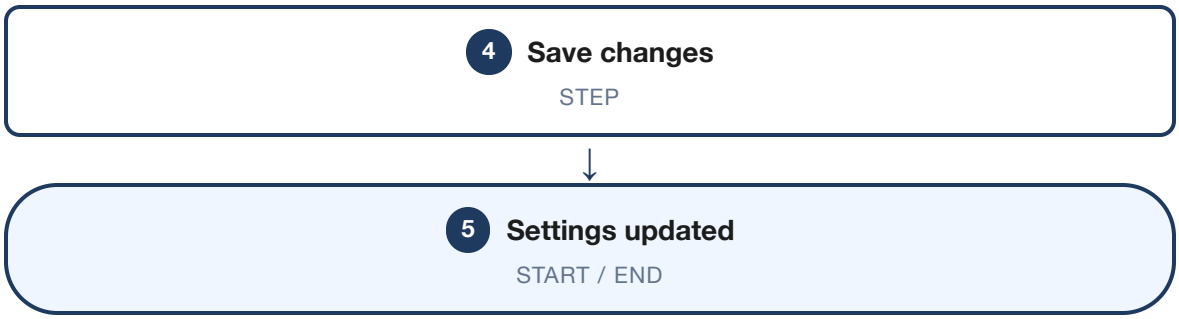

Change your profile, security, notifications, country, businesses, and tax documents from one settings hub.

Before you start

1. Be signed in to your OxSteed account.

Process map

Text version. 1. Open /settings. 2. Pick the tab you need: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, Danger Zone, or Tax documents (helpers only). 3. Edit the fields or toggle the controls on that tab. 4. Save; most changes confirm with a toast. 5. Security changes like 2FA and passkeys take effect immediately.

Steps

Step 1: Open Settings and pick a tab

Choose Settings from your account menu, or open /settings directly. The page shows tabs: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, and Danger Zone. Helpers also see a Tax documents tab. You can deep-link a tab, for example /settings?tab=tax.

> **Expected result:** The settings page loads with the tab list and the Profile tab selected.

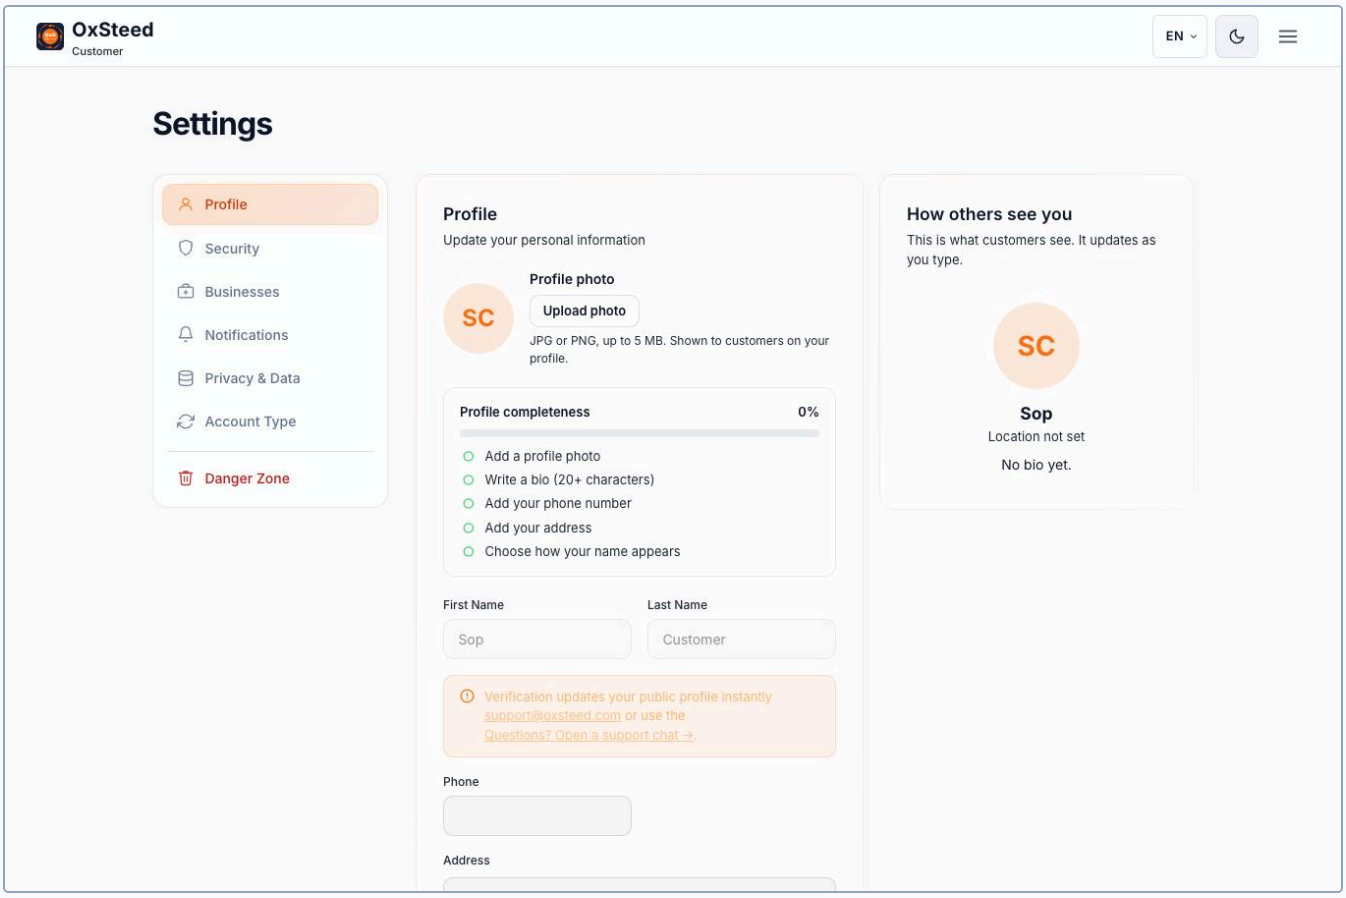

Figure 1. The settings tabs, desktop view. *(Image description: Synthetic example: Settings)*

Step 2: Update your profile or account basics

On the Profile tab, update your name, contact details, and profile photo. On the Account Type tab you can review your "Current Role", see the "Workspaces you belong to", and use "Switch" to move into a granted workspace role.

> **Expected result:** The changed values stay in the fields after saving.

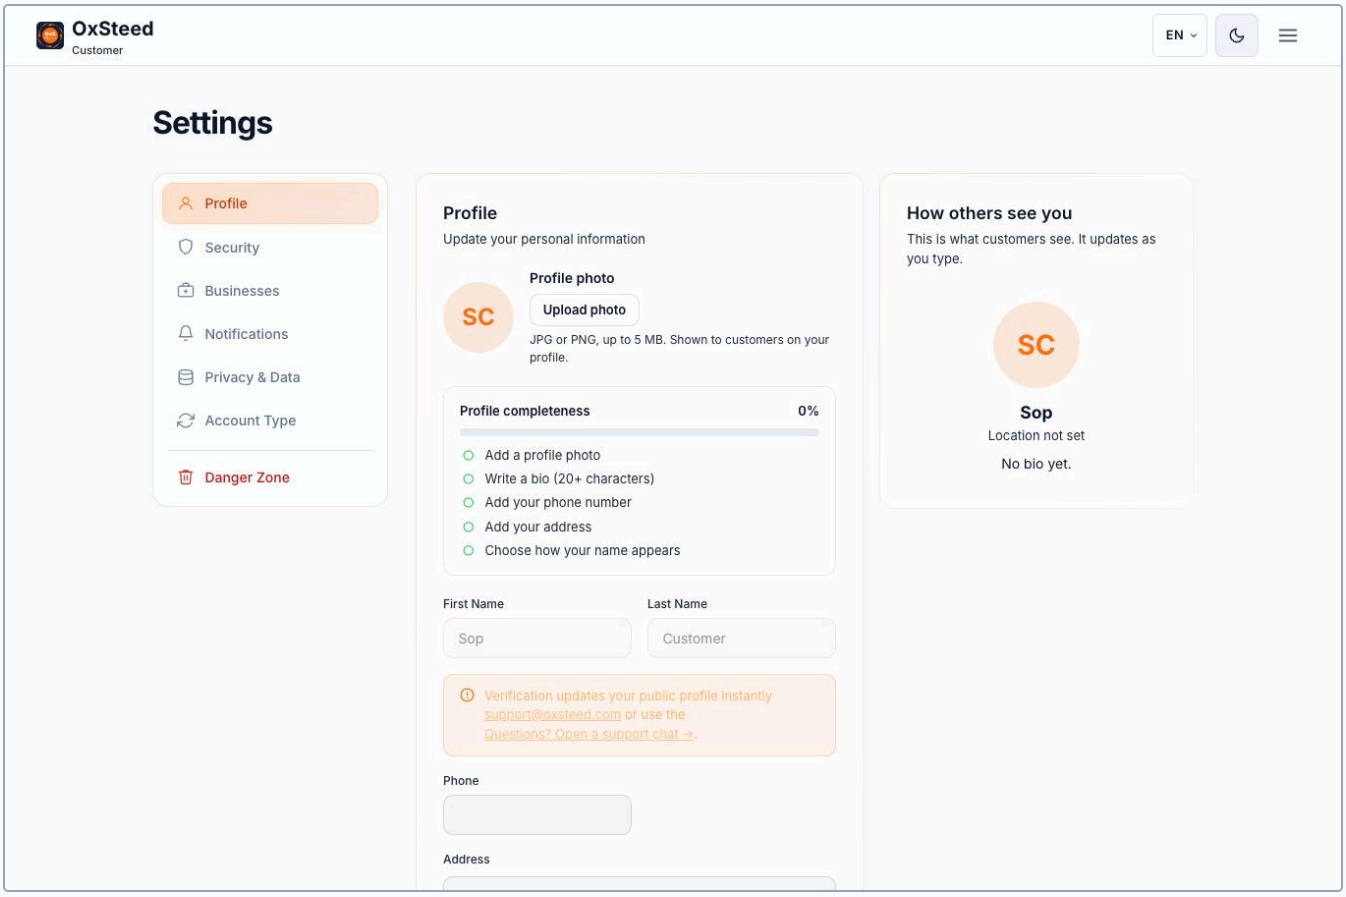

Figure 2. The Profile tab. *(Image description: Synthetic example: Settings)*

Step 3: Manage security: 2FA, passkeys, and sessions

On the Security tab, set up two-factor authentication (TOTP), add or remove passkeys, and review your active sessions. Sessions can be signed out individually from the sessions list. The Notifications tab controls email and push preferences; the country selector sets your marketplace country.

> **Expected result:** Security changes confirm immediately; a new 2FA setup asks you to verify a test code.

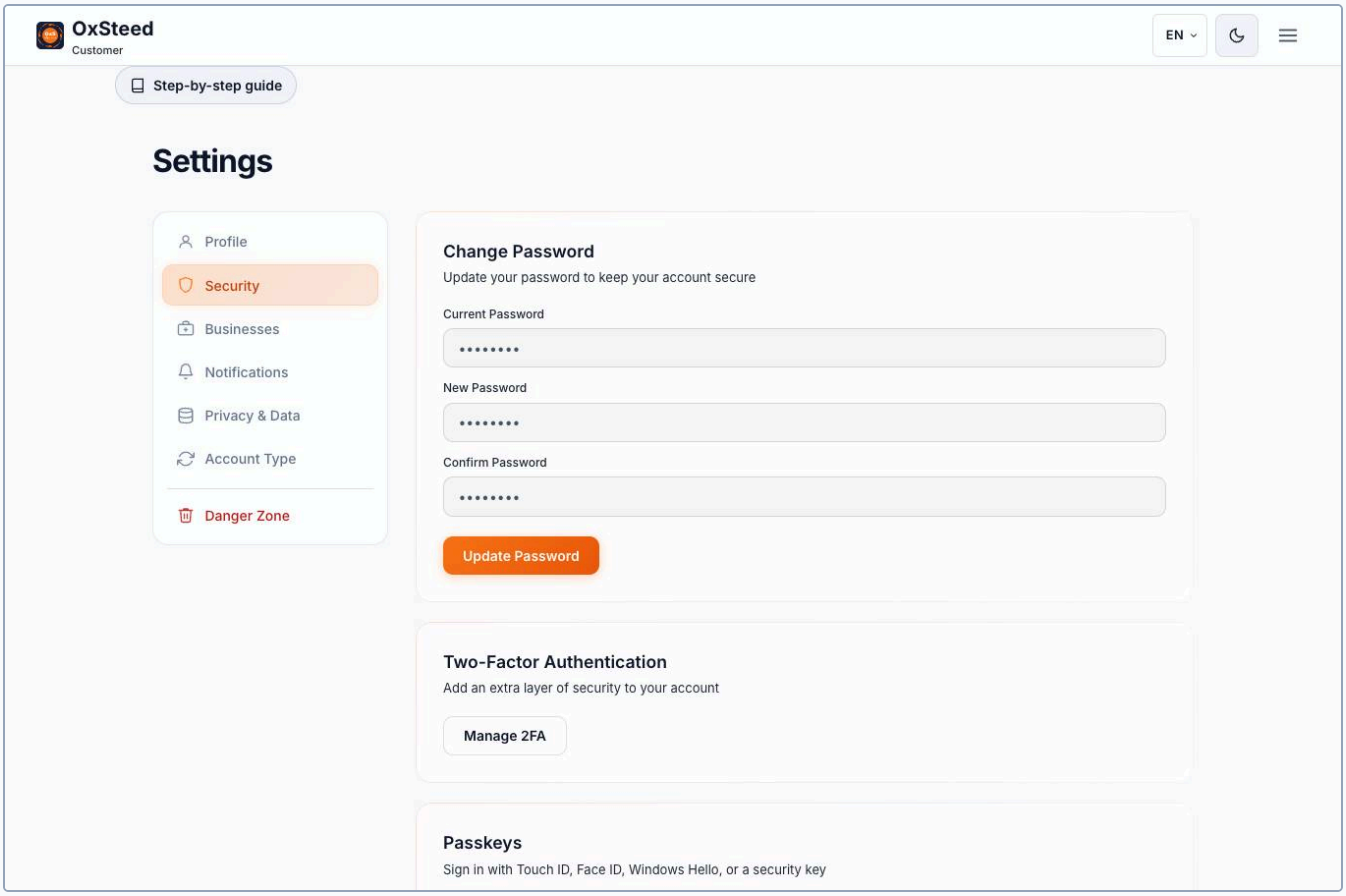

Figure 3. The Security tab: 2FA, passkeys, and sessions. *(Image description: Synthetic example: Settings)*

Step 4: File tax documents as a helper (W-9)

Helpers: open the Tax documents tab and complete "Tax documents (W-9)". The subtitle explains: "File your W-9 so payouts can be released. Your tax ID is stored encrypted." Payouts are gated until your tax identity is on file.

> **Expected result:** The W-9 shows as filed and the payout tax gate is satisfied.

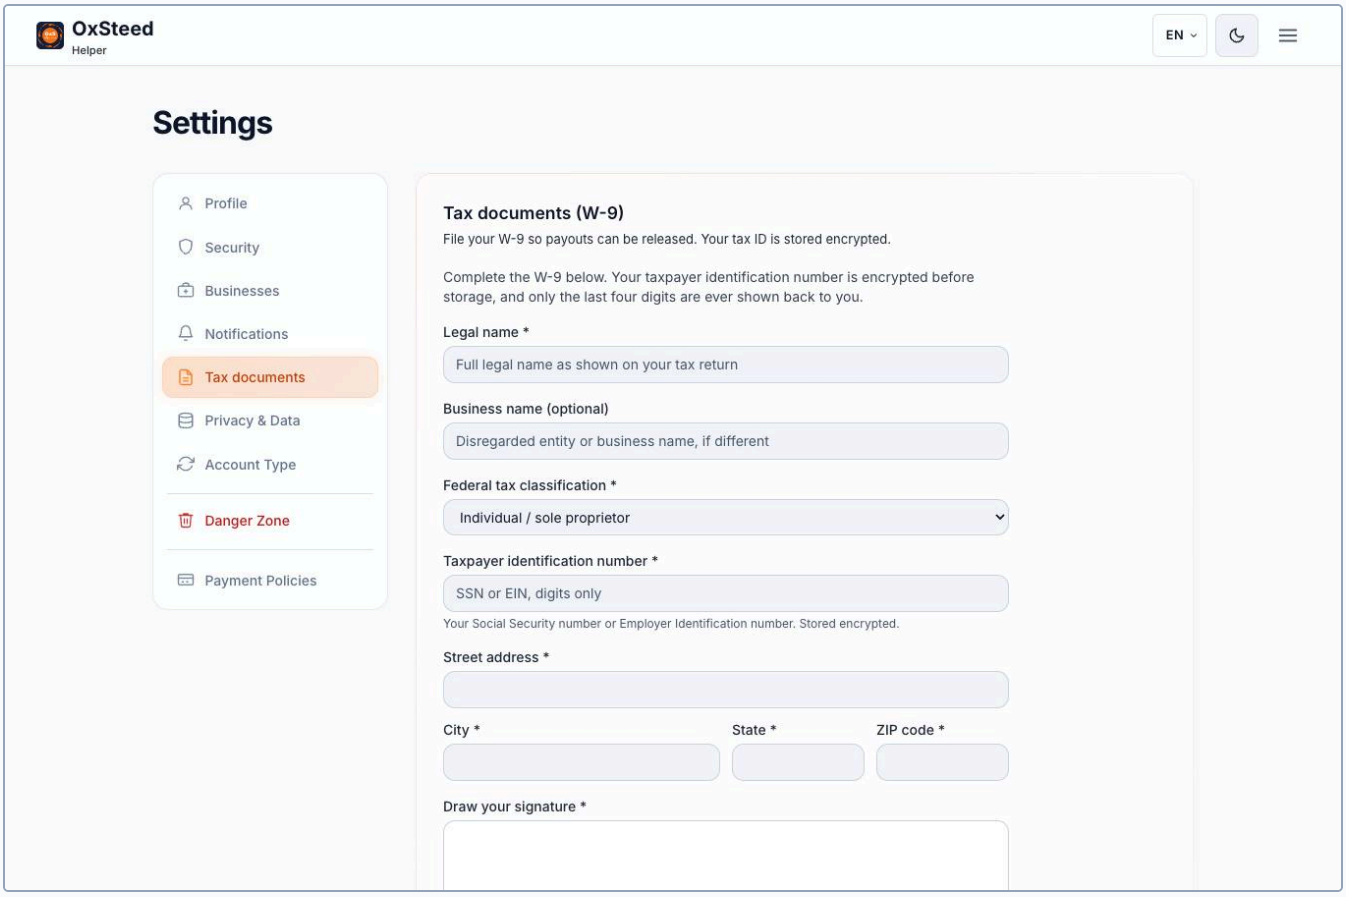

Figure 4. The Tax documents tab for helpers. *(Image description: Synthetic example: Settings)*

Confirm it worked

Each change confirms with a toast or an updated value. Your Security tab reflects the new 2FA or passkey state immediately.

If something goes wrong

Problem	What to do

You cannot find a setting you expected.	Check every tab; some controls are role-specific (the Tax documents tab is helper-only, businesses live under the Businesses tab).
A save fails with an error.	Check the highlighted field for the validation message, fix it, and save again. If it keeps failing, reload the page and retry.

Need help?

For account or security issues you cannot fix in Settings, contact support from the Help menu or visit /support.

Guide ID: account-signin | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Sign in

Guide ID	**account-signin**
Revision	Revision 3 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/sign-in

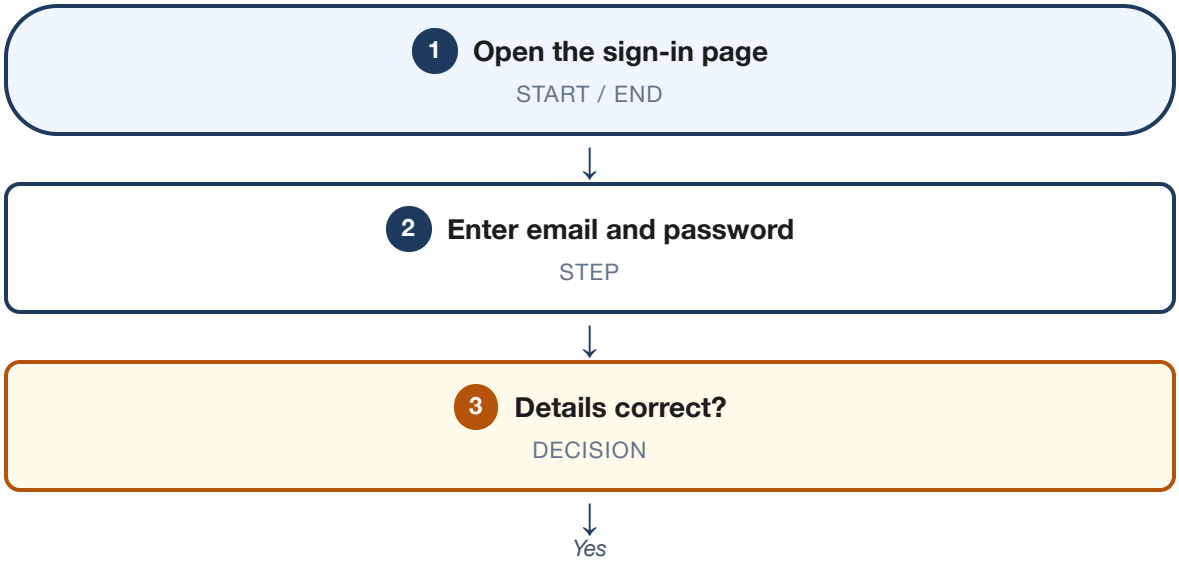

Goal

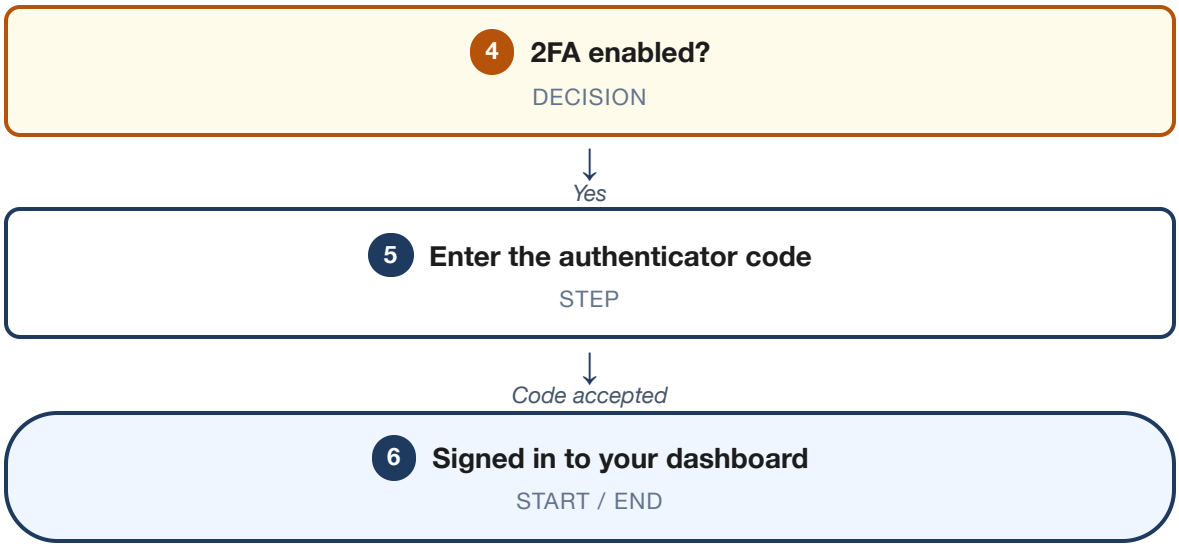

Sign in to your OxSteed account with your email and password, including two-factor and passkey options.

Before you start

1. Have an OxSteed account.
2. If you enabled two-factor authentication, have your authenticator app ready.

Process map

- *No:* Details correct? → Use Forgot password?
- *No:* 2FA enabled? → Signed in to your dashboard
- *Password reset:* Use Forgot password? → Enter email and password

Text version. 1. Open the sign-in page. 2. Enter your email address and password, then choose "Sign in". 3. If the details are wrong, use "Forgot password?" to reset. 4. If two-factor authentication is on, the page switches to "Verify it's you"; enter your Authentication code. 5. You land on your dashboard. Passkey users can sign in with their device instead of typing a password.

Steps

Step 1: Open the sign-in page

Choose "Sign In" in the top navigation, or open /login directly. The page shows the heading "Welcome back" and the subtitle "Sign in to access your local skills marketplace", with an Email address field, a Password field, and a "Sign in" button. New users see a "Join OxSteed" link instead.

> **Expected result:** The sign-in form is visible with empty Email address and Password fields.

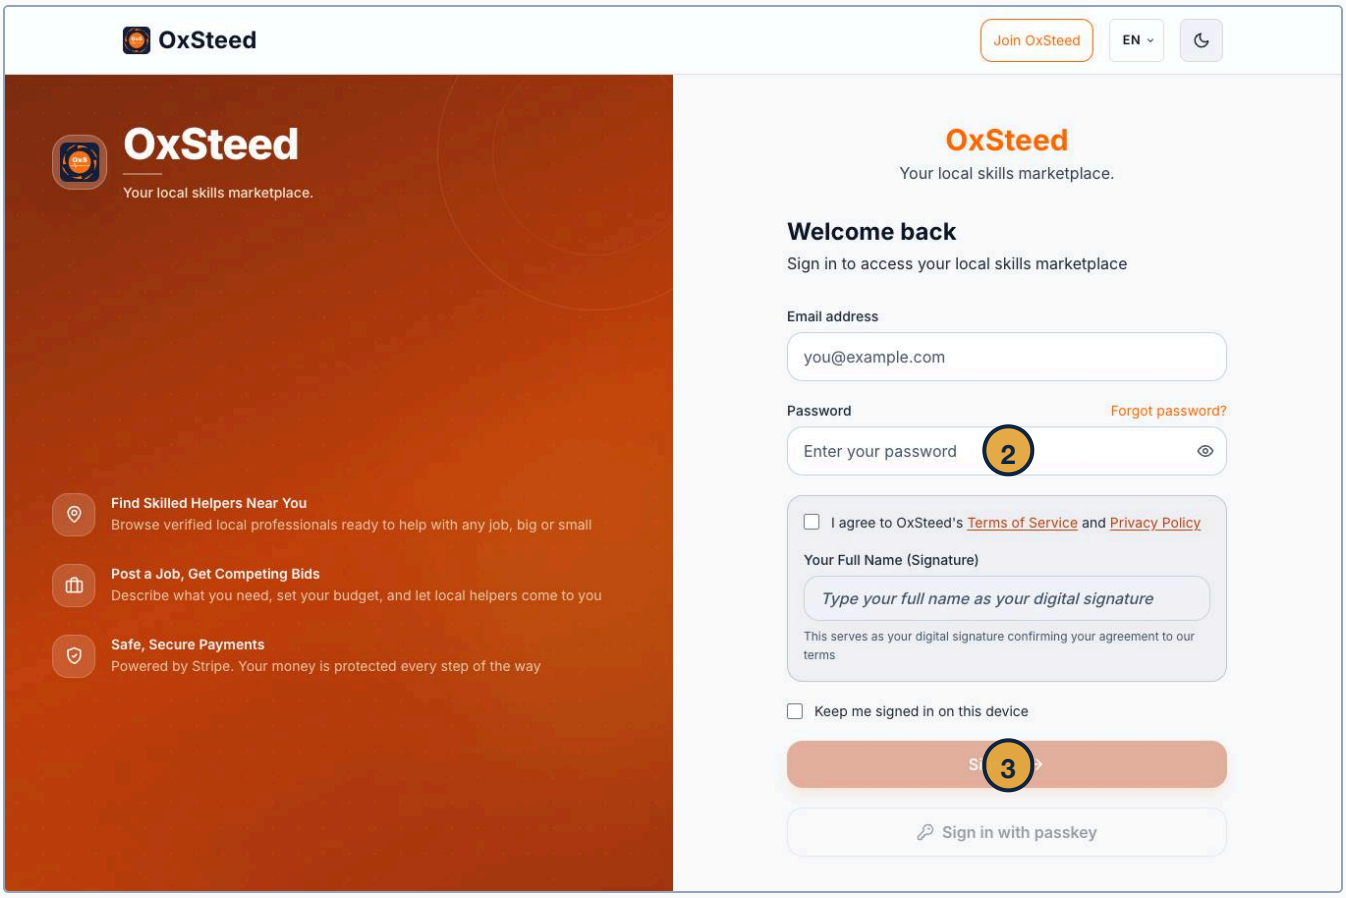

Figure 1. The sign-in page, desktop view. *(Image description: Synthetic example: OxSteed)*

1. **2.** Password field
2. **3.** Sign in button

Step 2: Enter your email and password

Type the email address you registered with into the Email address field (placeholder "you@example.com") and your password into the Password field (placeholder "Enter your password"). Passwords are case sensitive. Use "Show password" if you want to check your typing, then choose "Sign in". The "Forgot password?" link sits next to the password field.

> **Expected result:** The Sign in button shows a loading state, then you are redirected.

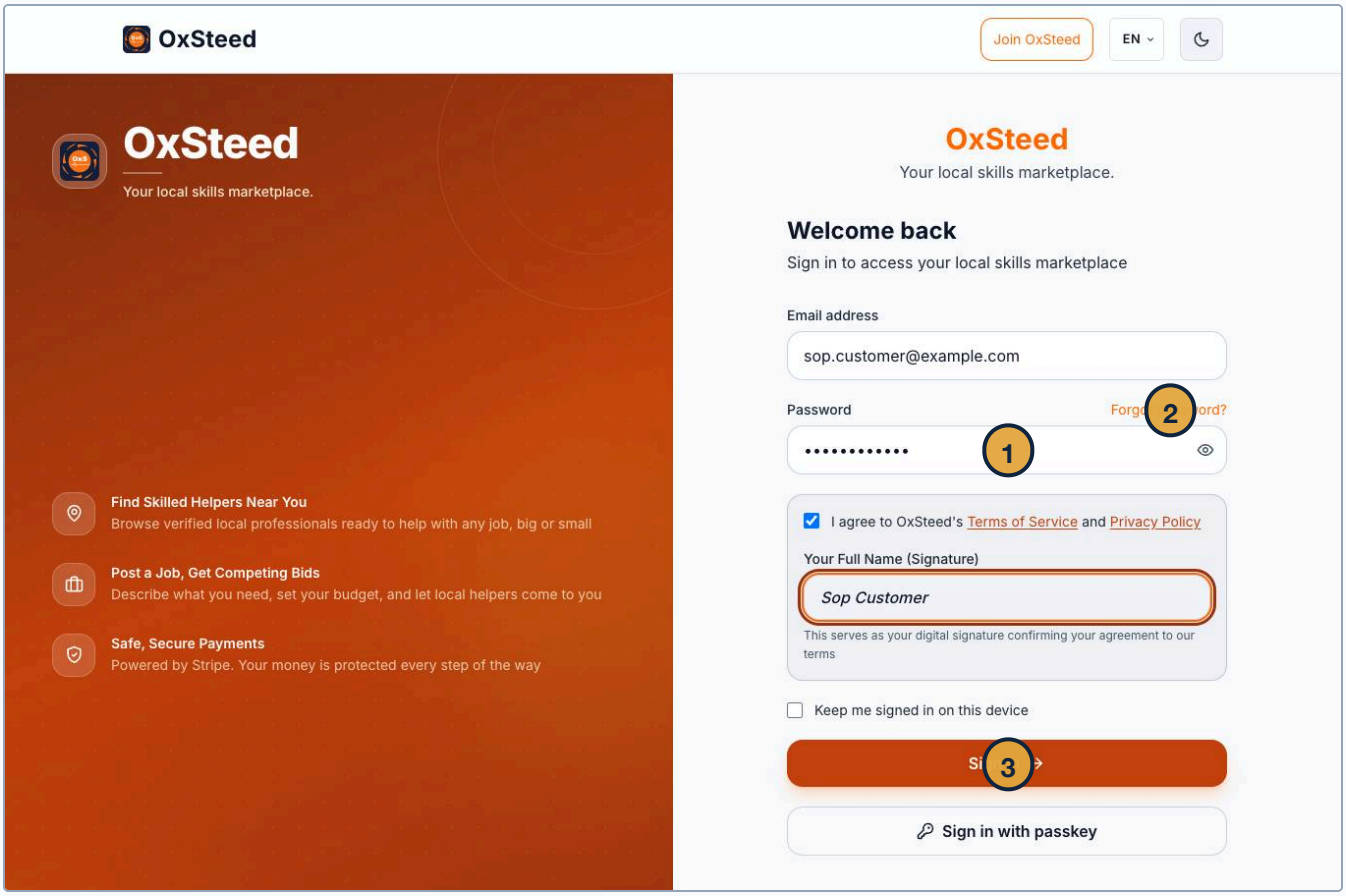

Figure 2. The filled sign-in form before choosing Sign in. *(Image description: Synthetic example: OxSteed)*

1. **1.** Password field
2. **2.** Forgot password? link
3. **3.** Sign in button

Step 3: Complete the two-factor check if prompted

If you enabled two-factor authentication, the page changes to "Verify it's you". Enter the current code from your authenticator app into the Authentication code field and submit. Users with a passkey can choose the passkey option instead of typing a password.

> **Expected result:** The code is accepted and you continue to your dashboard.

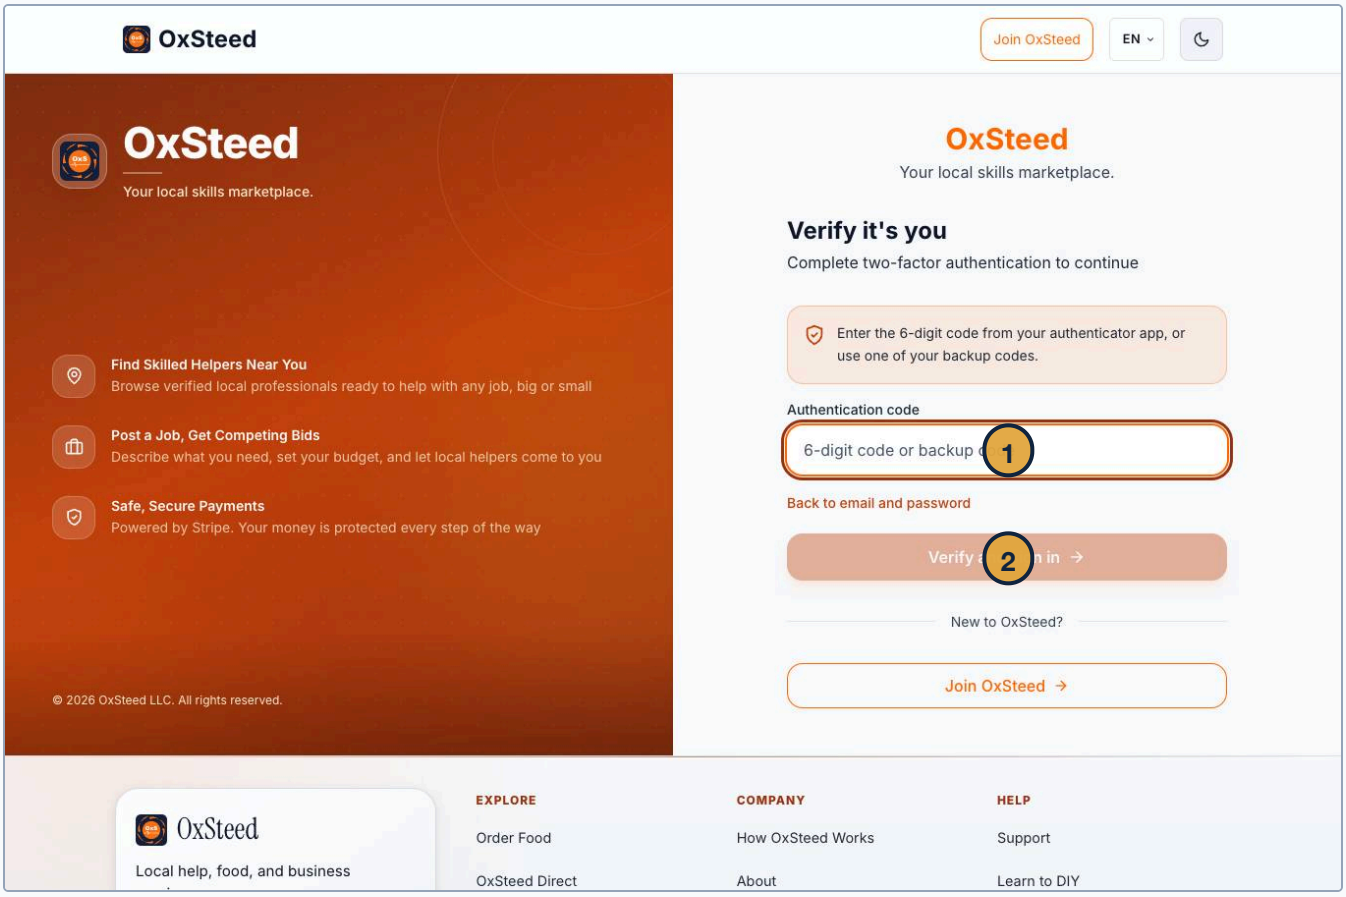

Figure 3. The two-factor step, shown only when 2FA is enabled. *(Image description: Synthetic example: OxSteed)*

1. **1.** Authentication code field
2. **2.** Submit button

Step 4: Confirm you landed on your dashboard

After sign in, your dashboard loads. Open Account in the navigation to find your account actions. If you expected a different mode (for example Helper instead of Customer), use the mode switcher in the navigation.

> **Expected result:** Your dashboard is visible and the Account menu offers your signed-in account actions.

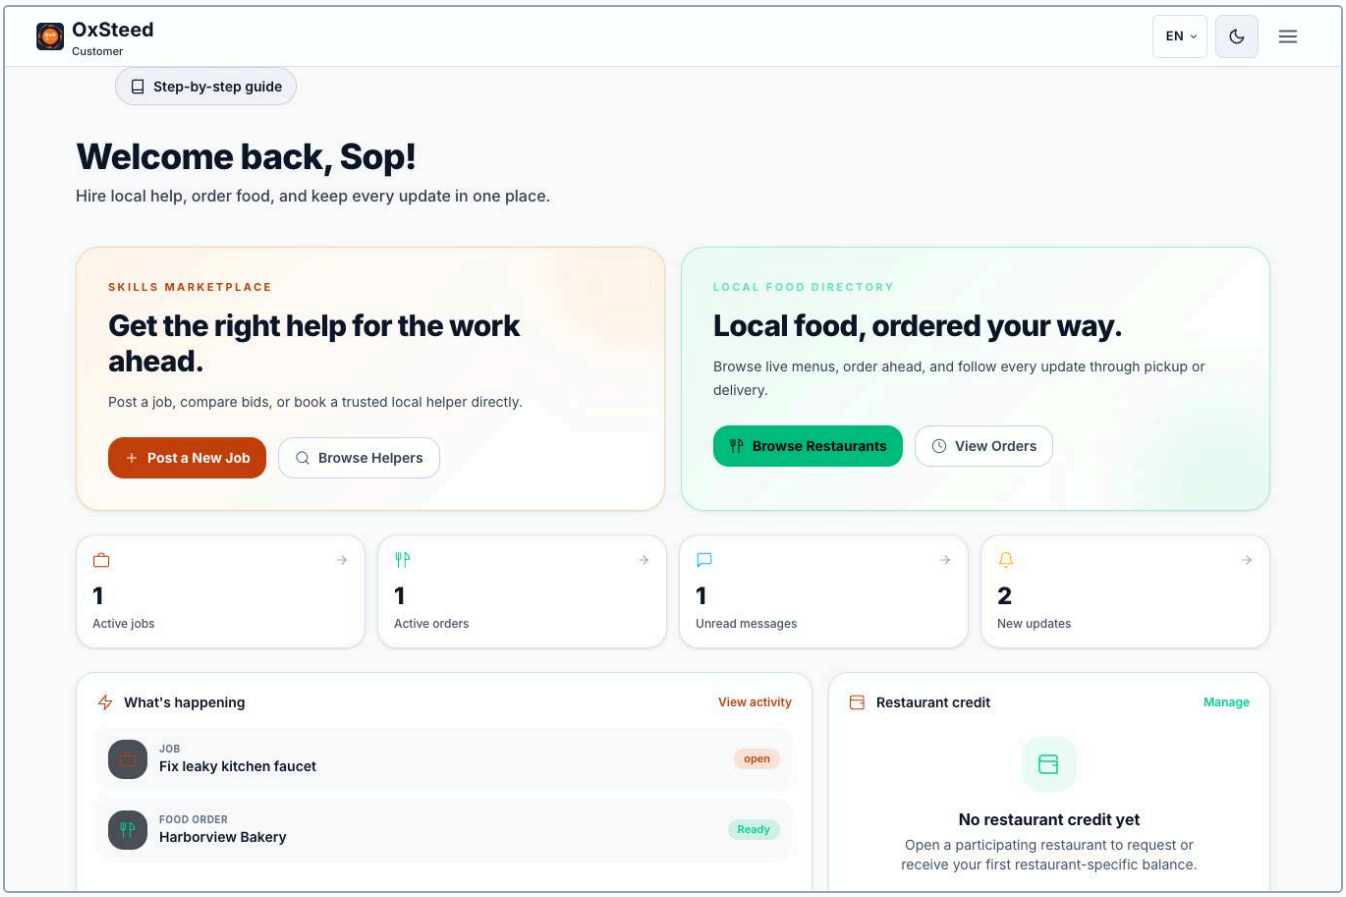

Figure 4. A signed-in dashboard with the account menu. *(Image description: Synthetic example: Welcome back, Sop!)*

Confirm it worked

Your dashboard loads and the Account menu offers your signed-in account actions. Review active sessions anytime under Settings, Security.

If something goes wrong

Problem	What to do

You see "Invalid email or password".	Check for typos and caps lock, then try again. After several failed attempts the sign-in is rate-limited; wait a few minutes or reset the password.
Your two-factor code is rejected.	Make sure your phone clock is set automatically; authenticator codes drift when the clock is off. If you lost the authenticator, use your saved recovery code from the Security tab in Settings.
Passkey sign in fails.	Make sure your browser and device support passkeys and that you use the same device or synced profile where the passkey was created. Fall back to email and password.

Need help?

If you cannot access your account after a password reset, contact support from the Help menu or visit /support.

Guide ID: account-support | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Get help and track support tickets

Guide ID	**account-support**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant
Availability	**Supported**
Online version	/how-it-works/account/get-support

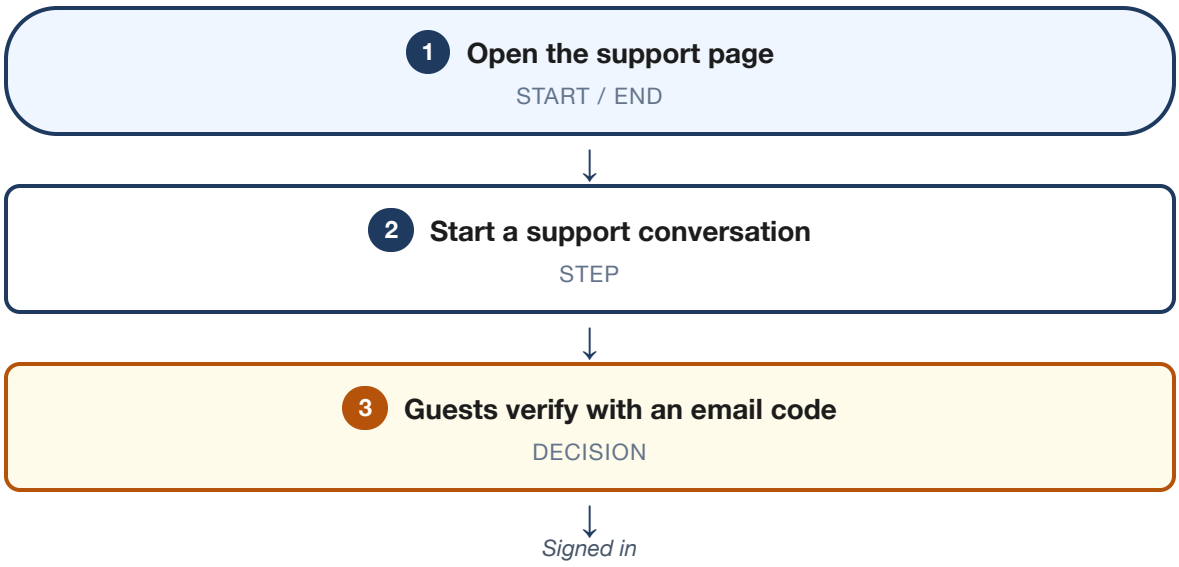

Goal

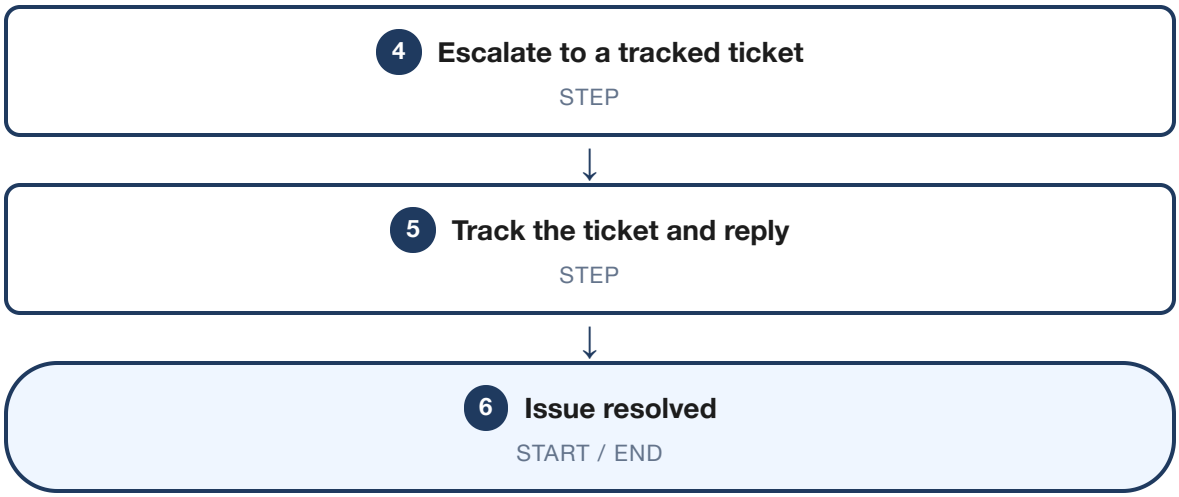

Start a support conversation, escalate it to a tracked ticket, and follow it to resolution.

Before you start

1. Know the job, booking, or order the issue is about, and have photos or receipts ready.

Process map

- *Guest:* Guests verify with an email code → Enter name and email to continue
- Enter name and email to continue → Escalate to a tracked ticket

Text version. 1. Open /support. 2. Start a support conversation and describe the issue; guests verify with an email code first. 3. If the issue needs human follow-up, it is escalated into a tracked ticket and you get a ticket identifier. 4. Track the ticket on /support/my-tickets/:ticketId: read replies under Messages, answer with the Reply box ("Write your reply..."), and reopen it if needed. 5. The ticket closes when the issue is resolved.

Steps

Step 1: Open the support page and start a conversation

Open /support (the Help menu links here). Start a new support conversation and describe what went wrong. The page tells you when escalation is best: "Urgent booking or support failures where normal chat was not enough." Attach an image with "Attach image" when the issue is visible.

> **Expected result:** A support conversation opens and your first message is sent.

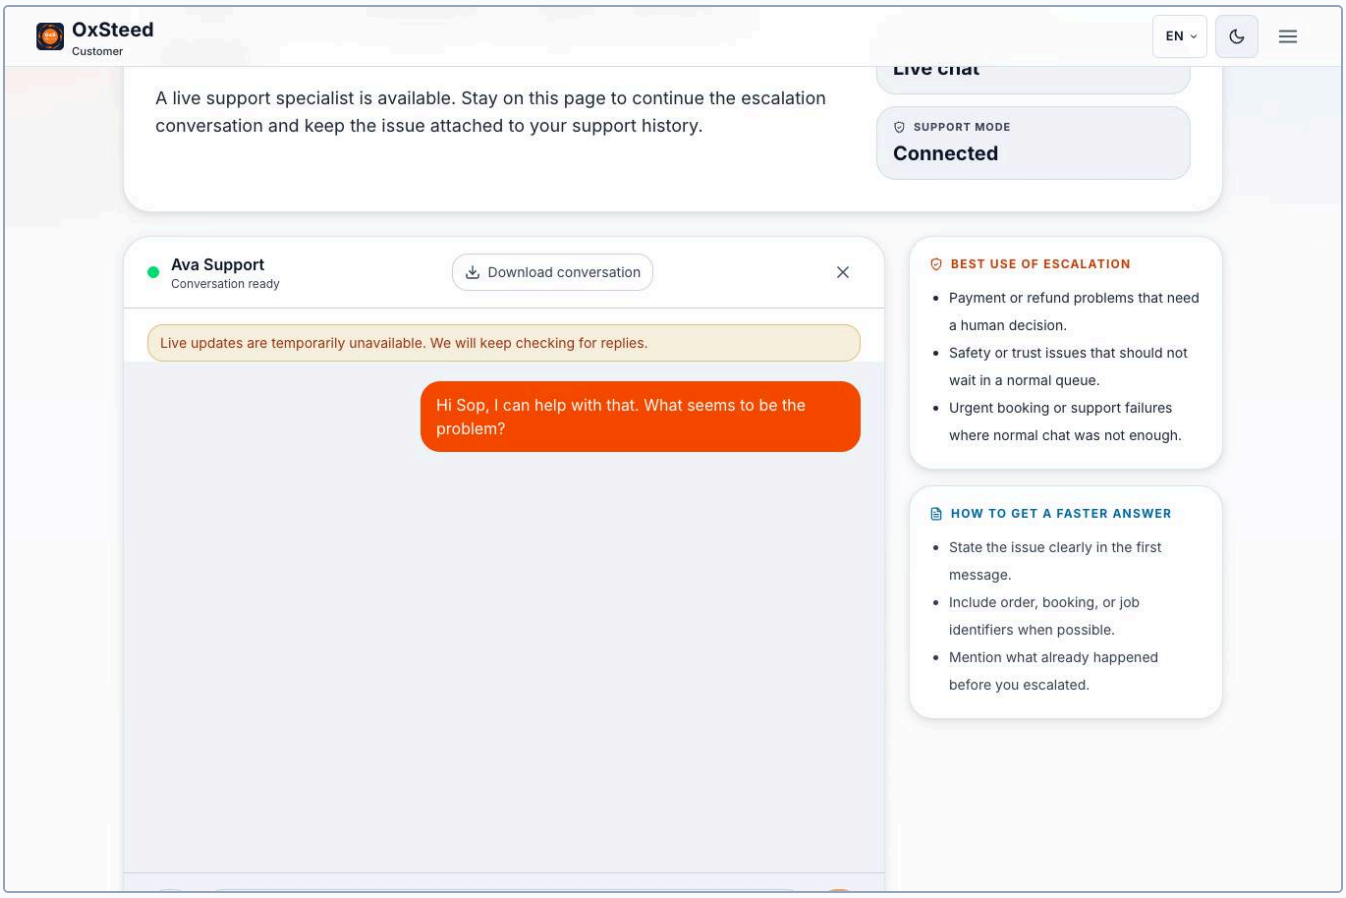

Figure 1. Starting a support conversation, desktop view. *(Image description: Synthetic example: Talk to a support specialist now.)*

Step 2: Escalate to a tracked ticket when needed

For issues that need a human decision (payment or refund problems, safety or trust issues), escalate the conversation. The page explains "What happens after you submit": the escalation becomes a tracked ticket, the team can follow up by email, and "You get a ticket identifier to reference if the issue continues." Save that identifier.

> **Expected result:** You receive a ticket identifier for the tracked ticket.

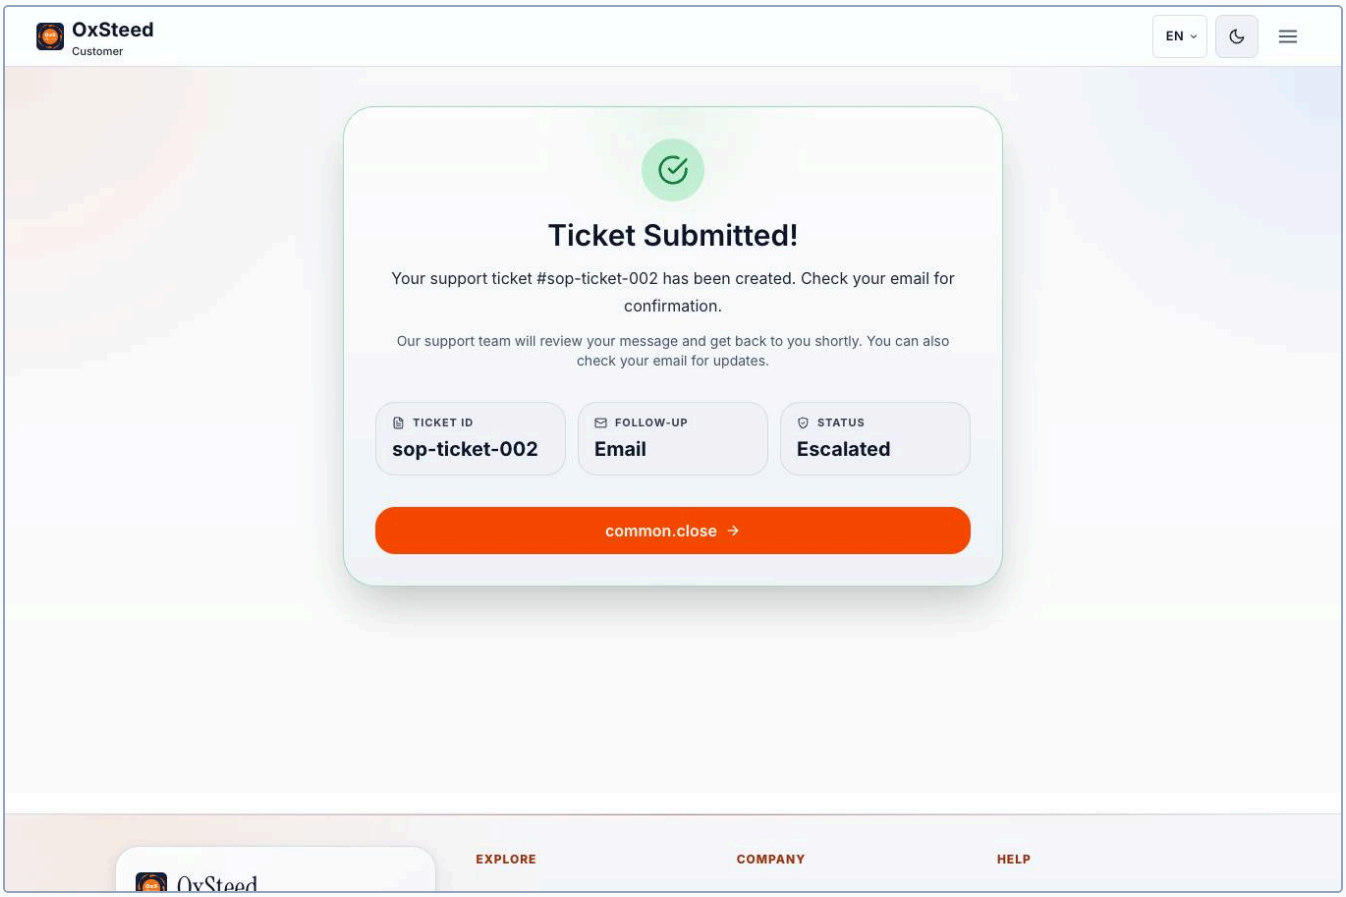

Figure 2. The escalation confirmation with your ticket identifier. *(Image description: Escalation confirmation with the ticket identifier)*

Step 3: Track the ticket and reply to the team

Open your ticket (signed-in users: your tickets list; guests: the ticket link from email). The ticket page shows Category, Priority, and Created, with the "Messages" thread. Write in the Reply box (placeholder "Write your reply...") and choose Reply. If the ticket was closed but the issue continues, reopen it from the support center.

> **Expected result:** Your reply appears in the Messages thread and the team is notified.

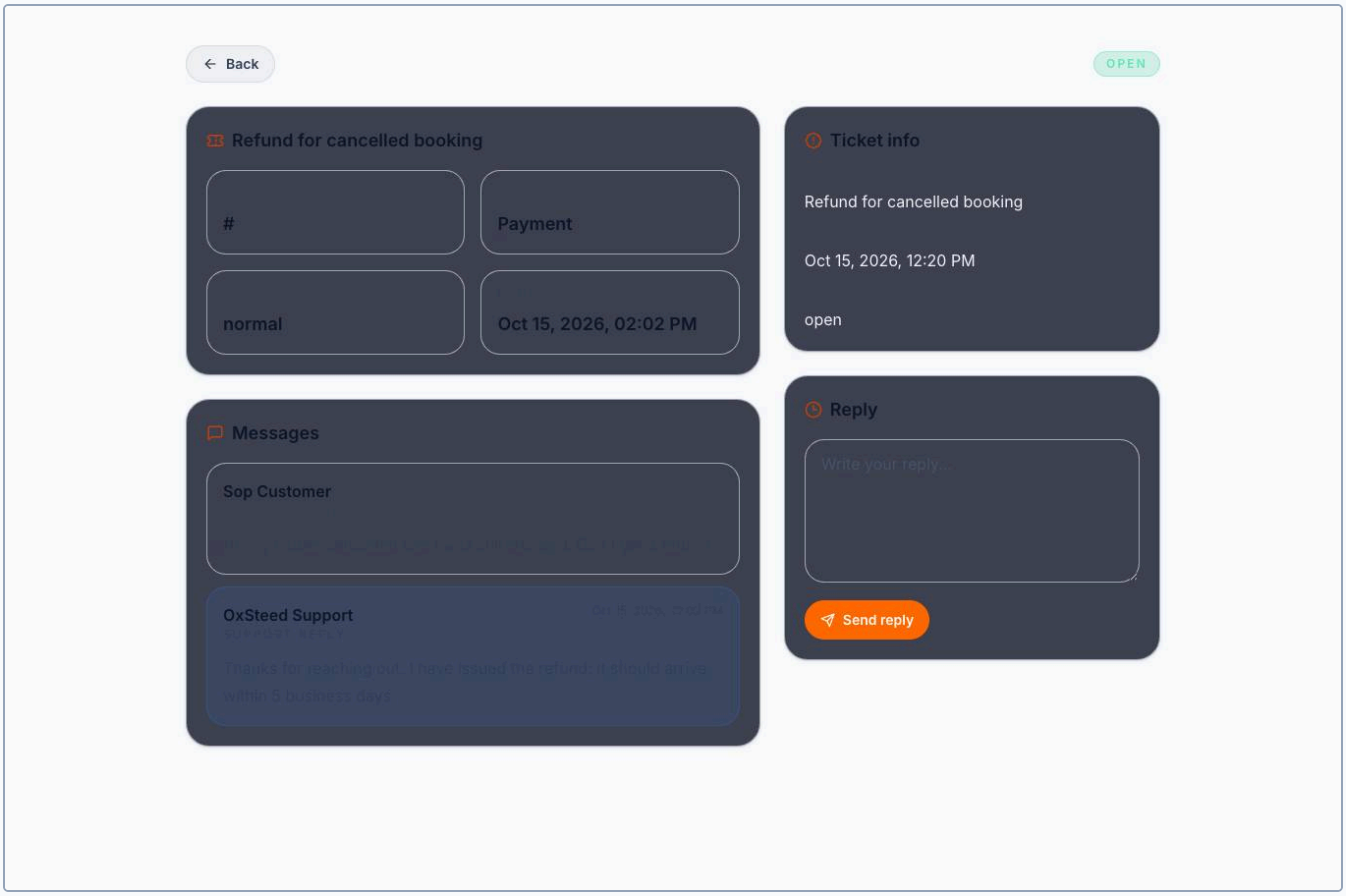

Figure 3. The ticket detail page, desktop view. *(Image description: Ticket detail page with the messages thread and reply box)*

Confirm it worked

The ticket page shows your messages and the team's replies; closed tickets say so and can be reopened.

If something goes wrong

Problem	What to do

The conversation will not verify (guest).	Use the exact email you started the conversation with and enter the code before it expires. Choose the resend option if nothing arrives.
The ticket page fails to load.	Reload and check you opened the current ticket link. If the error persists, start a fresh conversation and reference your ticket identifier.

Need help?

For urgent safety issues, use the direct contact option on the escalation page ("Need a faster response?").

Guide ID: business-work-specialized-intakes | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Submit specialized intake requests (maintenance, trades, beauty, creative, professional, continuity)

Guide ID	**business-work-specialized-intakes**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Business owner, Business manager, Customer
Availability	**Conditional**
Conditions	• Specialized intake requests require the specializedProfileTemplates launch flag, which is off by default. While it is off, the intake entry buttons are hidden on business profile pages and the public intake API returns 404. The hub intake triage tabs (beauty-ops, creative-ops, continuity-ops, professional-ops, trades-ops, maintenance) are already registered so they appear automatically at launch.
Online version	/how-it-works/business-work/specialized-intake-requests

Goal

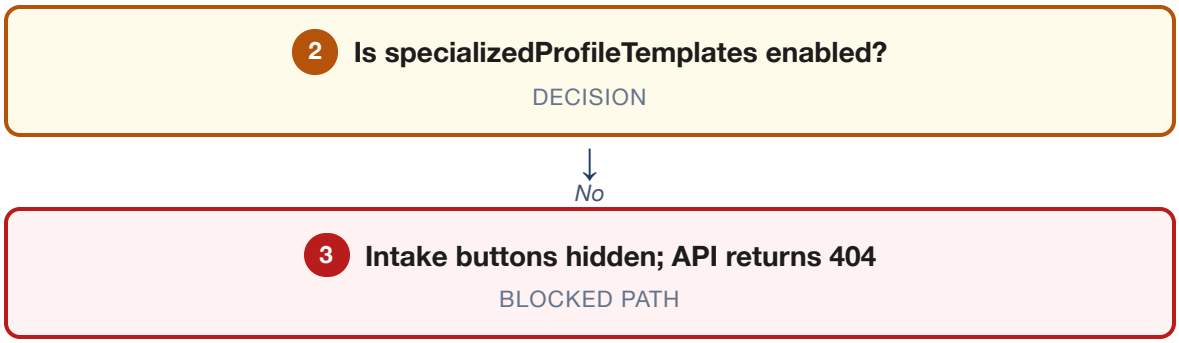

Collect structured intake requests from customers once specialized intake templates are launched.

Before you start

1. A business with a specialized template (property manager, trades, beauty, creative, professional, or continuity).
2. The specializedProfileTemplates launch flag enabled by the platform.

Process map

- *Yes:* Is specializedProfileTemplates enabled? → Choose the intake button for the template
- Choose the intake button for the template → Describe the issue and add details
- Describe the issue and add details → Submit the intake request
- Submit the intake request → Triage it in the hub ops tab
- Triage it in the hub ops tab → Intake tracked

Text version. 1. Open the business profile page. 2. Check whether the specializedProfileTemplates flag is enabled. If it is not, the intake buttons are hidden and the public intake API returns 404; nothing can be submitted. If it is, choose the intake button matching the business template. 3. Describe the issue and add photos, unit details, access notes, and urgency. 4. Submit the intake request. 5. Triage it in the matching hub operations tab. 6. The intake is tracked.

Steps

Step 1: Check whether intakes are available

Open the business profile page. When the specializedProfileTemplates flag is off (the default), the intake entry buttons (maintenance request, trades request, beauty intake, creative intake, professional intake, continuity intake) do not render, and submitting to the public intake API returns a 404. There is nothing to fix: intakes are simply not launched yet.

> **Expected result:** You can tell whether intake buttons are present on the profile page.

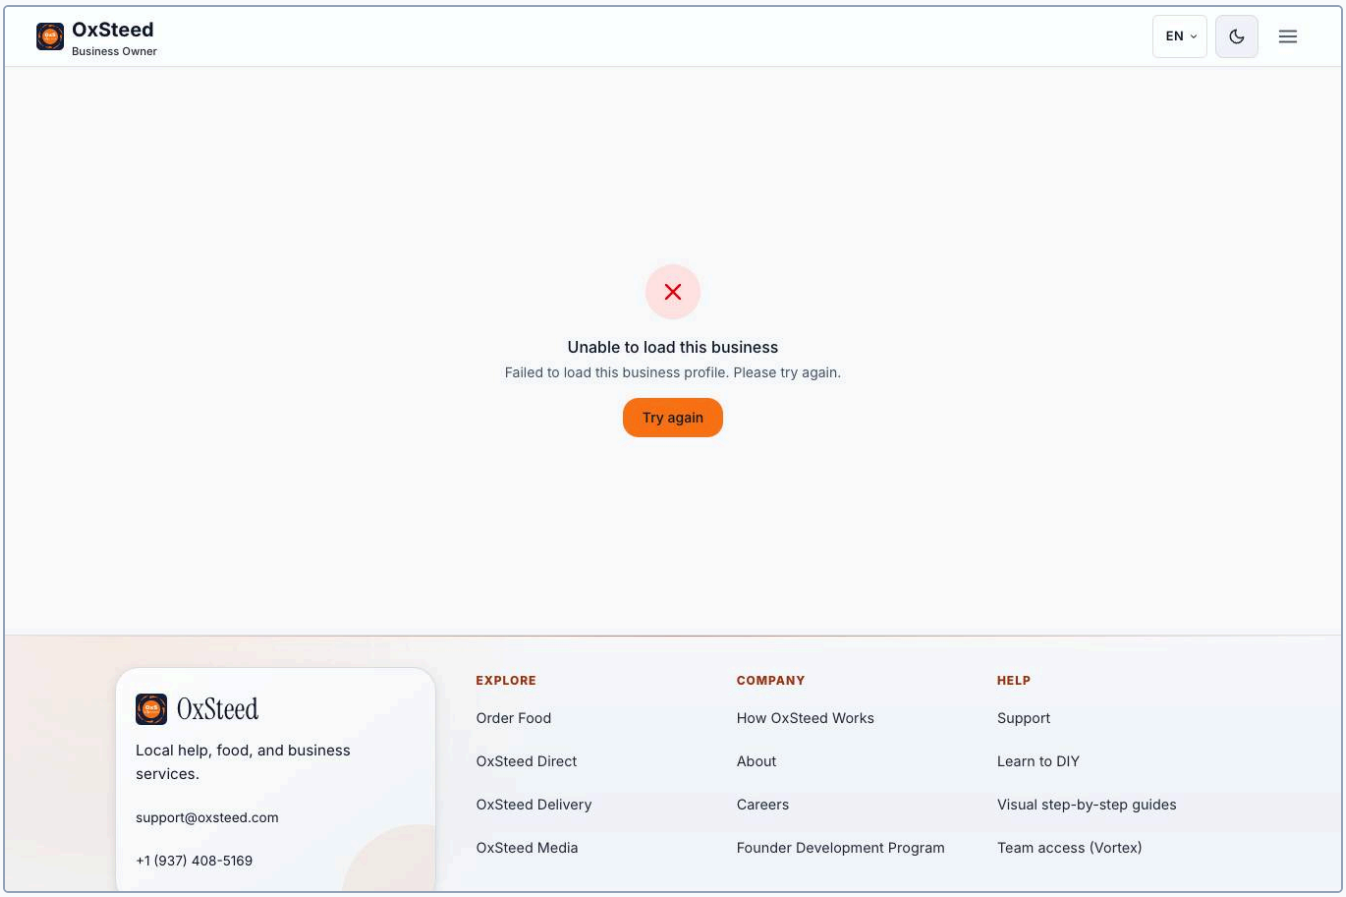

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Business profile page with no intake buttons visible)*

Step 2: Open the intake form (when launched)

When the flag is on, the profile page shows the intake button for the business template (for example, the maintenance request button for a property manager). Choose it to open the intake form, such as "Report an issue to {business name}".

> **Expected result:** The intake form opens with the business context preloaded.

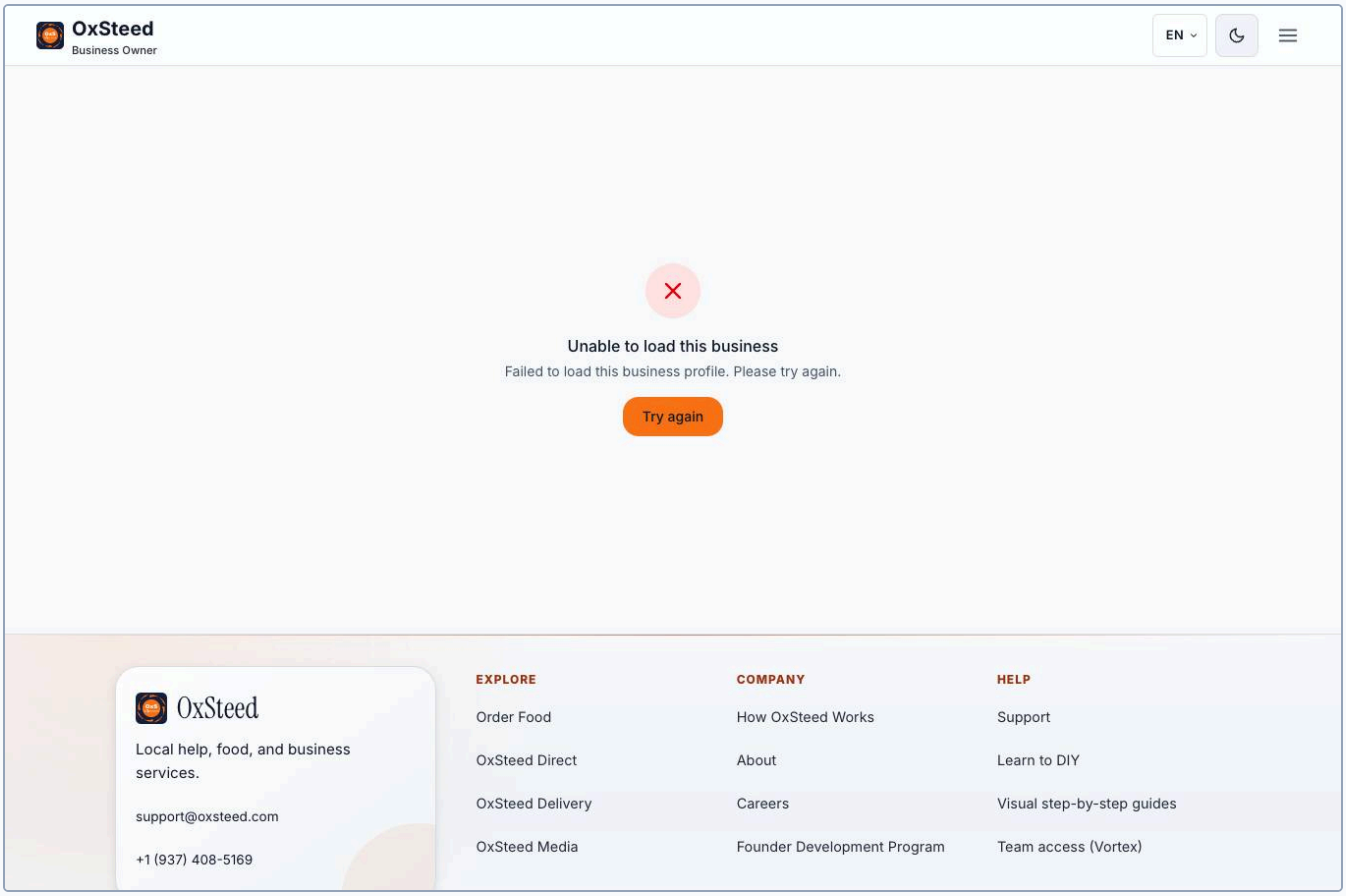

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Maintenance request form with issue categories and details fields)*

Step 3: Describe the request and submit

Pick the issue category, write a clear title and description, and add what helps most: photos, unit details, access notes, urgency, and times that work for entry. Submit the form. You will see a submitted confirmation.

> **Expected result:** The intake submits and a confirmation appears.

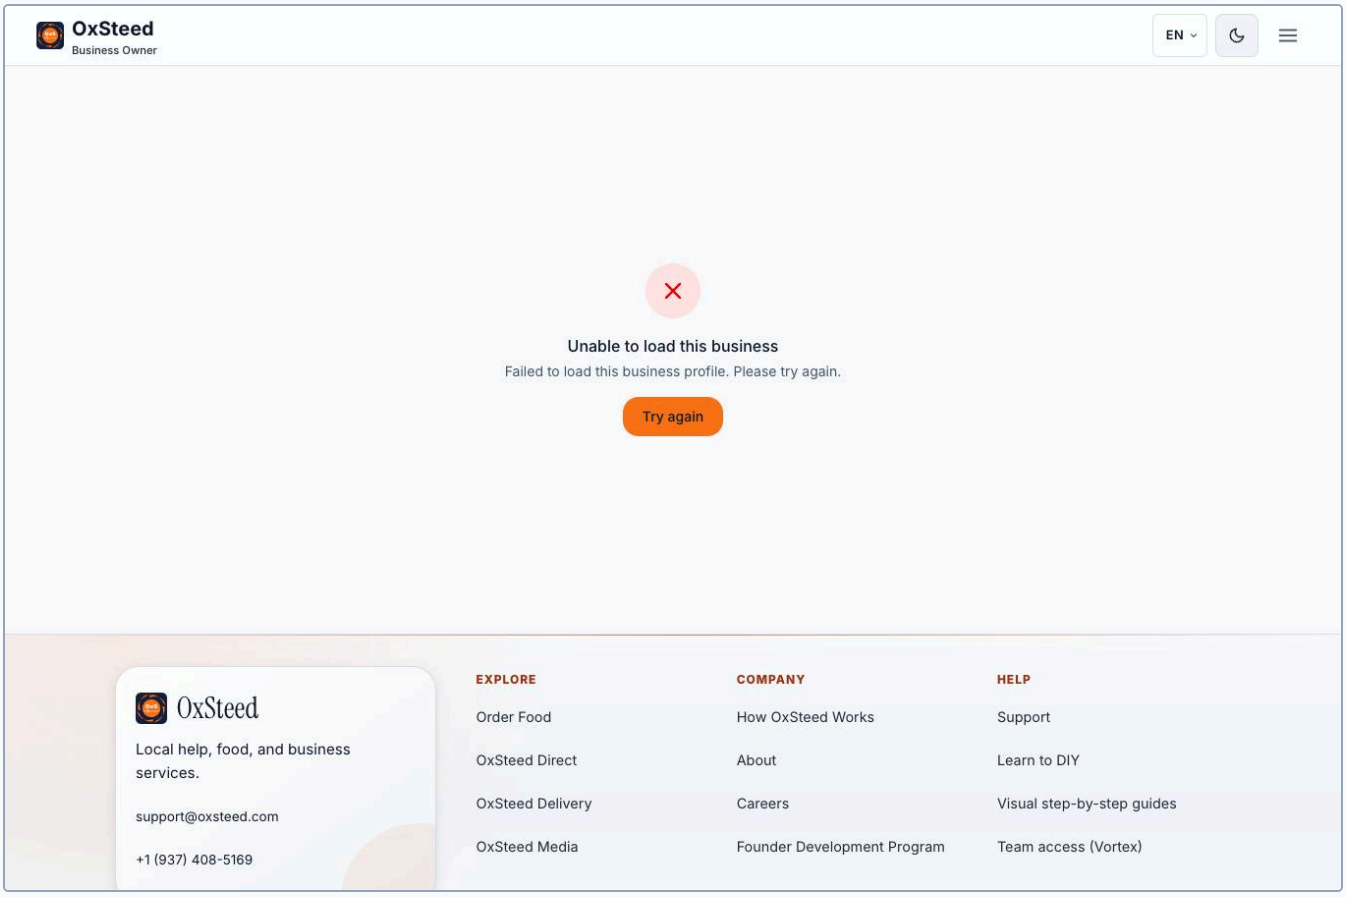

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Filled-in intake form with photos, urgency, and the submit button)*

Step 4: Triage the intake in the hub

Submitted intakes notify the owner with a deep link to the matching operations tab in the business hub (for example, the maintenance tab). Open the tab, review the request, and work it like any other incoming job.

> **Expected result:** The intake appears in the hub ops tab ready to work.

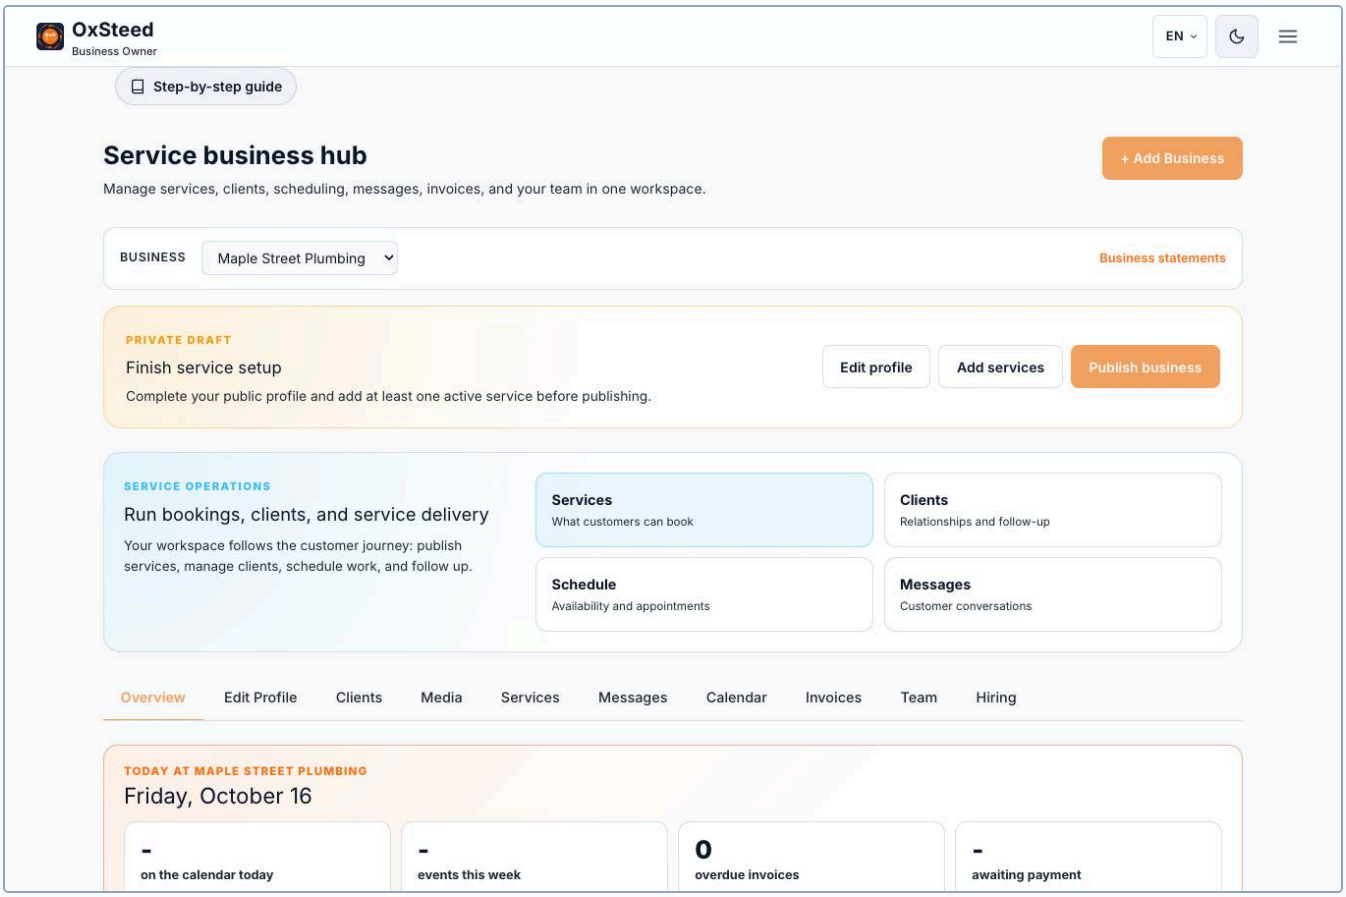

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

When launched, intake buttons appear on the profile and submissions land in the hub ops tab. While unlaunched, the 404 on the public intake API confirms the gate is working.

If something goes wrong

Problem	What to do

The intake form returns a 404 on submit.	The specializedProfileTemplates flag is off, so the server blocks the public intake API. This is expected until the platform enables the flag; use the standard job posting flow instead.
You expected intake buttons but see none.	Intake entry points render only while the flag is on and only for businesses with a specialized template. Confirm both with your OxSteed contact.

Need help?

If intakes were announced as launched but still fail, contact OxSteed Support from the /support page.

Guide ID: financial-archives | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Browse archived statements

Guide ID	**financial-archives**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-archives

Goal

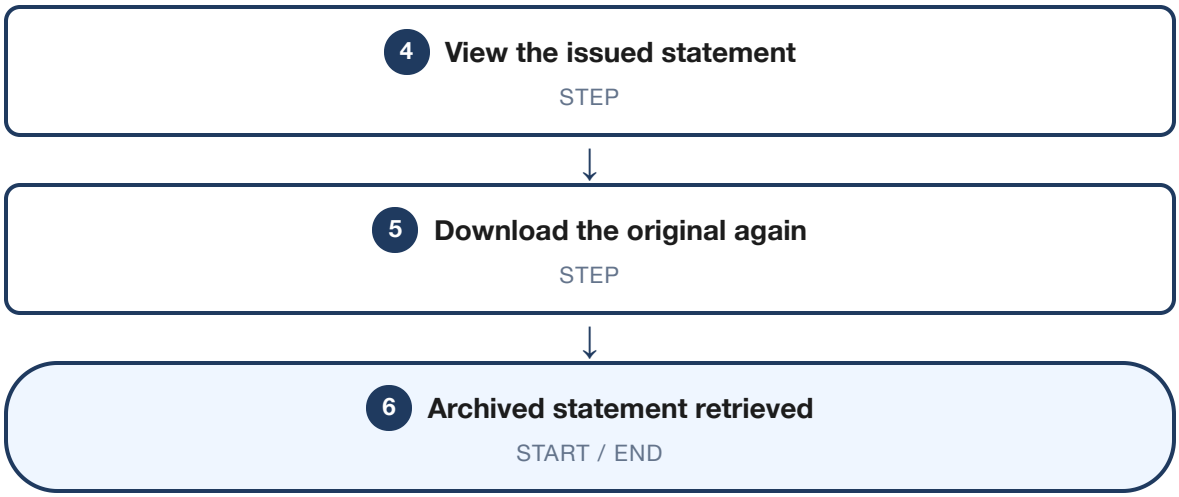

Find issued monthly statements in the archive and view or download the immutable originals.

Before you start

1. Sign in to your OxSteed account.
2. Know which product the statement belongs to (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement).

Process map

Text version. Open a product archive, for example /oxsteed-credit/statements/archive ("Statement archive": "Your issued monthly statements. Originals are immutable; download them again at any time."). Pick the product (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement). Find the statement period ("Jan 1 – Jan 31"), open it ("View"), and download the original ("Download issued", "Download CSV"). Each product has its own archive; they never merge.

Steps

Step 1: Open a statement archive

Open one of the archive routes: /oxsteed-credit/statements/archive for OxSteed Credit, /restaurant-credit/statements/archive for Restaurant Credit, /helper-earnings/statements for helper earnings, /business/statements for business statements, or /restaurant-settlement/statements for restaurant settlement. The page is titled "Statement archive".

> **Expected result:** The archive loads with the product selector and the issued statements.

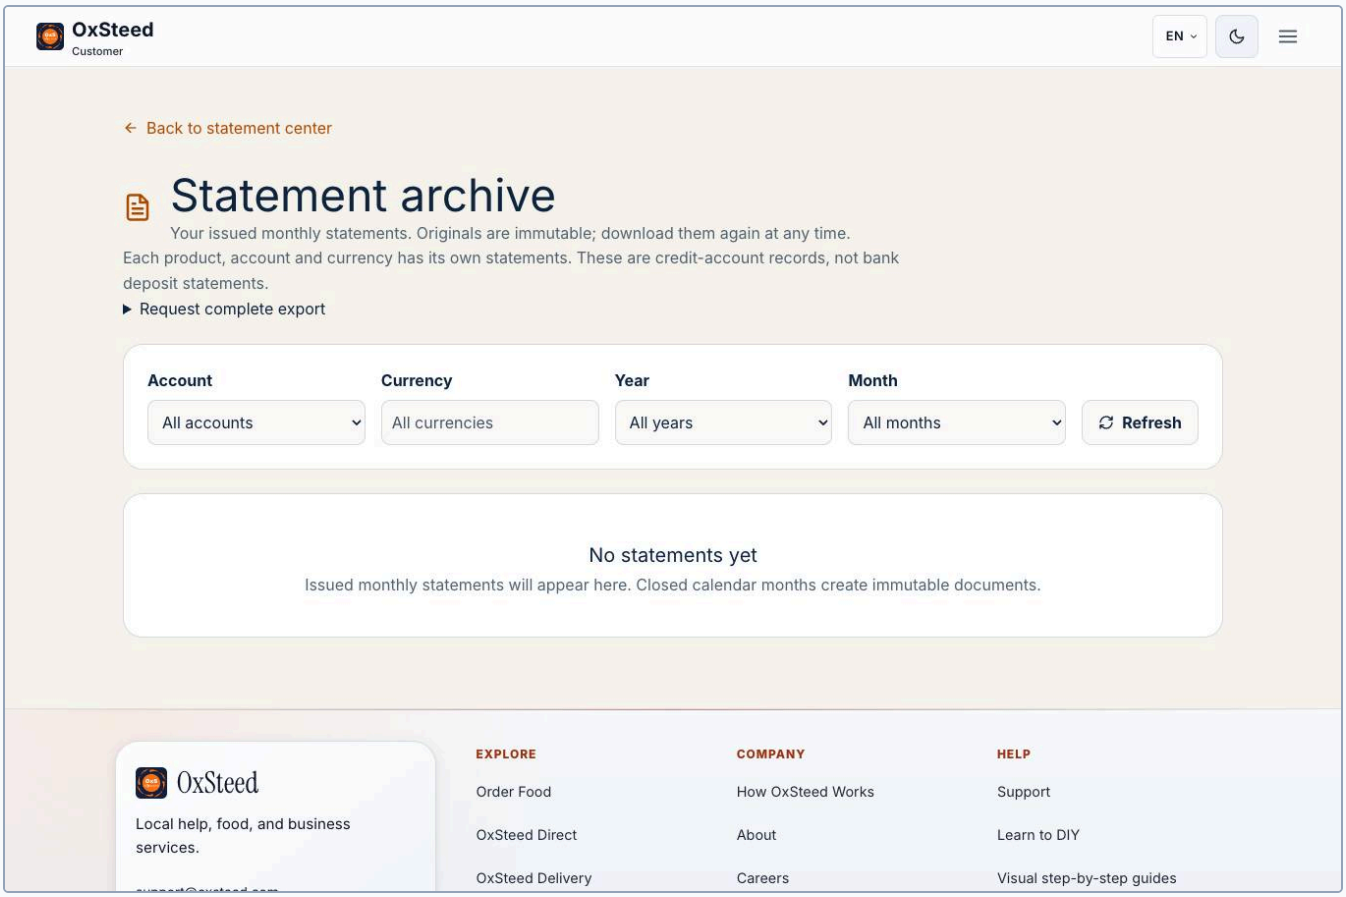

Figure 1. The statement archive, desktop view. *(Image description: Synthetic example: Statement archive)*

Step 2: Pick the product and find the period

Use the "Product" selector to switch products ("Each product, account and currency has its own statements. These are credit-account records, not bank deposit statements."). Find the statement by its period heading ("Jan 1 – Jan 31"). The totals line uses the product's own accounting vocabulary (for example "Opening payable", "Posted earnings", "Settled payouts and status removals", "Closing payable" for helper earnings).

> **Expected result:** The right statement document is on screen with its totals.

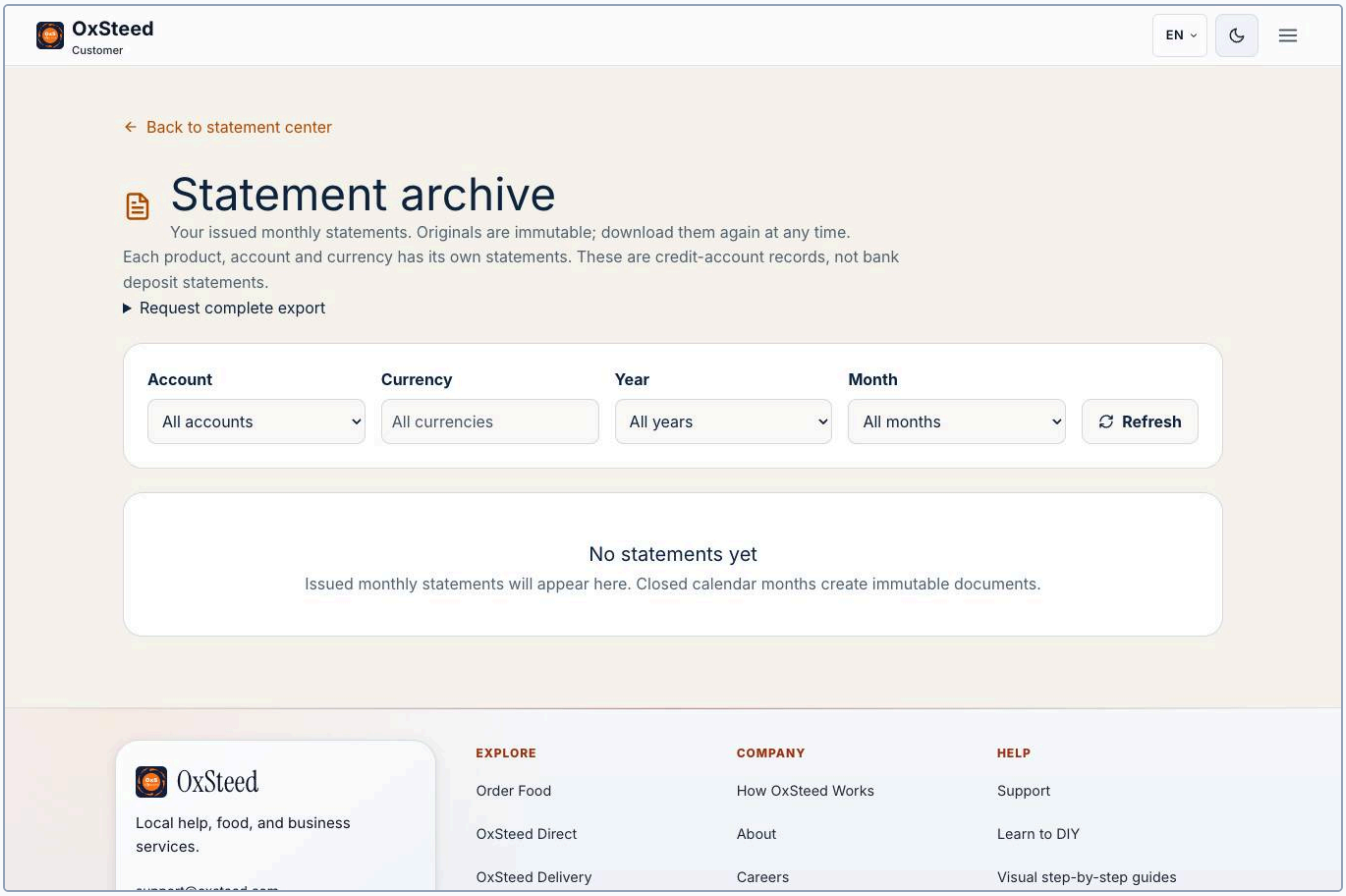

Figure 2. Picking a product and period, desktop view. *(Image description: Synthetic example: Statement archive)*

Step 3: View and download the issued statement

Choose "View" on the statement to read the issued document. Use "Download issued" for the immutable original or "Download CSV" for the data. Originals never change; if a statement was amended, the archive marks it and links the correction.

> **Expected result:** The statement opens or downloads with its full transaction history.

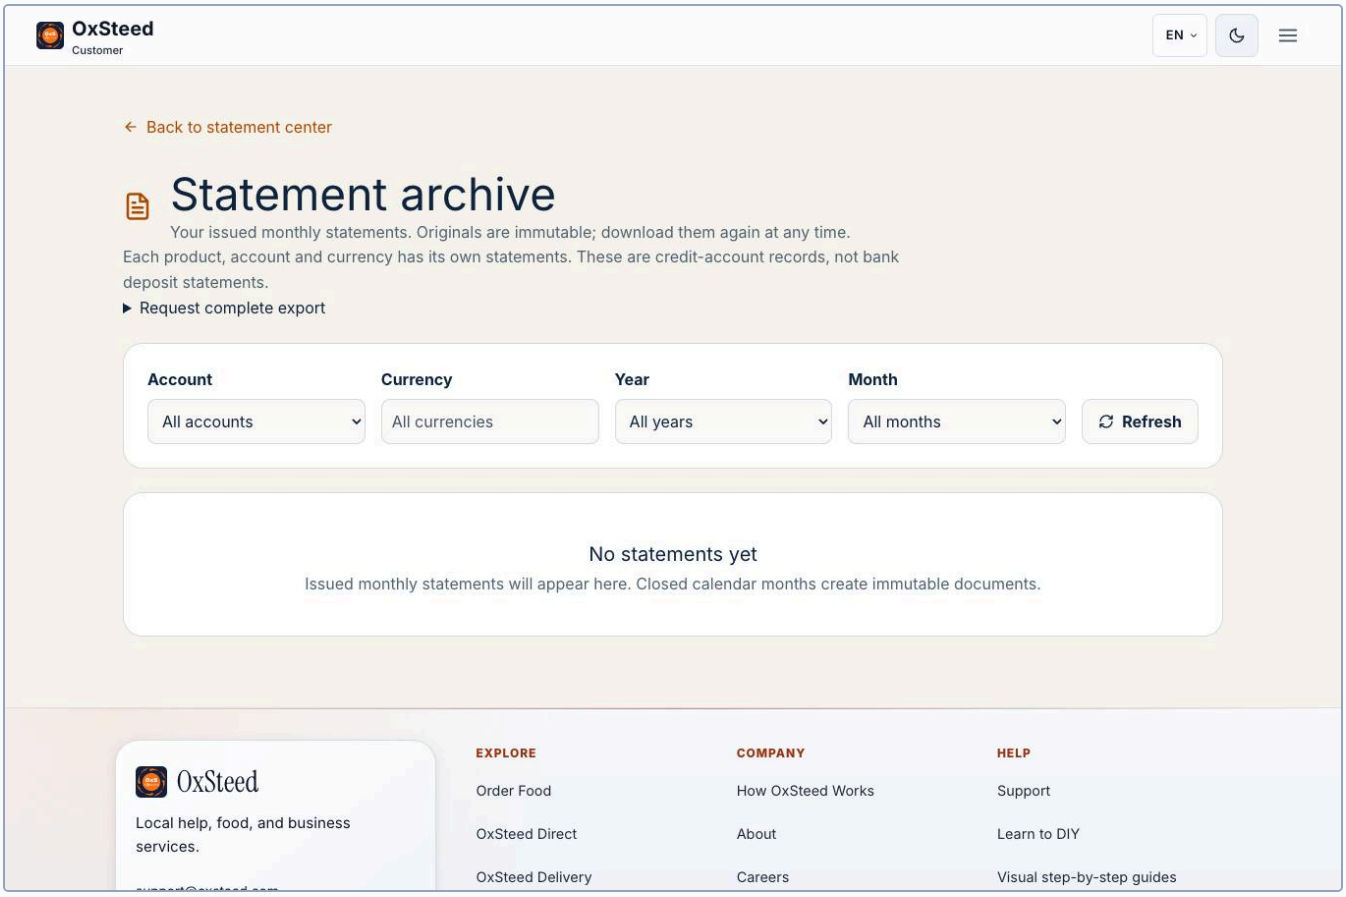

Figure 3. Viewing an issued statement, desktop view. *(Image description: Synthetic example: Statement archive)*

Confirm it worked

You have the issued statement open or downloaded, from the right product archive, with the immutable original.

If something goes wrong

Problem	What to do

The archive shows "No statements yet".	"Issued monthly statements will appear here. Closed calendar months create immutable documents." If you expected one, check the product selector; statements live under their own product.
You cannot find a statement for a different product.	Switch the "Product" selector or open the product's own archive route directly (for example /restaurant-credit/statements/archive).

Need help?

For archive issues, use the in-app support page at /support.

Guide ID: financial-downloads | **Revision:** 3 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Download statement exports

Guide ID	**financial-downloads**
Revision	Revision 3 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-downloads

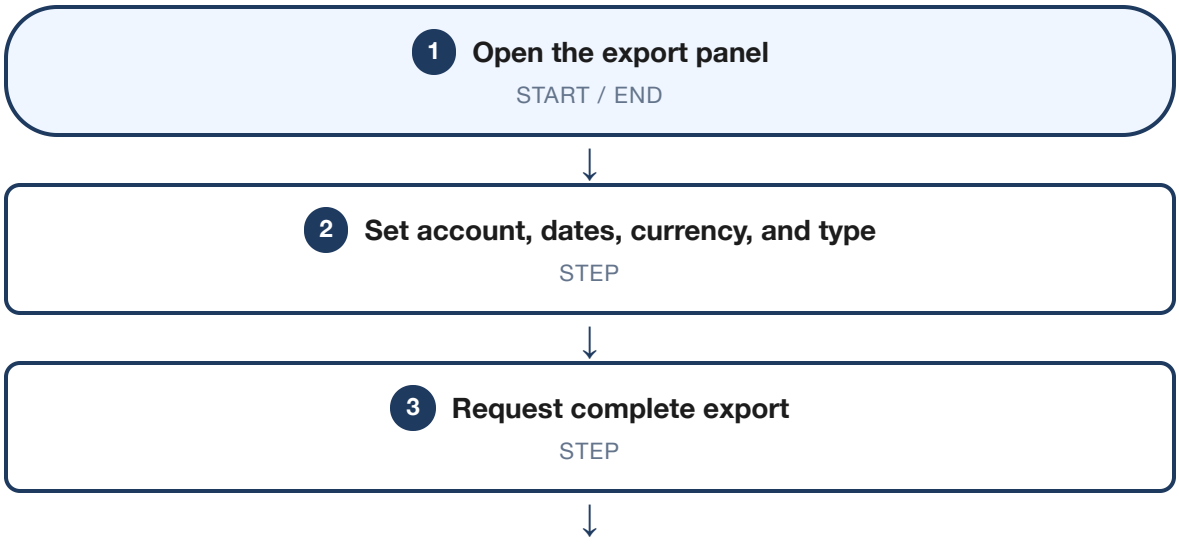

Goal

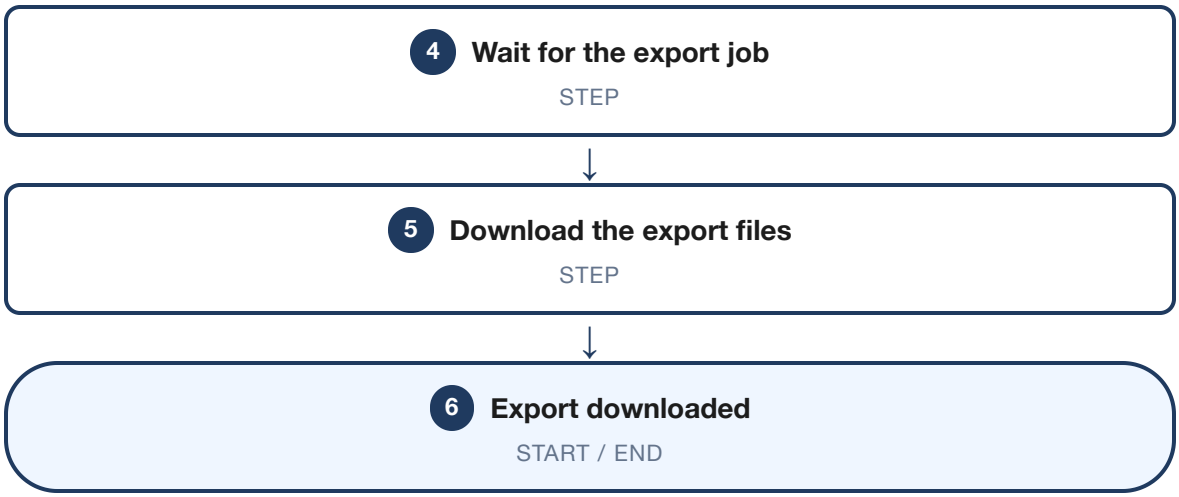

Export statement data as CSV or PDF for accounting, audits, or taxes.

Before you start

1. Sign in to your OxSteed account.
2. Know the account, date range, and format you need.

Process map

Text version. Open the statement archive for an authorized account. Expand Request complete export and choose account, dates, currency and format. Submit the request; follow its job page until complete, then download the files. Failures and cancellations have separate retry or cancel actions when offered.

Steps

Step 1: Open the export panel

From a statement archive, expand the export section and choose "Request complete export". You can also track a specific job at /statements/exports/:jobId. The panel heading reads "Request complete export".

> **Expected result:** The export form loads with the account and period fields.

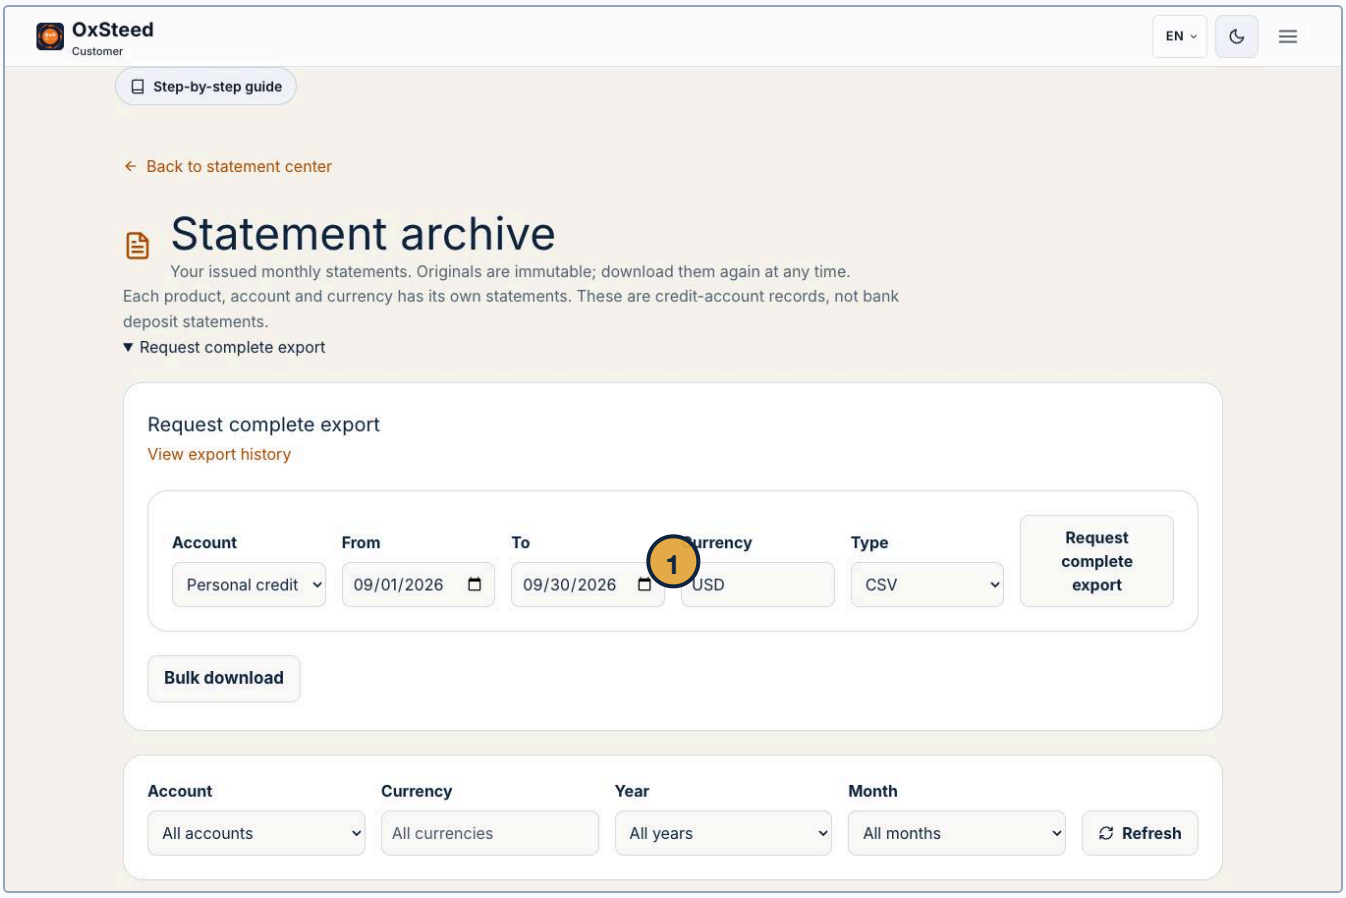

Figure 1. The export panel, desktop view. *(Image description: Synthetic example: Statement archive)*

1. **1.** Export form

Step 2: Set the export parameters and submit

Choose the "Account", the "From" and "To" dates, the "Currency" (3-letter code), and the "Type" (format), then choose "Request complete export". For several accounts at once, use the bulk section: check the accounts, pick the "Type", and start the bulk export.

> **Expected result:** The export job starts and shows its pending state.

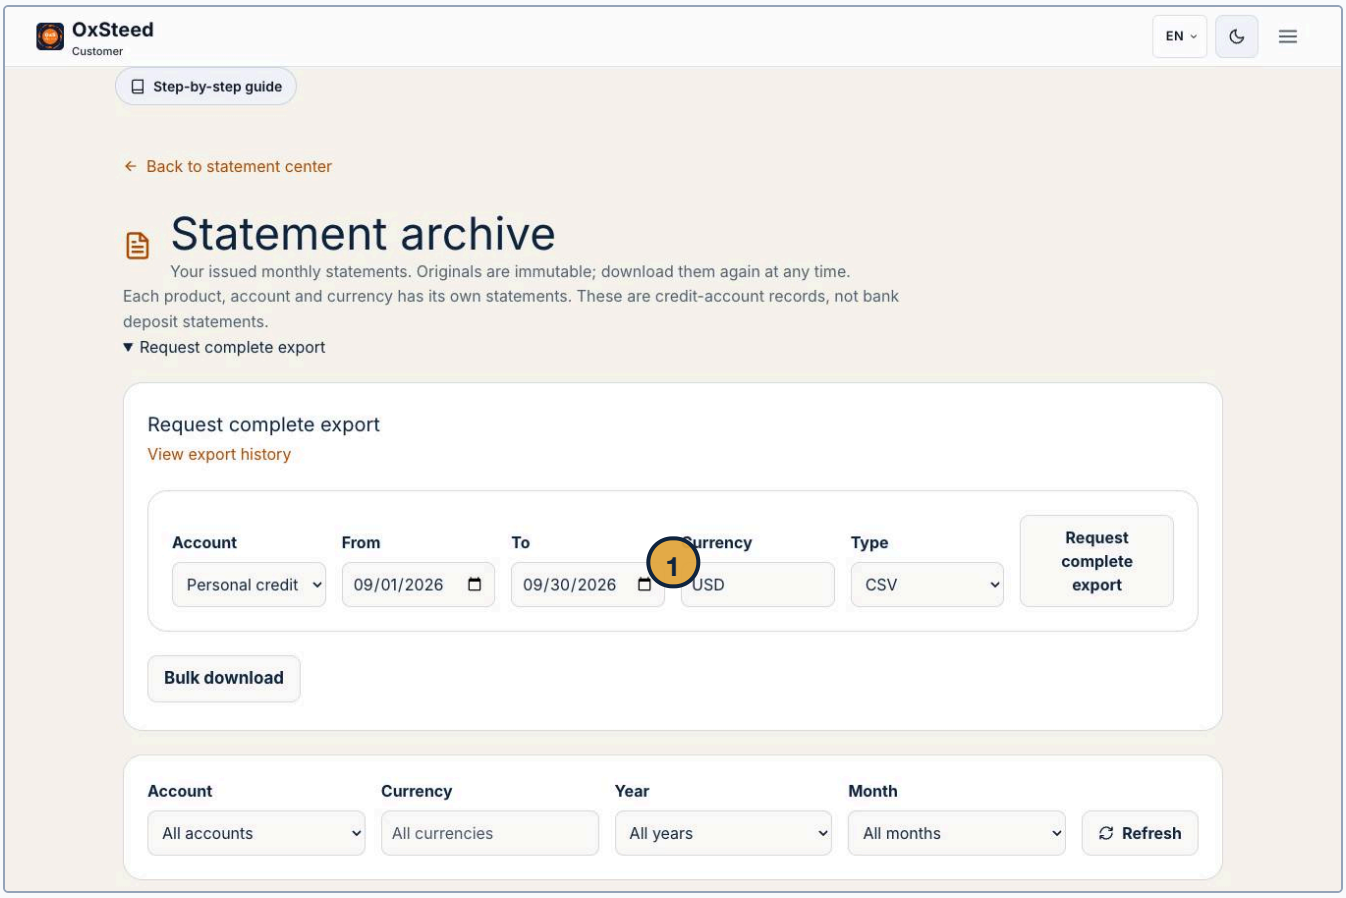

Figure 2. Submitting an export, desktop view. *(Image description: Synthetic example: Statement archive)*

1. **1.** Export form

Step 3: Track the job and download the files

The job shows its state: pending, complete, failed, or cancelled. While it runs you can use "Cancel export"; if it fails and "Retry export" is offered, use it. When complete, the "Export files" section lists each file ("Download CSV · part", with the row range). Use "View export history" for past jobs.

> **Expected result:** The export files download to your device.

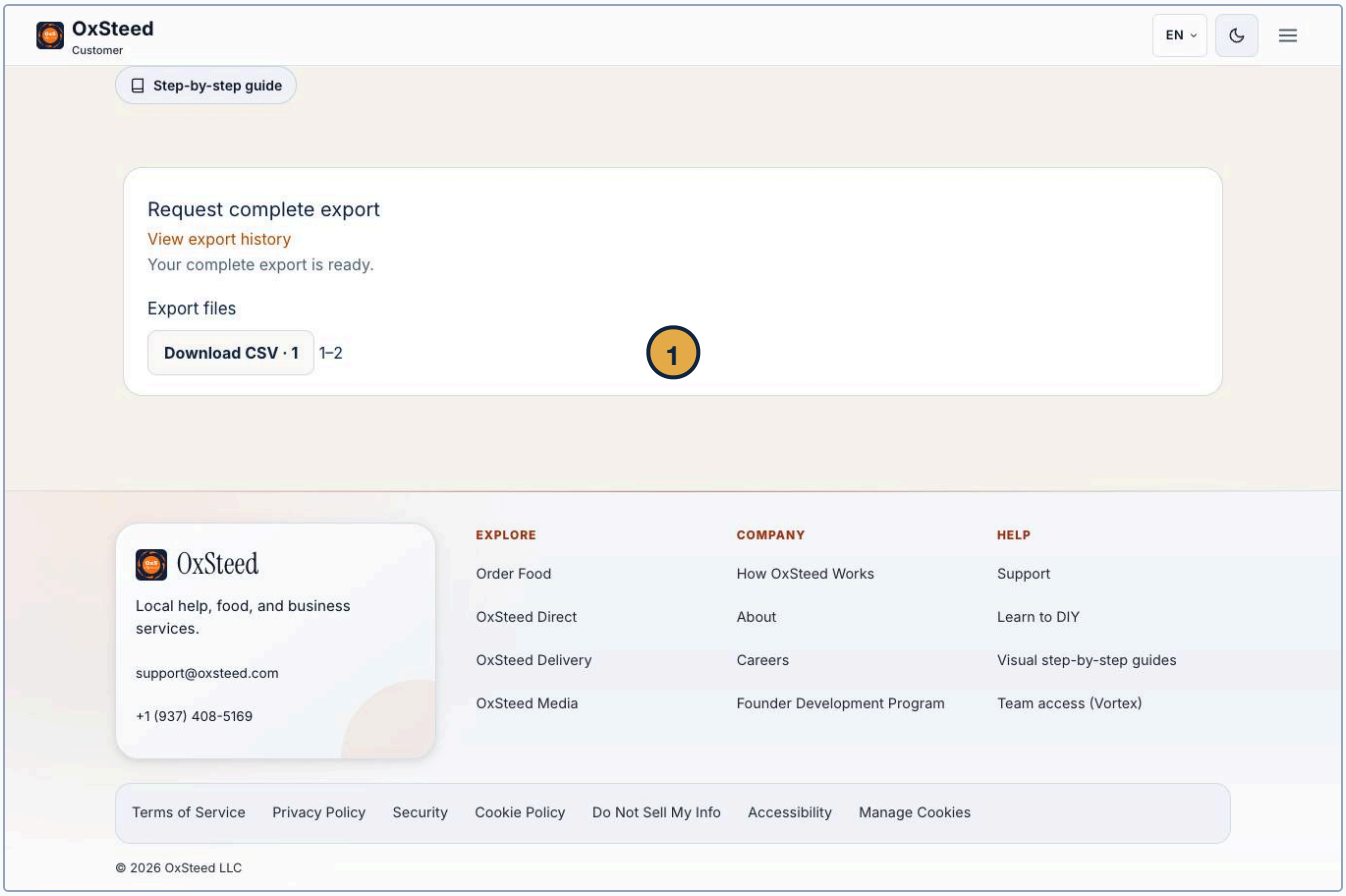

Figure 3. Downloading export files, desktop view. *(Image description: Export files list with download buttons)*

1. **1.** Export files list

Confirm it worked

The export files are on your device and the history lists the completed job.

If something goes wrong

Problem	What to do

The export fails.	You see "Your export could not be completed." Use "Retry export" if offered, or narrow the date range and request again.
The job is still running.	Large date ranges take longer. You can "Cancel export" and re-request a smaller range, or check "View export history" later.

Need help?

For export issues, use the in-app support page at /support.

Guide ID: financial-oxsteed-credit | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Use OxSteed Credit (top-ups, transfers, withdrawals, cards)

Guide ID	**financial-oxsteed-credit**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Conditional**
Conditions	• OxSteed Credit requires the oxsteed_credit_enabled feature flag. It is ON in production as of 2026-10-11. If the rail is off, the page shows "OxSteed Credit is temporarily paused" and spending, top-ups, and withdrawals stay paused while balances and history remain visible.
Online version	/how-it-works/financial/financial-oxsteed-credit

Goal

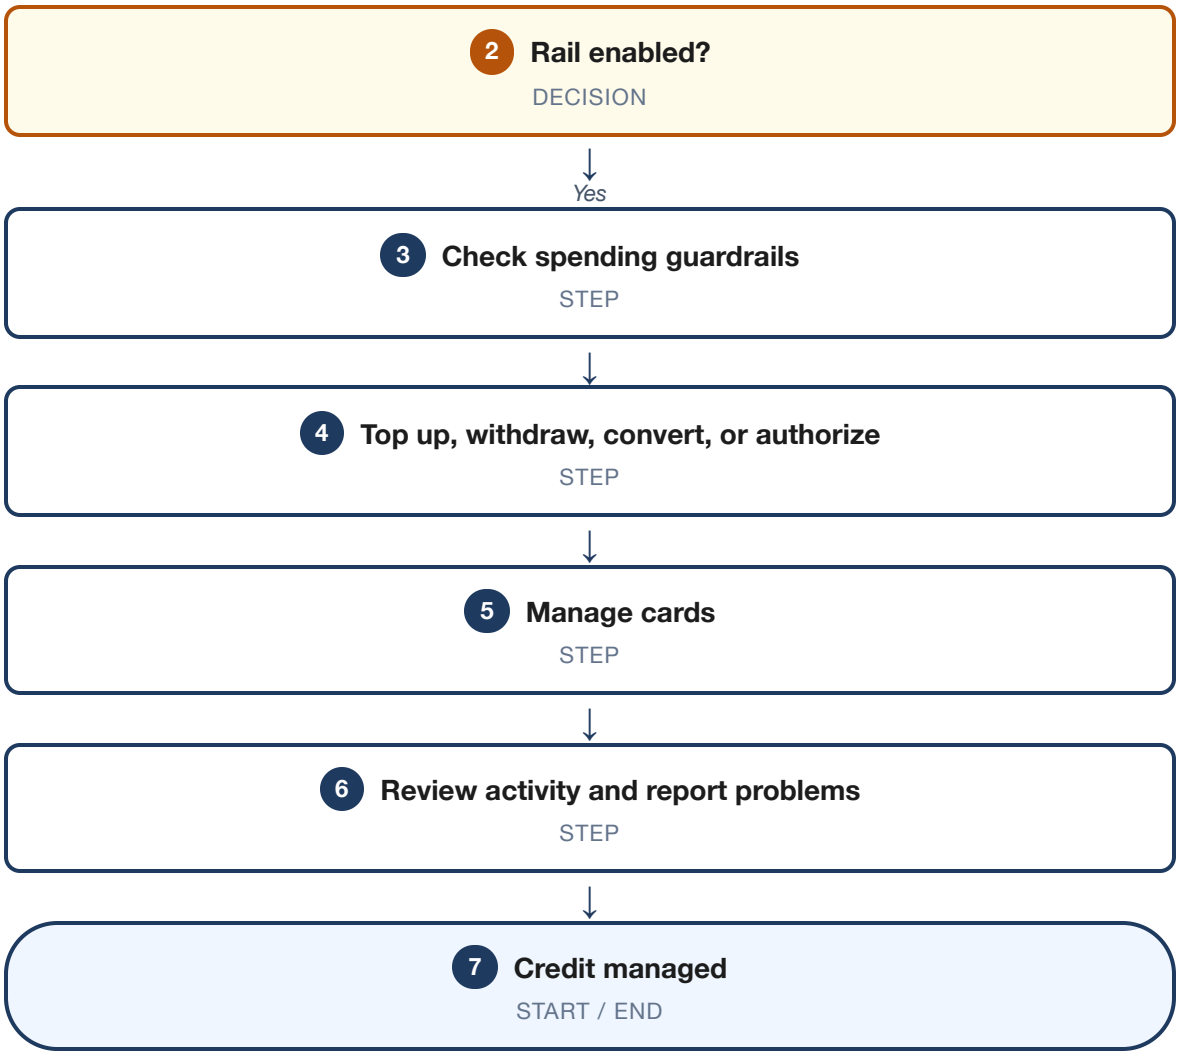

Use your OxSteed Credit account: top up, withdraw, convert, authorize in-store payments, move value with restaurants, and manage cards.

Before you start

1. Sign in to your OxSteed account.
2. Check the wallet overview to see your current balance.

Process map

- *No:* Rail enabled? → Paused: read-only balances and history

Text version. Open /oxsteed-credit. If the rail is enabled, check "Your spending guardrails" for the daily limits. Then move money: top up from /wallet with "Add money", withdraw to your bank with "Request withdrawal", convert currencies with an approved quote in "Convert Credit", or create an in-store authorization and give the hold ID to the cashier. Manage virtual and physical cards at /oxsteed-credit/cards. Review "Recent activity" and use "Report a problem" on any transaction. If the rail is paused, the page shows the pause banner and balances stay read-only.

Steps

Step 1: Open OxSteed Credit and check the guardrails

Open /oxsteed-credit ("OxSteed Credit": "Your OxSteed Credit balance, top-ups, withdrawals, conversions, and where to spend it."). Review "Your spending guardrails" ("Daily controls"): "Spend amount remaining", "Spend movements remaining", "Transfer amount remaining", and "Transfers remaining", with the reset date.

> **Expected result:** You know today's remaining spend and transfer limits before moving money.

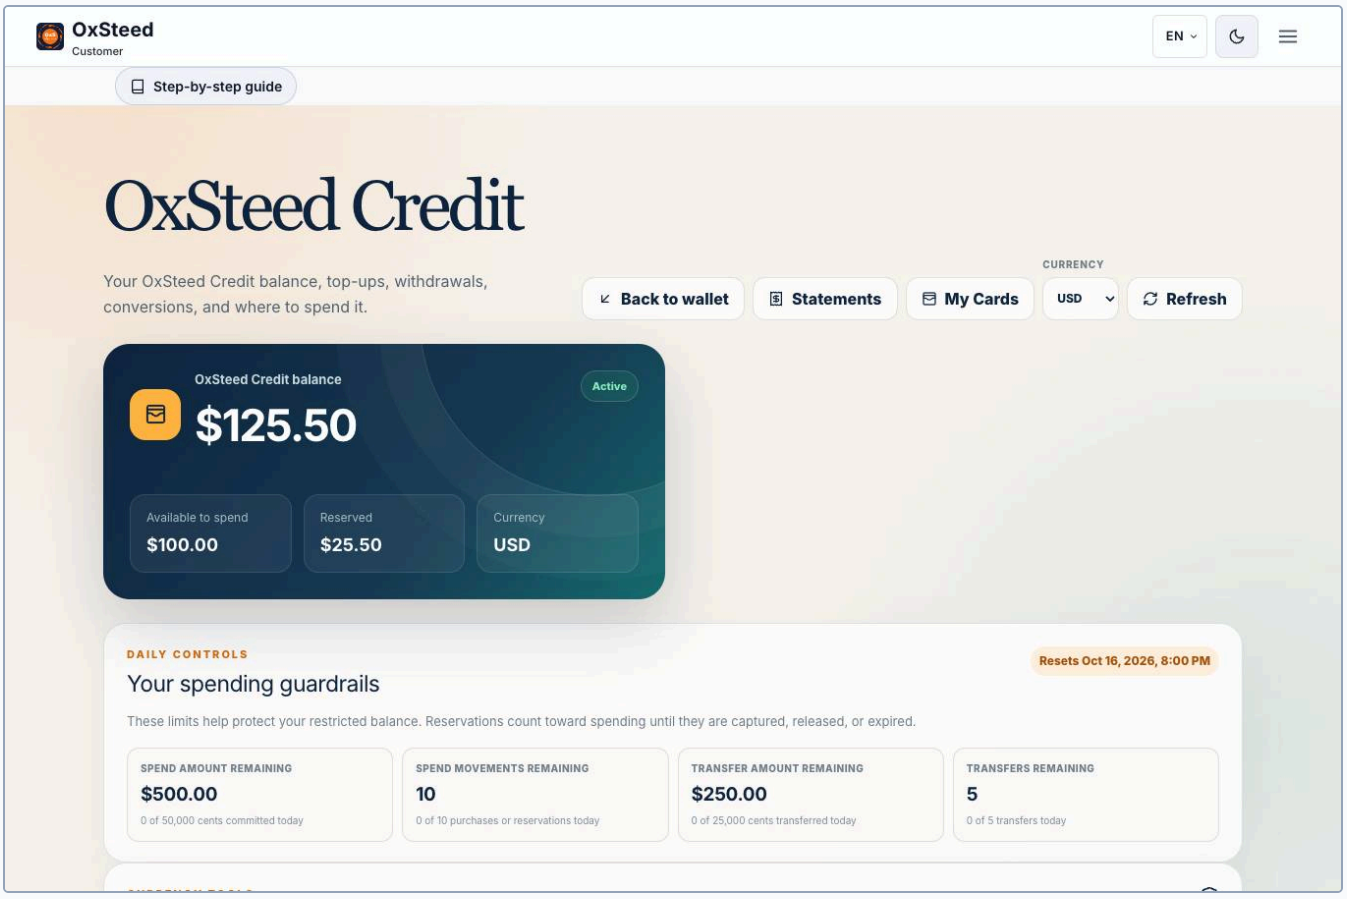

Figure 1. OxSteed Credit with guardrails, desktop view. *(Image description: Synthetic example: OxSteed Credit)*

Step 2: Top up OxSteed Credit from the wallet

On /wallet, use the "Add money" panel ("Add money to OxSteed Credit with a card. It is credited once the payment clears."): enter the "Amount", optionally pick "Quick amounts", choose "Continue", and complete the secure card payment step. For larger top-ups, enter the "Verification code" emailed to you and choose "Verify and continue". Your wallet updates when the payment confirms.

> **Expected result:** You see "Money added to your OxSteed Credit" and the balance increases.

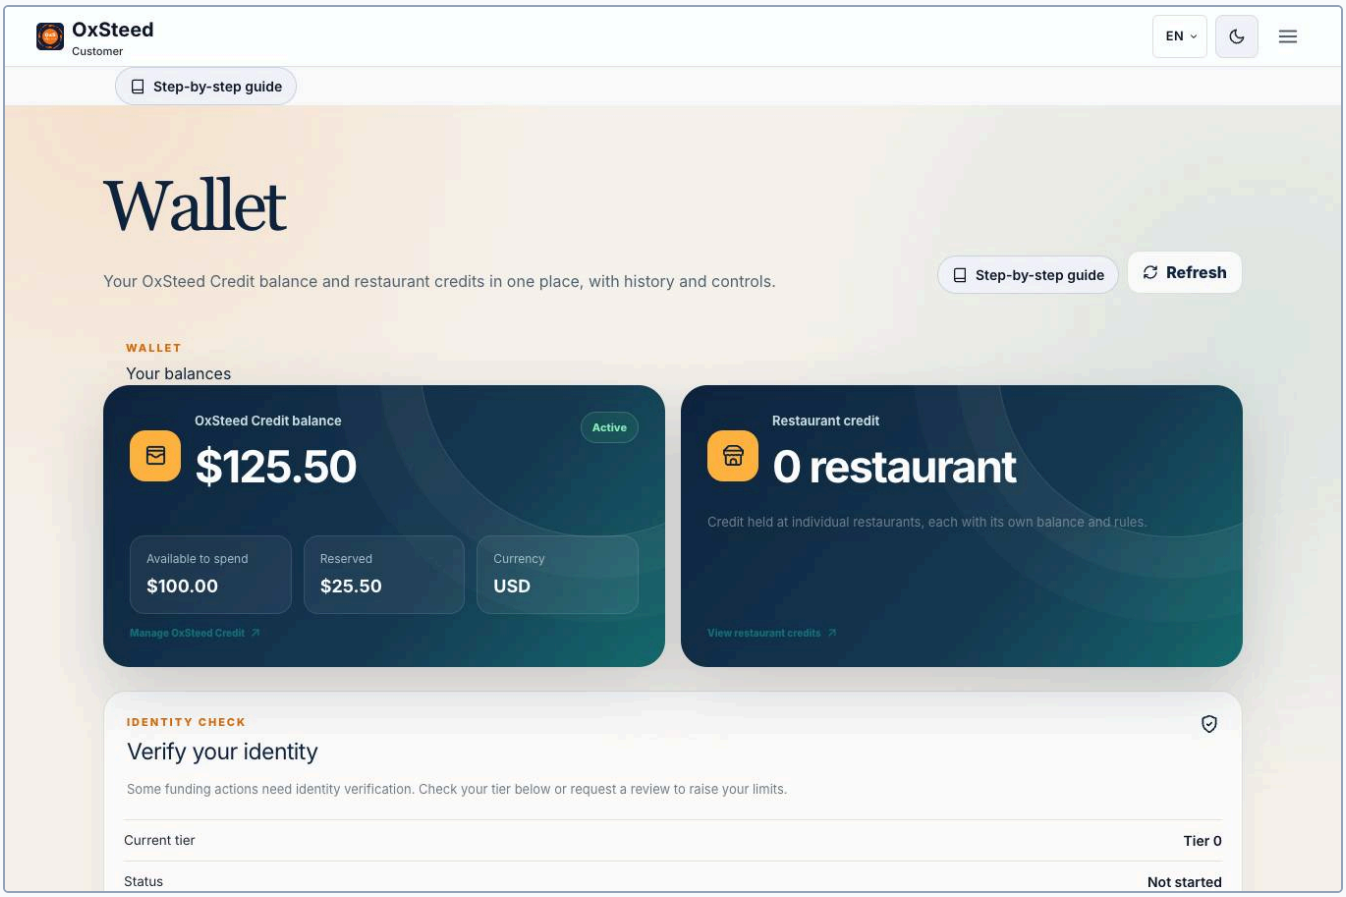

Figure 2. Topping up from the wallet, desktop view. *(Image description: Synthetic example: Wallet)*

Step 3: Withdraw to your bank

In "Money out" > "Withdraw to your bank" ("Move OxSteed Credit to your connected bank account. A withdrawal locks the amount plus the quoted fee right away, an admin approves it, and the payout completes when the bank transfer confirms."), enter the "Amount" and choose "Request withdrawal". The fee quote shows "Fee X · You receive Y". Then complete "Verify it is you" ("Verification code") and choose "Confirm withdrawal". Track it under "Withdrawal history" ("Status: ..."); you can "Cancel" a requested withdrawal.

> **Expected result:** You see "Withdrawal requested." and the history row shows its status.

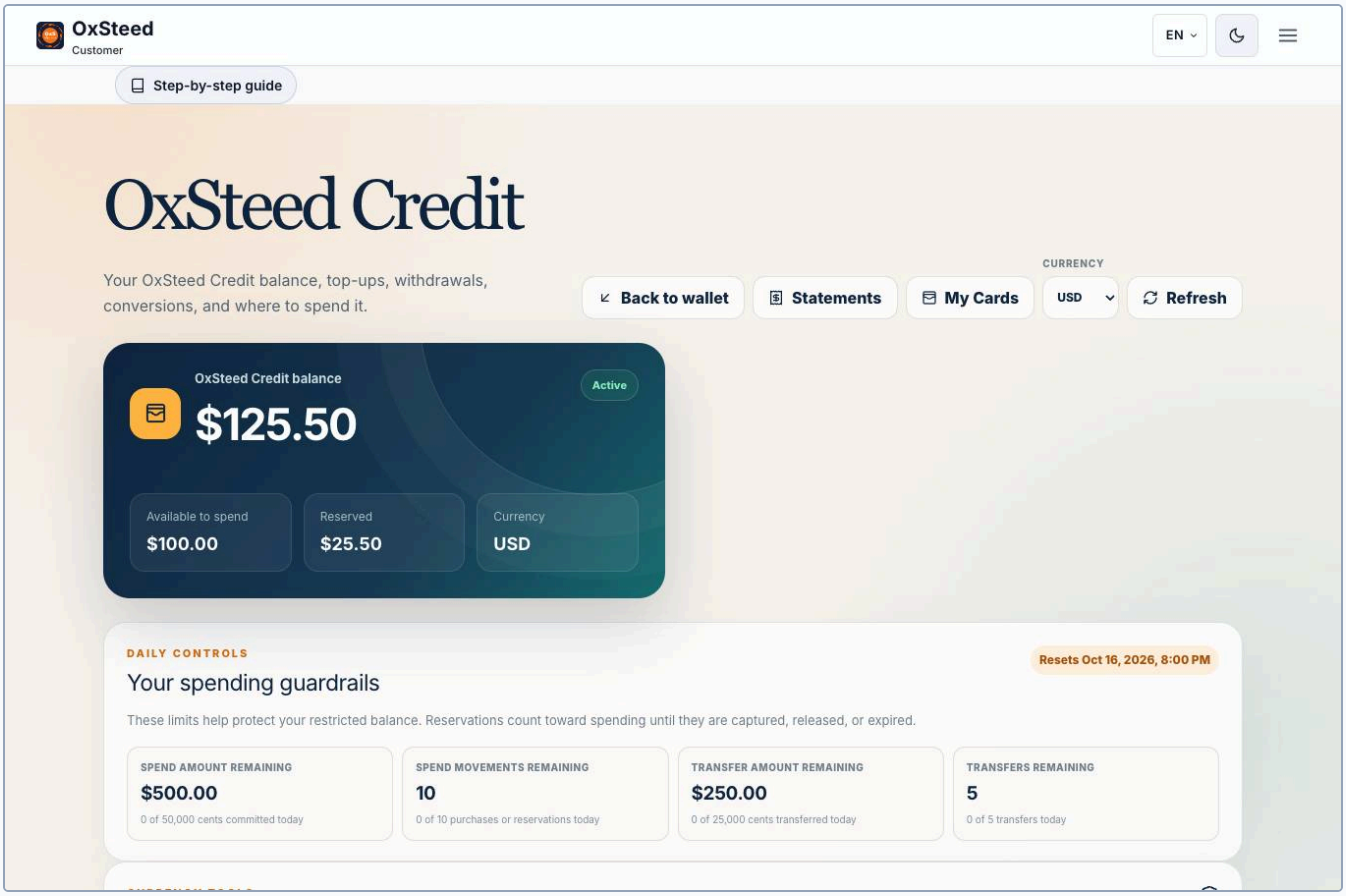

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: OxSteed Credit)*

Step 4: Convert credit between currencies

In "Currency tools" > "Convert Credit" ("Use an approved, unexpired quote. OxSteed never estimates exchange rates or combines currencies automatically."), paste the "Quote ID" and the "Source amount", then convert. You see "Conversion completed." and "Moved X into Y."

> **Expected result:** The converted amount appears in the target currency account.

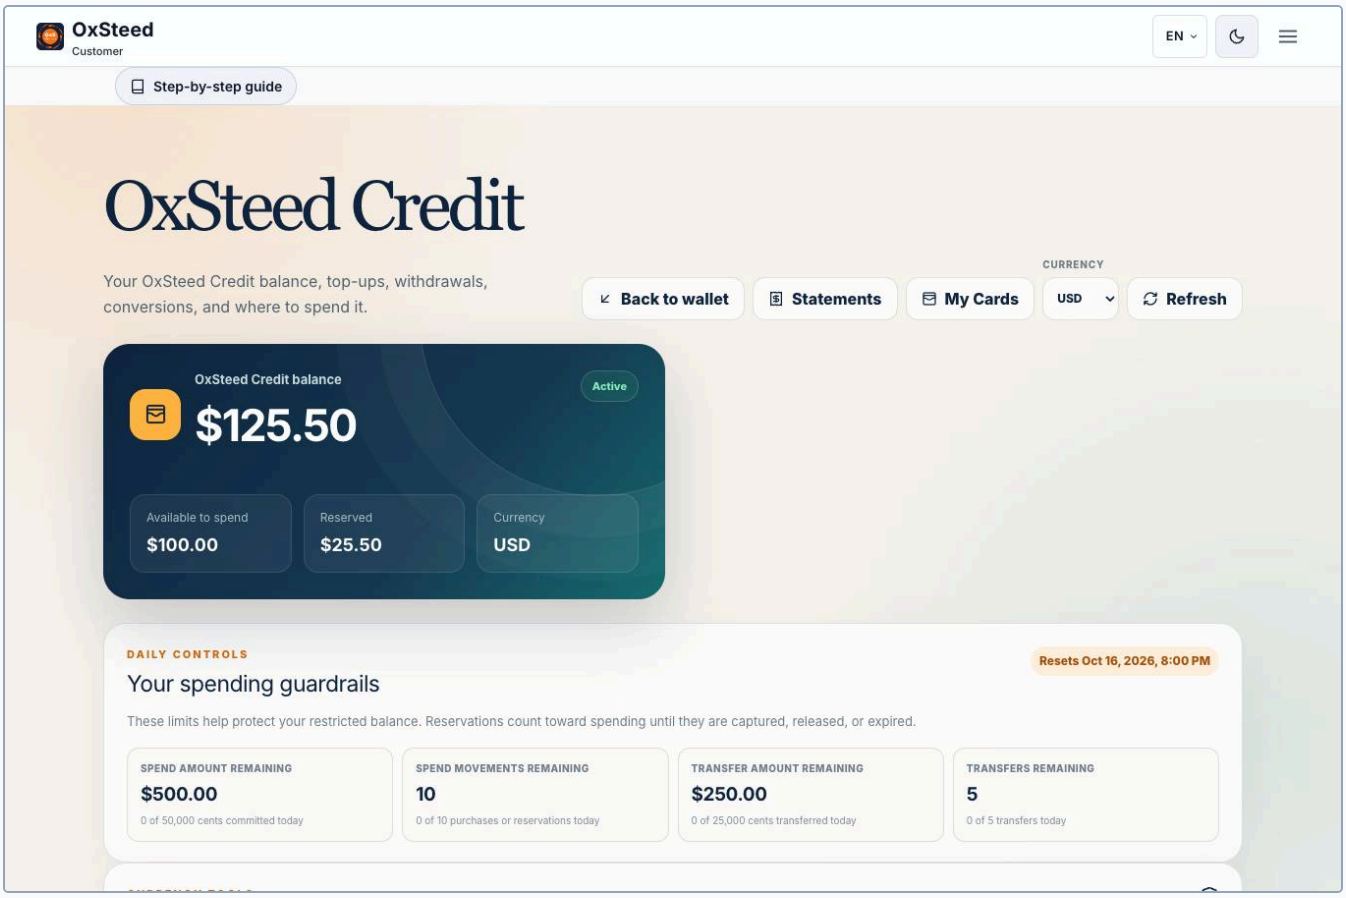

Figure 4. Converting credit, desktop view. *(Image description: Synthetic example: OxSteed Credit)*

Step 5: Authorize an in-store payment

In "Customer authorization" > "Authorize an in-store payment" ("Choose a participating restaurant and reserve the exact amount. The cashier can capture it once, and the hold expires automatically if it is not used."), pick the "Restaurant", "Order type", and amount, then choose "Create authorization". You see "Authorization created. Give the hold ID to the cashier." Use "Copy hold ID" and give it to the cashier; release it with "Release hold" if you will not use it.

> **Expected result:** The cashier captures the hold at the POS and the reserved amount returns if it expires unused.

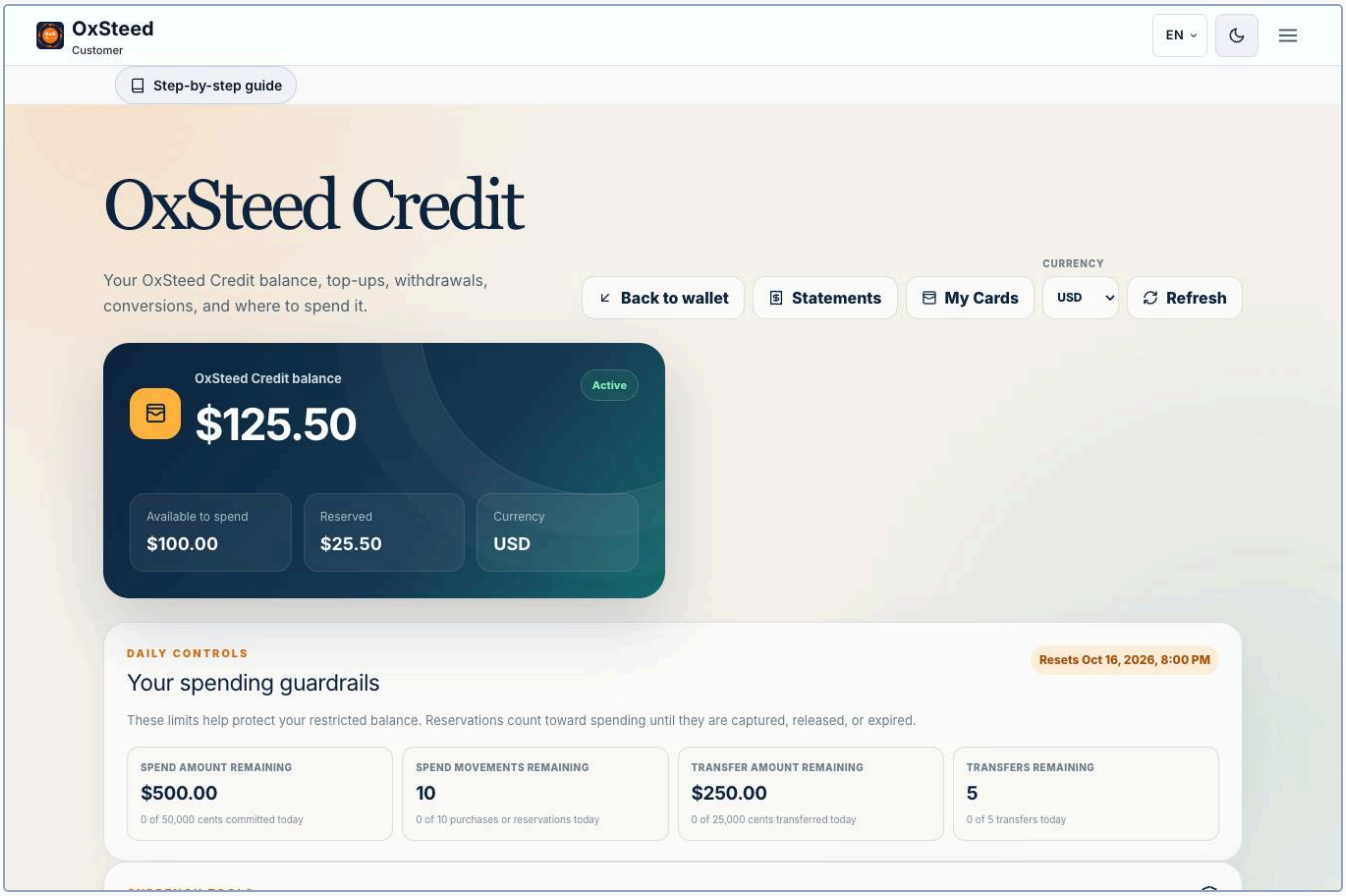

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: OxSteed Credit)*

Step 6: Move value with Restaurant credit

In "Restaurant credit" > "Convert restaurant credit" ("Move value between your OxSteed Credit and a restaurant food wallet. Conversions settle atomically in one currency; any rate difference is shown as an explicit fee."), choose the "Direction" ("OxSteed Credit to restaurant credit" or "Restaurant credit to OxSteed Credit"), the "Restaurant", and the amount.

> **Expected result:** The converted value lands in the target wallet.

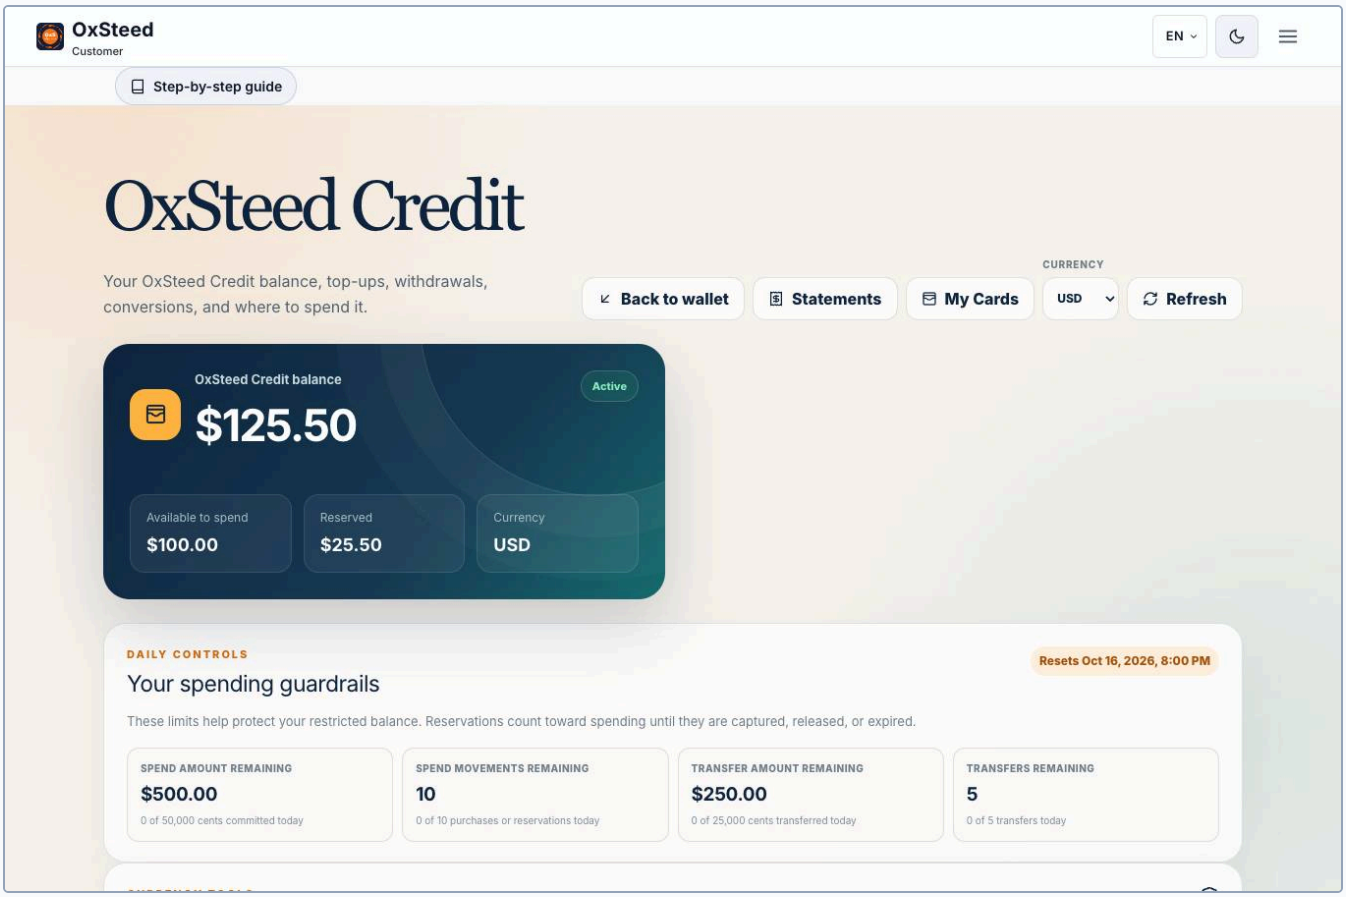

Figure 6. Moving value with Restaurant credit, desktop view. *(Image description: Synthetic example: OxSteed Credit)*

Step 7: Manage your cards

Open /oxsteed-credit/cards ("My Cards": "Issue a virtual card for instant use, or request a physical card. A card is a way to spend the same balance shown on your OxSteed Credit account - it never creates a second balance."). Choose "Issue a new card", pick "Virtual (use it right away)" or "Physical (ships to me)" (with "Shipping address"), then "Issue virtual card" or "Request physical card". On a card you can "Freeze"/"Unfreeze", "Set PIN" ("4-8 digit PIN"), "Report lost", "Report stolen", "Found this card", or "Request replacement".

> **Expected result:** The card lists under "Your cards" and is ready to spend with.

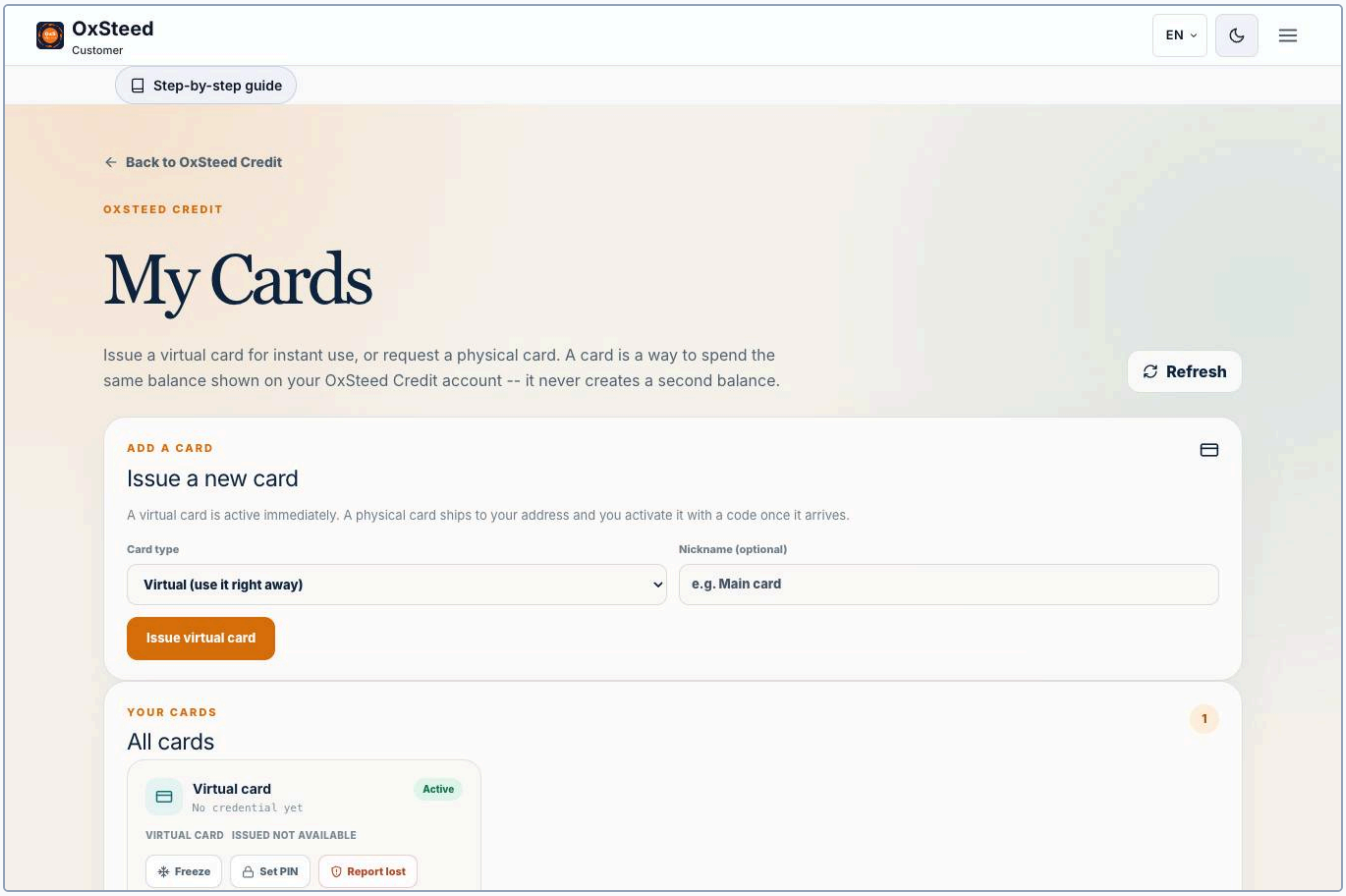

Figure 7. Managing cards, desktop view. *(Image description: Synthetic example: My Cards)*

Step 8: Review activity and report a problem

In "Recent activity", open any transaction with "View details" to reach the "Transaction receipt" (/oxsteed-credit/transactions/:transactionId) with "Posted", "Balance after", and "Print / save PDF". To dispute one, choose "Report a problem", pick a reason ("Incorrect amount", "I do not recognize this", "Duplicate transaction", "Restaurant or order issue", "Other"), describe what happened, and choose "Submit dispute" ("Your dispute was submitted for review."). Track disputes under "Your Credit disputes".

> **Expected result:** The transaction detail is clear and any dispute is recorded for review.

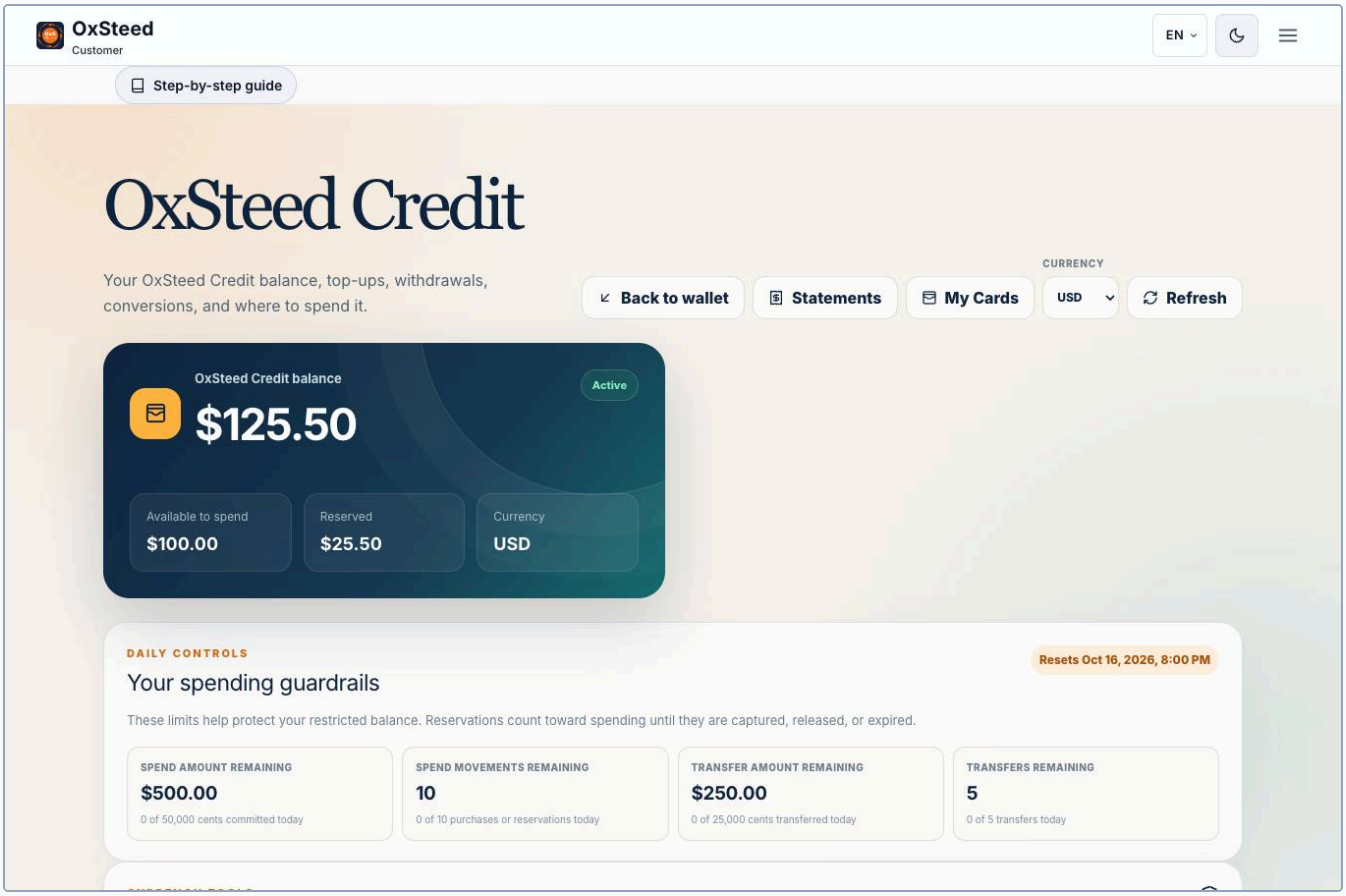

Figure 8. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: OxSteed Credit)*

Confirm it worked

The intended movement posts to your balance or cards, or the dispute is recorded, and the guardrails and activity reflect it.

If something goes wrong

Problem	What to do
You see "OxSteed Credit is temporarily paused".	The rail is off. Balances and history stay visible, but spending, top-ups, conversions, and withdrawals stay paused until the platform re-enables the flag.
A top-up says "Still processing".	Your wallet updates when the payment confirms. Do not submit the same top-up again right away; the flow is safe to retry only after the pending one resolves.
Conversion says "The quote is expired, unavailable, or does not match this currency and amount."	Get a fresh quote ID and re-enter the exact source amount and currency.
The withdrawal verification code does not arrive.	You see "Verification code sent. Check your email." Check spam, wait a minute, and request a new code.

Need help?

For OxSteed Credit issues, use the in-app support page at /support.

Guide ID: financial-qr-payments | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Get paid by QR and pay by QR

Guide ID	**financial-qr-payments**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Helper, Business owner, Customer
Availability	**Supported**
Online version	/how-it-works/financial/financial-qr-payments

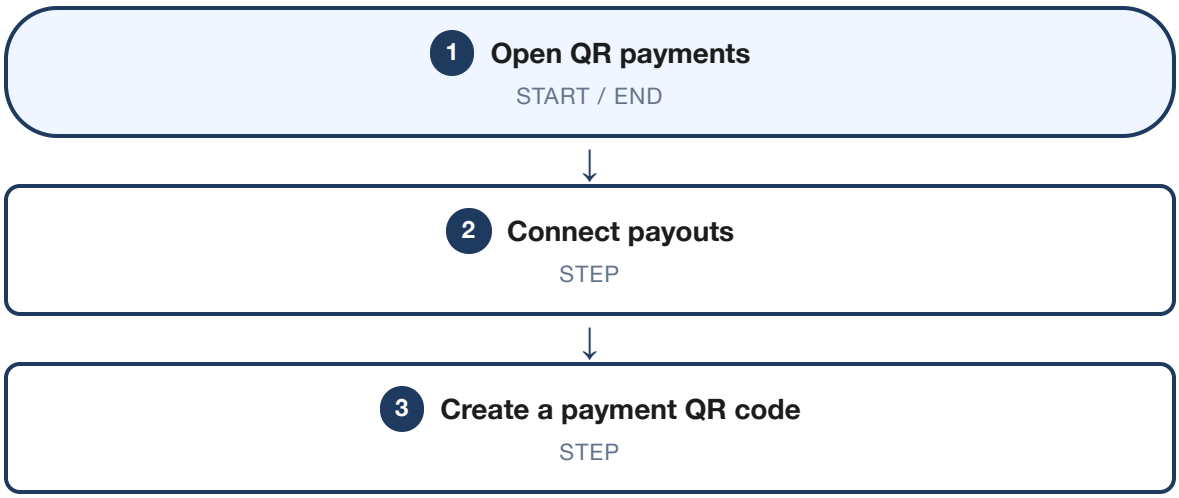

Goal

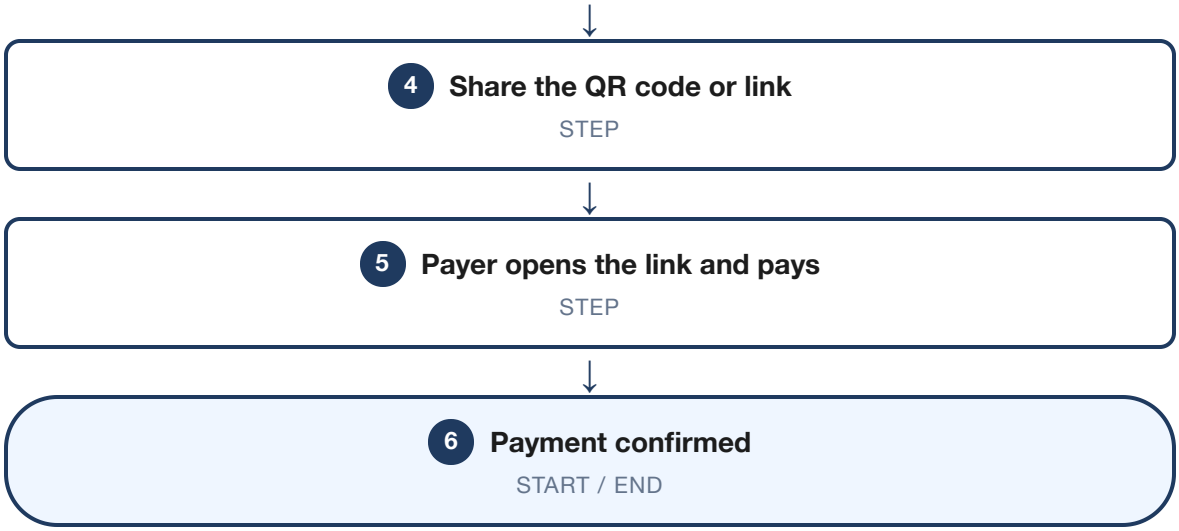

Create reusable QR payment codes as a helper or business, and pay someone by scanning or opening their QR link.

Before you start

1. Sign in to create or manage payment QR codes.
2. Payers need no OxSteed account: "Secure payment powered by Stripe. You do not need an account."

Process map

Text version. Open /qr-payments ("Get paid with QR codes": "Create QR codes your customers can scan to pay you directly. No app needed on their side."). First connect payouts with "Connect payouts". Then create a code under "Create a payment QR code" with a "Label" and either "Customer enters amount" or "Fixed amount". Manage codes under "Your payment QR codes" (Copy link, Download, Print, Activate/Deactivate, Delete). The payer opens /pay/:code, enters the amount if needed, and pays through the secure checkout step.

Steps

Step 1: Open QR payments and connect payouts

Open /qr-payments. If payouts are not connected, you see "Connect payouts first" ("To receive QR payments, connect your bank account with our secure payment partner. It takes a few minutes."). Choose "Connect payouts" and finish the partner setup. If the setup is incomplete you see "Finish Stripe setup" with "Continue in Stripe".

> **Expected result:** The create form and your code list unlock once payouts are connected.

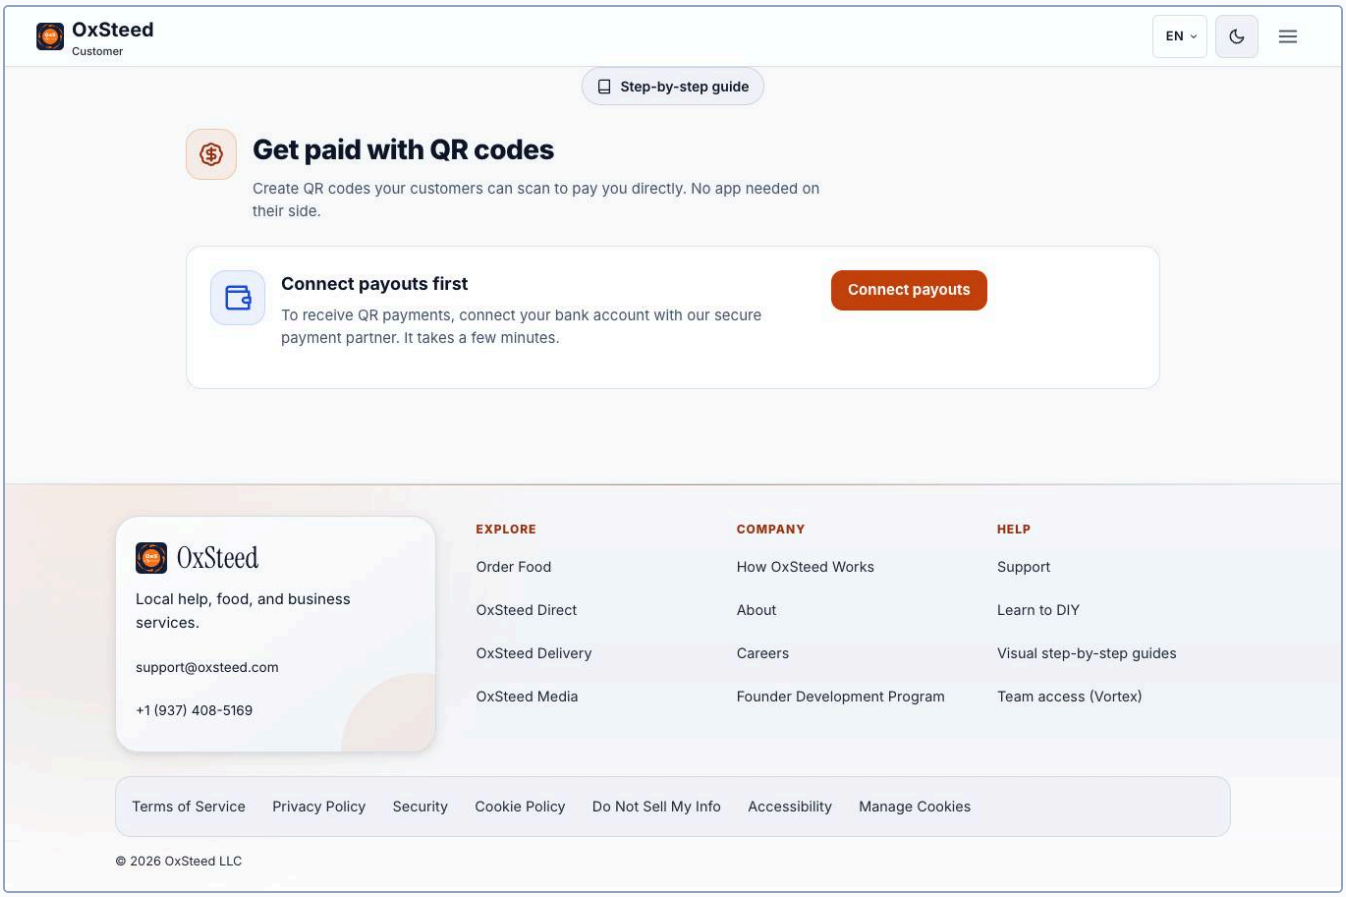

Figure 1. Connecting payouts, desktop view. *(Image description: Synthetic example: Get paid with QR codes)*

Step 2: Create a payment QR code

Under "Create a payment QR code", enter a "Label" ("e.g. Lawn mowing, Bakery pickup"). Under "Amount", pick "Customer enters amount" ("The customer chooses how much to pay when they scan.") or "Fixed amount" ("Every scan pays the same amount.") and enter the "Amount (USD)". Choose "Create QR code".

> **Expected result:** The new code appears under "Your payment QR codes" with its pay link.

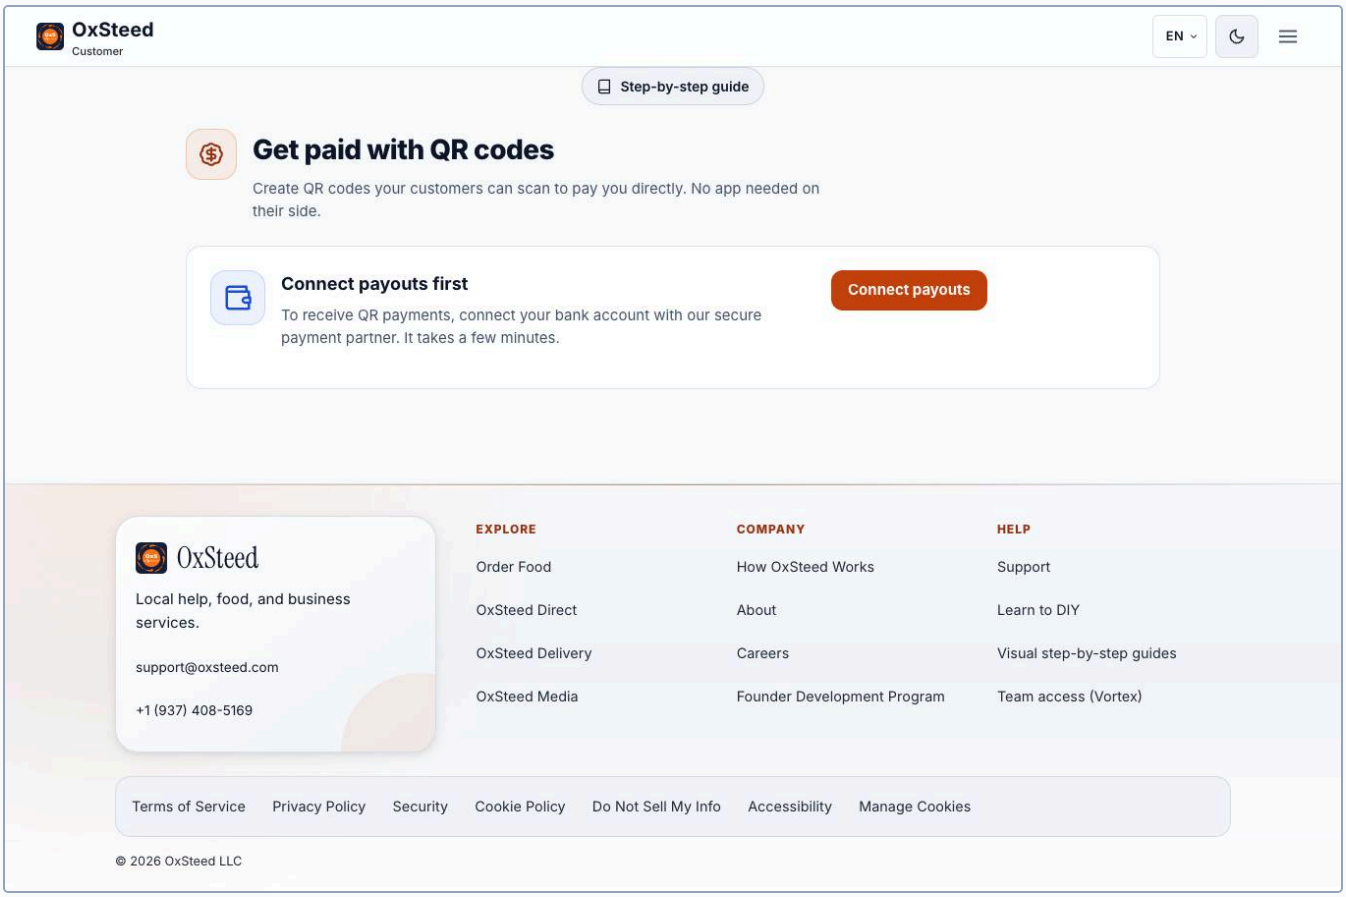

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Get paid with QR codes)*

Step 3: Manage and share your codes

Under "Your payment QR codes", each card shows the label, the "Active"/"Inactive" badge, the amount ("Open amount" for flexible codes), the total received, and the payment count. Use "Copy link" to share the pay URL, "Download" or "Print" for the QR image, the "Activate"/"Deactivate" toggle to control availability, and "Delete" to remove a code.

> **Expected result:** The code is shared or printed and ready to scan.

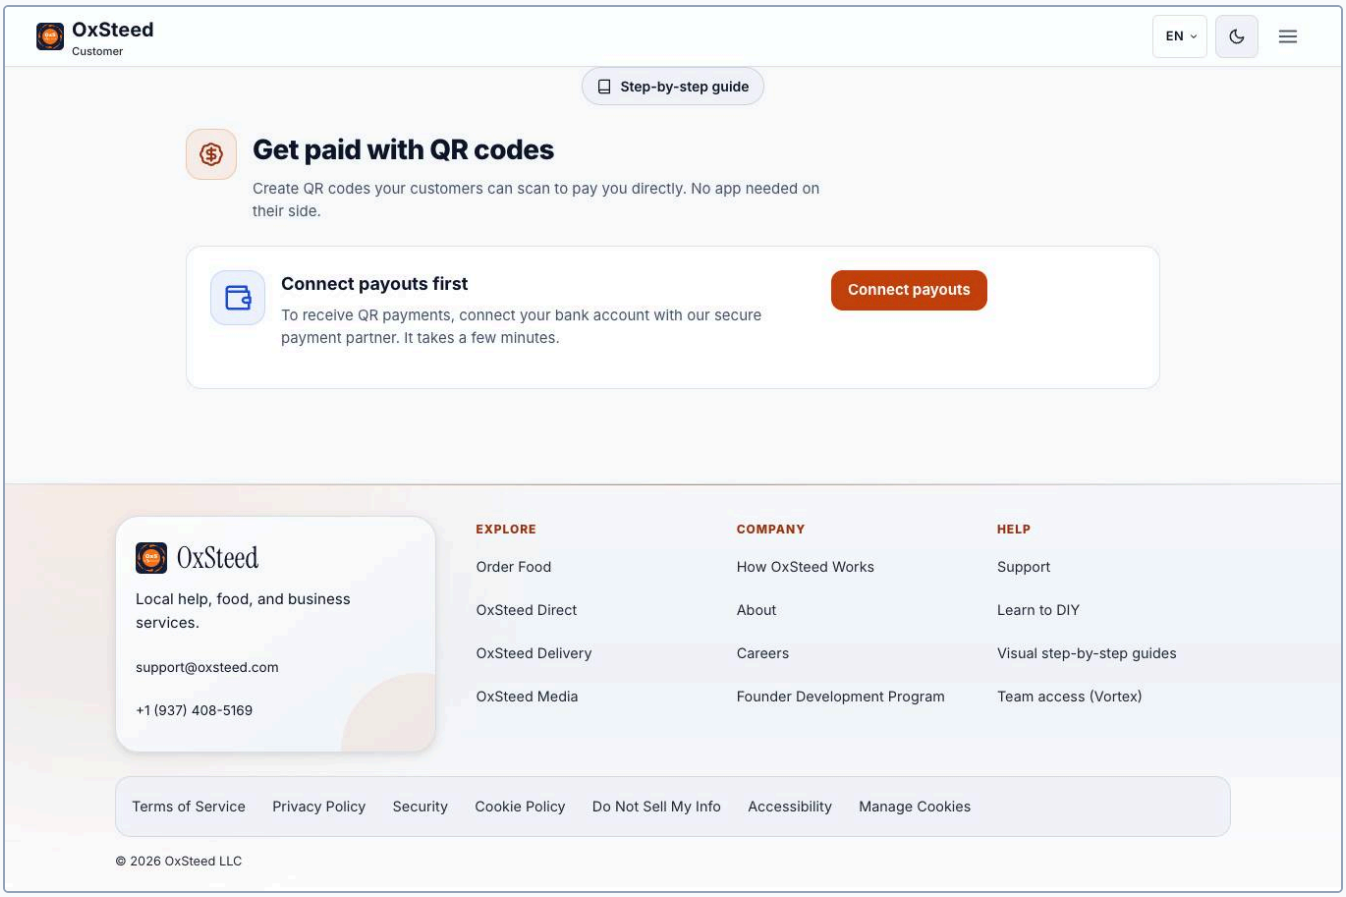

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Get paid with QR codes)*

Step 4: Pay through a QR link as a payer

Open the pay link (/pay/:code) or scan the QR. You see "Pay" plus the recipient name and either "Amount to pay" (fixed) or "Amount (USD)" ("Enter amount") for flexible codes. Optionally enter the "Email for receipt (optional)" ("you@example.com"). Choose the "Pay" button ("Pay X") to continue to the secure checkout step. If the recipient accepts credit, you may also see "Pay with OxSteed Credit".

> **Expected result:** You move to the secure checkout step; OxSteed returns you when the payment completes.

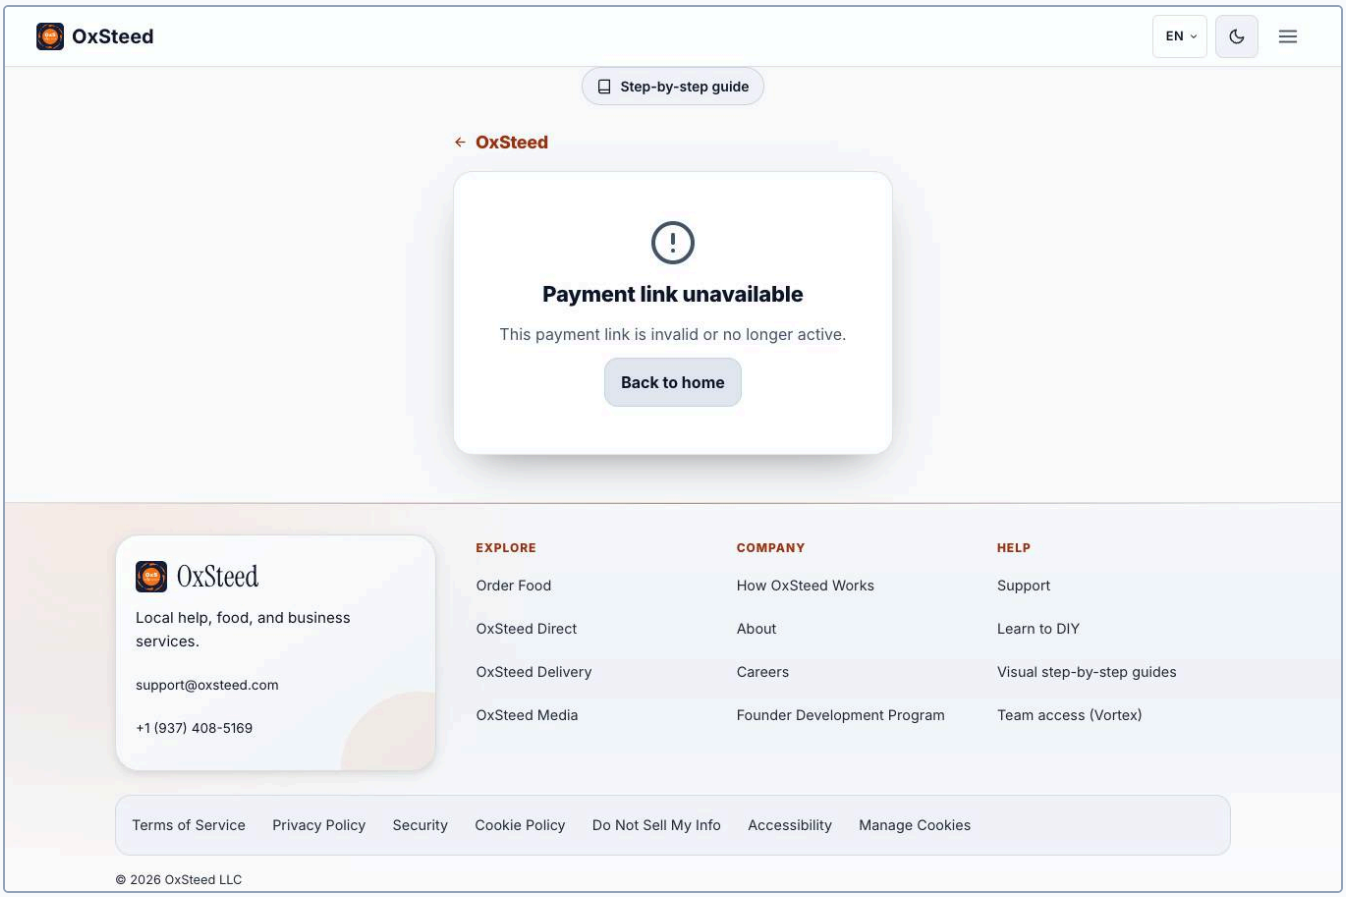

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Payer form with amount and pay button)*

Step 5: Confirm the payment succeeded

After the payment completes you see "Payment successful" with the amount and recipient, and "Back to home". If the link expired, you see "Payment link unavailable" with "Try again" on the current link.

Expected result: The recipient sees the payment in their code stats and the payer has confirmation.

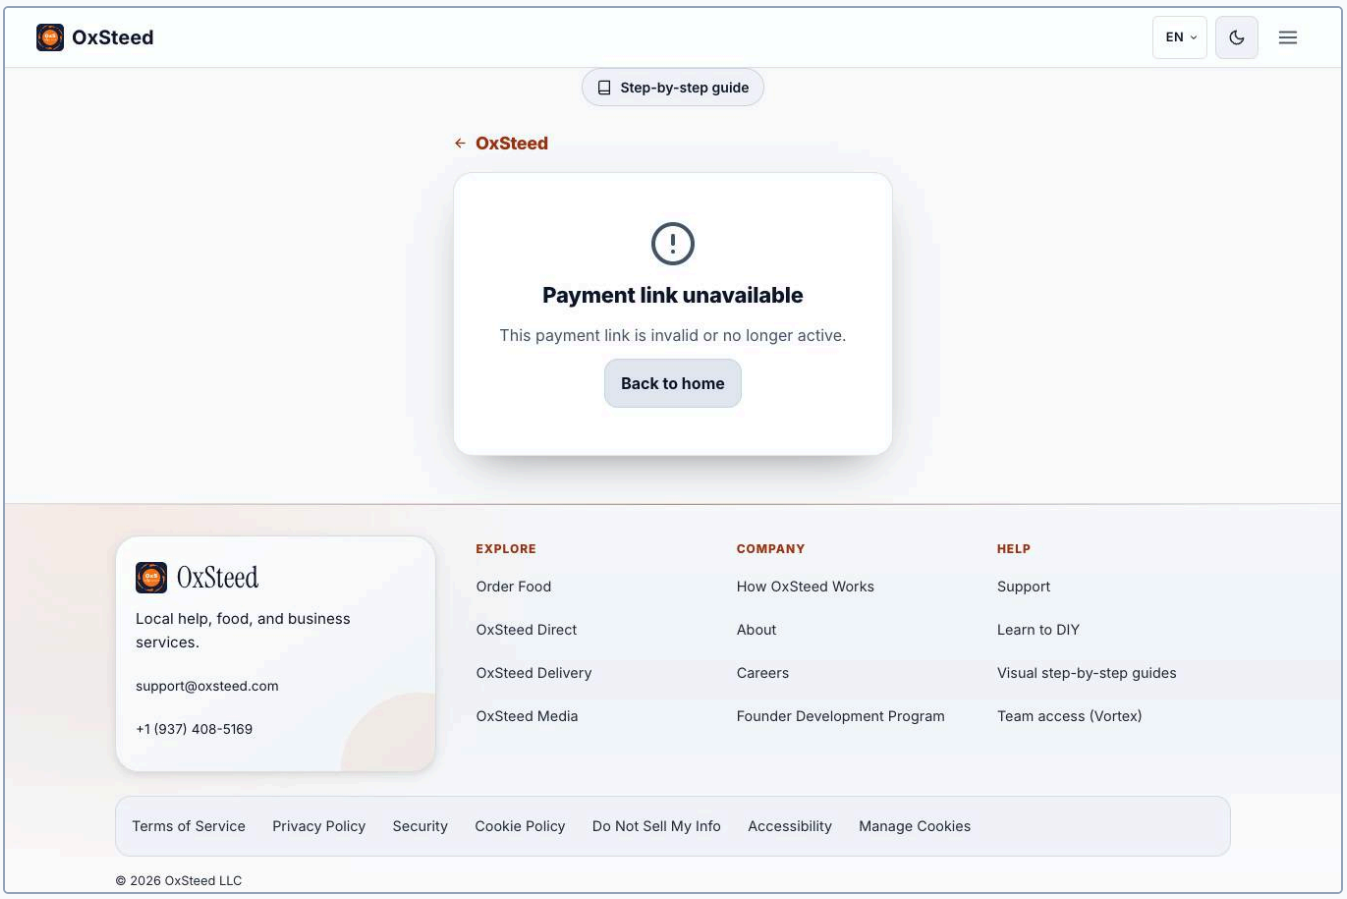

Figure 5. Payment confirmed, desktop view. *(Image description: Payment successful screen)*

Confirm it worked

The code exists under "Your payment QR codes", and payments show "Payment successful" with updated received totals on the card.

If something goes wrong

Problem	What to do

You see "Could not load your QR codes."	Choose "Retry" to reload the list.
A payer sees "Payment link unavailable".	The code was deactivated or deleted. Reactivate it with the "Activate" toggle, or share a new link with "Copy link".
The checkout step does not finish.	Return to /pay/:code and try again. OxSteed only counts the payment once the checkout step completes.

Need help?

For QR payment issues, use the in-app support page at /support.

Guide ID: financial-receipts | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS **ENGLISH**

View receipts

Guide ID	**financial-receipts**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/financial/financial-receipts

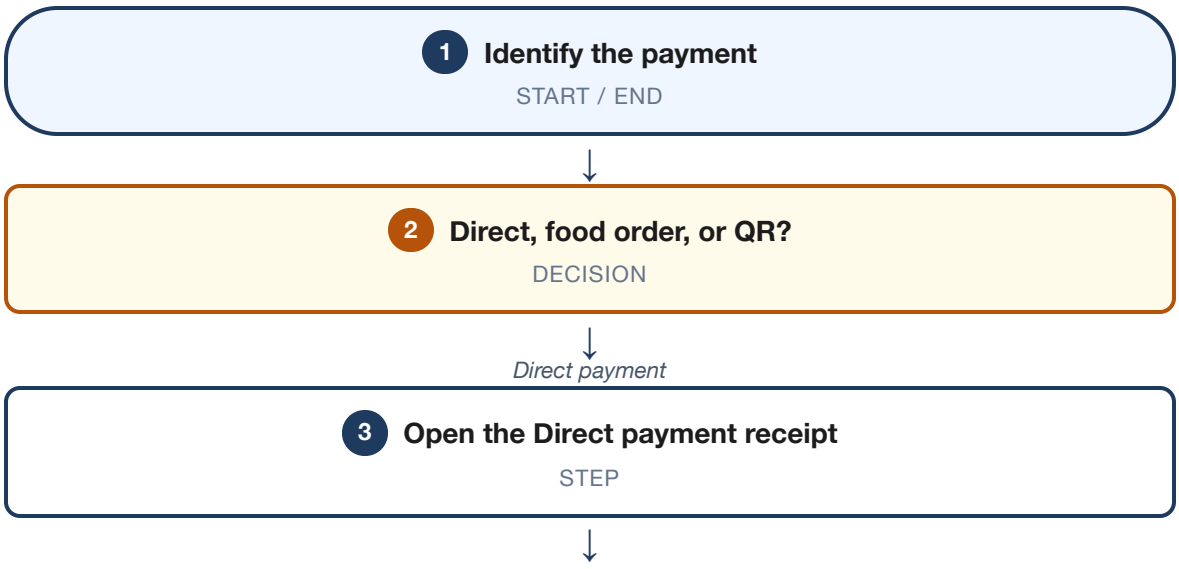

Goal

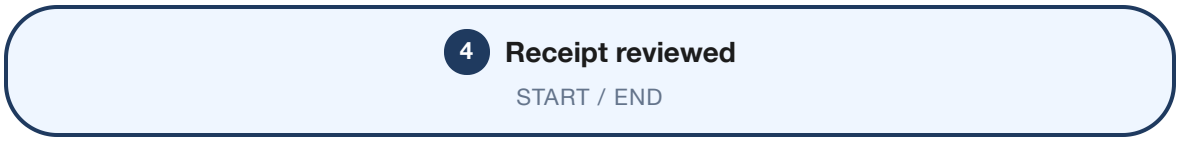

Find the receipt for any payment: a Direct payment, a food order, or a QR payment.

Before you start

1. Sign in to your OxSteed account for order and payment receipts.

Process map

- *Food order:* Direct, food order, or QR? → Open the food order detail
- *QR payment:* Direct, food order, or QR? → Check the QR payment confirmation
- Open the food order detail → Receipt reviewed
- Check the QR payment confirmation → Receipt reviewed

Text version. OxSteed renders receipts in context rather than in a standalone receipts hub. For Direct payments, open /direct/payments/:id ("Receipt confirmation") and use "Confirm receipt". For food orders, open /food/orders/:orderId or /orders/:id, where the order detail shows items, the order summary, and payment details. For QR payments, the "Payment successful" screen is the receipt.

Steps

Step 1: Open a Direct payment receipt

Open /direct/payments/:id. The page shows "Receipt confirmation" ("Confirm that the proof has been received and tied to history."). Review the payment record, then choose "Confirm receipt" ("Receipt confirmed.").

> **Expected result:** The receipt is confirmed and tied to the payment history.

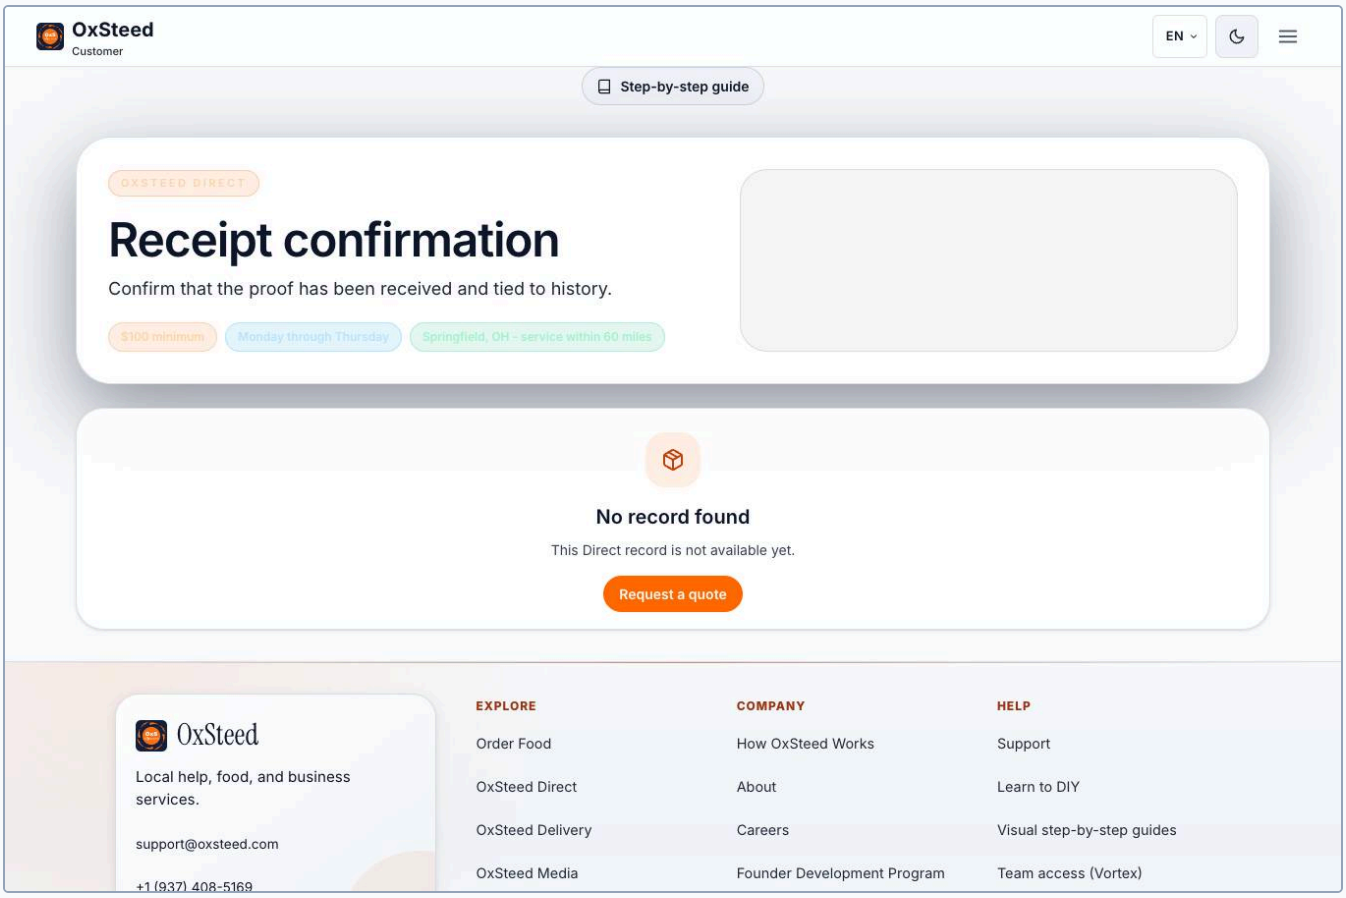

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Receipt confirmation)*

Step 2: Review a food order as a receipt

Open the order from /orders or /food/orders/:orderId. The order detail is the receipt: the "Order summary" card shows "Subtotal", "Tax", "Shipping", "Discount", and "Total", and the "Payment details" card shows the "Payment method", payment "Status", and "Transaction ID". Items list each price and quantity ("Your order").

> **Expected result:** You can read every line item, the totals, and the payment record.

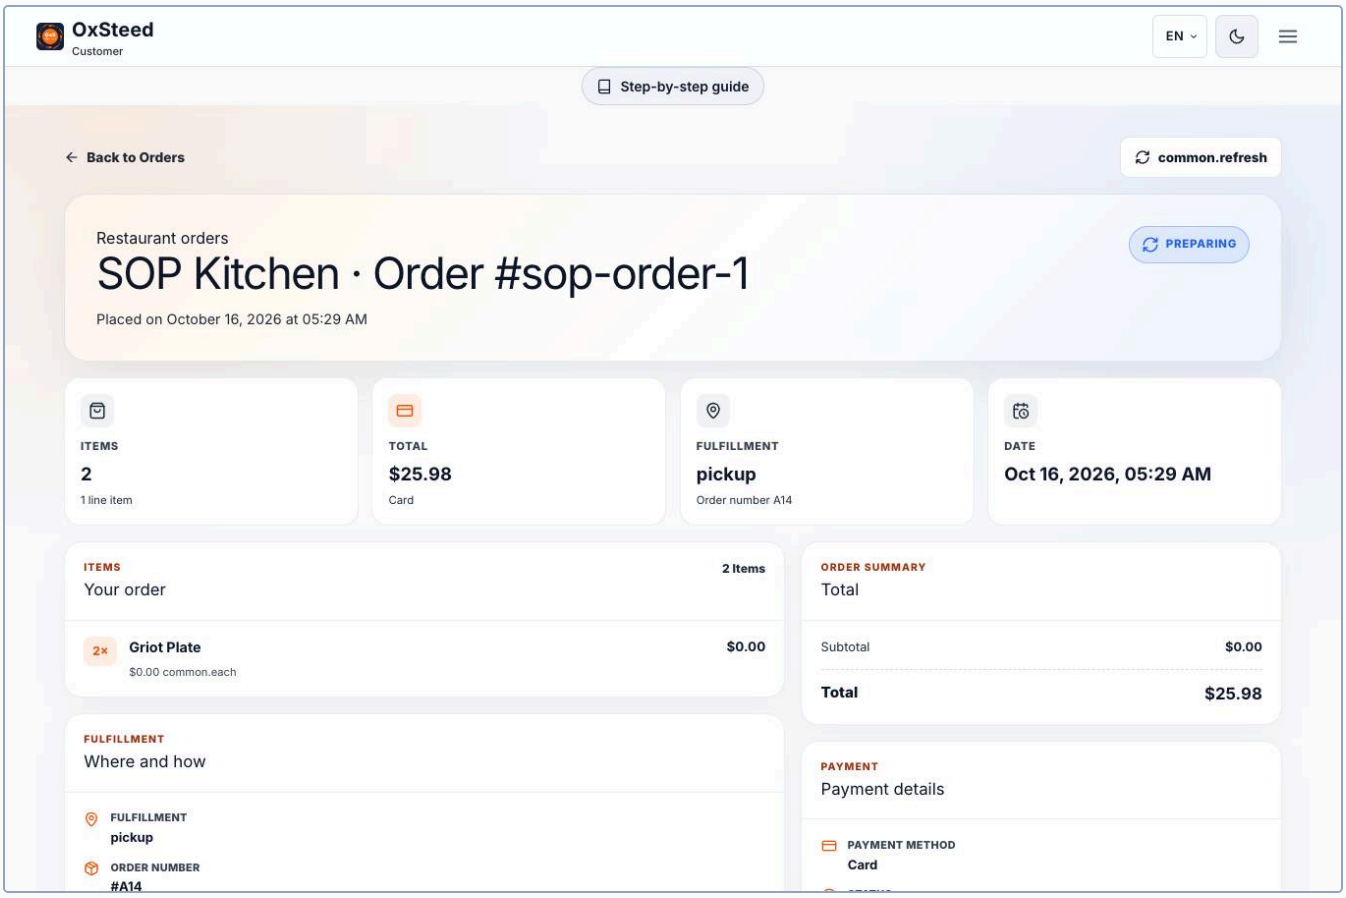

Figure 2. A food order receipt, desktop view. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Step 3: Print a food order receipt

On the order tracking page (/food/track/:token), choose "Print Receipt" for the paper record of the order ("Order", "Status", "Items", "Total").

> **Expected result:** The browser print dialog opens with the order receipt.

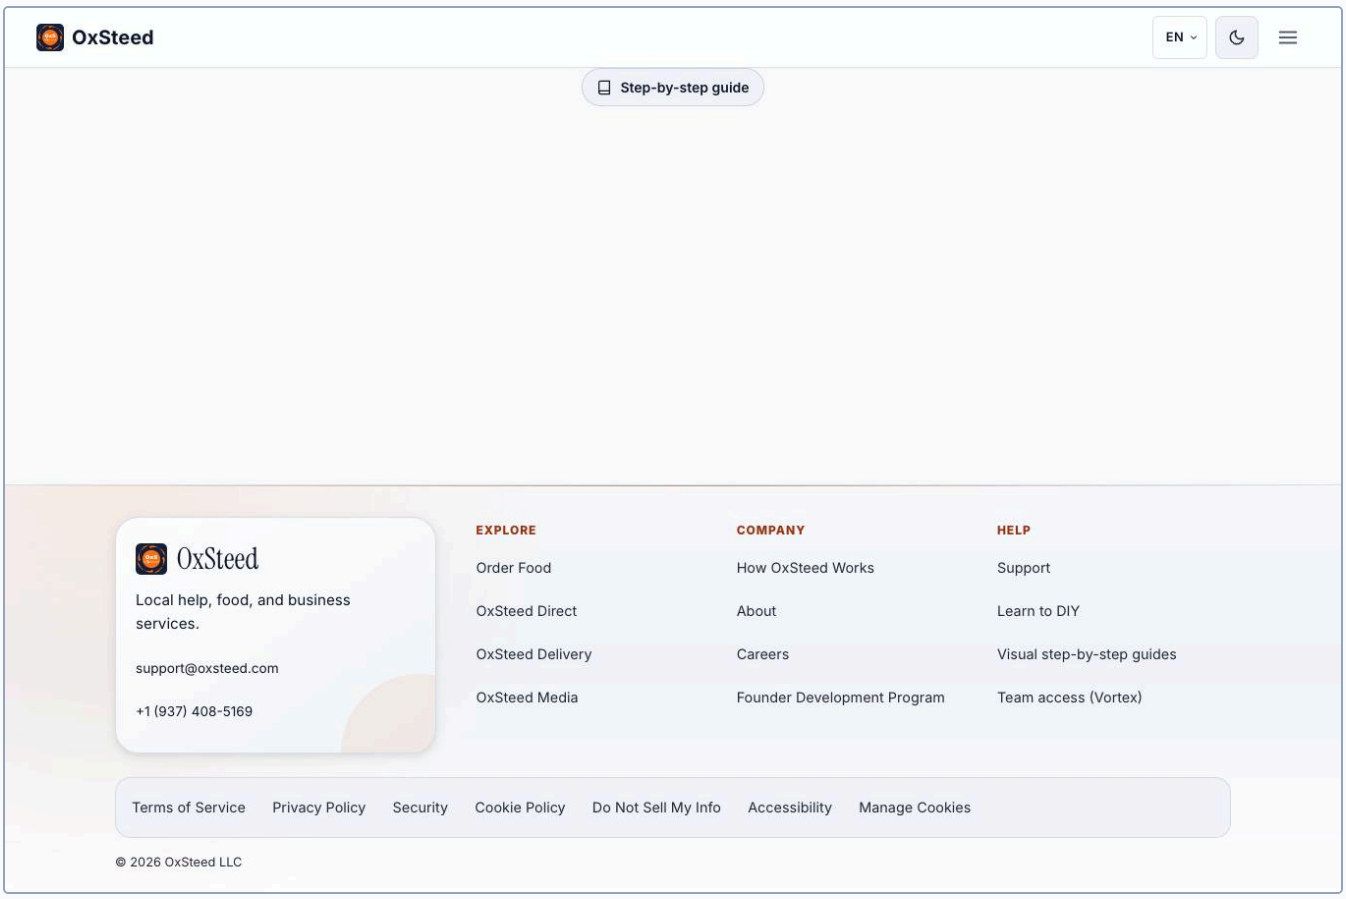

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Track page with the Print Receipt button)*

Step 4: Keep the QR payment confirmation

After paying at /pay/:code, the "Payment successful" screen shows the amount and recipient and is your receipt. The optional "Email for receipt (optional)" field ("you@example.com") sends a copy to your email if you filled it in before paying.

> **Expected result:** You have a record of the payment on screen and, if you entered it, in your email.

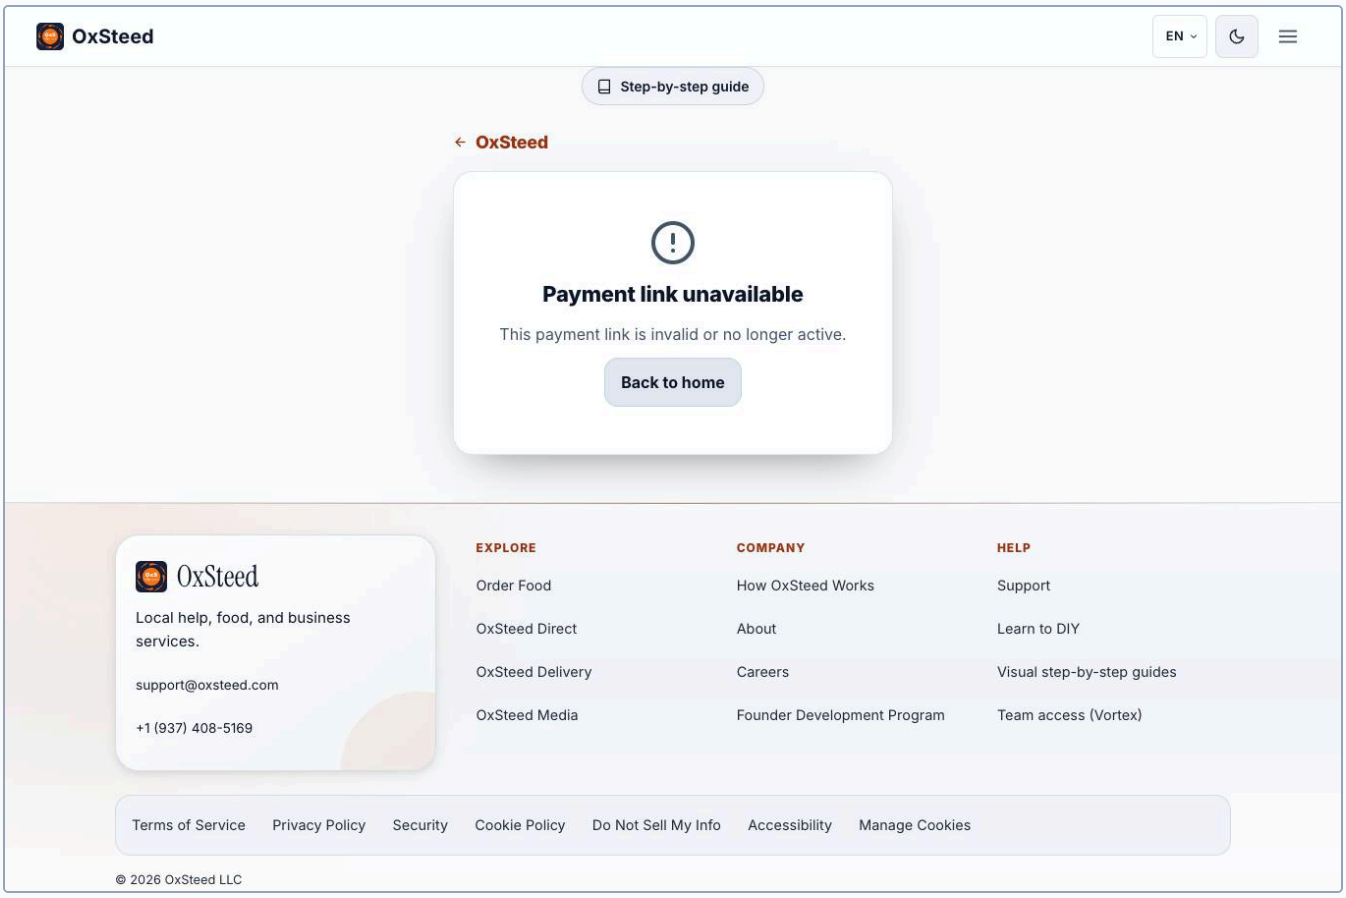

Figure 4. A QR payment receipt, desktop view. *(Image description: QR payment success screen)*

Confirm it worked

You can find the receipt for the payment and read the items, totals, and payment method.

If something goes wrong

Problem	What to do

You cannot find an old receipt.	Open /orders for order history or /direct/history for "All of your Direct quote requests, jobs, and receipts in one place." Then open the record to see its receipt view.
The order shows "Payment failed" or no payment details.	The payment never completed. Use "Order again" on the order detail to place it again with a working payment method.

Need help?

For receipt issues, use the in-app support page at /support.

Guide ID: financial-restaurant-credit | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Use Restaurant Credit (per-restaurant wallets)

Guide ID	**financial-restaurant-credit**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/financial/financial-restaurant-credit

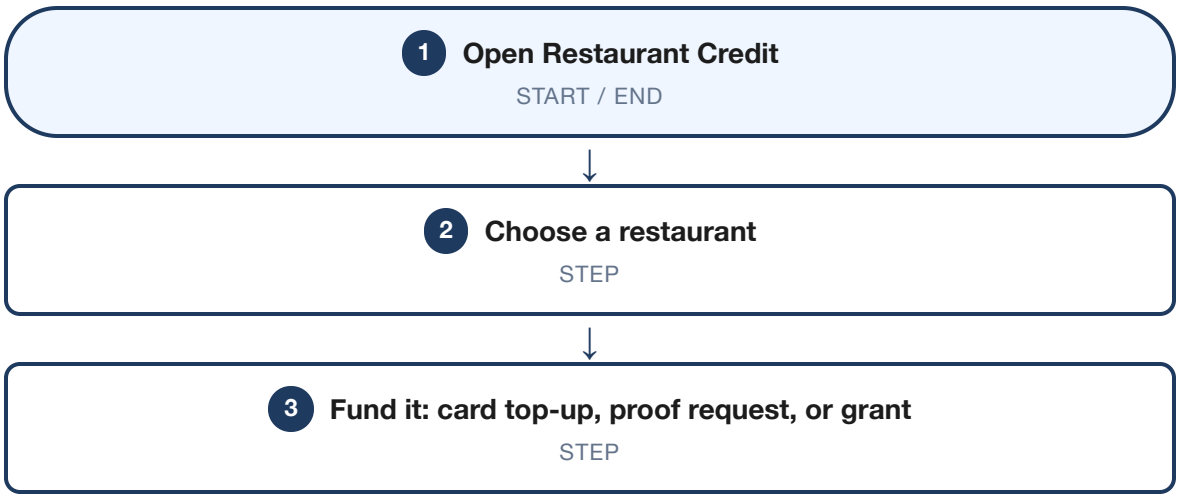

Goal

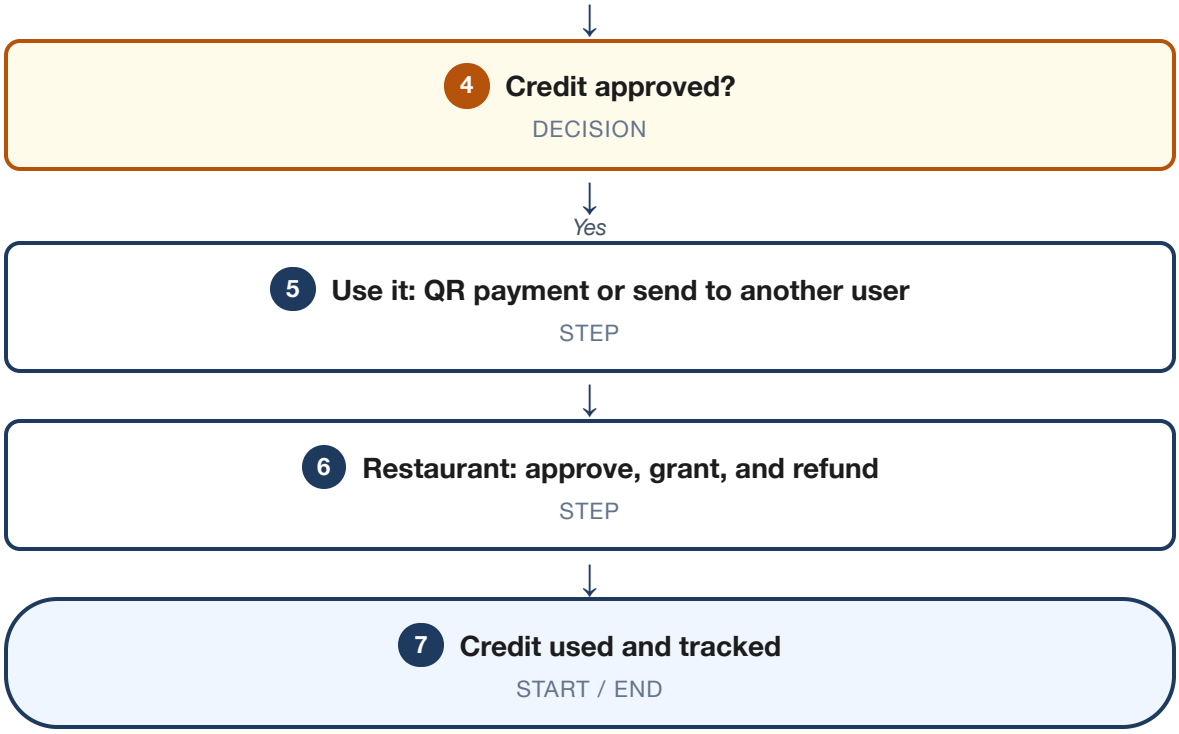

Use per-restaurant credit balances: top up by card, request credit with proof, pay by QR, and send credit, as a customer or a restaurant.

Before you start

1. Sign in to your OxSteed account.
2. Understand the separation: Restaurant Credit is per-restaurant. OxSteed Credit is the platform wallet. They are different systems.

Process map

- *No, correct and retry:* Credit approved? → Fund it: card top-up, proof request, or grant

Text version. Open /restaurant-credit ("Restaurant Credit": "Manage restaurant-scoped credit, payments, transfers, and requests."). Choose a restaurant; each balance belongs to one restaurant and cannot be spent elsewhere. Fund it three ways: "Add money" tops up by card, "Add credit" sends payment proof for approval, or the restaurant grants it directly. Once funded, use "Use credit" to pay by one-time QR, or "More credit options" to "Send credit to another OxSteed user". Restaurants approve requests and grant or refund credit from the "Restaurant credit" manager.

Steps

Step 1: Open Restaurant Credit and choose a restaurant

Open /restaurant-credit. The page notes the scope: "Restaurant-scoped wallet" and "Each balance belongs to one restaurant. It cannot be spent or transferred at another restaurant." Choose the restaurant to see "Available to spend" and the "Restaurant credit actions".

> **Expected result:** You see the wallet for one restaurant with its balance and actions.

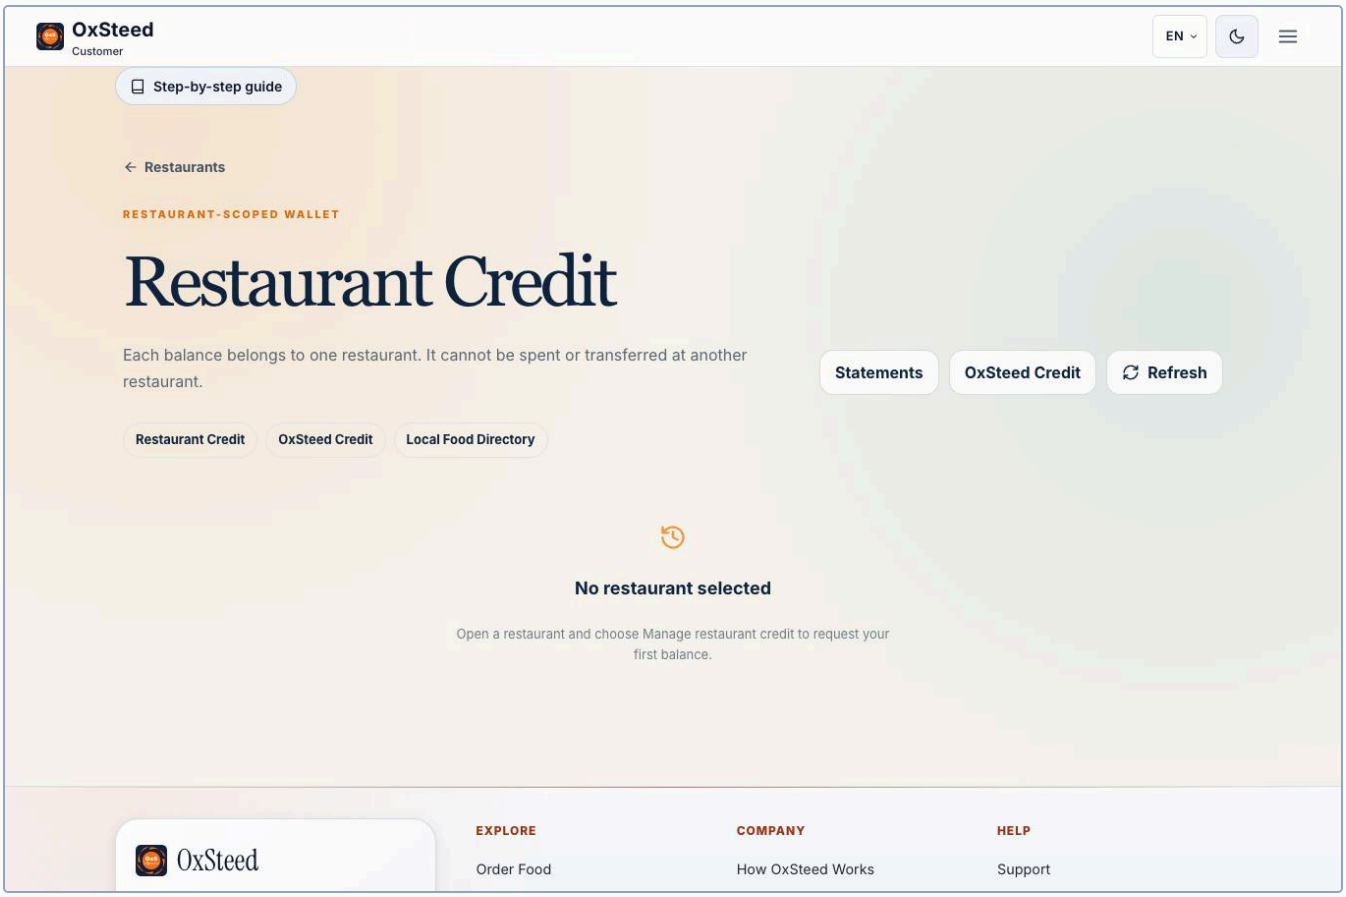

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 2: Top up by card

Choose "Add money" ("Top up with a card"). In the "Add money" dialog, enter the "Amount" within the shown range ("Between X and Y per top-up."; typically $5 to $500 per top-up with a $1,000 per day per restaurant cap). Choose "Continue", complete the card payment step, and for larger top-ups enter the emailed "Verification code" and choose "Verify and continue". You see "Top-up complete. Your wallet has been updated."

> **Expected result:** The wallet balance increases by the topped-up amount.

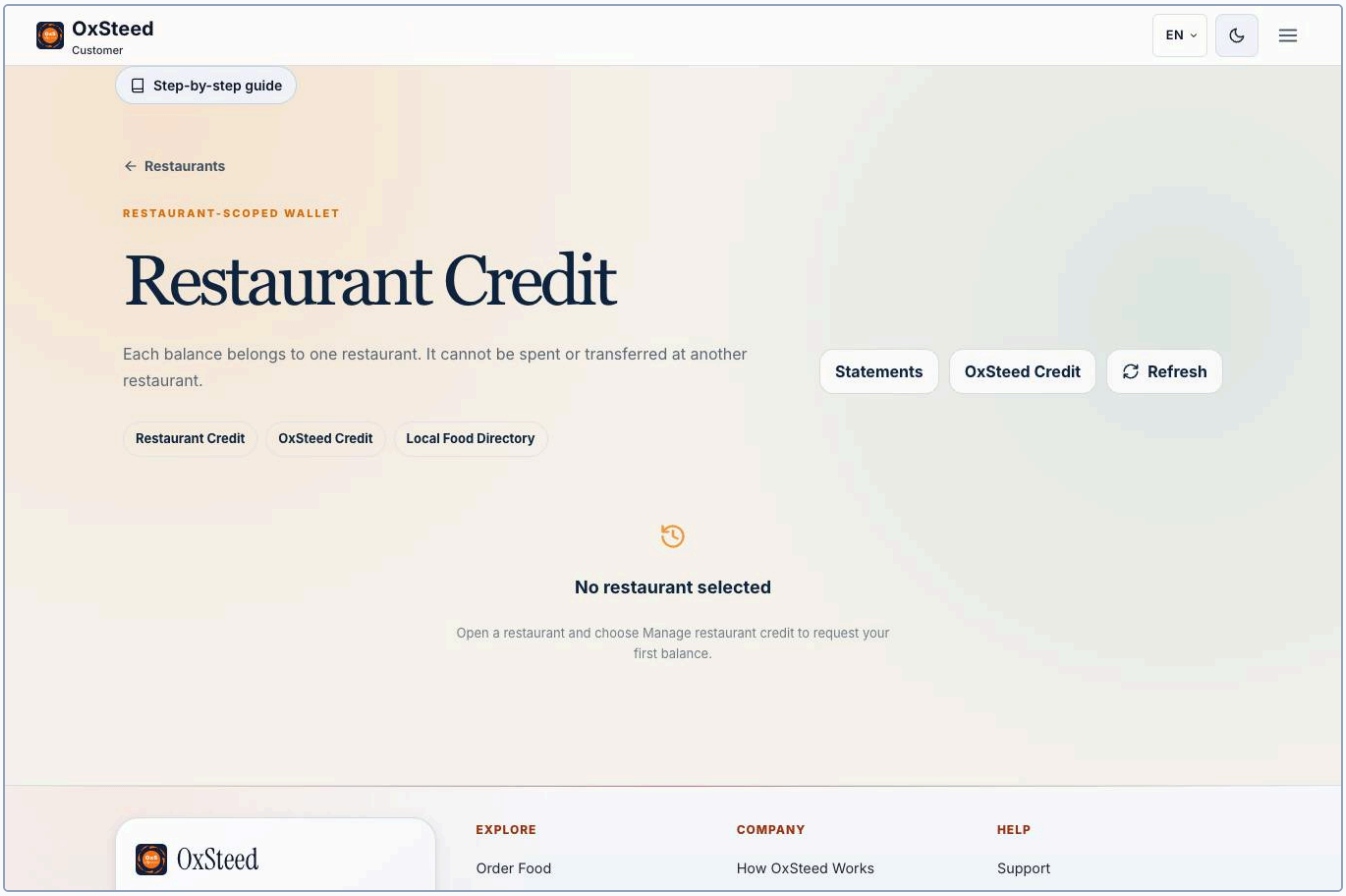

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 3: Request credit with payment proof

Choose "Add credit" ("Send payment proof for approval"). In "Add restaurant credit" ("Send proof of your payment. The restaurant will add the credit after verifying it."), enter the "Amount you paid", choose "Upload receipt" ("Choose screenshot, receipt, or PDF") or "Enter confirmation" ("Confirmation number or sender name"), add a note if helpful, and choose "Send for approval". Track it under "Add credit requests"; you can "Cancel" a pending request.

> **Expected result:** You see "Credit request sent to the restaurant."

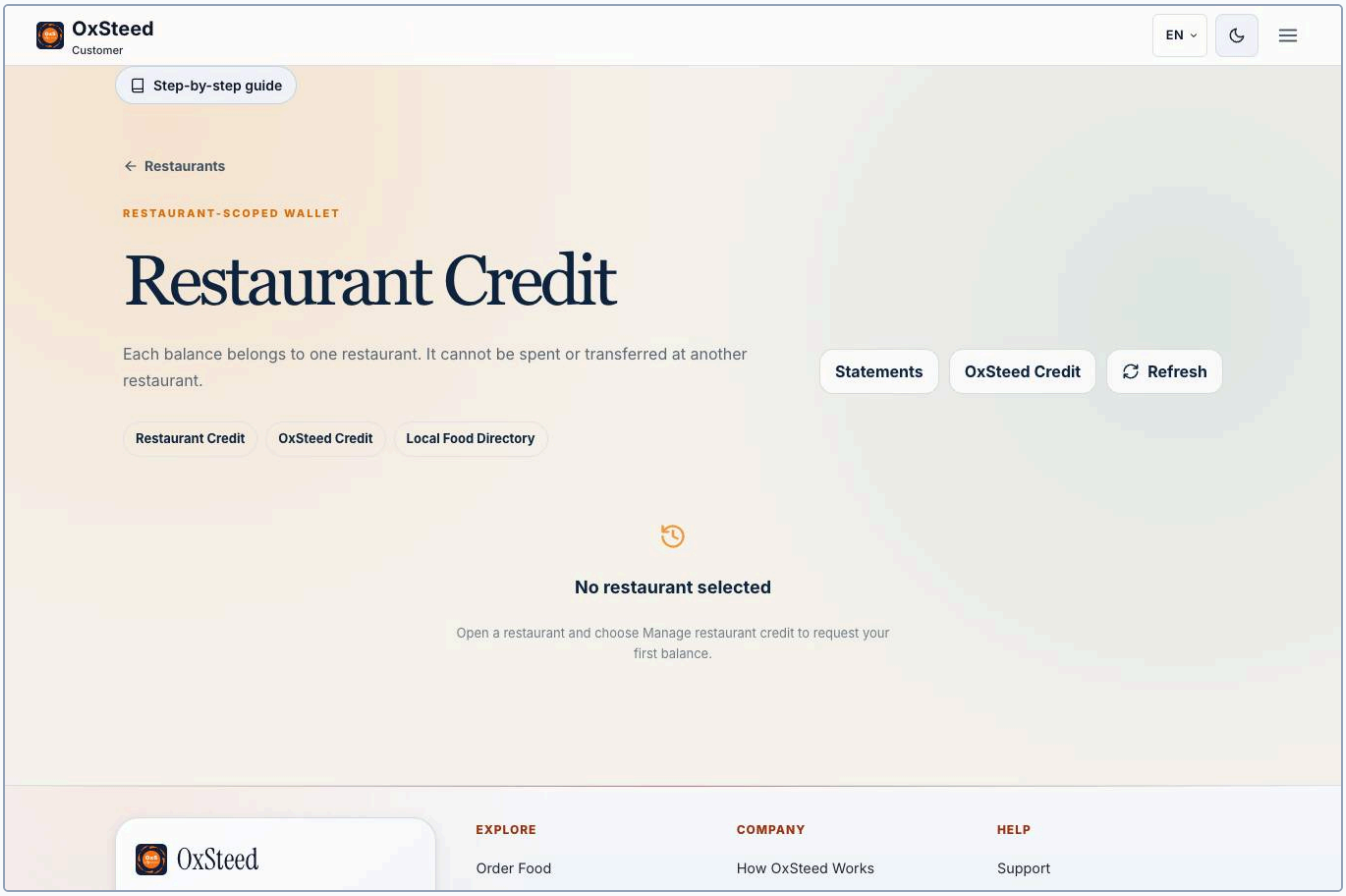

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 4: Pay with a one-time QR

Choose "Use credit" ("Create a one-time payment QR"). Enter the "Amount" (within "Available: X") and choose "Create payment QR". In "Pay with restaurant credit" ("Show this one-time QR to the restaurant. The reserved amount cannot be spent twice."), show the QR to the staff. Use "Cancel and release credit" if the payment does not go through.

> **Expected result:** The restaurant scans the QR, the hold is captured, and the balance drops by the amount.

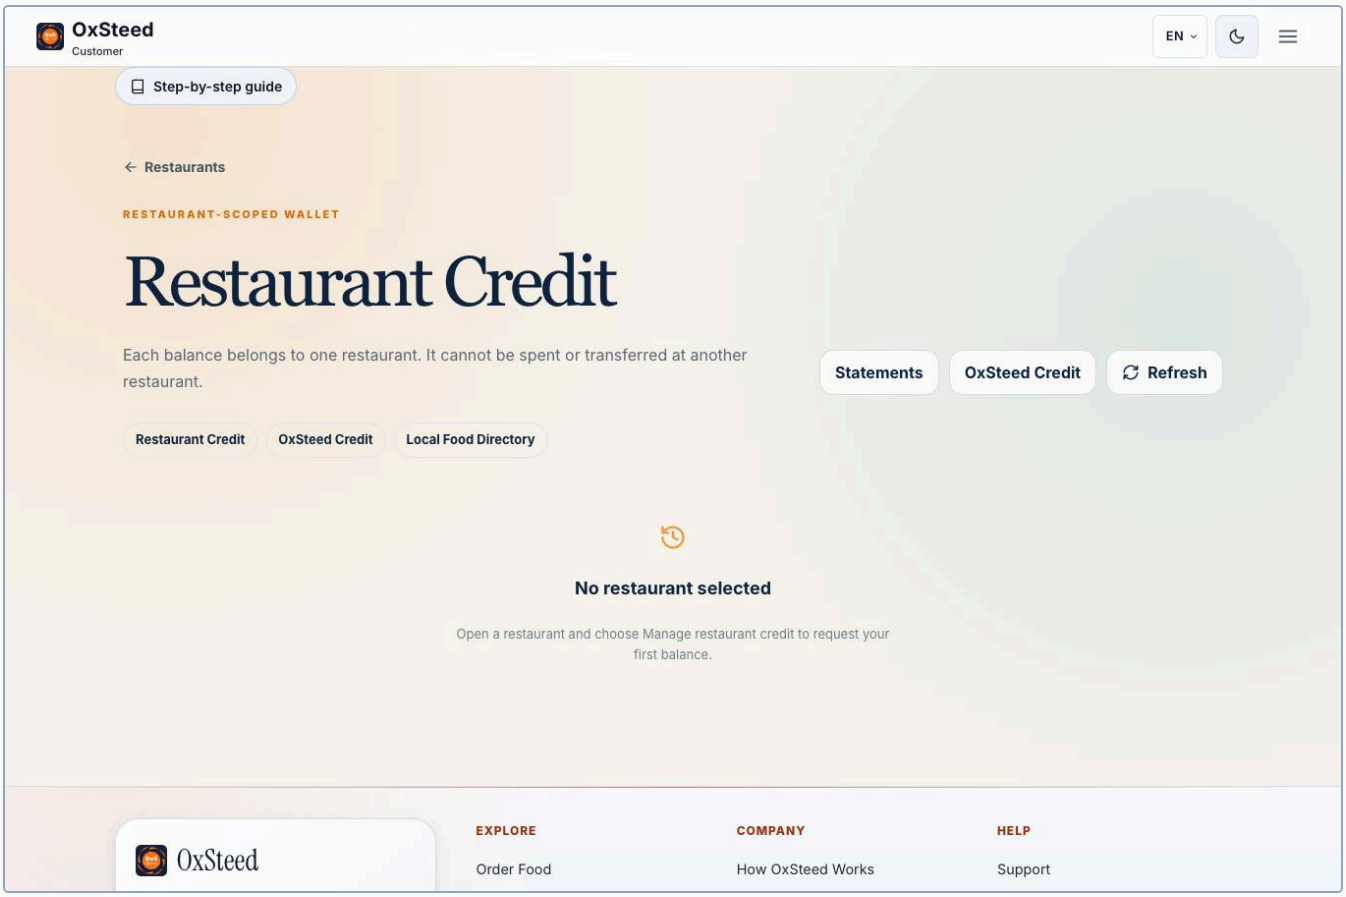

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 5: Send credit to another OxSteed user

Choose "More credit options" then "Send credit to another OxSteed user" ("The recipient can only spend this credit at this restaurant."). Enter the "Recipient's OxSteed email", the amount, and an optional "Memo", then choose "Send credit". You see "Restaurant credit sent."

> **Expected result:** The recipient receives the credit at the same restaurant.

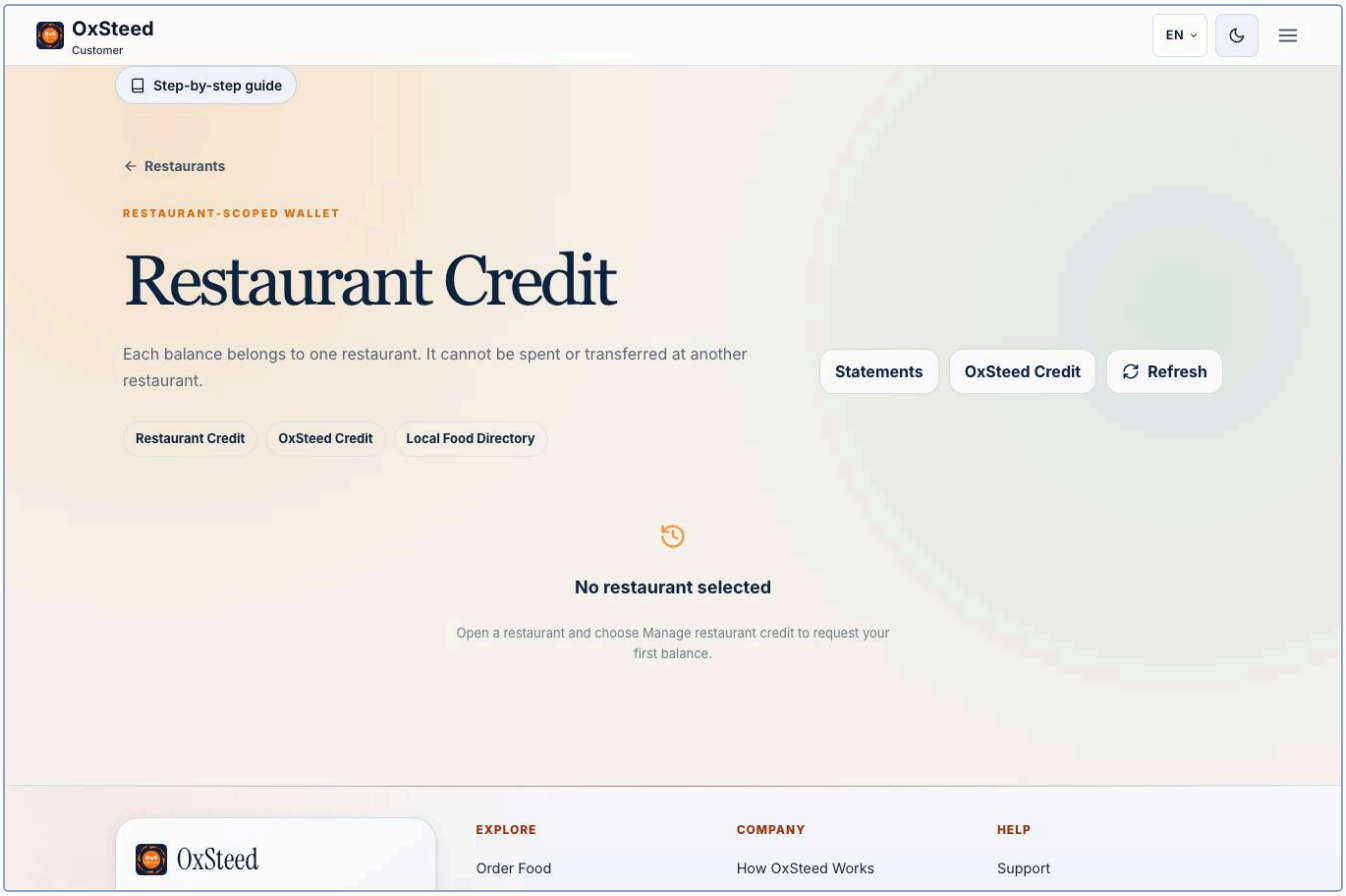

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 6: Approve or decline credit requests as a restaurant

On the restaurant dashboard, open the "Restaurant credit" manager ("Customer balances"; "Approve credit only after matching the customer's receipt or confirmation number."). On a pending request, use "View receipt" to check the proof, then "Approve credit" ("Payment matched?" then "Yes, add credit") or "Decline" with a reason ("Reason, for example: receipt amount does not match").

> **Expected result:** Approved credit lands in the customer wallet immediately.

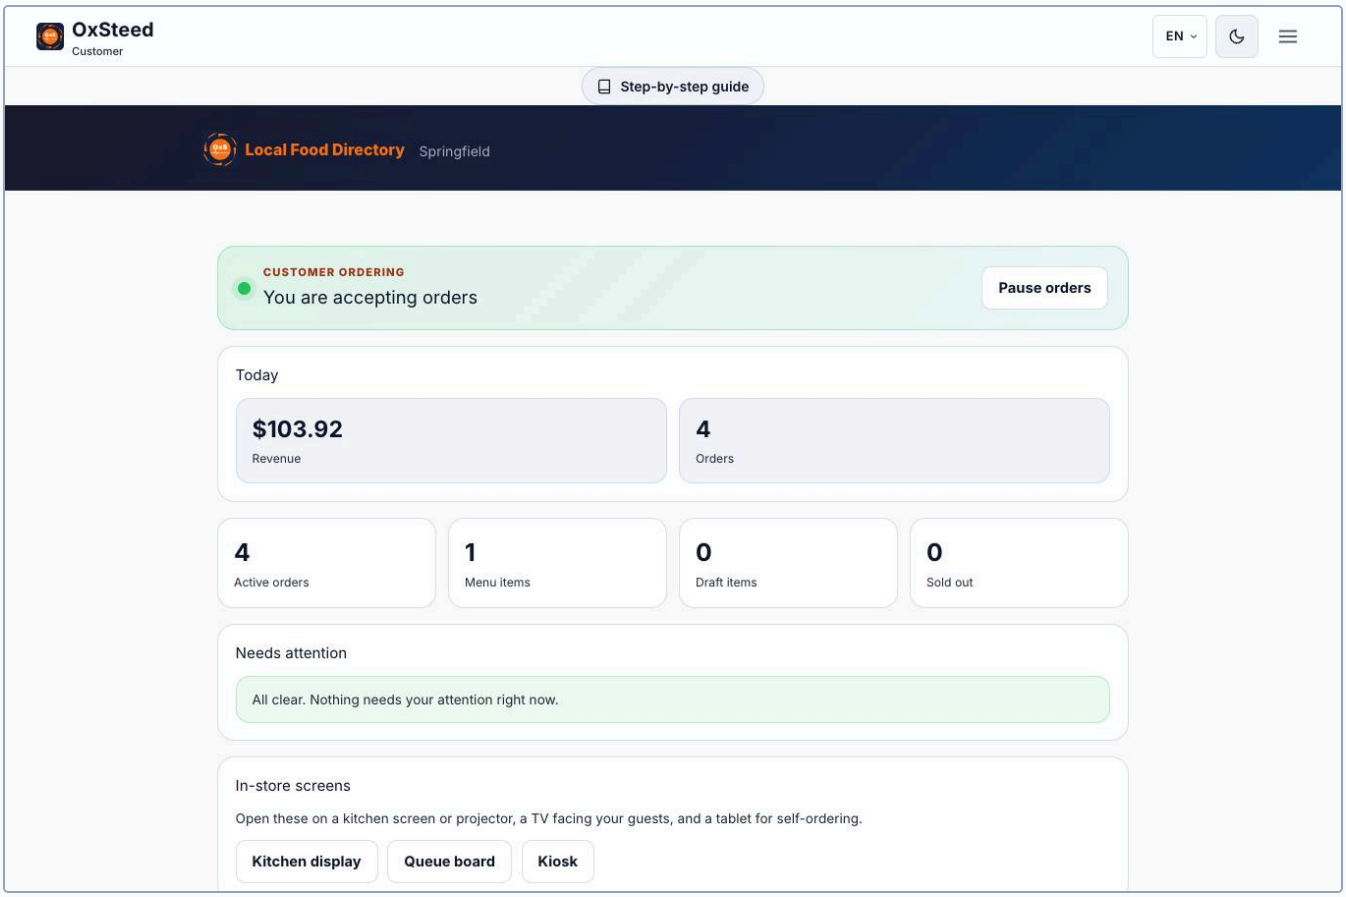

Figure 6. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Credit manager with request review actions)*

Step 7: Grant or refund credit as a restaurant

In the manager, choose "Grant credit" for a direct grant: enter "Customer email", "Amount", and a required "Explanation" ("Why is this credit being added? e.g. comp for wrong order"), then "Review grant" and "Yes, grant credit". Choose "Refund credit" to return money: enter "Customer email" and "Amount", add a "Reason", then "Review refund" and "Yes, refund". Refunds deduct the wallet and send money back to the card; only credit issued in the last 30 days can be refunded.

> **Expected result:** The customer wallet updates and every grant records its explanation on the audit trail.

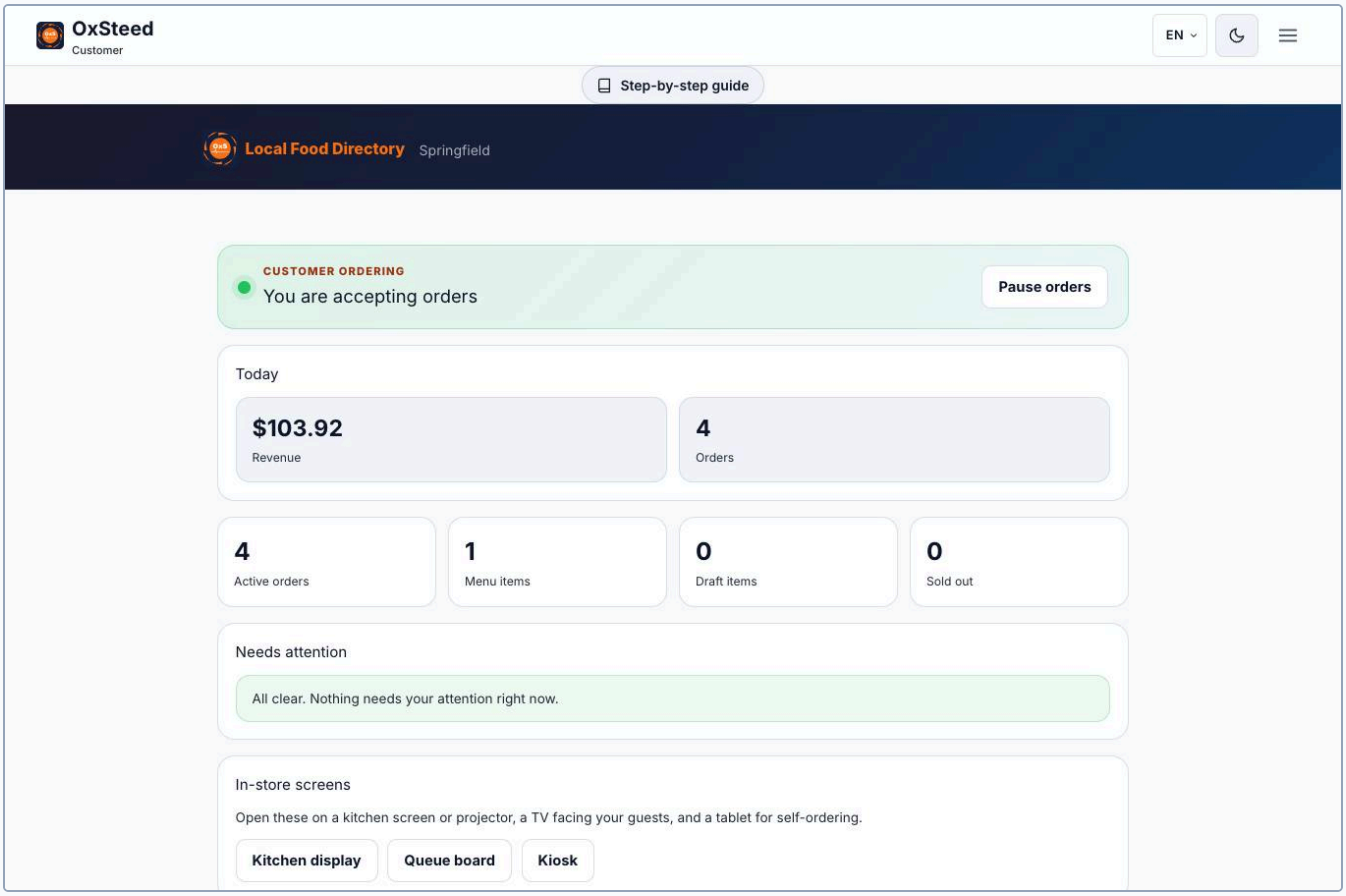

Figure 7. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Grant credit form with explanation)*

Step 8: Review activity and statements

The "Activity" section shows approved credit, purchases, transfers, and refunds; "Transfer history (X)" lists sends and receives. Follow "Statements" for issued monthly statements, or open /restaurant-credit/statements directly.

> **Expected result:** You can reconcile every balance change with its timestamp and type.

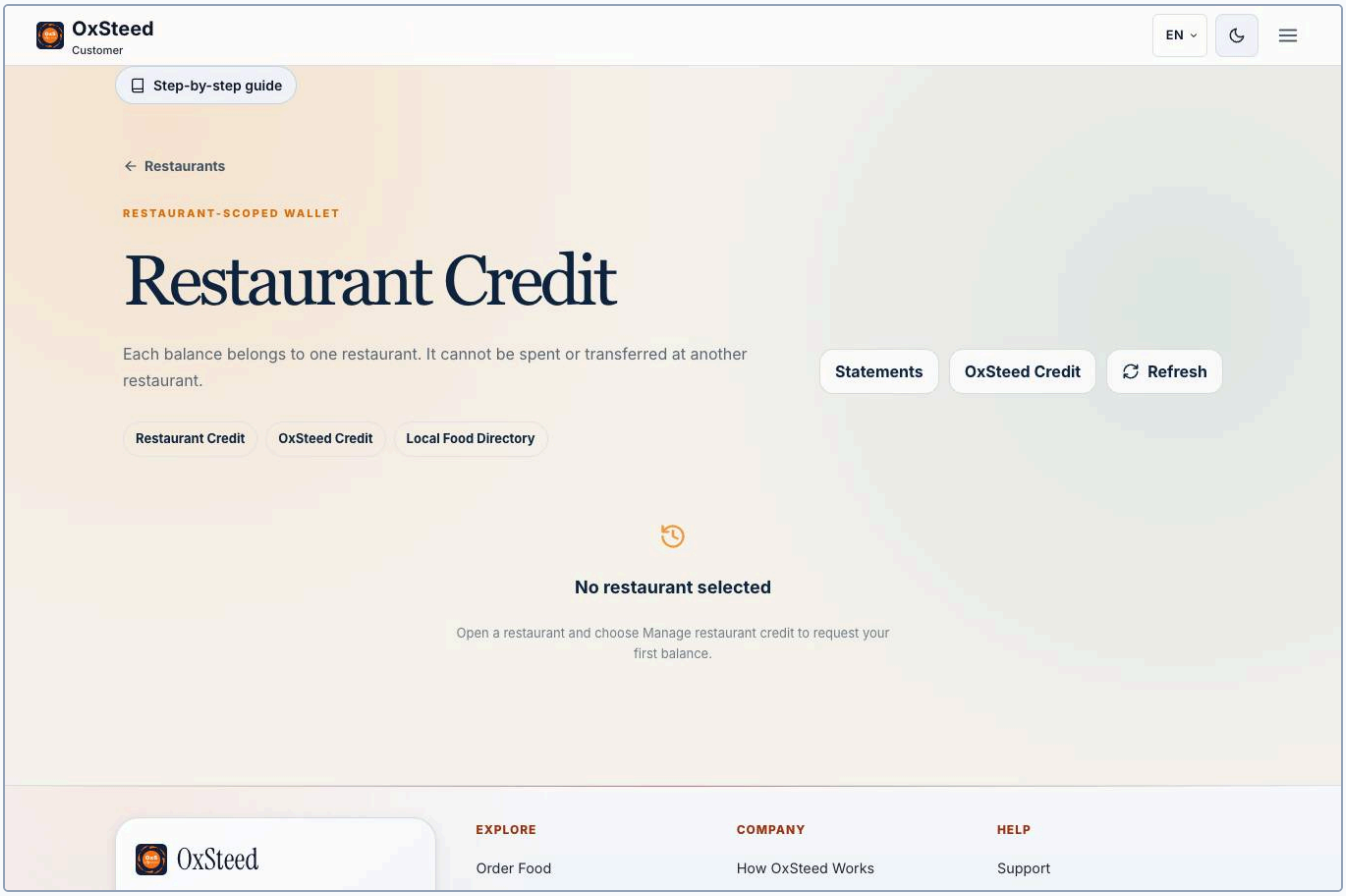

Figure 8. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Confirm it worked

The restaurant wallet shows the right balance, payments and transfers post to the activity feed, and disputes or refunds resolve.

If something goes wrong

Problem	What to do

Card top-up fails.	You see "The card payment did not go through. Please check the card details and try again." Check the card details and that the amount is within the shown min and max, then retry.
A credit request stays pending.	The restaurant has not verified your proof yet. Use "Cancel" on the request and resubmit with a clearer receipt or the exact confirmation number.
You see "Amount exceeds the available balance."	Lower the QR amount to the available balance, or top up first.
A refund cannot be processed.	Only credit issued in the last 30 days can be refunded. If the card refund fails, the wallet balance is left untouched.

Need help?

Guide ID: financial-statements | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS **ENGLISH**

View statements

Guide ID	**financial-statements**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-statements

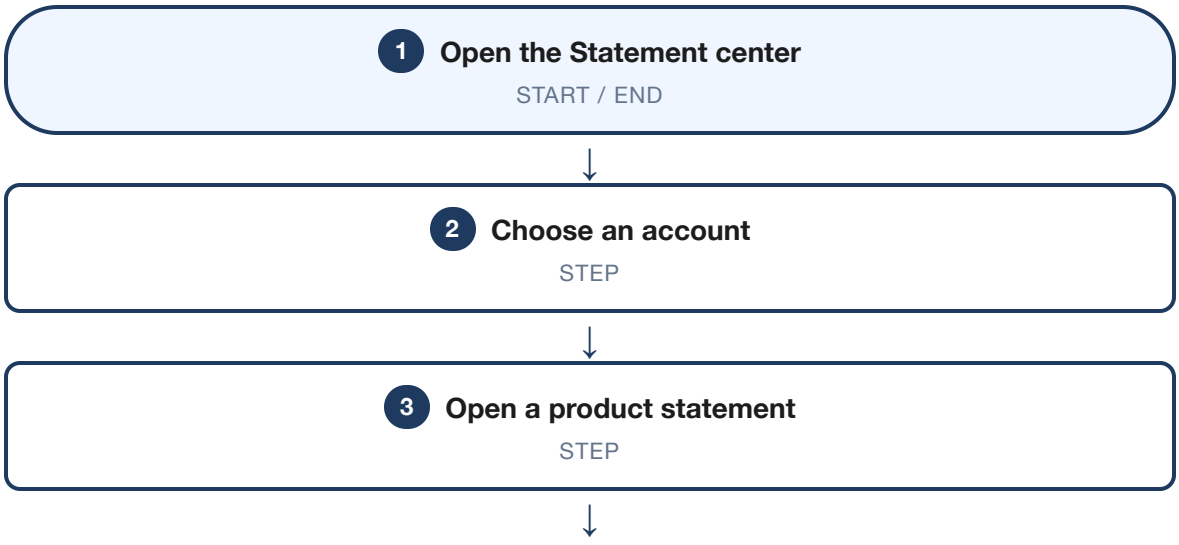

Goal

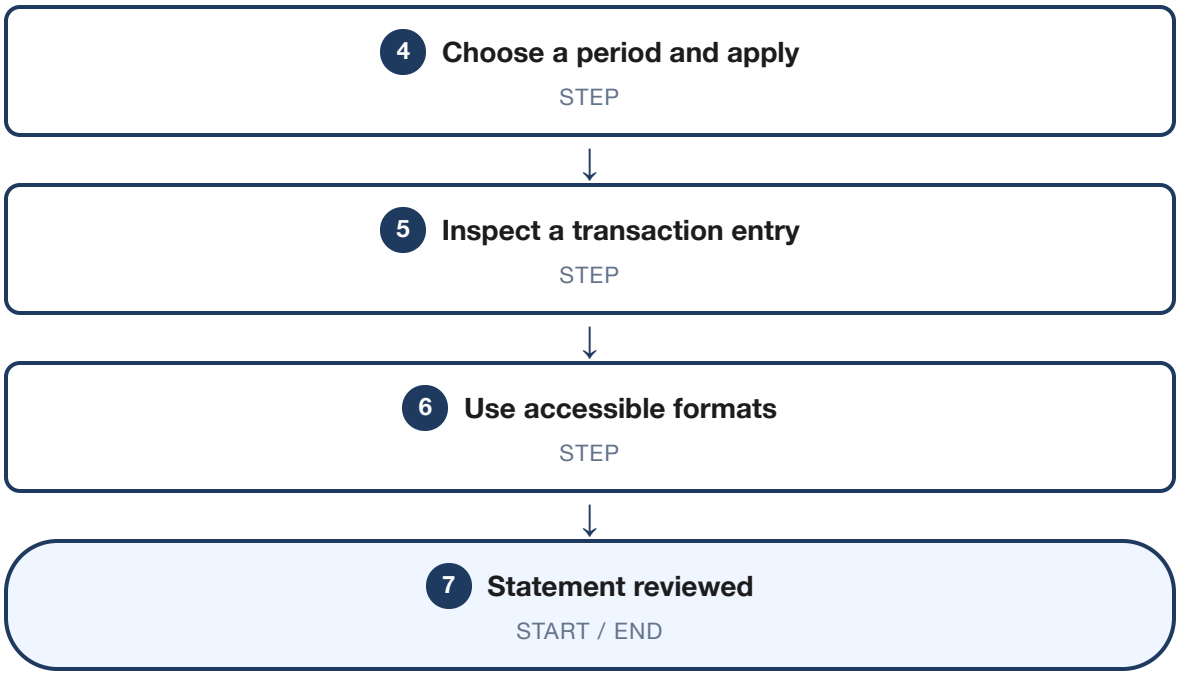

Find and read the right statement: the statement center, product statements, transaction details, and accessible formats.

Before you start

1. Sign in to your OxSteed account.

Process map

Text version. Open /statements ("Statement center": "Choose an account and a period, then review or download your records."). Note "Balances, currencies, and statement types stay separate." Choose an account ("Account and currency"), then open a product statement at /oxsteed-credit/statements or /restaurant-credit/statements ("Account statements": "Choose an account and statement period", then "Apply"). Inspect entries ("Entry details") and report issues. Use the accessible statement page for a tagged PDF, accessible HTML, or CSV.

Steps

Step 1: Open the Statement center and choose an account

Open /statements. The "Statement center" shows "Choose an account" with your statement accounts. Use "Search all records" or "Period activity" to narrow, and "Change account" to switch. The note "Balances, currencies, and statement types stay separate." reminds you each account keeps its own records.

> **Expected result:** The accounts list loads with the selected account's periods.

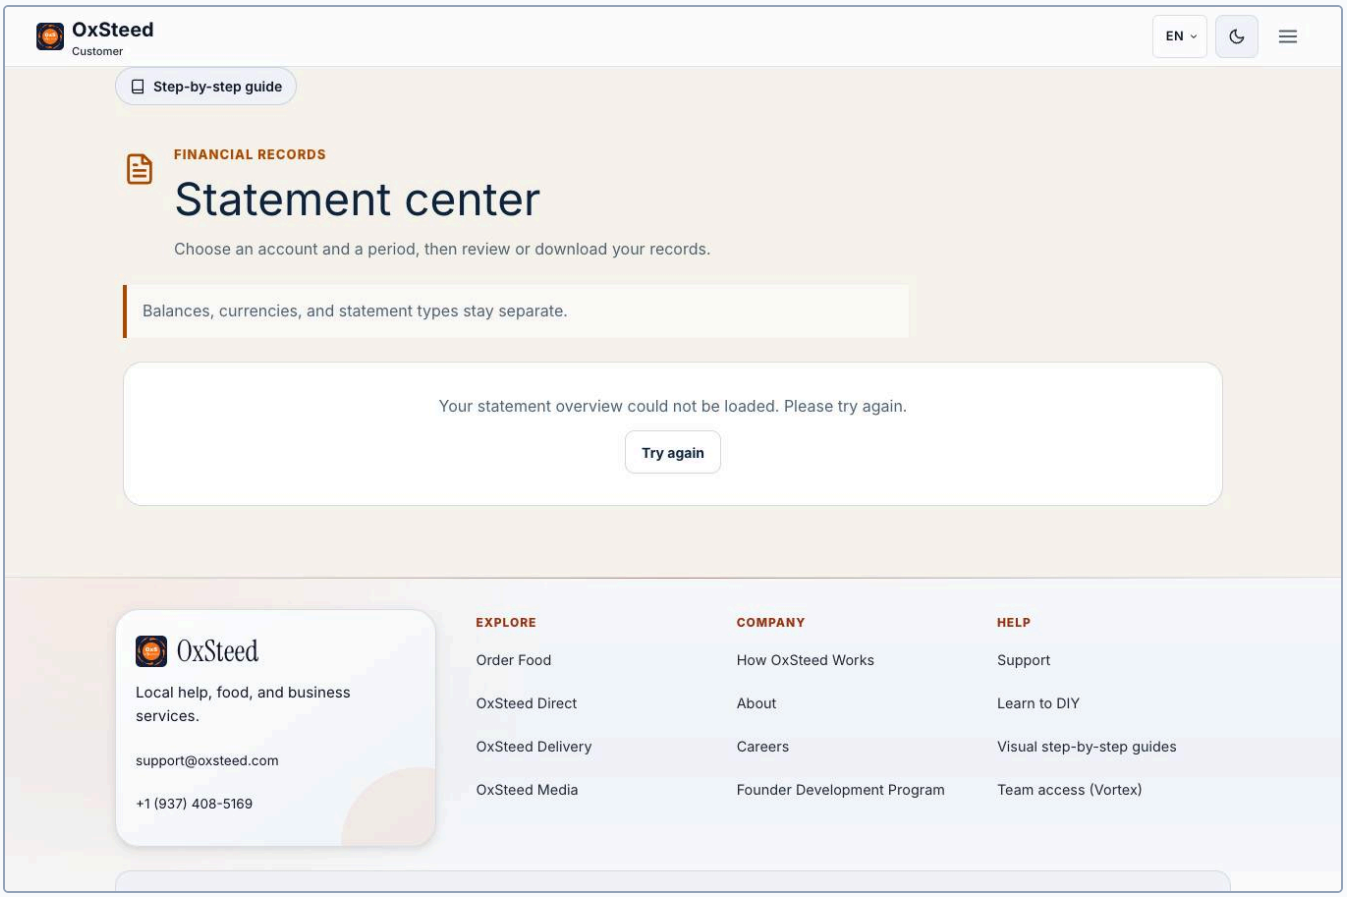

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Statement center)*

Step 2: Open a product statement and choose a period

Open /oxsteed-credit/statements ("OxSteed Credit" statements) or /restaurant-credit/statements ("Restaurant Credit" statements). "Choose an account and statement period" ("Select Apply to generate or retrieve your statement."), then choose "Apply". Dates use UTC; "Closed calendar months create immutable monthly documents on demand. Current or custom periods are interim reports."

Expected result: The "Posted activity" list fills with the period's transactions and "Download PDF" / "Download CSV" appear.

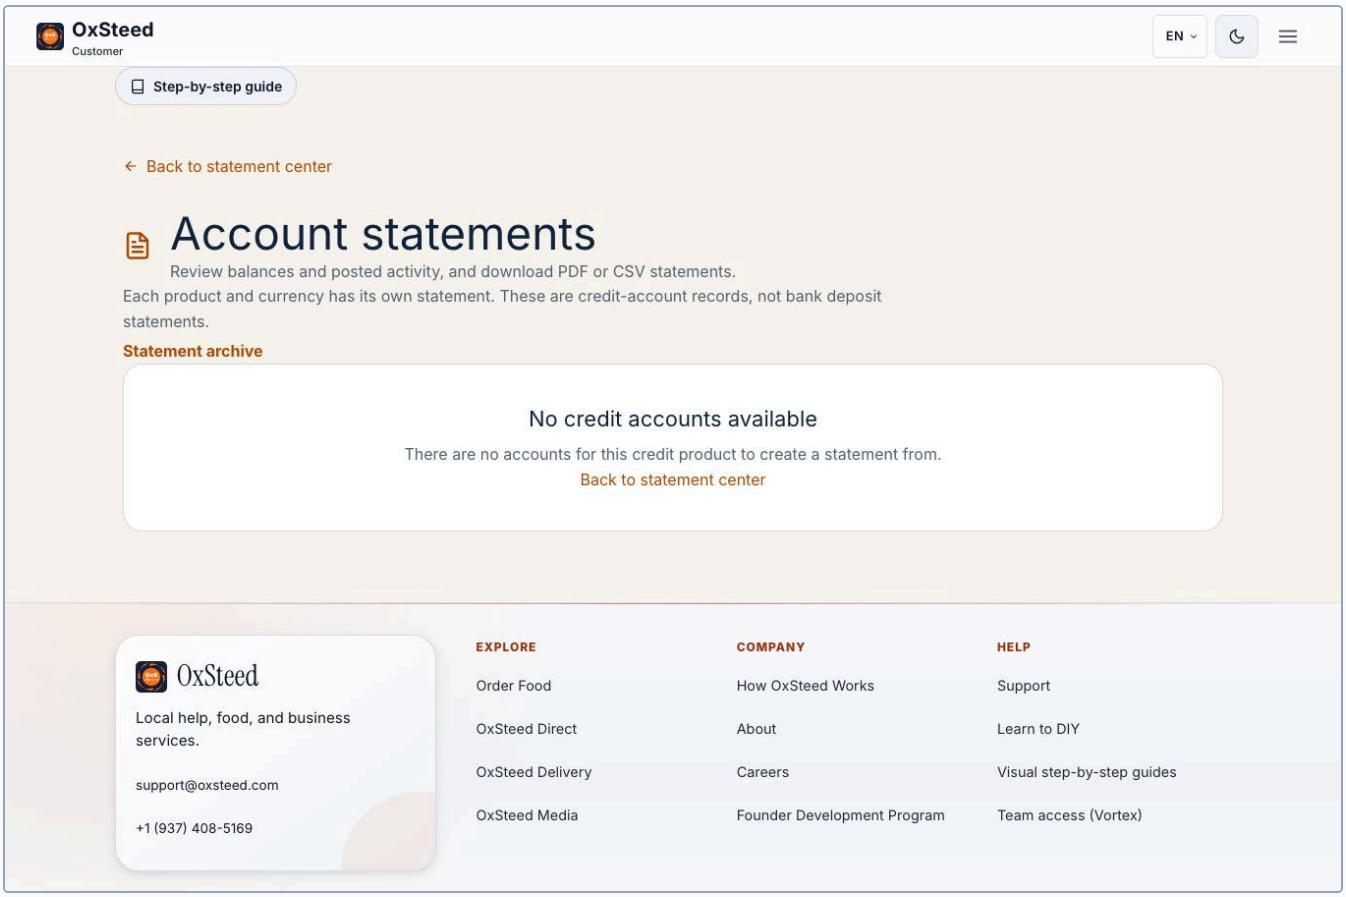

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Account statements)*

Step 3: Filter and review posted activity

In "Posted activity", each row shows the date, type, "Credit"/"Debit", "Description", and "Balance after". Use "Advanced filters" to narrow by "Activity type", "Min amount"/"Max amount", "Direction" ("Debits and credits", "Debits only", "Credits only"), "Status", or related record ("Food orders", "Top-ups and funding", "Settlements and payouts", "Adjustments", "Refunds"), then "Apply filters".

> **Expected result:** The list shows "{{count}} of {{total}} transactions" matching your filters.

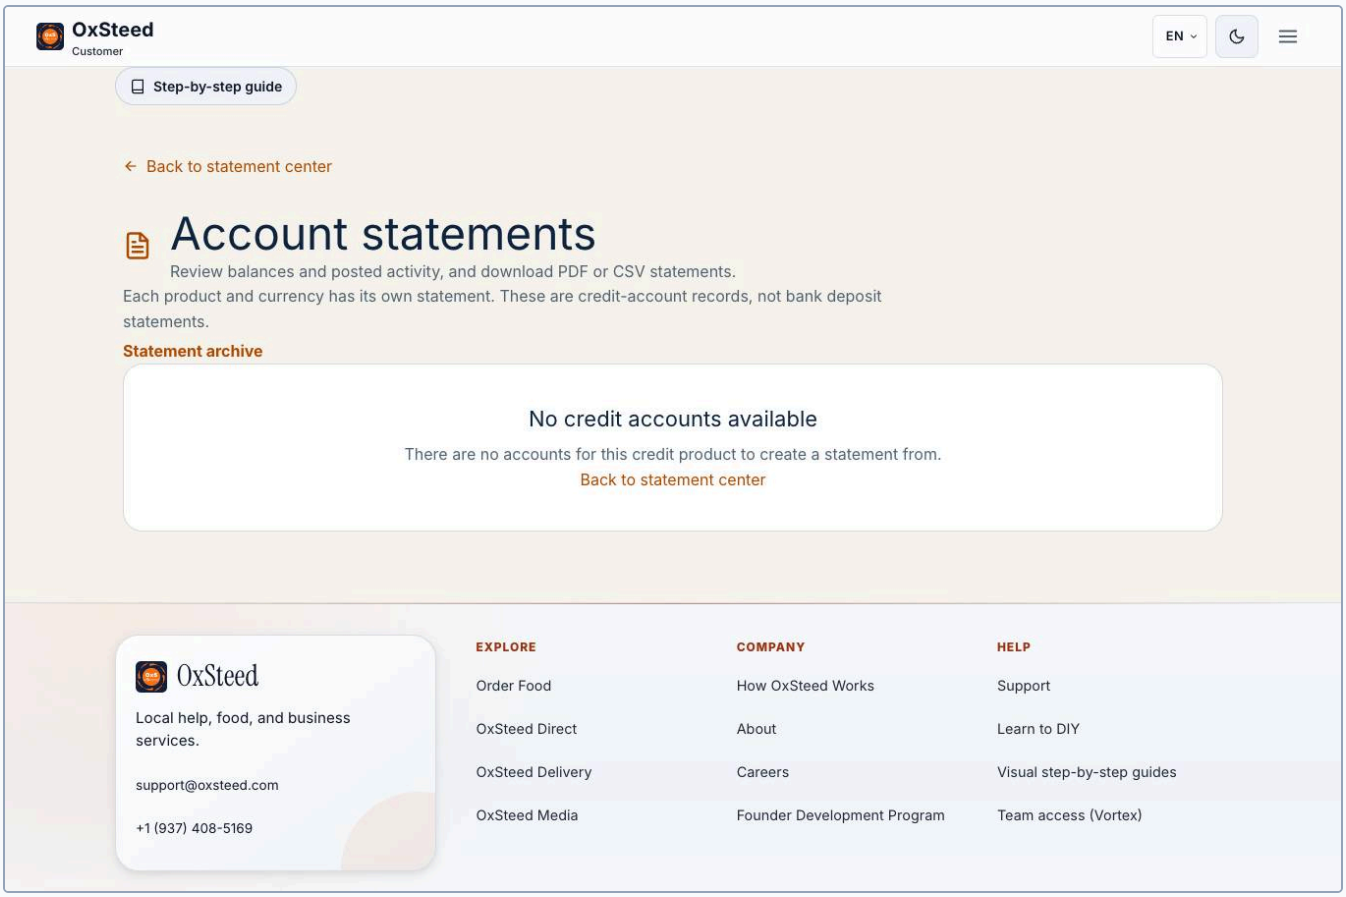

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Account statements)*

Step 4: Inspect a transaction entry

Open an entry to reach /statements/:documentId/entries/:entryId ("Statement transaction": "Entry details"). Review "Posted (UTC)", "Type", "Amount", "Balance after", "Reference", and the related record ("View" opens the linked order or payment). If something looks wrong, use "Report an issue" with a "Reason" and "Details", then "Submit report" ("Tell us what looks wrong. Filing a report never moves money; it opens a case for review.").

> **Expected result:** The entry facts are clear and any issue is filed as a report.

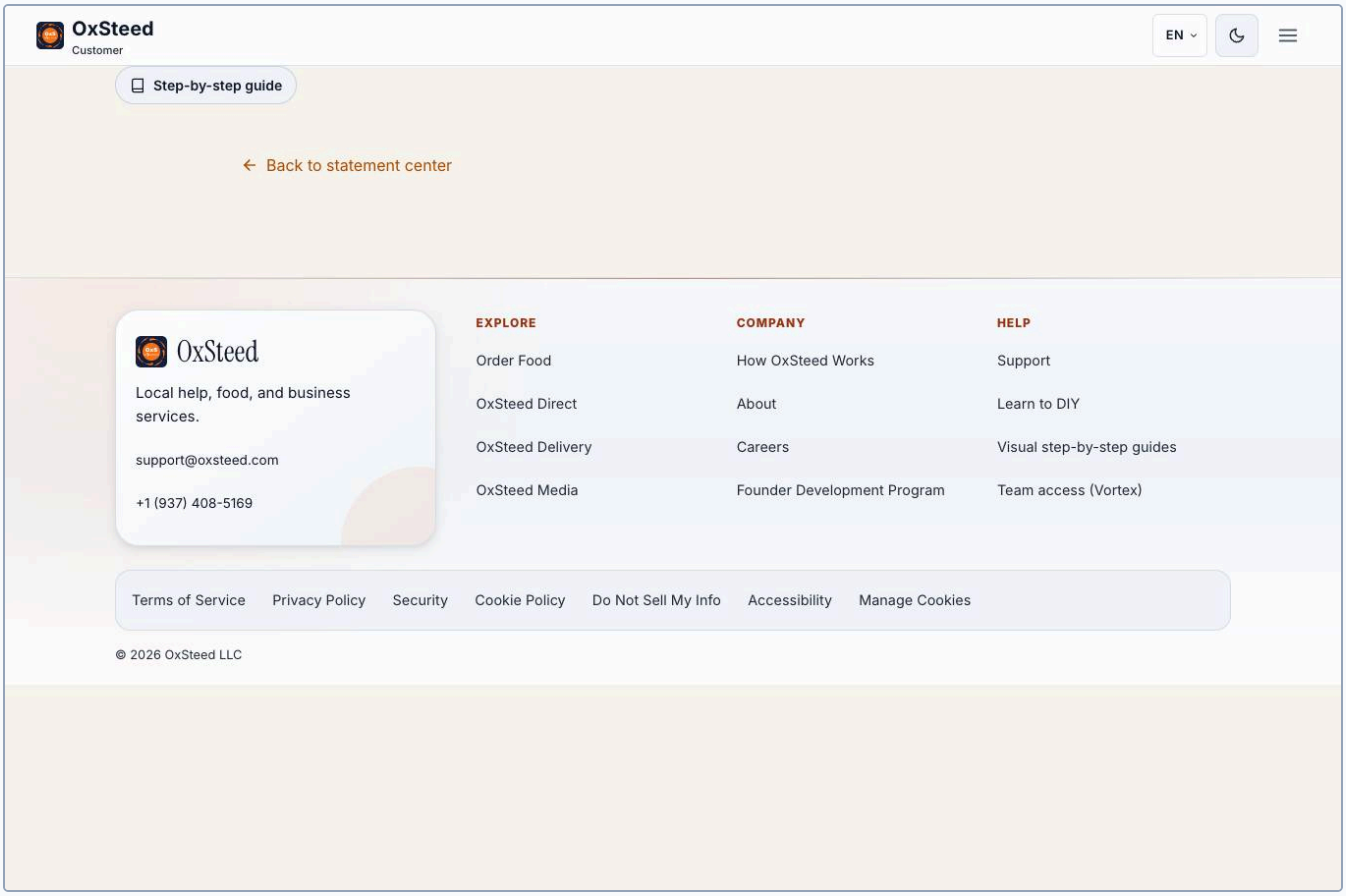

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Entry details with posted date, type, and amounts)*

Step 5: Use accessible formats

Open /statements/:documentId/accessible ("Accessible statement": "Download a tagged PDF, an accessible HTML version, or a CSV of this statement."). Choose "Download accessible PDF" ("Tagged PDF": "A PDF with a tagged structure for screen readers."), "Open accessible HTML" ("Accessible HTML": "The same statement as a web page with a semantic table, headings, and right-to-left support for Arabic."), or "Download CSV" ("CSV data": "Every transaction row as plain data for spreadsheets and screen readers.").

> **Expected result:** The statement downloads in the format you chose.

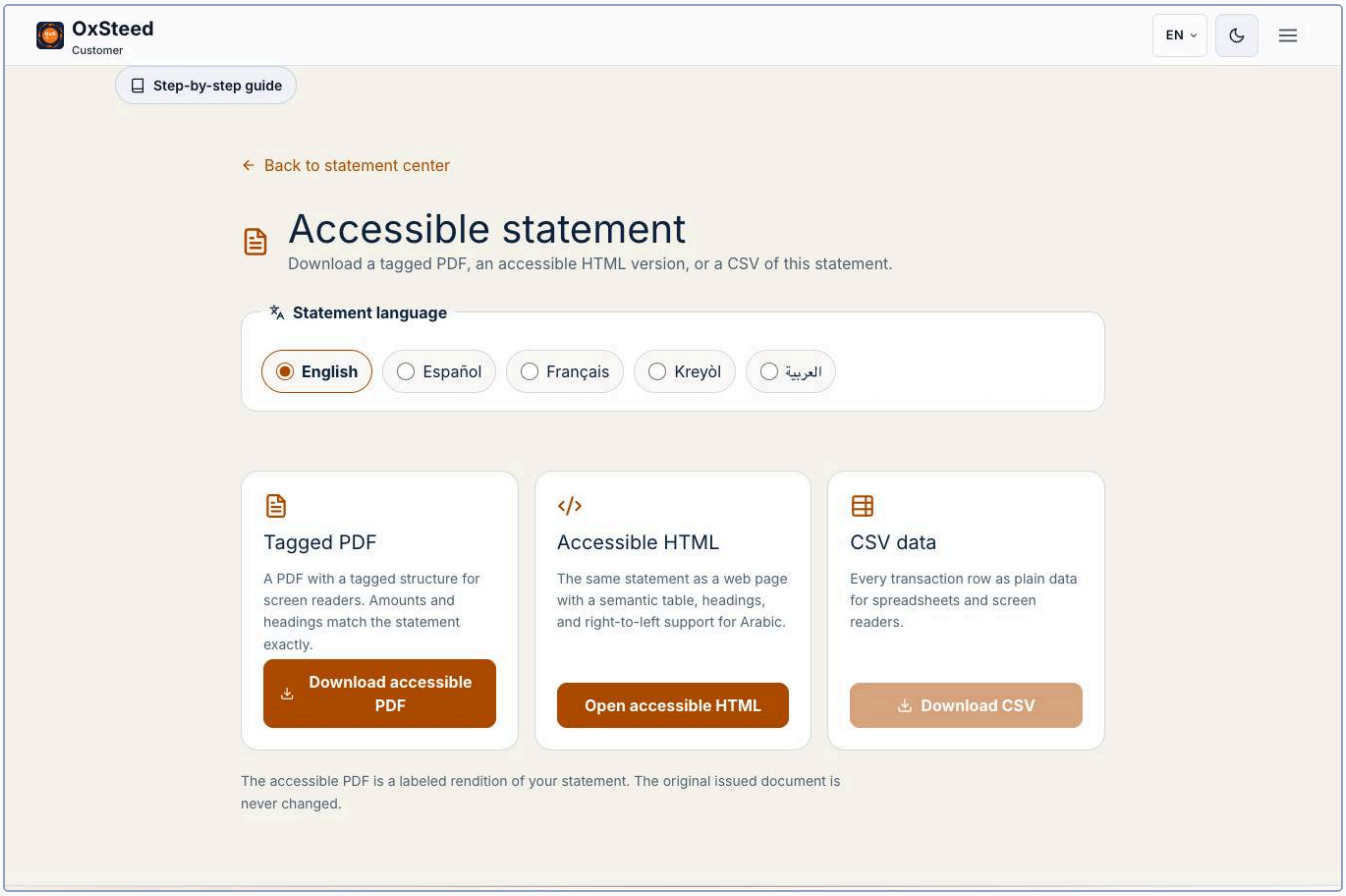

Figure 5. Accessible formats, desktop view. *(Image description: Synthetic example: Accessible statement)*

Confirm it worked

You can open the right account, period, and entry, and download the statement in a usable format.

If something goes wrong

Problem	What to do
The page shows "No statement accounts are available yet."	Accounts appear here when available to you. If you expect one (for example after a top-up), use "Retry" and check the wallet first.
The period shows "No posted activity in this period".	Widen the From/To range or choose a different account; current or custom periods are interim reports and may legitimately be empty.
A report cannot be opened from an entry.	You see "A report cannot be opened from this statement entry. Contact Support for help." Use the in-app support page at /support instead.

Need help?

For statement issues, use the in-app support page at /support.

Guide ID: financial-wallet | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS **ENGLISH**

View the wallet overview

Guide ID	**financial-wallet**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/financial/financial-wallet

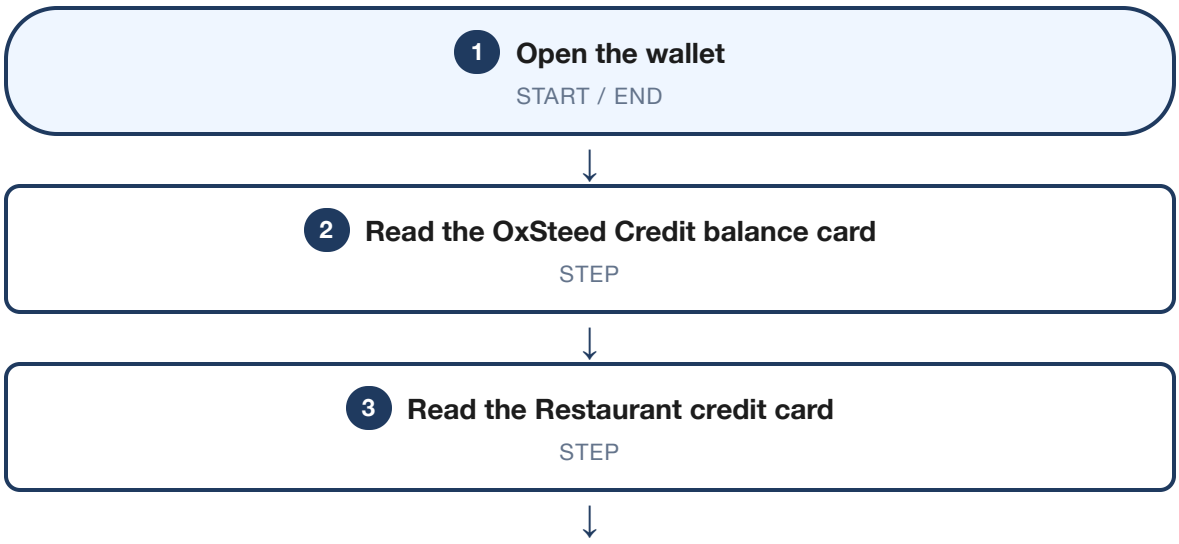

Goal

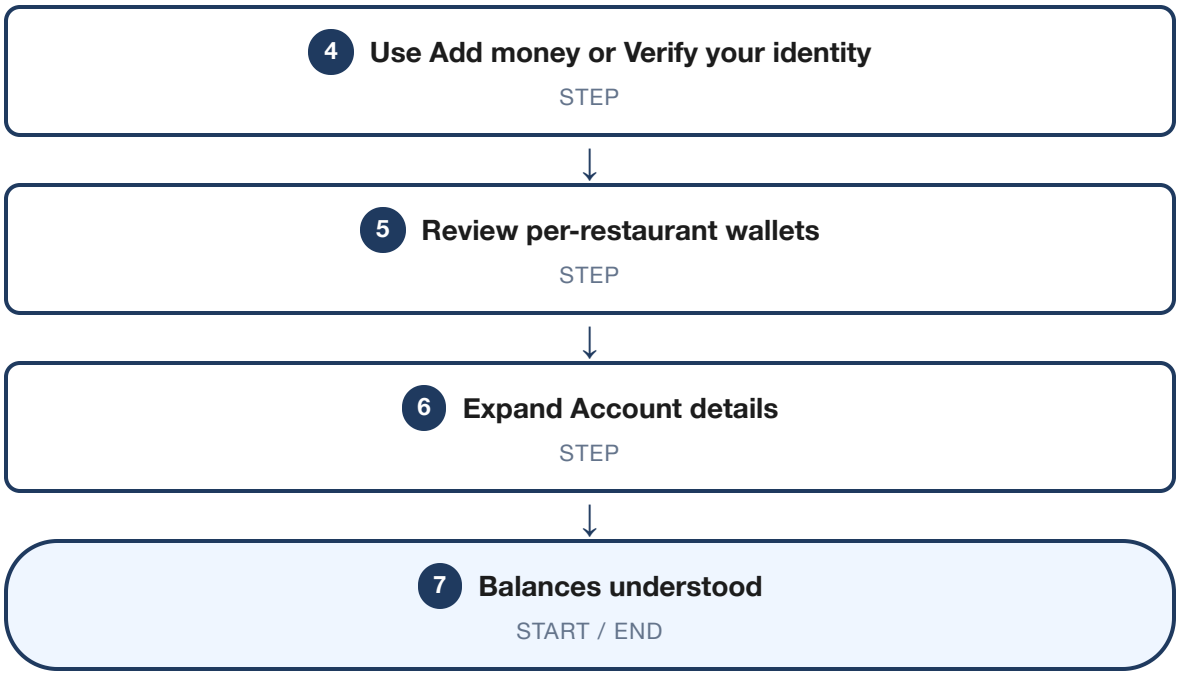

See every balance OxSteed holds for you in one place: OxSteed Credit plus your per-restaurant wallets.

Before you start

1. Sign in to your OxSteed account.

Process map

Text version. Open /wallet ("Wallet": "Your OxSteed Credit balance and restaurant credits in one place, with history and controls."). Read the OxSteed Credit balance card ("OxSteed Credit balance", "Available to spend", "Reserved") and use the "Currency" picker and "Refresh" as needed. Read the "Restaurant credit" card ("Credit held at individual restaurants, each with its own balance and rules.") and follow "View restaurant credits" to the per-restaurant list. Use "Add money" to top up OxSteed Credit, or "Verify your identity" to raise funding limits. Expand "Account details" for deposits, withdrawals, and the last statement.

Steps

Step 1: Open the wallet

Open /wallet. The page is titled "Wallet" with the description "Your OxSteed Credit balance and restaurant credits in one place, with history and controls." The "Your balances" section holds one card for OxSteed Credit and one for restaurant credit.

> **Expected result:** Both balance cards load, or a clear error message with "Retry" appears.

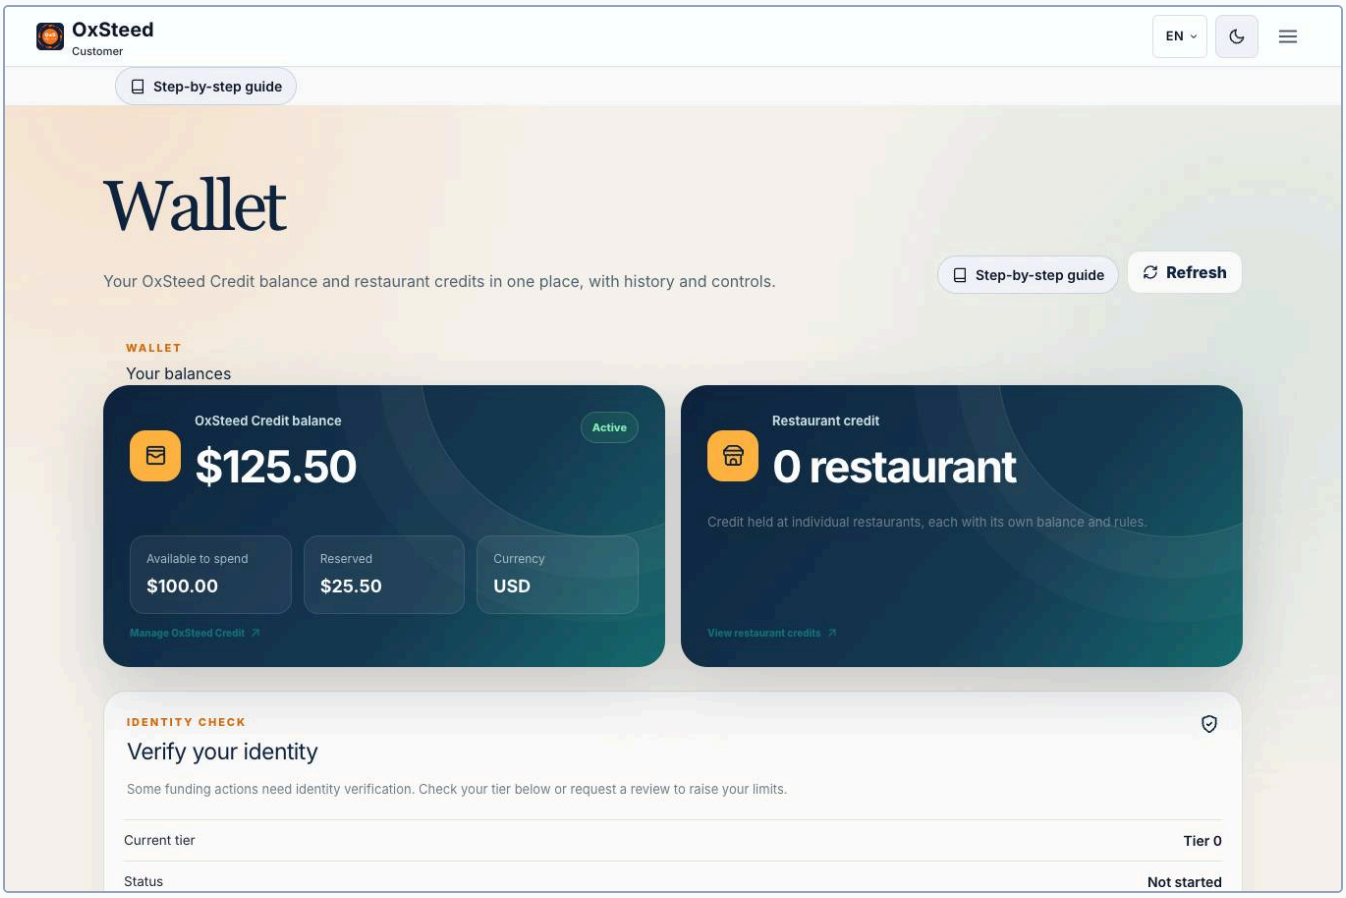

Figure 1. The wallet overview, desktop view. *(Image description: Synthetic example: Wallet)*

Step 2: Read the OxSteed Credit balance card

The OxSteed Credit card shows the "OxSteed Credit balance", "Available to spend", and "Reserved" amounts plus the account status ("active", "under review", and so on). Use the "Currency" picker when you hold more than one currency, and "Refresh" to reload. Choose "Manage OxSteed Credit" for the full credit page.

> **Expected result:** You know your platform credit balance and how much of it is spendable.

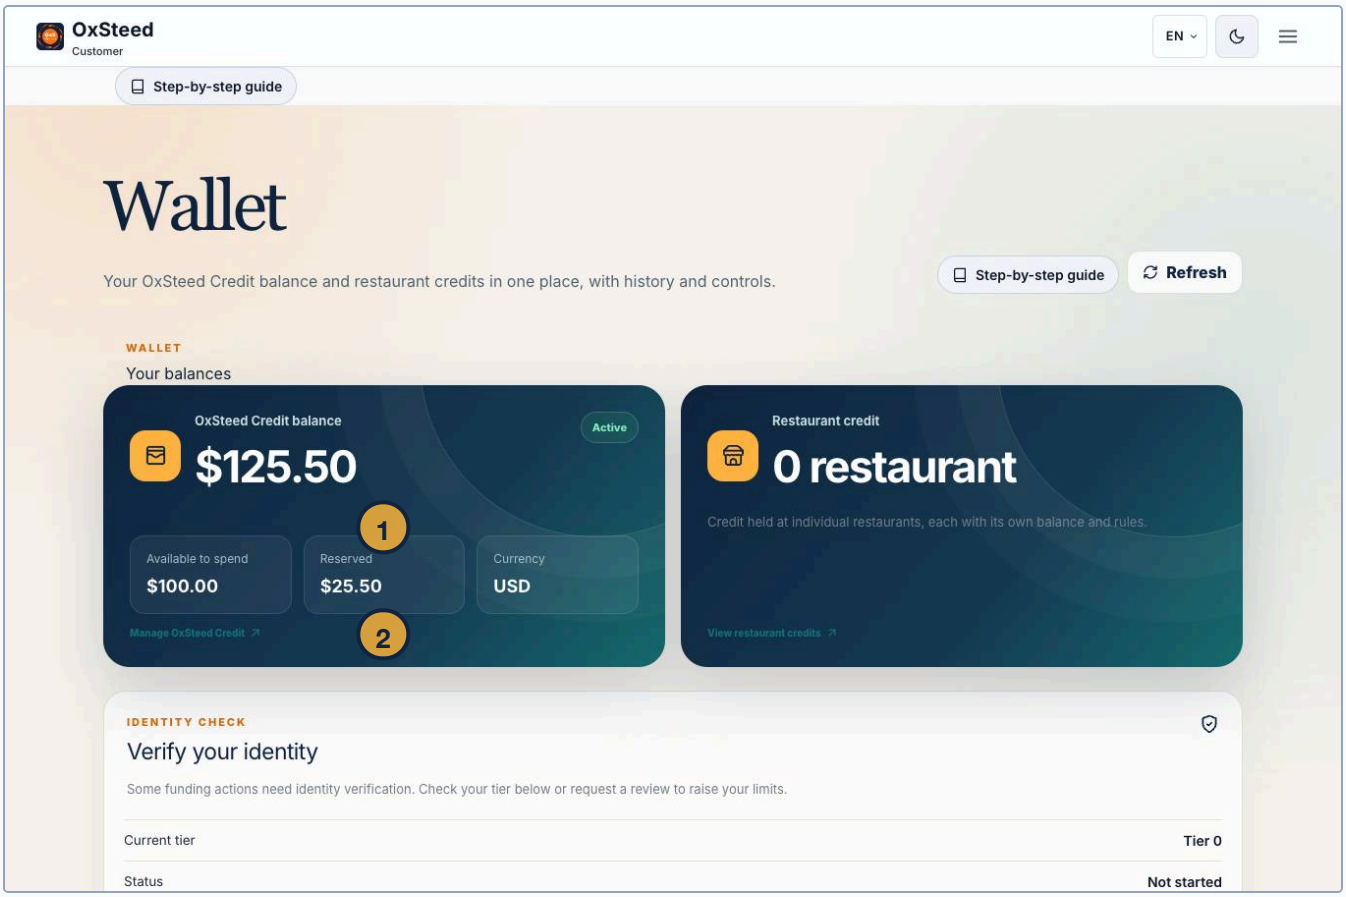

Figure 2. The OxSteed Credit balance card, desktop view. *(Image description: Synthetic example: Wallet)*

1. **1.** Balance card
2. **2.** Manage OxSteed Credit link

Step 3: Read the Restaurant credit card

The "Restaurant credit" card says "Credit held at individual restaurants, each with its own balance and rules." This is Restaurant Credit, a separate system from OxSteed Credit. Follow "View restaurant credits" to jump to the per-restaurant wallets below.

> **Expected result:** You see how many restaurant wallets you hold.

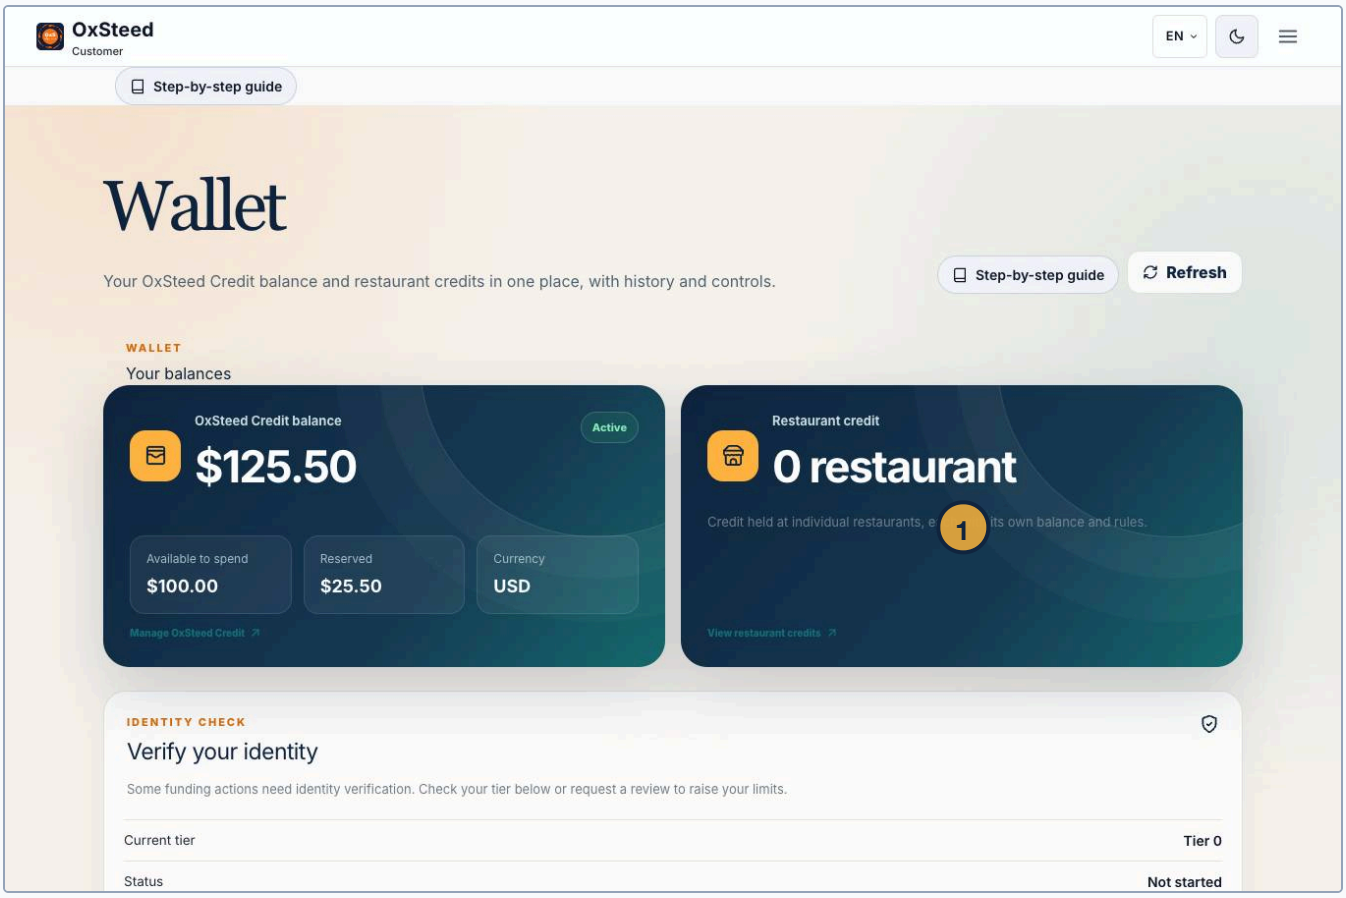

Figure 3. The Restaurant credit card, desktop view. *(Image description: Synthetic example: Wallet)*

1. **1.** Restaurant credit card

Step 4: Use Add money or Verify your identity

To add money to OxSteed Credit, use the "Add money" panel ("Add money to OxSteed Credit with a card. It is credited once the payment clears."): enter the "Amount", optionally use "Quick amounts", choose "Continue", complete the card payment step, and for larger top-ups enter the "Verification code" emailed to you ("Verify and continue"). If funding actions are limited, the "Identity check" panel ("Verify your identity") shows your "Current tier" and lets you "Request Tier 2" or "Submit appeal".

> **Expected result:** You see "Money added to your OxSteed Credit" or the verification request status.

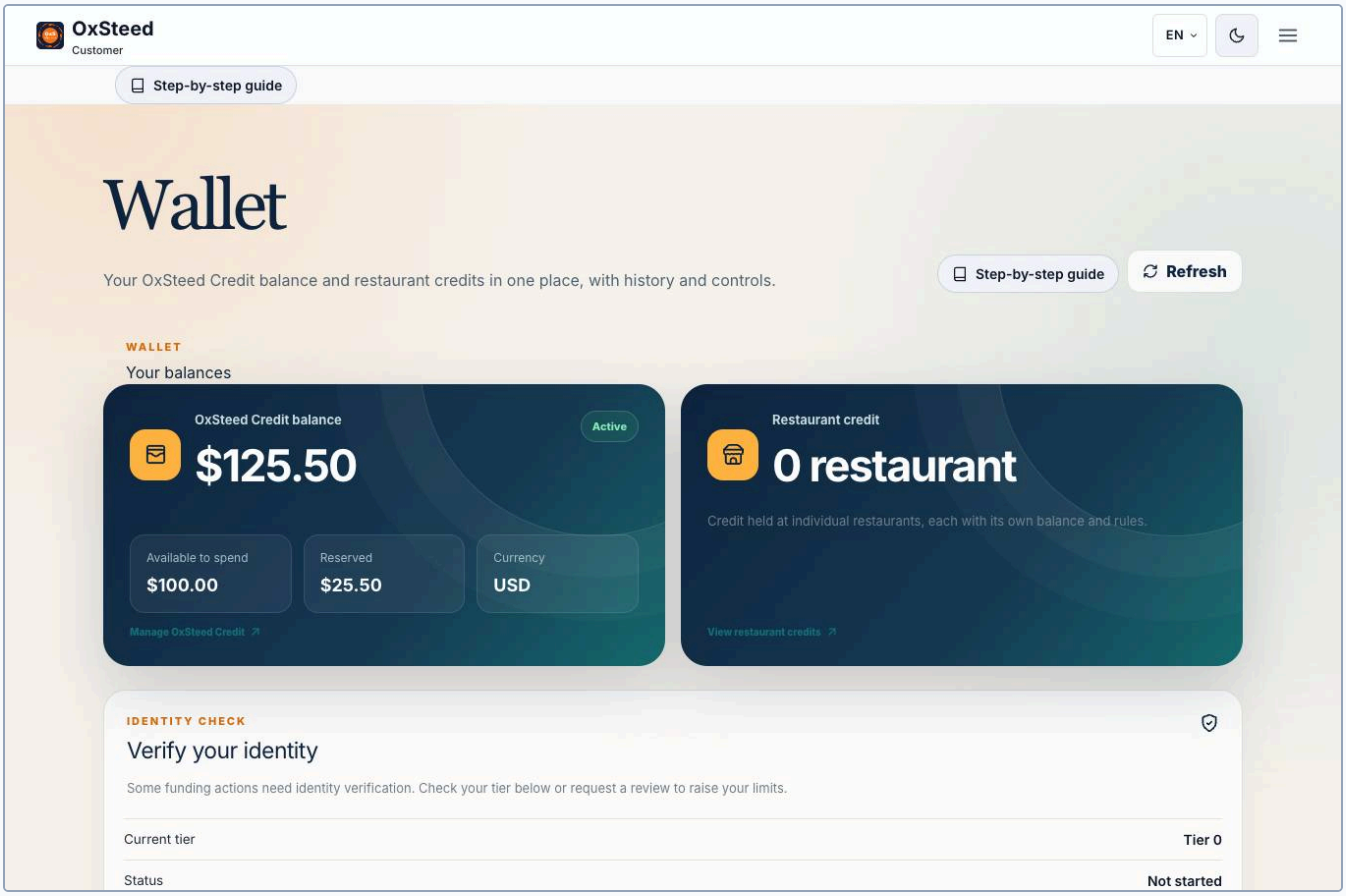

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Wallet)*

Step 5: Review your per-restaurant wallets

Below, the "Restaurant credit" section lists each wallet ("Balances held with individual restaurants. Each one spends only at its restaurant."). If empty you see "No restaurant wallets yet" ("When a restaurant issues you credit, it will appear here."). Choose "View wallet" to manage one at /restaurant-credit.

> **Expected result:** You can see each restaurant balance and open any wallet.

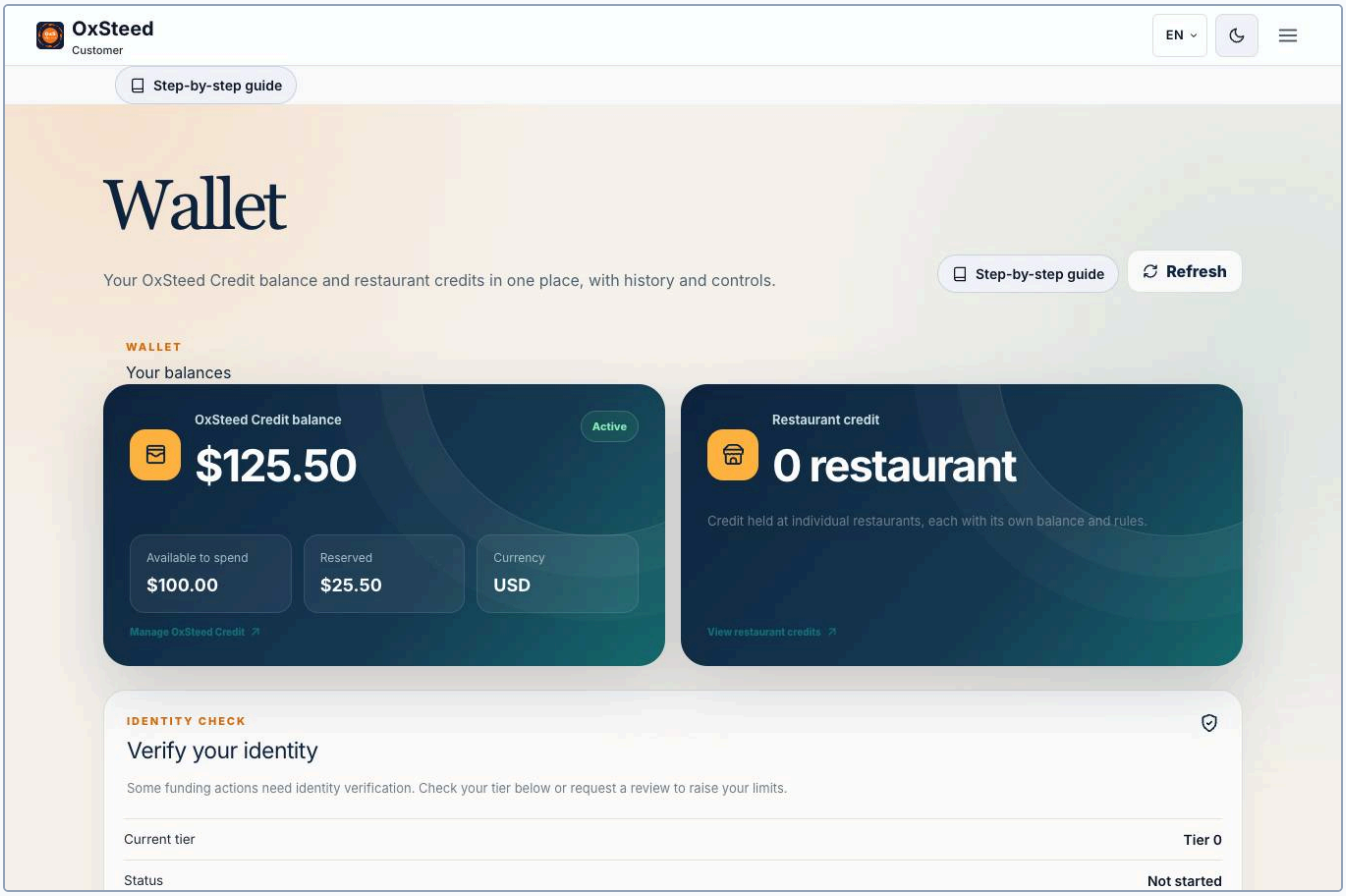

Figure 5. Per-restaurant wallets, desktop view. *(Image description: Synthetic example: Wallet)*

Step 6: Expand Account details

Choose "Account details" to expand the detail list: last statement balance and date, pending deposits and withdrawals, and the last deposit amount and date.

> **Expected result:** The detail list expands with the full account history summary.

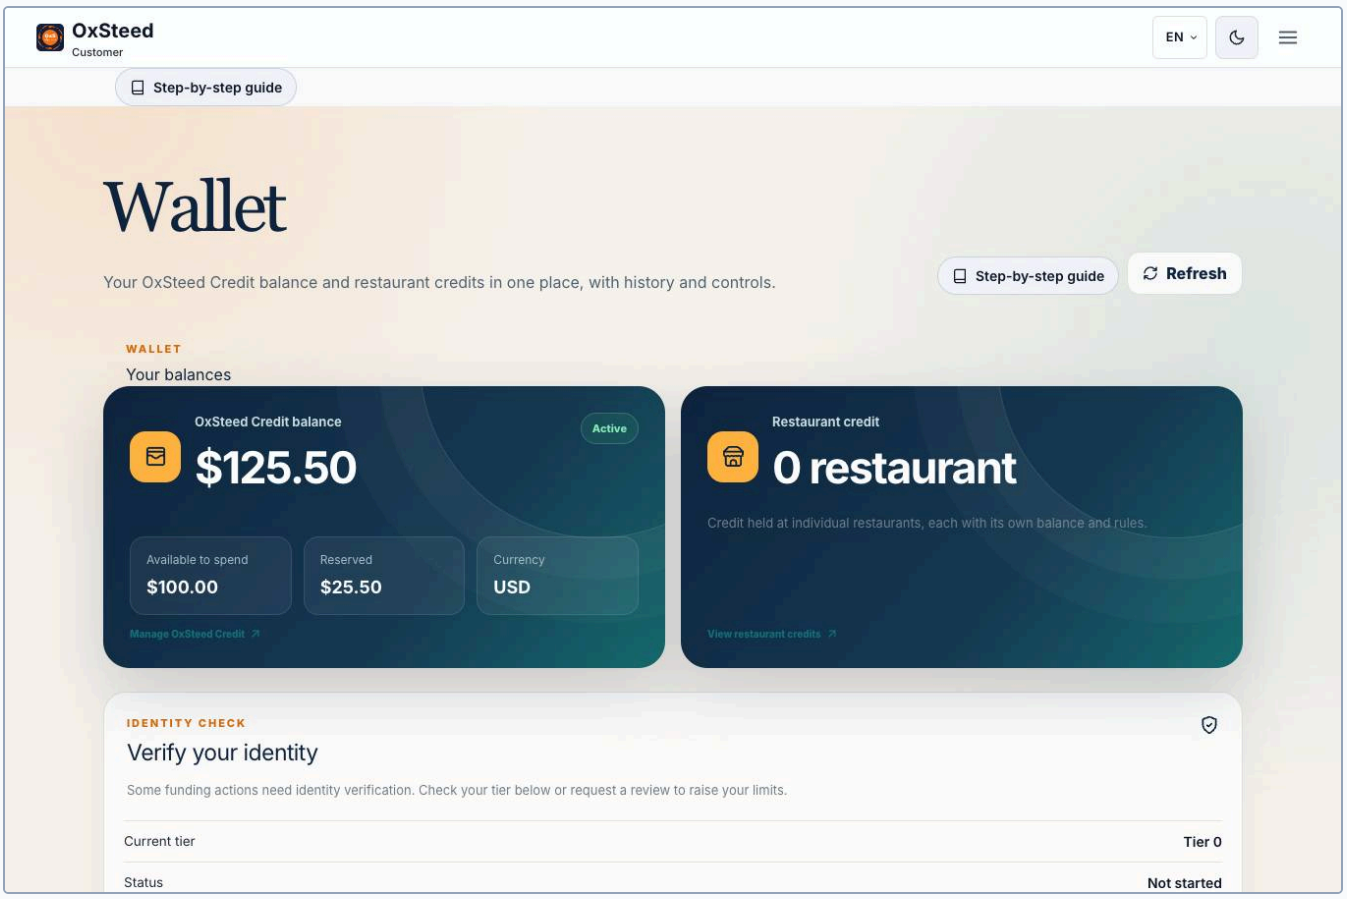

Figure 6. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Wallet)*

Confirm it worked

You can read your OxSteed Credit balance, your restaurant credit wallets, and the account details without leaving /wallet.

If something goes wrong

Problem	What to do

The wallet fails to load.	You see "Unable to load your restaurant wallets." or the account load error. Choose "Retry" or "Refresh" to reload.
You see "OxSteed Credit is temporarily paused".	The credit rail is paused: "Your balance and history remain available below. Spending, top-ups, and withdrawals are paused while the network is under review." Restaurant credit is a separate system and is unaffected.

Need help?

For wallet issues, use the in-app support page at /support.

Guide ID: hiring-book | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Book a helper, business, or service slot

Guide ID	**hiring-book**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/book-helper

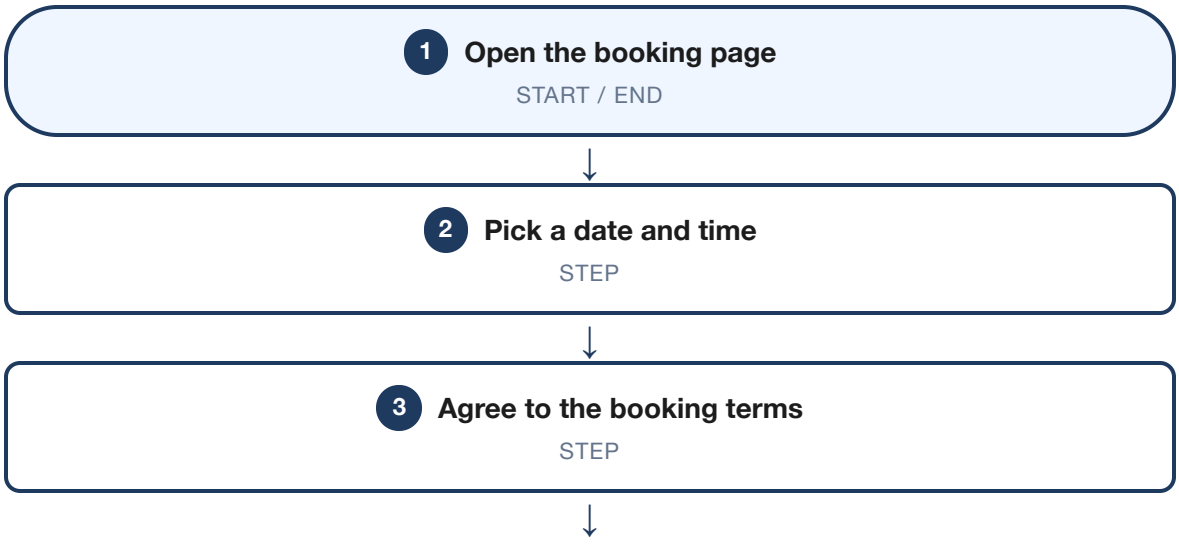

Goal

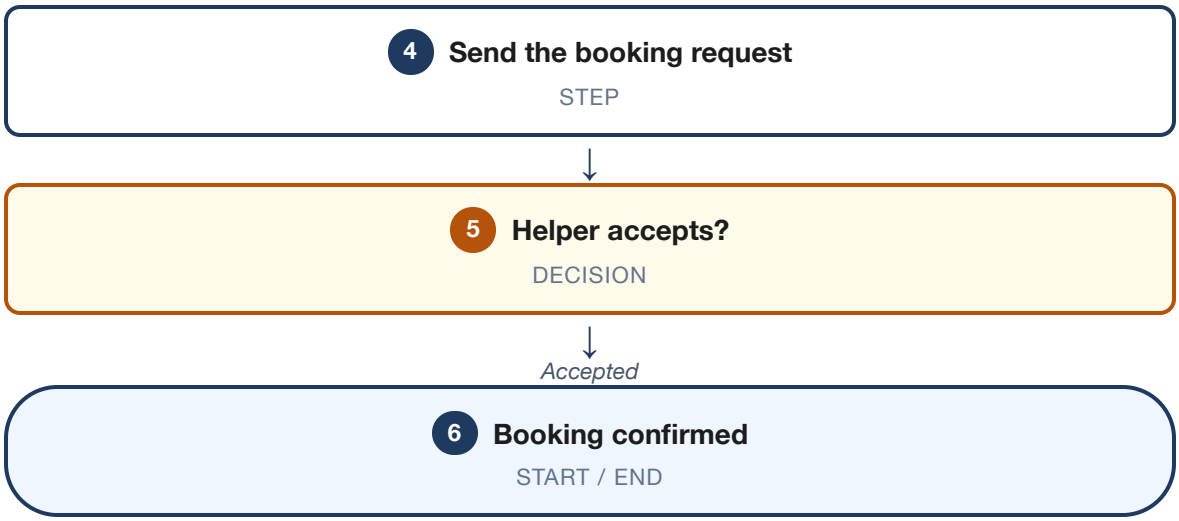

Request a booking with a helper, business, or Direct service slot and track it to confirmation.

Before you start

1. Be signed in to your OxSteed account; booking creation requires a verified email and accepted terms.
2. Have the helper, business, or service you want to book.

Process map

- *Declined:* Helper accepts? → Pick another slot or helper
- Pick another slot or helper → Pick a date and time

Text version. 1. Open the booking page: /book/:id for a helper, /book/business/:id for a business, or /direct/book-slot for a Direct service slot. The helper page heading is "Book this professional". 2. Pick a date and time from the available slots. 3. Review and agree to the booking terms. 4. Send the request ("Book now"). 5. Track it on /my-bookings: statuses include Pending, Accepted, Declined, Cancelled, and Expired. 6. Once accepted, manage it there (Cancel, Complete) or convert it into a job.

Steps

Step 1: Open the booking page for the provider

From a helper profile choose "Book Now" to open /book/:id ("Book this professional"). For a business use /book/business/:id. For an OxSteed-operated Direct service, open /direct/book-slot. The page shows the provider summary and their availability.

> **Expected result:** The booking page loads with available time slots.

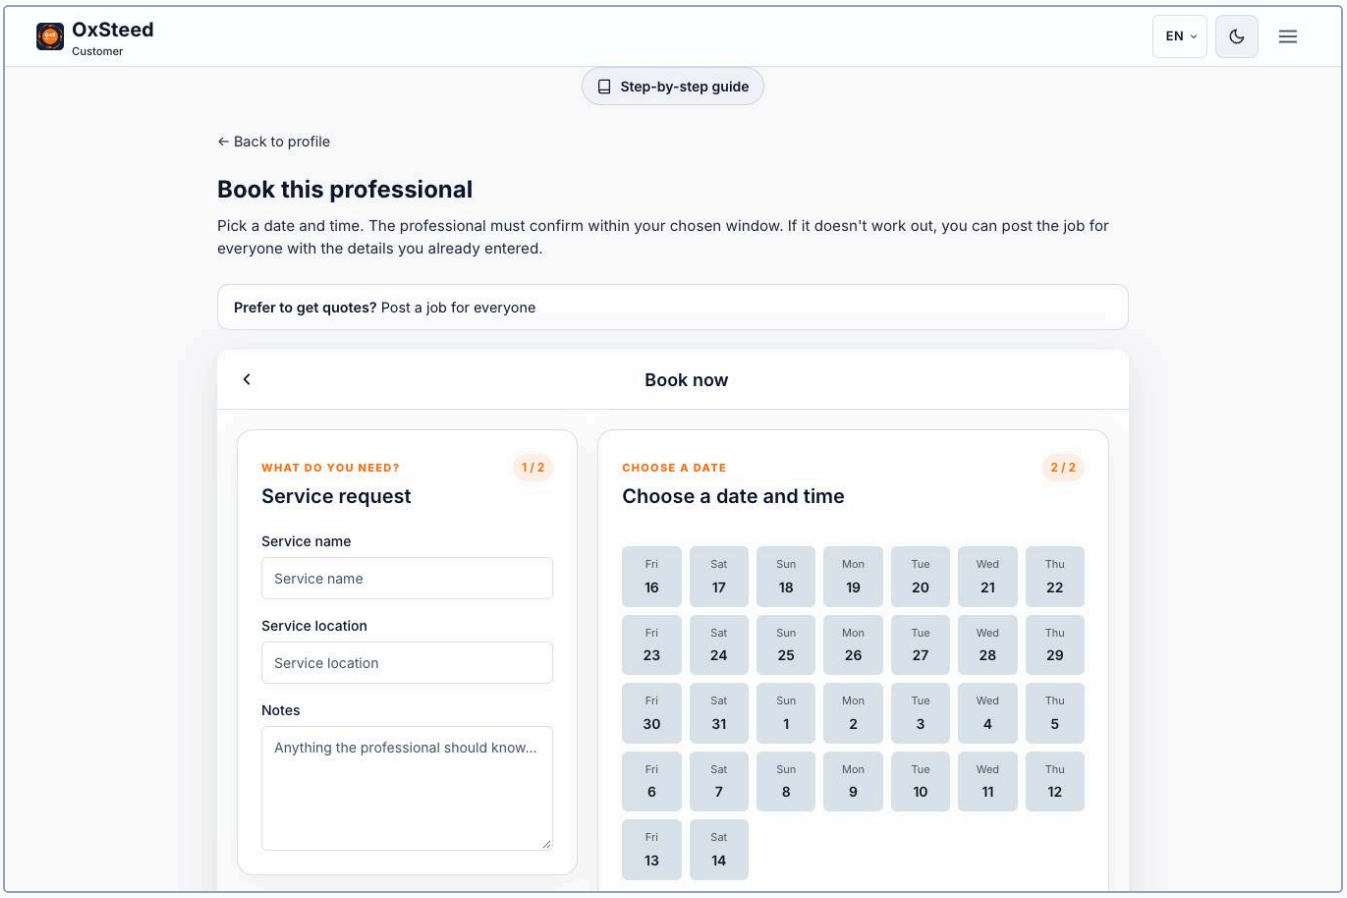

Figure 1. The helper booking page, desktop view. *(Image description: Synthetic example: Book this professional)*

Step 2: Pick a date and time and agree to the terms

Choose an available date and time slot. Review the price (service pages show "Base price" and a "Book now - {{price}}" button) and tick the booking terms agreement ("Please agree to the booking terms." if you skip it). The page can also suggest "Post a job for everyone" if you prefer bids instead.

> **Expected result:** A slot is selected and the terms are agreed.

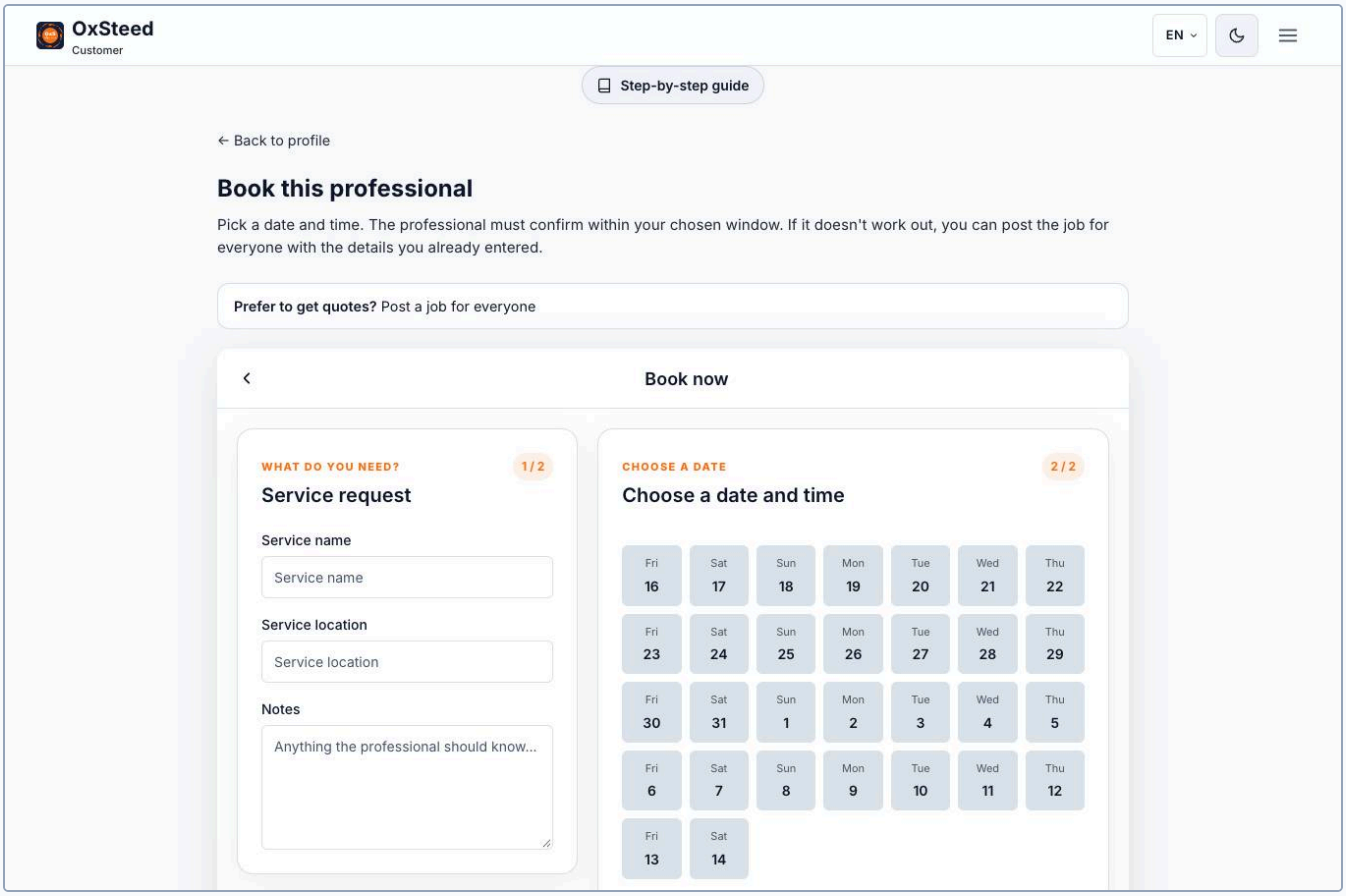

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Book this professional)*

Step 3: Send the request and track it

Choose "Book now" to send the request ("Sending request..."). Track it on /my-bookings, which lists bookings by status (Pending, Accepted, Declined, Cancelled, Expired) and offers actions like Cancel, Complete, and Confirm depending on the state. Helpers accept or decline from their side; a declined request shows the Declined status.

> **Expected result:** The booking appears on /my-bookings with the Pending status.

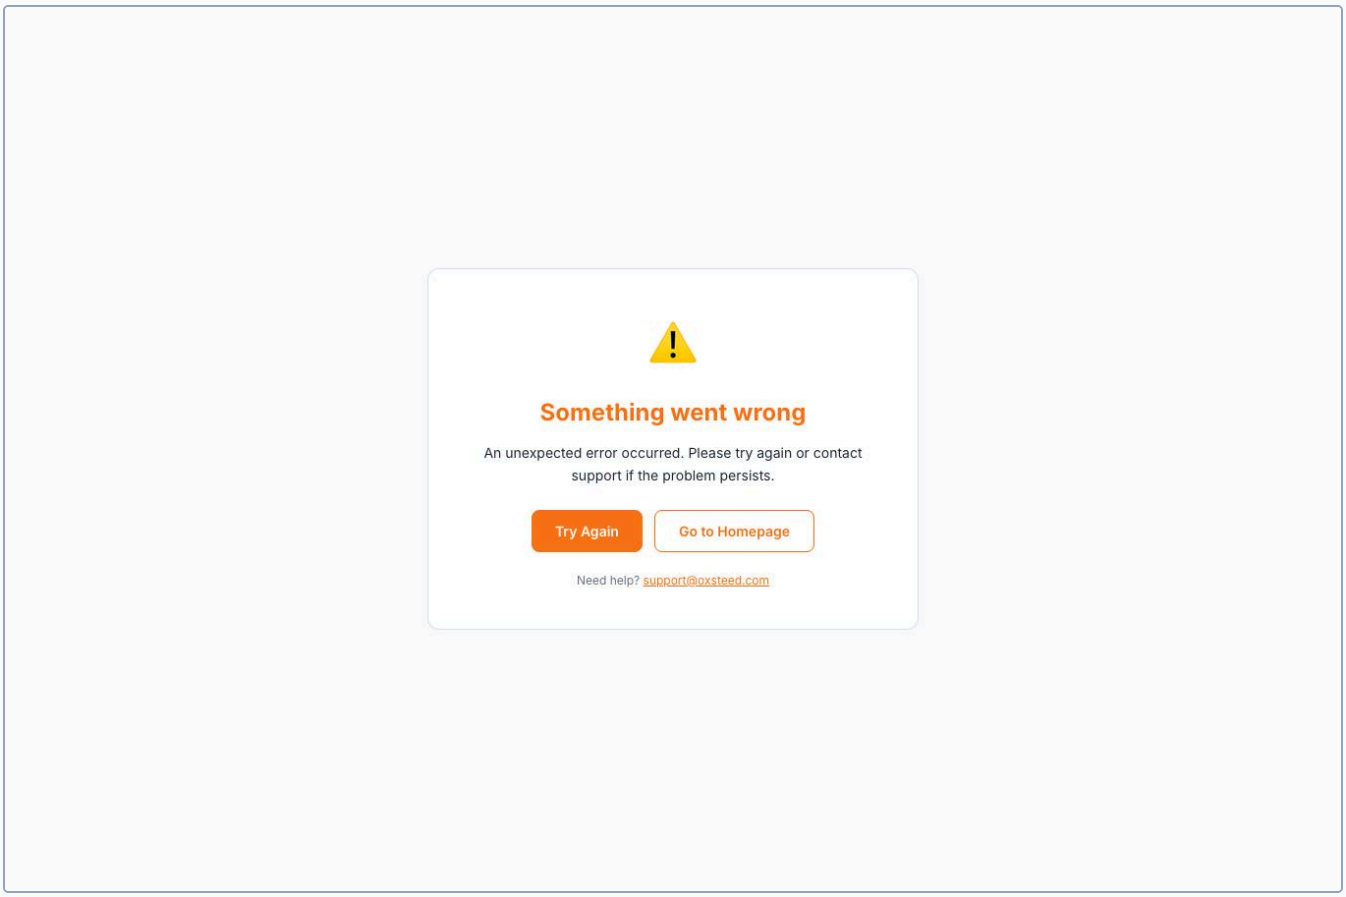

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

The booking moves from Pending to Accepted on /my-bookings and the helper is notified. You can message the helper about the booking from there.

If something goes wrong

Problem	What to do
No slots are available.	The provider's calendar may be full; try different dates, or message the helper to ask about other times.
The booking is declined.	Pick another slot or another helper. The request can also be converted to a public job to collect more options.
You are asked to verify your email or accept terms.	Booking creation requires a verified email and accepted terms; complete those first, then retry.

Need help?

If a confirmed booking has the wrong time or price, contact support from the Help menu or visit /support.

Guide ID: hiring-cancellations | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Cancel a booking or job

Guide ID	**hiring-cancellations**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/cancel-booking

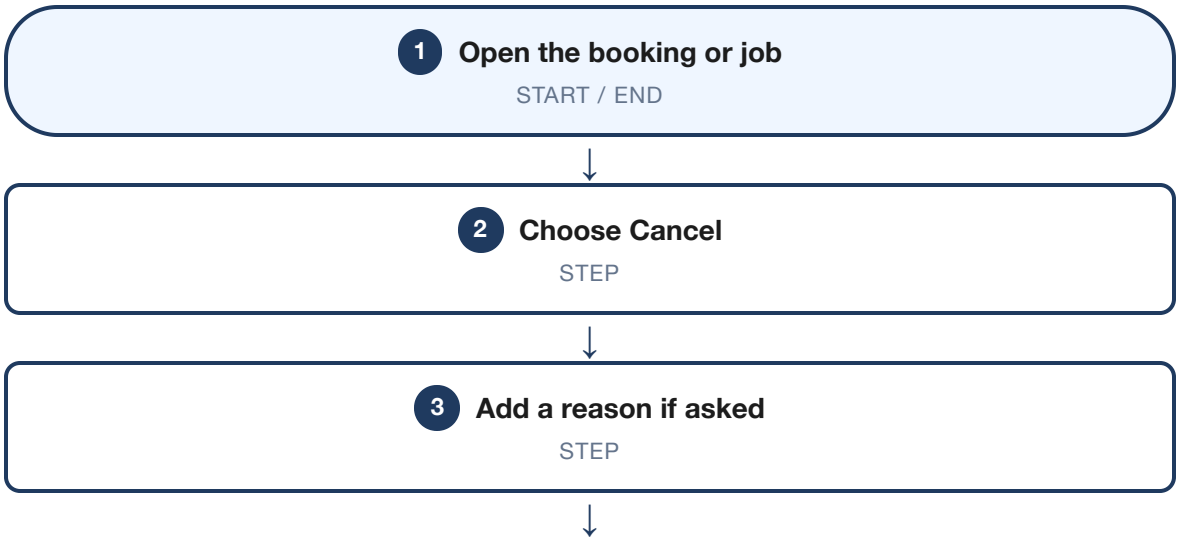

Goal

Cancel a booking or a posted job correctly, understanding what happens to payment and the other party.

Before you start

1. Be signed in to your OxSteed account.
2. Know which booking or job you want to cancel.

Process map

Text version. 1. Find the booking on /my-bookings or the job on /my-jobs. 2. Choose Cancel (helpers use the helper-cancel action on incoming requests). 3. Add a cancellation reason when asked ("Reason for cancellation (optional)"). 4. Confirm; the booking shows the Cancelled status or the job is removed from the listing. 5. The other party is notified. Helpers set their own terms under /settings/payment-policies ("Payment & Cancellation Policies").

Steps

Step 1: Cancel a booking from My bookings

Open /my-bookings and find the booking. Choose Cancel on the booking card and confirm when asked ("Booking request cancelled"). The booking moves to the Cancelled status. Helpers cancel their side with the helper-cancel action on incoming requests.

> **Expected result:** The booking shows the Cancelled status.

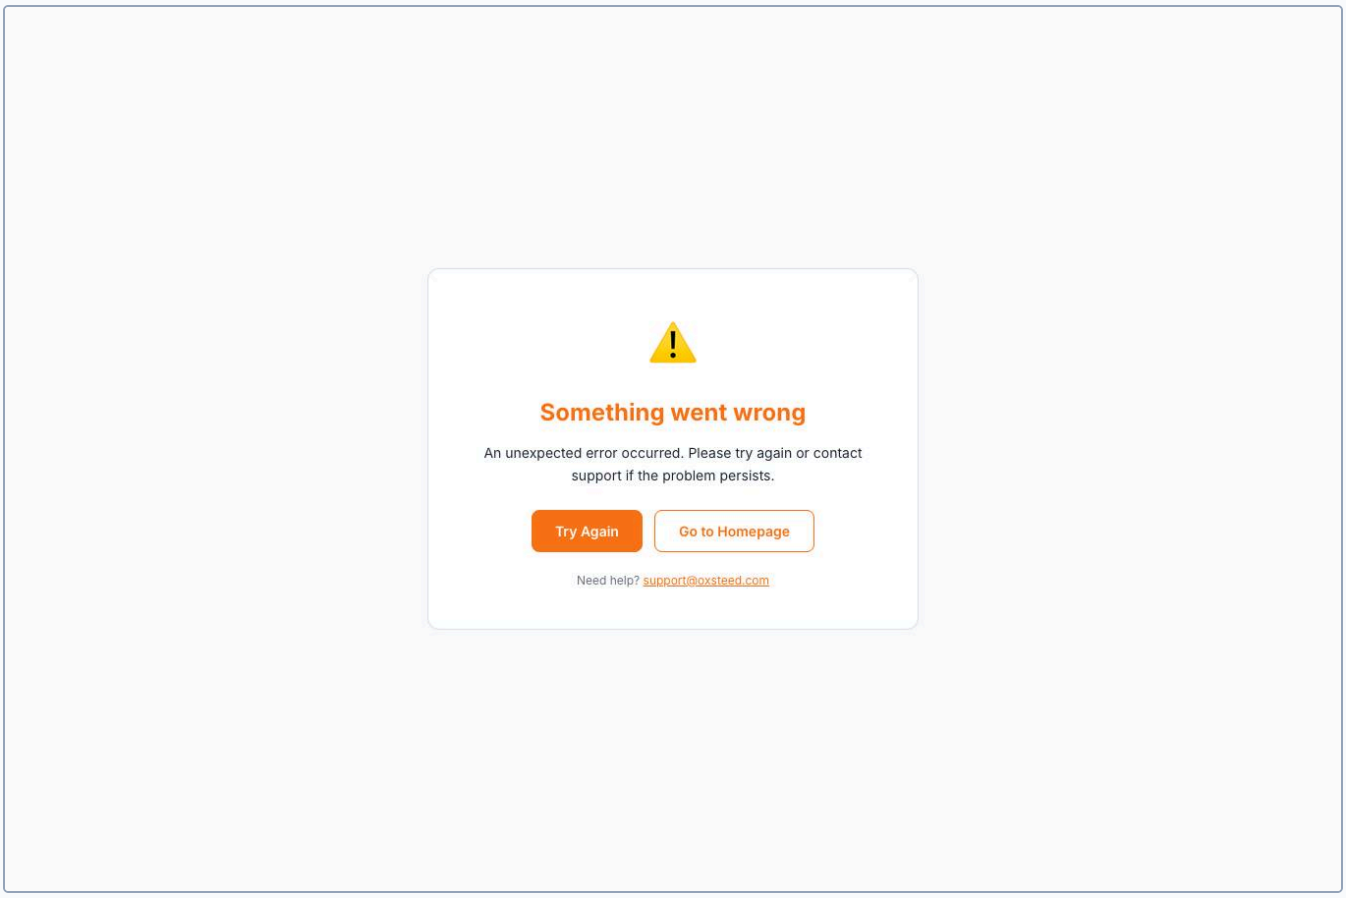

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 2: Cancel a posted job from the job detail page

Open the job on /jobs/:id and choose "Cancel Job". The "Cancel this job?" dialog appears; add a cancellation reason in the "Cancellation reason (optional)" field and confirm ("Cancelling..."). The page warns: "This will remove your job listing. Helpers who bid will be notified."

> **Expected result:** The job is cancelled and bidding helpers are notified.

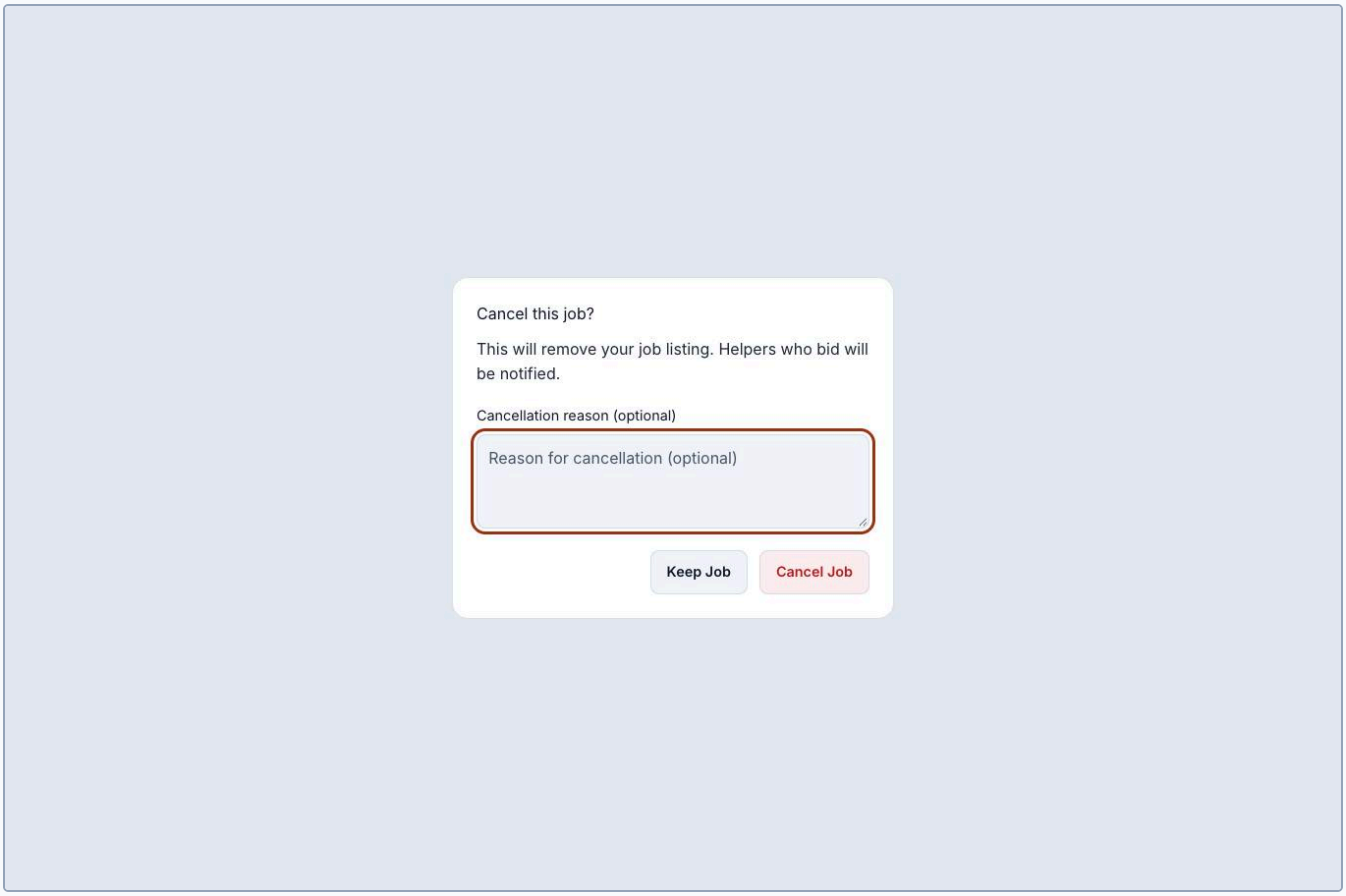

Figure 2. The Cancel this job dialog. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 3: Set your cancellation terms as a helper

Helpers: open /settings/payment-policies, the "Payment & Cancellation Policies" page ("Choose how customers pay you, and what happens when plans change."). Set "Minimum Notice Hours" ("How far ahead a customer must cancel under your terms."), the "Deposit Required (%)" ("Collected upfront when the booking is confirmed."), and enable payment methods: "OxSteed Platform Payment" ("Customers pay via OxSteed with standard cancellation protection") or "Custom Off-Platform Payment" ("Negotiate directly with customers (payment outside OxSteed)"). You must enable at least one payment method.

> **Expected result:** Your policies are saved and customers see your terms when reviewing your bid.

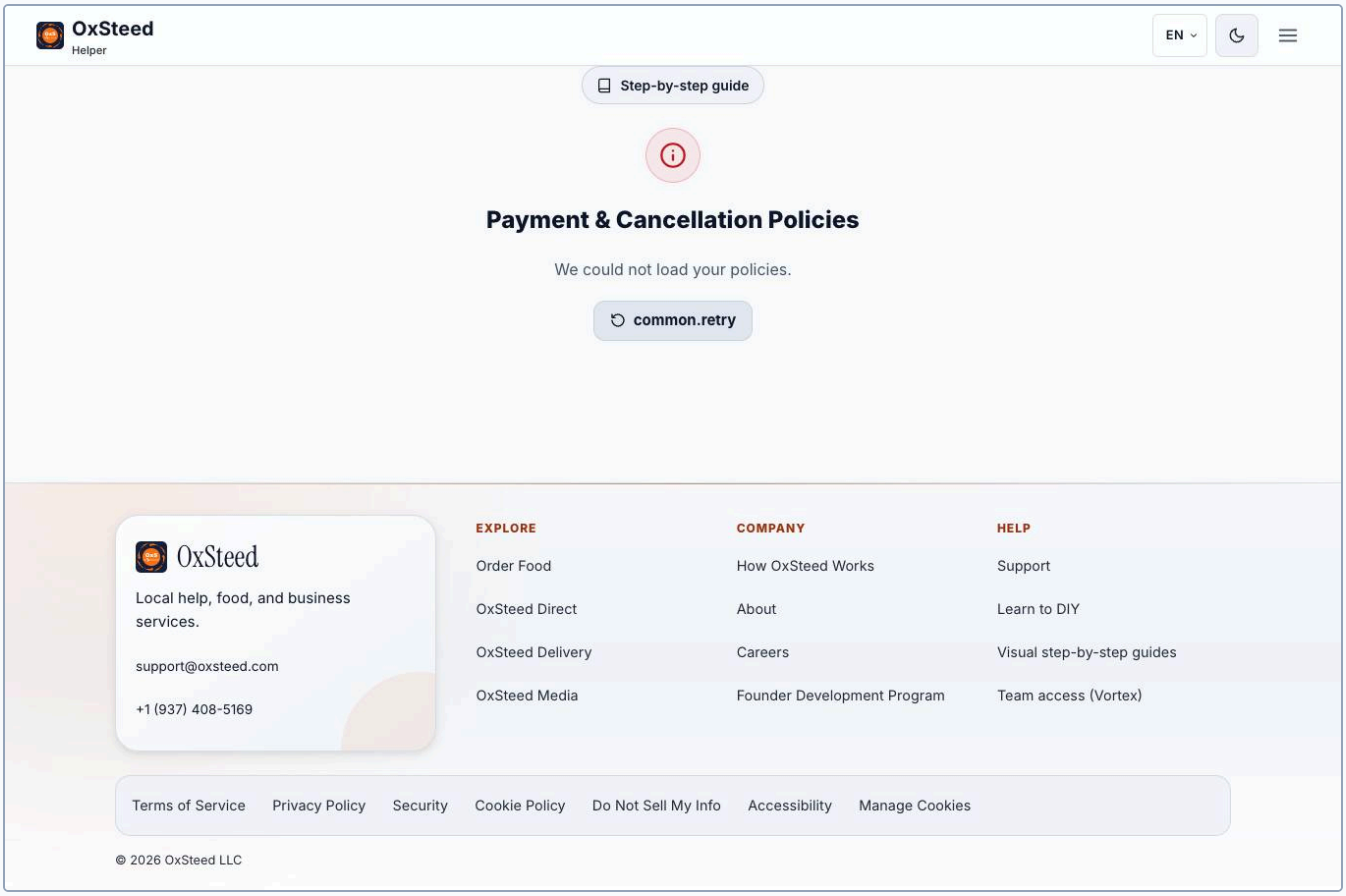

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Payment & Cancellation Policies)*

Confirm it worked

Cancelled bookings show the Cancelled status; cancelled jobs disappear from the open listings. Helpers see their policy terms reflected on their bids.

If something goes wrong

Problem	What to do
Cancellation is blocked or fails.	Some states (for example already completed or in dispute) block cancellation. Check the current status; open a dispute or contact support if money is already involved.
You cancelled by mistake.	Cancellations are final. Rebook the same helper or repost the job; your history keeps the original details.

Need help?

If a cancellation leaves payment in the wrong state, contact support from the Help menu or visit /support.

Guide ID: hiring-compare-bids | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Compare bids on a job

Guide ID	**hiring-compare-bids**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/compare-bids

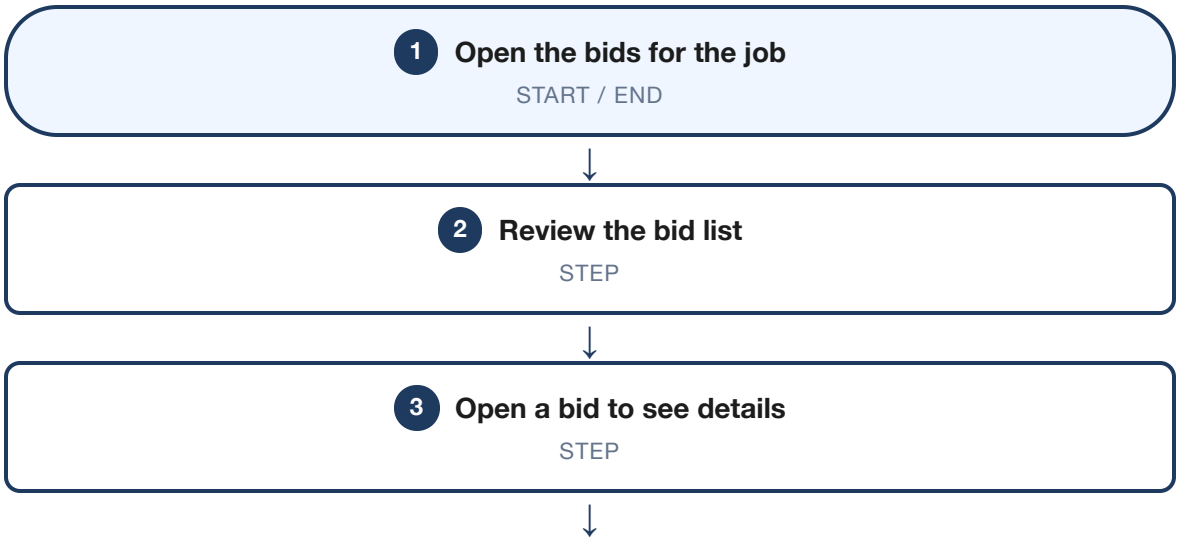

Goal

Compare the bids on your job and accept the right one; or, as a helper, track your own bids.

Before you start

1. Be signed in to your OxSteed account.
2. Have a job with bids posted.

Process map

- *No:* Found the right bid? → Wait for more bids or decline
- *More bids arrive:* Wait for more bids or decline → Review the bid list

Text version. 1. On the job detail page, open the "Bids" section (or choose "Review bids"). 2. Scan the bids: amount, ETA, location, and the helper's message. 3. Choose "View Bid" on a bid to open its "Bid Details" page. 4. If the bid is right, choose "Accept Bid". Helpers can track and manage their own bids on the "My Bids" page, including "Withdraw". 5. The accepted bid assigns the job to that helper.

Steps

Step 1: Open the bids on your job

Open your job (/jobs/:id) and scroll to the "Bids" heading. Each bid shows the amount, the ETA, the location, and the helper's message ("Message"). Choose "Review bids" to focus on the bid list.

> **Expected result:** All bids on the job are listed with their amounts and statuses.

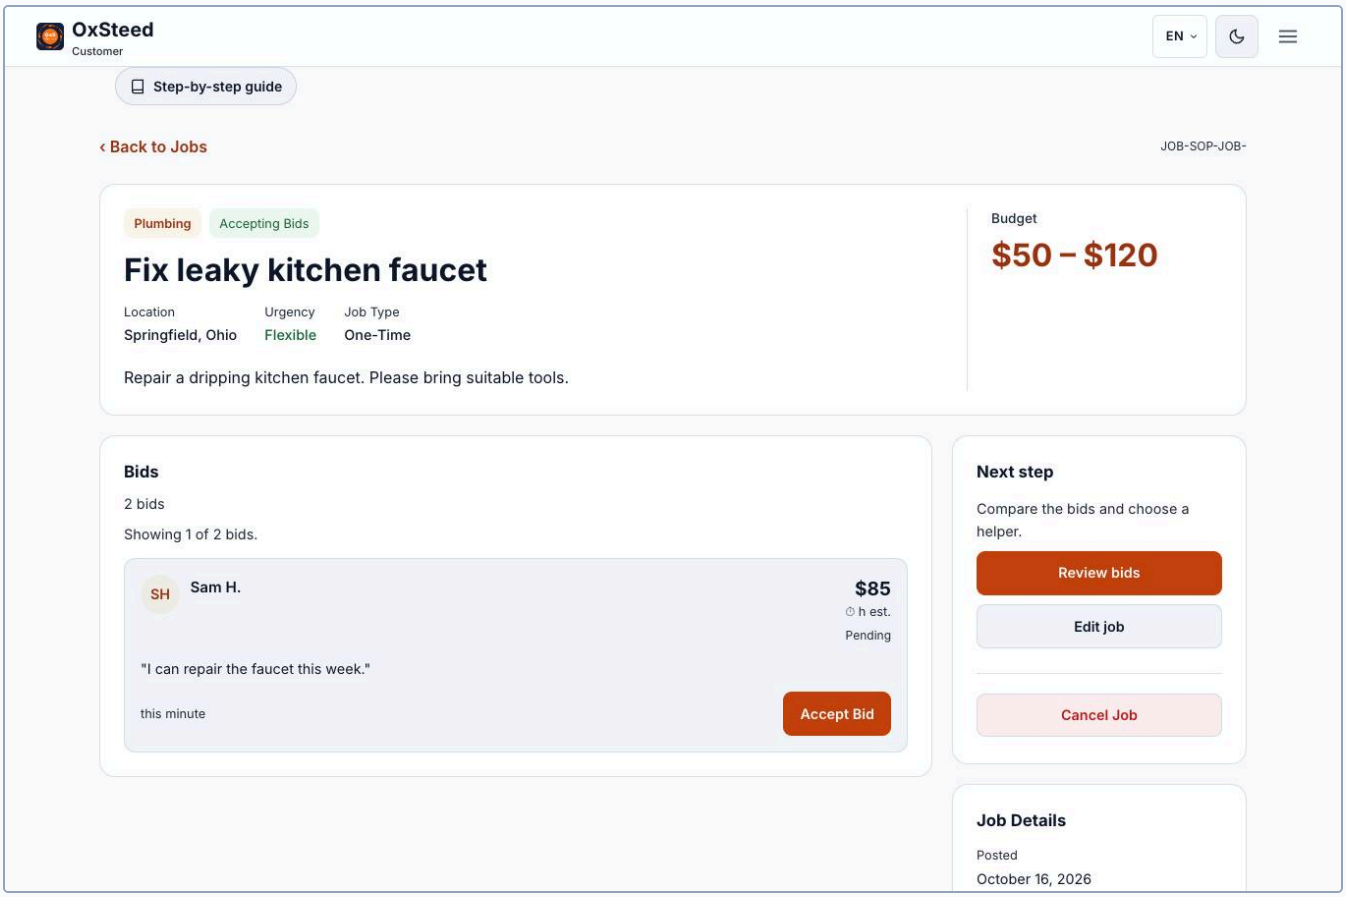

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 2: Open a bid to read the full details

Choose "View Bid" on a bid to open its "Bid Details" page (/bids/:bidId). It shows the Amount, ETA, Location, Submitted time, the helper's message, and the "Next step" panel. Helpers see the same page for their own bids and can "Withdraw" a pending bid ("Are you sure you want to withdraw this bid?").

> **Expected result:** The full bid detail loads with the helper profile link.

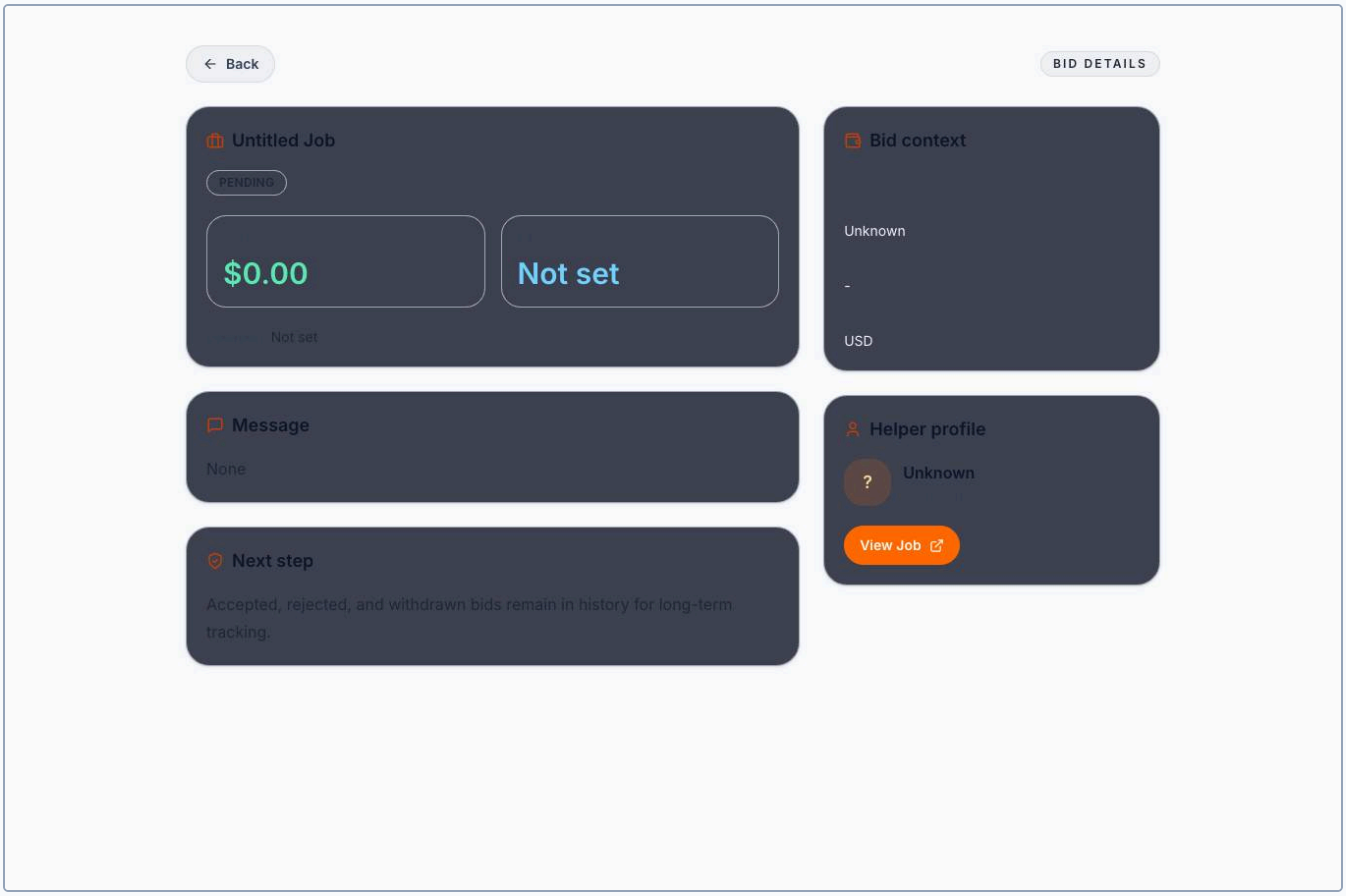

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Bid Details page with amount, ETA, and message)*

Step 3: Accept the winning bid

On the bid or the job detail page, choose "Accept Bid". The bid moves to "Accepted" and the job is assigned to that helper. The "Next step" panel explains: "This bid has been accepted. Continue through the booking and job workflow." Other bids can be declined or left; accepted, rejected, and withdrawn bids remain in history for tracking.

> **Expected result:** The bid shows as accepted and the job is assigned to the helper.

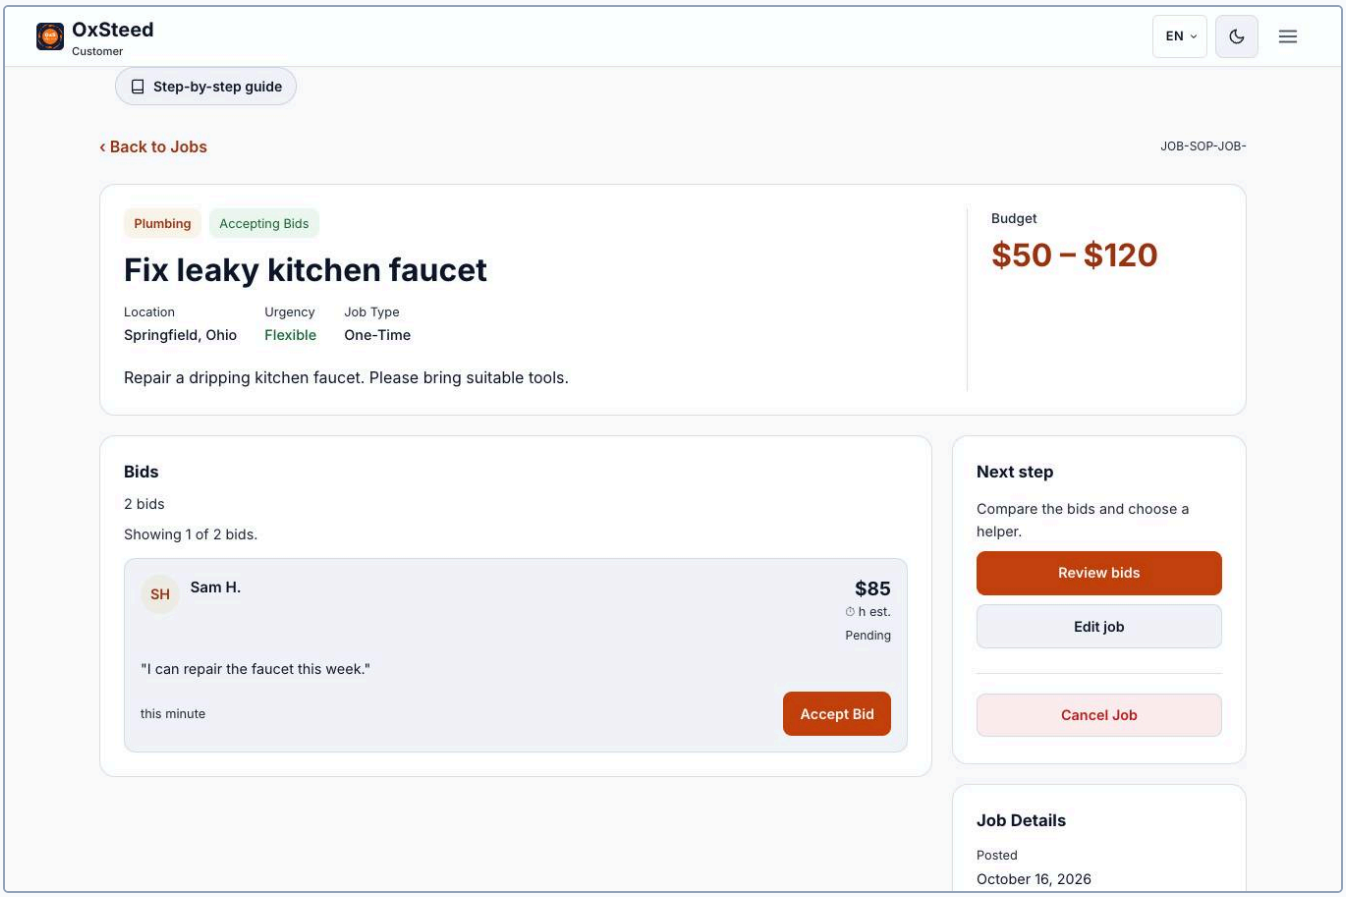

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Confirm it worked

The accepted bid shows "Accepted" and the job moves to its assigned state. Helpers see the same status on the My Bids page ("My Bids", "Track the status of all your bids").

If something goes wrong

Problem	What to do
A bid expired before you accepted it.	Expired bids show "This bid has expired." Ask the helper to submit a fresh bid, or choose another bid.
A bid needs reconfirmation.	If you edited the job after the bid arrived, the helper must choose "Reconfirm my bid" first; wait for the "Awaiting reconfirmation" state to clear.

Need help?

If a bid is stuck or acceptance fails, contact support from the Help menu or visit /support.

Guide ID: hiring-completion | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Mark a job complete

Guide ID	**hiring-completion**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/mark-job-complete

Goal

Confirm a finished job so payment releases, reviews unlock, and the record closes.

Before you start

1. Be signed in to your OxSteed account.
2. The work itself must be finished and checked.

Process map

4 Job completed; reviews unlock

START / END

- Open the finished job → Helper chooses Mark job done
- Helper chooses Mark job done → Other party confirms?
- *No response:* Other party confirms? → Auto-confirm after no response
- Auto-confirm after no response → Job completed; reviews unlock

Text version. 1. Open the finished job on /my-jobs or /jobs/:id. 2. Customers choose "Mark as Complete"; helpers choose "Mark job done". 3. The other party confirms. If the customer does not respond, it confirms automatically after the waiting period ("You marked this job done. Waiting for the customer to confirm; it confirms automatically if they don't respond."). 4. Completion shows "Job completed successfully" and unlocks reviews. 5. Work agreements have their own completion: open /agreements/:id and choose "Confirm complete"; both parties confirm before the agreement is marked complete.

Steps

Step 1: Open the finished job

Open /my-jobs and choose the job, or open /jobs/:id directly. Make sure the work is actually finished: completion triggers payment release and review eligibility.

> **Expected result:** The job detail shows the completion action for your role.

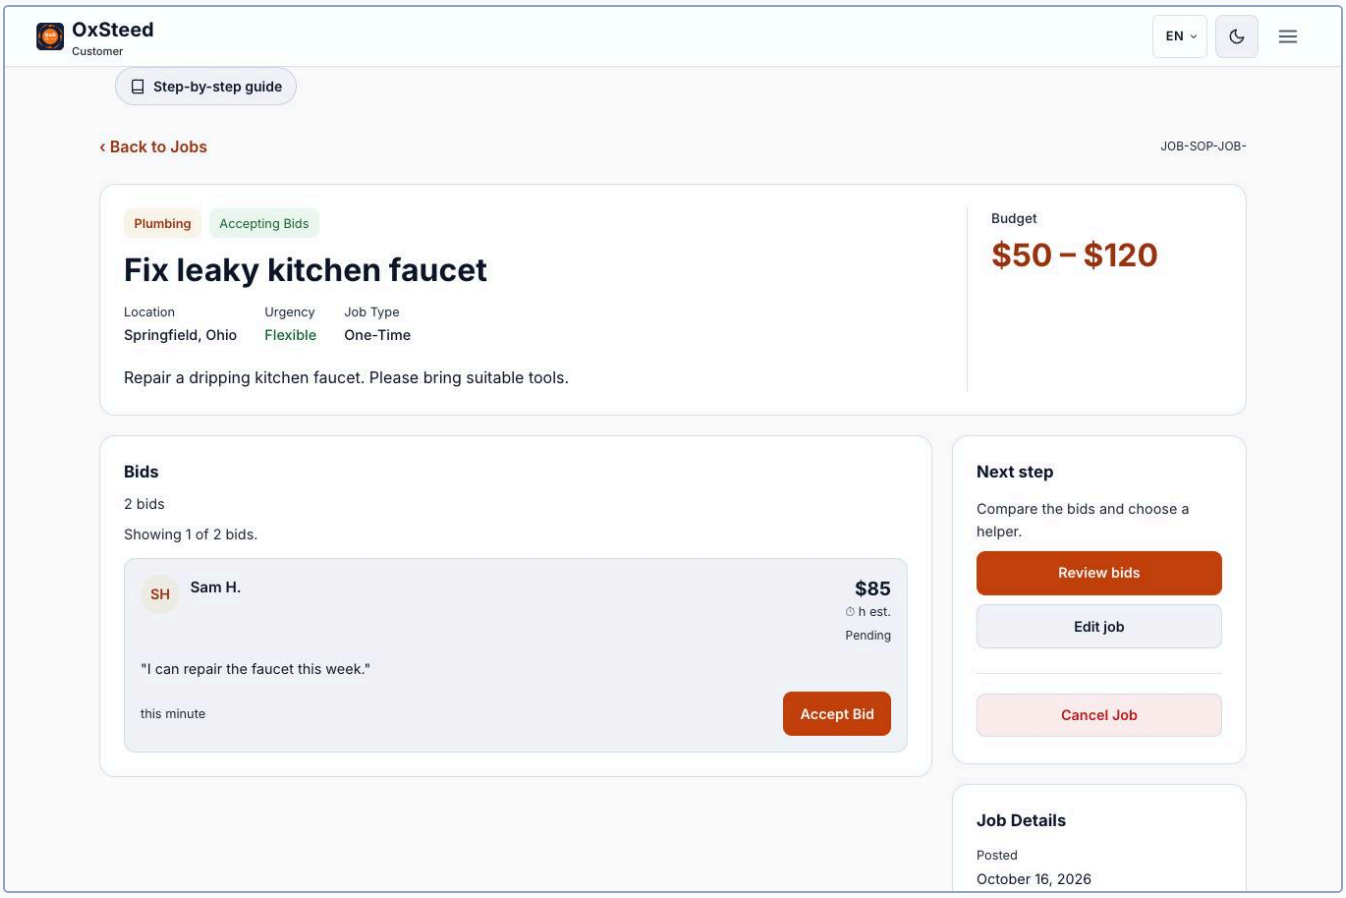

Figure 1. The finished job with the completion action. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 2: Mark the job complete and wait for confirmation

Customers choose "Mark as Complete"; helpers choose "Mark job done". The page confirms: "Job completed successfully", or, for the helper side, "You marked this job done. Waiting for the customer to confirm; it confirms automatically if they don't respond." Do not mark complete until the work is checked.

> **Expected result:** The job shows as completed (or pending the other party's confirmation).

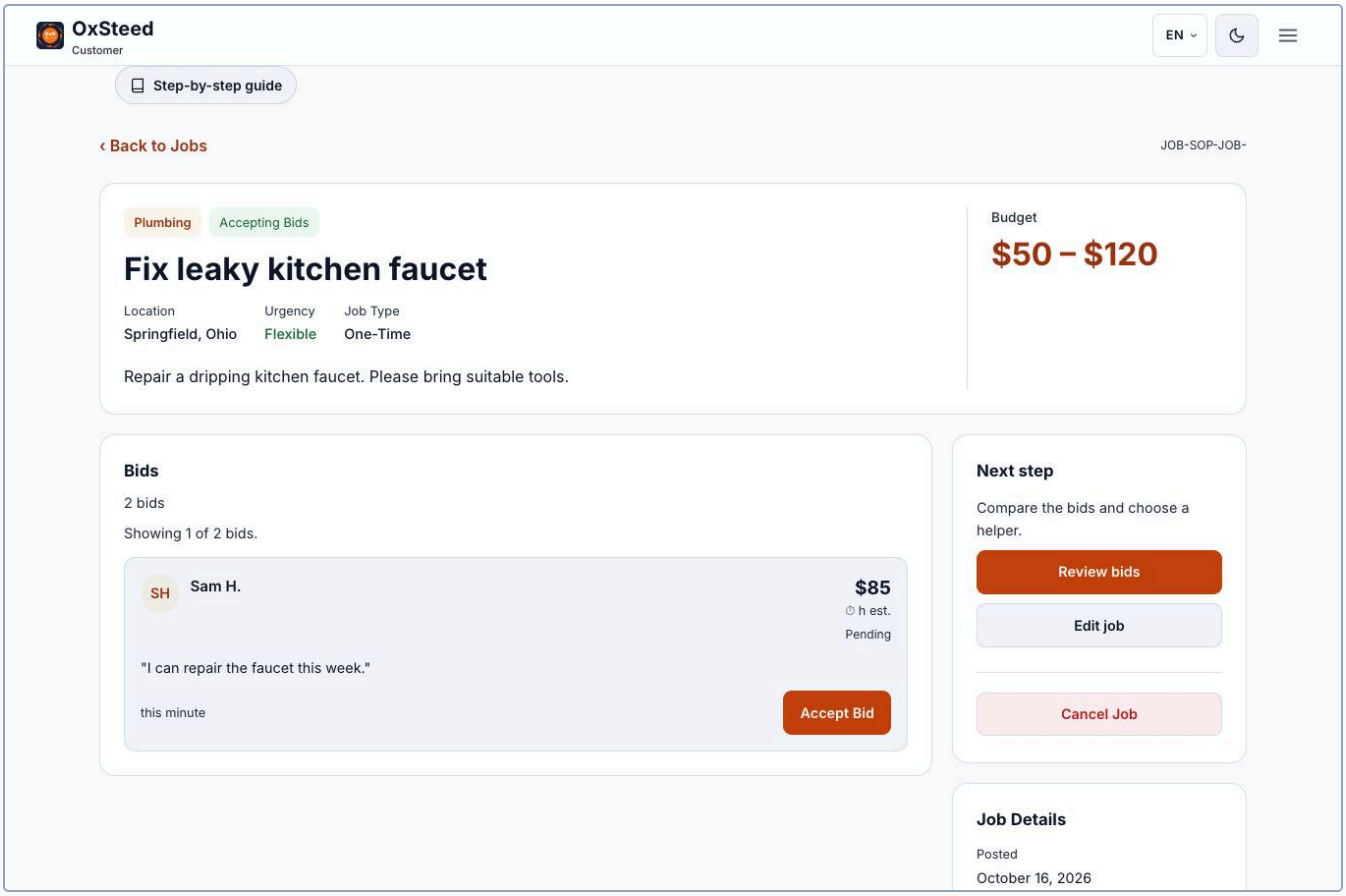

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 3: Complete the work agreement if one exists

If the job has a signed work agreement, completion is a separate step: open /agreements/:id, find the "Work finished?" section, and choose "Confirm complete". The agreement notes: "Both of you confirm before the agreement is marked complete." Once both confirm, held payment is released unless open issues remain.

> **Expected result:** The agreement shows as complete and payment releases to the helper.

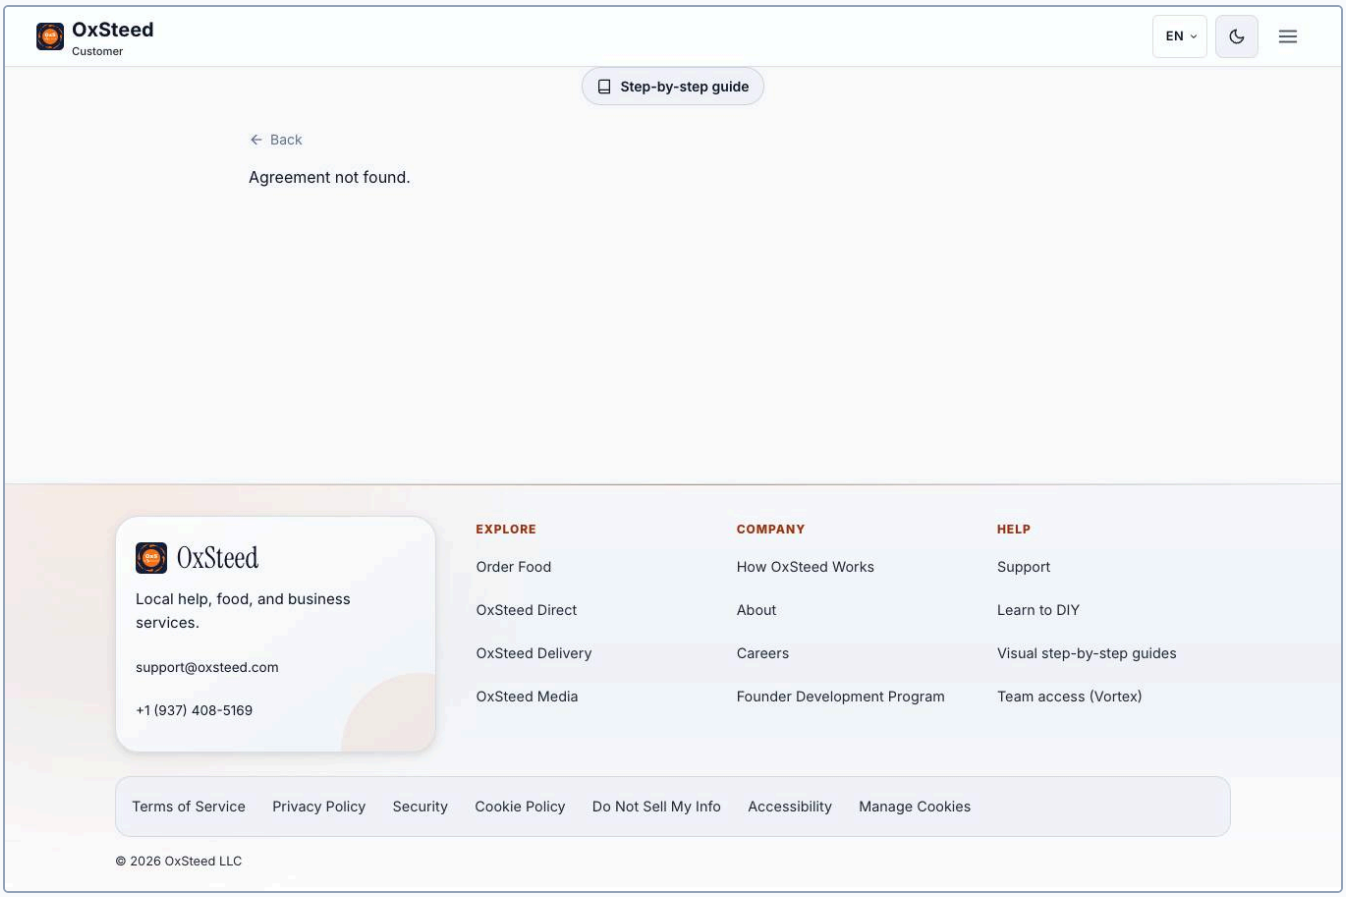

Figure 3. Completing the work agreement. *(Image description: Work agreement page with the Confirm complete button)*

Confirm it worked

The job shows the completed status and review eligibility opens. For agreements, both parties see the completed state and "Payment released to the helper."

If something goes wrong

Problem	What to do
The job will not mark complete.	Only the parties on the job can complete it, and some states (for example cancelled) block completion. Check the job status and your role first.
Payment is still held after agreement completion.	That is by design when open issues remain: "The agreement is complete, but the job payment is still held. It will be released once any open issues are resolved." Resolve the issues or open a dispute.

Need help?

If completion is blocked by a state you cannot change, contact support from the Help menu or visit /support.

Guide ID: hiring-disputes | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Open and manage a dispute

Guide ID	**hiring-disputes**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/open-dispute

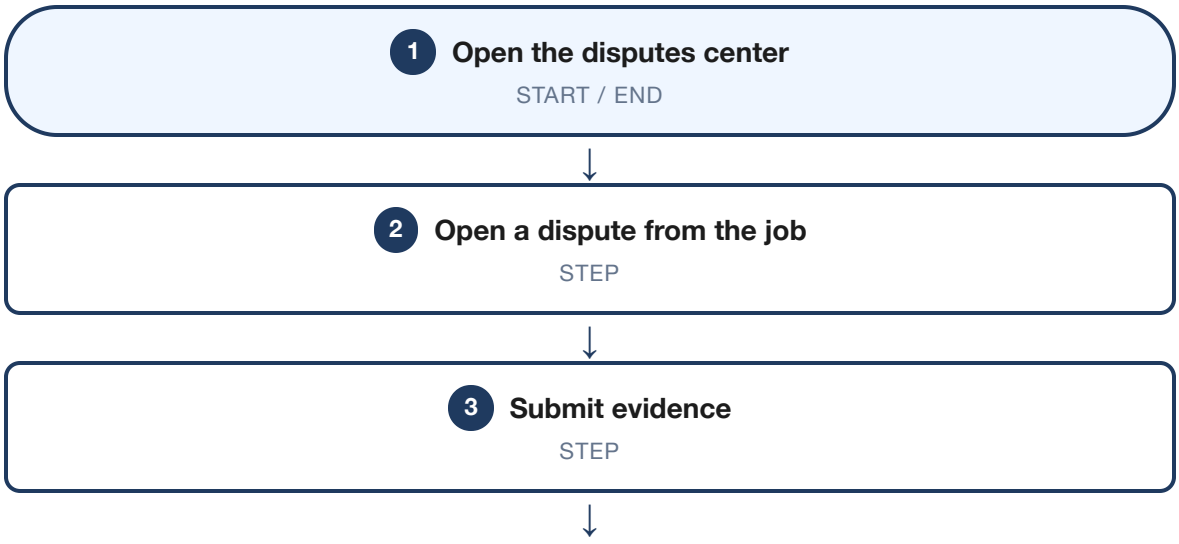

Goal

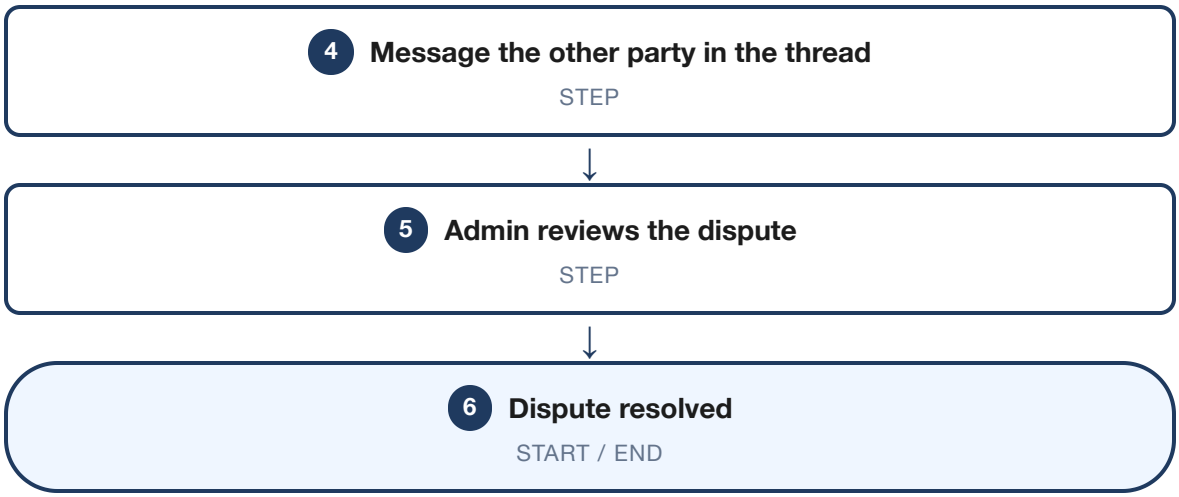

Open a dispute on a job, preserve evidence, and message the other party until it resolves.

Before you start

1. Be signed in to your OxSteed account.
2. Try to clarify the scope in messages first; disputes work best with a written record.

Process map

Text version. 1. Open /disputes ("Trust and resolution center") and choose "Open a dispute from a job". 2. Pick the job and describe the issue. 3. Add evidence on the dispute detail page: the "Evidence ({{count}})" section with "Submit Evidence" and "Attach files (images, videos, documents - max 5)". 4. Use the "Messages" thread ("Type a message...") to discuss with the other party so support can follow the record. 5. When the evidence window closes ("Evidence window closed. Awaiting admin review."), an admin reviews and the dispute resolves.

Steps

Step 1: Open a dispute from the job

Open /disputes, the "Trust and resolution center". Your disputes are listed with Open and In review stats. Choose "Open a dispute from a job" (or "Open a dispute" on the job detail page), pick the job, and describe the issue. Before opening, the empty state reminds you to clarify scope in messages and to save photos, receipts, and time details.

> **Expected result:** The dispute is created and opens on its detail page.

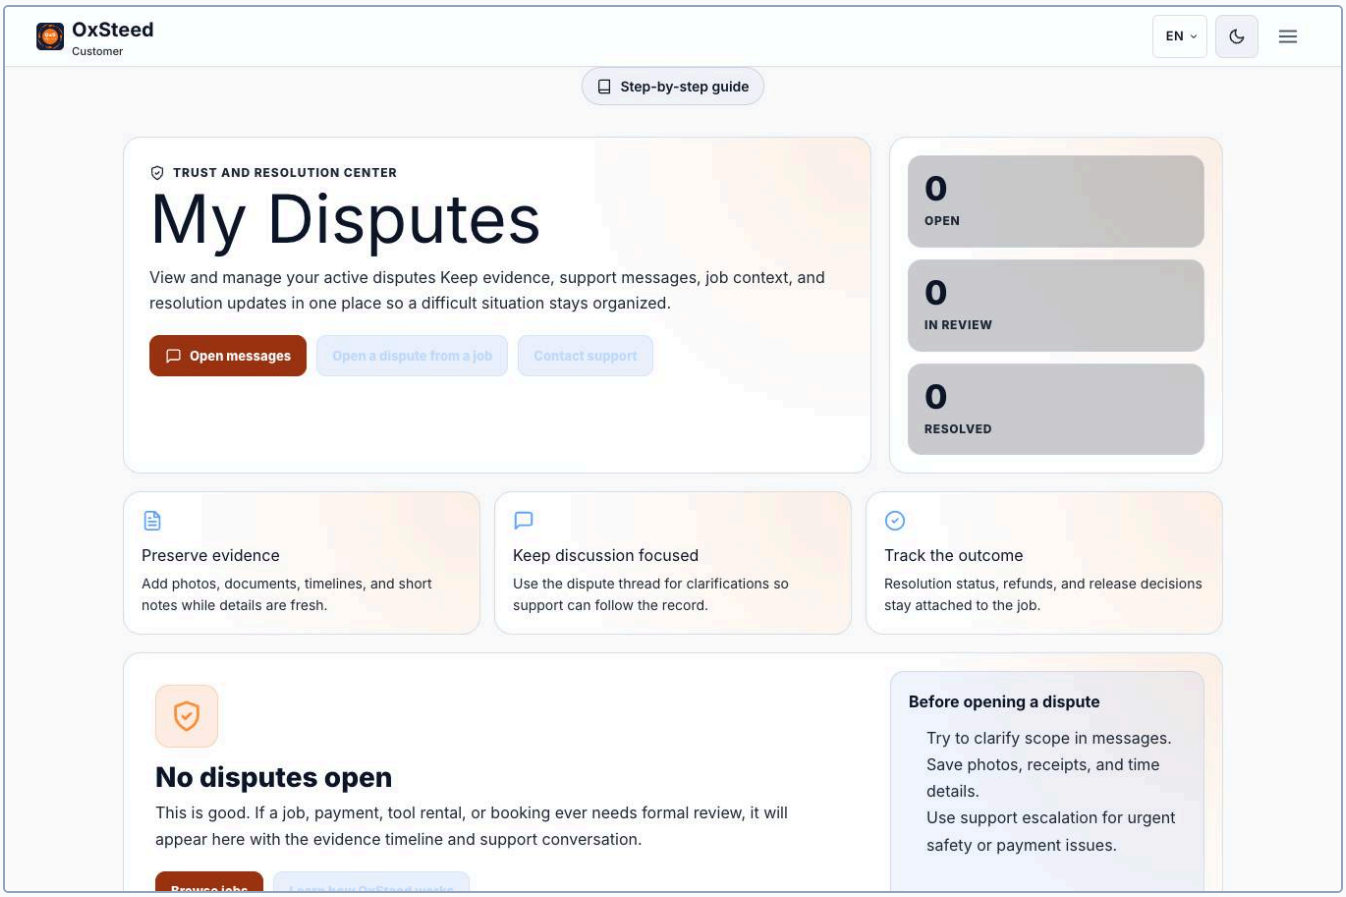

Figure 1. The dispute center, desktop view. *(Image description: Synthetic example: My Disputes)*

Step 2: Submit evidence while the window is open

On the dispute detail page (/disputes/:id), find the "Evidence ({{count}})" section. Describe what happened in the evidence box ("Describe what happened, provide context, links, or any relevant information...") and add up to 5 files with "Attach files (images, videos, documents - max 5)". Choose "Submit Evidence". You must provide text or files; empty submissions are rejected.

> **Expected result:** Your evidence appears in the Evidence section with a count.

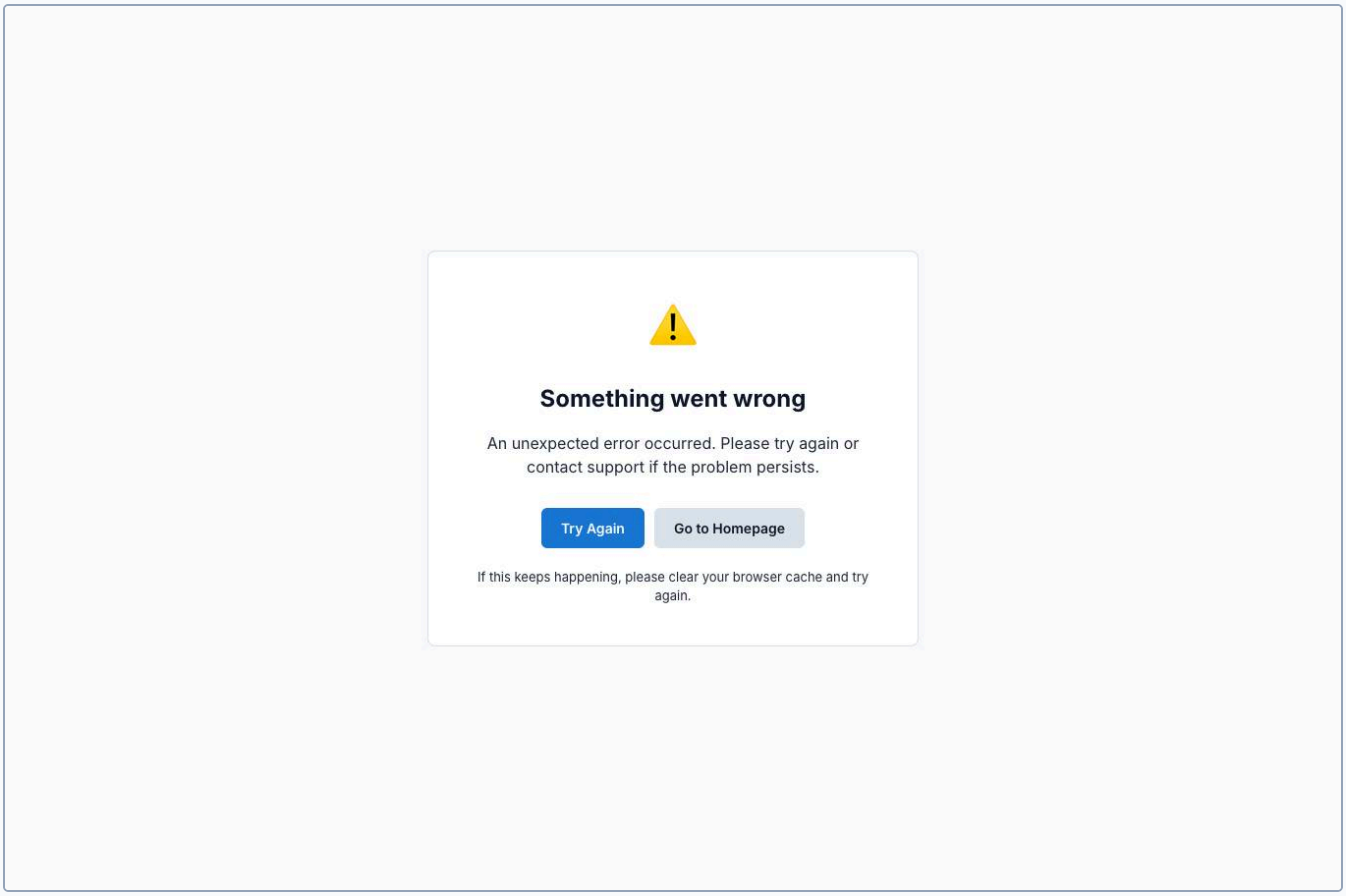

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 3: Keep the discussion in the dispute thread

Use the "Messages" section on the dispute detail page ("Type a message...") for all discussion with the other party. Keeping the discussion focused here (not in scattered chats) lets support follow the record. "Open messages" jumps to the thread from the center.

> **Expected result:** Messages appear in the dispute thread for both parties and support to see.

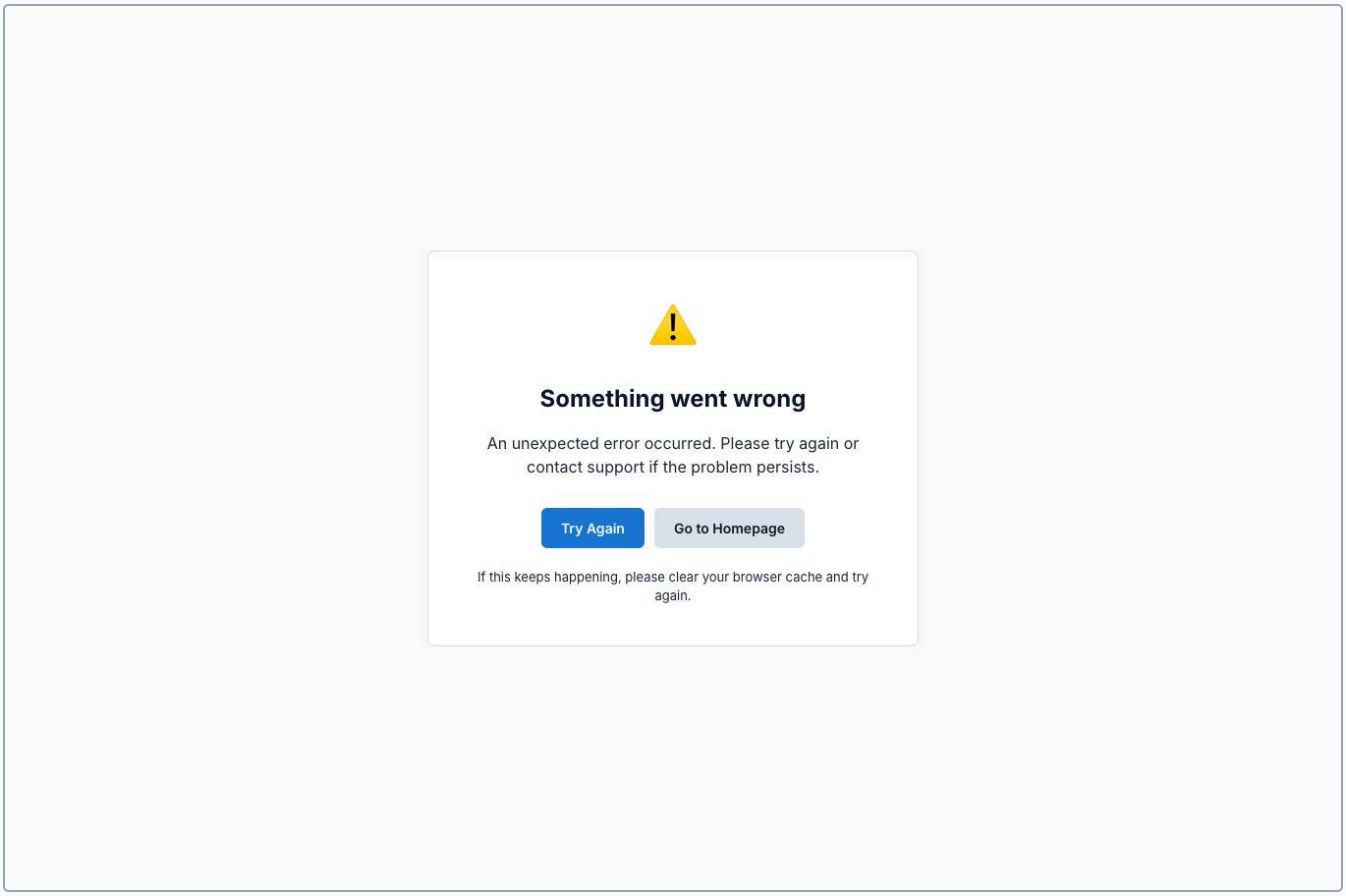

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

The dispute shows its status in the center (Open, then In review). When resolved, the outcome, refunds, and release decisions stay attached to the job.

If something goes wrong

Problem	What to do

You cannot add more evidence.	The evidence window may be closed ("Evidence window closed. Awaiting admin review."). Add new facts as messages instead.
The other party will not engage.	Admin review proceeds on the record you built. For urgent safety or payment issues, also use support escalation at /support/escalation.

Need help?

For urgent safety or payment issues, use the support escalation page at /support/escalation alongside the dispute.

Guide ID: hiring-find-help | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Find helpers and services

Guide ID	**hiring-find-help**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/find-helpers

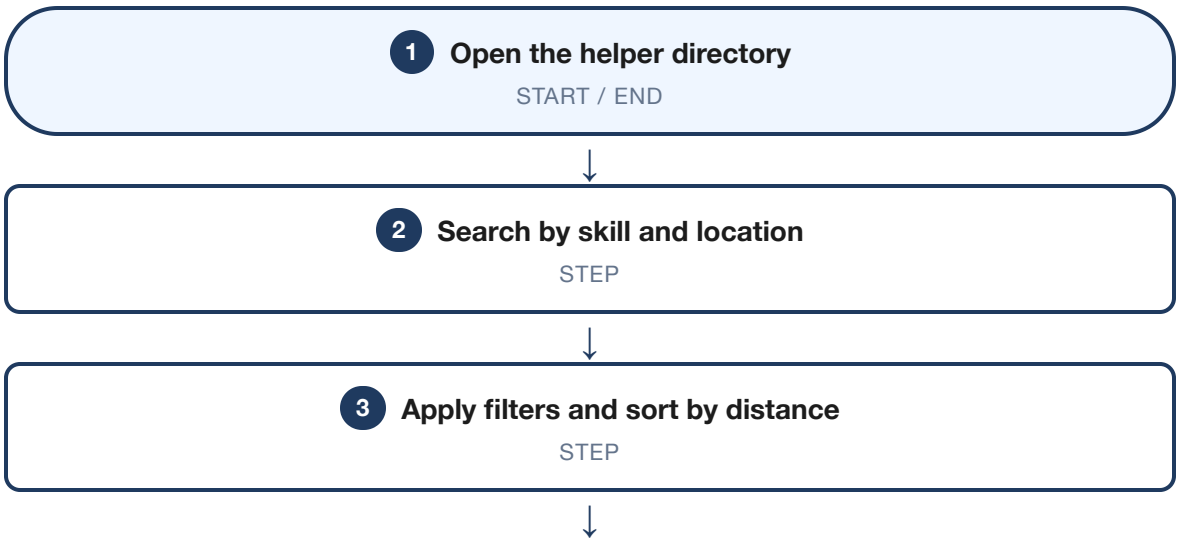

Goal

Find a skilled local helper by searching the helper directory and reviewing their public profile.

Before you start

1. Know the service you need and your ZIP code.

Process map

- *No:* Helper fits? → Try another helper or widen filters
- Try another helper or widen filters → Open a helper profile and review it

Text version. 1. Open the helper directory (/helpers). 2. Search with the hero search box ("Try 'lawn mowing', 'electrician', or 'deep clean'..."). 3. Open "Filters", add your ZIP code in the sidebar to sort by distance, and clear filters with "Clear" when needed. 4. Open a helper's public profile at /helpers/:id and review services, reviews, and response stats. 5. If the helper fits, use "Book Now" to request a time, "Message Helper" to ask questions, or post a job for everyone.

Steps

Step 1: Open the helper directory and search

Open /helpers. The page heading is "Find a skilled local helper" with the subtitle "Browse background-checked, licensed, and insured helpers. Book in minutes - satisfaction guaranteed." Type the service into the hero search box (placeholder "Try 'lawn mowing', 'electrician', or 'deep clean'..."). Browsing is free for guests; sign-in is required later to book.

> **Expected result:** Matching helpers appear below the search with a count like "{{count}} helpers found".

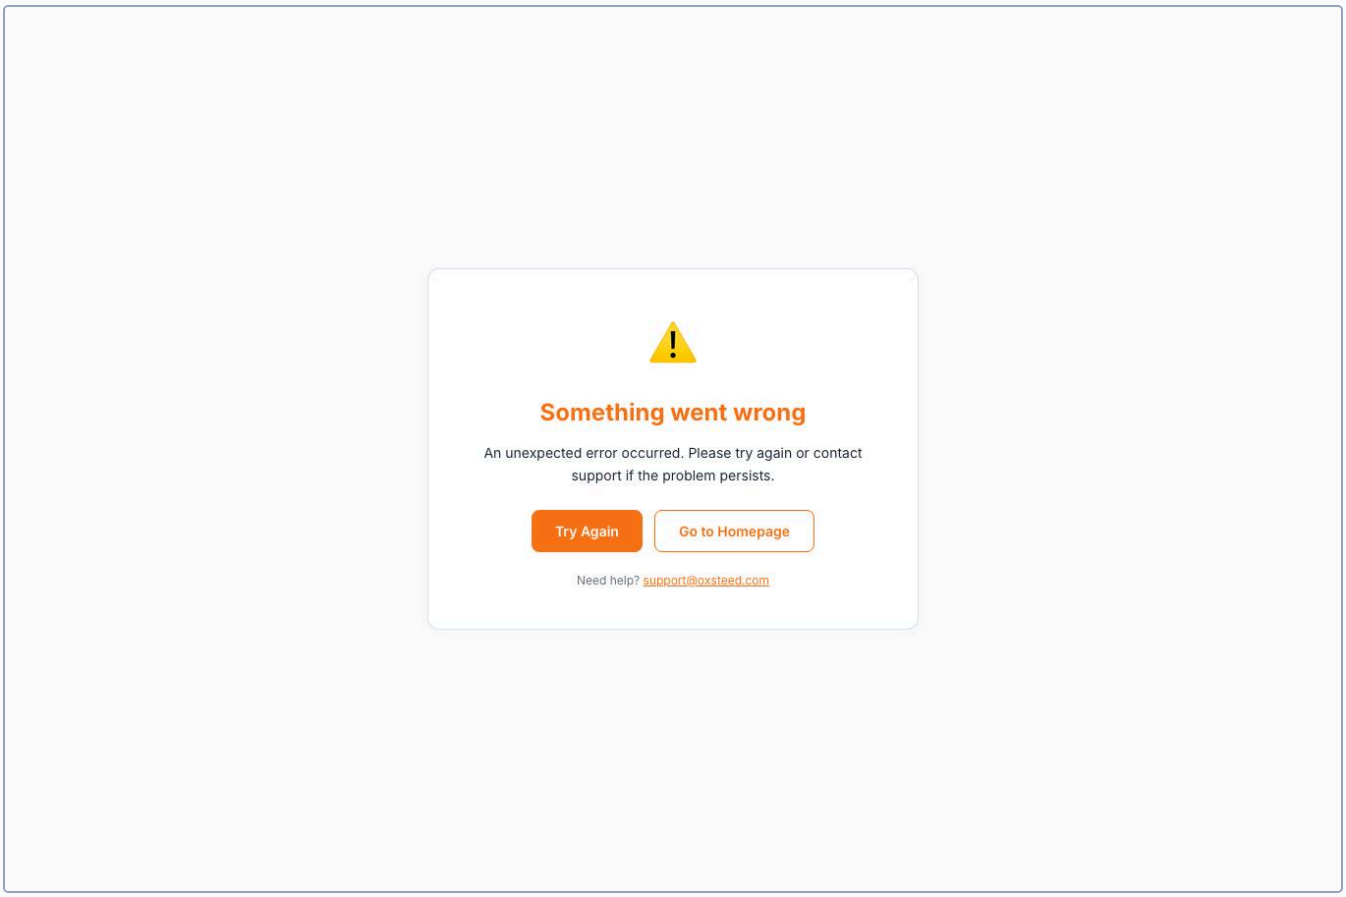

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 2: Filter and sort the results

Choose "Filters" to narrow by skill ("Browse by skill") or job ("Filter by specific job:"). Add your ZIP code in the sidebar hint area ("Add your ZIP code in the sidebar to sort helpers by distance from you.") so the closest helpers come first. Use "Show results" to apply and "Clear" to reset.

> **Expected result:** The list refreshes with helpers matching your filters, sorted by distance.

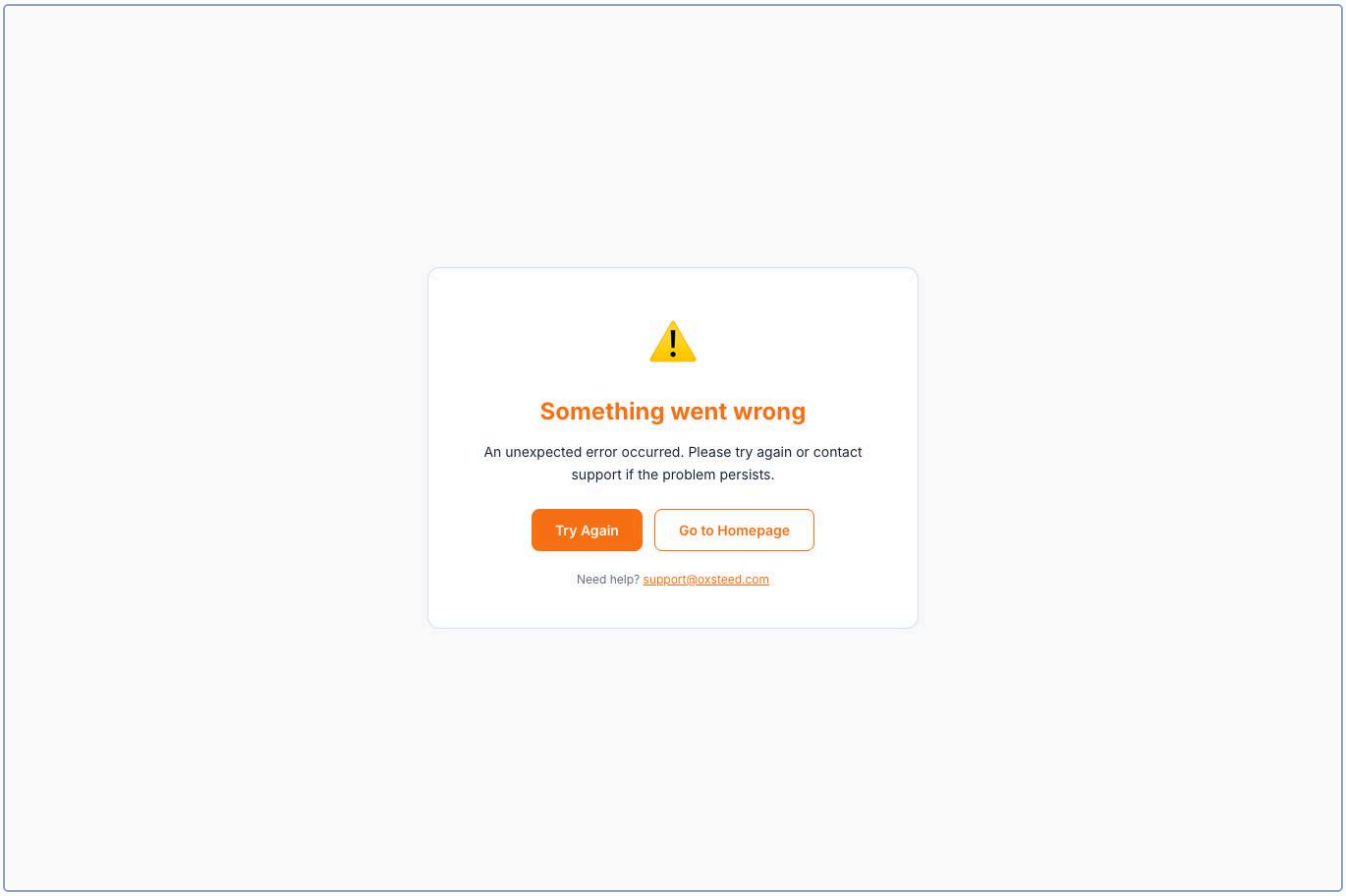

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 3: Open a helper profile and review it

Choose a helper card to open the public profile at /helpers/:id. Review the services and pricing ("starting from"), the reviews and rating, trust signals (background checked, response rate, jobs completed), and the FAQs. The profile is public, so you can share the link with others.

> **Expected result:** The profile shows the helper's services, reviews, and availability signals.

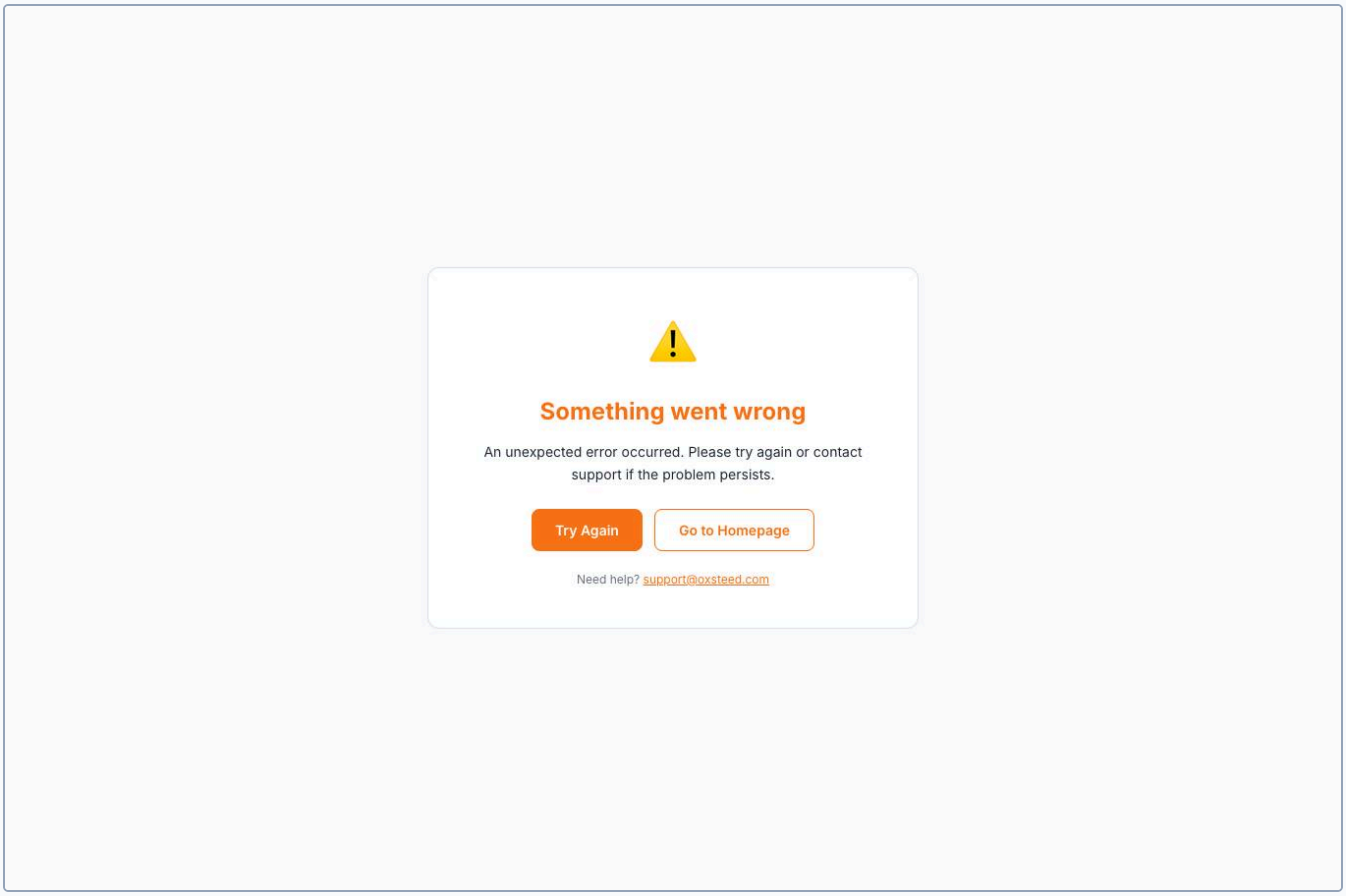

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 4: Book, message, or save the helper

When the helper fits, choose "Book Now" in the hero to start a booking, or "Message Helper" to ask a question first. Use the save control to keep the helper for later. Booking and messaging require sign-in; you will be asked to sign in if you are a guest.

> **Expected result:** The booking flow starts, or a message thread opens with the helper.

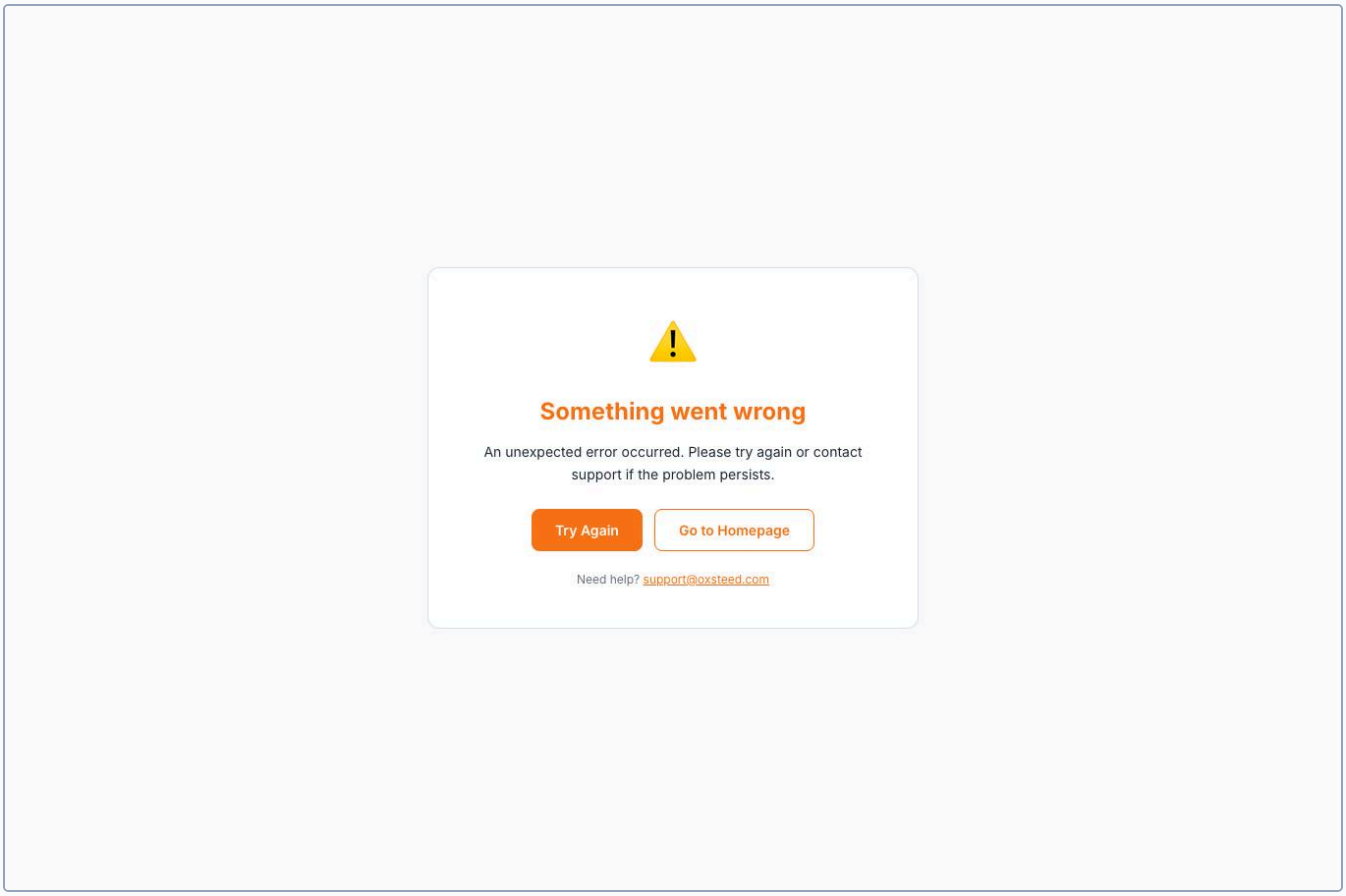

Figure 4. The profile call-to-action buttons. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

The profile you chose shows verified reviews and clear services. Starting a booking or a message thread confirms you picked the right helper.

If something goes wrong

Problem	What to do

No helpers appear for your search.	Widen the filters: remove the ZIP code, choose "Clear", or search a broader skill term. You can also browse the Direct catalog of OxSteed-operated services.
You are asked to sign in when you choose Book Now.	Sign in or create an account first; guests can browse but booking requires an account.

Need help?

For help finding a service, contact support from the Help menu or visit /support.

Guide ID: hiring-manage-jobs | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Manage posted jobs

Guide ID	**hiring-manage-jobs**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/manage-jobs

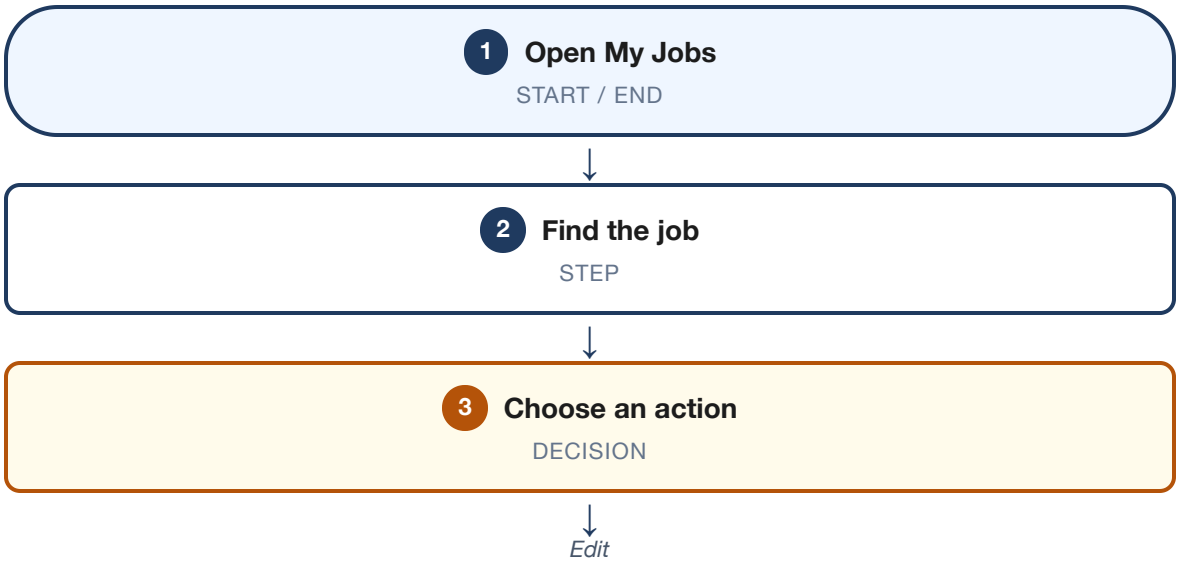

Goal

Track, edit, reschedule, cancel, or complete the jobs you posted.

Before you start

1. Be signed in with the Customer mode active.
2. Have at least one posted job.

Process map

- *Assign:* Choose an action → Review bids and assign a helper
- *Cancel:* Choose an action → Cancel the job with a reason
- *Complete:* Choose an action → Mark the job complete
- Review bids and assign a helper → Job updated
- Cancel the job with a reason → Job updated
- Mark the job complete → Job updated

Text version. 1. Open "My Jobs" (/my-jobs). 2. Find the job in the list (tabs include "Assigned to me"). 3. Open the job detail page (/jobs/:id). 4. Choose what to do: "Edit job" to change the details, "Review bids" to compare bids and assign, "Cancel Job" to cancel with an optional reason, or "Mark as Complete" when the work is done. 5. Confirm any dialog; the job status updates.

Steps

Step 1: Open My Jobs and find the job

Choose "My Jobs" in the navigation, or open /my-jobs directly. The page heading is "My Jobs" with "Post a New Job" for new posts. Find your job in the list; tabs include "Assigned to me" ("Jobs you were hired for"). If you have no jobs yet, the empty state shows "No jobs posted yet." and "Post Your First Job".

> **Expected result:** Your posted jobs are listed with their status and bid counts.

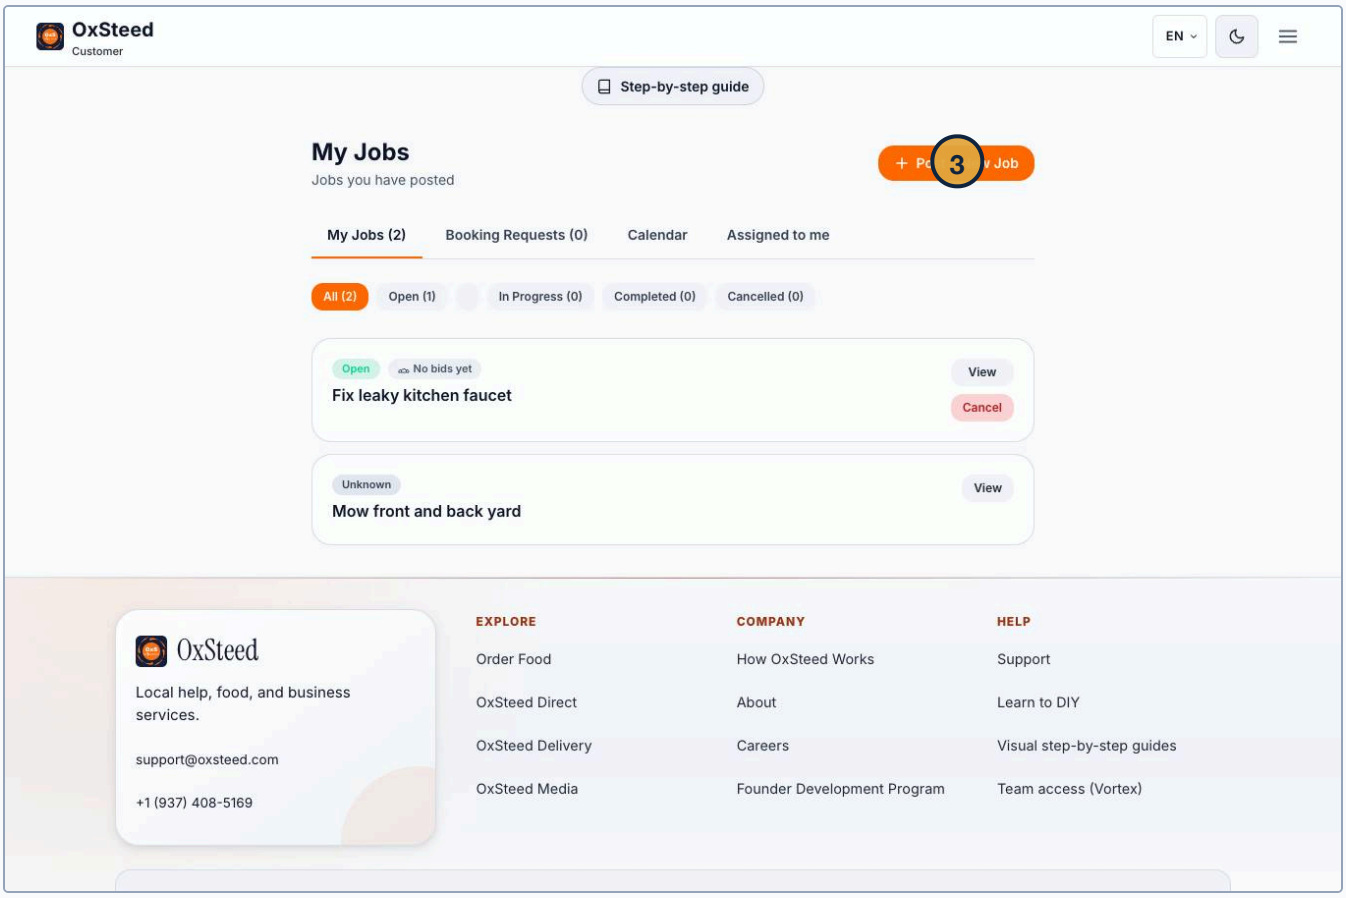

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: My Jobs)*

1. **3.** Post a New Job button

Step 2: Open the job detail page

Choose the job to open /jobs/:id. The detail page shows the description, schedule, budget, the "Bids" heading with the bid list, and action buttons such as "Review bids", "Find helpers", and the message option. The appointment section shows the scheduled time.

> **Expected result:** The job detail loads with all actions and the current bid list.

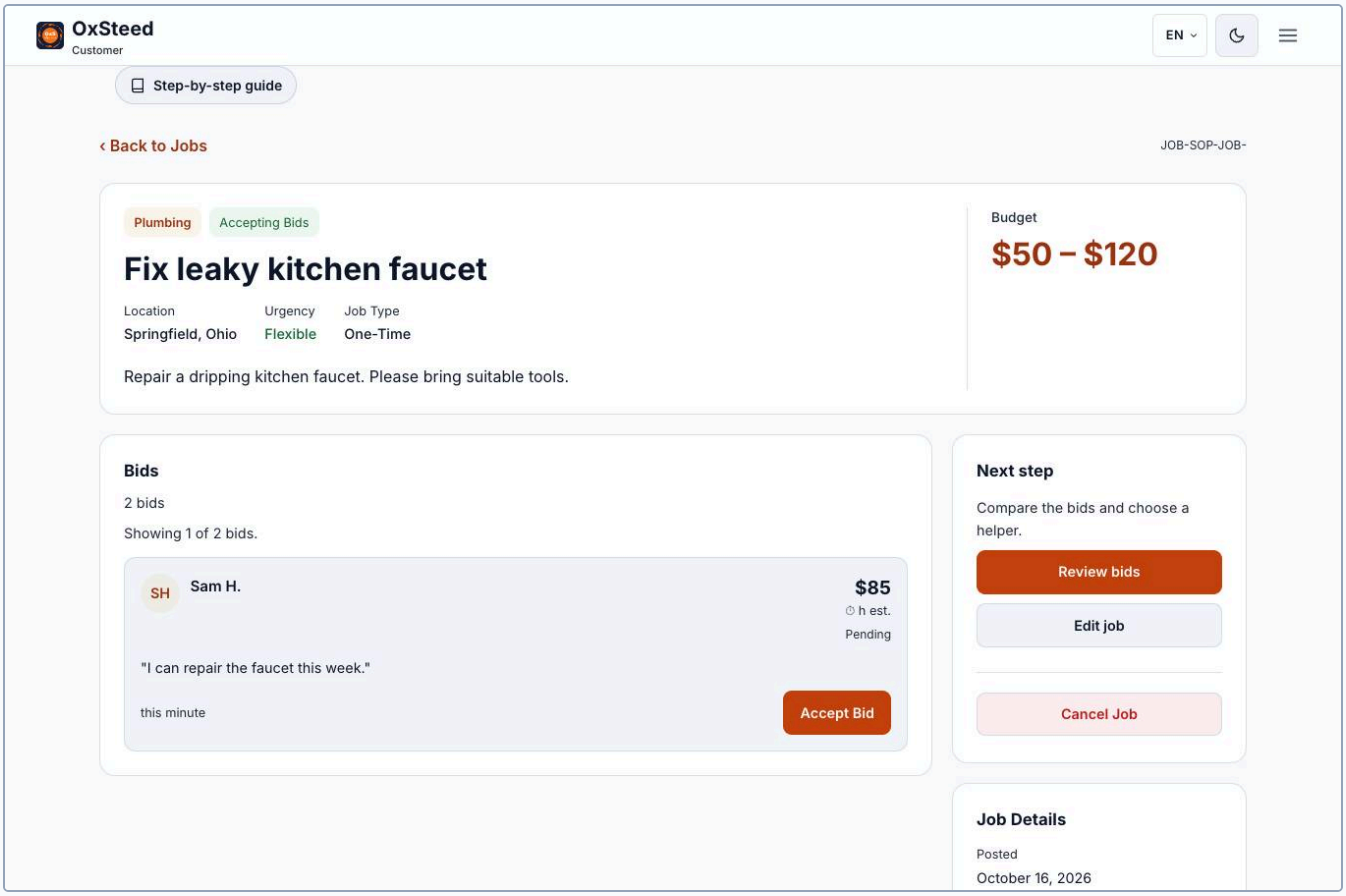

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 3: Edit, cancel, or reschedule the job

To change details, choose "Edit job" (/jobs/:id/edit), update the fields, and save; helpers with existing bids are told to reconfirm ("The customer changed this job"). To cancel, choose "Cancel Job" in the "Cancel this job?" dialog, optionally add a cancellation reason ("Reason for cancellation (optional)"), and confirm ("Cancelling..."). The page warns: "This will remove your job listing. Helpers who bid will be notified."

> **Expected result:** The edit saves or the job moves to a cancelled state with notifications sent.

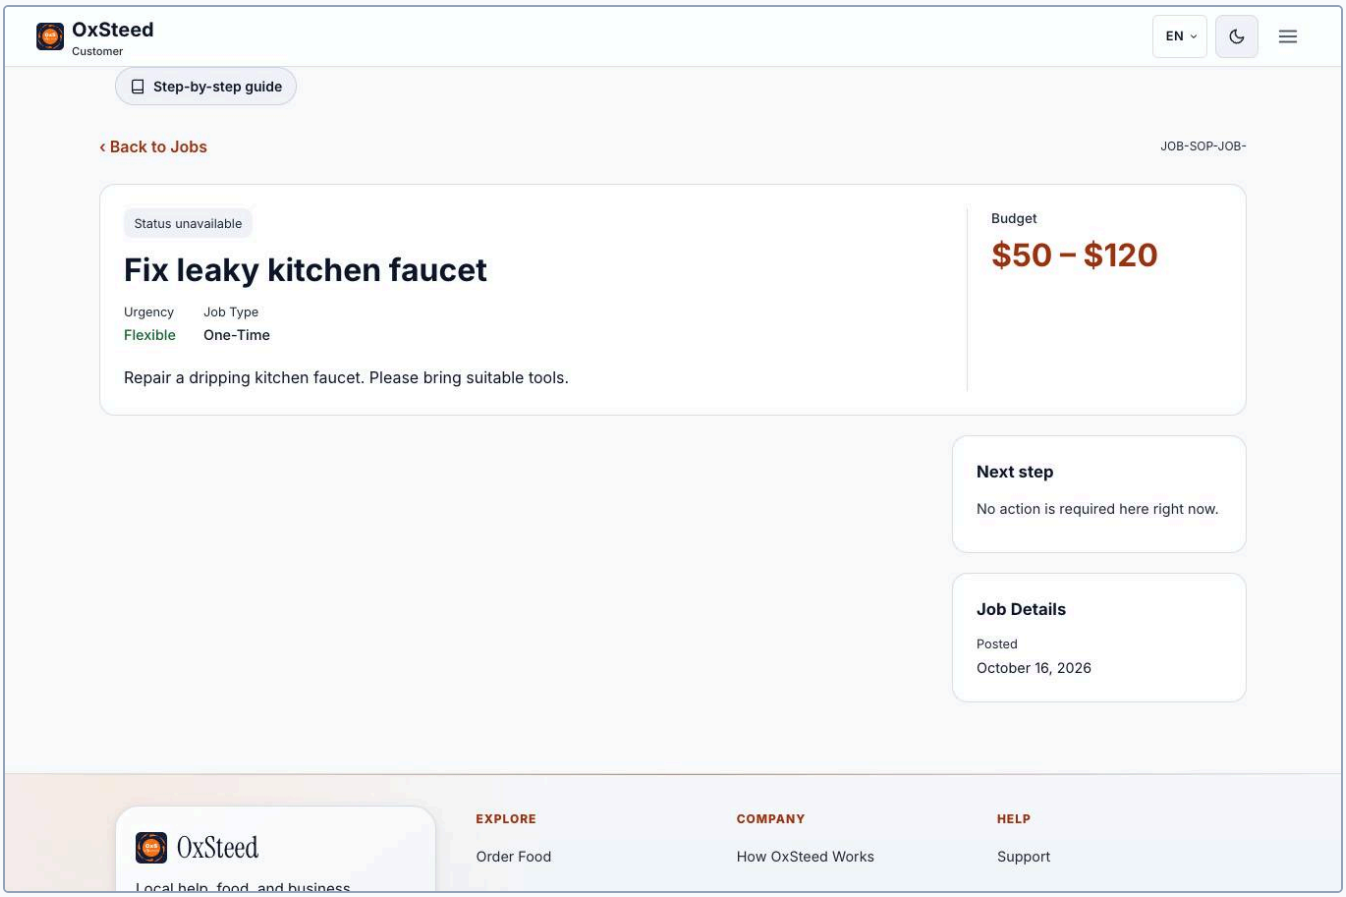

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Confirm it worked

The job shows its new state in My Jobs (edited details saved, or cancelled status). Helpers who bid are notified of cancellations and of edits that need reconfirmation.

If something goes wrong

Problem	What to do
Editing is blocked because a bid was accepted.	Once a bid is accepted, major changes are restricted. Cancel and repost the job if the scope truly changed.
A helper must reconfirm after your edit.	That is expected: "This helper must reconfirm their bid after your latest changes." Wait for the reconfirmation before assigning.

Need help?

If a job is stuck in the wrong state after an action, contact support from the Help menu or visit /support.

Guide ID: hiring-message | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Message about a job or booking

Guide ID	**hiring-message**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/message-about-job

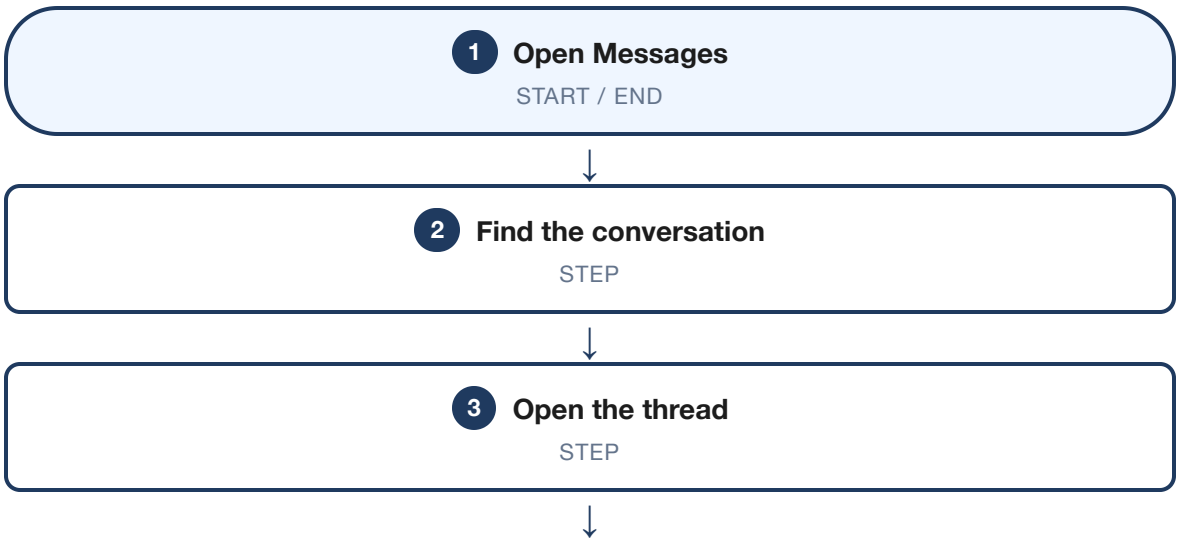

Goal

Message helpers and customers about jobs, bookings, and bids from the Messages inbox.

Before you start

1. Be signed in to your OxSteed account.

Process map

Text version. 1. Open /messages ("Messages"). 2. Use the search box ("Search people, jobs, or messages...") or the filters ("Filter conversations", All / Unread) to find the thread. 3. Open the conversation thread. 4. Type in the message box and choose "Send". Job-scoped conversations start from a job or booking; helpers also see guest inquiries here.

Steps

Step 1: Open Messages and find the conversation

Open /messages. The page title is "Messages" with the conversation list, a search box ("Search people, jobs, or messages..."), and filters ("Filter conversations") including All and Unread. Guest inquiries from customers who have not booked yet also land here.

> **Expected result:** Your conversations are listed with unread counts.

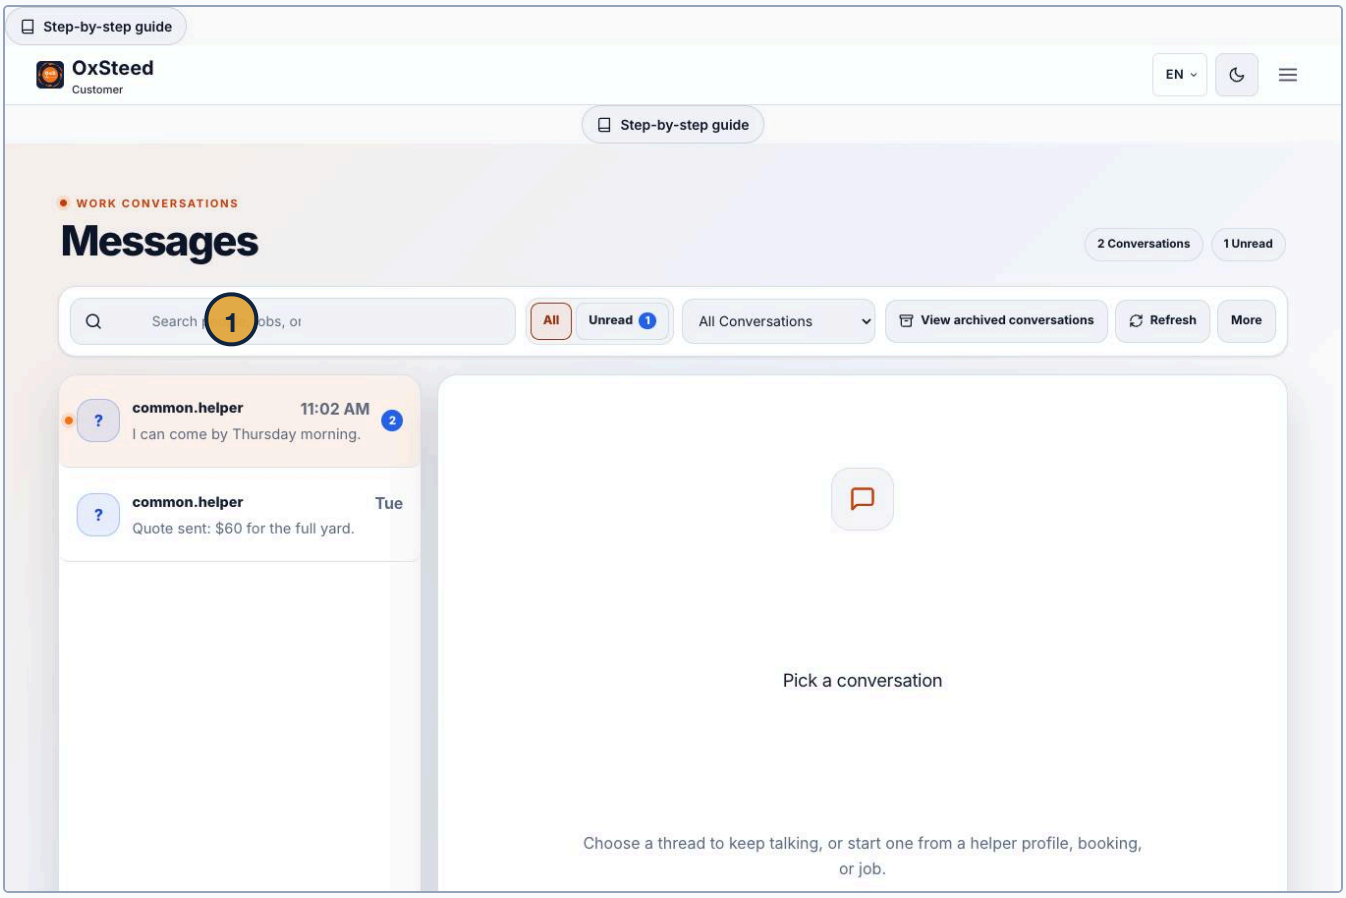

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

1. **1.** Search box

Step 2: Open the thread and send your message

Choose a conversation to open the thread. The composer placeholder is "Type a message..." (helpers see "Type a reply"). Write your message and choose "Send". Messages send in real time; failed sends show a retry option.

> **Expected result:** Your message appears in the thread.

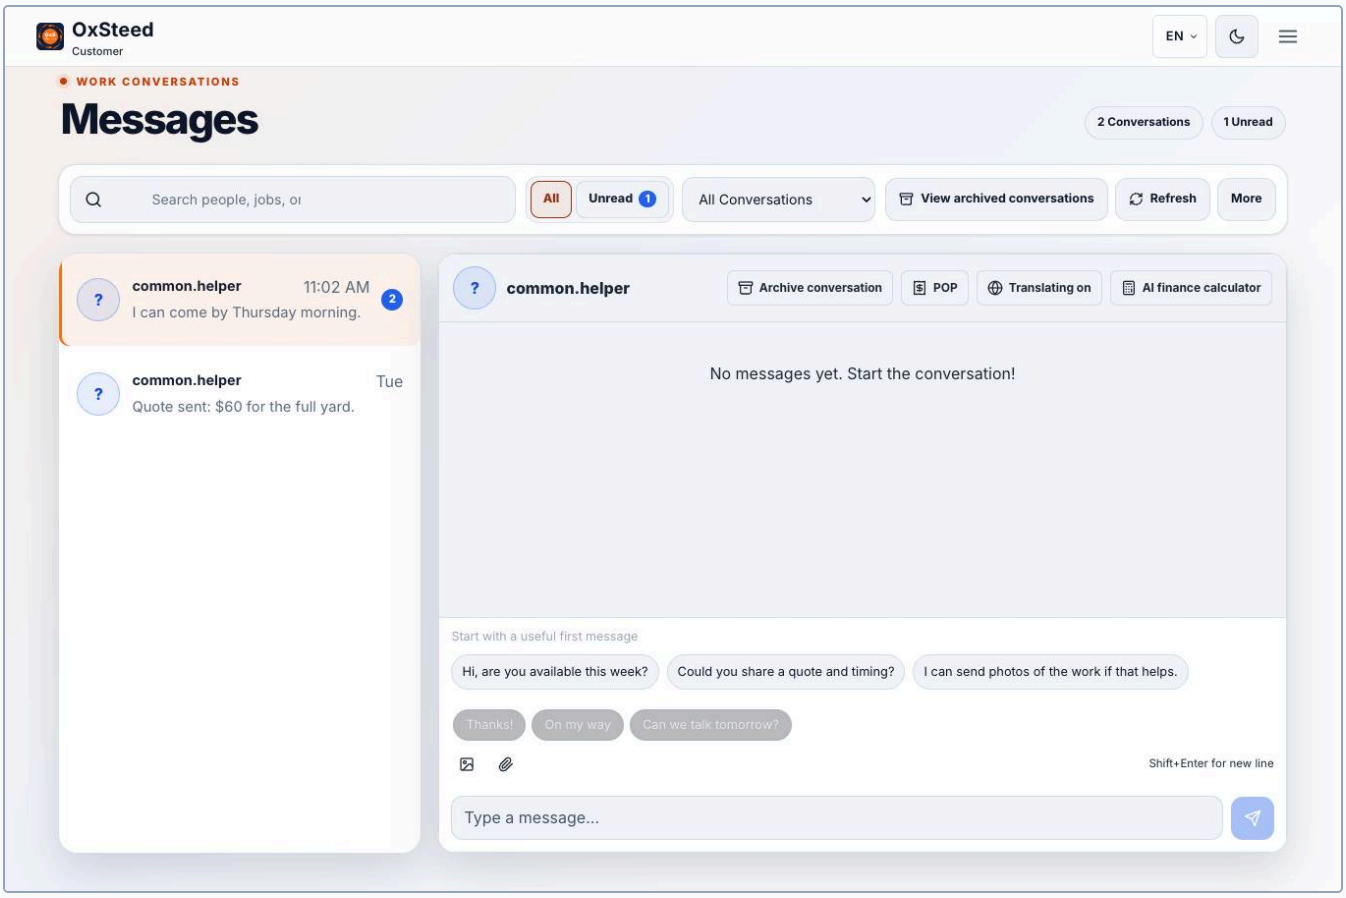

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Confirm it worked

Your message appears in the thread and the other party is notified. Job-context threads stay linked to the job for the record.

If something goes wrong

Problem	What to do

You cannot find the conversation.	Use the search box and check the Unread filter; archived threads are under the archived view.
A message fails to send.	Use the retry option. If it keeps failing, reload the page and try again.

Need help?

For urgent issues that messaging cannot resolve, escalate from /support.

Guide ID: hiring-payment-records | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

See payment and order records

Guide ID	**hiring-payment-records**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/payment-records

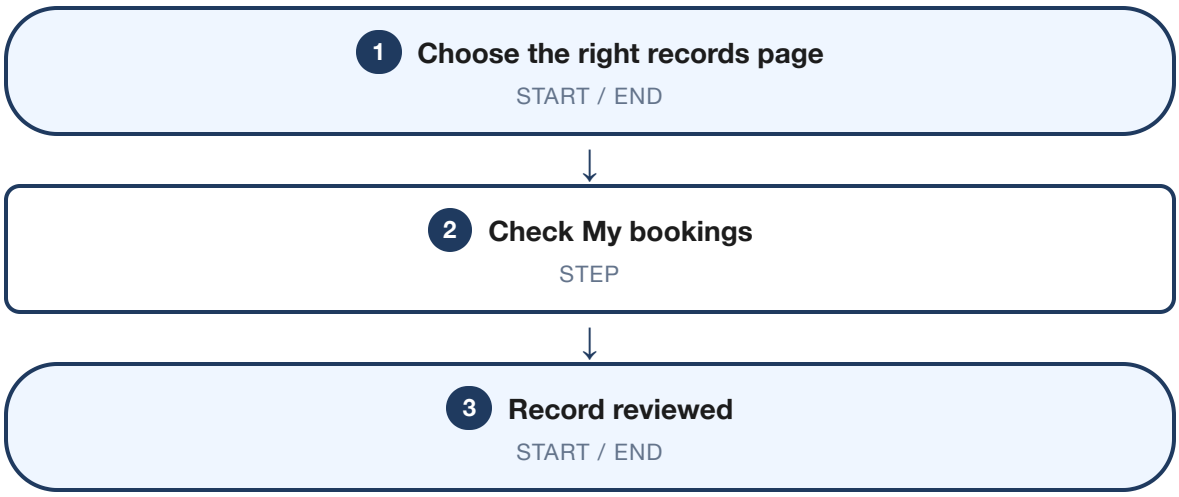

Goal

Find your bookings, product orders, and food orders, and read the payment and receipt details on each.

Before you start

1. Be signed in to your OxSteed account.

Process map

- Choose the right records page → Check Order History
- Check Order History → Open the order detail
- Open the order detail → Record reviewed

- Choose the right records page → Track a food order by link
- Track a food order by link → Record reviewed

Text version. 1. Bookings live on /my-bookings; product and food orders live on "Order History" (/orders). 2. On Order History, filter by status when needed ("Nothing matches this filter yet." when empty). 3. Open an order (/orders/:id) to see items, payment records, and the "Cancel Order" action with the "Are you sure you want to cancel this order?" confirm. 4. Food orders can also be tracked by anyone with the link at /food/track/:token.

Steps

Step 1: Review your bookings on My bookings

Open /my-bookings. Each booking shows its status (Pending, Accepted, Declined, Cancelled, Expired) with actions that match the state, such as Cancel, Complete, or Confirm. This is the payment and scheduling record for helper and business bookings.

> **Expected result:** Your bookings are listed with their current statuses.

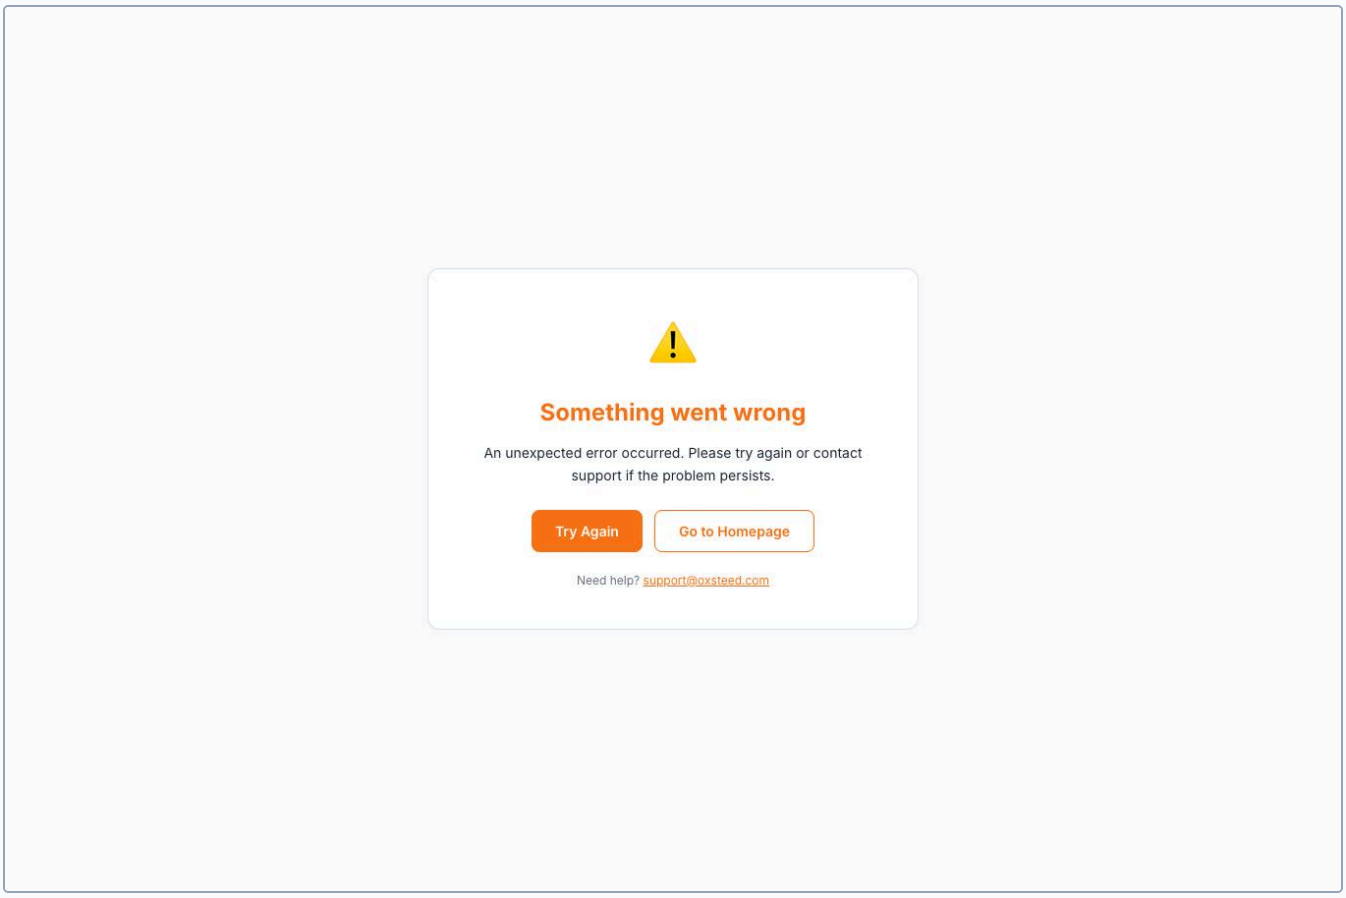

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 2: Open Order History for product and food orders

Open /orders ("Order History", subtitled "Track restaurant orders, preparation status, payment records, and receipts in one place."). Filter by status when you have many orders. Each order shows what was bought, what was paid, and the current state. Before your first purchase the page shows "Your order history is ready before your first purchase."

> **Expected result:** Your orders are listed with payment and status details.

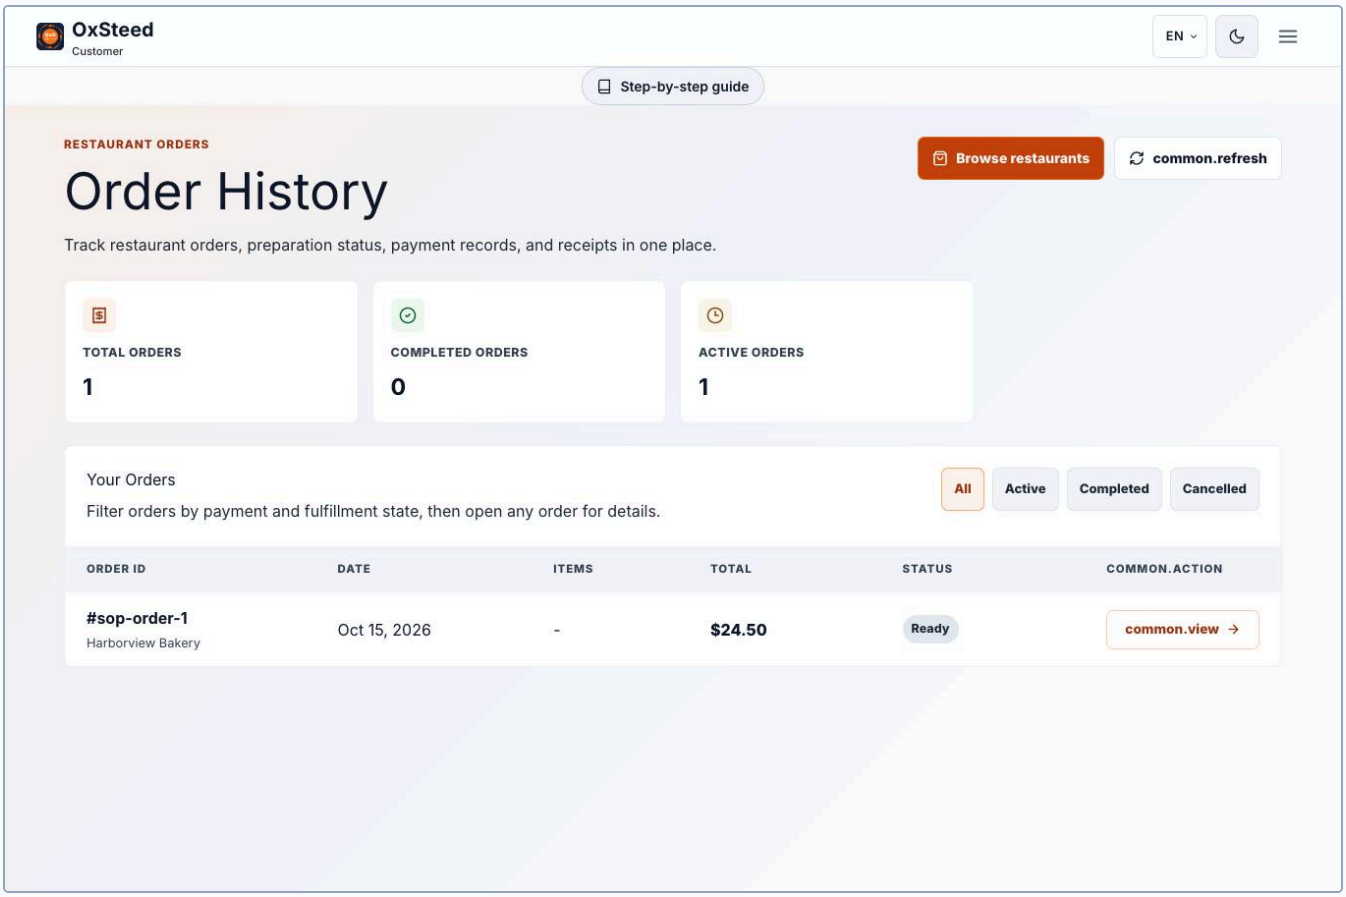

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Order History)*

Step 3: Open an order detail for the full record

Choose an order to open /orders/:id. The detail page shows items, the payment record, and receipts; food orders show preparation status. "Cancel Order" appears when cancellation is allowed, asking "Are you sure you want to cancel this order?" before it runs. "Get help with this order" links to support when something is wrong.

> **Expected result:** The full order record is visible with its payment history.

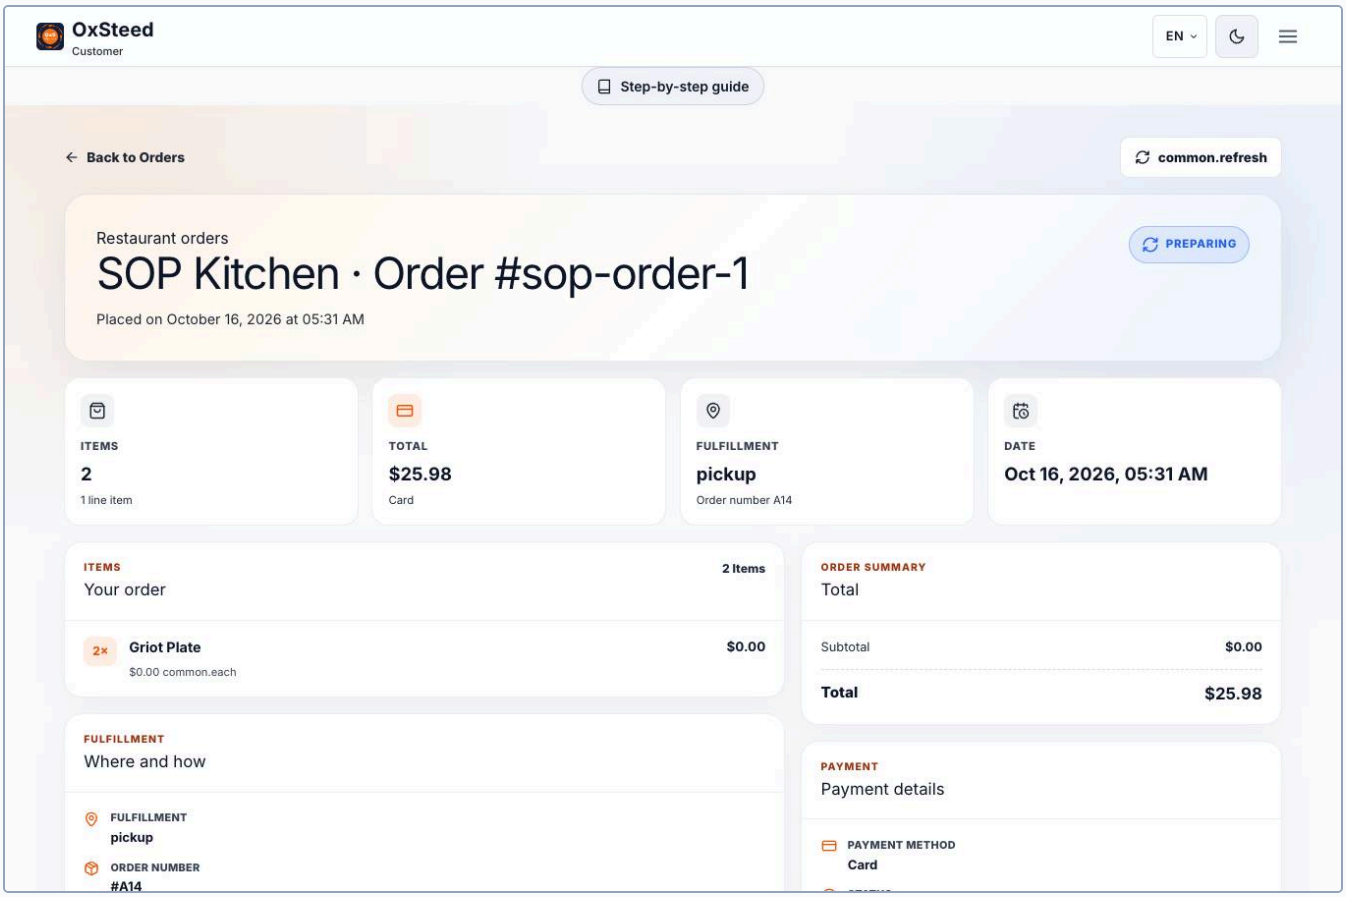

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Step 4: Track a food order with the tracking link

Food orders come with a tracking link at /food/track/:token. Anyone with the link can open it without signing in to see preparation and delivery status. Keep the link private; it is the guest key to that order.

> **Expected result:** The tracking page shows the live order status.

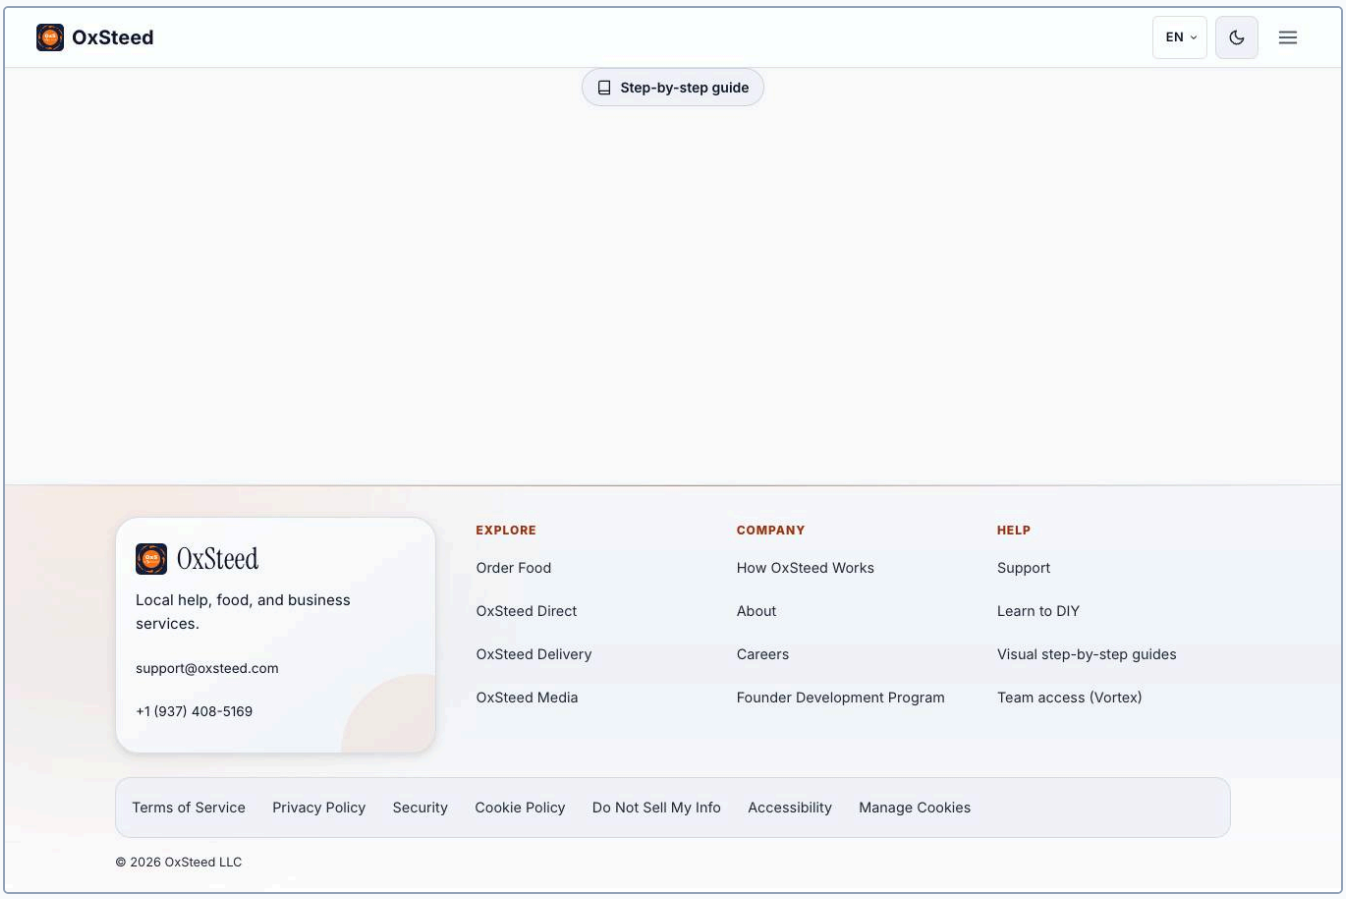

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Food order tracking page with status timeline)*

Confirm it worked

Each booking and order shows its status and payment record. Statements for deeper accounting live at /statements.

If something goes wrong

Problem	What to do

An order is missing from the list.	Check the status filters; a filtered view may hide it ("Nothing matches this filter yet."). Also confirm you are signed in to the account that placed the order.
Cancel fails on an order.	Cancellation is only allowed in certain states; "Failed to cancel order" means the order already moved past the cancellable point. Use "Get help with this order" for a refund request.

Need help?

For payment questions on a specific order, use "Get help with this order" or visit /support.

Guide ID: hiring-post-job | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Post a job

Guide ID	**hiring-post-job**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/post-job

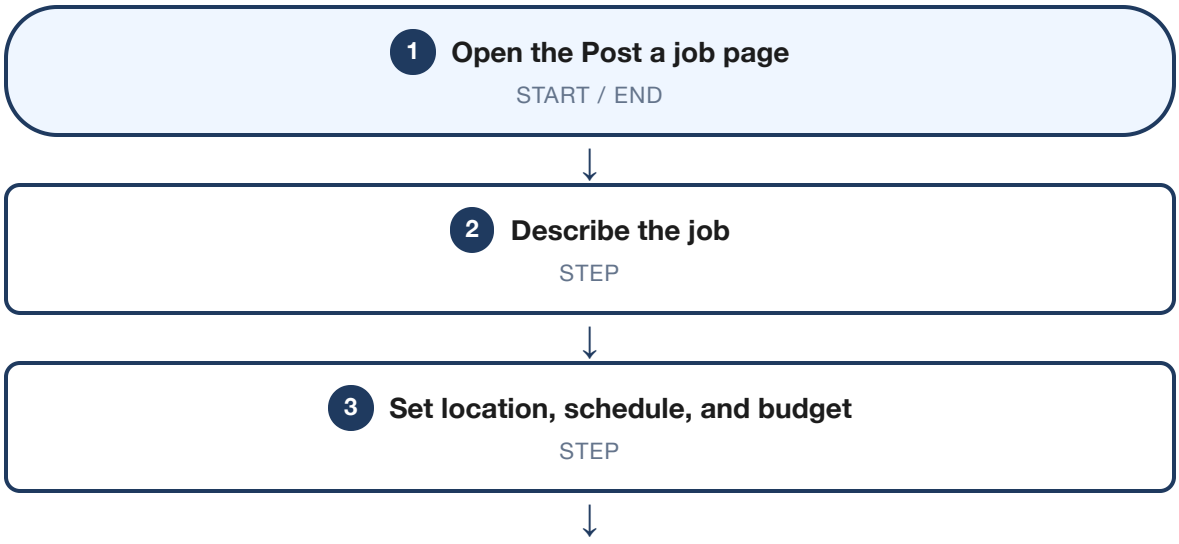

Goal

Publish a job post with clear details so local helpers can send you bids.

Before you start

1. Be signed in with the Customer mode active.
2. Know what the work is, where it is, and what budget you have in mind.

Process map

- *No:* Details complete? → Complete the highlighted fields
- Complete the highlighted fields → Details complete?

Text version. 1. Open /post-job. The page heading is "Post a Job" with the subtitle "Describe what you need and get bids from local helpers". 2. Enter a Job Title (at least 10 characters), add skills with "Add Skill", and write your requirements. 3. Add photos or video with "Add Photos, Video, or Audio" when the work is visible. 4. Set the location, schedule, and budget. 5. Use "Save as Draft" to pause, or continue to "Review & Post". 6. On the review step, choose "Post Job" (or "Post Job & Invite Bids"). The job goes live with a "Job Posted!" confirmation.

Steps

Step 1: Open the Post a job page

Choose "Post a job" in the navigation, or open /post-job directly. The page heading is "Post a Job" with the subtitle "Describe what you need and get bids from local helpers". The "Before you post" panel gives quick tips: include exact problem details, add preferred dates, and list special tools or materials.

> **Expected result:** The multi-step job form loads with the first step visible.

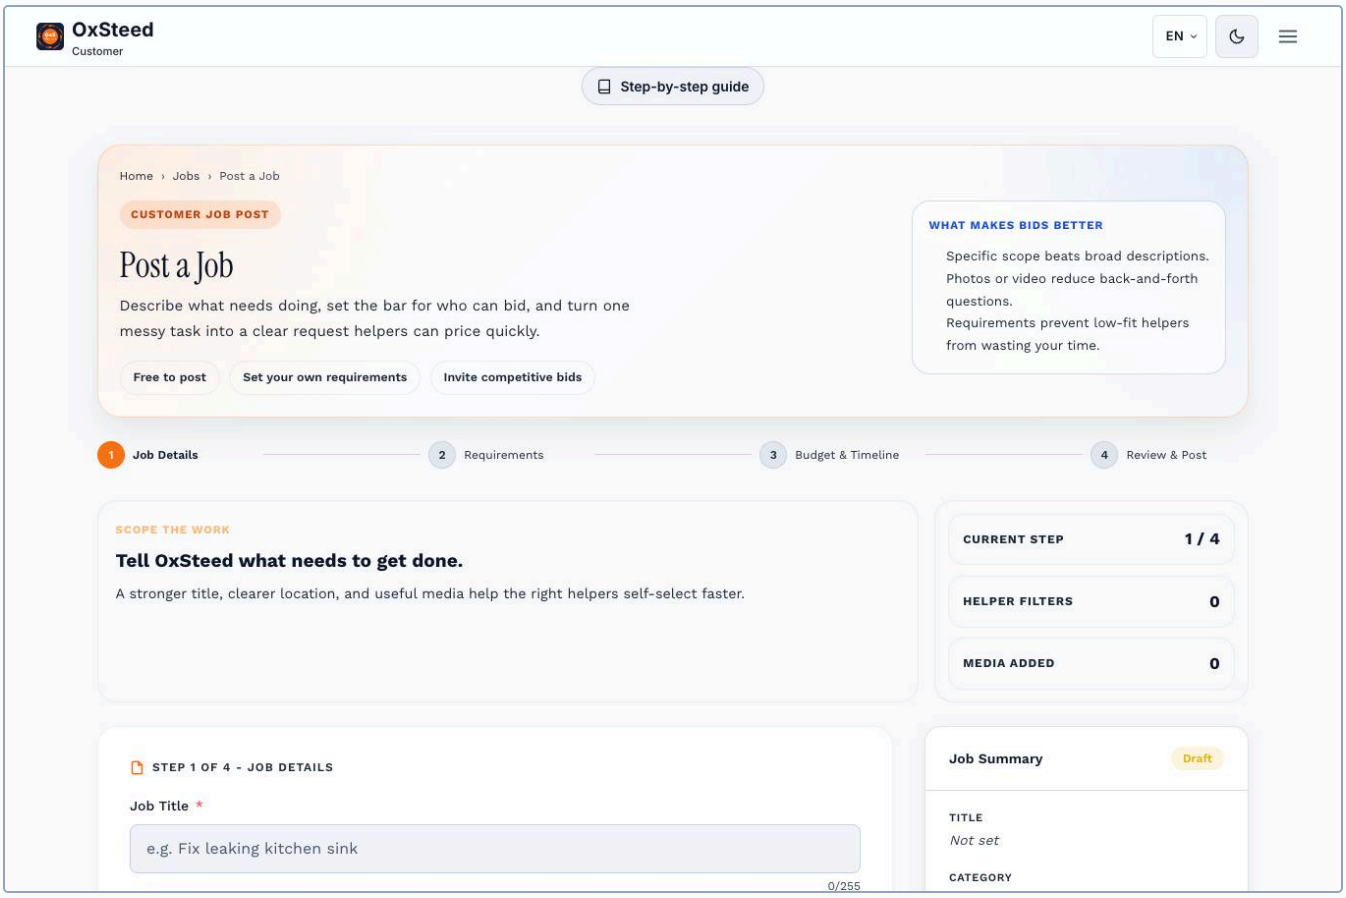

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Post a Job)*

Step 2: Describe the job

Enter a Job Title of at least 10 characters (example placeholder "e.g. Fix leaking kitchen sink"). Choose "Add Skill" to tag the skills needed. Under "Your Requirements", write what the work is, the materials involved, and how you will judge the result. Move forward with "Next Step".

> **Expected result:** Each required field validates and the form advances to the next step.

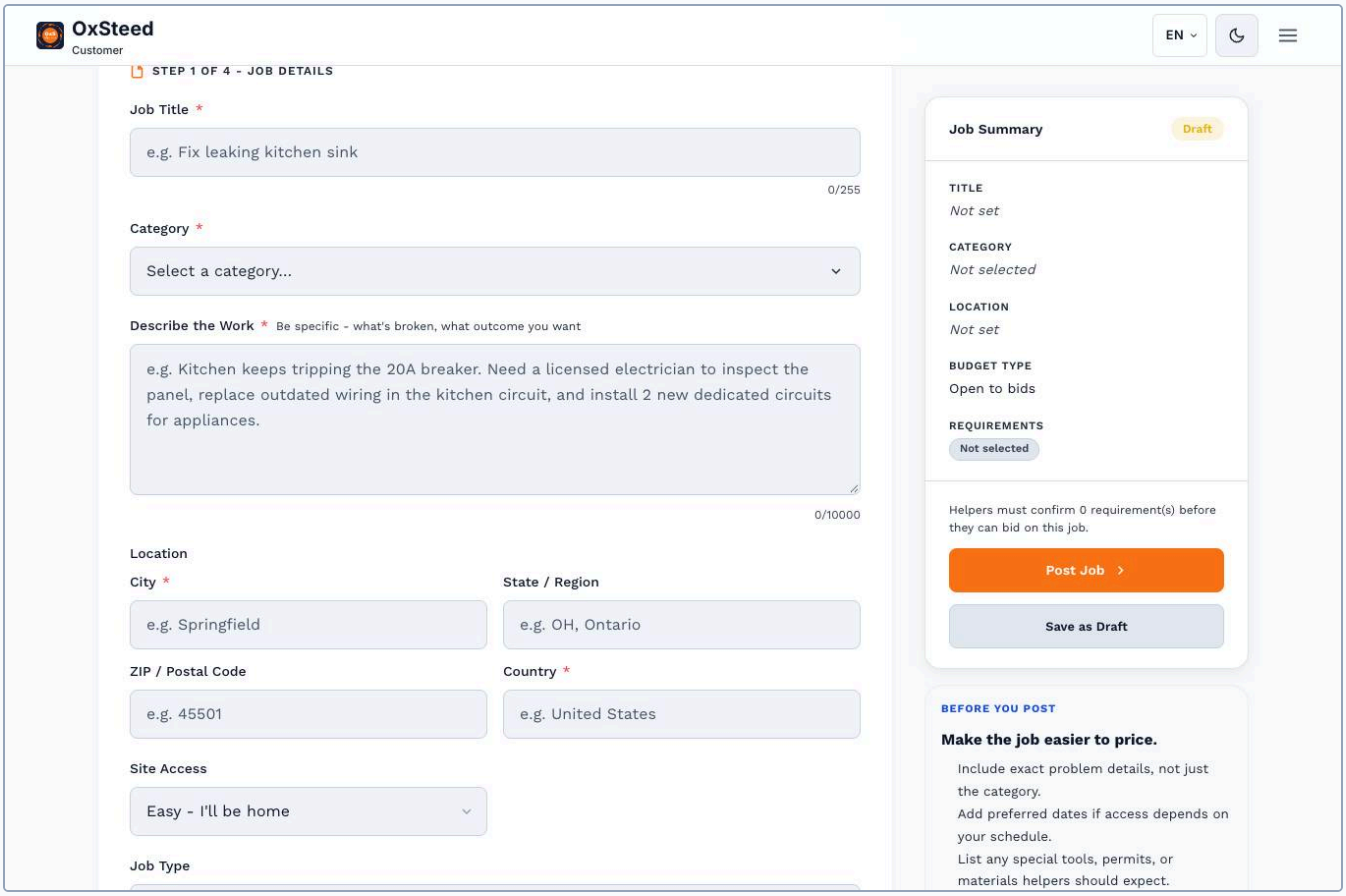

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Post a Job)*

Step 3: Add photos and set location, schedule, and budget

Use "Add Photos, Video, or Audio" to attach evidence of the work ("Snap Photo", "Record a Video", or "Record Audio"). Then enter the job Location, pick your preferred Schedule, and set a Budget with the Budget type. You can "Save as Draft" at any point ("Saving draft...") and come back later.

> **Expected result:** Attachments upload and location, schedule, and budget all show entered values.

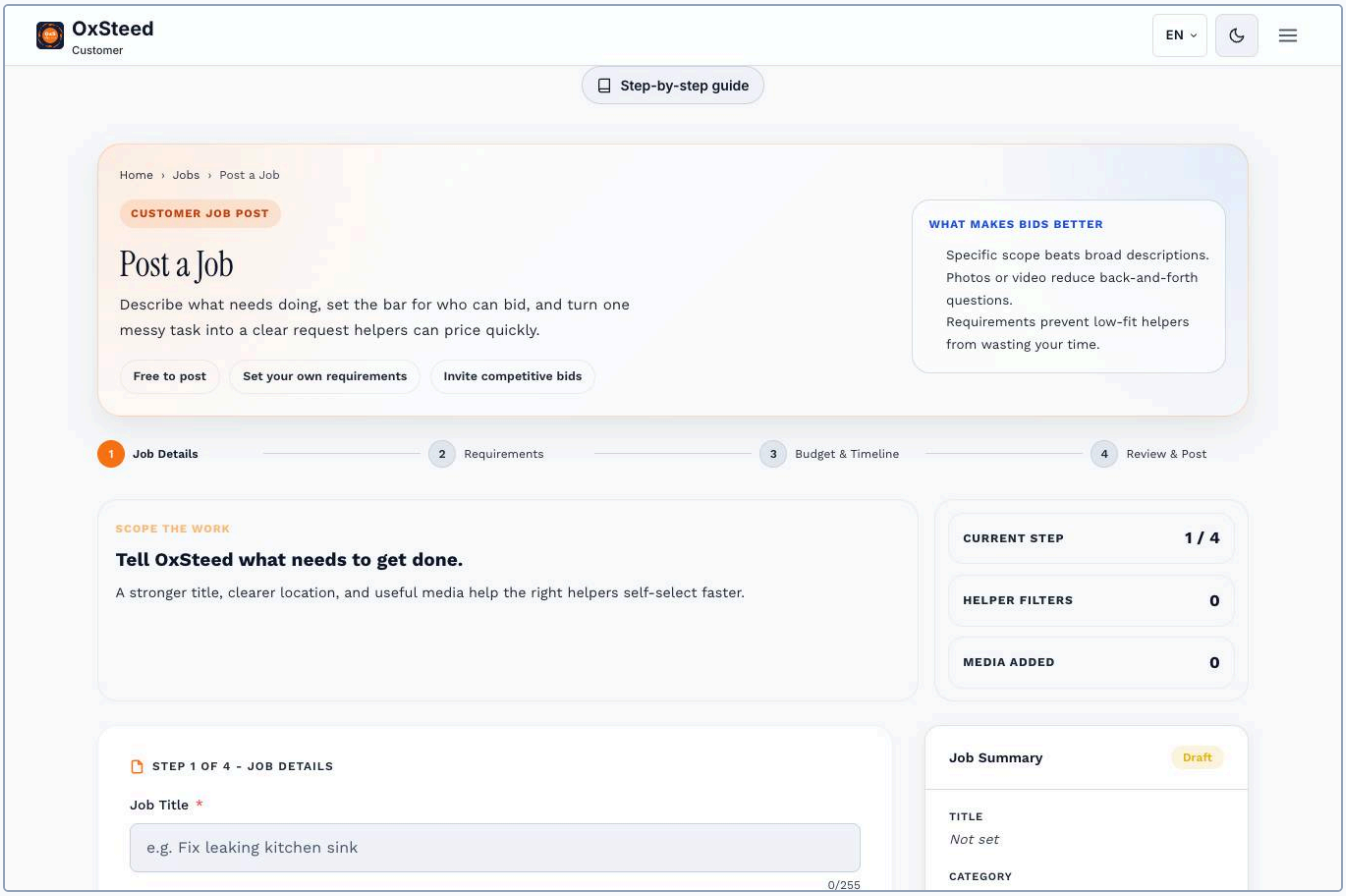

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Post a Job)*

Step 4: Review and post

On the final step ("Review & Post", labeled "Step 4 of 4 - Review & Post"), read the "Job posting summary" and the "What happens next" notes. When everything is correct, choose "Post Job" or "Post Job & Invite Bids". A "Job Posted!" confirmation appears with "Post Another Job" if you need a second listing.

> **Expected result:** A "Job Posted!" confirmation appears and the job is listed as open.

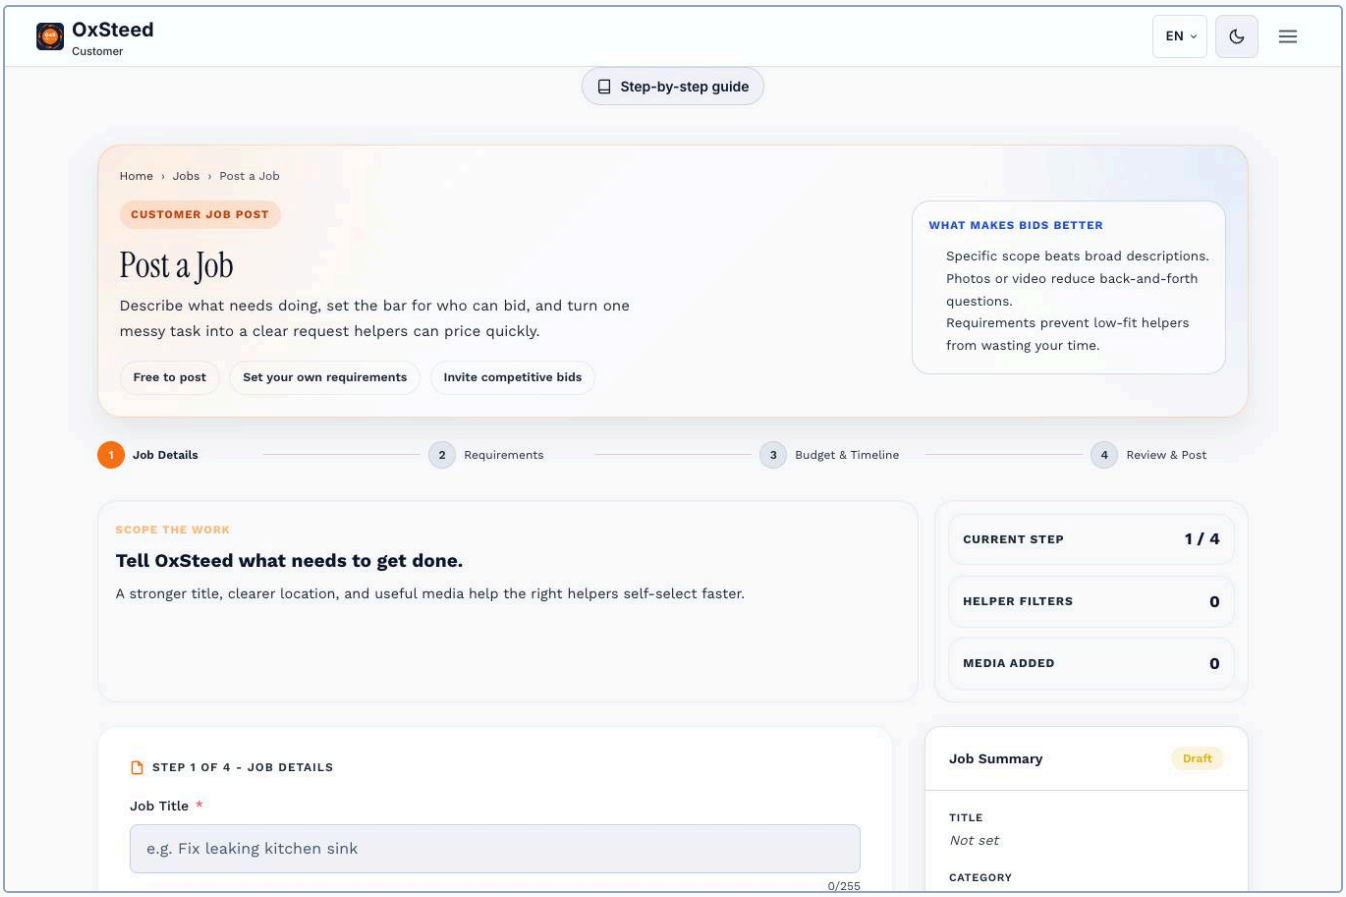

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Post a Job)*

Confirm it worked

The "Job Posted!" confirmation appears and the job shows in My Jobs with an open status. Helpers who match the location and category are notified and can bid.

If something goes wrong

Problem	What to do
The job will not post.	Complete every highlighted field: the title needs at least 10 characters and the required steps must all be valid. The review step lists what is missing.
You lost your progress.	Use "Save as Draft" while editing; drafts autosave and can be resumed later from your jobs list.

Need help?

If your job does not appear within 10 minutes of posting, contact support from the Help menu or visit /support.

Guide ID: hiring-request-quote | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Request a quote (Direct)

Guide ID	**hiring-request-quote**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/hiring/request-direct-quote

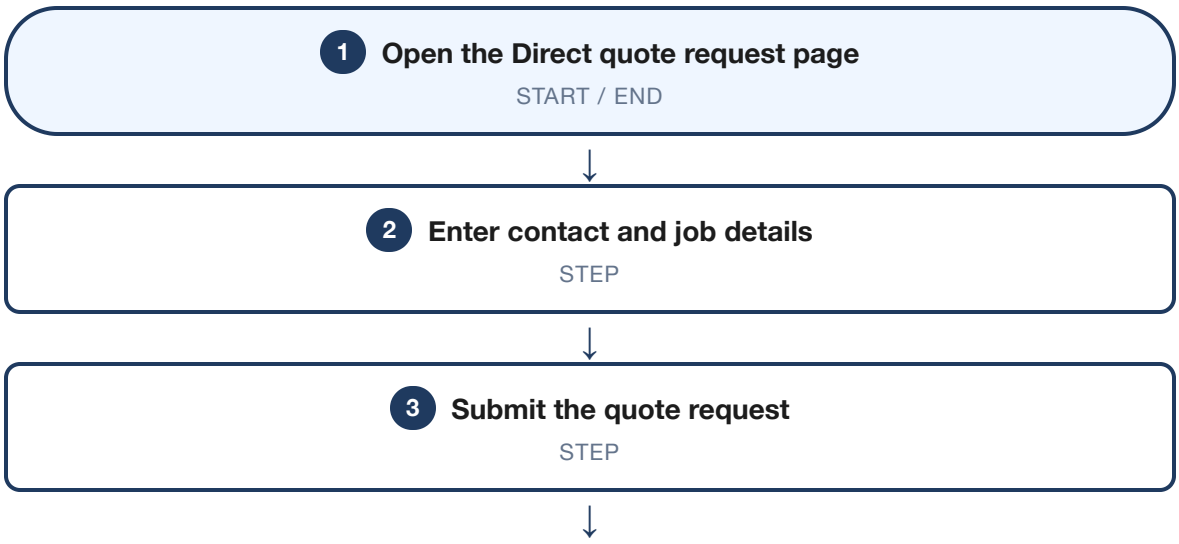

Goal

Request a quote from OxSteed Direct and look it up later with an email code.

Before you start

1. Know what work you need, where it is, and when you want it.

Process map

- Look up the quote with an email code → Request sent

Text version. 1. Open /direct/request-quote ("Request a Direct quote": "Keep it simple. Tell us what you need, where the work is, and when you want it done."). 2. Fill in your details (First name, Last name, Email, Phone, Company name), describe the work and the timeline, and add a photo when helpful. 3. Submit; the page confirms "Quote request sent." 4. Later, open /direct/view-quote ("View your quote") and verify with the email code to see your quote. Guests can request and look up by code; signing in adds detail views.

Steps

Step 1: Open the Direct quote request page

Open /direct/request-quote (also reachable at /request-quote or /quote-request). The page title is "Request a Direct quote" with the subtitle "Keep it simple. Tell us what you need, where the work is, and when you want it done." Guests can request without an account.

> **Expected result:** The quote request form loads with contact and job sections.

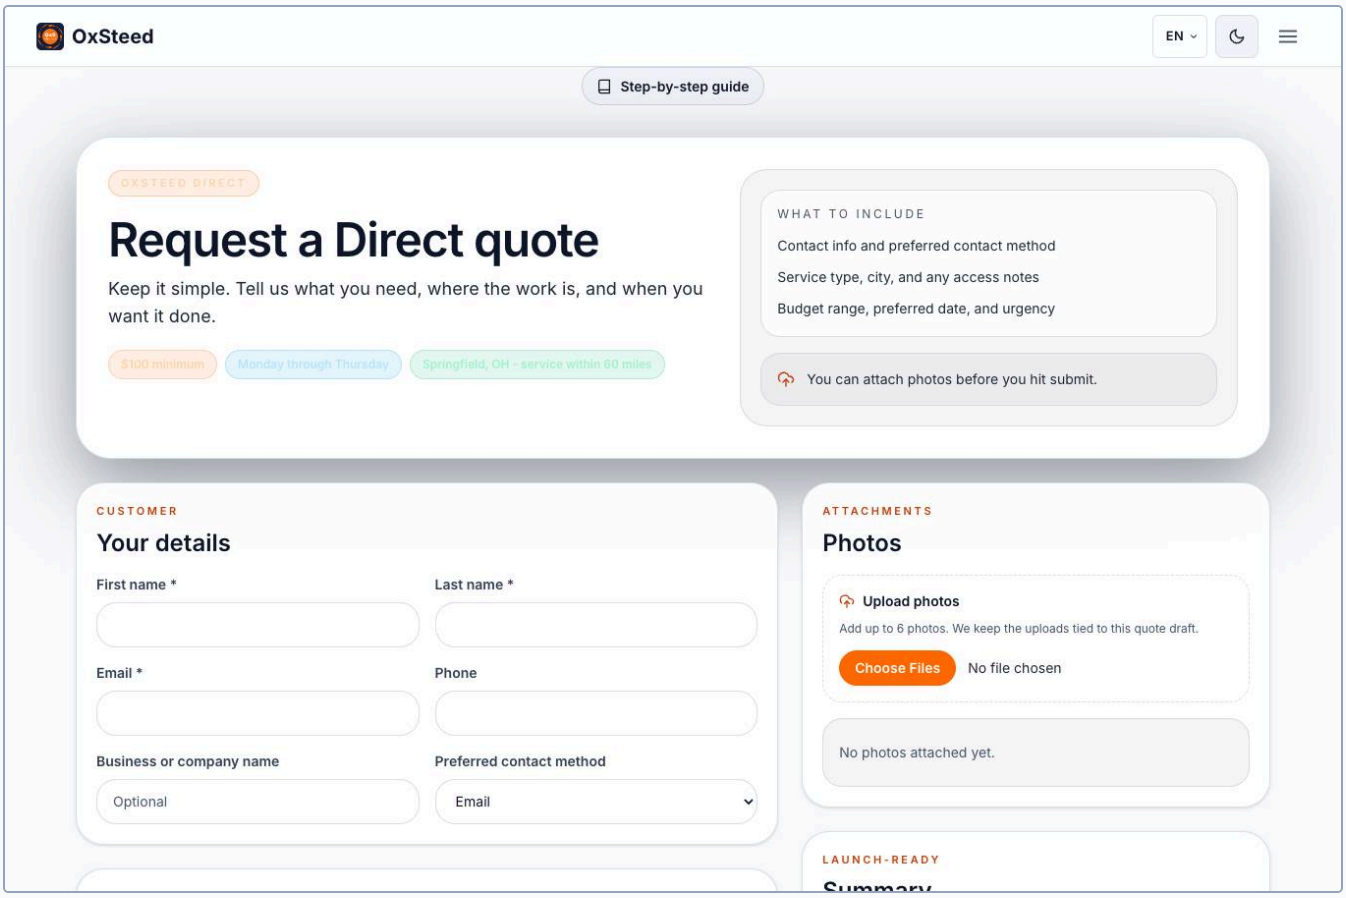

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Request a Direct quote)*

Step 2: Enter your details and describe the work

Fill in the "Your details" section: First name, Last name, Email, Phone, Company name (optional), and contact method. Then describe the work and the timeline ("What to include" lists contact, work, and timeline hints). Add a photo when the job is visible.

> **Expected result:** All required fields are filled and the form validates.

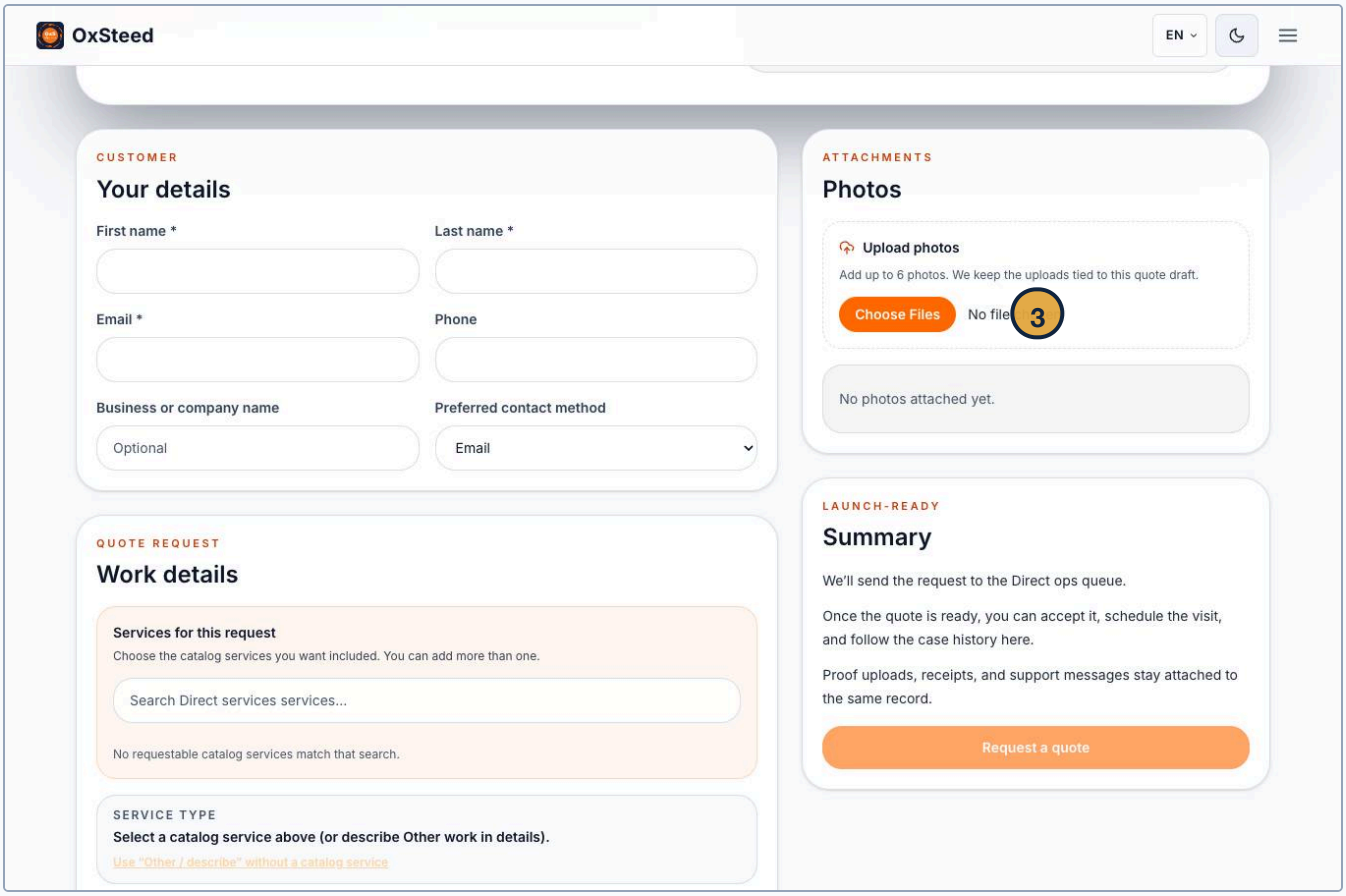

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Request a Direct quote)*

1. **3.** Photo upload

Step 3: Submit and confirm the request

Submit the form. The page confirms "Quote request sent." Keep your email address; quote updates and the lookup code go there.

> **Expected result:** The "Quote request sent." confirmation appears.

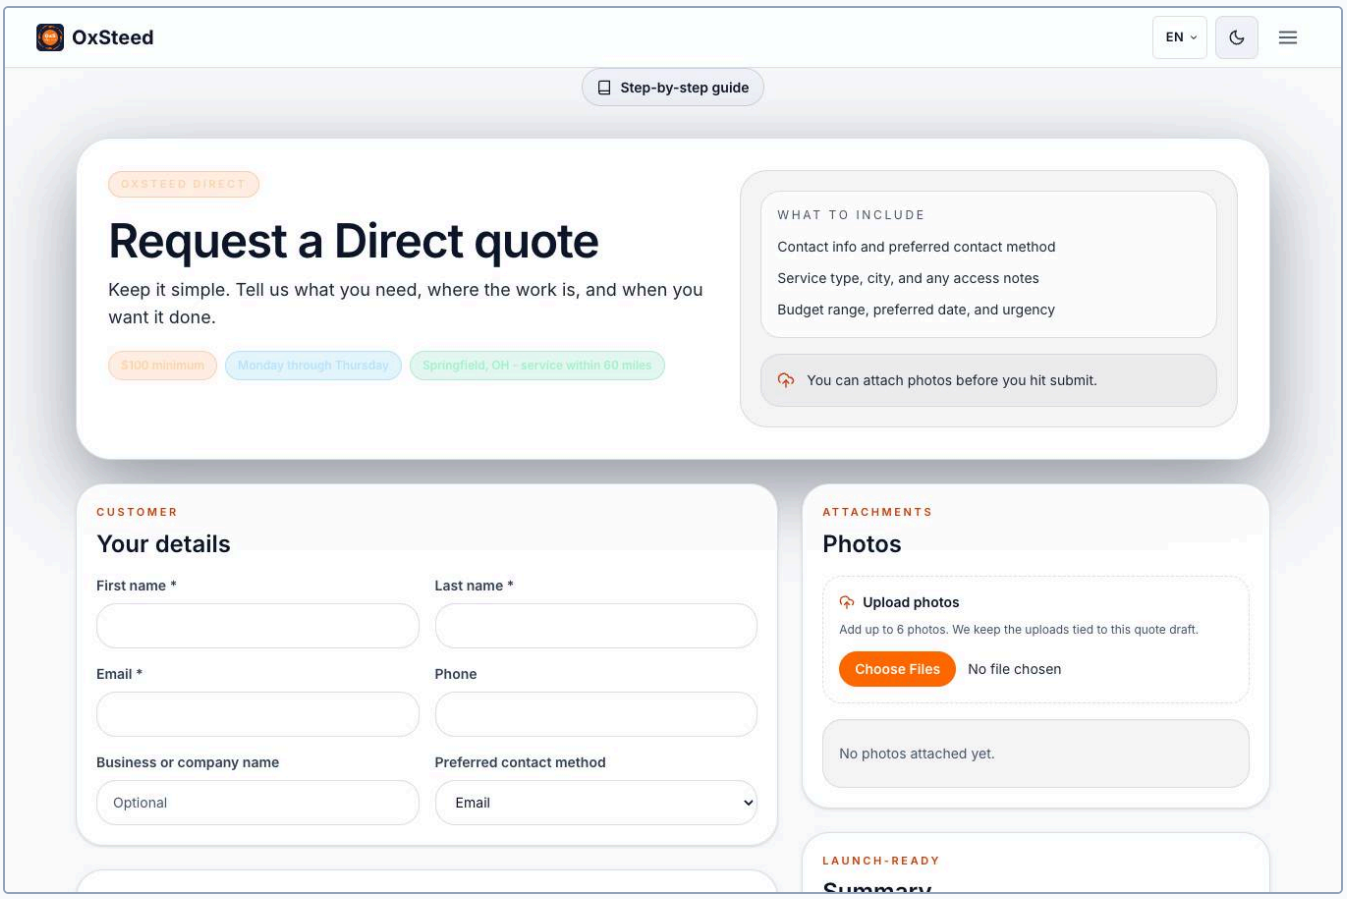

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Request a Direct quote)*

Step 4: Look up your quote with the email code

Open /direct/view-quote ("View your quote"). Enter your email and request the code, then enter the code to unlock your quote detail. Signing in gives fuller detail views at /direct/quotes/:id.

> **Expected result:** Your quote appears with its line items and status.

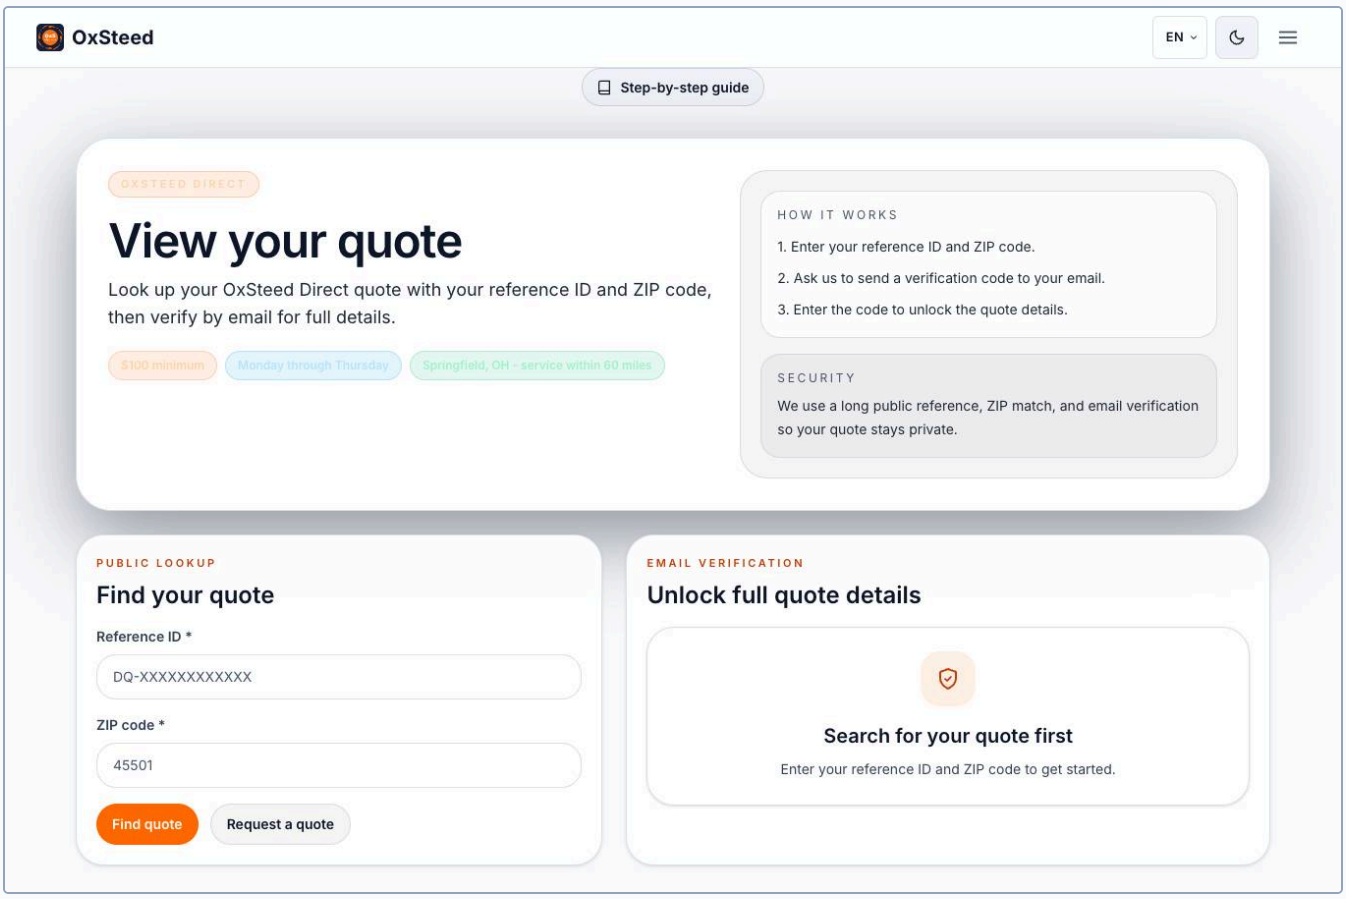

Figure 4. The quote lookup page, desktop view. *(Image description: Synthetic example: View your quote)*

Confirm it worked

The "Quote request sent." confirmation appears, and /direct/view-quote shows your quote after code verification. My quote requests are also listed when you are signed in.

If something goes wrong

Problem	What to do

The form will not submit.	Complete the required contact fields and check the email and phone formats; the form flags invalid entries. Past dates are rejected.
You cannot open your quote.	Use the exact email from the request and the freshest code; codes expire. Signed-in users can also open /direct/quotes/:id.

Need help?

For help with a Direct quote, contact support from the Help menu or visit /support.

Guide ID: hiring-reviews | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Leave and respond to reviews

Guide ID	**hiring-reviews**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant
Availability	**Supported**
Online version	/how-it-works/hiring/leave-review

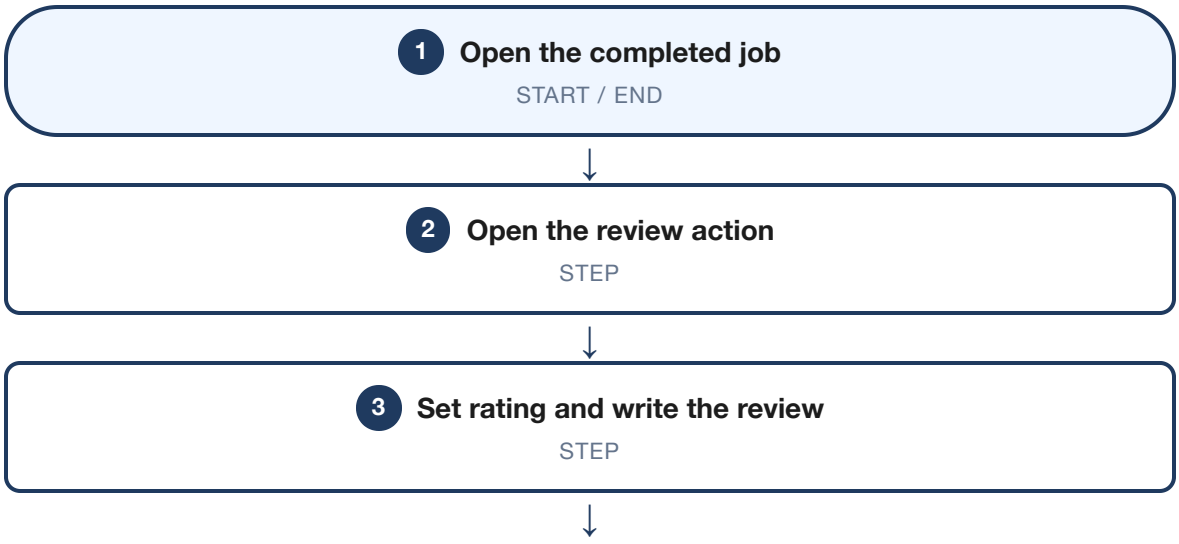

Goal

Leave a review for a finished job and respond to reviews left for you.

Before you start

1. Be signed in to your OxSteed account.
2. The job must be completed before reviews unlock.

Process map

- Open the completed job → Respond to a review left for you
- Respond to a review left for you → Review published

Text version. 1. Open the completed job (/jobs/:id) or order (/orders/:id). 2. Choose the review action to open the review dialog ("Leave a Review"). 3. Pick a Rating and write "Your Review" (and the testimonial where asked). 4. Choose "Submit Review" ("Submitting..." while it saves). 5. When someone reviews you, answer with the response action; responses show as the "Business Response" on the review.

Steps

Step 1: Open the review action on the finished job

On the completed job detail page, choose the review action to open the review dialog titled "Leave a Review". Reviews are eligibility-checked: the action only appears when you are allowed to review that job or order.

> **Expected result:** The "Leave a Review" dialog opens.

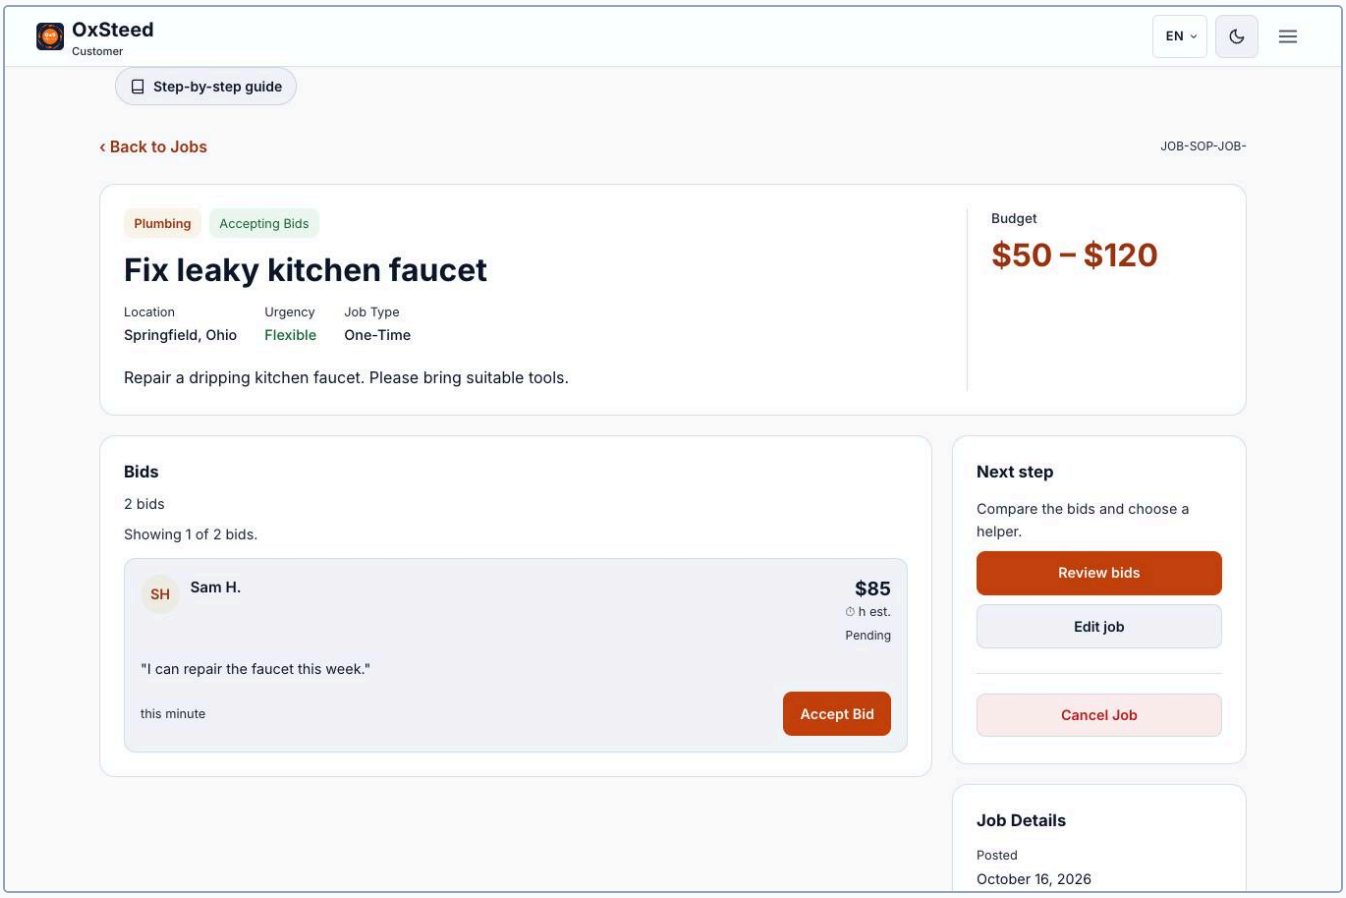

Figure 1. The review action on a completed job. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 2: Set the rating and write your review

Pick the Rating (stars) and write "Your Review". Say what was done, how communication went, and whether you would hire again. The dialog counts characters and requires a rating ("Rating is required") before you can submit.

> **Expected result:** The rating is selected and the review text is complete.

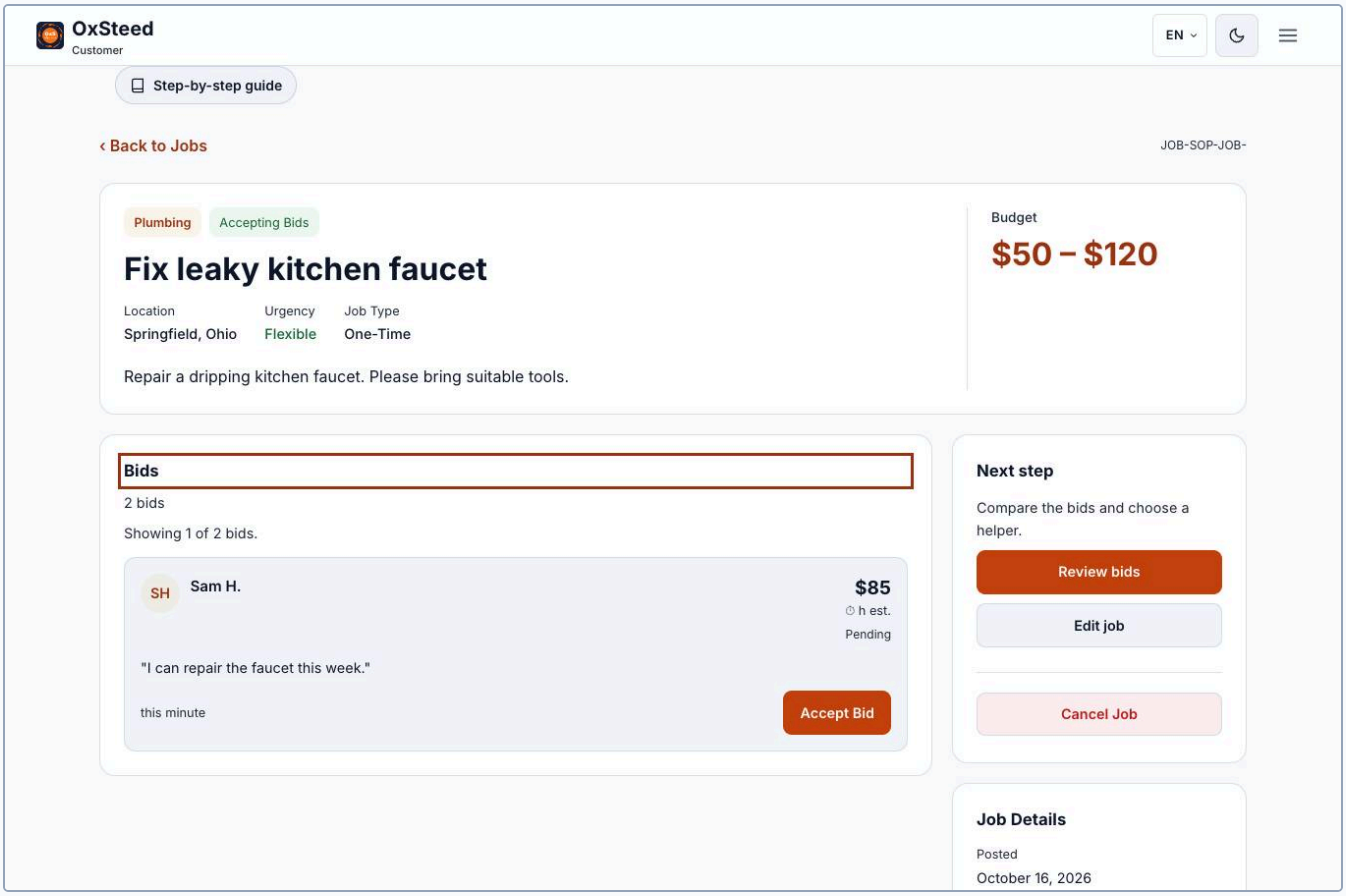

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 3: Submit the review

Choose "Submit Review". The button shows "Submitting..." and then a success confirmation. The review appears on the helper's or business's profile and in the job or order history.

> **Expected result:** The review publishes and appears on the profile.

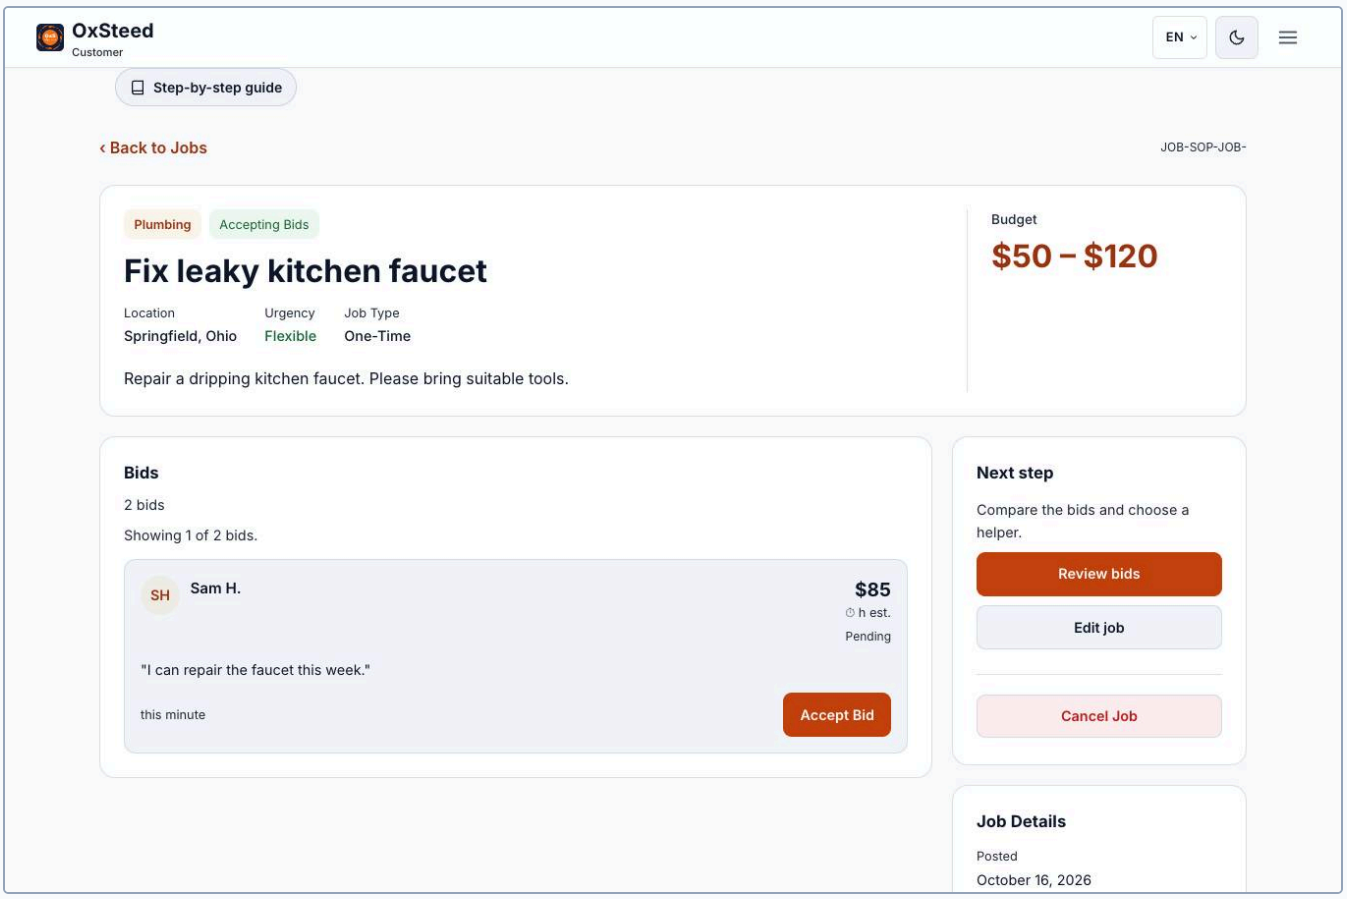

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Step 4: Respond to a review left for you

When a customer reviews you, open the review and use the respond action. Your answer shows as the "Business Response" under the review. Keep it factual and professional; future customers read both sides.

> **Expected result:** Your response appears under the original review.

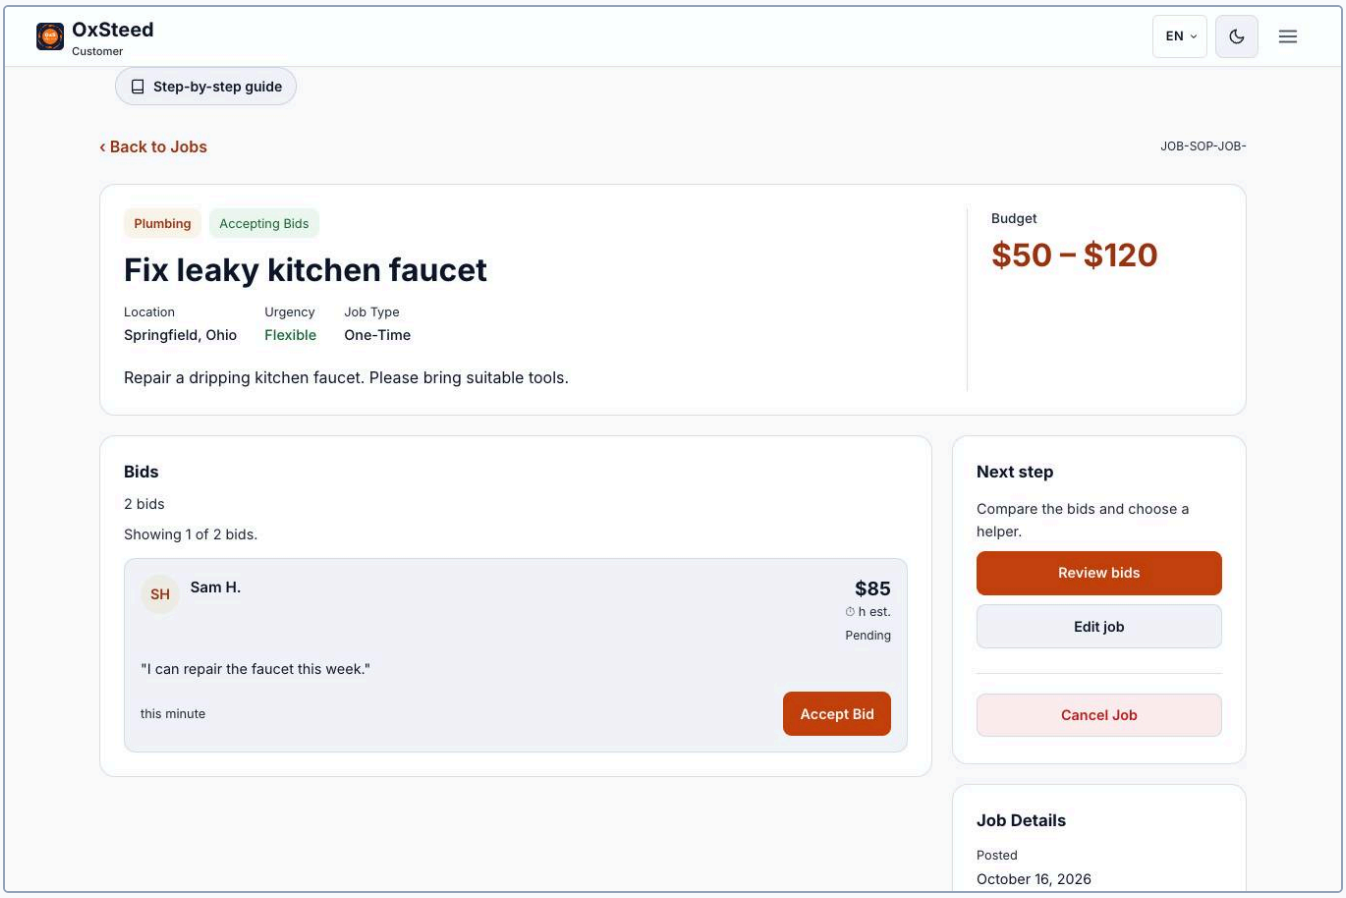

Figure 4. Responding to a review. *(Image description: Synthetic example: Fix leaky kitchen faucet)*

Confirm it worked

The review appears on the profile with your rating and text; your responses appear as the Business Response. Food order reviews are per order and follow the same pattern.

If something goes wrong

Problem	What to do

The review action does not appear.	Reviews are eligibility-checked and only unlock after completion. Confirm the job is marked complete and that you have not already reviewed it.
The submit fails.	Make sure a rating is selected and the text meets the length limits, then try again.

Need help?

If a review is abusive or wrong, report it through support at /support.

Guide ID: hiring-work-agreements | **Revision:** 2 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Create and sign work agreements

Guide ID	**hiring-work-agreements**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper
Availability	**Supported**
Online version	/how-it-works/hiring/work-agreements

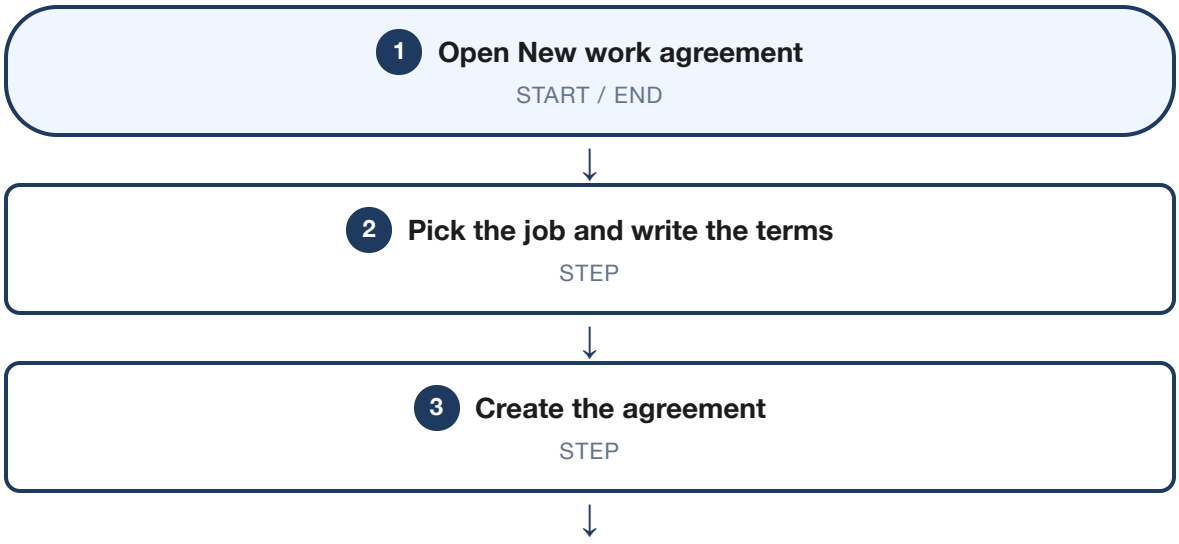

Goal

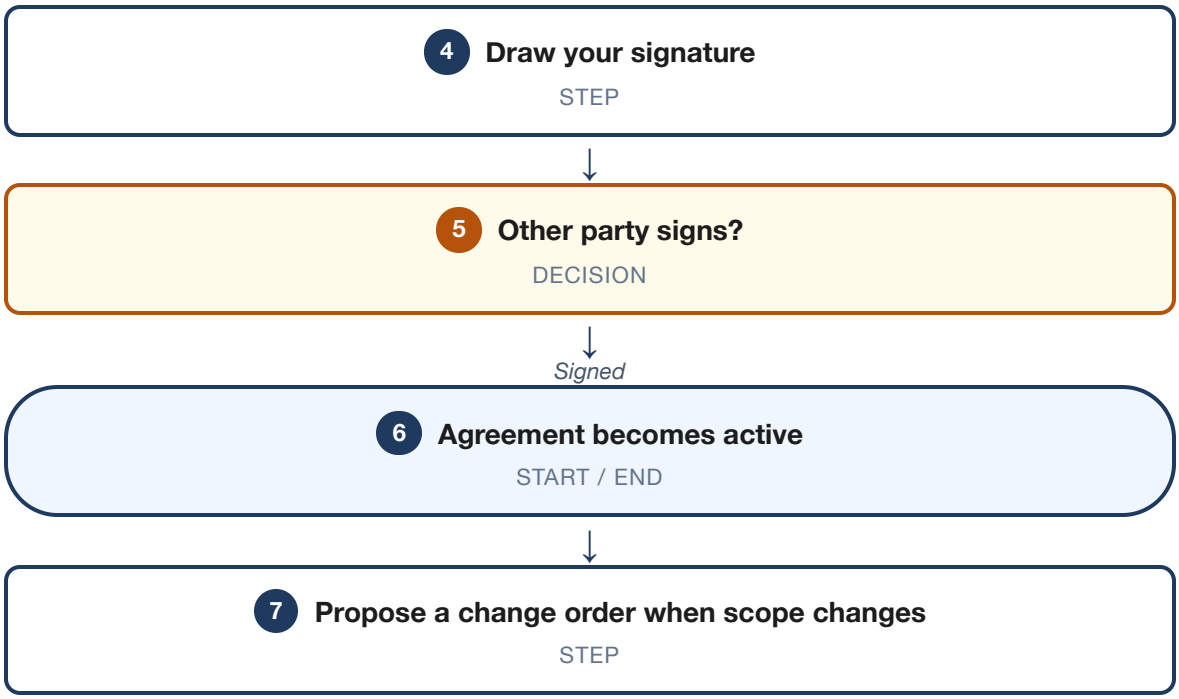

Create a bilateral work agreement with drawn signatures, manage change orders, and keep the records.

Before you start

1. Be signed in to your OxSteed account.
2. Have a job the agreement starts from ("An agreement starts from a job. Pick a job first.").

Process map

- *Not yet:* Other party signs? → Waiting for the other party
- *Signed:* Waiting for the other party → Agreement becomes active

Text version. 1. Open /agreements/new ("New work agreement"). 2. Pick the job, write the Scope of work, the Agreed price, warranty terms, reimbursement terms, and any Other terms; "Draft terms with AI" can start the text. 3. Choose "Create agreement". 4. Open "Sign the agreement" and draw your signature in the pad ("Your drawn signature is binding. A new version requires signing again."), then "Sign" or "Sign this version". 5. The other party signs the same way ("Both parties must sign before the agreement becomes active."). 6. When scope changes, use Change orders: "Propose", then "Sign and submit" ("Your drawn signature is required. Change orders are binding once both parties sign.").

Steps

Step 1: Create a new work agreement from the job

Open /agreements/new. The heading is "New work agreement" with the description "Create a bilateral work agreement with drawn signatures." Pick the job the agreement is for. Write the Scope of work, the Agreed price, Warranty terms ("e.g. Six months on the repair. If the leak returns, the helper returns to fix it."), Reimbursement terms, and Other terms. "Draft terms with AI" can generate a starting draft if you prefer.

> **Expected result:** All terms fields are complete and ready to create.

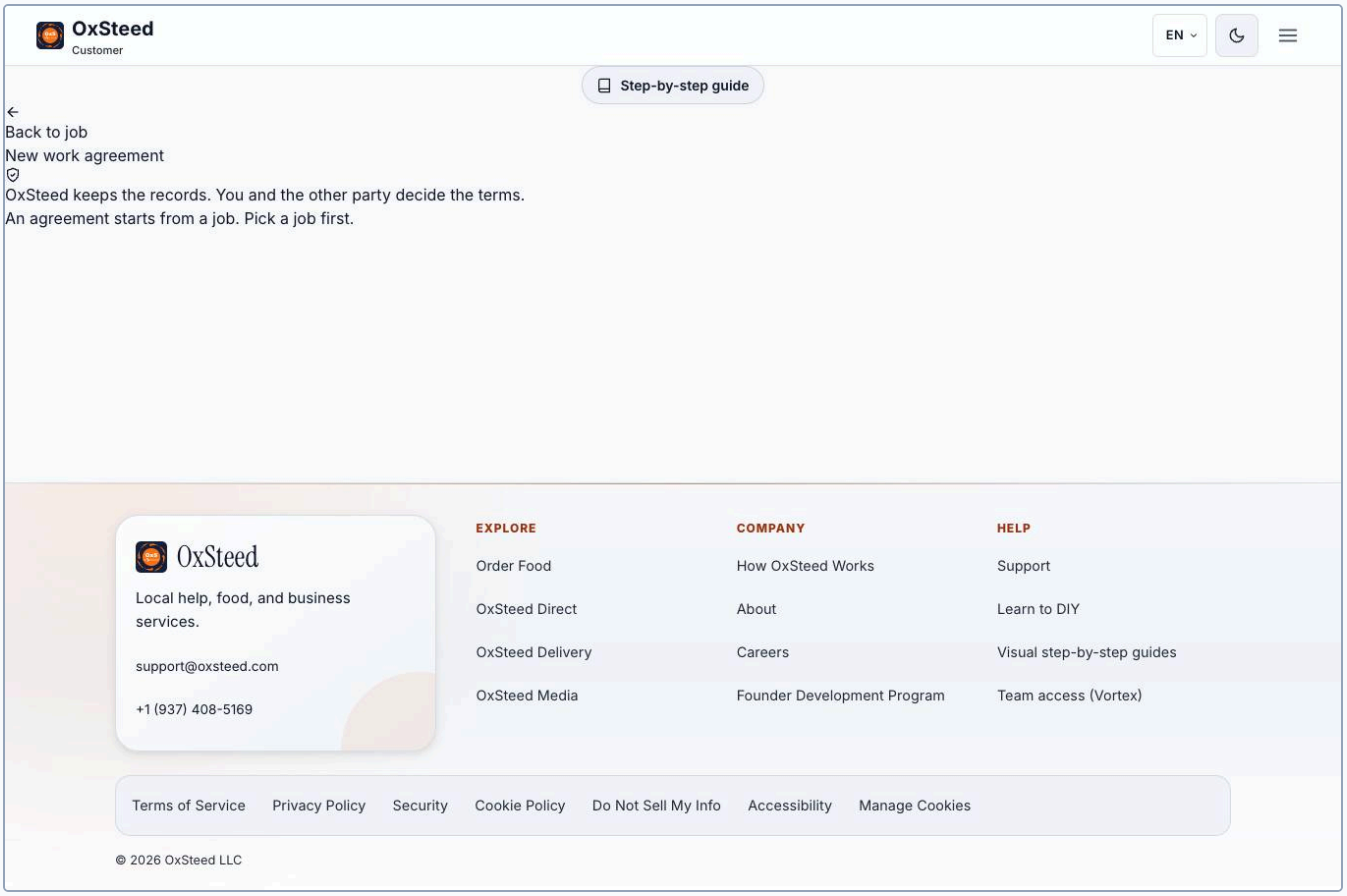

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: New work agreement)*

Step 2: Sign the agreement with a drawn signature

On /agreements/:id, open "Sign the agreement". Draw your signature in the signature pad and choose "Sign" or "Sign this version". The warning reads: "Your drawn signature is binding. A new version requires signing again." Both parties must sign ("Awaiting signature" shows until they do) before the agreement becomes active.

> **Expected result:** Your signature is recorded under Signatures and the other party is asked to sign.

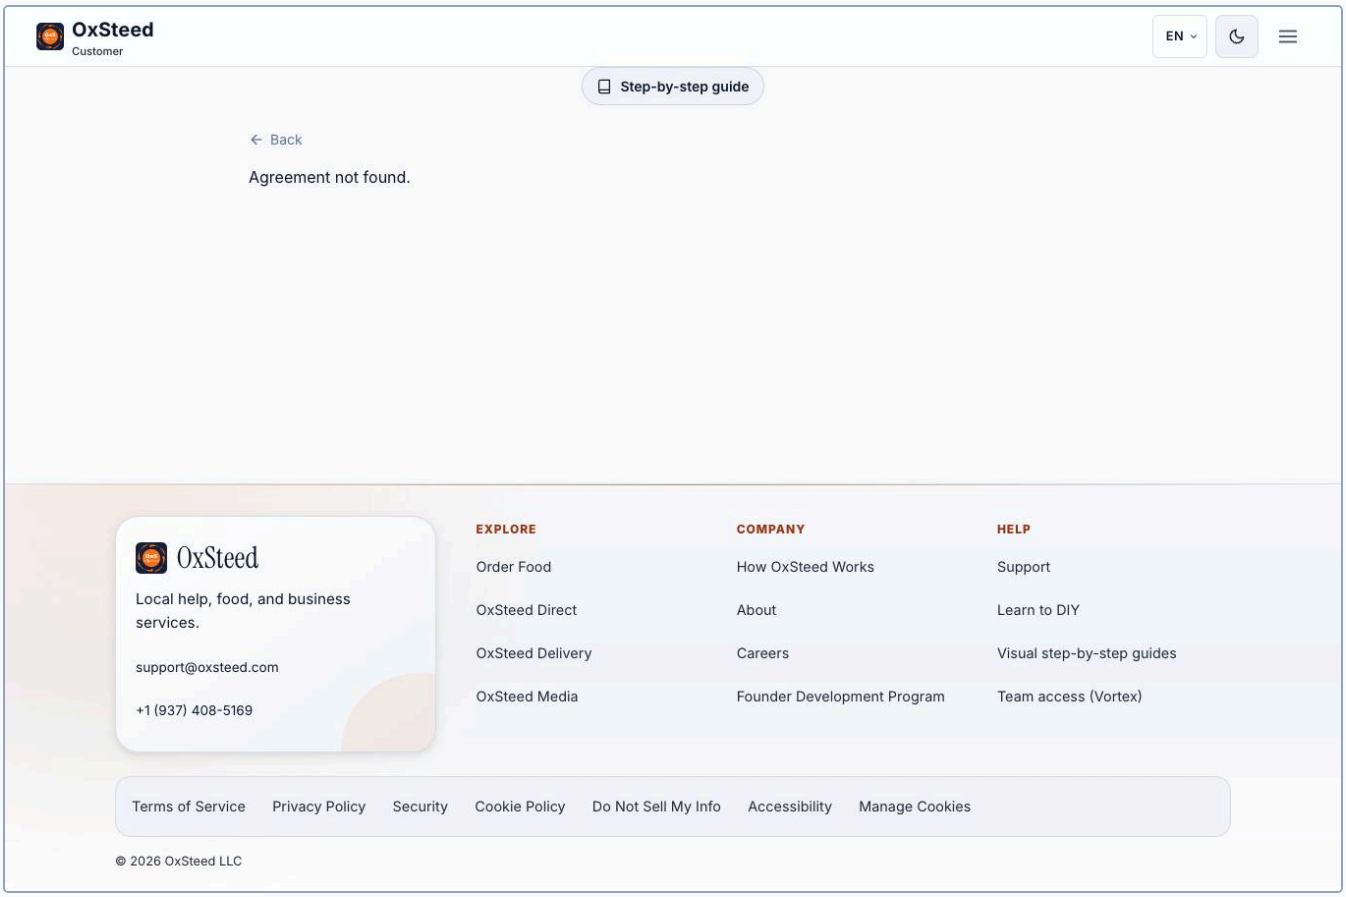

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Sign the agreement dialog with the signature pad)*

Step 3: Use change orders when the scope changes

On the agreement page, open Change orders. Choose "Propose", describe the change and the Price change (USD), then open "Sign the change order" and choose "Sign and submit". The other party reviews and signs too; "Waiting for the other party to decide." shows in the meantime. Every version keeps its own Timeline entry.

> **Expected result:** The change order is proposed and signed by both parties.

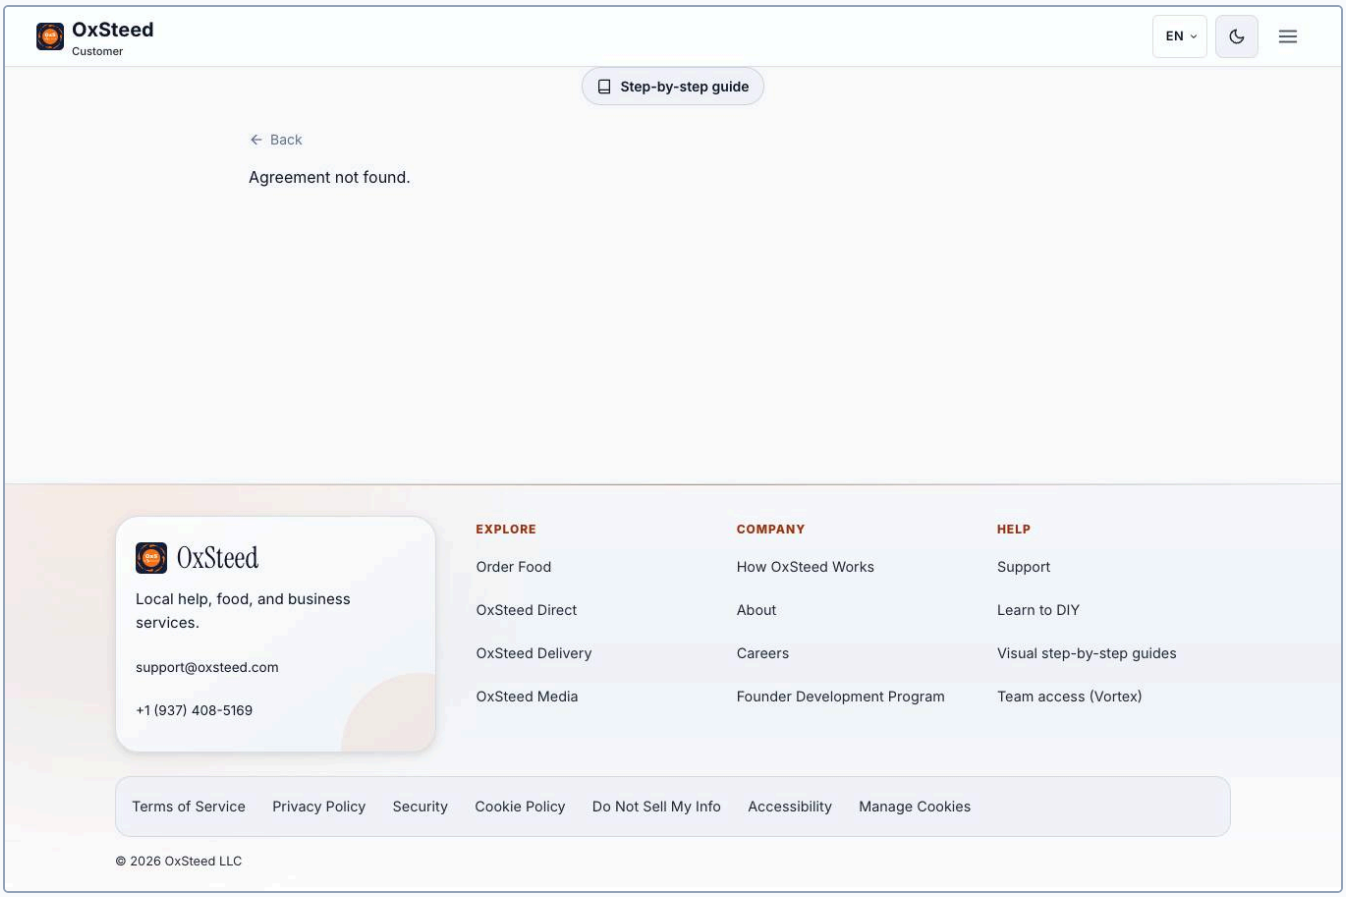

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Change orders section with the Propose button)*

Step 4: Keep the records: vault, evidence, and warranty claims

Use the Document vault to upload outside paperwork ("Choose a file" or "Or paste an https link"). Add Evidence: before and after photos plus the testing record. If the work fails under warranty, choose "File claim" in Warranty claims; the note explains "OxSteed records the claim. The parties resolve it between themselves." When the work is done, use "Confirm complete" ("Both of you confirm before the agreement is marked complete.").

> **Expected result:** Records, evidence, and any claims are stored on the agreement timeline.

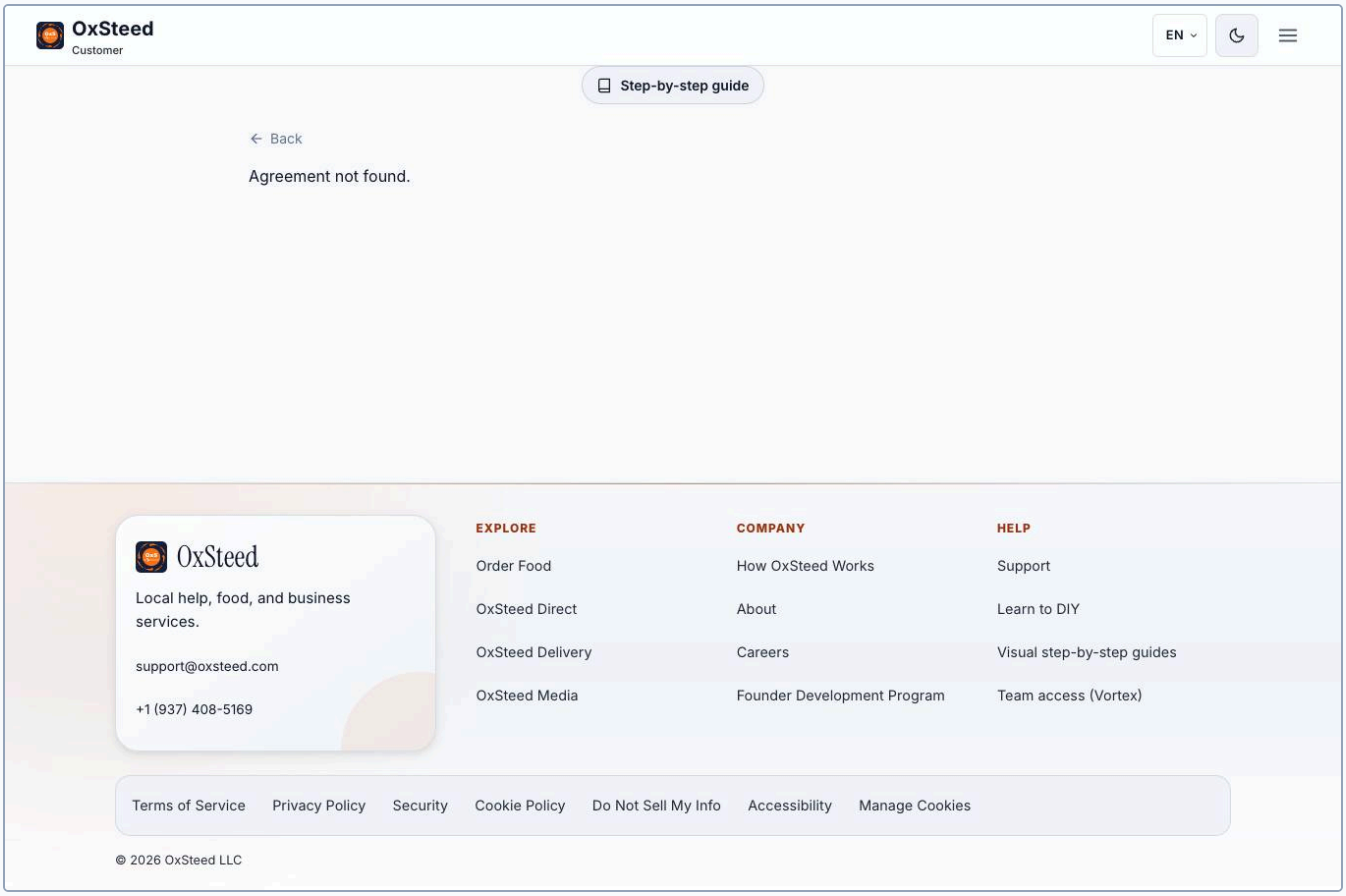

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Document vault and warranty claims sections)*

Confirm it worked

The agreement shows both signatures and becomes active. The Timeline records versions, change orders, evidence, and claims; "OxSteed keeps the records. You and the other party decide the terms."

If something goes wrong

Problem	What to do
The agreement will not become active.	Both parties must sign the current version. If you edited the terms after signing, the version changed and signing is required again.
A change order is stuck waiting.	The other party must sign too ("You confirmed. Waiting for the other party to confirm."). Message them from the job thread.

Need help?

For issues with a signed agreement, open a dispute on the job or contact support at /support.

Guide ID: logistics-browse | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Browse logistics campaigns and lanes

Guide ID	**logistics-browse**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Logistics participant
Availability	**Supported**
Online version	/how-it-works/logistics/browse-logistics-campaigns

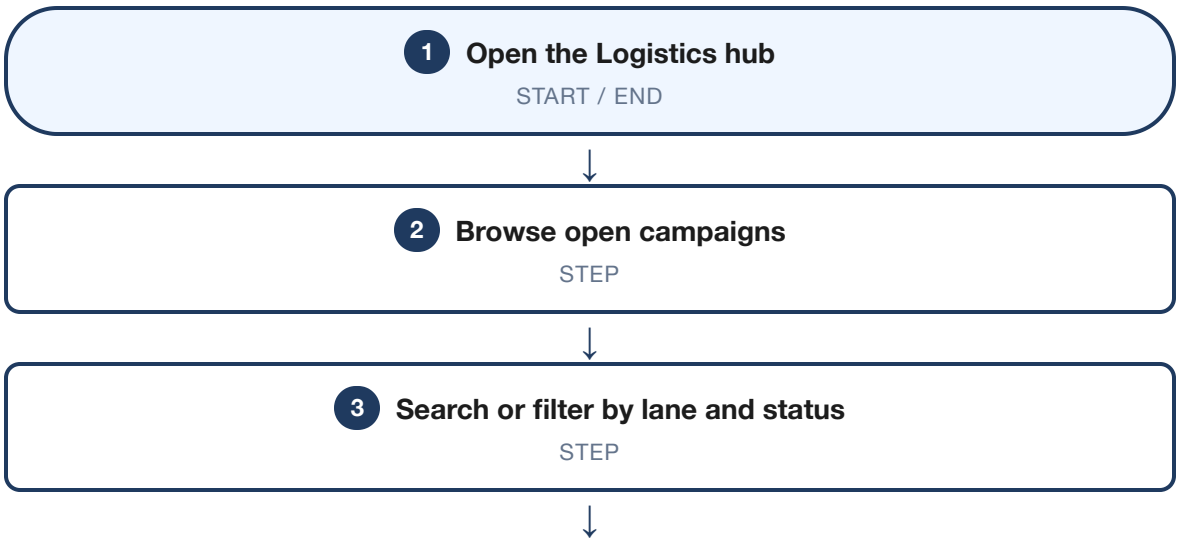

Goal

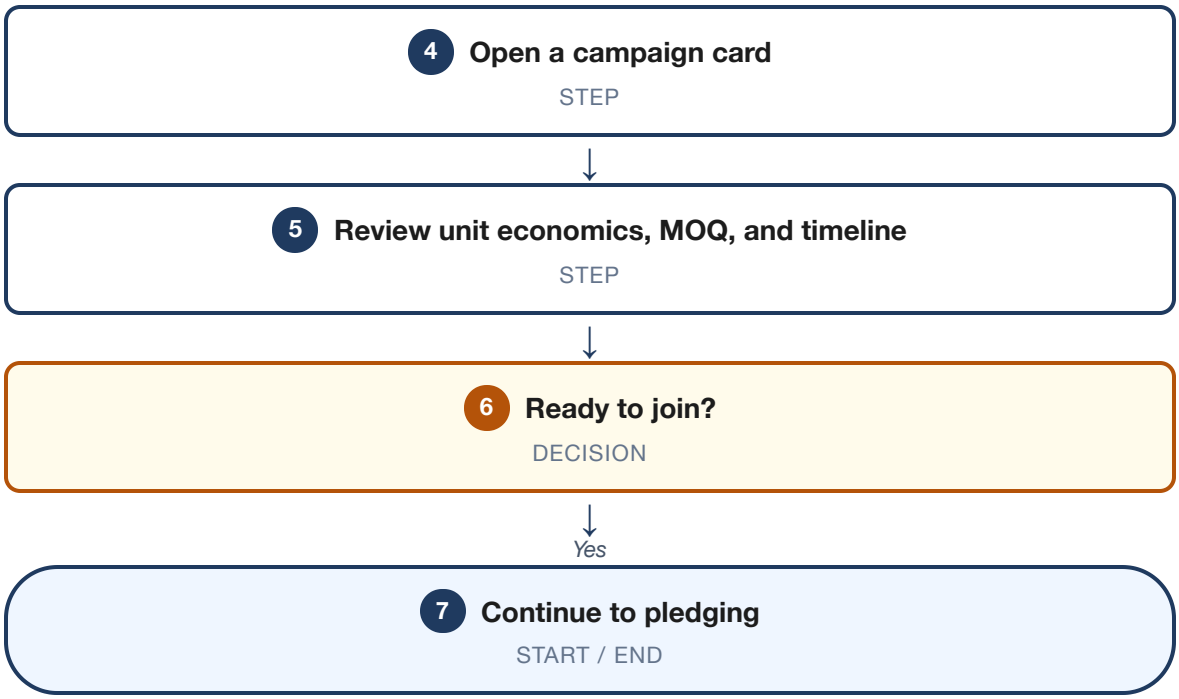

Find an open pooled logistics campaign and review its pricing, lane, and timeline before joining.

Before you start

1. A free OxSteed account is enough to browse. Sign in to pledge or participate.

Process map

- *Not yet:* Ready to join? → Search or filter by lane and status

Text version. 1. Open the Logistics hub. 2. Browse the open campaigns list. 3. Use search and the lane and status filters to narrow the list. 4. Open a campaign card to see its detail page. 5. Review the unit economics, MOQ progress, and timeline. 6. If the campaign fits your needs, continue to pledging; otherwise refine your filters and keep browsing.

Steps

Step 1: Open the Logistics hub

Choose Logistics in the main navigation, or open /logistics directly. The page is titled "OxSteed Logistics" with the subtitle "End-to-end import, sourcing, pooled procurement, and distribution." Guests see the hero section "Global supply chains were built for corporations." plus the "How pooled buying works" section and role cards for buyer, organizer, and business.

> **Expected result:** The Logistics hub loads with open campaigns listed under "Open Campaigns".

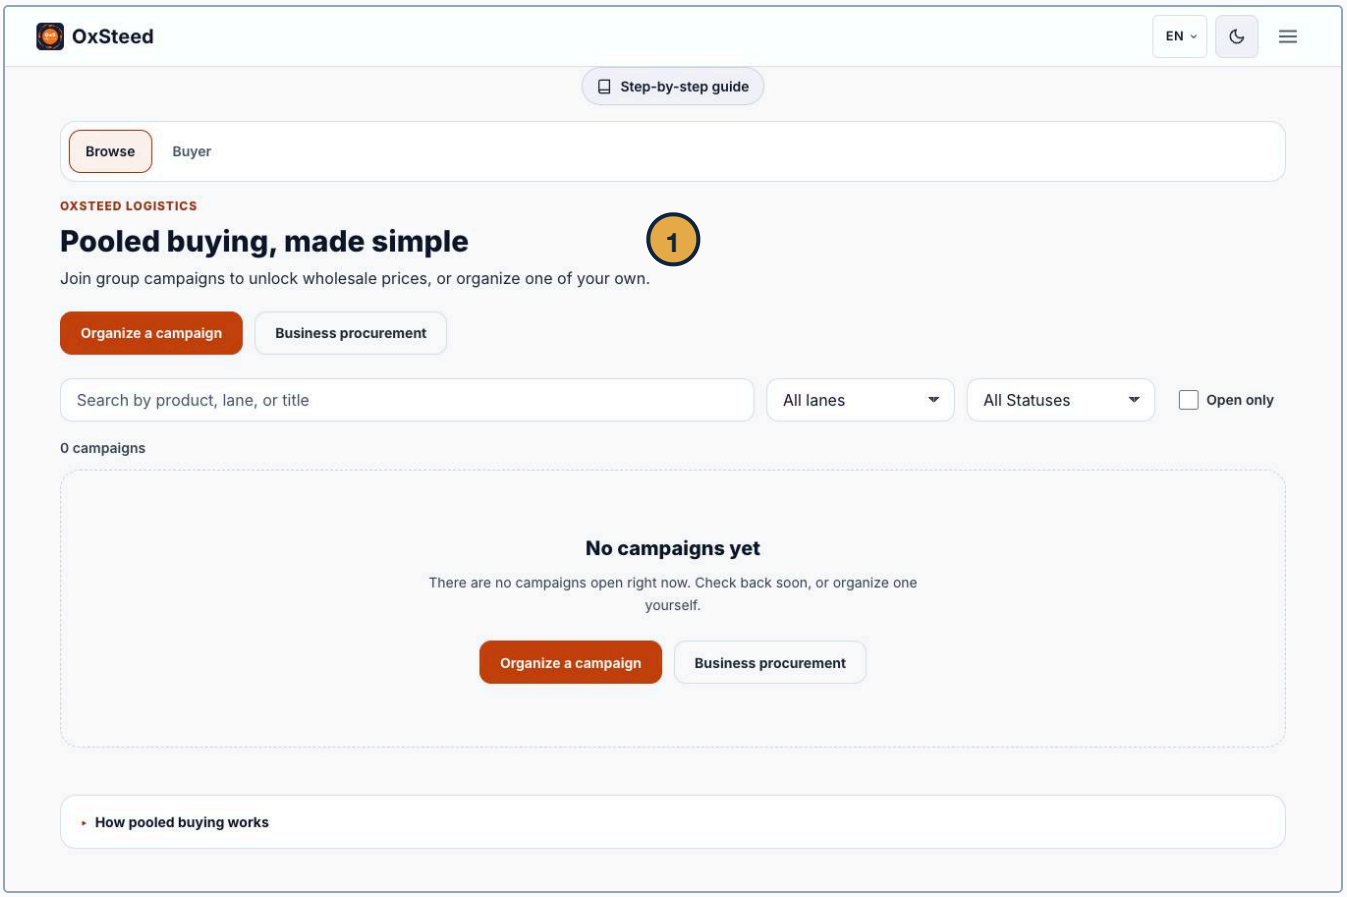

Figure 1. The Logistics hub with open campaigns, desktop view. *(Image description: Synthetic example: Pooled buying, made simple)*

1. **1.** Page title

Step 2: Search and filter campaigns

Use the "Search campaigns" field (placeholder "Search by product, lane, or title") to find a product. Use the "Status" and "Lane" dropdowns to narrow by lifecycle and trade lane. The results count shows "{{count}} campaigns". If nothing matches, you see "No campaigns match your filters" with a "Clear filters" button to reset.

> **Expected result:** The campaign list updates to match your search and filters.

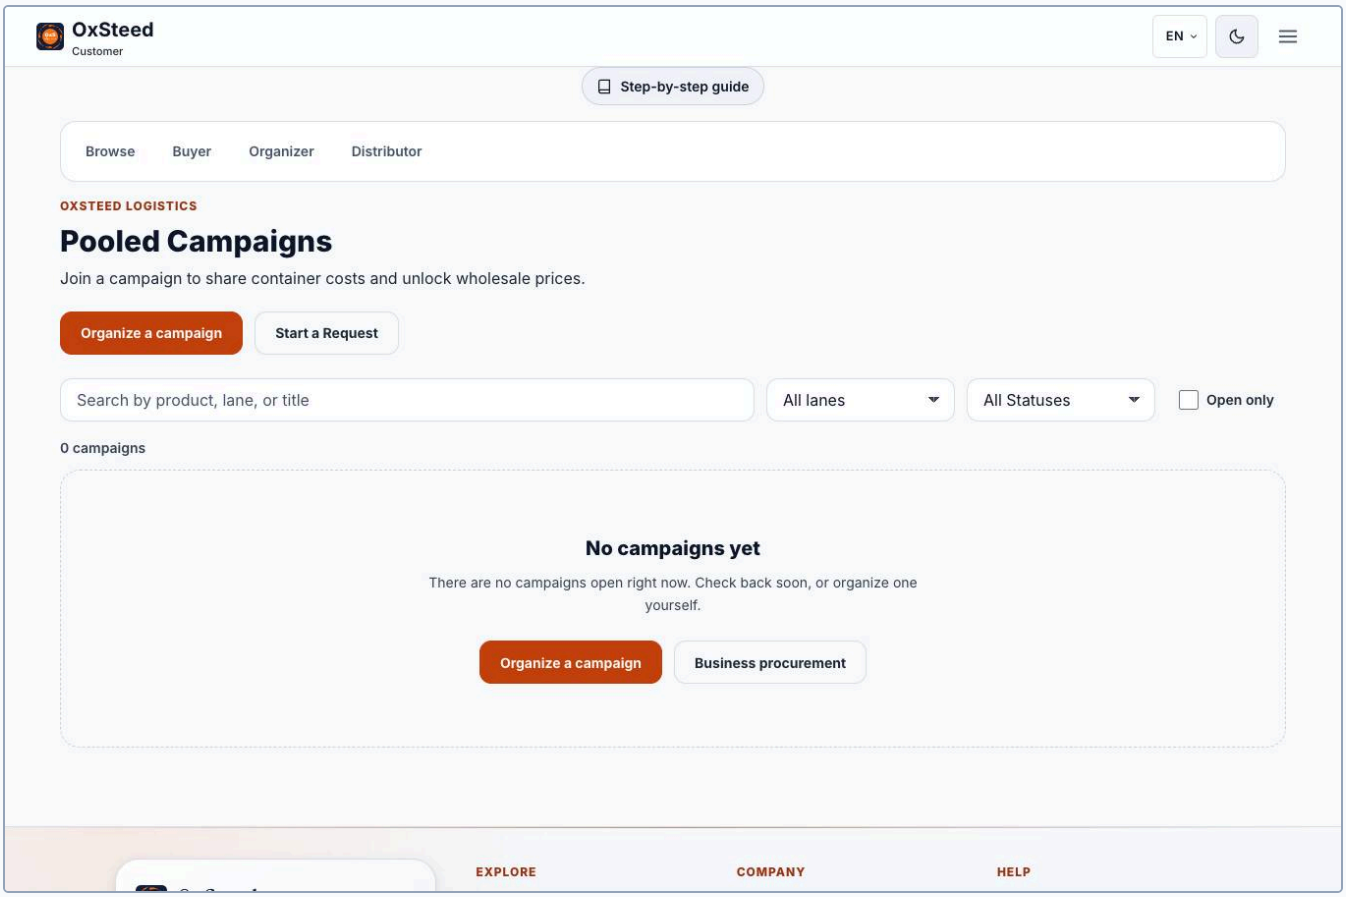

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Pooled Campaigns)*

Step 3: Open a campaign and review the details

Choose "View Details" on a campaign card. The detail page shows the "Unit Economics" panel (Product Cost, Freight (est.), OxSteed Markup, Fees, Landed Cost / unit, Deposit (30%)), the "Timeline" panel (Open Date, Close Date, Lock Date, Expected Ship, Expected Arrival), and "MOQ progress" ("{{committed}} / {{target}} units committed"). Check the participants list and the delivery preference options (Warehouse Pickup, Ship to Me, Freight Forward).

> **Expected result:** You can see the full landed cost, timeline, and MOQ progress for the campaign.

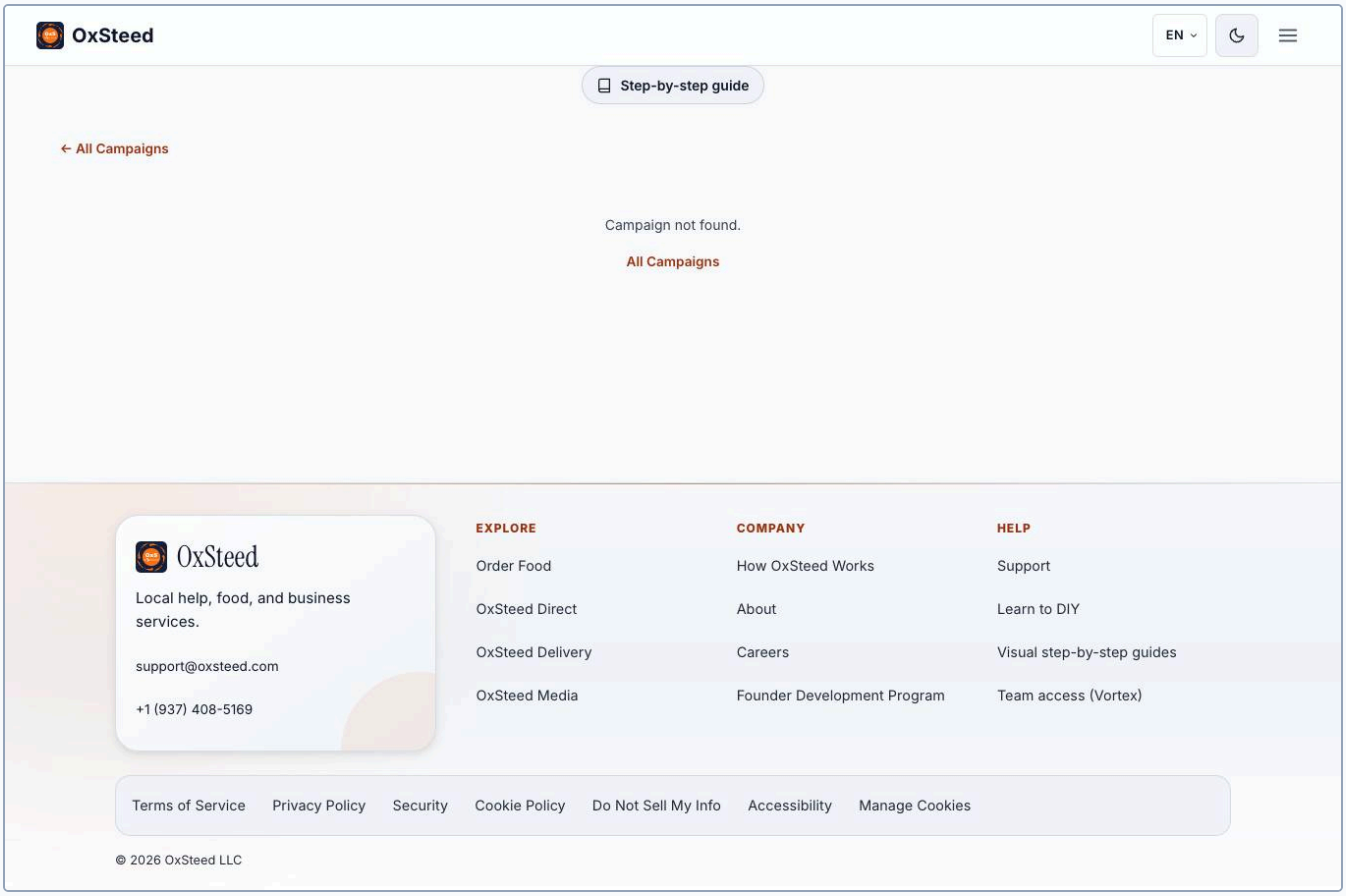

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Campaign detail with unit economics, timeline, and MOQ progress)*

Step 4: Pick your path from the role cards

Back on the hub, the "Which one are you?" role cards offer three paths: "Join a group shipment" with the "Browse campaigns" button for buyers, "Run a group buy" with the "Start a campaign" button for organizers, and "Restock without the broker" with the "Explore procurement" button for businesses. Choose the card that matches what you want to do next.

> **Expected result:** You land on the buyer, organizer, or procurement entry point for your role.

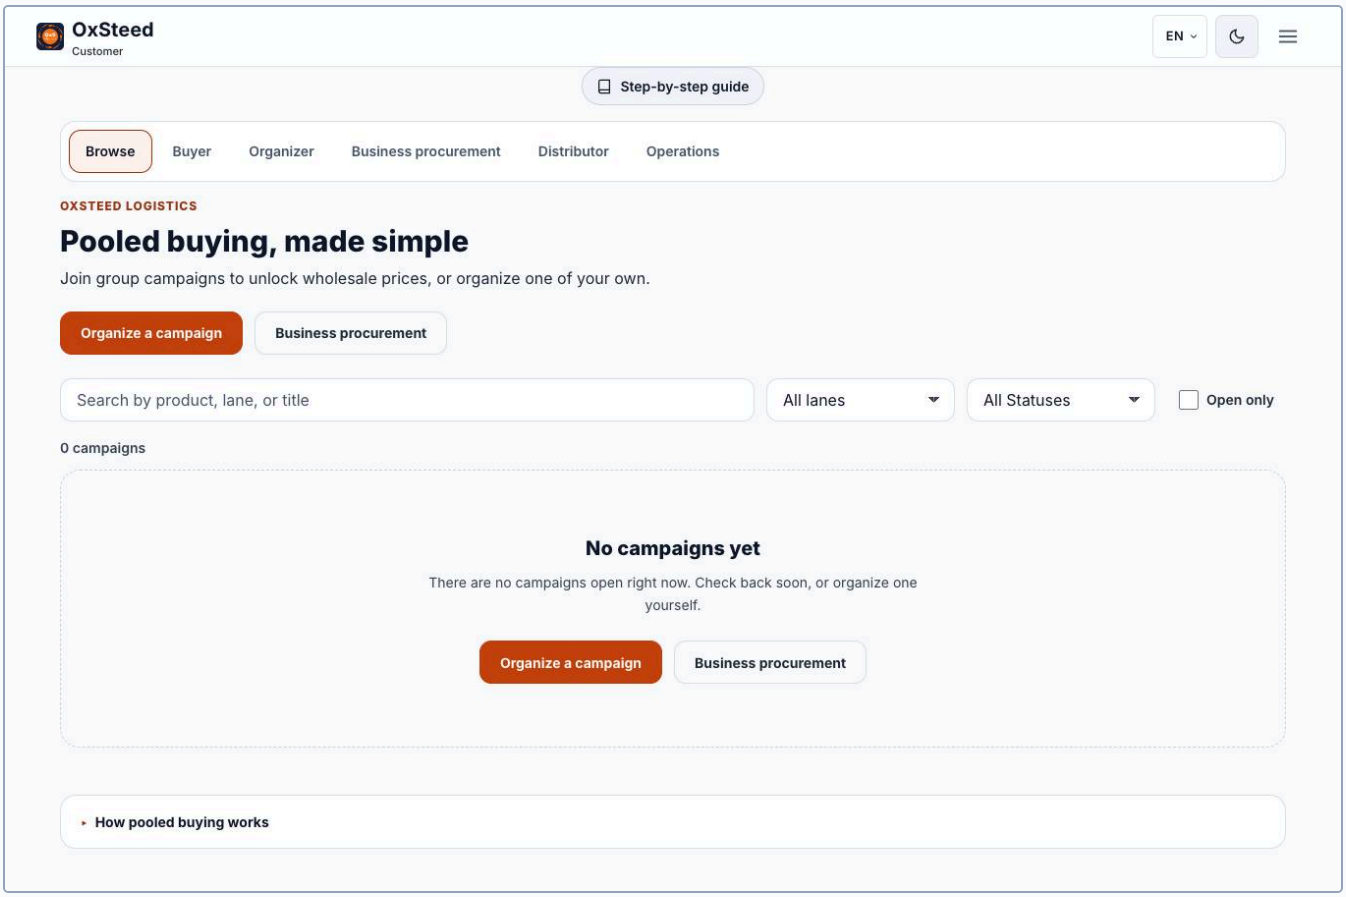

Figure 4. Role cards on the Logistics hub, desktop view. *(Image description: Synthetic example: Pooled buying, made simple)*

Confirm it worked

You opened a campaign detail page and can read its unit economics, MOQ progress, and timeline.

If something goes wrong

Problem	What to do

You see "No campaigns match your filters".	Choose "Clear filters" and broaden the lane or status selection, or try a simpler search term.
The hub shows "No campaigns yet".	No campaigns are open right now. Check back later, or organize one yourself with "Organize a campaign".

Need help?

Questions about a campaign or lane: contact support from the in-app support page at /support.

Guide ID: other-calendar | **Revision:** 2 | **Area:** Calendar

SOP LIBRARY / CALENDAR **ENGLISH**

Manage the calendar

Guide ID	**other-calendar**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/calendar/manage-calendar

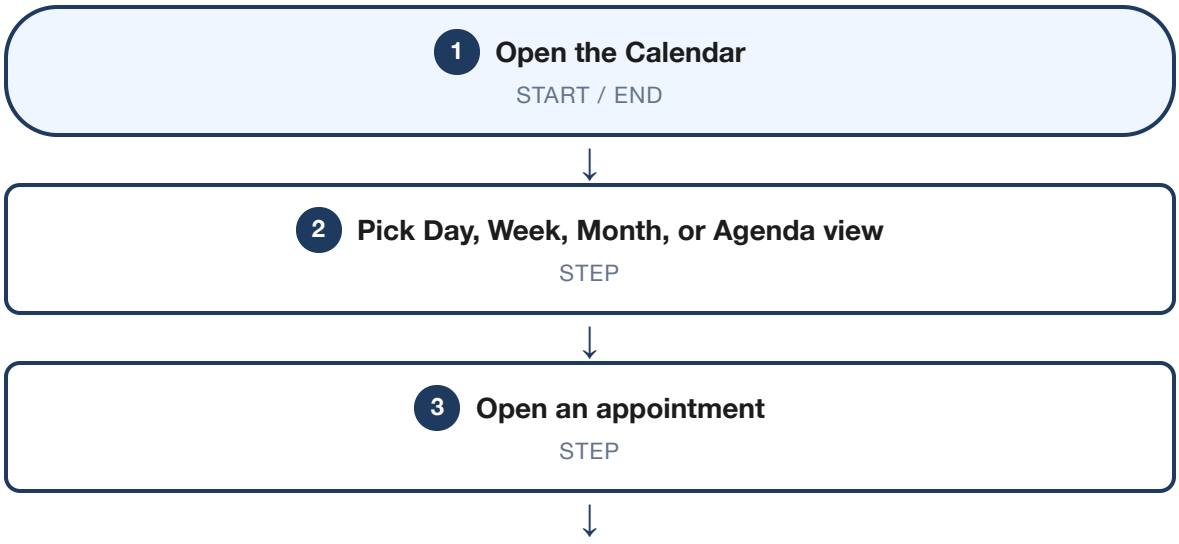

Goal

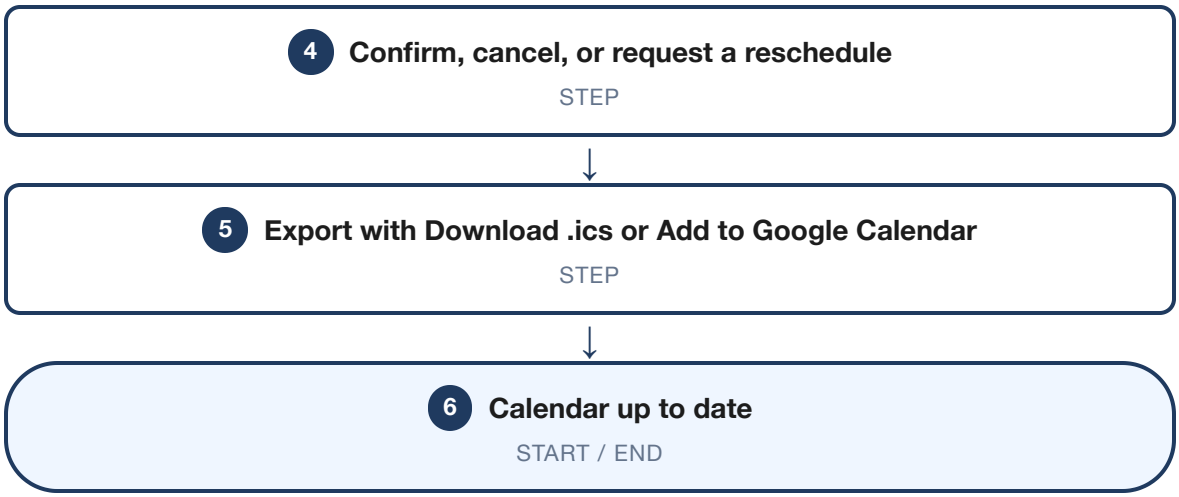

Review appointments, confirm or cancel them, request reschedules, and export to your calendar app.

Before you start

1. A signed-in OxSteed account.
2. Appointments created from bookings or job work.

Process map

Text version. 1. Open the Calendar at /calendar. 2. Switch between Day, Week, Month, and Agenda views. 3. Open an appointment to see its details. 4. Confirm it, cancel it with a reason, or request a reschedule. 5. Export it with "Download .ics" or "Add to Google Calendar". 6. Your calendar stays in sync with your bookings.

Steps

Step 1: Open the Calendar

Open /calendar while signed in. The page is titled "Calendar". The view switcher offers "Day", "Week", "Month", and "Agenda". The legend explains job, booking, and event-type markers. "My Bookings" and "Booking Requests" sections sit alongside the grid.

> **Expected result:** Your appointments appear on the calendar in the selected view.

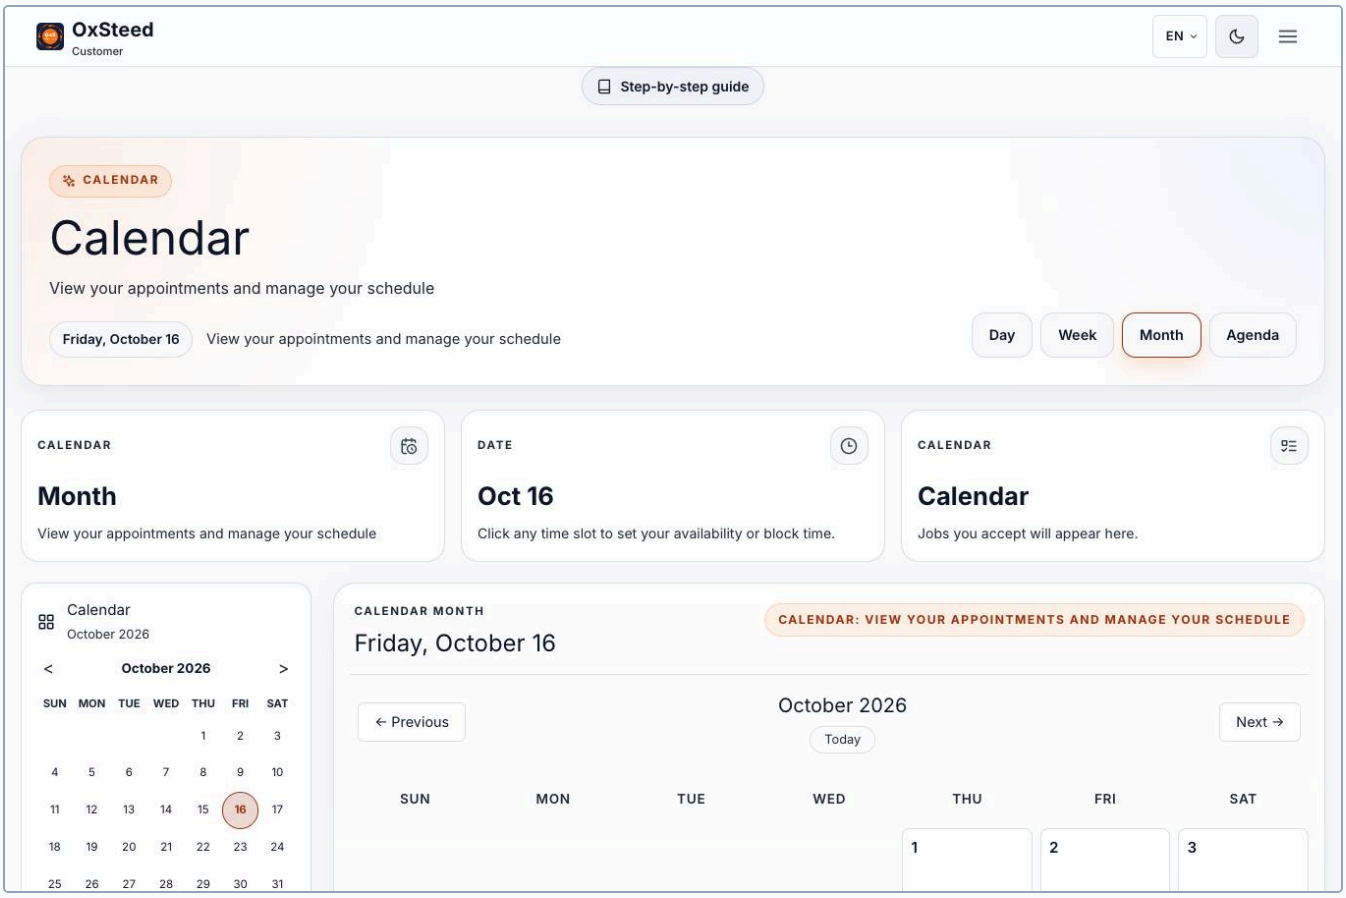

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Calendar)*

Step 2: Open an appointment

Choose an appointment to open /calendar/appointments/:appointmentId. The detail page shows "Appointment Details" with date, time, duration, status (Requested, Confirmed, In Progress, Completed, Cancelled, Rescheduled), plus customer and helper info and notes.

> **Expected result:** The appointment detail page loads with its current status.

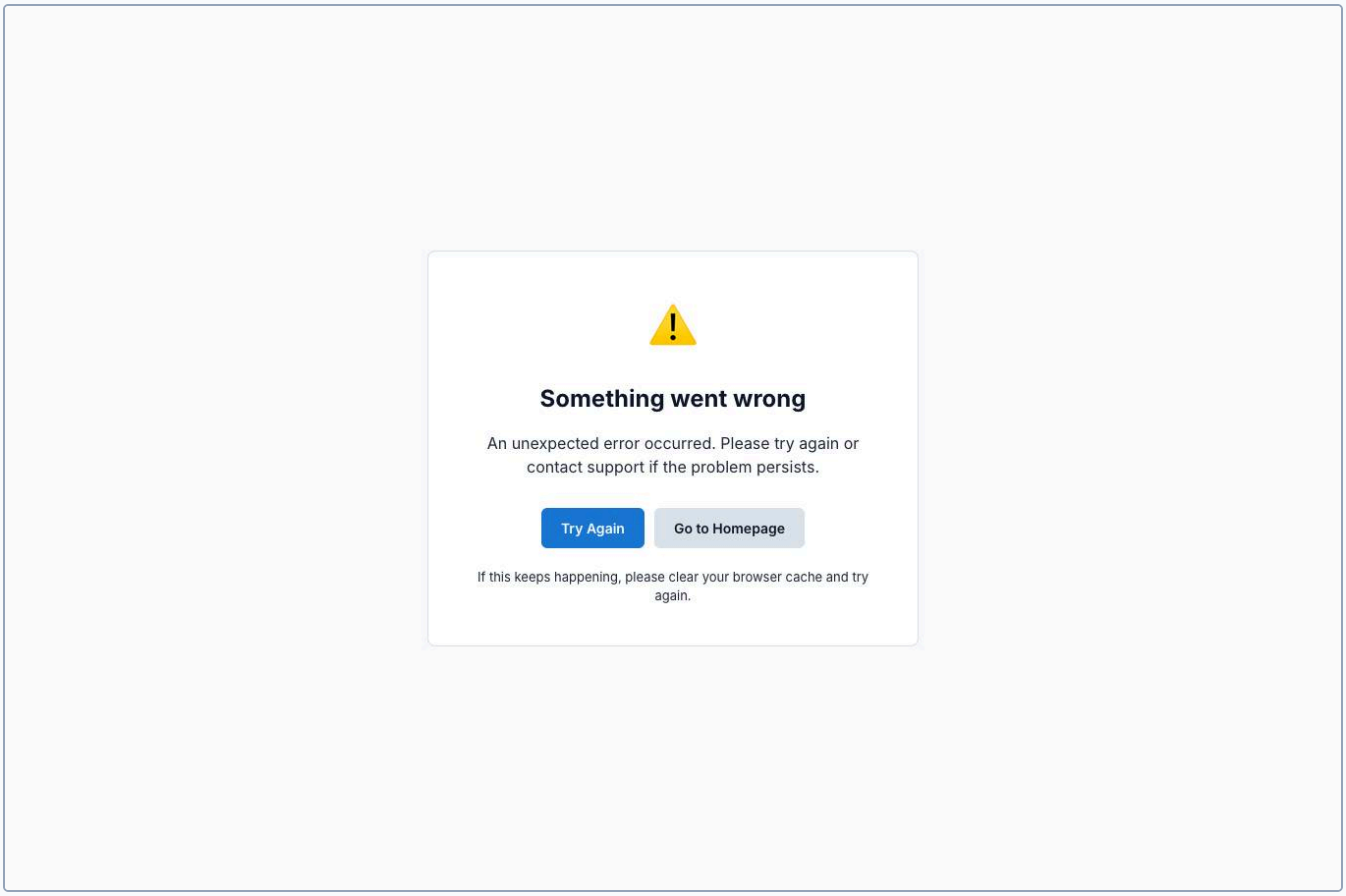

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 3: Confirm, cancel, or request a reschedule

Use "Confirm appointment" to confirm a requested appointment. Use "Cancel appointment" to cancel; you can add a "Cancel reason" in the "Cancel reason" field. Use the reschedule action to request a new time. Status changes are saved immediately and both parties are notified.

> **Expected result:** The appointment status updates (for example to Confirmed or Cancelled).

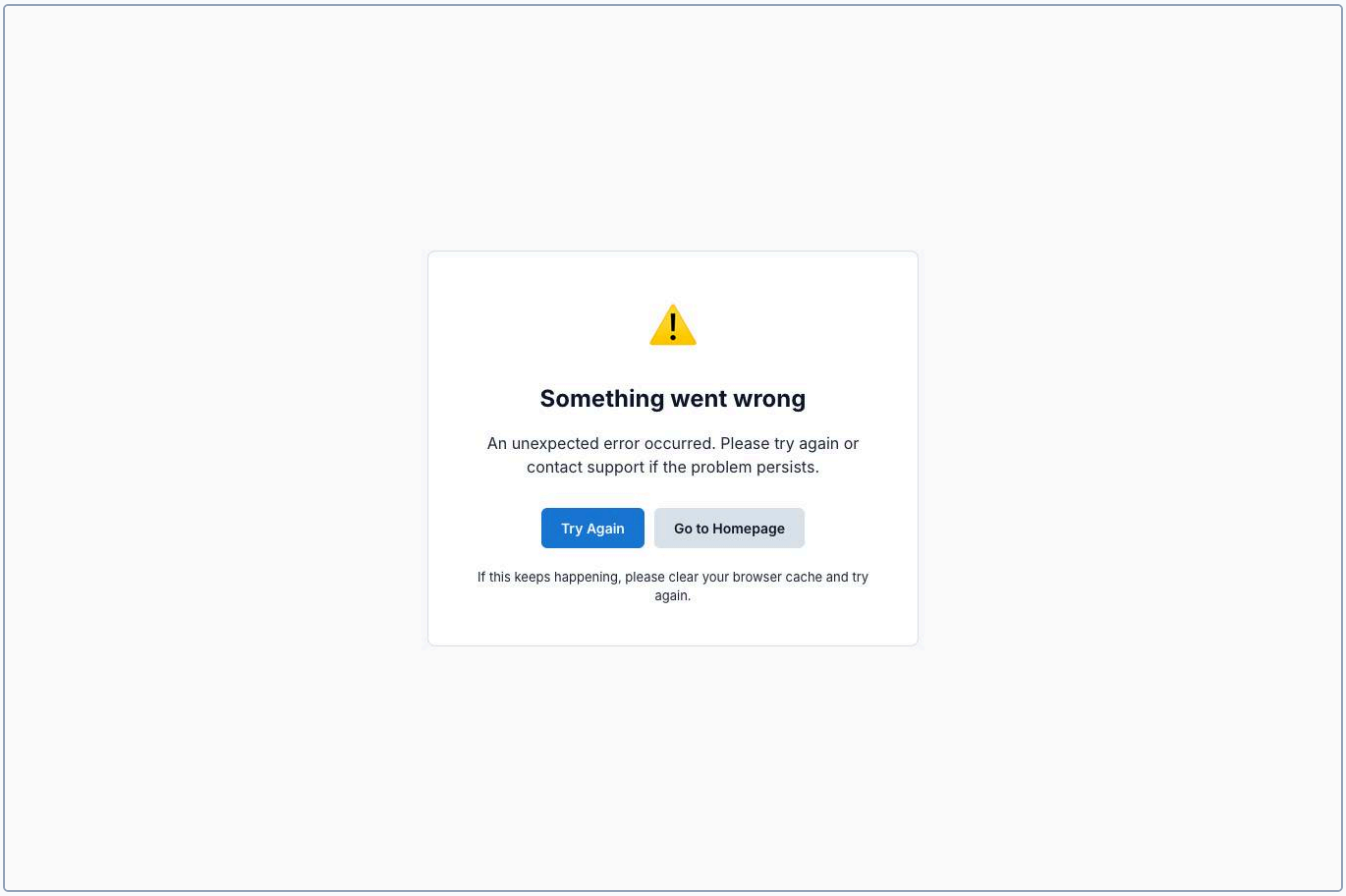

Figure 3. Appointment actions, desktop view. *(Image description: Synthetic example: Something went wrong)*

Step 4: Export the appointment

Use "Download .ics" to save the appointment as an iCalendar file you can import anywhere, or "Add to Google Calendar" to add it directly. Both use the appointment date, time, and duration shown on the detail page.

> **Expected result:** The appointment is saved to your external calendar.

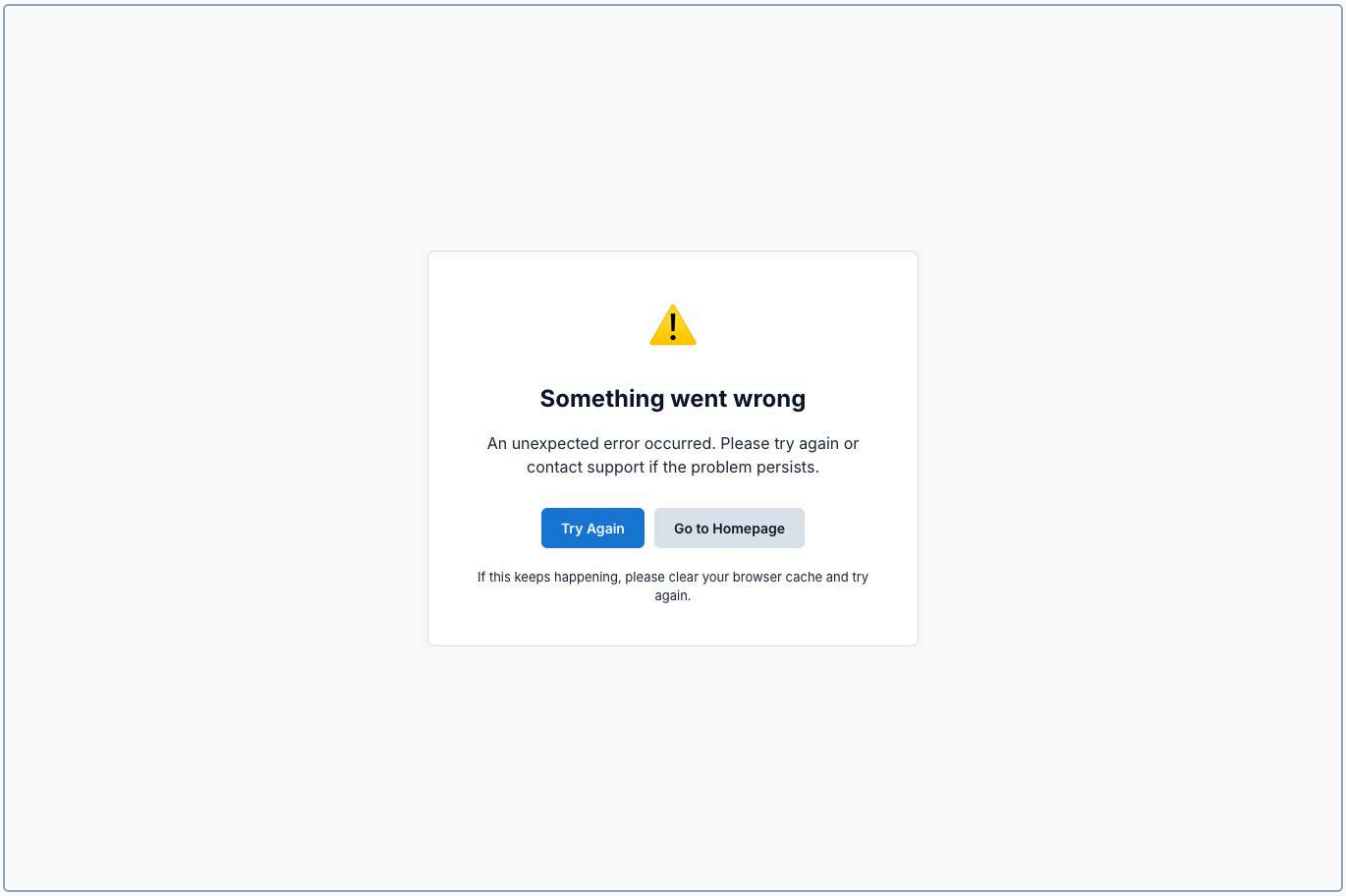

Figure 4. Exporting an appointment, desktop view. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

The appointment shows the expected status and appears in your external calendar after export.

If something goes wrong

Problem	What to do

An appointment fails to load ("Appointment unavailable").	It may have been cancelled by the other party. Check "My Bookings" for the current state.
You cancelled by mistake.	A cancelled appointment cannot be un-cancelled here. Message the other party to create a new booking.

Need help?

Calendar issues: contact support from the in-app support page at /support.

Guide ID: other-car-care | **Revision:** 2 | **Area:** More guides

SOP LIBRARY / MORE GUIDES ENGLISH

Get help with vehicle care

Guide ID	**other-car-care**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Conditional**
Conditions	• This specialized workspace is not available in the current launch. Its legacy address redirects to your dashboard.
Online version	/how-it-works/other/manage-car-care

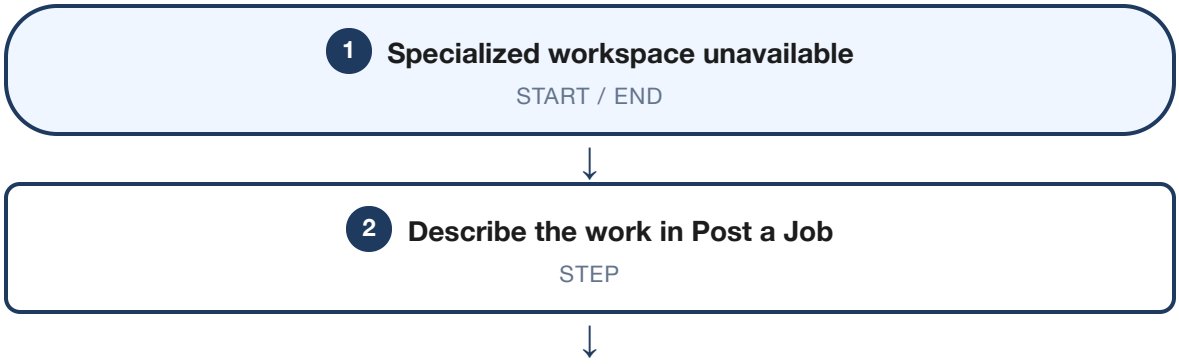

Goal

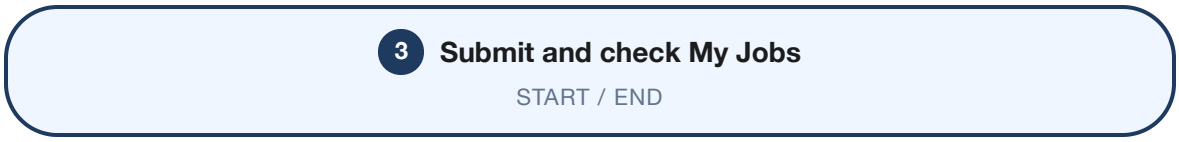

Arrange vehicle care through the available job-posting flow while the specialized workspace is unavailable.

Before you start

1. A signed-in OxSteed account.

Process map

Text version. 1. Specialized workspace unavailable → 2. Describe the work in Post a Job → 3. Submit and check My Jobs

Steps

Step 1: Post the work you need

Open Post a Job. Describe the vehicle care, location, timing, and budget. For recurring work, explain the desired frequency. Review and submit only when the details are correct. The specialized garage or auto-publishing tools are not available in this launch.

Expected result: The posted job appears in My Jobs after a successful submission.

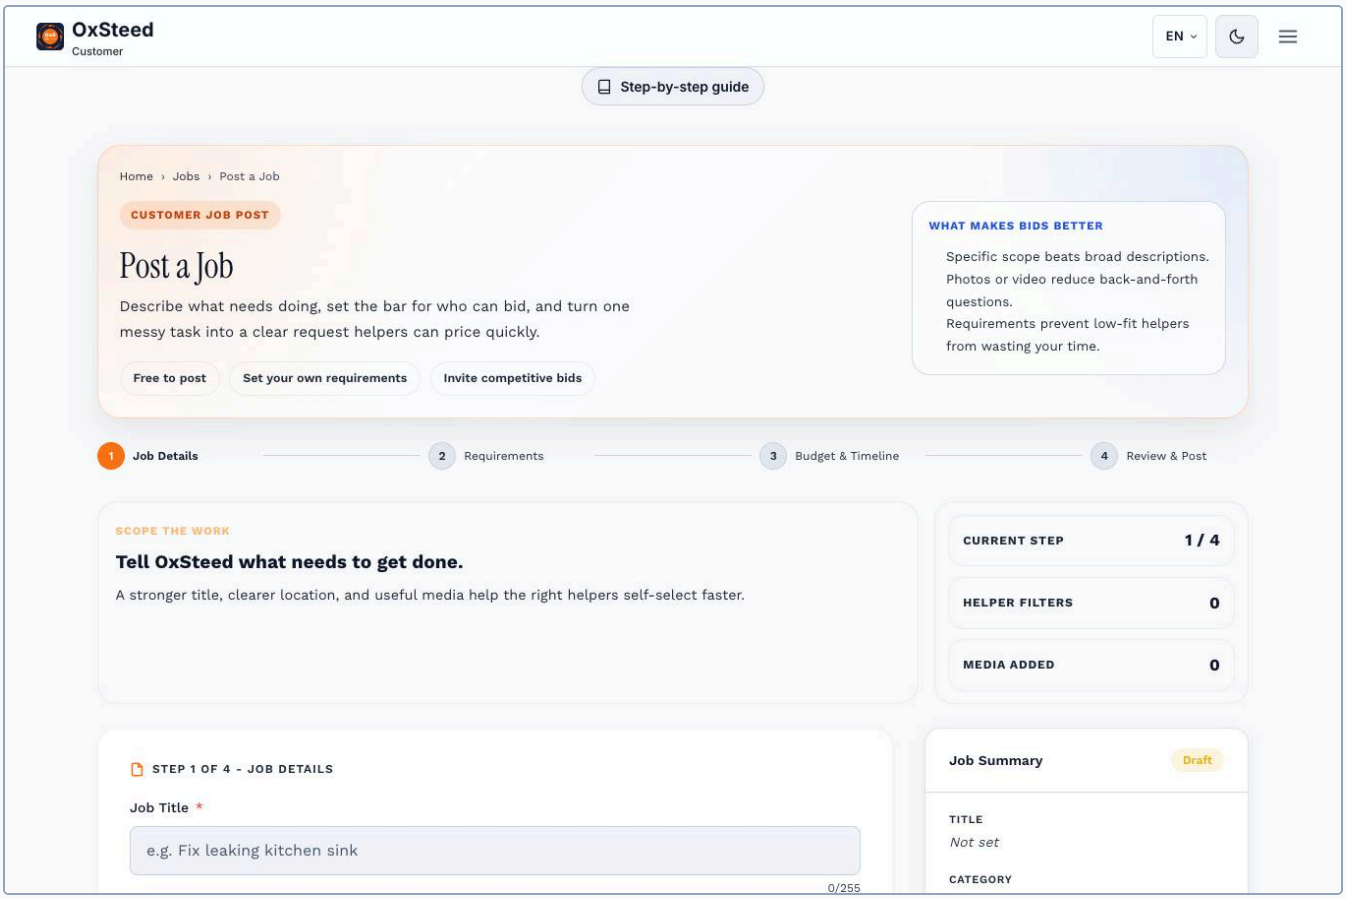

Figure 1. Post a Job is the available alternative. Synthetic example; no live account data. *(Image description: Synthetic example: Post a Job)*

Confirm it worked

Check the saved job in My Jobs. Reading this guide does not create a job or schedule recurring publication.

If something goes wrong

Problem	What to do
The old workspace redirects.	Use Post a Job or contact Support. Do not assume a vehicle or recurring schedule was saved.

Need help?

Car Care issues: contact support from the in-app support page at /support.

Guide ID: other-consulting | **Revision:** 3 | **Area:** Consulting

SOP LIBRARY / CONSULTING ENGLISH

Request business consulting

Guide ID	**other-consulting**
Revision	Revision 3 (generated October 16, 2026)
Intended for	Customer, Helper (consultant)
Availability	**Supported**
Online version	/how-it-works/consulting/request-consulting

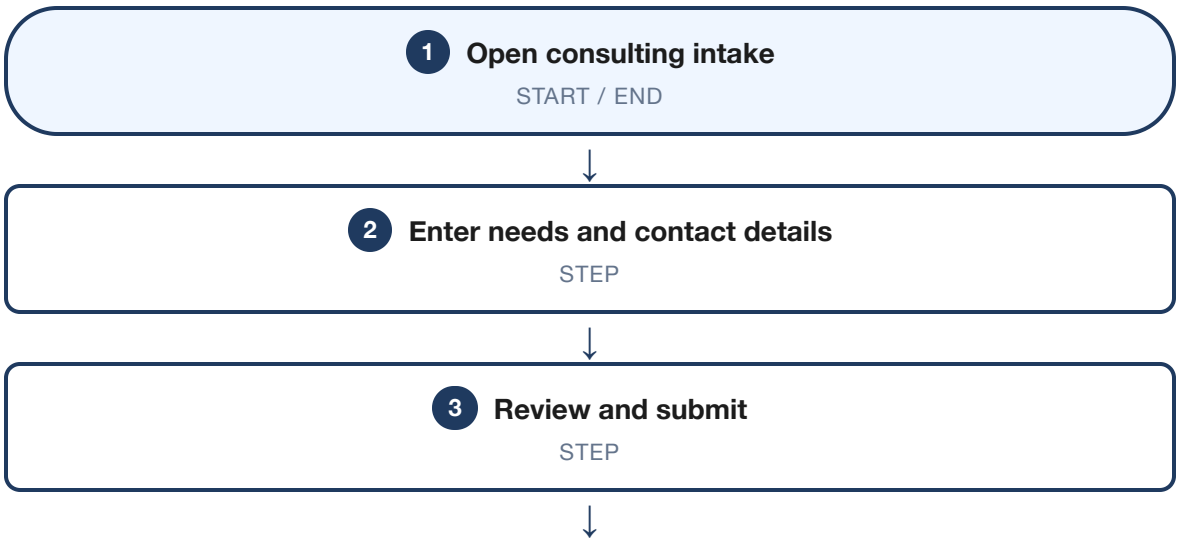

Goal

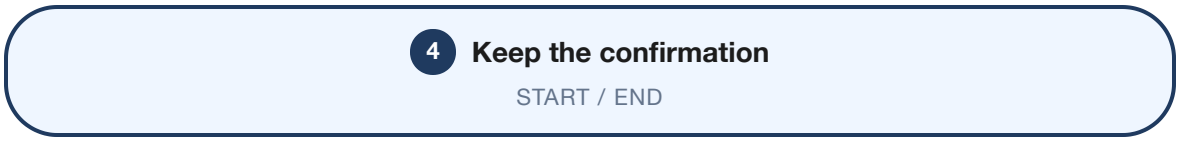

Submit a consulting intake and keep its confirmation for follow-up.

Before you start

1. Have your contact details and business needs ready.

Process map

Text version. 1. Open consulting intake → 2. Enter needs and contact details → 3. Review and submit → 4. Keep the confirmation

Steps

Step 1: Open the consulting intake

Open /consulting-intake. The page is titled "Business Ascension Consulting Intake". The step indicator shows Contact, "Skill & Offer", "Setup Needs", Package, Services, and Confirm. Guests can complete intake without an account.

Expected result: The intake form loads on the Contact step.

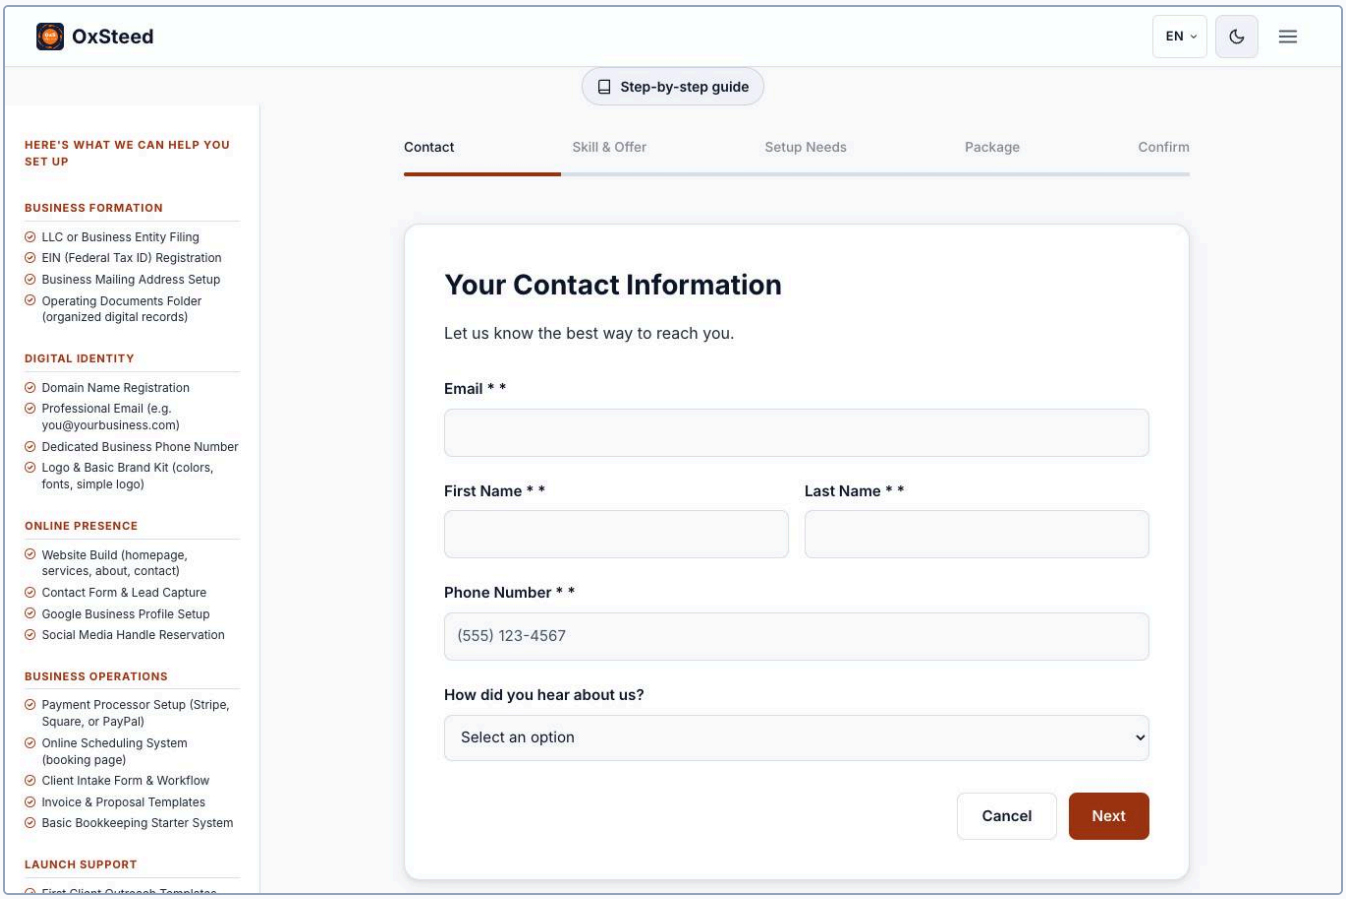

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Your Contact Information)*

Step 2: Complete the intake steps

Fill in Contact (name, email, phone, business name, country), then "Skill & Offer", "Setup Needs", Package, and Services. Use "Back" to go to the previous step and "Next" to continue. Each step validates before you can move on.

> **Expected result:** All steps show as complete and you reach the Confirm step.

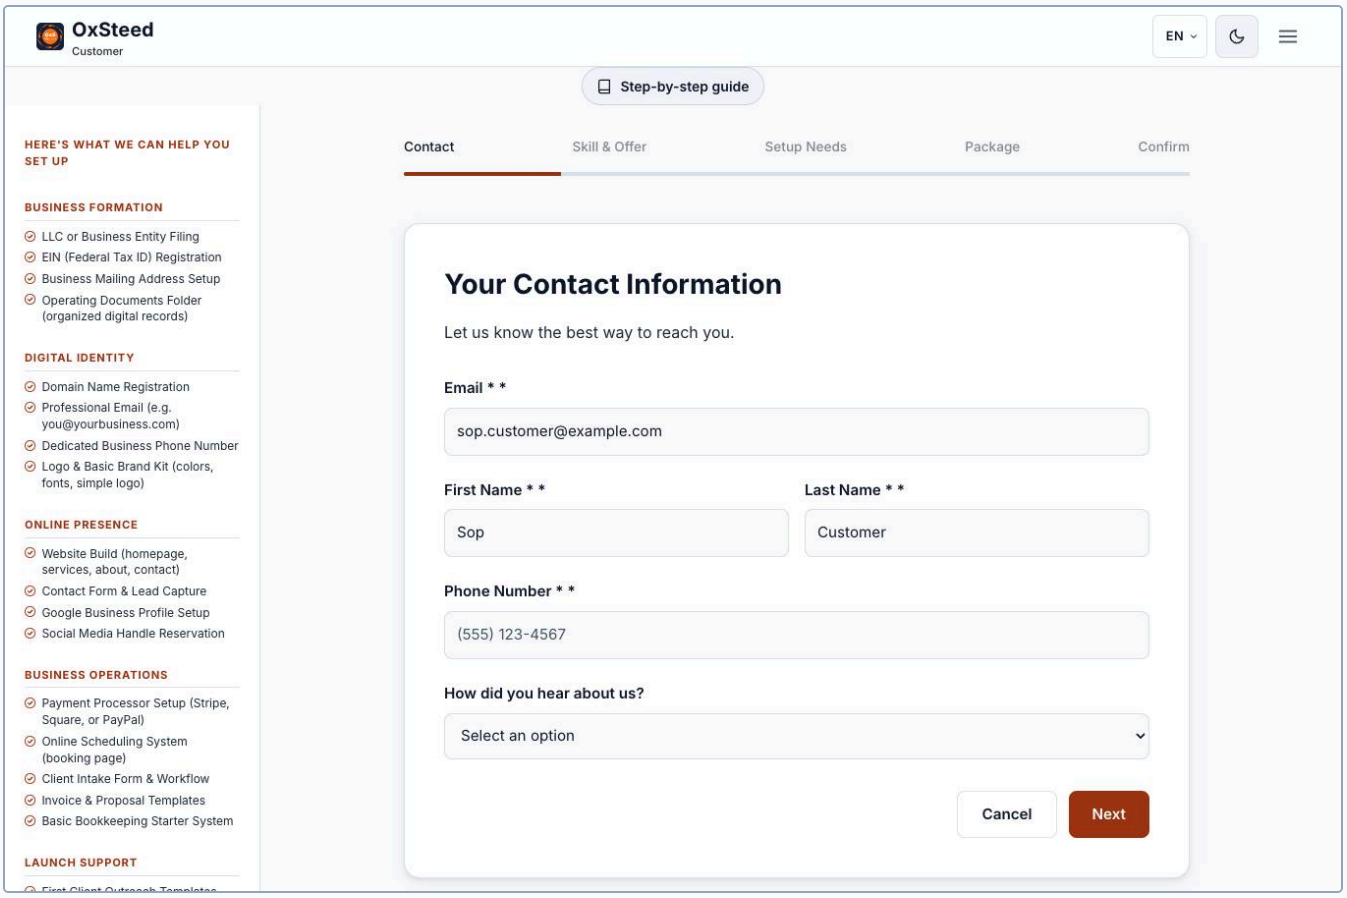

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Your Contact Information)*

Step 3: Review and submit

On the Confirm step, titled "Review Your Submission", check every section: contact details, selected skill and package, setup needs, and services. Choose "Submit & Get Started". You receive a confirmation of your request.

> **Expected result:** The intake is submitted and a confirmation appears.

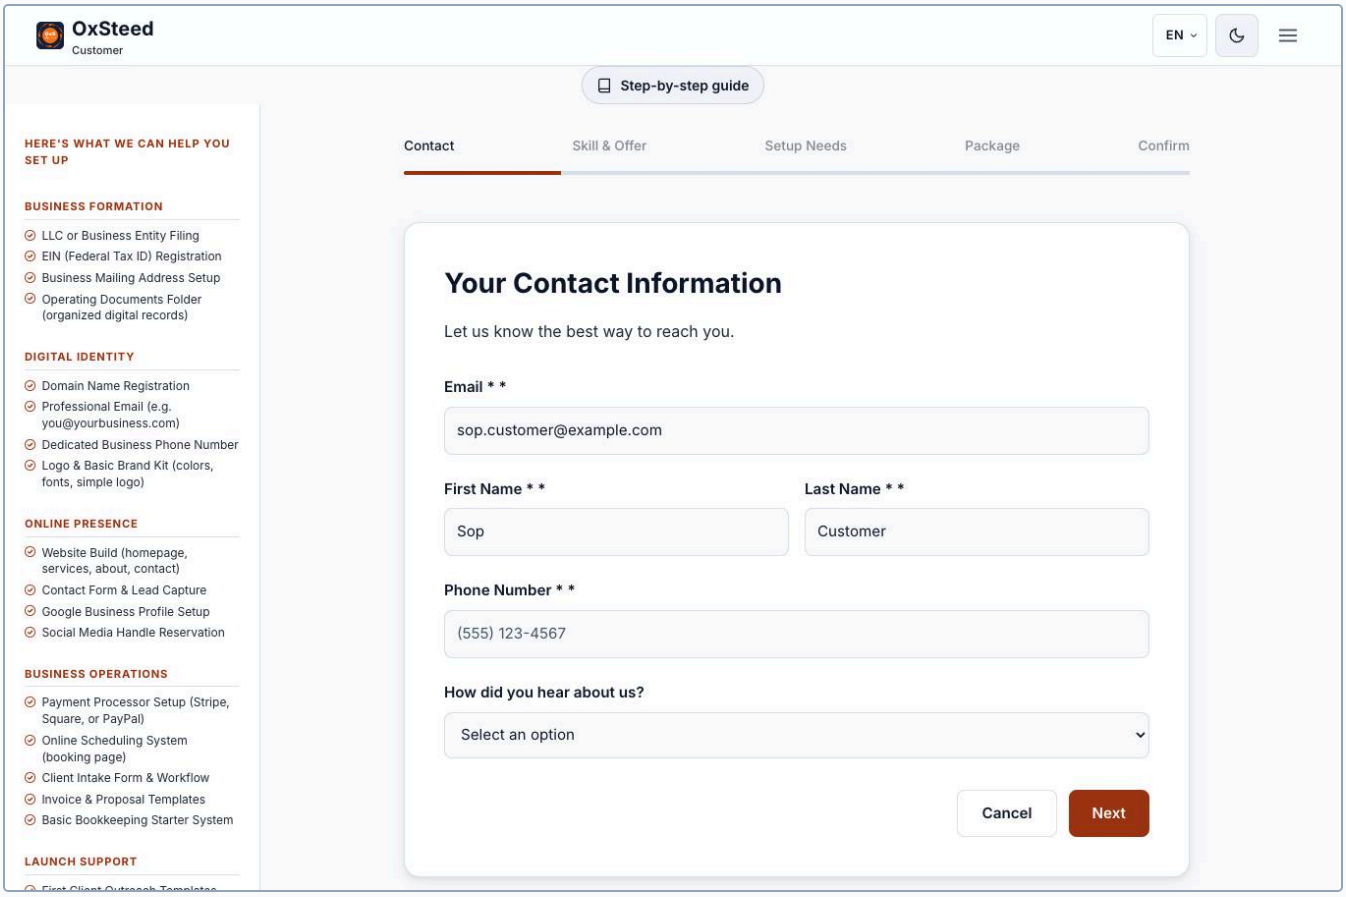

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Your Contact Information)*

Confirm it worked

A successful intake submission shows its confirmation. Contact Support with that reference for follow-up; the legacy consulting portal currently redirects to Business hub.

If something goes wrong

Problem	What to do

The old consulting portal redirects.	Use your intake confirmation and contact Support. A redirect does not mean a session was booked.

Need help?

Consulting questions: contact support from the in-app support page at /support.

Guide ID: other-delivery | **Revision:** 2 | **Area:** Delivery

SOP LIBRARY / DELIVERY **ENGLISH**

Request and track deliveries

Guide ID	**other-delivery**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper (driver)
Availability	**Supported**
Online version	/how-it-works/delivery/request-delivery

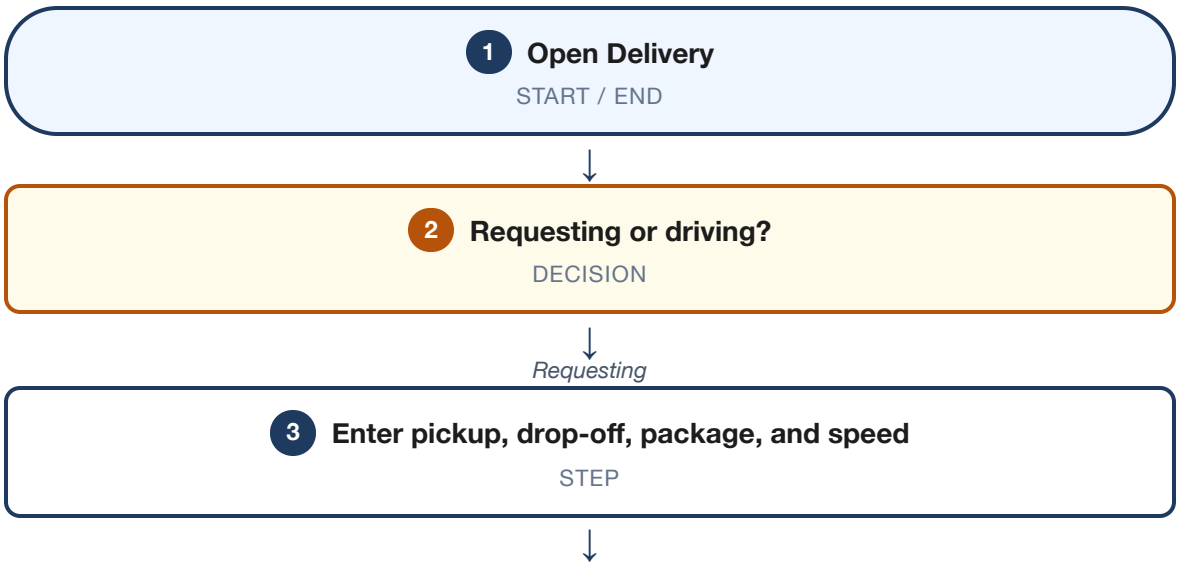

Goal

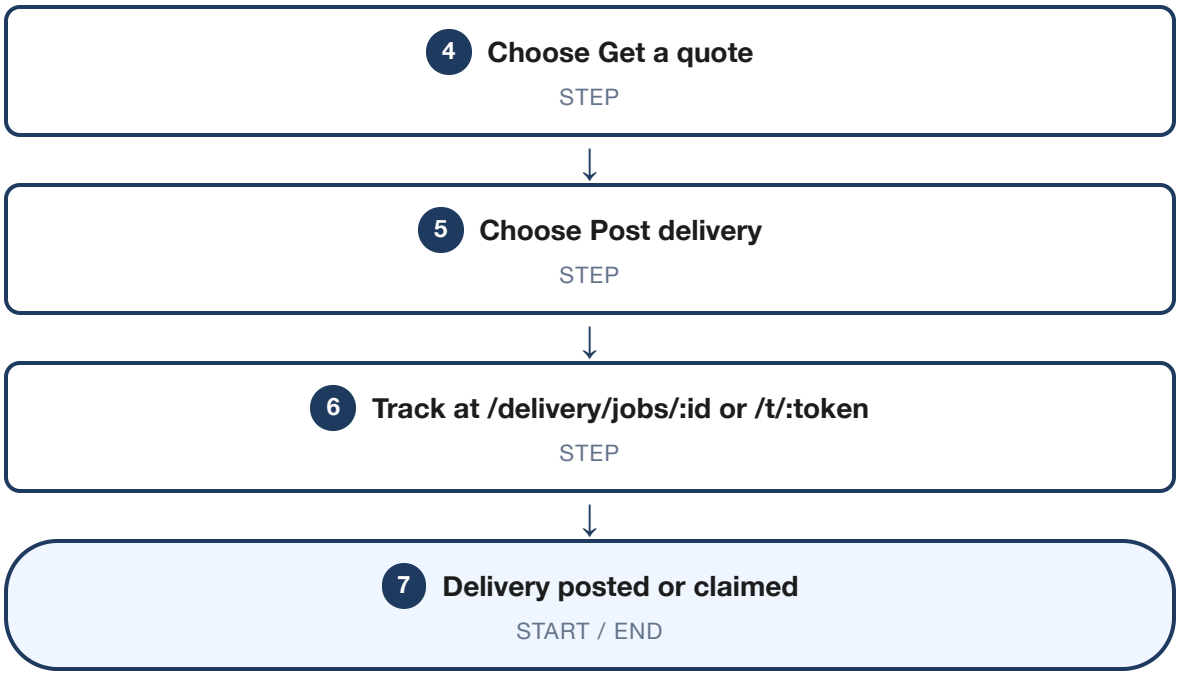

Get a delivery quote, post the delivery job, and track it; or claim a delivery job as a driver.

Before you start

1. Guests can see the landing and get quotes. Sign in to post or claim delivery jobs.

Process map

- *Driving:* Requesting or driving? → Choose Claim delivery on an open job
- Choose Claim delivery on an open job → Delivery posted or claimed

Text version. 1. Open Delivery at /delivery. Guests see the landing page; signed-in users see the delivery workspace. 2. If you are requesting a delivery: enter the Pickup and Drop-off addresses, Package size, Weight (lb), Speed, and Delivery notes. 3. Choose "Get a quote" to see "Your estimated price" with the route distance, duration, and breakdown. 4. Choose "Post delivery" to publish the job. 5. Track it at /delivery/jobs/:id, or share the public tracking link /t/:token. If you are driving: open the driver view titled "Deliver nearby work", choose "Claim delivery" on an open job, and move it through pickup, transit, and drop-off.

Steps

Step 1: Open Delivery and enter the route

Open /delivery. The customer form is titled "Book a delivery" with the body "Tell us where it starts, where it is going, and how quickly it needs to arrive." Enter "Pickup" ("Choose a pickup address") and "Drop-off" ("Choose a drop-off address"). Choose an address suggestion for both stops so the route can be priced accurately.

> **Expected result:** Both stops show selected addresses.

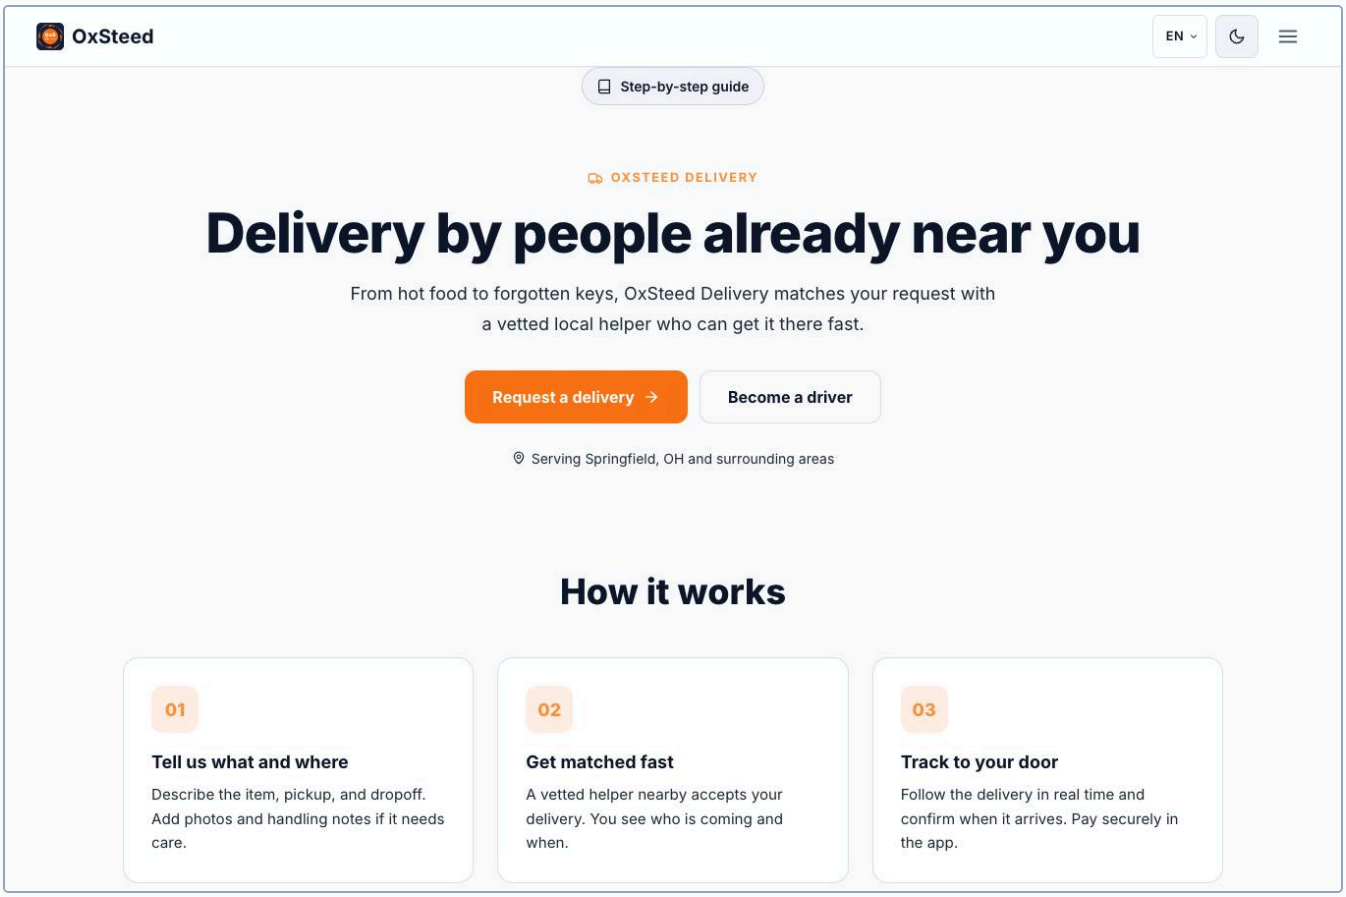

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Delivery by people already near you)*

Step 2: Set package details and get a quote

Set "Package size", "Weight (lb)", "Speed", and "Delivery notes" ("Access instructions, landmarks, or special handling"). Choose "Get a quote". The panel "Your estimated price" shows the route ("{{miles}} mi route", "About {{minutes}} min") and the breakdown: Delivery, Platform fee, Tolls and parking, and Customer total. Quotes expire: "Quote valid for {{minutes}} minutes".

> **Expected result:** The estimated price panel shows the route and the customer total.

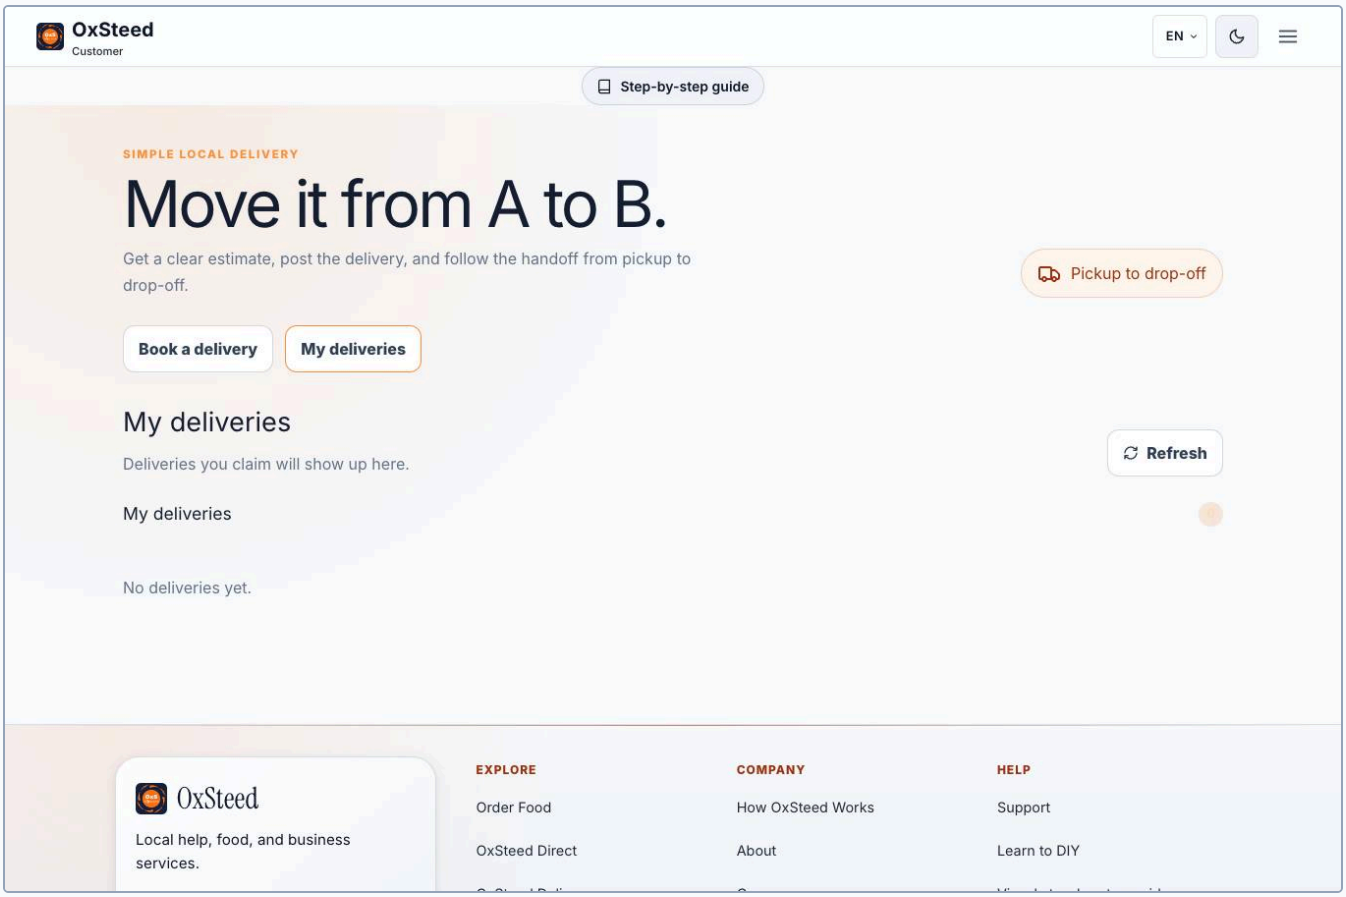

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Move it from A to B.)*

Step 3: Post the delivery and track it

Choose "Post delivery". You see "Delivery posted". Open the job at /delivery/jobs/:id to follow the timeline, message the driver with "Open messages", or cancel with "Cancel delivery" ("Cancelling releases the job and notifies the other party. This cannot be undone."). Share the public tracking link /t/:token with the recipient so they can follow without signing in.

> **Expected result:** The delivery job is posted and tracking is available.

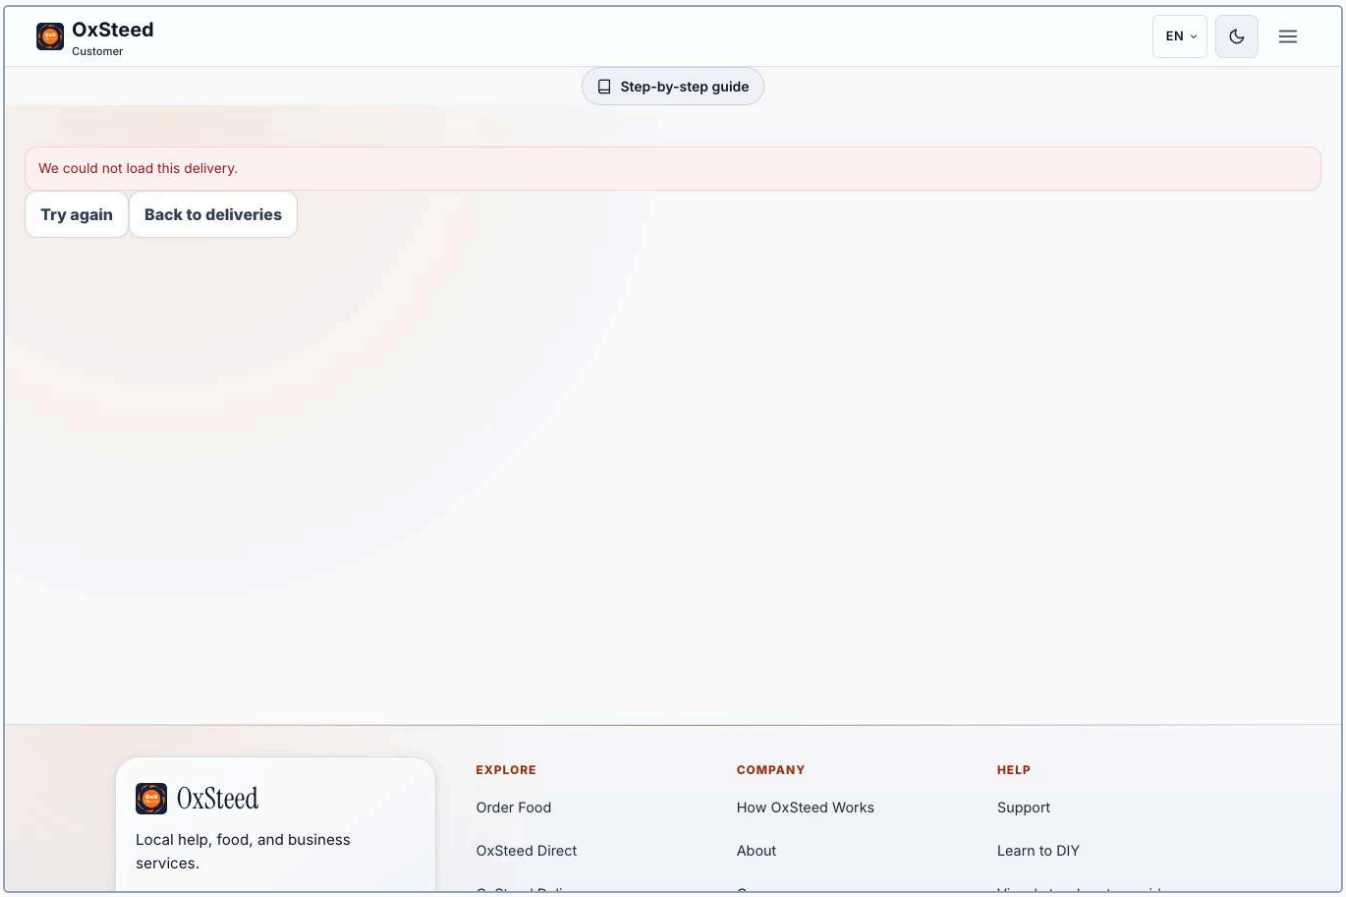

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Delivery job detail with the tracking timeline)*

Step 4: Claim a delivery as a driver

Drivers: open /delivery while signed in as a helper to see the driver view titled "Deliver nearby work" with the body "Claim a route that fits your day and move it through pickup, transit, and drop-off." Open "My deliveries" for your claimed jobs. On an open job choose "Claim delivery", then move it through pickup, transit, and drop-off using the status actions.

> **Expected result:** The job is claimed and appears under "My deliveries".

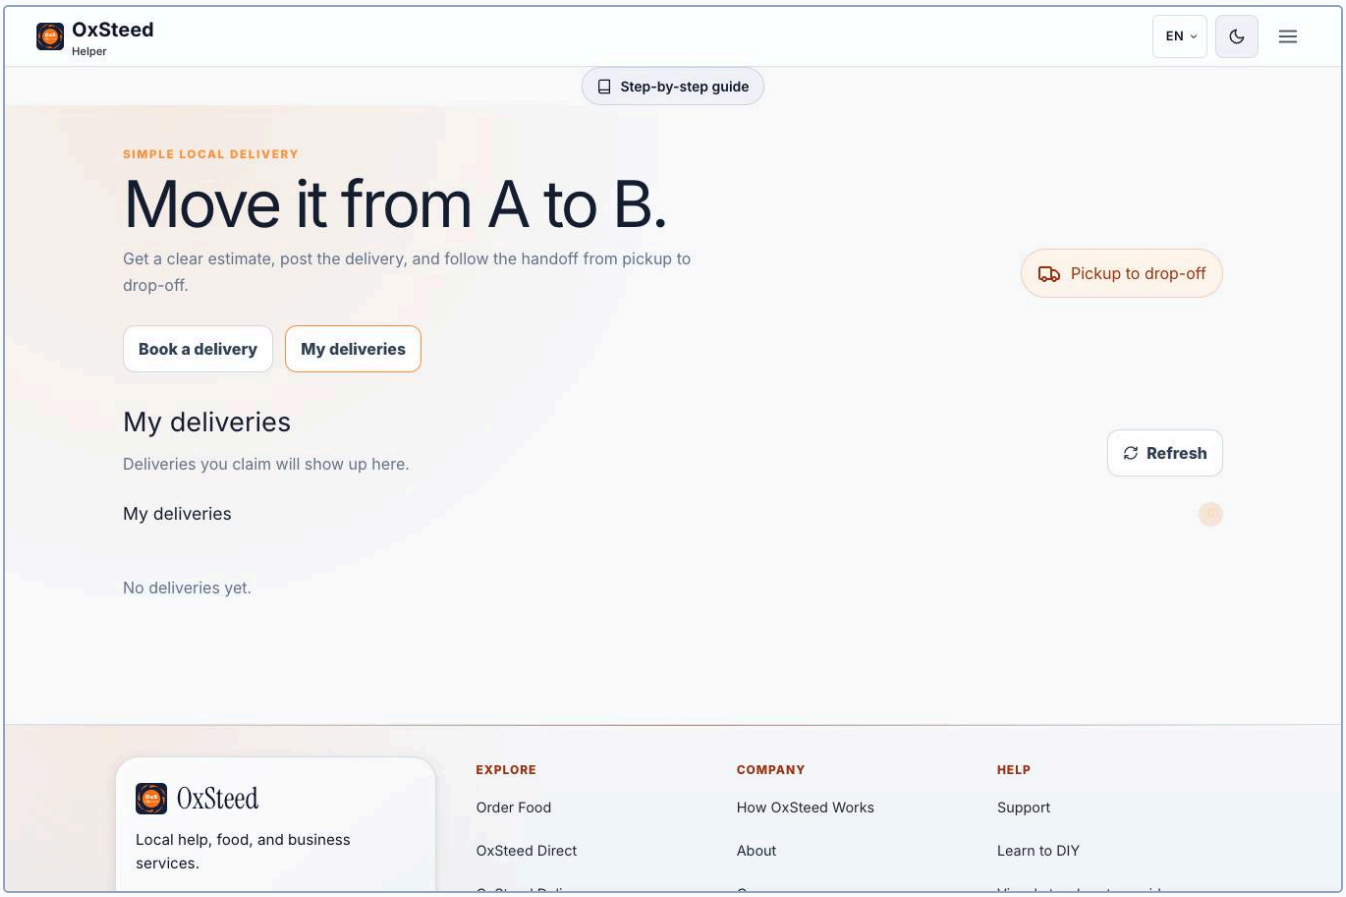

Figure 4. The driver view, desktop view. *(Image description: Synthetic example: Move it from A to B.)*

Confirm it worked

The delivery job is posted and trackable, or claimed and listed under "My deliveries".

If something goes wrong

Problem	What to do

You see "This delivery quote has expired. Get a new quote to continue."	Choose "Get a quote" again to refresh the price, then post.
You see "The delivery details changed after pricing. Get a new quote before posting."	Re-check the stops and package details, then get a fresh quote before posting.

Need help?

Delivery issues: contact support from the in-app support page at /support.

Related guides

- Use Direct (OxSteed-operated services)

Links in the app

- Delivery

Guide ID: other-direct | **Revision:** 2 | **Area:** Direct

SOP LIBRARY / DIRECT **ENGLISH**

Use Direct (OxSteed-operated services)

Guide ID	**other-direct**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/direct/use-direct-services

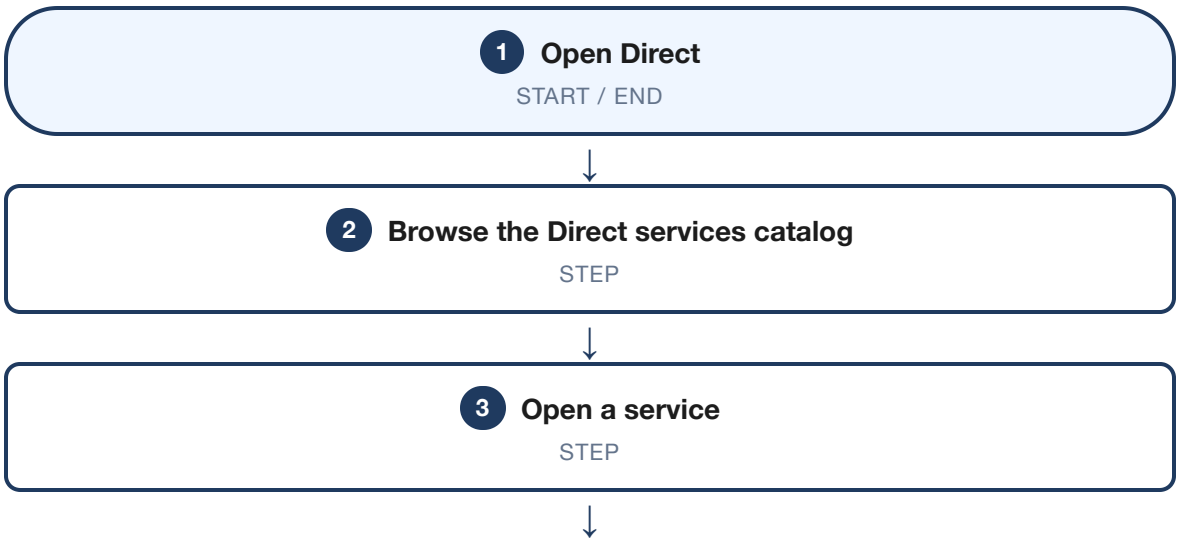

Goal

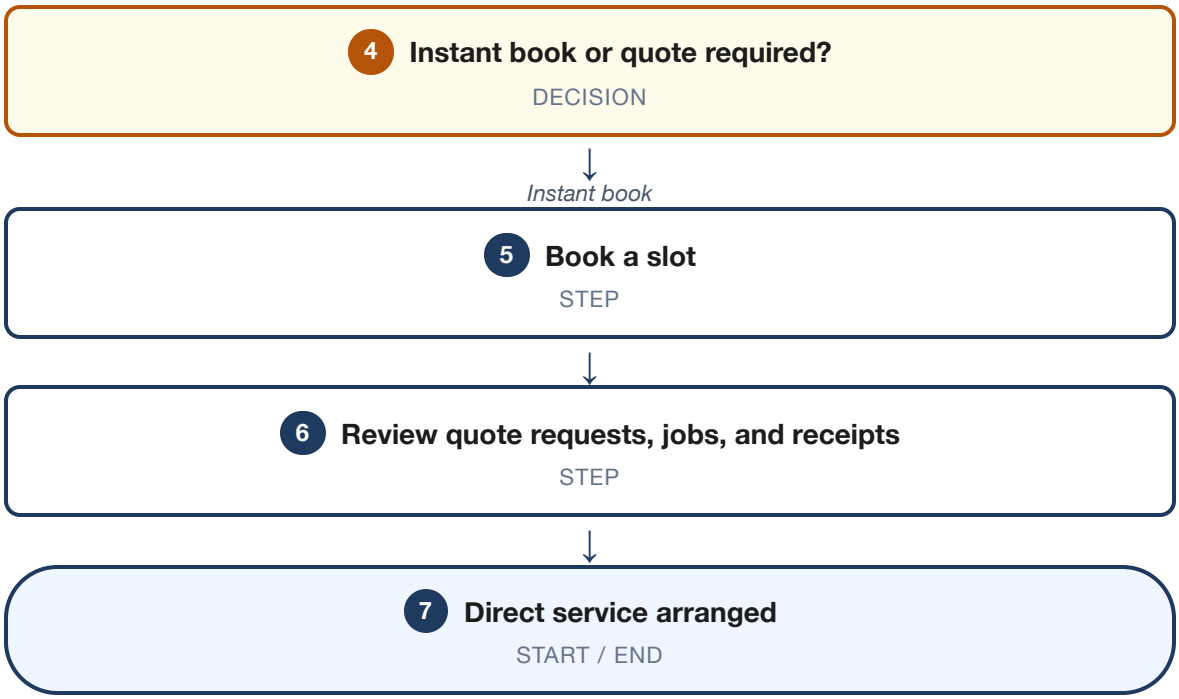

Browse OxSteed-operated Direct services, request a quote or book a slot, and review your history.

Before you start

1. No account needed to browse the catalog. Sign in to book, request quotes, or view history.

Process map

- *Quote required:* Instant book or quote required? → Request a Direct quote
- Request a Direct quote → Review quote requests, jobs, and receipts

Text version. 1. Open Direct at /direct. 2. Browse the "Direct services" catalog using the category search. 3. Open a service to see availability and pricing. 4. If the service supports instant booking, choose "Book" and pick a slot; if it shows "Quote required", choose "Request" and submit "Request a Direct quote". 5. Review everything in "Service history" at /direct/history: "All of your Direct quote requests, jobs, and receipts in one place."

Steps

Step 1: Open Direct and browse the catalog

Open /direct. The landing shows "Direct service, organized for real work." and "Browse available Direct services, tools, and coverage from one place." Open /direct/services for the full catalog with the "Services" and "Skills" tabs. Use the search field ("Search {{category}} services...") to find what you need.

> **Expected result:** The catalog lists available Direct services with Book or Request actions.

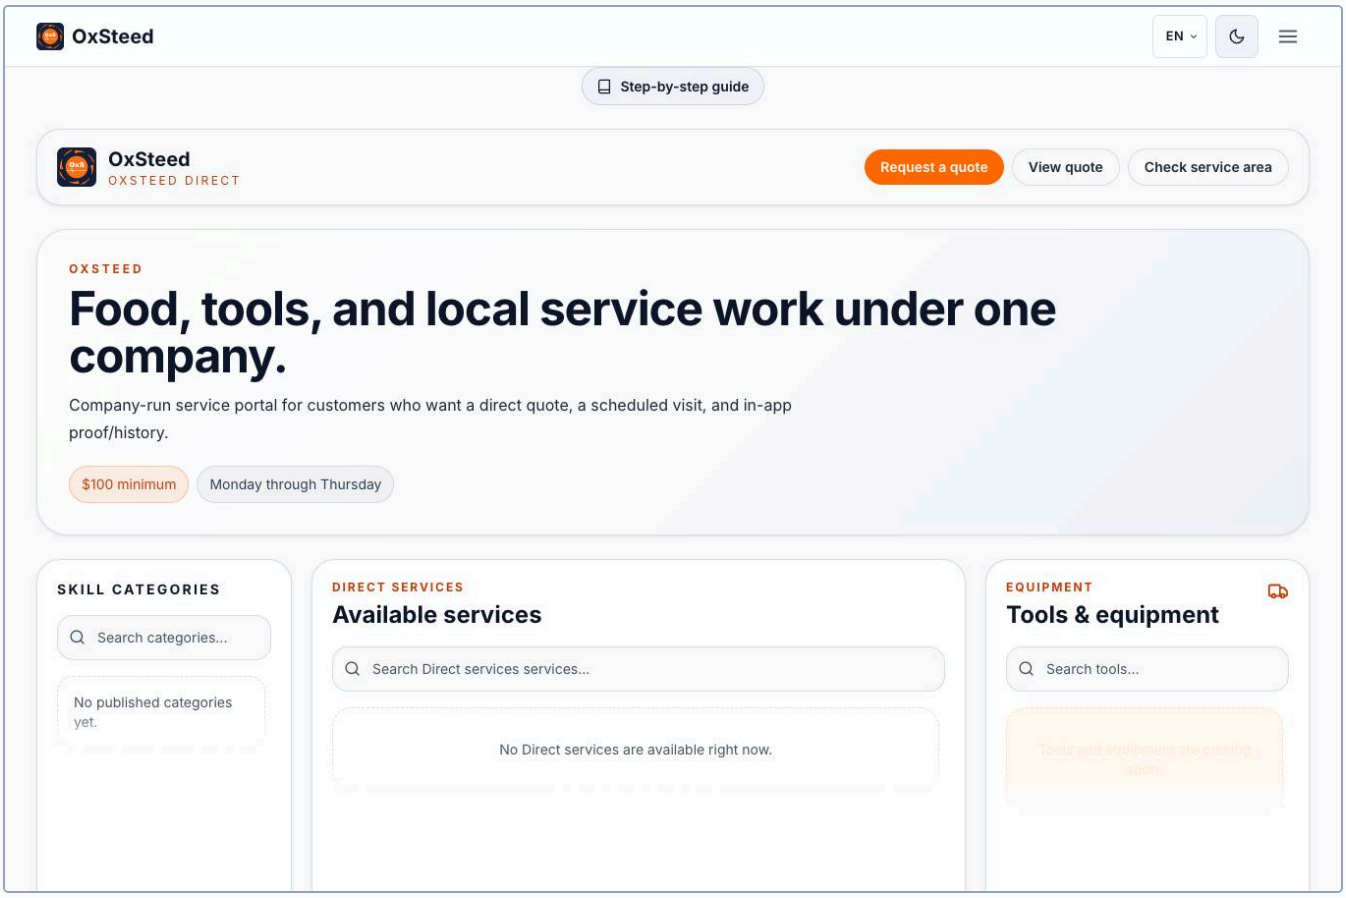

Figure 1. Direct services, desktop view. *(Image description: Synthetic example: Food, tools, and local service work under one company.)*

Step 2: Open a service and choose Book or Request

Open a service to see its detail: availability, the "next slot", and pricing. Services with instant booking show a "Book" button; services that need scoping show "Quote required" with a "Request" button instead. Sign in if you have not already; booking and quoting require an account.

> **Expected result:** You see the service detail with its booking or quote action.

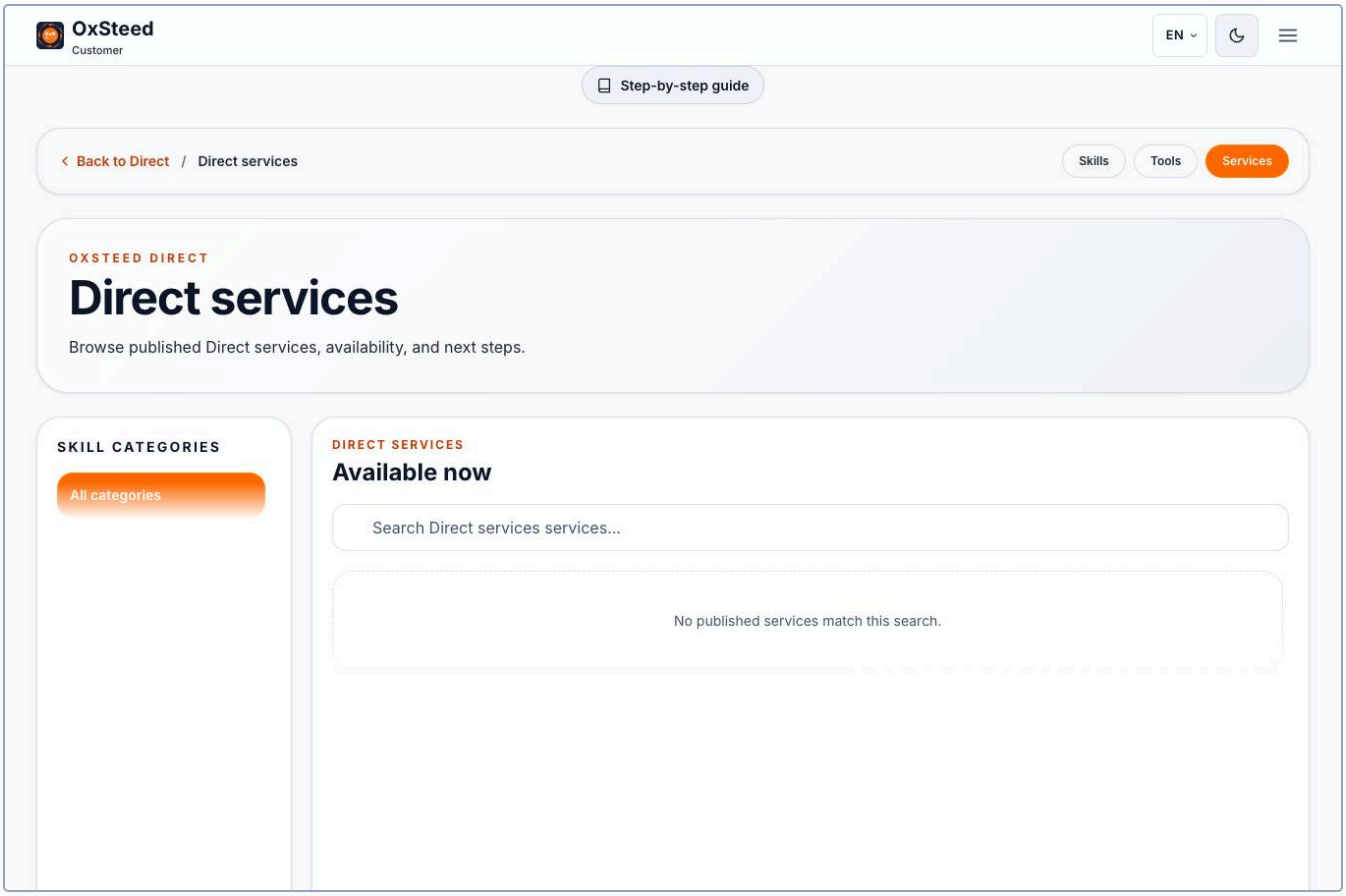

Figure 2. A Direct service, desktop view. *(Image description: Synthetic example: Direct services)*

Step 3: Book a slot or request a quote

For instant booking, pick a slot at /direct/book-slot and confirm. For quoted services, open /direct/request-quote: the page is titled "Request a Direct quote" with the subtitle "Keep it simple. Tell us what you need, where the work is, and when you want it done." The "What to include" checklist guides you, and you can attach photos. Submit, then look up the quote later at /direct/view-quote with the code you receive.

> **Expected result:** Your booking is confirmed, or your quote request is submitted with a lookup code.

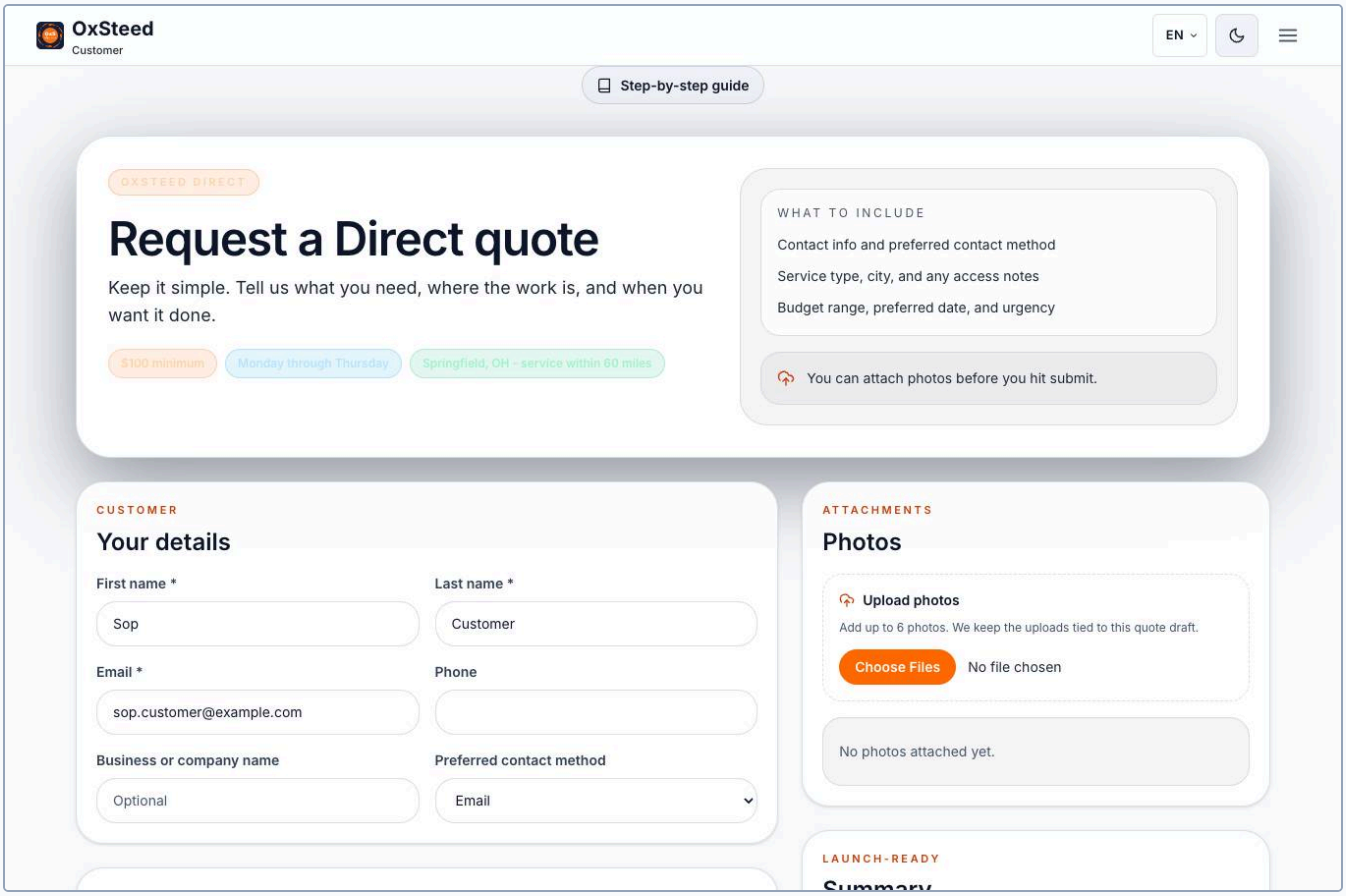

Figure 3. Requesting a Direct quote, desktop view. *(Image description: Synthetic example: Request a Direct quote)*

Step 4: Review your Direct history

Open /direct/history. The page is titled "Service history" with the subtitle "All of your Direct quote requests, jobs, and receipts in one place." If empty it shows "No Direct history yet". From here you can open a quote, a job, or a payment receipt.

> **Expected result:** Your quote requests, jobs, and receipts are listed together.

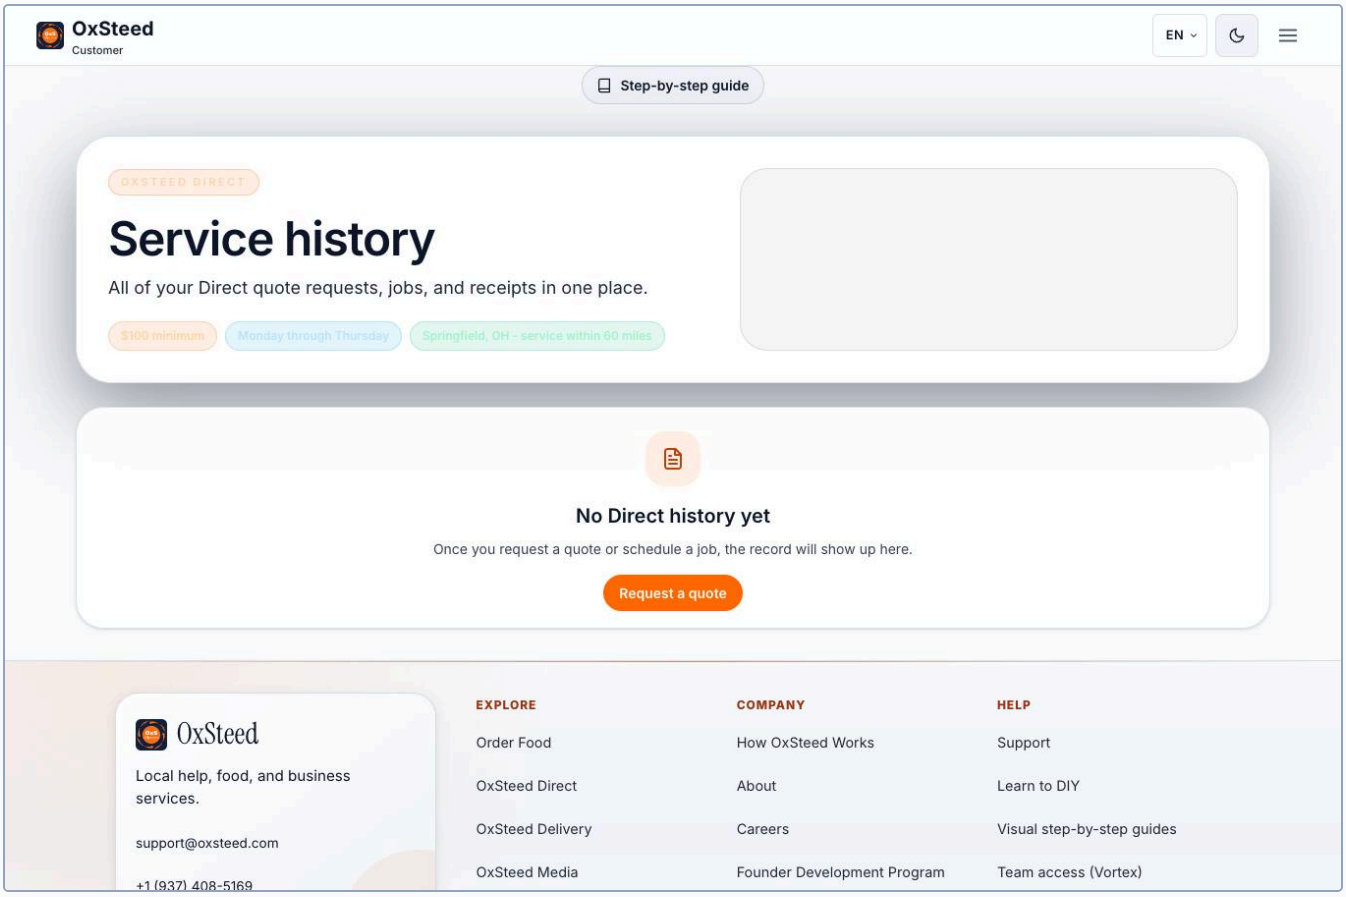

Figure 4. Service history, desktop view. *(Image description: Synthetic example: Service history)*

Confirm it worked

Your booking or quote request appears in "Service history" at /direct/history.

If something goes wrong

Problem	What to do

A service shows "Currently unavailable" or "Coming soon".	The service is not bookable in your area right now. Request a quote instead, or check back later.
You lost your quote lookup code.	Sign in and open /direct/history: signed-in quote requests are listed there without a code.

Need help?

Direct questions: contact support from the in-app support page at /support, or use Direct support at /direct/support.

Guide ID: other-media | **Revision:** 2 | **Area:** Media

SOP LIBRARY / MEDIA **ENGLISH**

Use OxSteed Media (feed, posts, communities)

Guide ID	**other-media**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/media/use-oxsteed-media

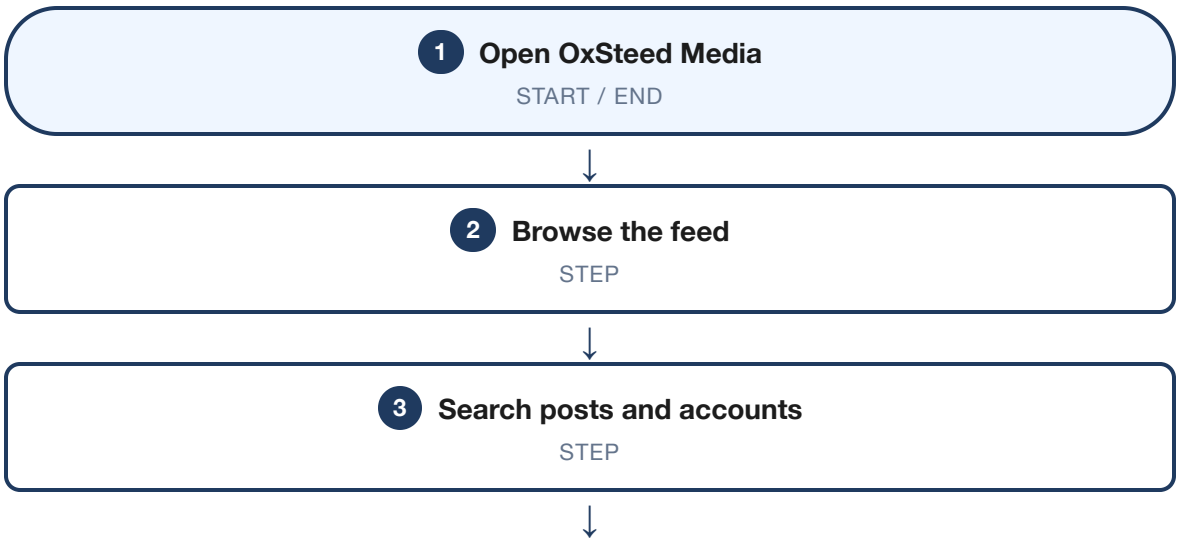

Goal

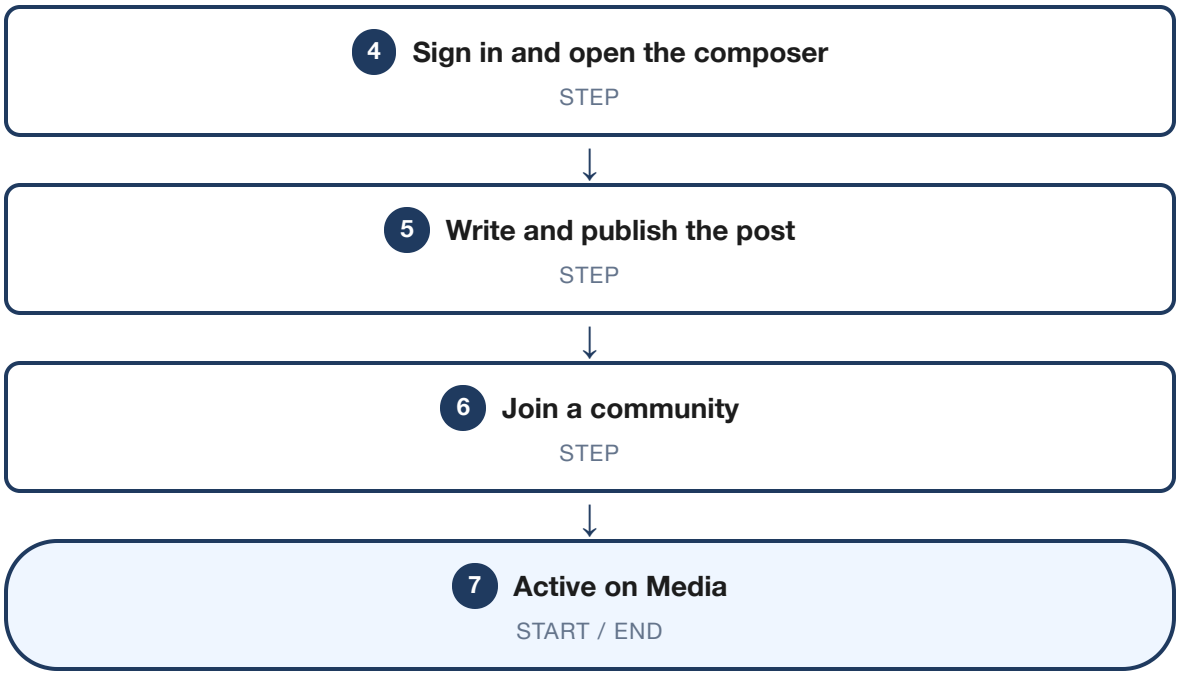

Browse the Media feed, publish a post, and follow communities.

Before you start

1. No account needed to browse. Sign in to post, save, or message.

Process map

Text version. 1. Open OxSteed Media at /media. 2. Browse the feed, titled "OxSteed Media" with the subtitle "Local voices, useful connections, and updates from the OxSteed network." 3. Use Search Media to find posts and accounts. 4. Sign in and open the composer at /media/compose. 5. Write your post ("New post", "What's happening in your local economy?"), choose where it goes, and publish. 6. Join communities at /media/communities to follow topics you care about.

Steps

Step 1: Open OxSteed Media and browse the feed

Open /media. The page is titled "OxSteed Media" with the subtitle "Local voices, useful connections, and updates from the OxSteed network." The composer prompt reads "What's happening nearby?" The navigation offers Home, Search, Spaces, Notifications, Messages, "Saved posts", and Verification. Guests can read; sign-in is required for posting.

> **Expected result:** The feed loads with recent posts from the network.

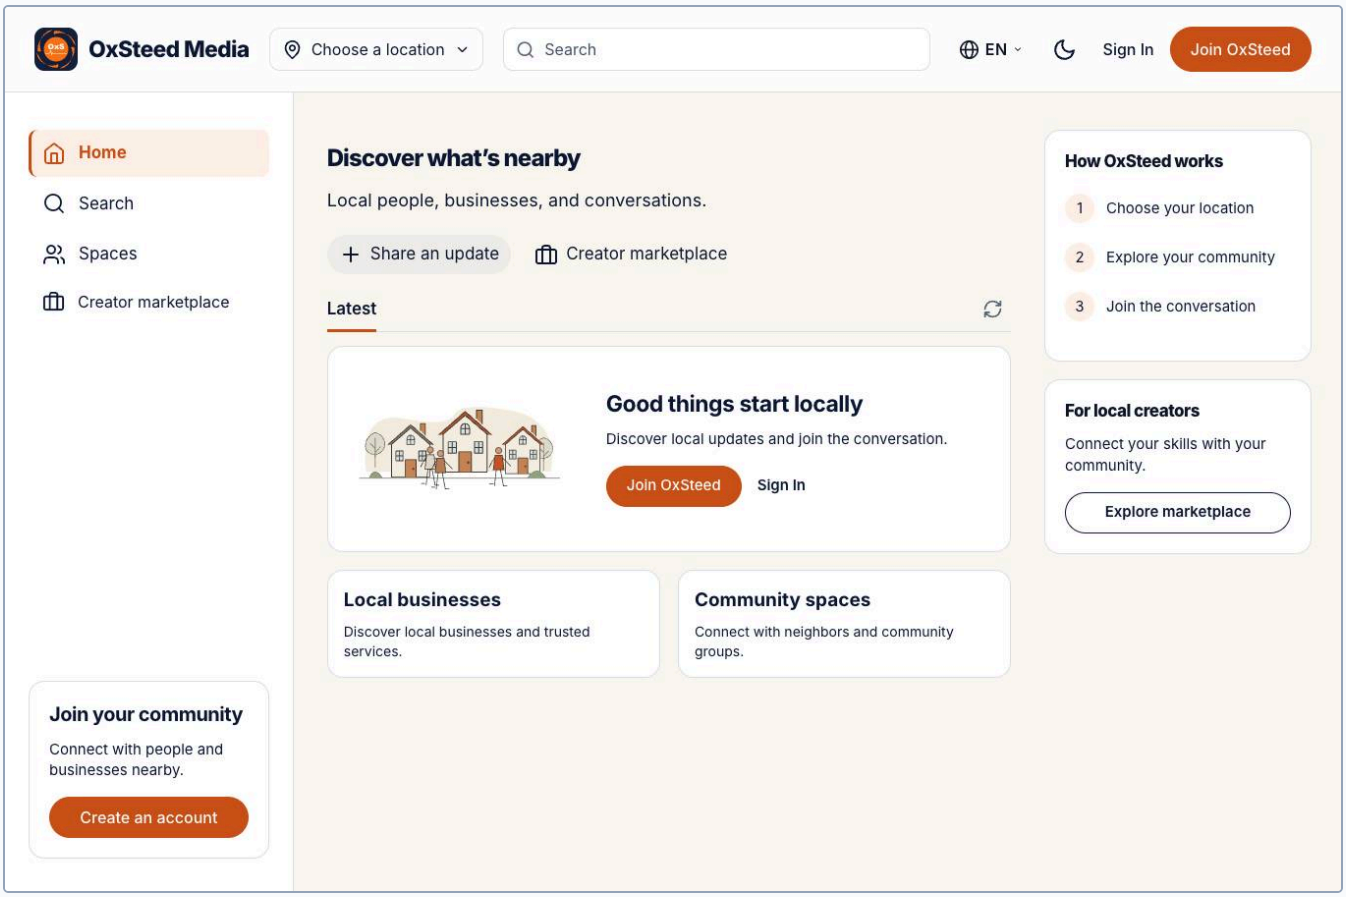

Figure 1. The Media feed, desktop view. *(Image description: Synthetic example: Discover what's nearby)*

Step 2: Search posts and accounts

Open /media/search. The page is titled "Search Media" with the field "Search posts and accounts…" and the "Search" button. Results split into "Accounts" and "Posts" tabs.

Expected result: Matching accounts and posts appear under their tabs.

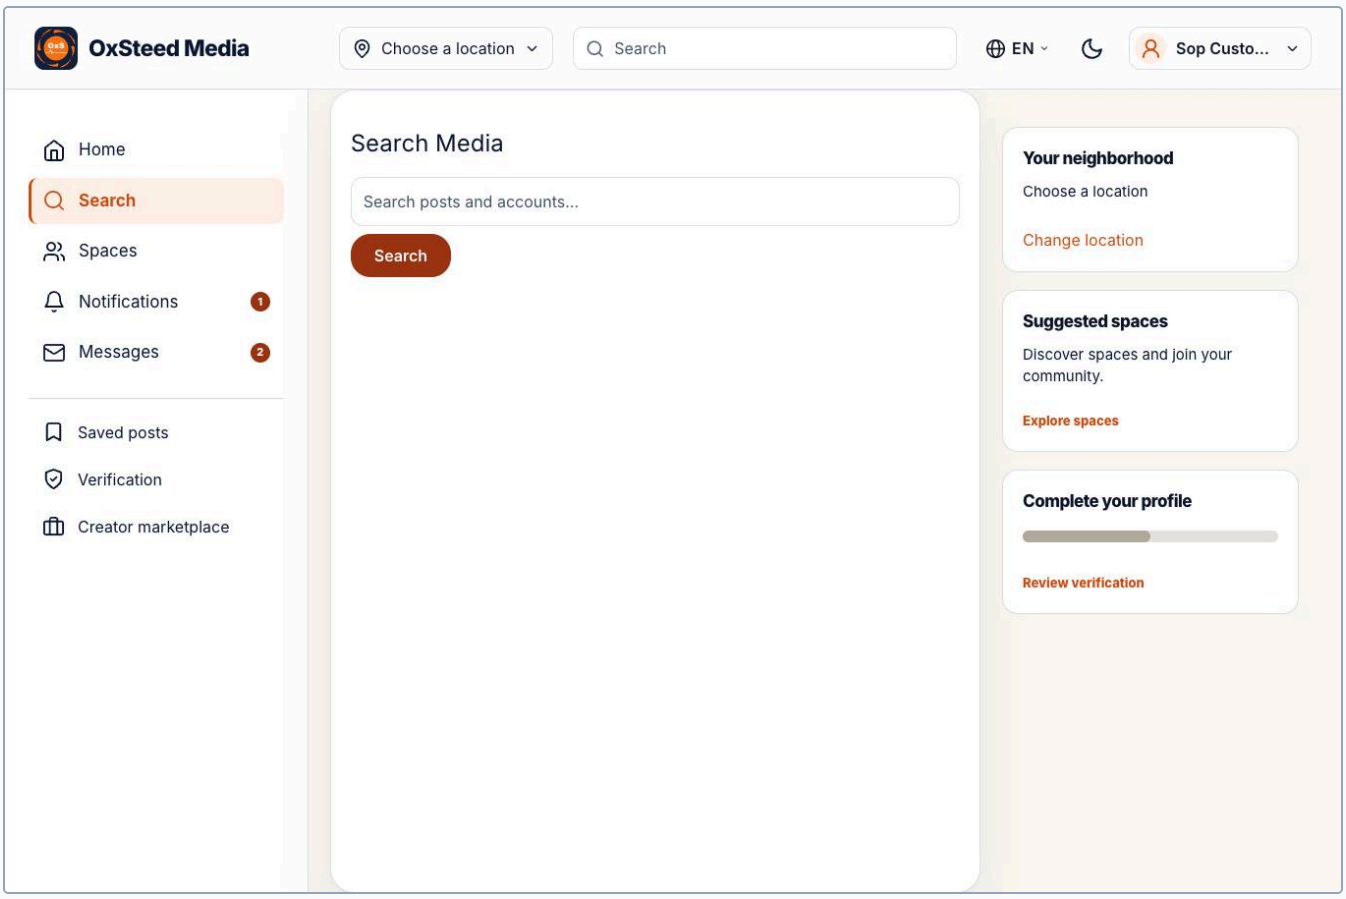

Figure 2. Searching Media, desktop view. *(Image description: Synthetic example: Search Media)*

Step 3: Compose a post

Sign in, then open /media/compose. The page is titled "New post" with the placeholder "What's happening in your local economy?" Choose "Post as" to pick your publishing identity ("My helper profile" for helper accounts). Use "Add link" or "YouTube or Vimeo video" to attach media. "Save draft" keeps your work; "Discard draft" removes it.

> **Expected result:** Your draft is ready in the composer with the correct publishing identity.

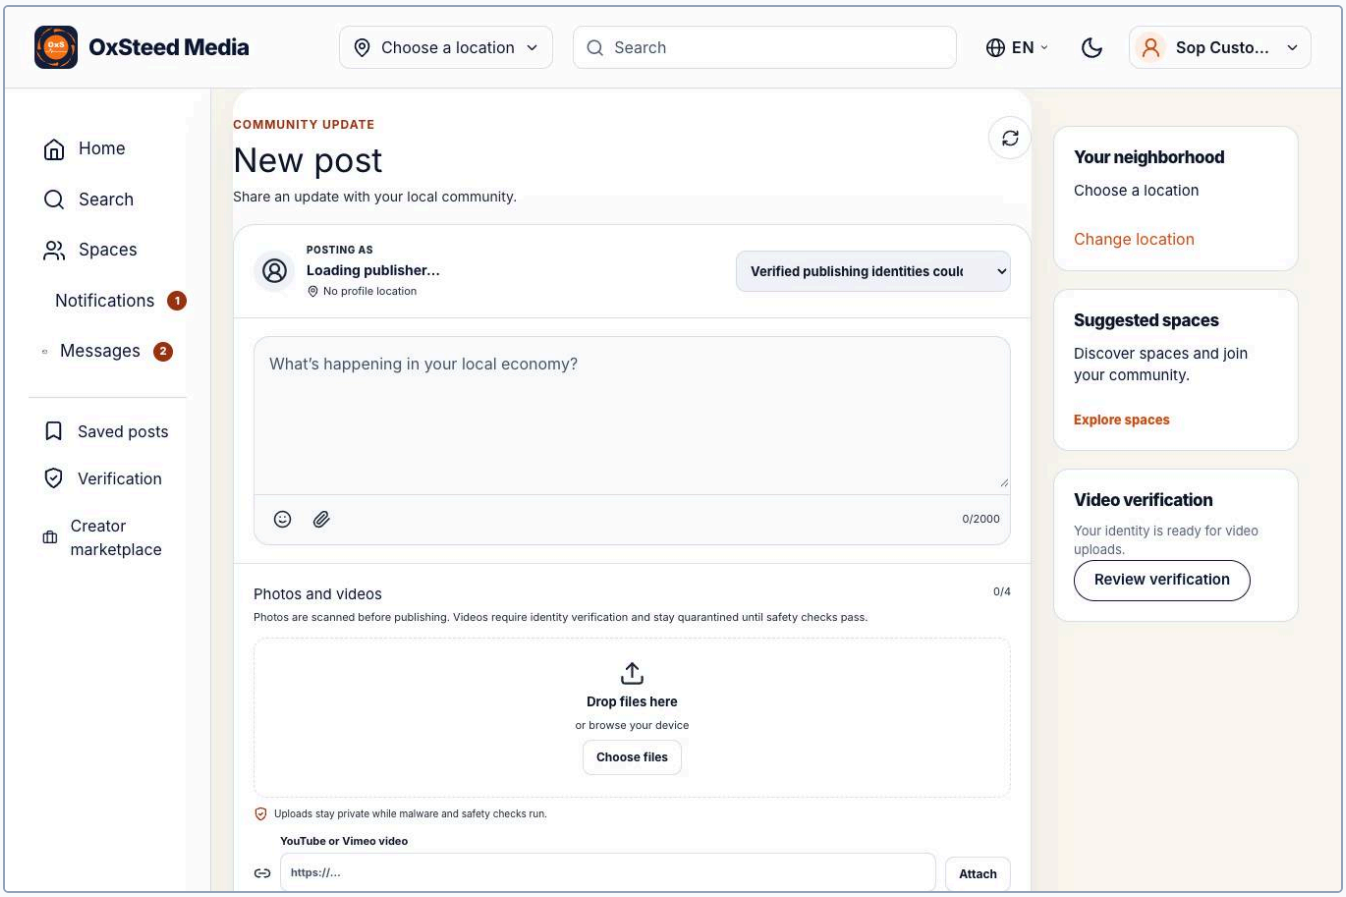

Figure 3. Composing a post, desktop view. *(Image description: Synthetic example: New post)*

Step 4: Publish and explore communities

Publish the post; it appears in the feed and on your profile. Then open /media/communities to browse communities, open a community to read its posts, and follow the ones you care about. Saved posts live under "Saved posts" at /media/bookmarks, and notifications under Notifications.

> **Expected result:** Your post is live in the feed and you follow at least one community.

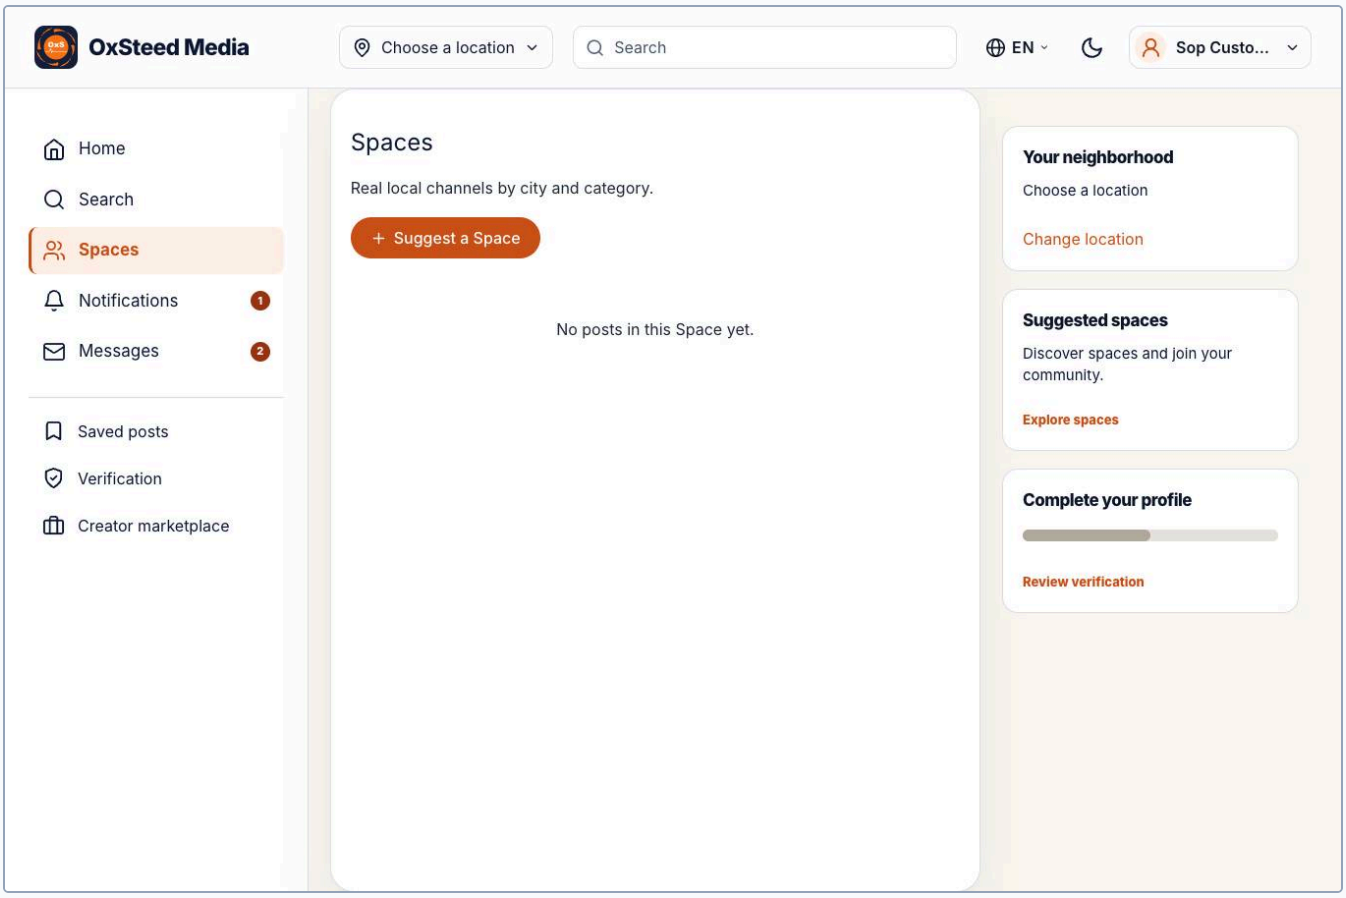

Figure 4. Media communities, desktop view. *(Image description: Synthetic example: Spaces)*

Confirm it worked

Your post appears in the feed and on your profile, and your followed communities show in your list.

If something goes wrong

Problem	What to do

The composer says "Verification required" or "Not verified".	Complete verification first at /media/verification, then return to the composer.
A video attachment fails with "Video posts aren't available right now."	Remove the video and post photos instead, or try again later.

Need help?

Media issues: contact support from the in-app support page at /support.

Guide ID: other-messages | **Revision:** 2 | **Area:** Messages

SOP LIBRARY / MESSAGES ENGLISH

Message across the platform

Guide ID	**other-messages**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/messages/send-messages

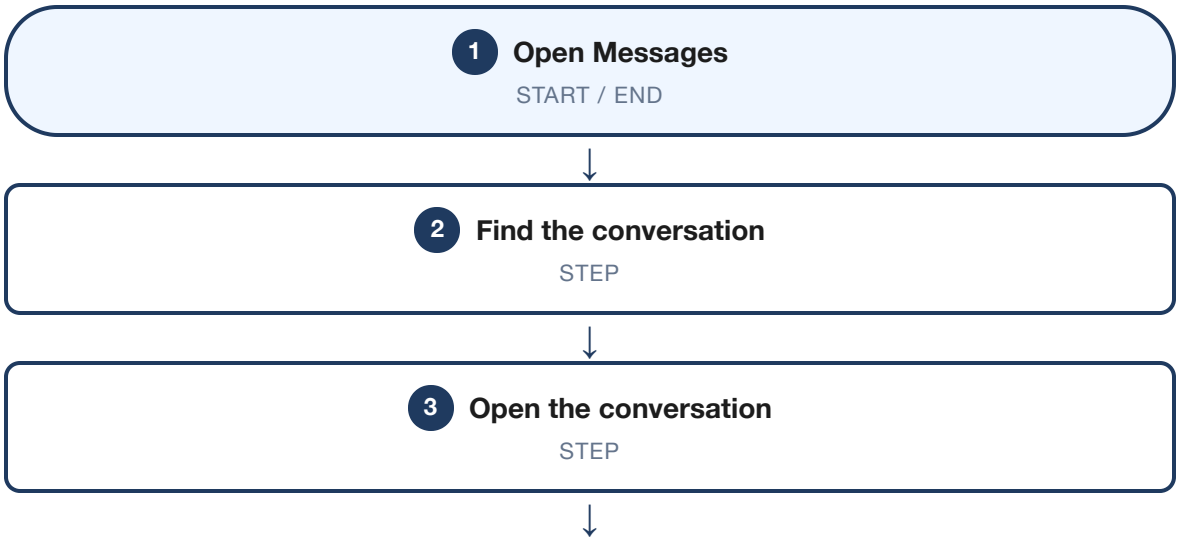

Goal

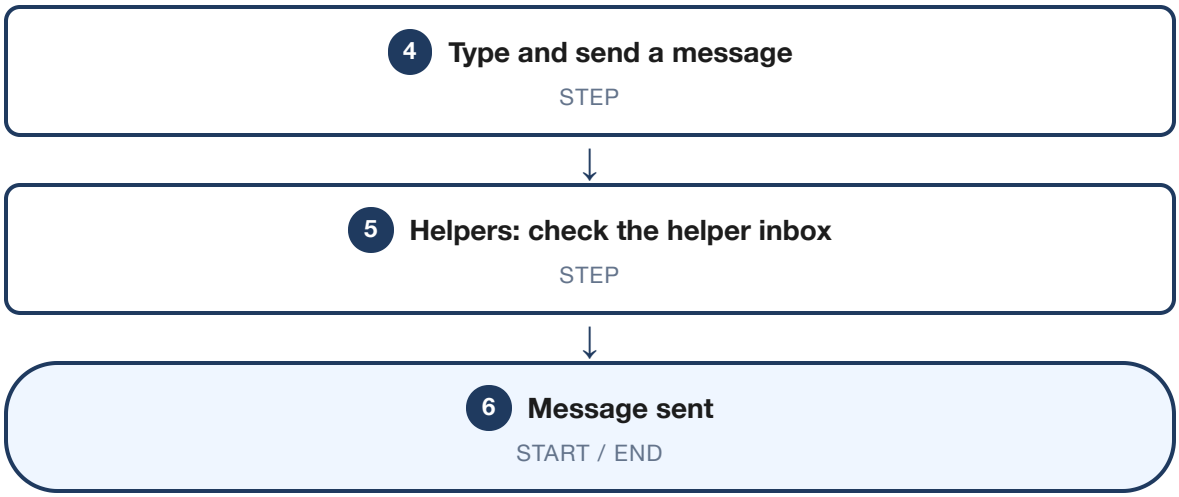

Find a conversation, read messages, and send replies across customer and helper inboxes.

Before you start

1. A signed-in OxSteed account.
2. A job, booking, or inquiry that created a conversation.

Process map

Text version. 1. Open Messages at /messages. 2. Find the conversation in the list; an empty inbox shows "No conversations yet". 3. Open the conversation at /messages/:conversationId. 4. Type in the "Type a message…" box and choose "Send". 5. Helpers have a separate inbox at /helper/messages with the same flow. 6. Your message is delivered and marked seen when read.

Steps

Step 1: Open the Messages inbox

Open /messages while signed in. The page is titled "Messages". The conversation list shows recent threads with unread badges. An empty inbox shows "No conversations yet". Helpers also have a dedicated inbox at /helper/messages with the same layout.

> **Expected result:** Your conversations are listed, newest first.

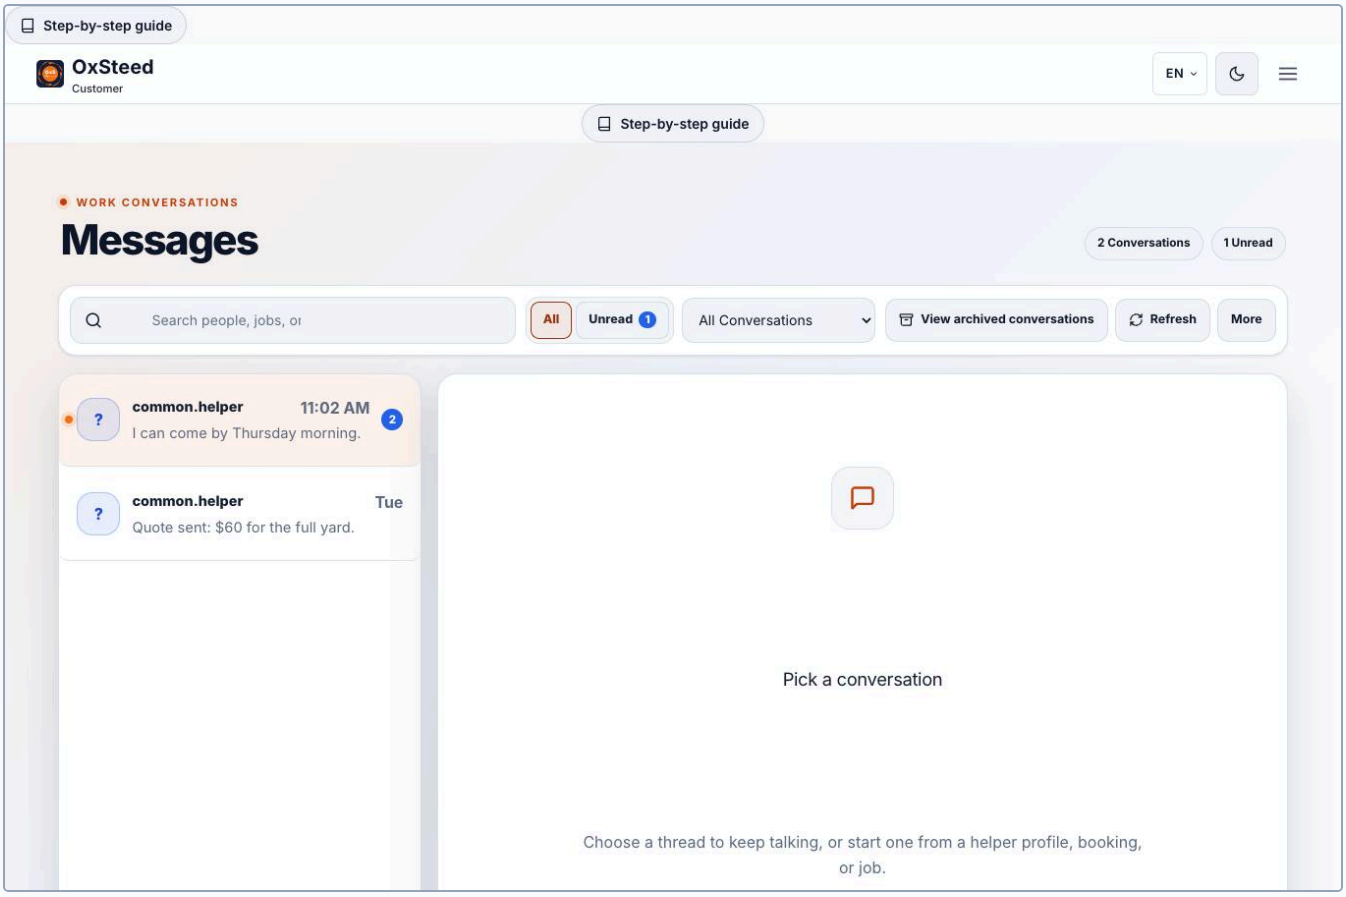

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Step 2: Open a conversation

Choose a conversation to open /messages/:conversationId. The thread shows message history with timestamps ("Today", "Yesterday") and seen indicators. If the conversation is missing, the page shows a not-found message.

> **Expected result:** The full message thread loads.

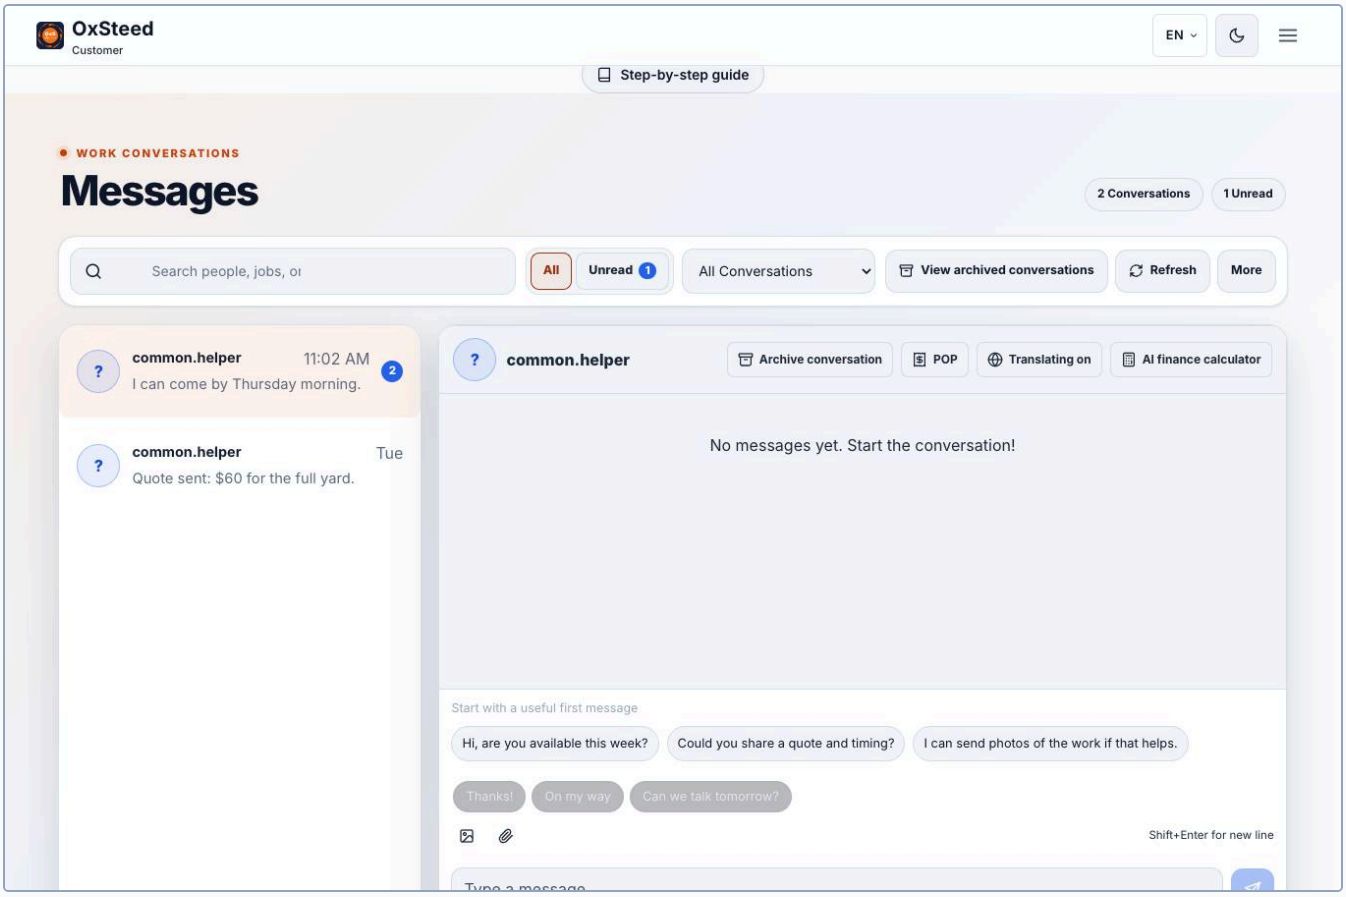

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Step 3: Type and send a message

Type in the "Type a message…" box at the bottom and choose "Send". The other party sees a typing indicator while you write. Your sent message appears in the thread and shows as seen once read.

> **Expected result:** Your message appears in the thread immediately.

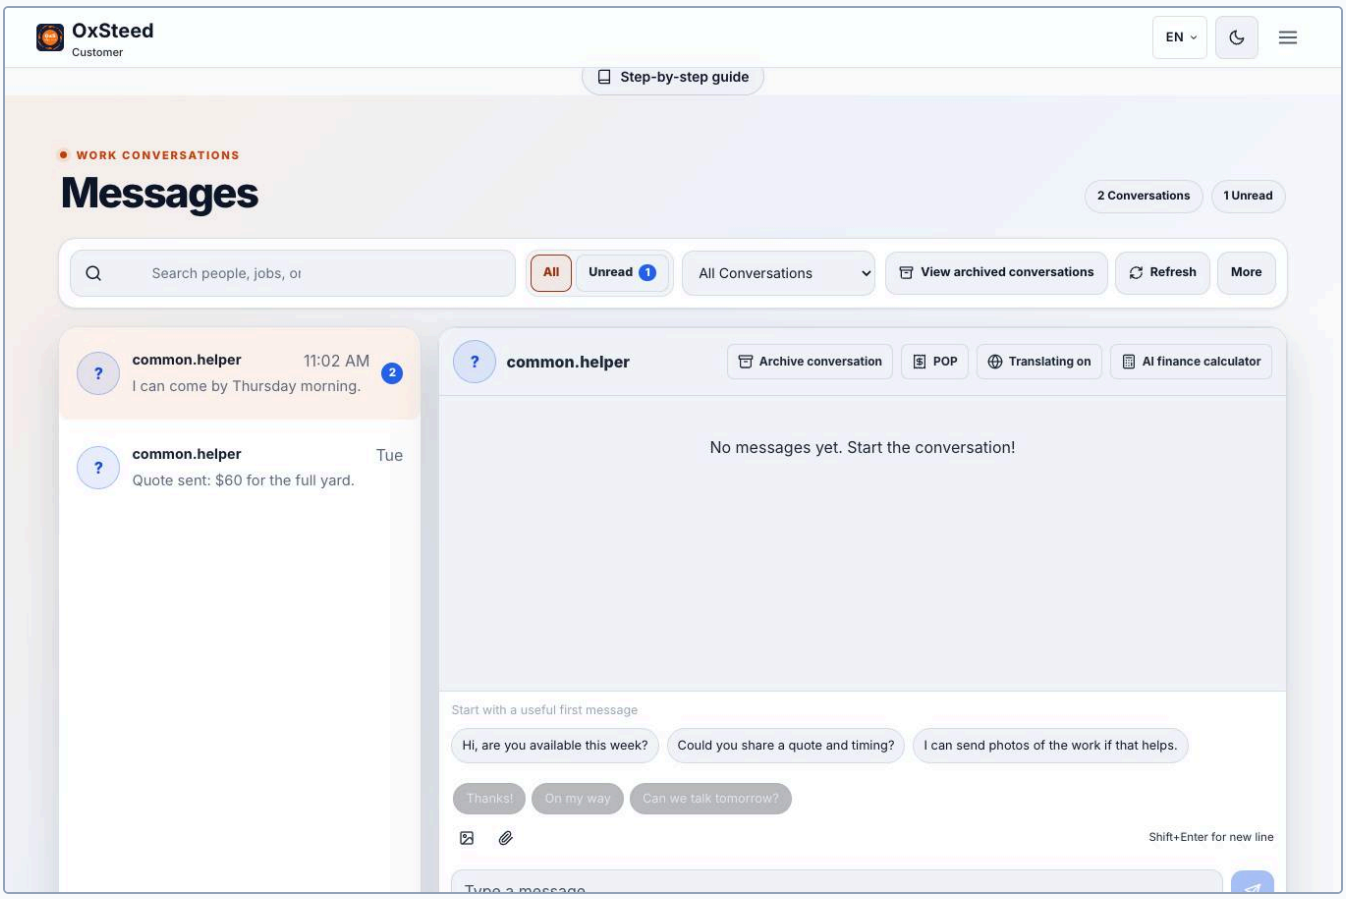

Figure 3. Sending a message, desktop view. *(Image description: Synthetic example: Messages)*

Step 4: Check the helper inbox

Helpers: open /helper/messages for the helper inbox, which mirrors the same flow with helper-context threads (guest inquiries, job conversations). Switch back to /messages for customer-context threads.

> **Expected result:** You see helper-context conversations separately from customer ones.

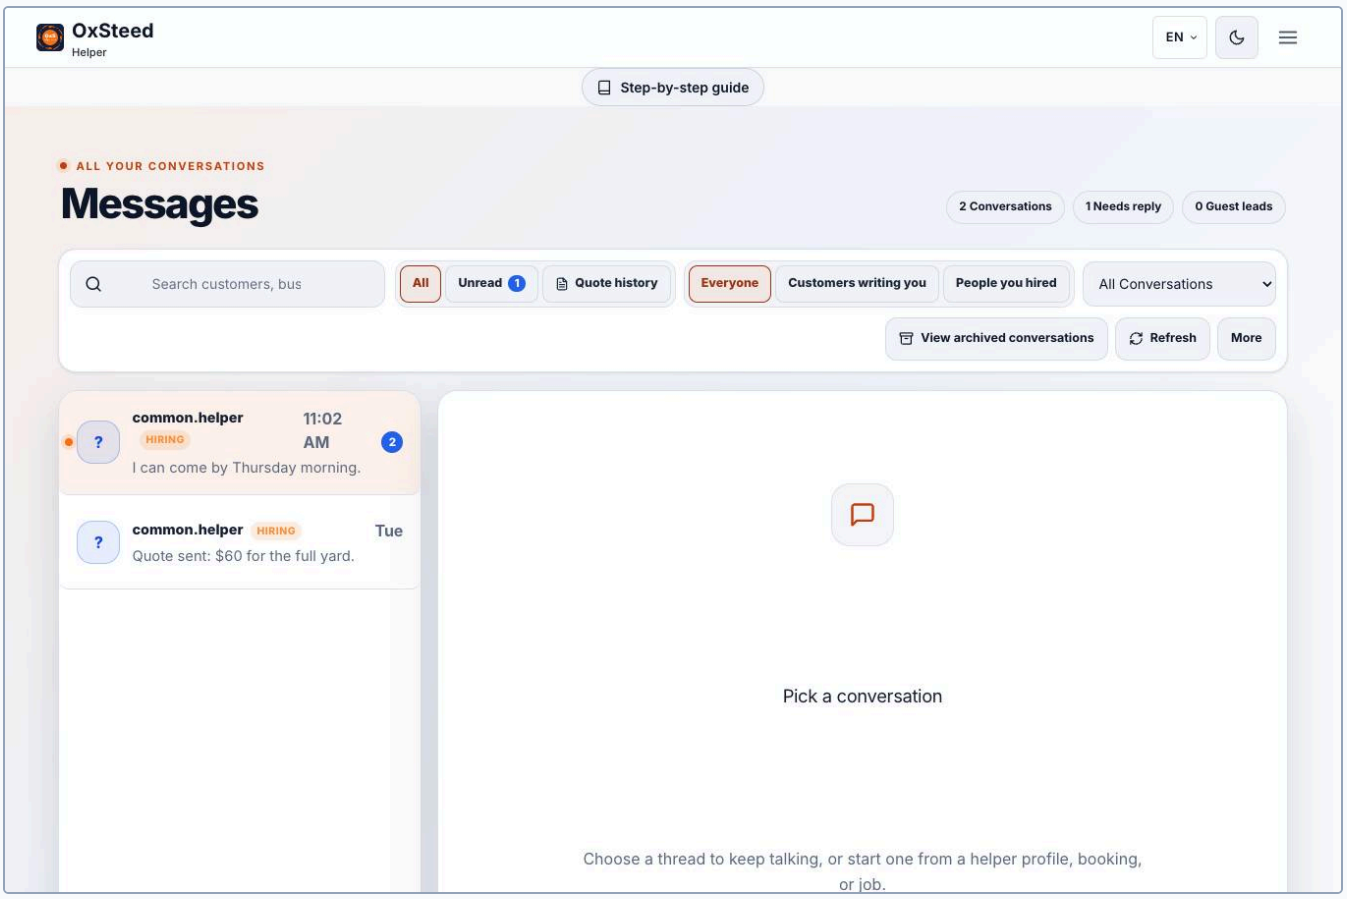

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Confirm it worked

Your message appears in the thread and is marked seen when the other party reads it.

If something goes wrong

Problem	What to do

A conversation is missing from the list.	Check the other inbox (customer vs helper). Guest inquiries also appear under their own entry.
Messages fail to send.	Check your connection and try again. If the thread still fails, contact support at /support.

Need help?

Messaging issues: contact support from the in-app support page at /support.

Related guides

Guide ID: other-planned-needs | **Revision:** 2 | **Area:** More guides

SOP LIBRARY / MORE GUIDES **ENGLISH**

Arrange recurring household work

Guide ID	**other-planned-needs**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Conditional**
Conditions	• This specialized workspace is not available in the current launch. Its legacy address redirects to your dashboard.
Online version	/how-it-works/other/plan-recurring-needs

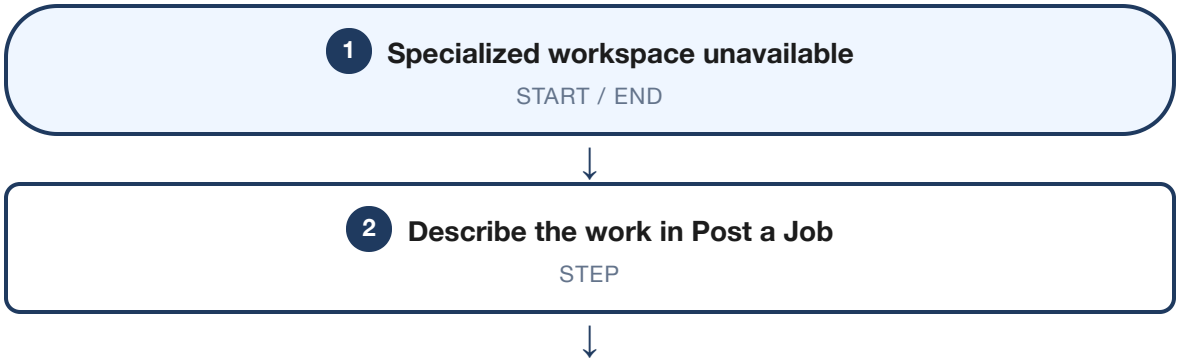

Goal

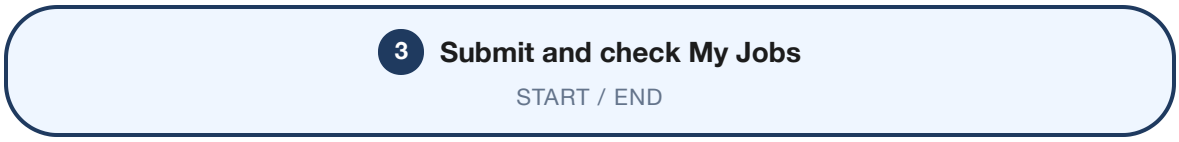

Arrange recurring household work through the available job-posting flow while the specialized workspace is unavailable.

Before you start

1. A signed-in OxSteed account.

Process map

Text version. 1. Specialized workspace unavailable → 2. Describe the work in Post a Job → 3. Submit and check My Jobs

Steps

Step 1: Post the work you need

Open Post a Job. Describe the recurring household work, location, timing, and budget. For recurring work, explain the desired frequency. Review and submit only when the details are correct. The specialized garage or auto-publishing tools are not available in this launch.

Expected result: The posted job appears in My Jobs after a successful submission.

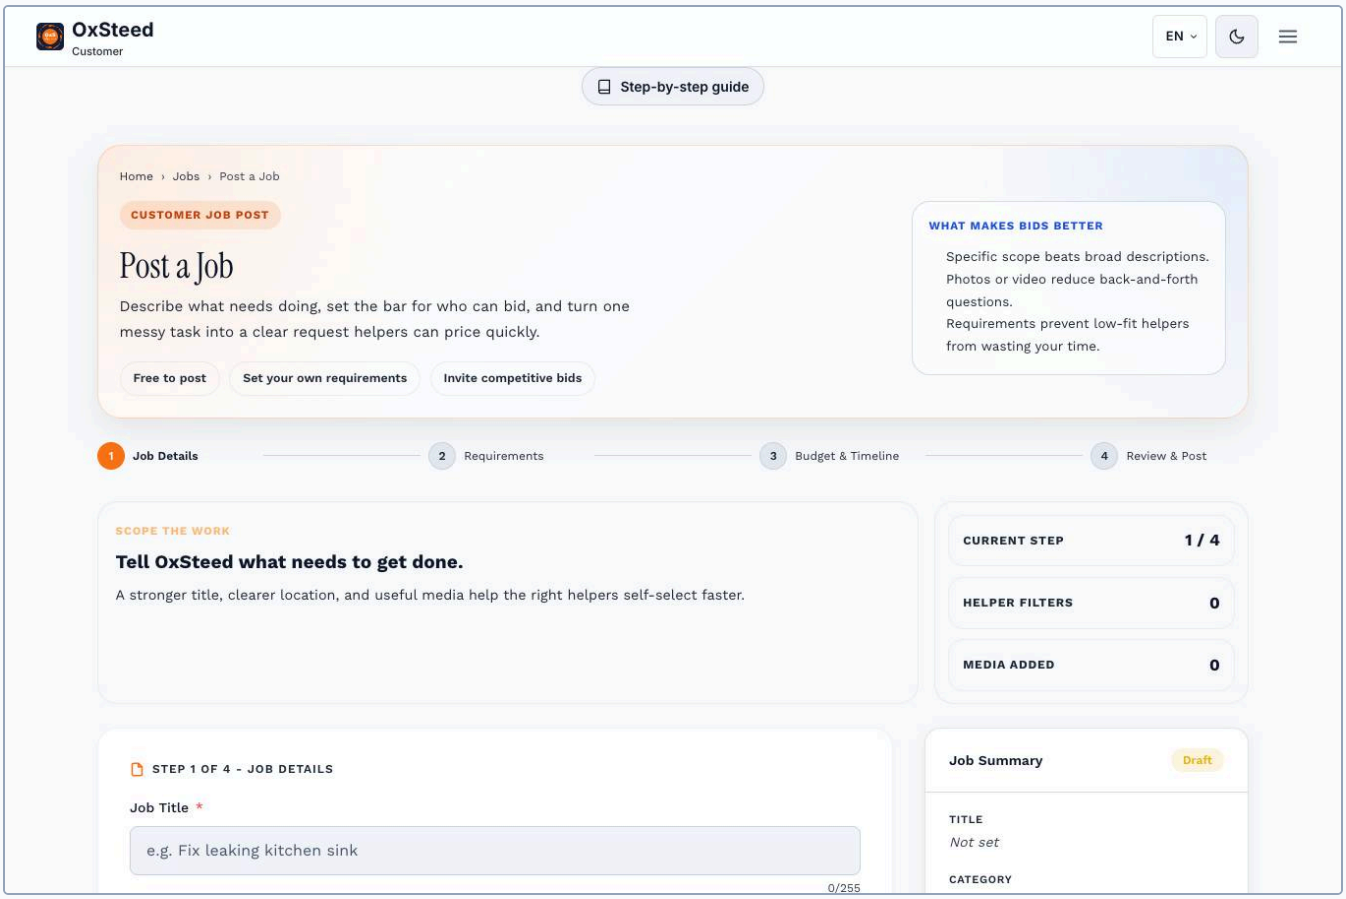

Figure 1. Post a Job is the available alternative. Synthetic example; no live account data. *(Image description: Synthetic example: Post a Job)*

Confirm it worked

Check the saved job in My Jobs. Reading this guide does not create a job or schedule recurring publication.

If something goes wrong

Problem	What to do
The old workspace redirects.	Use Post a Job or contact Support. Do not assume a vehicle or recurring schedule was saved.

Need help?

Planned needs issues: contact support from the in-app support page at /support.

Guide ID: other-rentals | **Revision:** 2 | **Area:** Rentals

SOP LIBRARY / RENTALS **ENGLISH**

Rent and list tools

Guide ID	**other-rentals**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Helper (tool owner)
Availability	**Supported**
Online version	/how-it-works/rentals/rent-list-tools

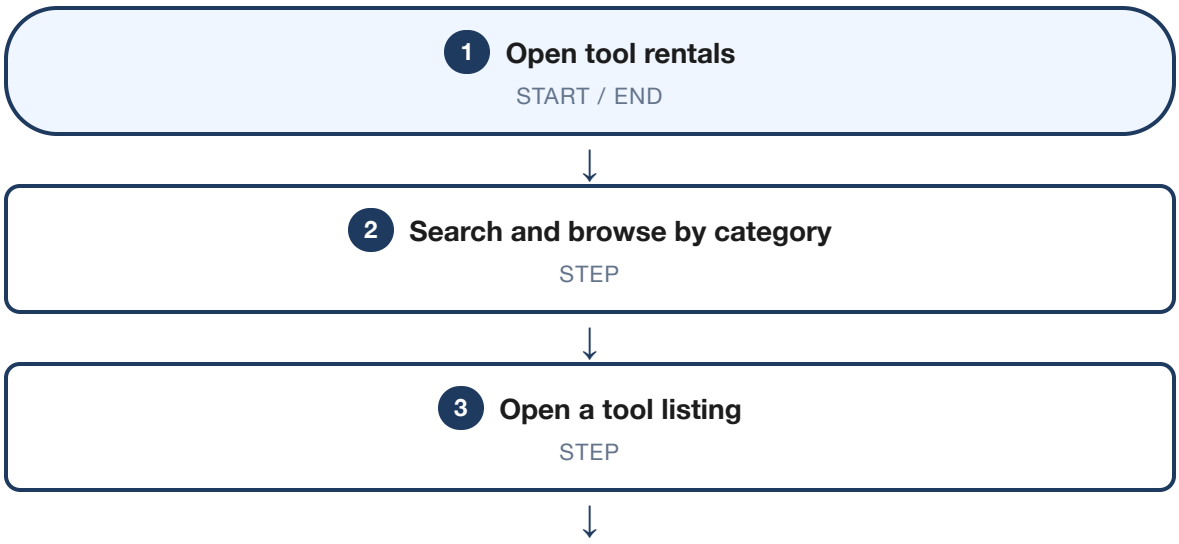

Goal

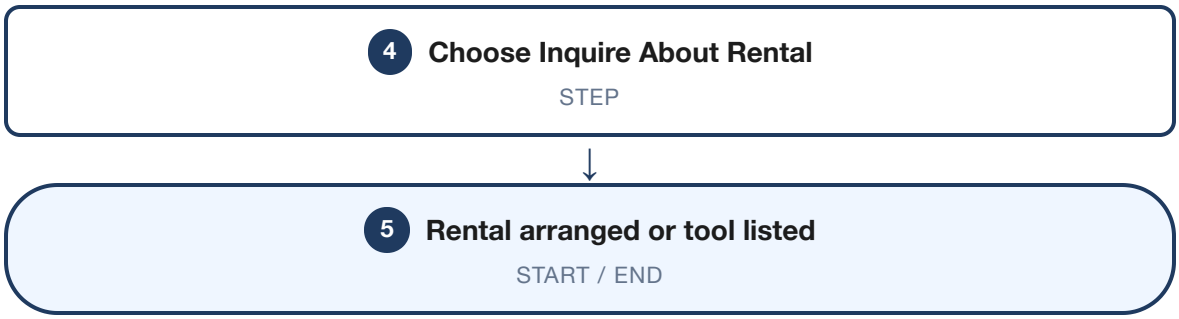

Find a tool to rent from a neighbor, or list your own tool to earn money.

Before you start

1. Guests can browse. Sign in to inquire, rent, or list a tool.

Process map

- *Listing a tool:* Open tool rentals → List your own tool from the dashboard
- List your own tool from the dashboard → Owners: review the analytics dashboard
- Owners: review the analytics dashboard → Rental arranged or tool listed

Text version. 1. Open /tool-rentals, titled "Rent Tools from Your Neighbors". 2. Use the search field ("Search tools, brands, or categories...") and "Browse by category" tiles to find a tool. 3. Open the tool listing at /tool-rentals/:toolId. 4. Sign in and choose "Inquire About Rental" to start a rental. To list your own tool: 5. Choose "List Your Tool" (via the dashboard skills tab). 6. Owners review earnings and activity in the analytics dashboard at /tool-rentals/analytics.

Steps

Step 1: Browse tools for rent

Open /tool-rentals. The hero reads "Rent Tools from Your Neighbors" with the subtitle "Find affordable tools for rent from trusted community members in your area." Use the search field ("Search tools, brands, or categories..."), the "Browse by category" tiles, and the "Filters" panel to narrow by category and city.

> **Expected result:** Tool listings appear with photos, prices, and locations.

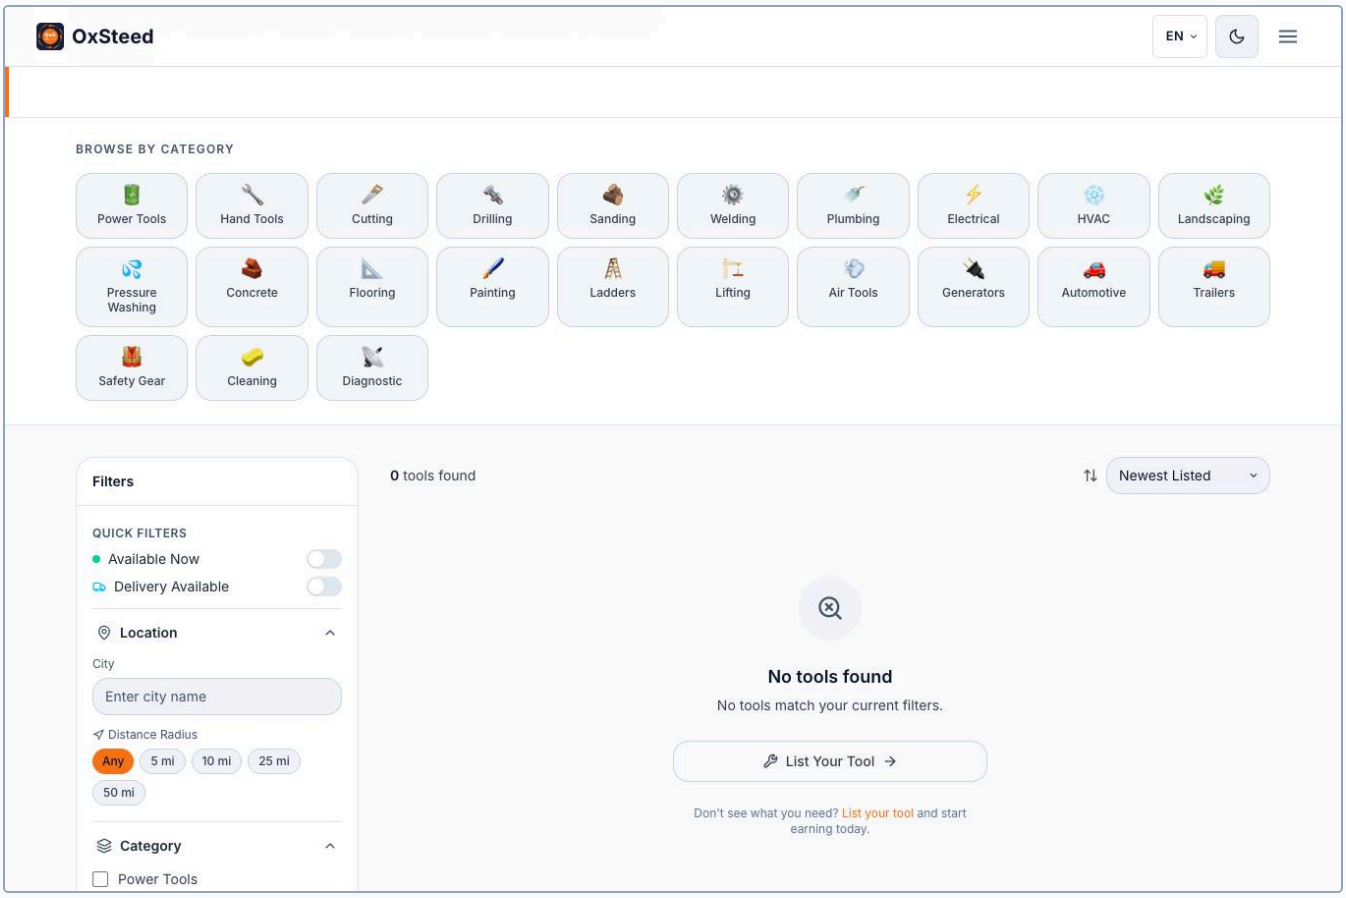

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Rent Tools from Your Neighbors)*

Step 2: Open a tool and inquire

Choose a tool to open /tool-rentals/:toolId with its photos, rental terms, deposit, and availability. Sign in, then choose "Inquire About Rental" to start the conversation with the owner and arrange the rental.

> **Expected result:** Your inquiry reaches the tool owner.

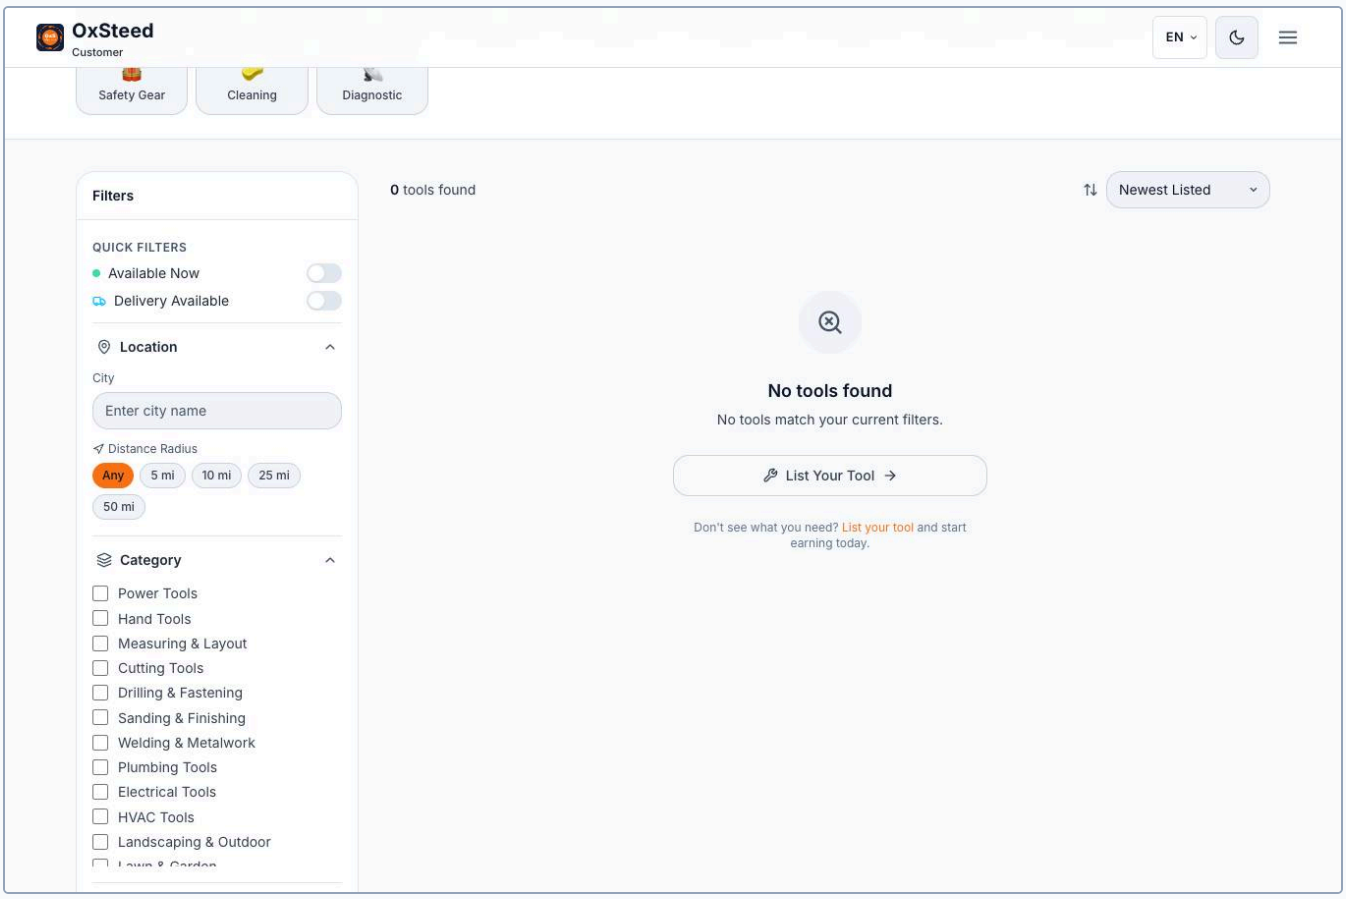

Figure 2. A tool listing, desktop view. *(Image description: Synthetic example: Rent Tools from Your Neighbors)*

Step 3: List your own tool

To earn from a tool sitting in your garage, choose "List Your Tool". Tool listings are managed from the dashboard skills tab (/profile/tool-rentals redirects to /dashboard?tab=skills). Create the listing with photos, description, daily rate, and deposit, then publish it.

> **Expected result:** Your tool appears in the browse results for your area.

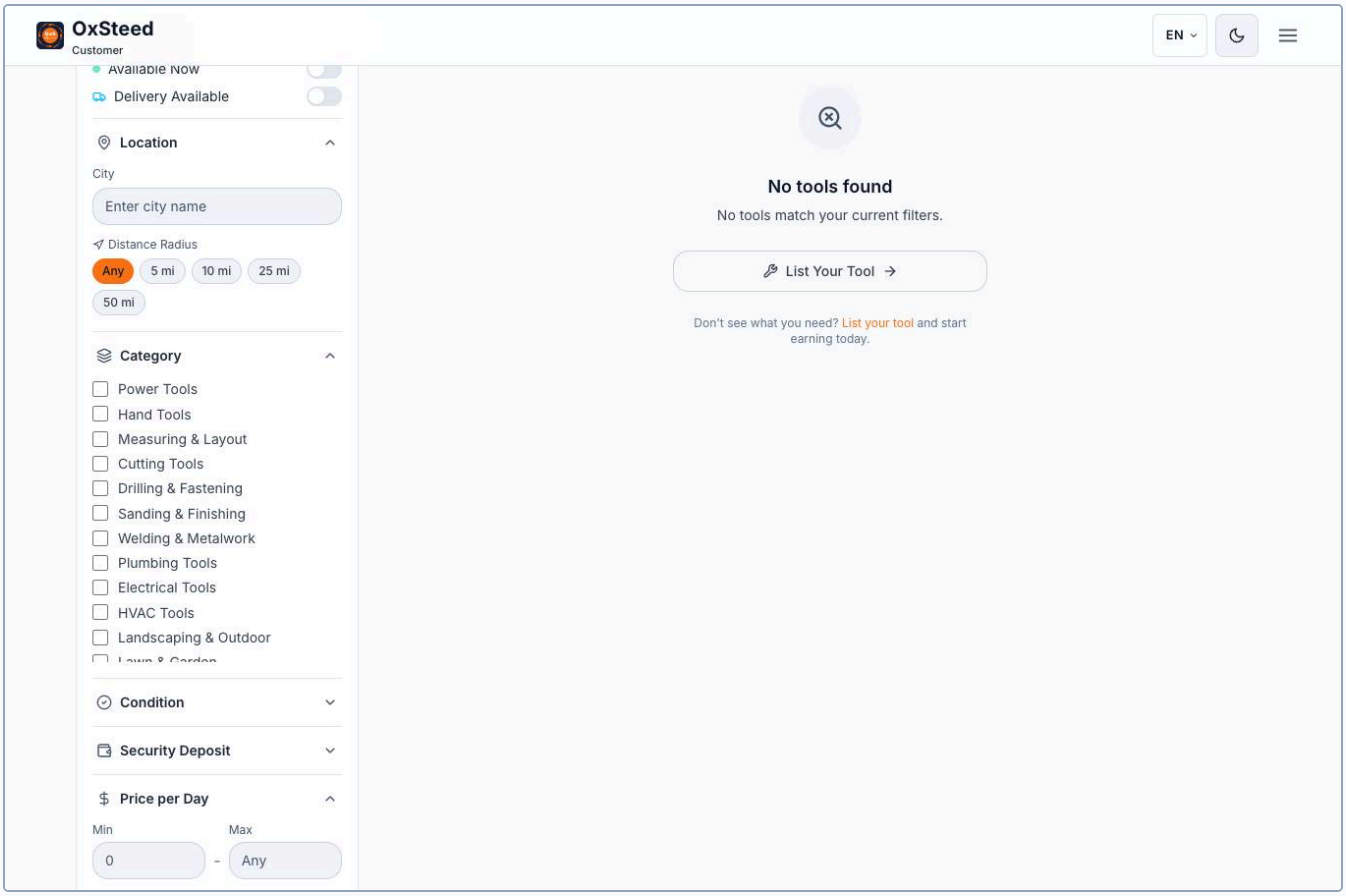

Figure 3. Listing a tool, desktop view. *(Image description: Synthetic example: Rent Tools from Your Neighbors)*

Step 4: Review owner analytics

Tool owners (tool_owner is a helper-class mode): open /tool-rentals/analytics for the owner analytics dashboard with rental activity, earnings, and favorites. Deposit handling (held, returned, withheld) is tracked per rental.

> **Expected result:** You can see rental activity and earnings for your tools.

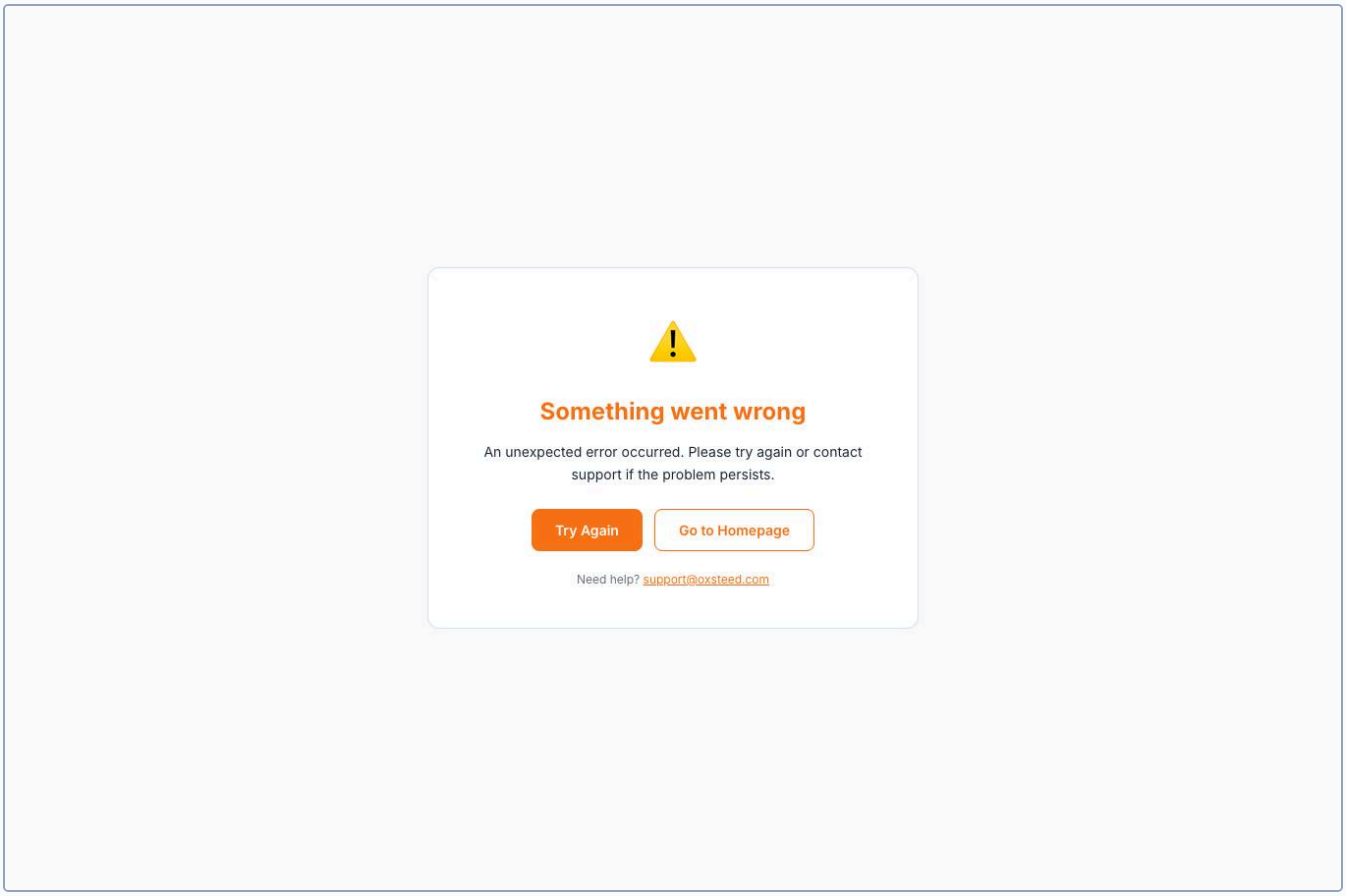

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

Your rental inquiry is with the owner, or your listed tool appears in browse results and analytics.

If something goes wrong

Problem	What to do

No tools appear for your search.	Clear filters and widen the category or city. Tool availability depends on owners near you.
An owner does not respond to your inquiry.	Inquire on another nearby listing, or adjust your requested dates.

Need help?

Rental issues: contact support from the in-app support page at /support.

Guide ID: restaurant-cancellations | **Revision:** 2 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS **ENGLISH**

Cancel a food order

Guide ID	**restaurant-cancellations**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager, Kitchen staff
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-cancellations

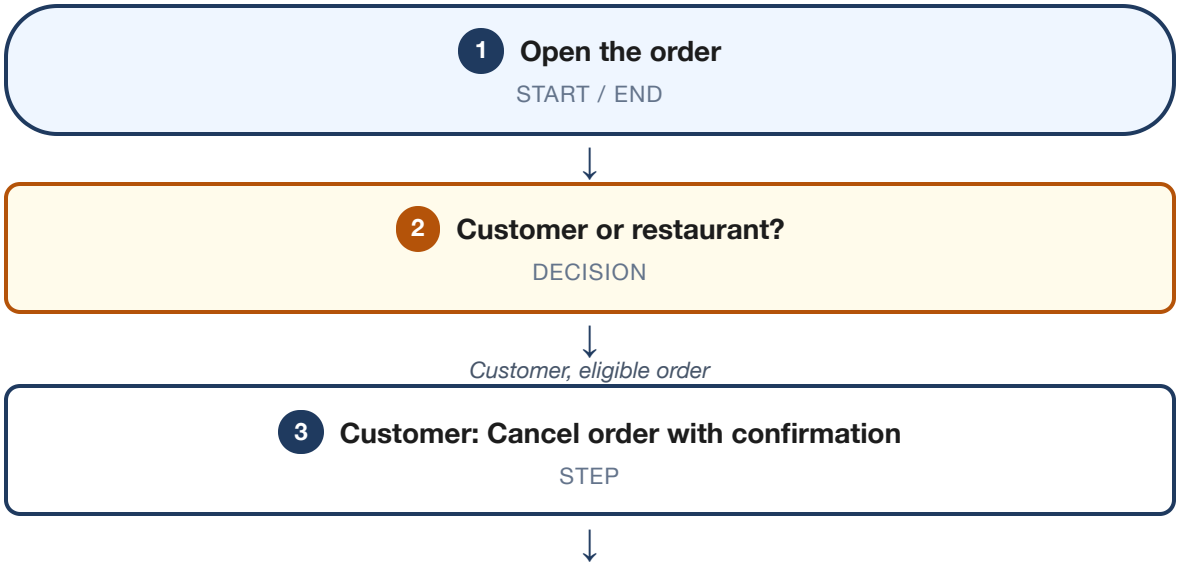

Goal

Cancel an order that cannot be fulfilled, from the customer or the restaurant side, with the right money handling.

Before you start

1. Sign in to your OxSteed account.
2. Open the order you want to cancel.

Process map

- *Customer, food order:* Customer or restaurant? → Food order: ask the restaurant via Get help
- *Restaurant:* Customer or restaurant? → Restaurant: Cancel in the order center
- Food order: ask the restaurant via Get help → Restaurant: Cancel in the order center
- Restaurant: Cancel in the order center → Money follows the cancel (refund or credit)

Text version. Open the order and decide who cancels it. Customers can cancel eligible non-food orders themselves with the "Cancel order" button after confirming. Food orders are cancelled by the restaurant from the order center, or by asking through "Get help with this order". The restaurant cancels from the order center or recalls the ticket in the kitchen. The payment is then refunded or returned to restaurant credit depending on how it was paid.

Steps

Step 1: Open the order

Open the order from /orders or /food/orders/:orderId. The page shows the "Order summary", "Payment details", and the current order status.

> **Expected result:** You can see the order status and whether a cancel option is available.

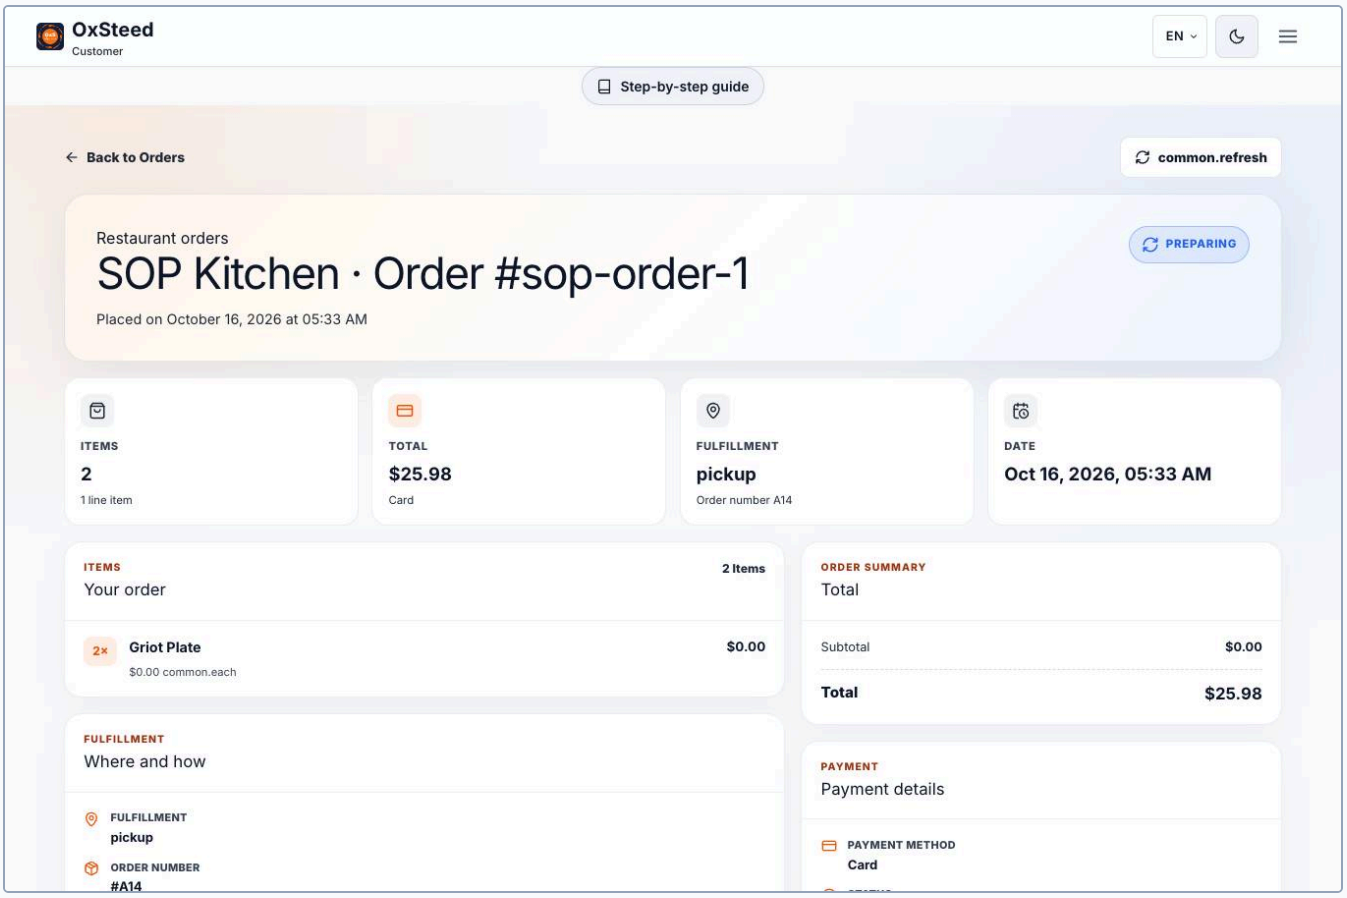

Figure 1. Opening the order, desktop view. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Step 2: Cancel an eligible order as a customer

For non-food orders in "pending" or "paid" status, choose "Cancel order" and confirm in the dialog. The "Cancel order" button only renders while the order is still cancellable; food orders are handled by the restaurant instead.

> **Expected result:** The order status changes to cancelled and you see "Order cancelled".

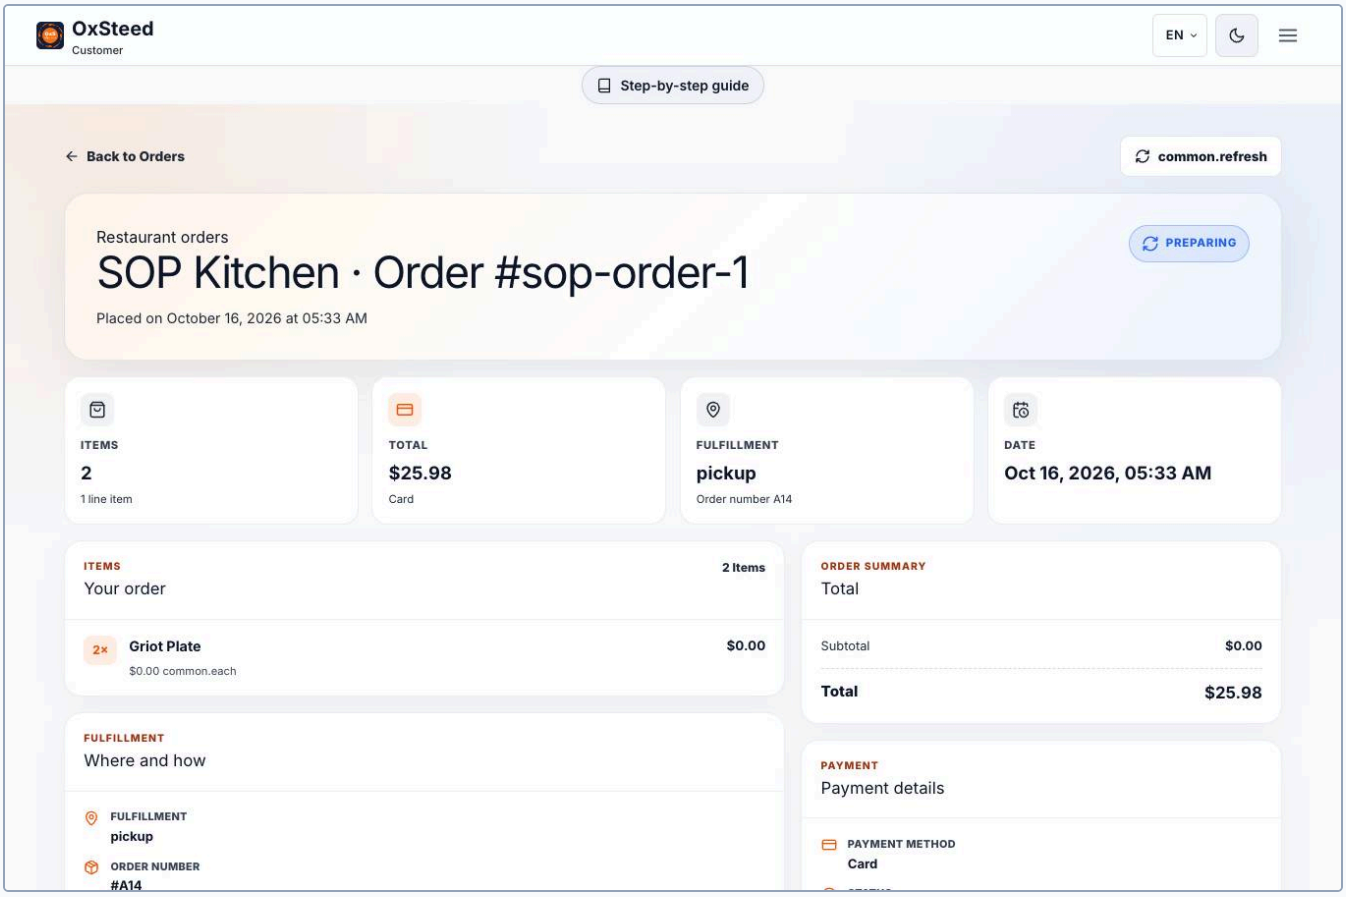

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Step 3: Ask the restaurant about a food order

Food orders cannot be cancelled from the order detail page. Choose "Get help with this order" on the order and send a message asking the restaurant to cancel. The restaurant cancels from its side.

> **Expected result:** The restaurant receives your request and cancels the order for you.

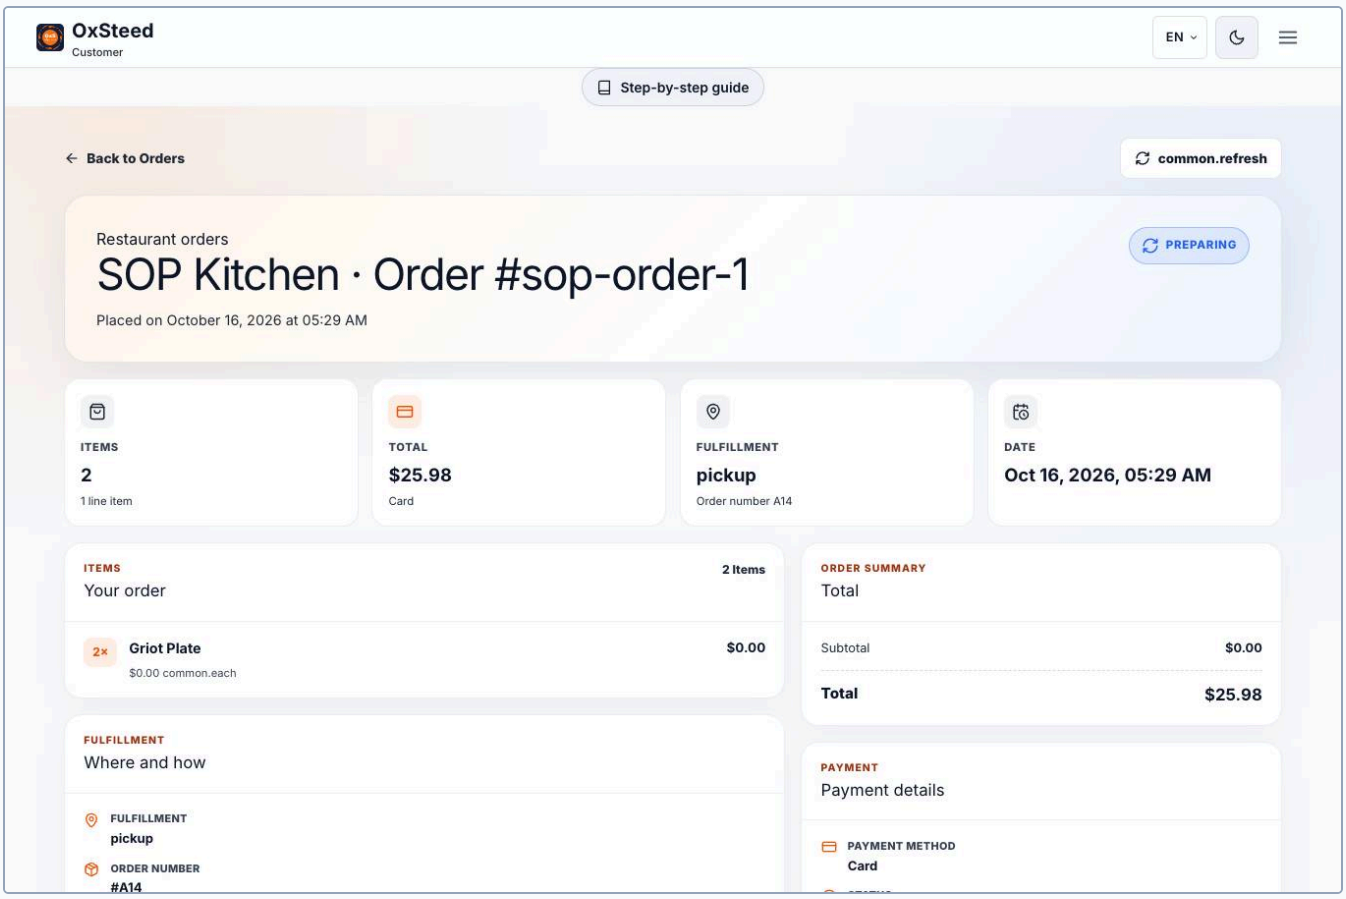

Figure 3. Asking the restaurant, desktop view. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Step 4: Cancel an order in the restaurant order center

On the restaurant dashboard at /restaurants/merchant, open the "Orders" tab ("Manage live service and find every completed, cancelled, or refunded order."). Choose the order ("Select an order", then "Order details"). On orders with status received, accepted, or preparing, choose "Cancel" to set the order to cancelled. Advance other orders with the status button ("Start preparing", "Mark ready", "Complete") instead.

> **Expected result:** The order status becomes cancelled and appears in the "Order history" view.

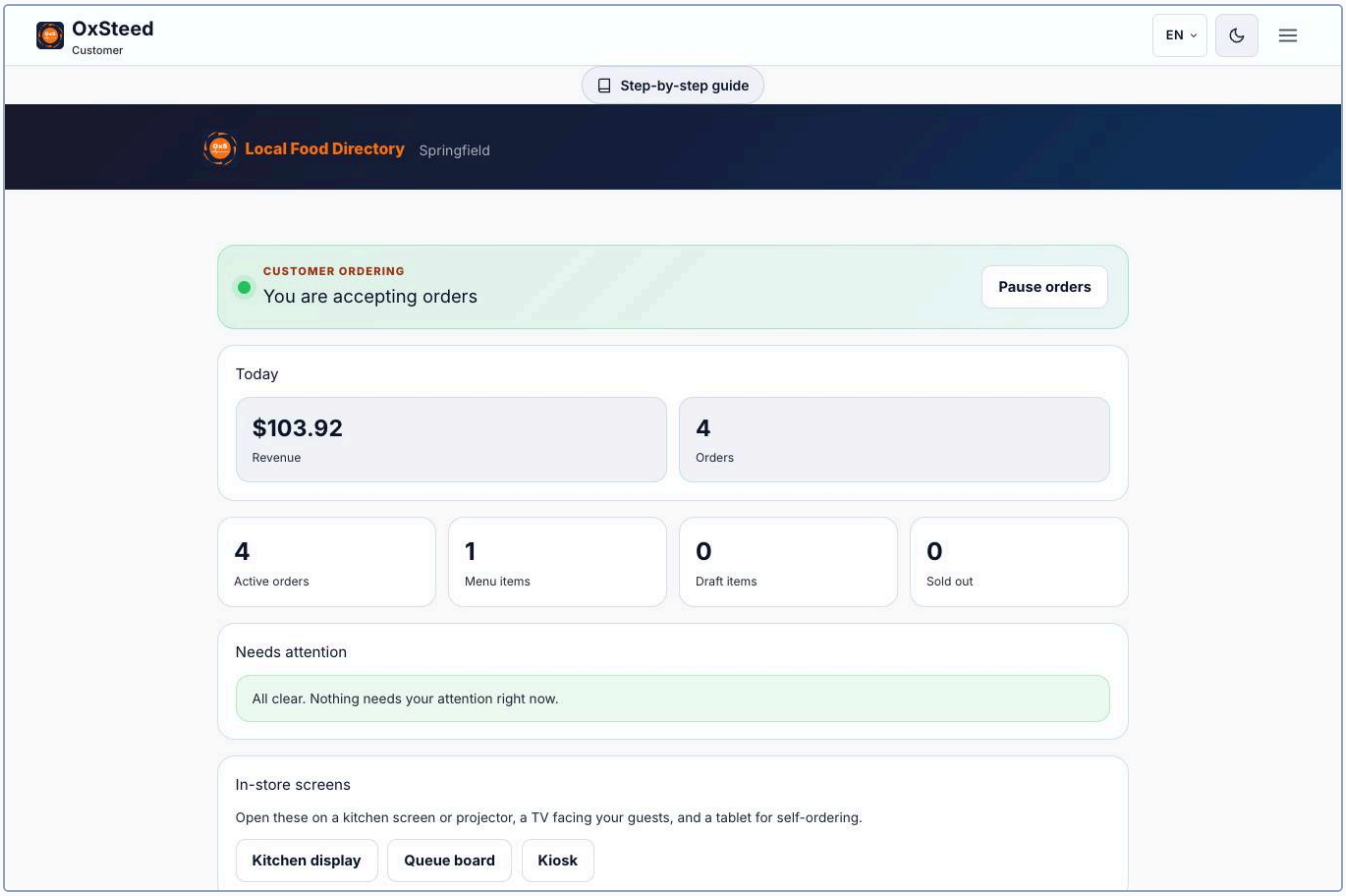

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Order center order detail with the Cancel button)*

Step 5: Recall a kitchen ticket if needed

If the ticket is already on the Kitchen display, use "Recall" on the item or "Reopen" on the order so the kitchen stops working it.

> **Expected result:** The kitchen stops preparing the cancelled order.

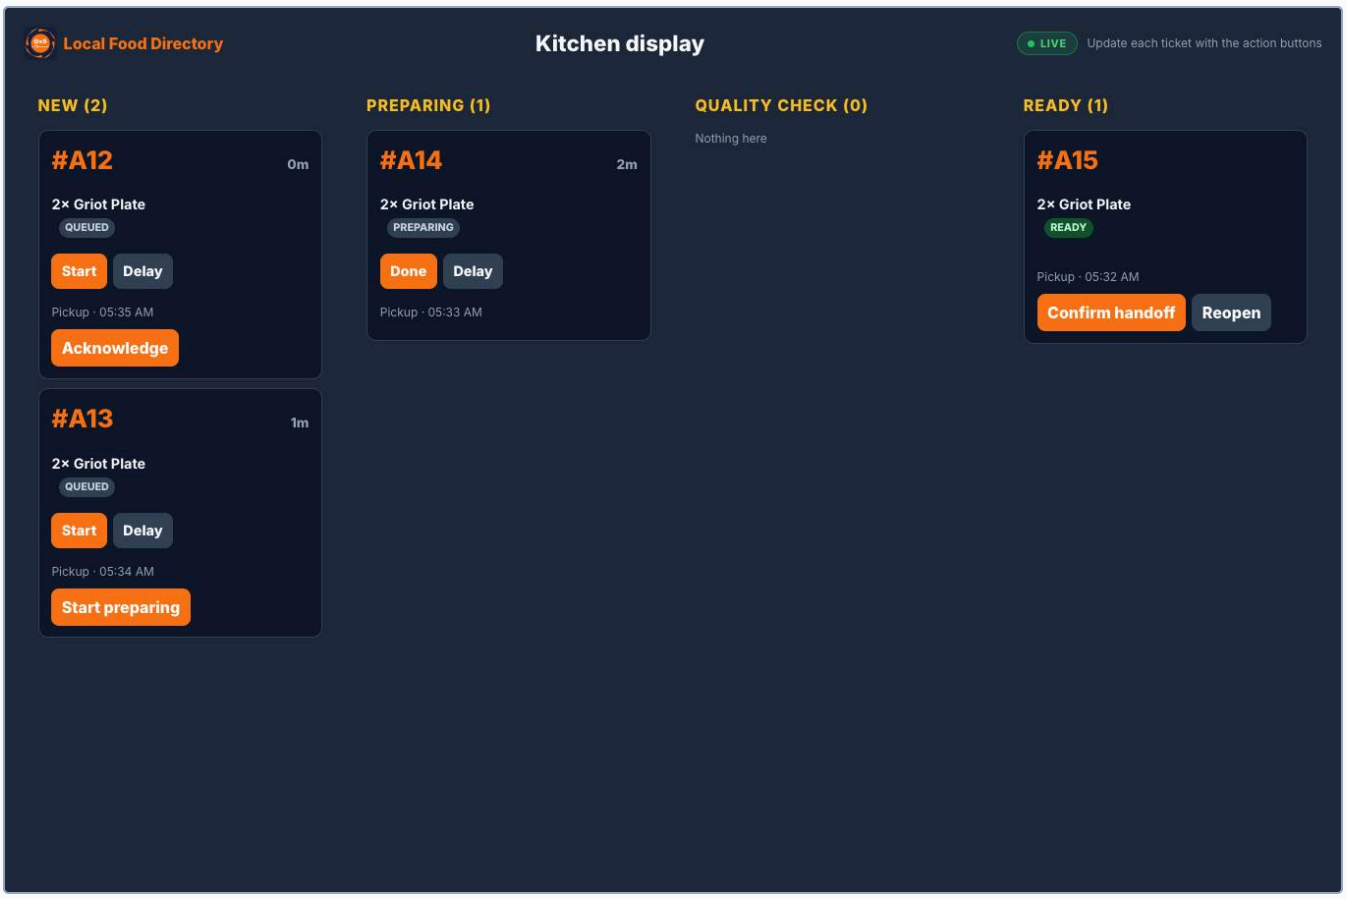

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Kitchen display)*

Step 6: Confirm the money handling

Cancellation does not automatically refund every payment type. Card orders are refunded by cancelling ("Card orders are refunded by cancelling the order. The card refund happens automatically."). Orders paid with Restaurant credit are re-credited to the restaurant wallet; direct or pay-at-restaurant orders are simply marked cancelled. Use the refund guide for refund-specific flows.

> **Expected result:** The order shows "Payment refunded" or the credit returns to the customer wallet.

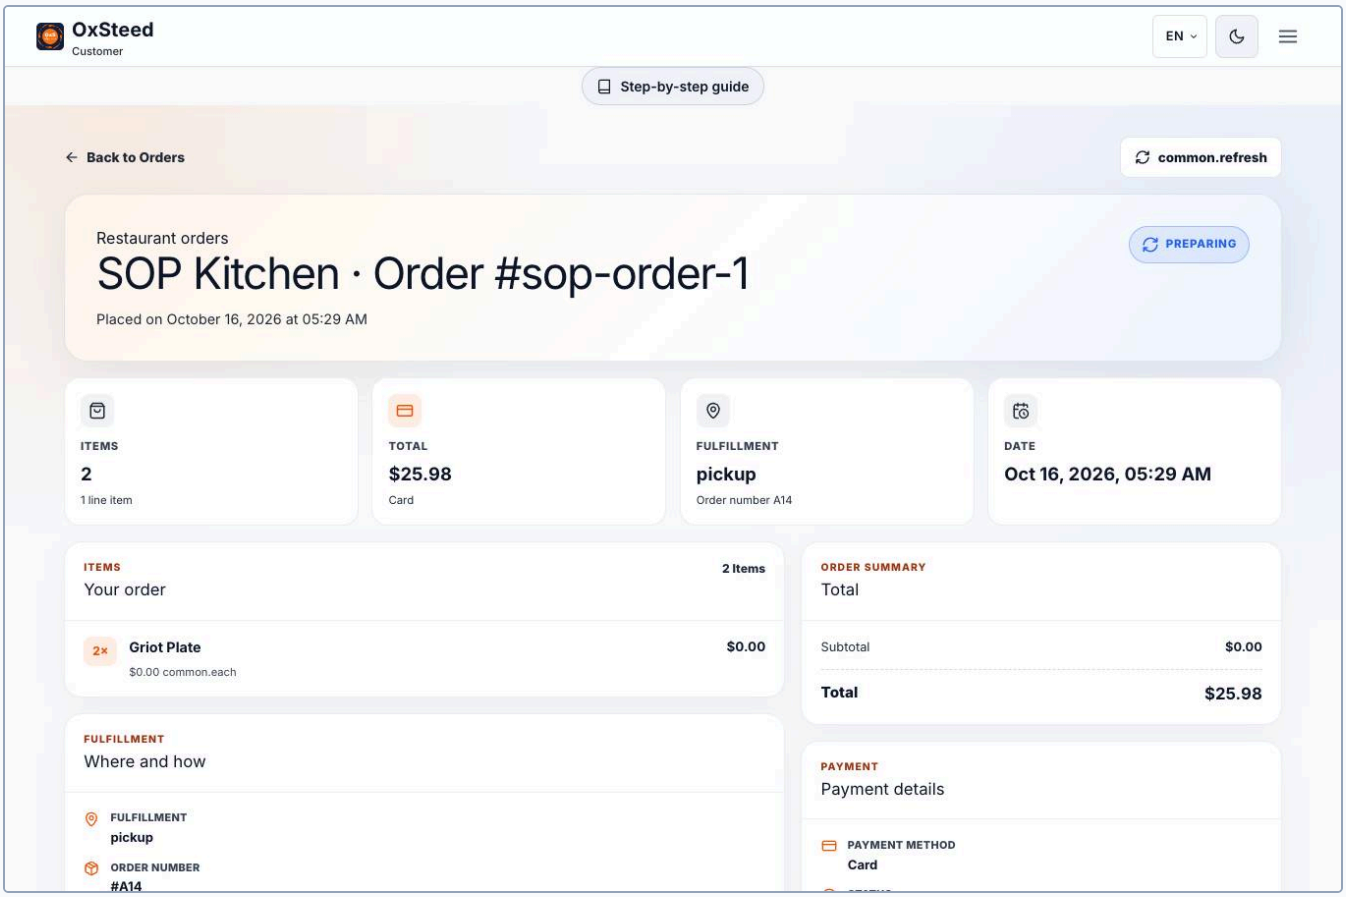

Figure 6. Checking payment status after cancellation, desktop view. *(Image description: Synthetic example: SOP Kitchen · Order #sop-order-1)*

Confirm it worked

The order status is cancelled and the payment shows the right follow-up: refunded, re-credited, or marked.

If something goes wrong

Problem	What to do
The "Cancel order" button is missing on a food order.	That is expected: food orders are cancelled by the restaurant. Use "Get help with this order" to ask the restaurant to cancel.
Cancelling failed.	You see "Failed to cancel order" or "Could not update the order." Retry; if the order already moved to ready or completed, it can no longer be cancelled.
The payment was not refunded after cancelling.	Only card payments refund automatically on cancel. Restaurant credit returns to the wallet, and direct payments need the merchant refund flow. See the refunds guide.

Need help?

For cancellation help, use the in-app support page at /support.

Guide ID: restaurant-ordering | **Revision:** 2 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Order food as a customer

Guide ID	**restaurant-ordering**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-ordering

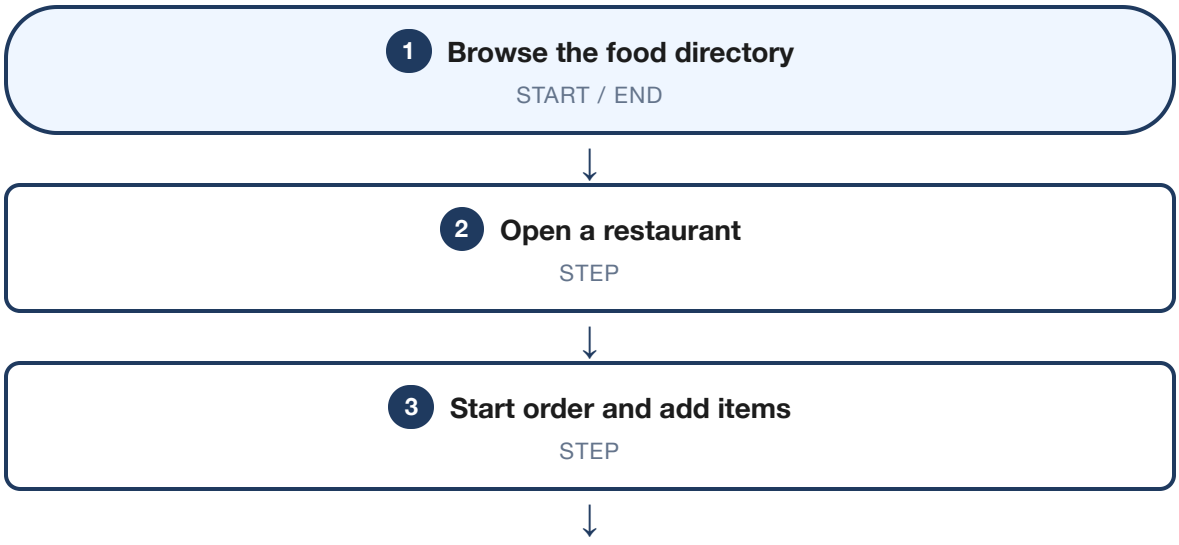

Goal

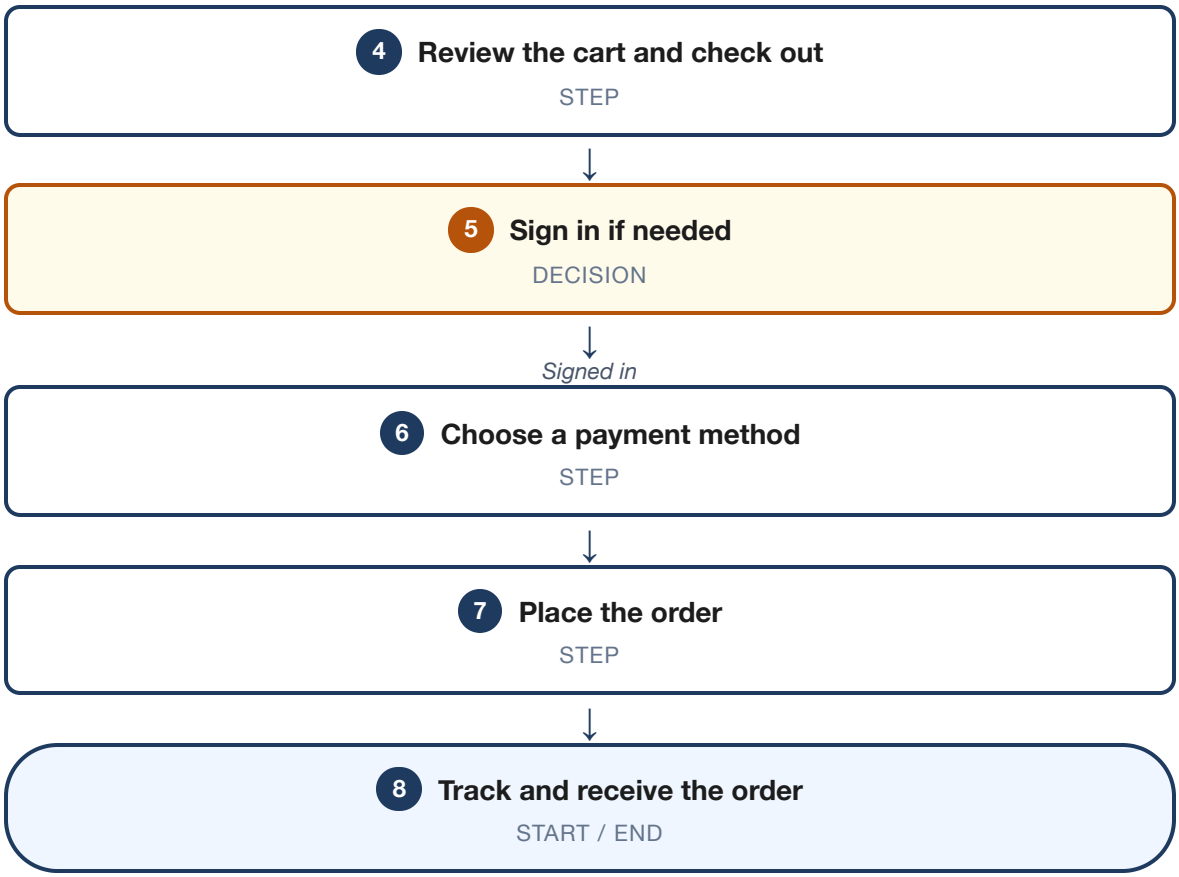

Find a restaurant, build an order, pay with the right method, and track the order to pickup or delivery.

Before you start

1. Browsing is open to everyone. Sign in to your OxSteed account before checkout so the order can be tracked and recovered.

Process map

- *Not signed in:* Sign in if needed → Review the cart and check out

Text version. Browse the food directory at /food and open a restaurant. Choose "Start order" and add items from the menu. Open the cart and continue to checkout, signing in when prompted. Fill in pickup or delivery details, choose a payment method, and place the order. Track the order from the confirmation screen or your order history.

Steps

Step 1: Browse the food directory

Open /food ("Local Food Directory"). Use the search field ("Search restaurants or cuisines") and "Search", or "Near me" for nearby spots. Restaurants show "Open now" or "Closed", prep time ranges, and delivery terms.

> **Expected result:** A list of restaurants near you, or results for your search.

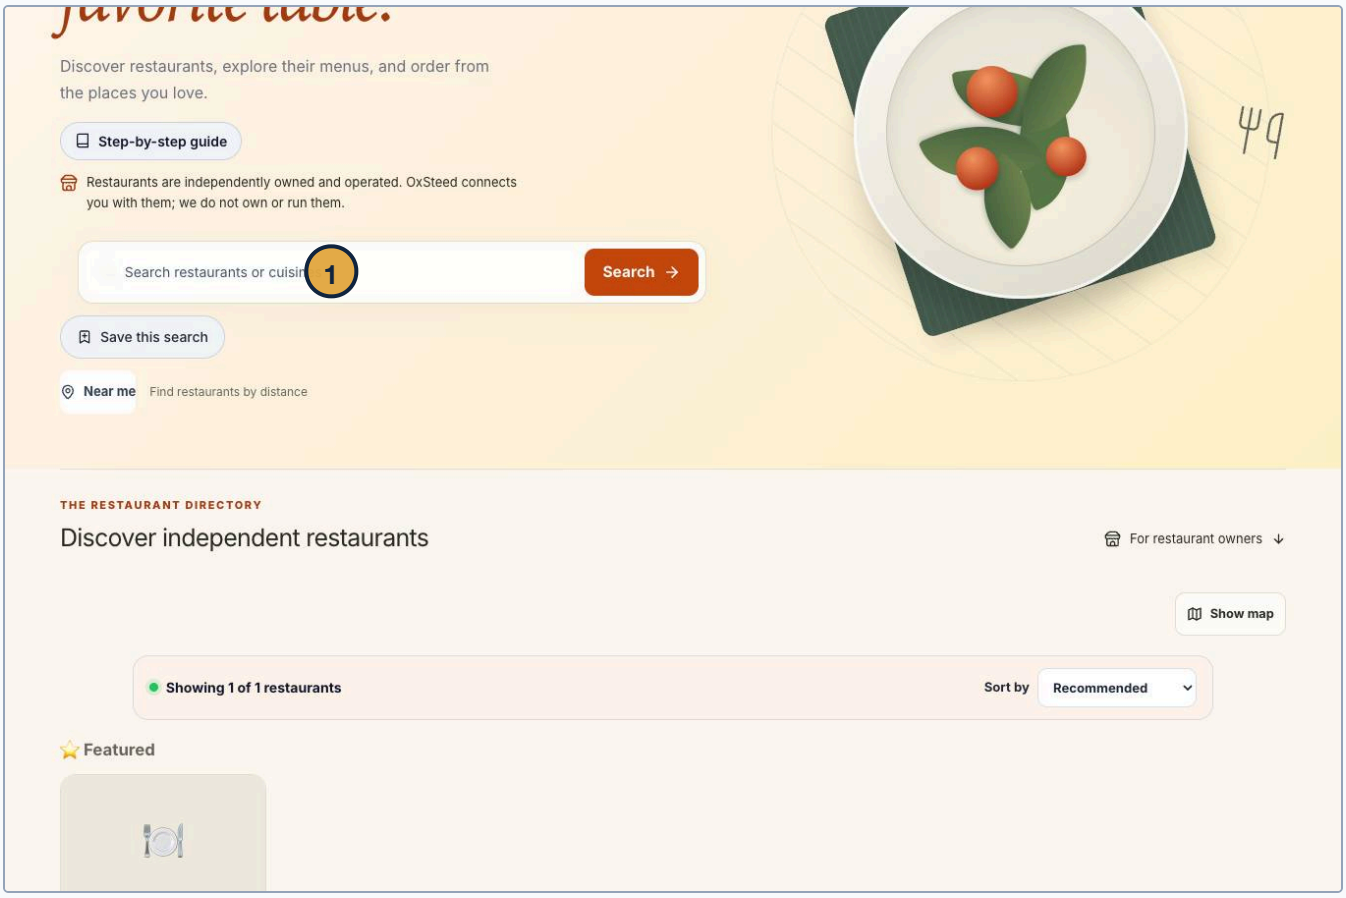

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Find your next favorite table.)*

1. **1.** Search field

Step 2: Open a restaurant and explore the menu

Open a restaurant. Tabs at the top offer "Menu", "Info", "Reviews", "Deals", and "Media". Use the menu search ("Search ...") and filters ("All", "Vegetarian", "Vegan", "Spicy"). "Sold out" items cannot be added.

> **Expected result:** You can see the full menu with prices and availability.

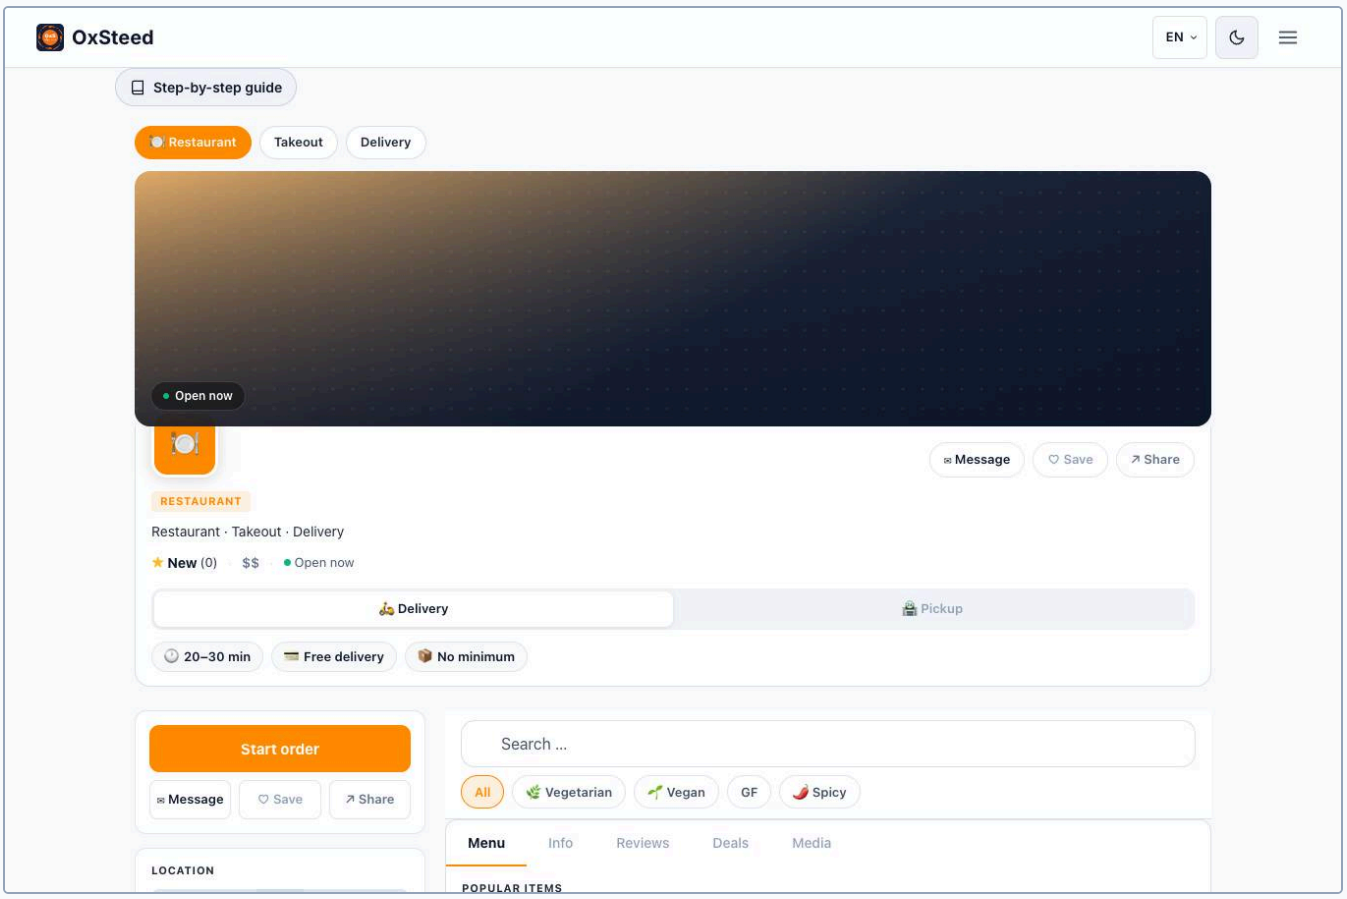

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Restaurant page with menu items)*

Step 3: Start the order and add items

Choose "Start order". On each item, choose the add control ("Add 1 · $X") and pick any required options first. "Your order" shows the running total ("Order · 2 item(s)").

Expected result: The order tray shows your items and the running total.

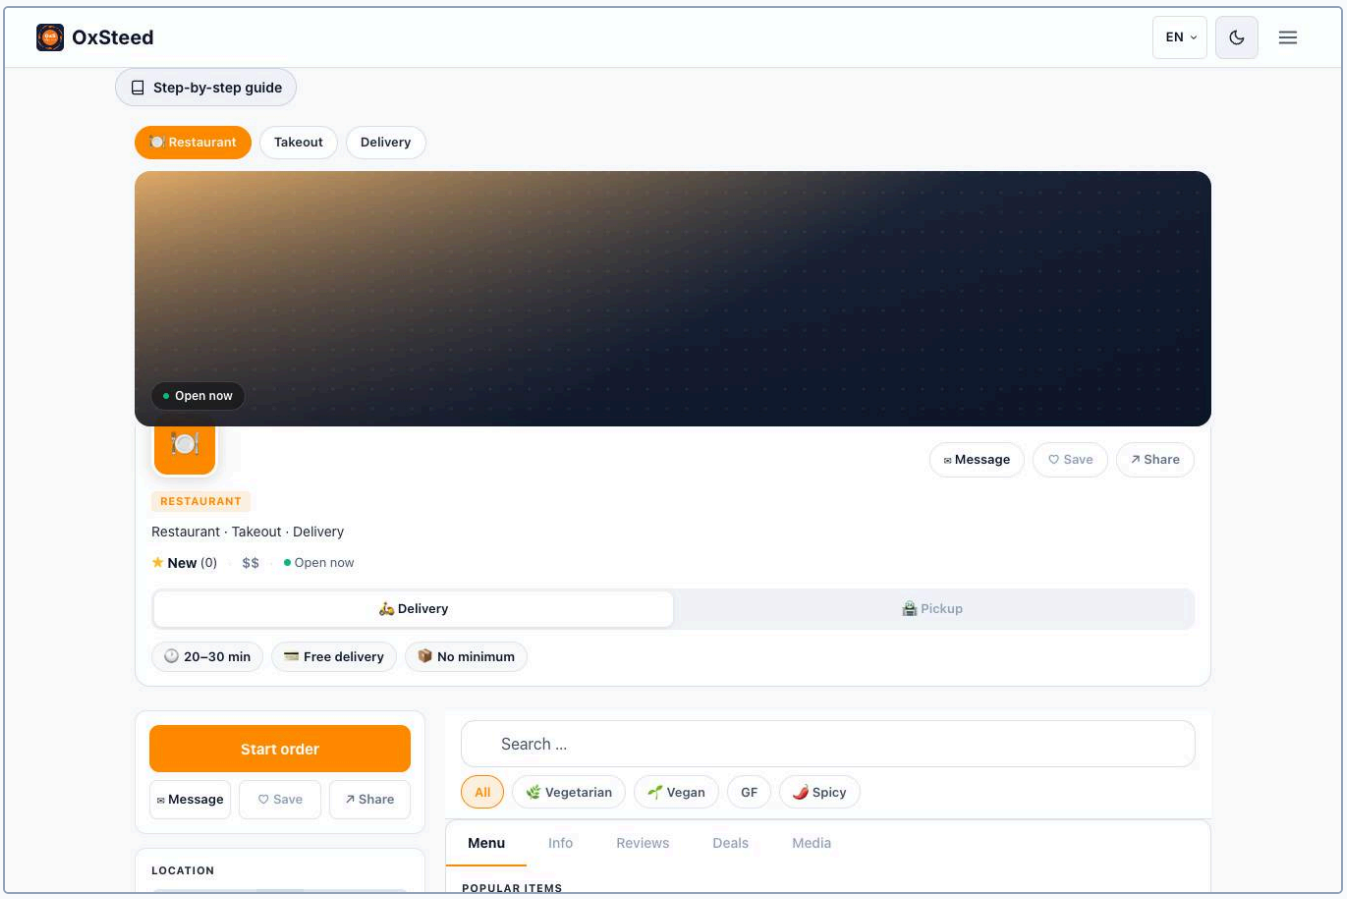

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Order tray with added items)*

Step 4: Review the cart and continue to checkout

Choose "View cart", then "Checkout". If you are not signed in, you see "Sign in to continue checkout": choose "Sign in to continue". Then enter the "Pickup details" or "Delivery details" (name, phone, address, and "Pickup time" or "Delivery time") and choose "Continue to payment".

> **Expected result:** You reach the "Payment method" step with the order summary ("Order summary", "Subtotal", "Tax", "Tip", "Total").

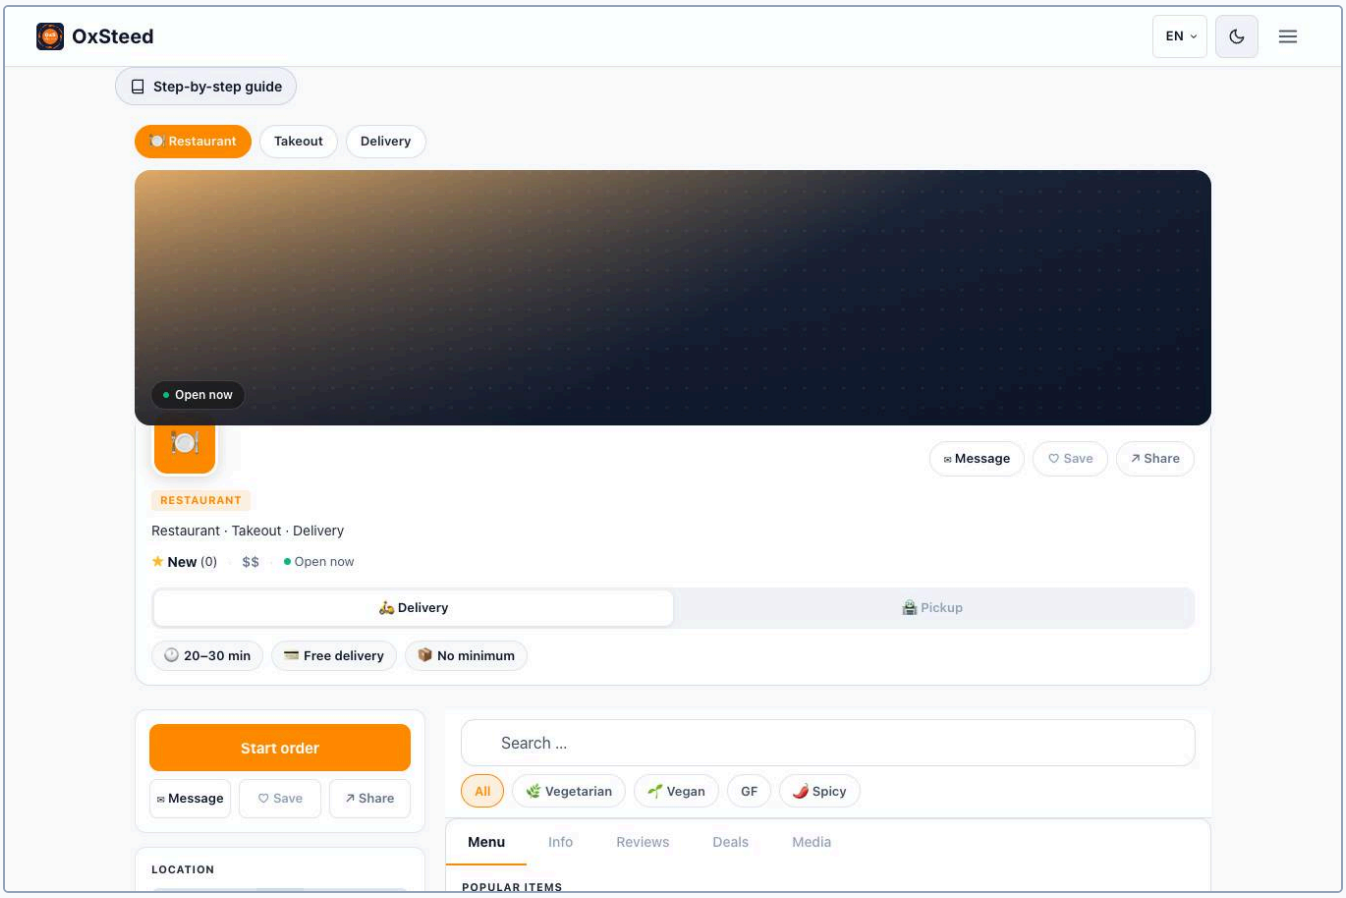

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Cart view with items and totals)*

Step 5: Choose a payment method

On "Payment method", pick one: "Restaurant credit" (spends your balance held at this restaurant, shown as "{{amount}} available"; this is per-restaurant credit, not OxSteed Credit), "Pay by card" ("Pay online with your card"), "Pay at the restaurant" ("Card or cash, settled with the restaurant"), "Pay on delivery", or "Pay with restaurant payment app" ("Use the restaurant's payment instructions and upload proof"). Guests may also see "Guest Credit" ("Pay with OxSteed Credit as a guest (up to $25/order)"), which uses OxSteed Credit, not restaurant credit. For direct payment, "Upload receipt" or "Enter confirmation" before placing the order.

> **Expected result:** The payment method is selected and any required proof is attached.

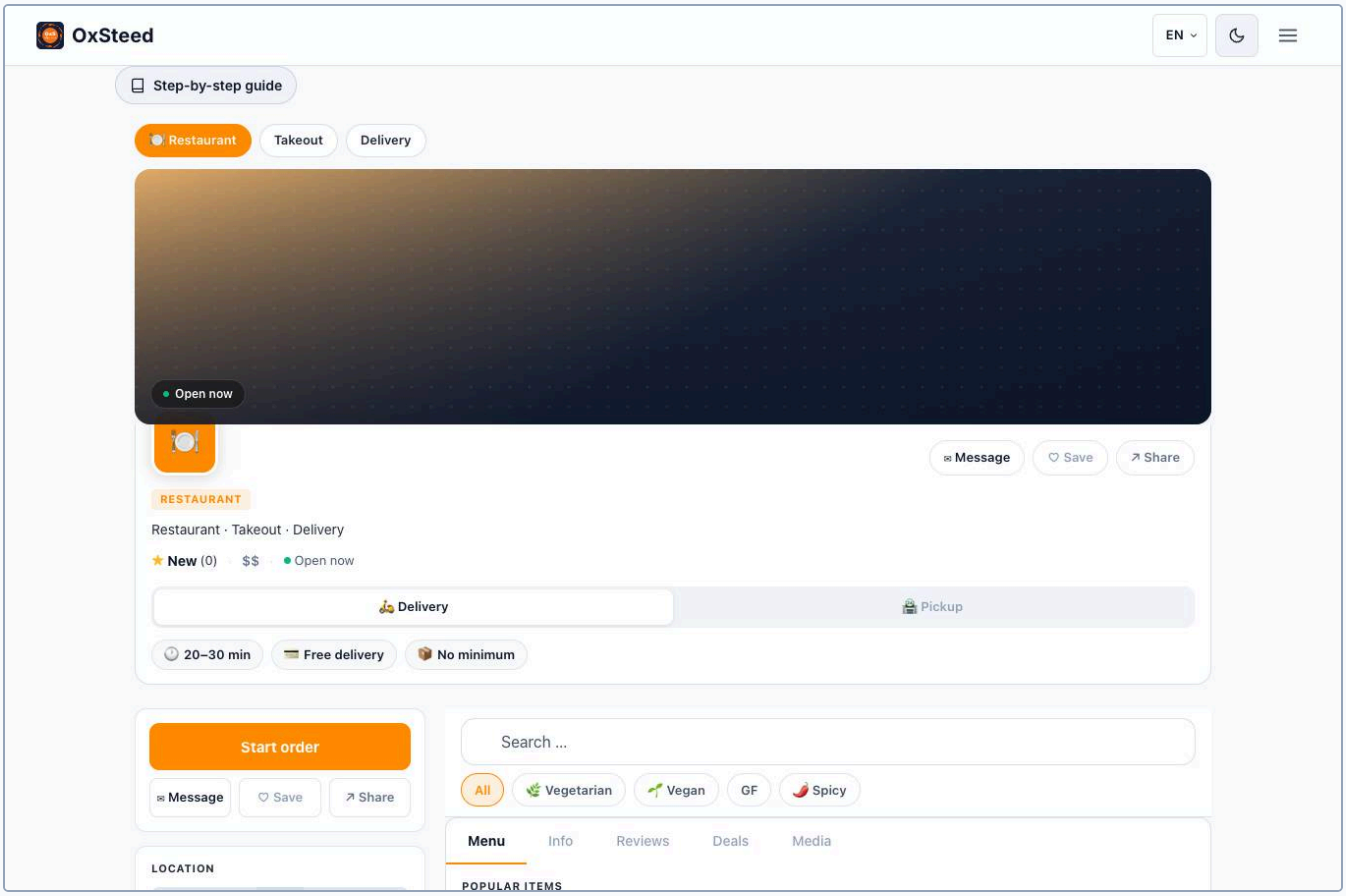

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Payment method options including restaurant credit and card)*

Step 6: Place the order

Review the "Order summary" (items, "Subtotal", "Tax", "Tip", "Total"). Add a "Promo code" ("e.g. SUMMER10") or "Notes for the kitchen" ("Allergies, extra sauce, no onions") if wanted, then choose "Place order · {{total}}". Restaurant credit shows the note "Your restaurant credit is charged when the order is placed."

> **Expected result:** You see "Order placed!" and "Your order number is #X."

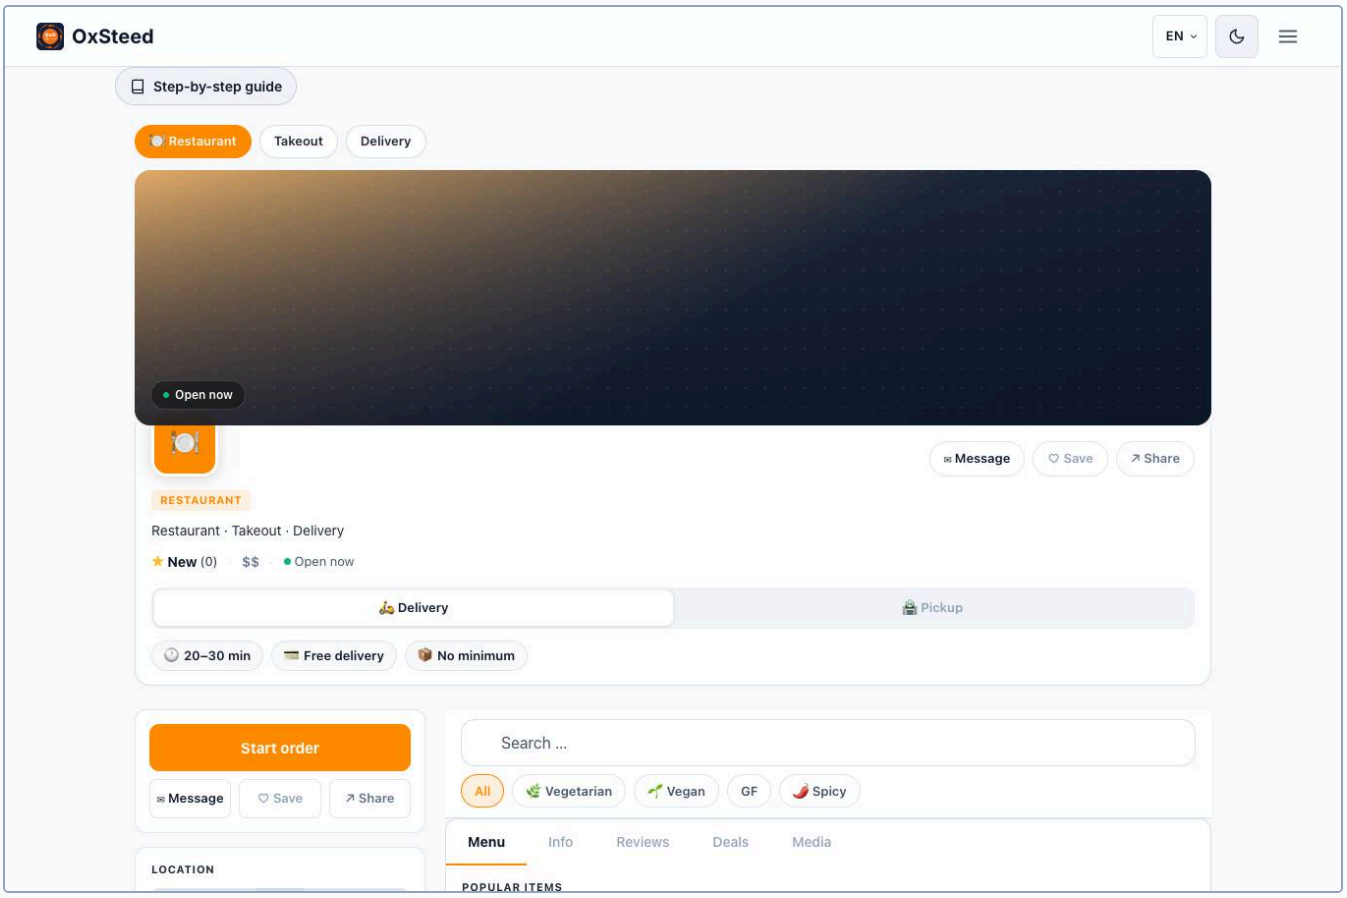

Figure 6. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Order summary before placing)*

Step 7: Track the order

From the confirmation screen, use "Live status" and the "Estimated time", or open the order from /orders later. Food orders also open /food/track/:token ("Track Order") with "Order", "Status", "Ready around", "Payment", "Items", "Total", and "Print Receipt". From the order detail page you can also use "Track order live".

> **Expected result:** You can follow the order status from placed through ready to completed.

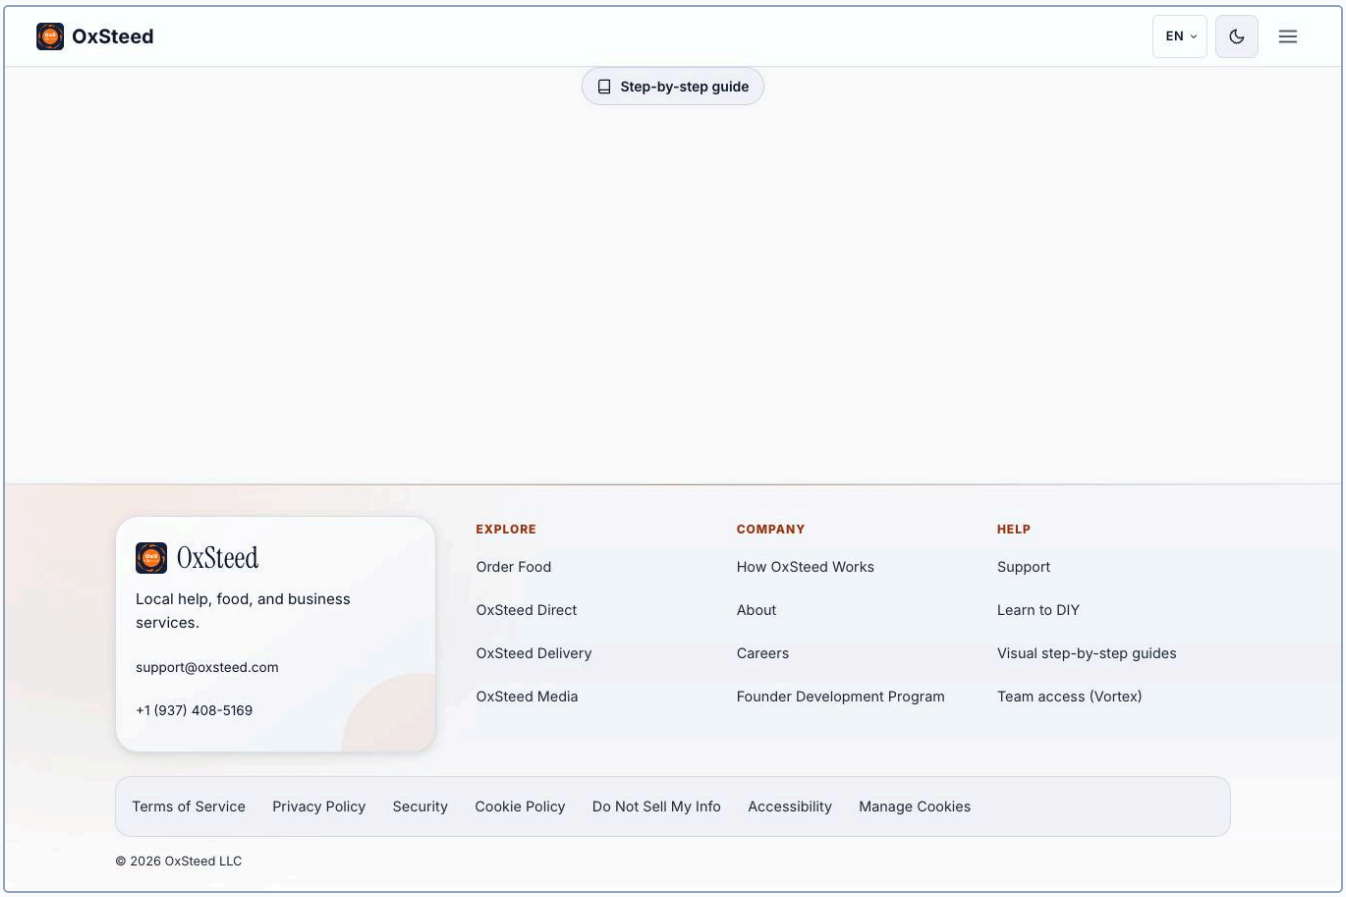

Figure 7. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Order confirmation with tracking)*

Confirm it worked

The order shows "Order placed!" with an order number, and it appears in your order history at /orders with the right status.

If something goes wrong

Problem	What to do
You see "Sign in to continue checkout" and cannot pay.	Choose "Sign in to continue". Browsing is open to everyone, but checkout needs an OxSteed account so the order can be tracked and recovered.
You see "Insufficient balance" on the Restaurant credit option.	That is your per-restaurant balance, separate from OxSteed Credit. Add restaurant credit at /restaurant-credit, or choose another payment method.
The restaurant requires a minimum order.	Add more items until you meet "This restaurant requires a minimum order of X."
Placing the order fails.	You see "We couldn't place your order. Please try again." Check your connection and that the payment proof (if paying the restaurant directly) is attached, then retry.

Need help?

For order help, use the in-app support page at /support.

Guide ID: restaurant-pickup-delivery-handoff | **Revision:** 2 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Hand off pickup and delivery orders

Guide ID	**restaurant-pickup-delivery-handoff**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Runner, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-pickup-delivery-handoff

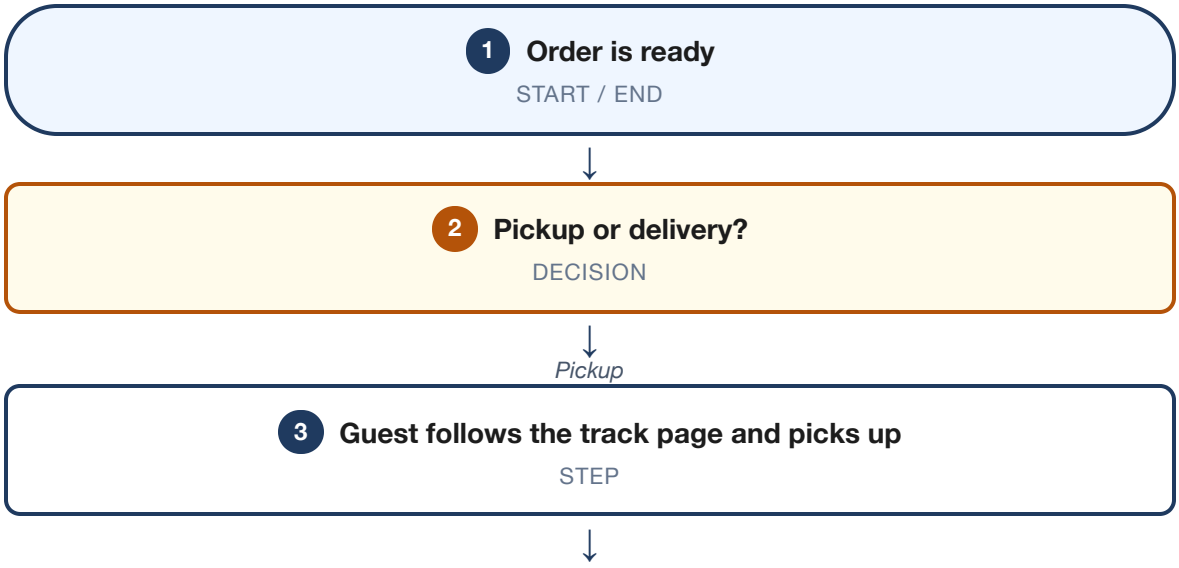

Goal

Hand pickup orders to guests and complete runner deliveries with proof, so every order has a clear handoff record.

Before you start

1. The order is marked ready in the kitchen display.
2. Runners: sign in and open the runner page for your restaurant.

Process map

4 Handoff complete

START / END

- *Delivery:* Pickup or delivery? → Runner claims the delivery offer
- Runner claims the delivery offer → Runner delivers with proof
- Runner delivers with proof → Runner settles cash and records remittance
- Runner settles cash and records remittance → Handoff complete

Text version. When the kitchen marks an order ready, pickup guests follow the track page to the counter while delivery orders go to the runner page as "New delivery offers". The runner claims the offer, shares live location, starts the delivery, logs proof, and marks it delivered. Cash orders are settled through "Create settlement", "Mark paid", and "Record remittance".

Steps

Step 1: Follow the track page as a guest

Open /food/track/:token ("Track Order"). It shows "Order", "Status", "Ready around", "Payment", "Items", and "Total". When the order is ready, pick it up at the counter. "Print Receipt" gives you the paper record.

> **Expected result:** You know when and where to collect the order, and you have the receipt.

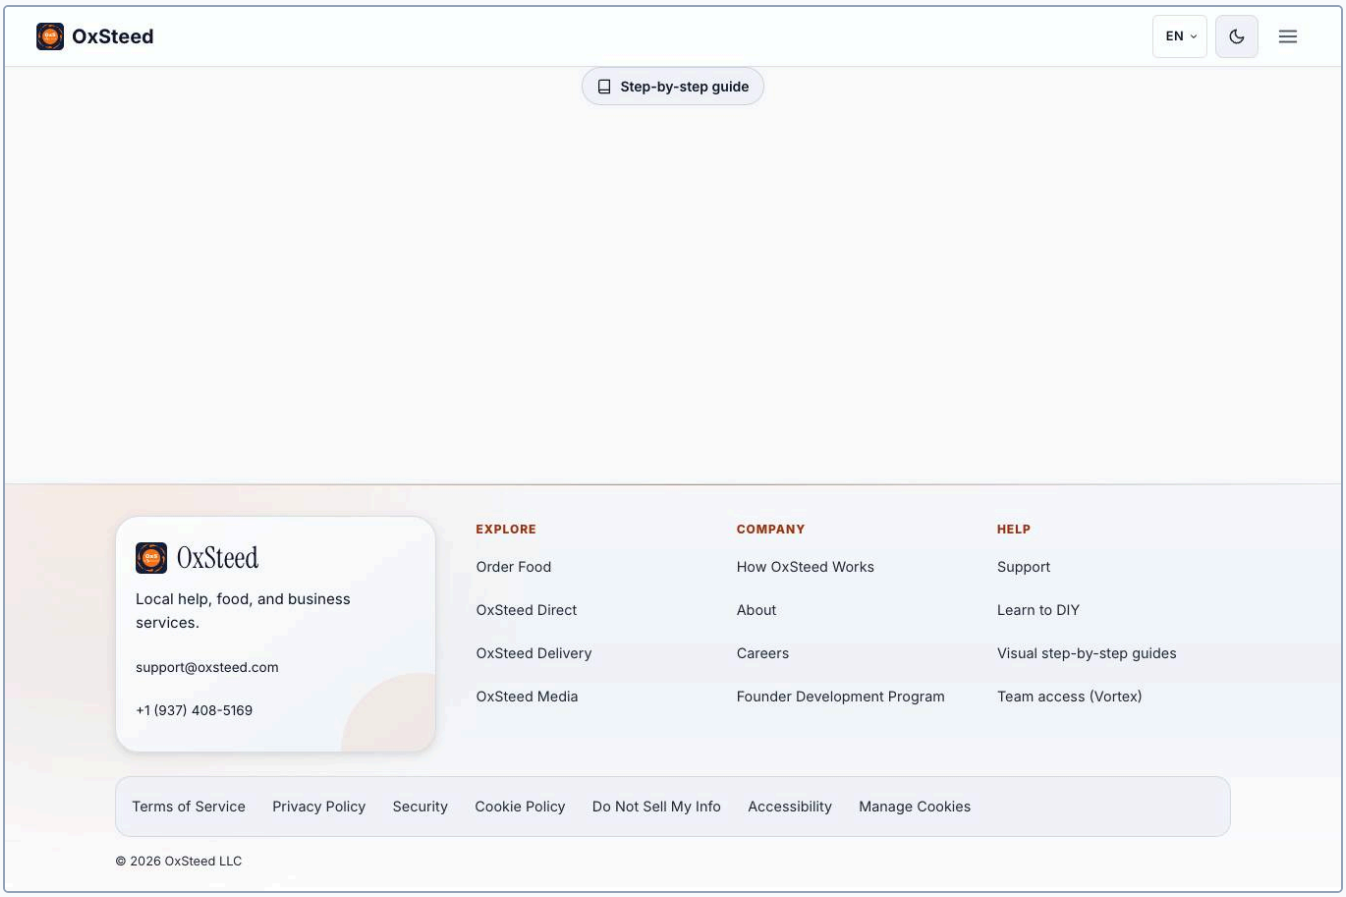

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Order tracking page with status and items)*

Step 2: Claim a delivery offer as a runner

Open /restaurants/runner/:restaurantId ("Runner"). Under "New delivery offers", choose "Claim" on an offer (or "Decline" to skip it). The page shows your "Active", "Delivered", "New offers", and "Failed" counts.

> **Expected result:** You see "Task claimed" and the delivery appears under your active tasks.

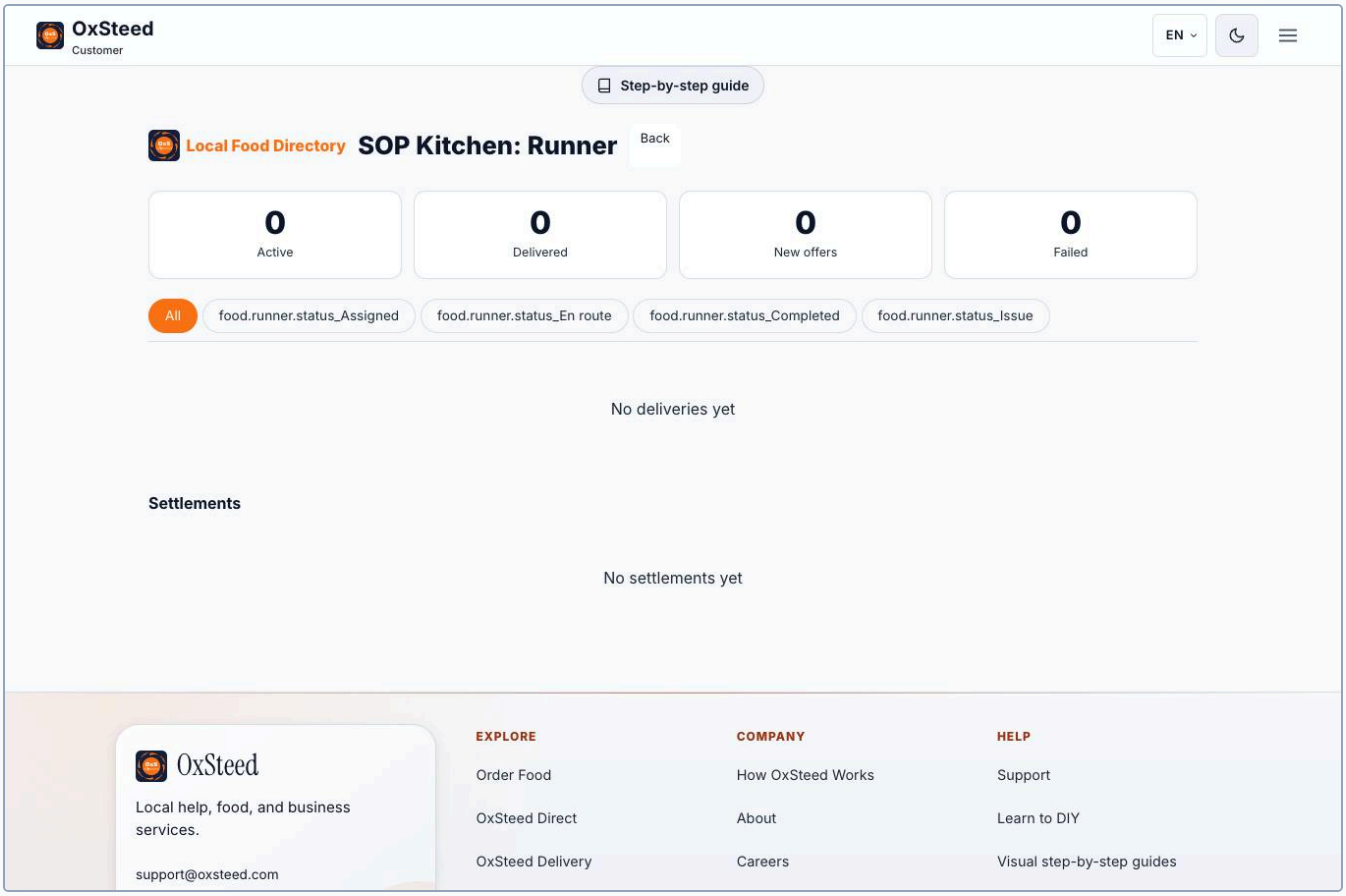

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen: Runner)*

Step 3: Start the delivery and share your location

Choose "Start delivery" on the claimed task. Choose "Share live location" so the customer sees "Runner nearby" with "location updated Xs ago". Use "Stop sharing" when the delivery is done.

Expected result: The customer tracking page shows your live position.

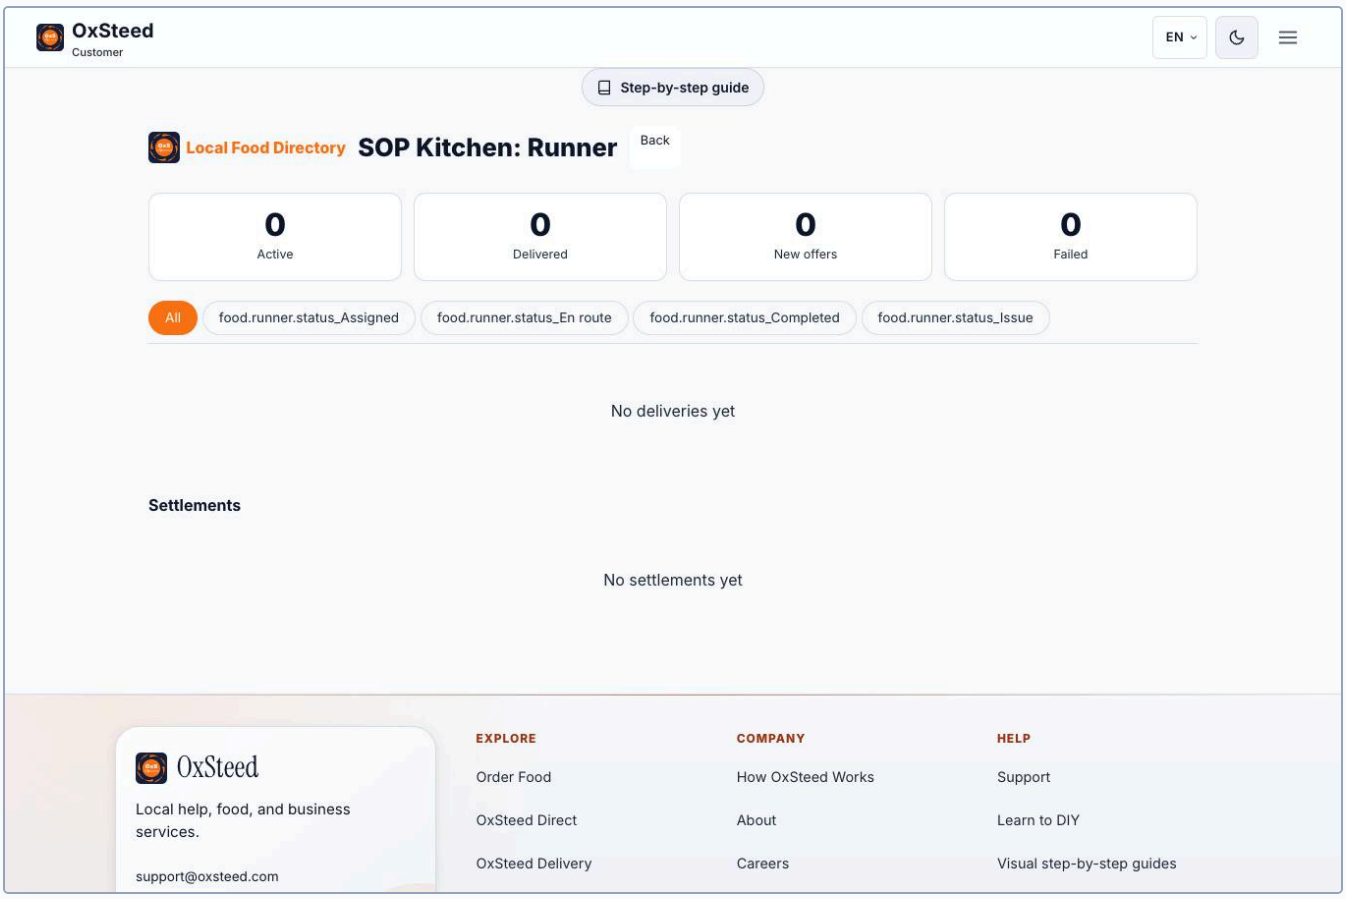

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen: Runner)*

Step 4: Log proof and mark the delivery done

Choose "Log proof" on the task ("Proof for Order"), add a "Note" ("Describe the delivery..."), and choose "Save proof" ("Proof saved"). Then choose "Mark delivered". If something went wrong, use "Report issue" with "Severity" and "Description", then "Submit" ("Issue reported").

> **Expected result:** The delivery completes with proof on record.

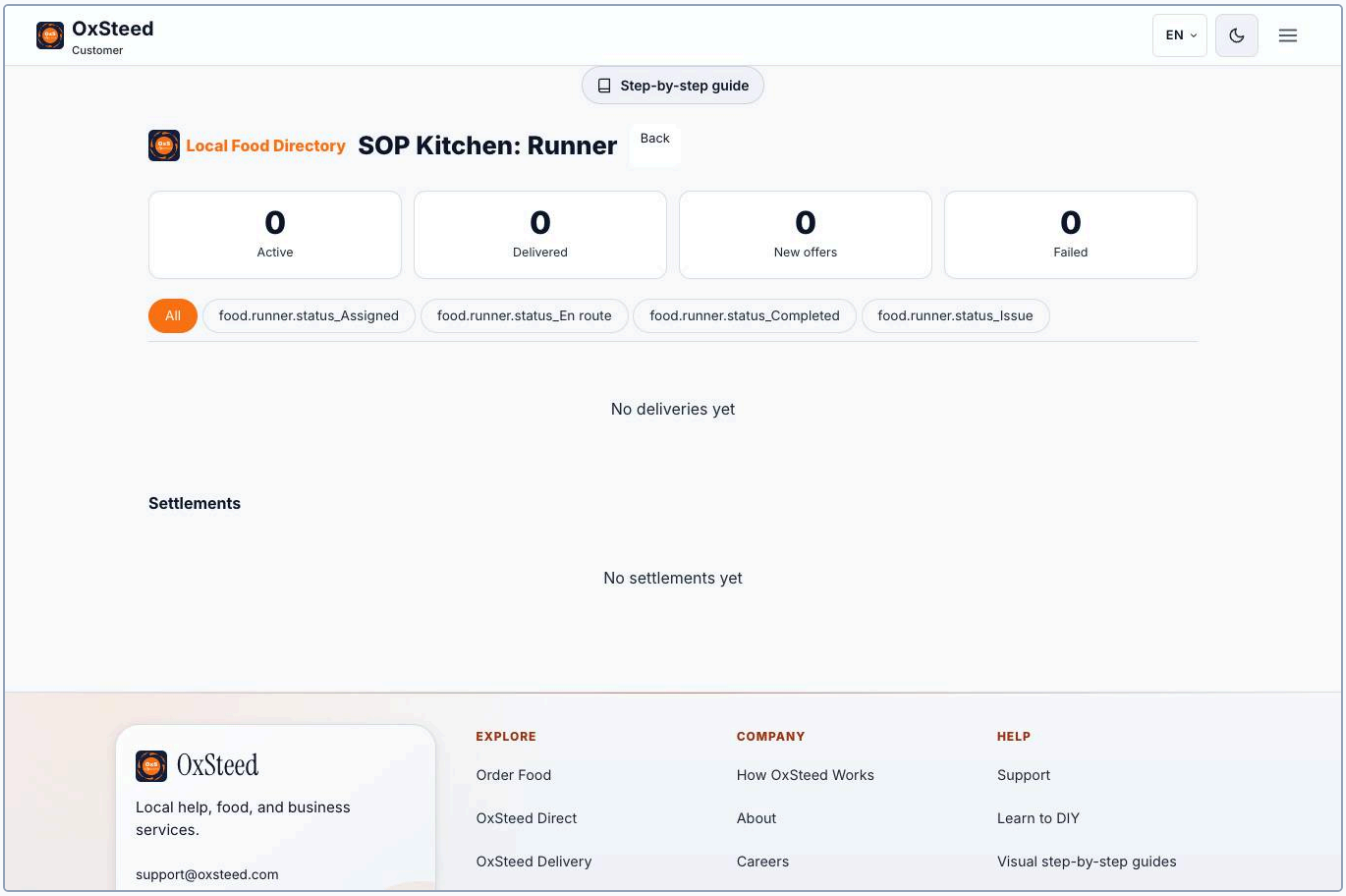

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen: Runner)*

Step 5: Settle cash collected on delivery

For cash orders, open "Settlements" and choose "Create settlement" ("Cash collected by the runner (amount)"). The restaurant uses "Approve" and "Mark paid" ("Payment reference"), then the runner uses "Record remittance" ("Cash remitted (expected {{amount}})") so "Cash collected" and "Cash remitted" reconcile.

> **Expected result:** The settlement shows as paid and remitted, with no open cash balance.

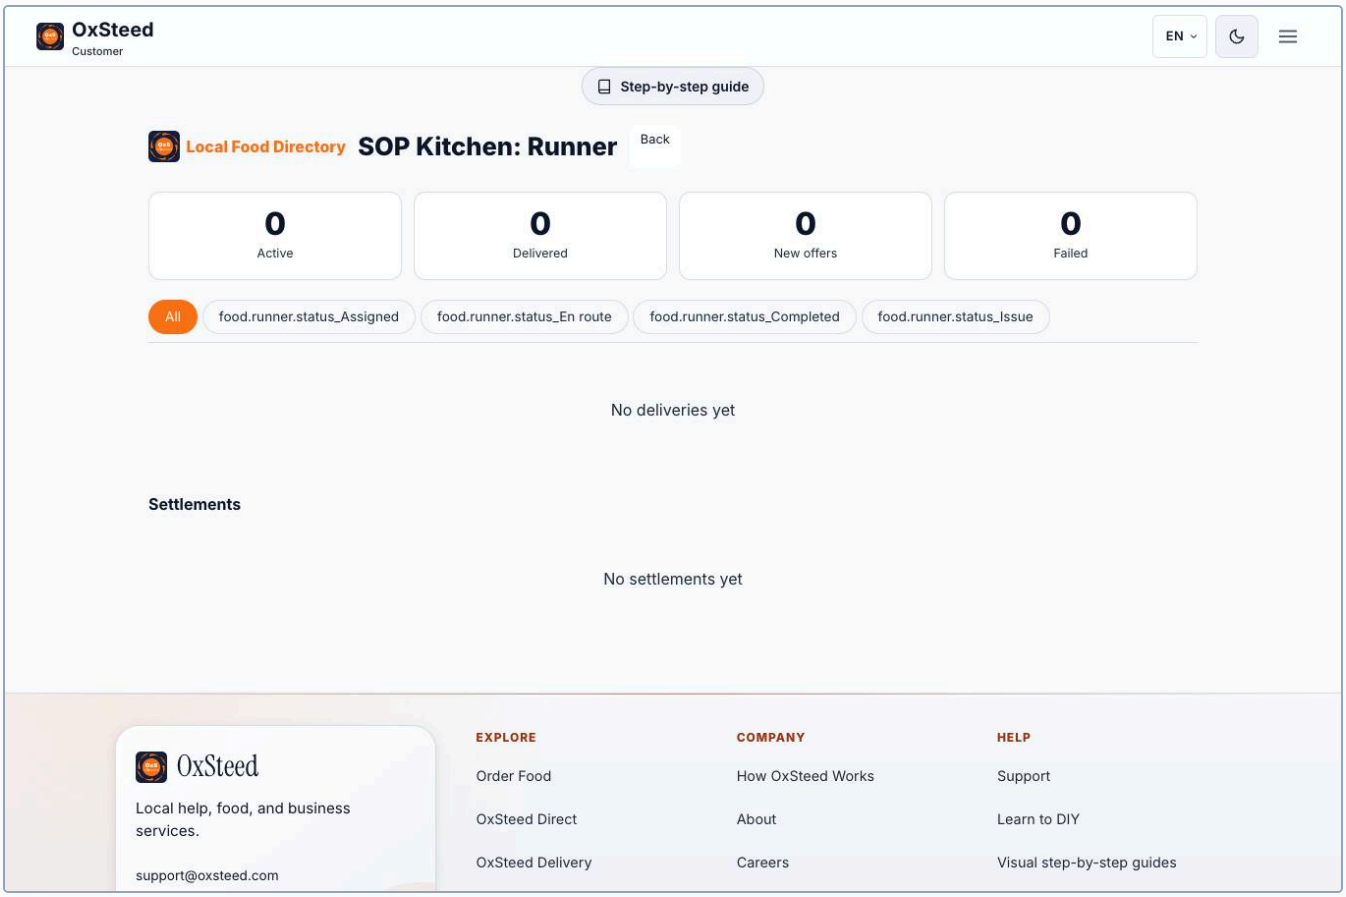

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: SOP Kitchen: Runner)*

Confirm it worked

The order shows as handed off: picked up at the counter, or delivered with proof and cash settled.

If something goes wrong

Problem	What to do

The track page says "Order not found".	The link token may be wrong or expired. Open the order from /orders instead, or ask the restaurant for a fresh link.
Location sharing is unavailable on the runner device.	You see "Location sharing is not supported on this device" or "Location permission was denied". Enable location permission in the browser and retry.
Proof of delivery is required but you skipped it.	You see "Proof of delivery is required before completing this task". Choose "Log proof", save the proof, then choose "Mark delivered".

Need help?

For delivery issues, use the in-app support page at /support.

Guide ID: restaurant-refund-requests | **Revision:** 2 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Request refunds on restaurant credit and orders

Guide ID	**restaurant-refund-requests**
Revision	Revision 2 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-refund-requests

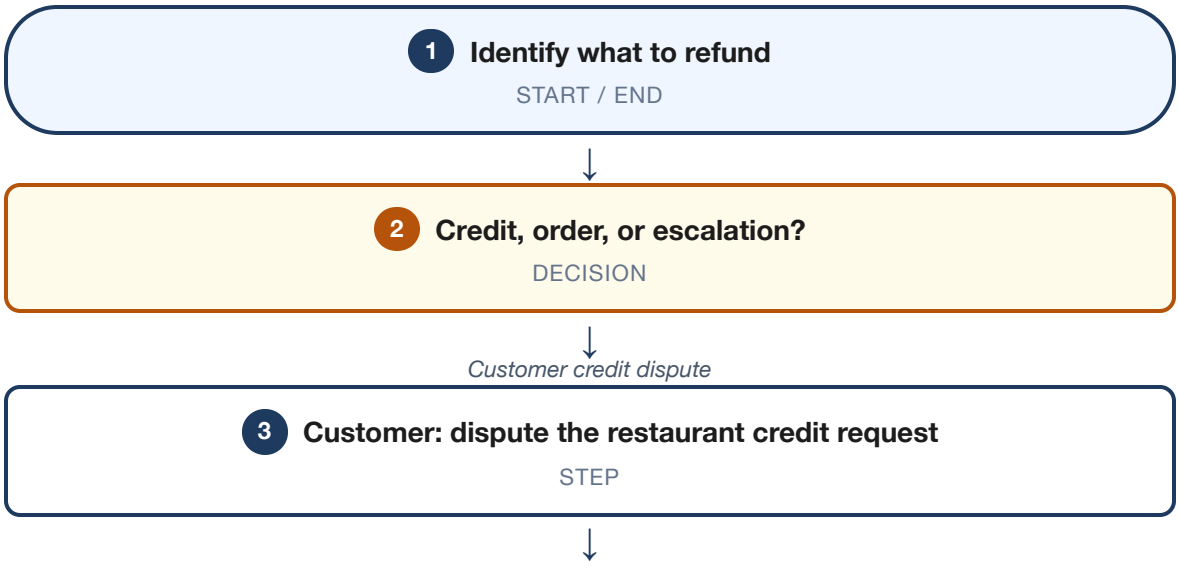

Goal

Get money back the right way: dispute restaurant credit, refund a customer wallet as a restaurant, or refund an order.

Before you start

1. Sign in to your OxSteed account.

Process map

4 Refund resolved

START / END

- *Restaurant credit refund:* Credit, order, or escalation? → Restaurant: refund restaurant credit
- *Order refund:* Credit, order, or escalation? → Restaurant: issue an order refund
- *Stuck or disputed:* Credit, order, or escalation? → Escalate through a support case
- Restaurant: refund restaurant credit → Refund resolved
- Restaurant: issue an order refund → Refund resolved
- Escalate through a support case → Refund resolved

Text version. Identify whether the money is restaurant credit or an order payment. Customers dispute restaurant credit requests from the "Activity" section at /restaurant-credit. Restaurants refund customer credit from the "Restaurant credit" manager with "Refund credit". Restaurants refund orders from the order center with "Refund" (card orders refund through "Cancel"). Escalate through a support case at /restaurants/support/cases/:caseId when the refund is disputed.

Steps

Step 1: Dispute a restaurant credit request as a customer

At /restaurant-credit ("Restaurant credit"), open "Activity" and find the credit request. Choose "Dispute" to open "Dispute this credit request", explain in the "Reason" field (for example "you paid the restaurant, but the credit was never issued"), and choose "Submit dispute". You see "Dispute submitted".

> **Expected result:** The dispute is recorded and the restaurant can see it for review.

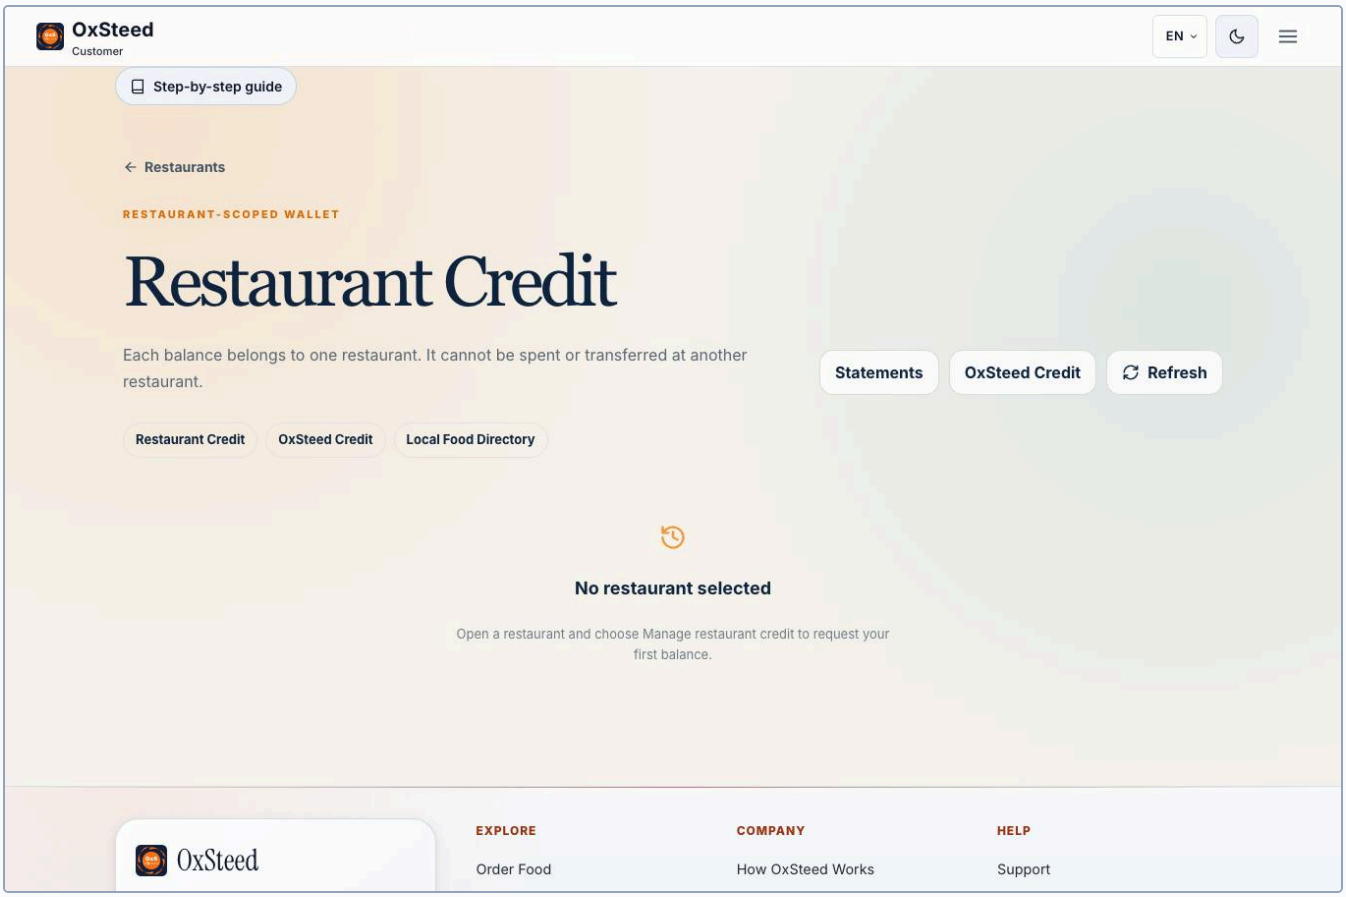

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Restaurant Credit)*

Step 2: Refund customer restaurant credit as a restaurant

On the restaurant dashboard, open the "Restaurant credit" manager ("Customer balances"; "Approve credit only after matching the customer's receipt or confirmation number."). Choose "Refund credit", enter the "Customer email" and "Amount", add a "Reason" ("Why is this credit being refunded?"), then choose "Review refund" and "Yes, refund". Note: this deducts credit from the customer wallet and sends the money back to their card; only credit issued in the last 30 days can be refunded.

> **Expected result:** You see "Refunded X to customer." and the wallet balance drops.

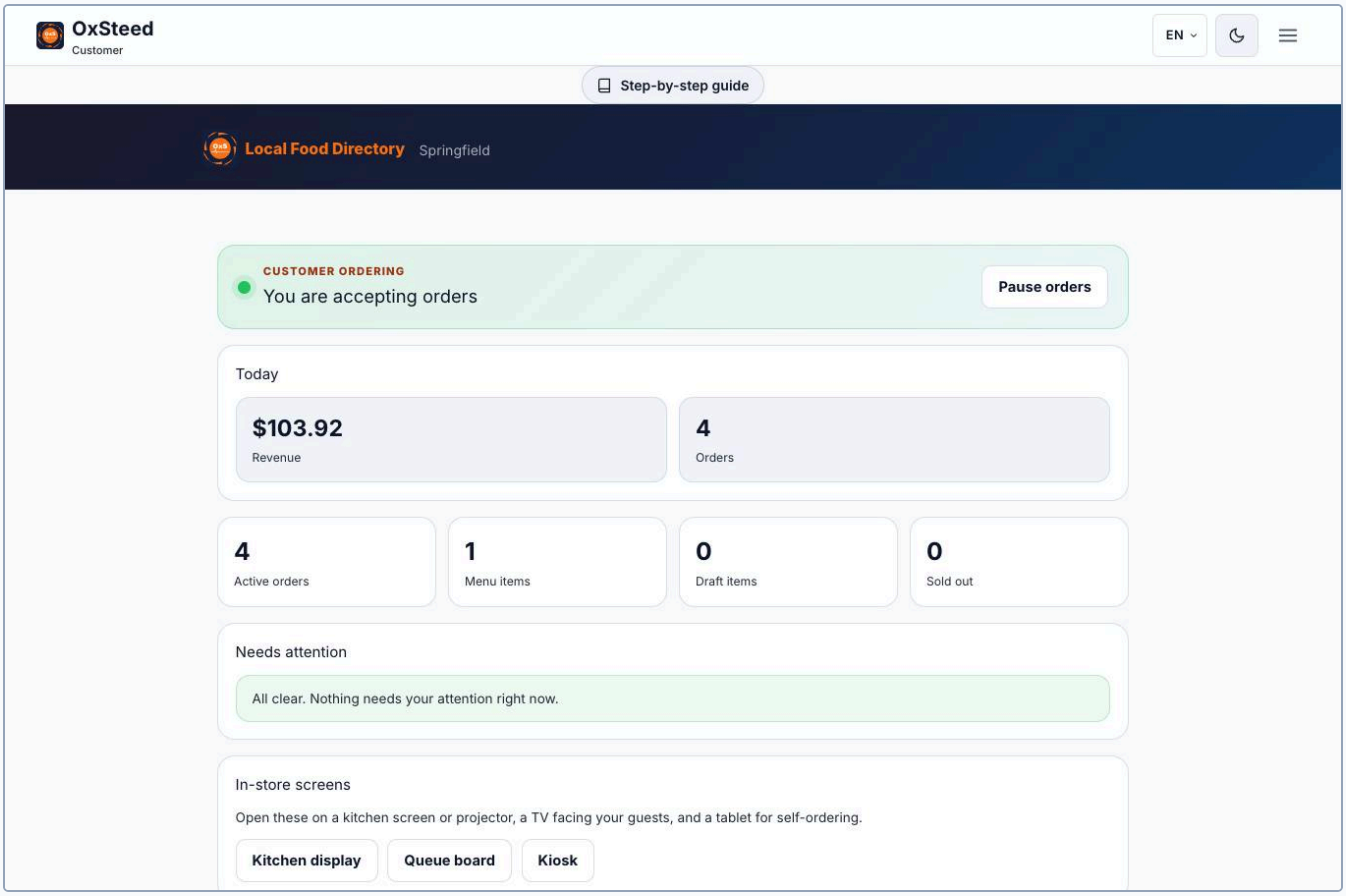

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Refund credit form with email, amount, and reason)*

Step 3: Issue an order refund as a restaurant

In the order center, open the order and choose "Refund". In the "Issue Refund" dialog ("Order total: $X"), enter the amount ("Amount in cents (blank = full)") and a "Reason (required)", then choose "Issue Refund". For online card orders, use "Cancel" instead: "Card orders are refunded by cancelling the order. The card refund happens automatically." Partial refunds are not available for online card orders.

> **Expected result:** You see "Refund issued" and the order shows "Payment refunded".

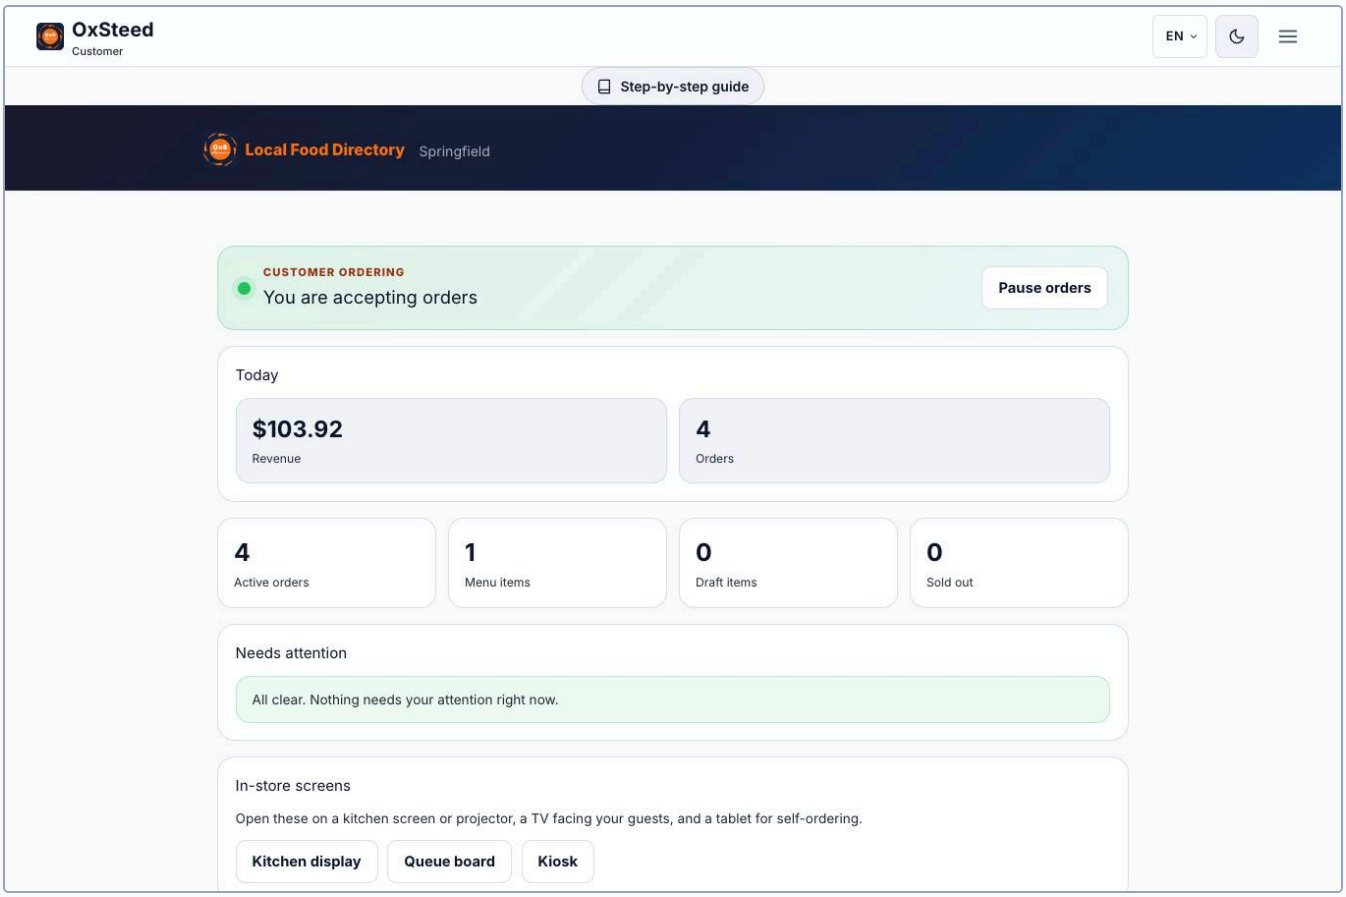

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Issue refund dialog with amount and reason)*

Step 4: Escalate through a support case

If the refund is disputed or stuck, open the support case at /restaurants/support/cases/:caseId ("Support case"). Review "Case details" ("Issue type", "Status", "Created", "Related order"), then use "Message or proof link" ("Write your reply...", "Paste a receipt / proof link (optional)") and choose "Save update". "Reply sent." confirms the update.

> **Expected result:** The case timeline records your message and the support team can act on it.

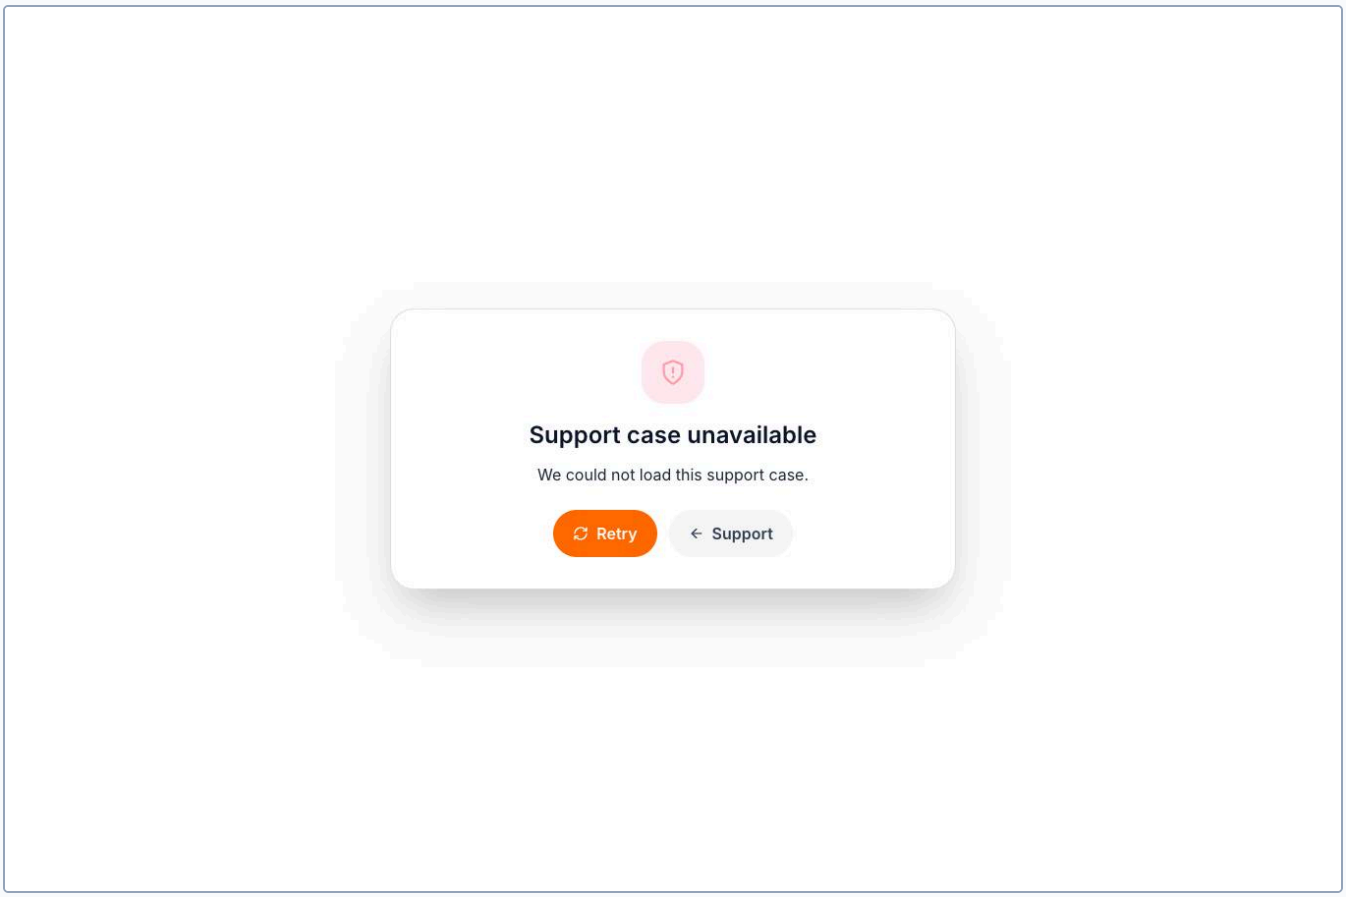

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Support case unavailable)*

Confirm it worked

The refund shows as issued, the credit returns to the customer wallet or card, or the support case timeline records the resolution.

If something goes wrong

Problem	What to do
The credit refund failed.	You see "Unable to process this refund." Only credit issued in the last 30 days can be refunded, and if the card refund fails the wallet balance is left untouched. Retry with an eligible amount.
You cannot partially refund an online card order.	That is by design: "Partial refunds are not available for online card orders. Refund the full order or ask support for help."
A direct or pay-at-restaurant order was cancelled but shows no refund.	Those are marked refunded with no automatic money movement. Record the refund with the customer outside OxSteed and note it on the support case.

Need help?

For refund help, use the in-app support page at /support.
