Business Handbook

Language: **English**

Revision date: **October 19, 2026**

Guides included: **26**

About this PDF. This handbook was generated from the online guides in the SOP library at **/how-it-works**. The online versions are the primary, most current editions.

Revision info: this edition was generated on 2026-10-19 from the guide data files. Each guide section below carries its own revision line (guide ID and revision number).

Contents

Select a guide to jump to its section.

Account

- Create an account (rev 2)
- Switch between customer, helper, business and other modes (rev 1)
- Complete helper or business onboarding (rev 3)
- Recover a forgotten password (rev 2)
- Privacy controls, data export, account deletion (rev 2)
- Manage account settings (rev 3)
- Sign in (rev 3)
- Get help and track support tickets (rev 2)

Business

- Work the attention inbox (rev 2)
- Manage business clients (rev 2)
- Invoice clients as a business (rev 2)
- Post and manage jobs as a business (rev 2)
- Schedule appointments and manage staff schedules (rev 2)
- Select and switch between businesses (rev 2)
- Manage business services (rev 2)
- Set up your business (rev 2)
- Submit specialized intake requests (maintenance, trades, beauty, creative, professional, continuity) (rev 2)
- Manage team members and roles (rev 2)

Financial records

- Browse archived statements (rev 2)
- Download statement exports (rev 3)
- Get paid by QR and pay by QR (rev 2)
- View statements (rev 2)

Logistics

- Create sourcing requests and collect supplier quotes (rev 2)

Calendar

- Manage the calendar (rev 2)

Media

Use OxSteed Media (feed, posts, communities) (rev 2)

Messages

Message across the platform (rev 2)

Guide ID: account-join | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Create an account

Guide ID	**account-join**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/account/join-oxsteed

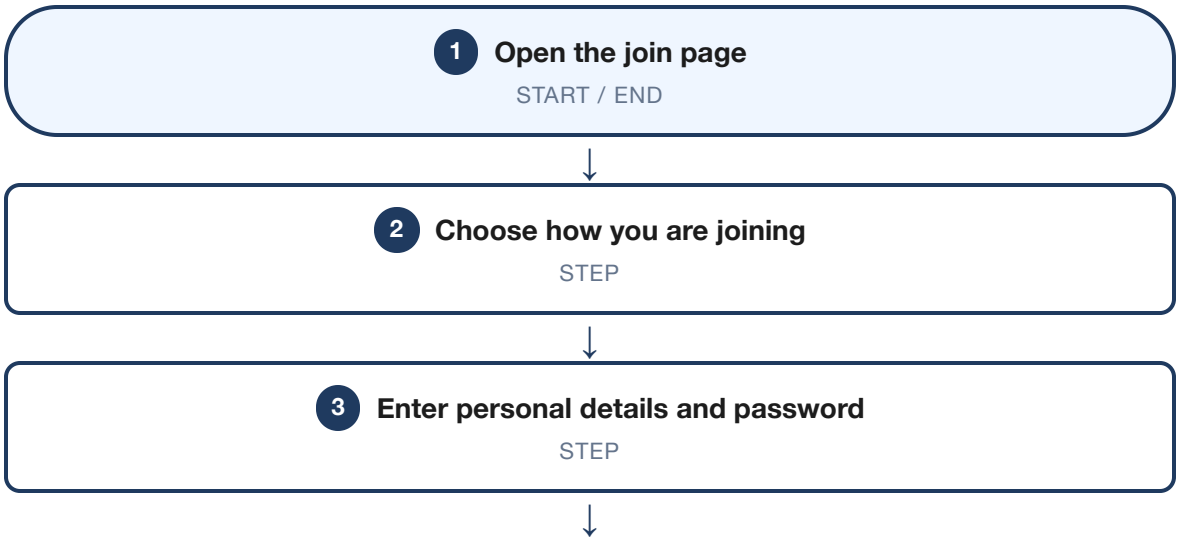

Goal

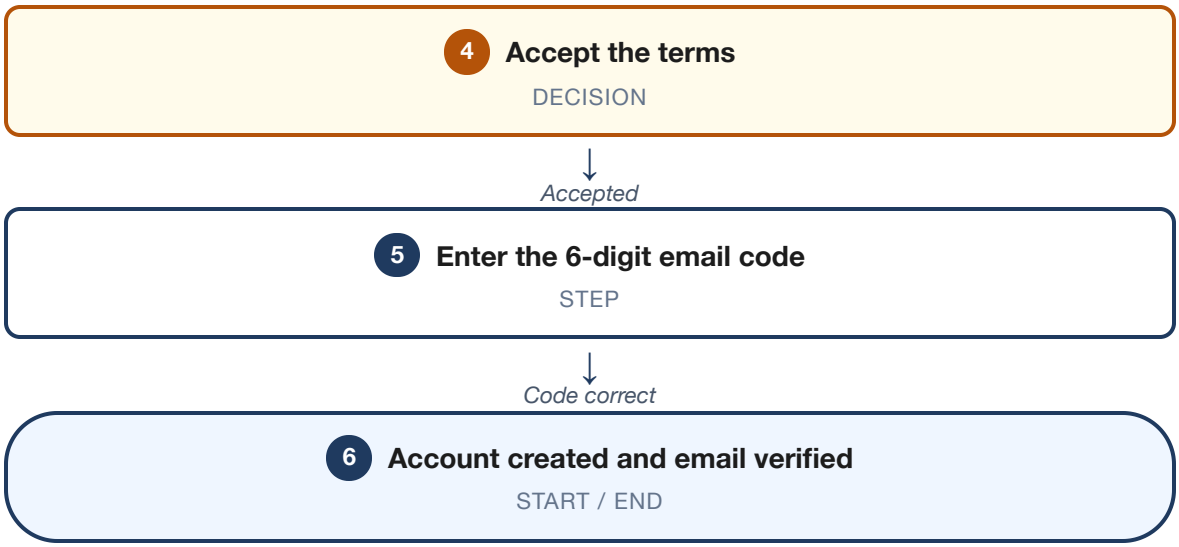

Create your OxSteed account so you can hire helpers, offer services, or run a business.

Before you start

1. Have an email address you can open right away; you will receive a 6-digit verification code.
2. Know your ZIP code; it is used to match you with nearby helpers and jobs.

Process map

- *Not accepted:* Accept the terms → Enter personal details and password
- *No code received:* Enter the 6-digit email code → Resend the code or edit details
- Resend the code or edit details → Enter the 6-digit email code

Text version. 1. Open the Join OxSteed page. 2. Under "I'm joining as", pick Customer, Helper, or Business Owner. 3. Enter your personal details and a password. 4. Accept the terms to continue. 5. Open the email OxSteed sent you and enter the 6-digit code. If the code never arrives, use "Resend code" or "Wrong email or phone? Edit details". 6. Your account is created and your email is verified.

Steps

Step 1: Open the join page and choose how you are joining

Choose Join in the top navigation, or open /join directly. The page heading is "Join OxSteed" with the subtitle "One account. Pick how you want to show up." Under "I'm joining as", select one of the mode cards: Customer ("Post jobs, hire helpers, shop the marketplace."), Helper ("Offer services, bid on jobs, build your reputation."), or Business Owner ("Run a service business with clients, invoices, and a team.").

> **Expected result:** The mode card you picked shows a check mark as the selected mode.

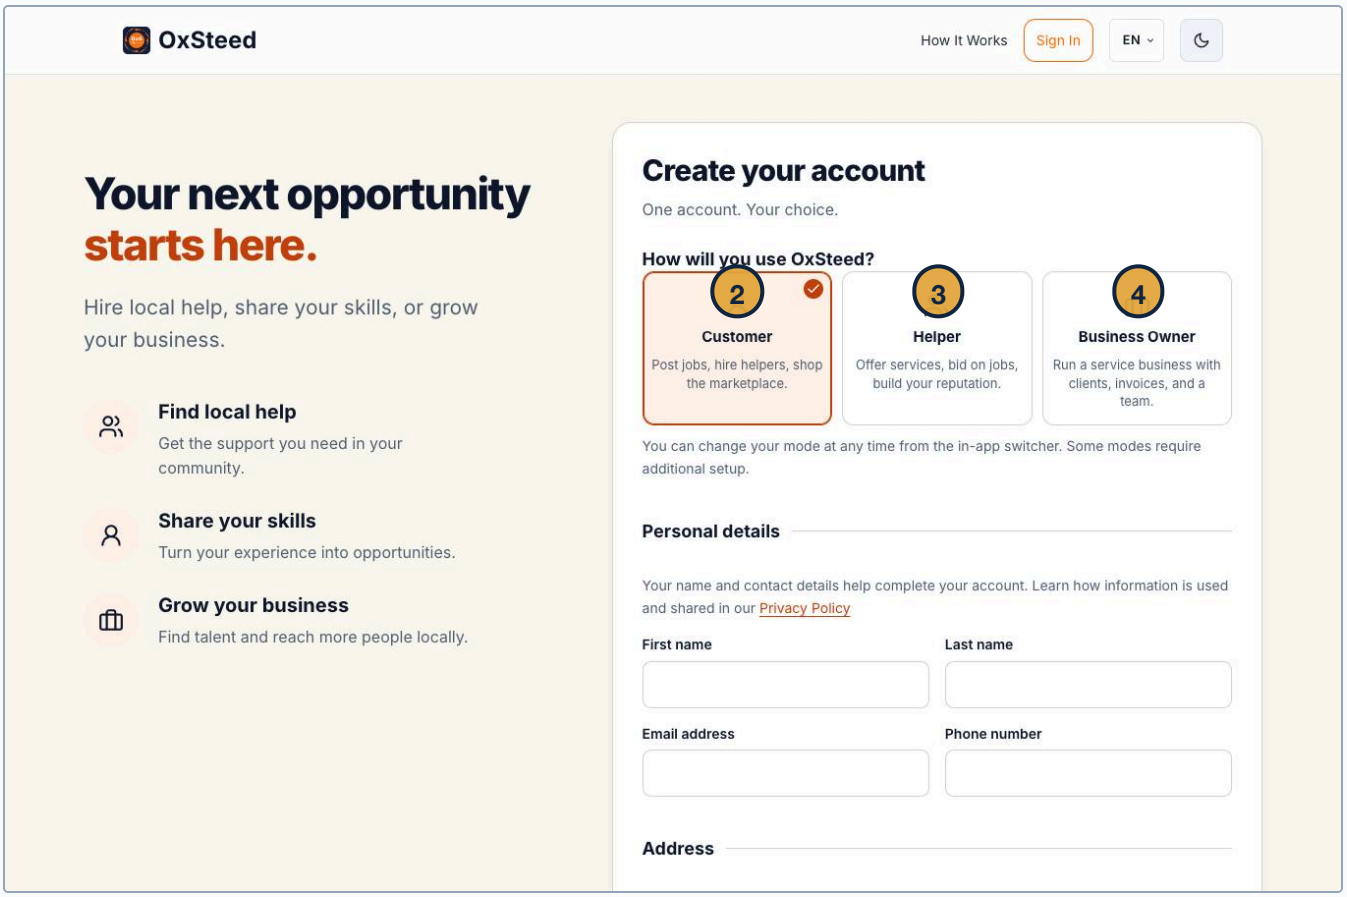

Figure 1. Choose how you are joining before you fill in the form. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **2.** Customer card
2. **3.** Helper card
3. **4.** Business Owner card

Step 2: Enter your personal details and a password

Fill in First name, Last name, Email address, and Phone number. Then complete the address section: Country, Street address, City, State, and ZIP code. Choose a password in the password field (a show-password toggle is available). Email availability is checked as you type.

> **Expected result:** Every field shows an entered value and no red validation errors.

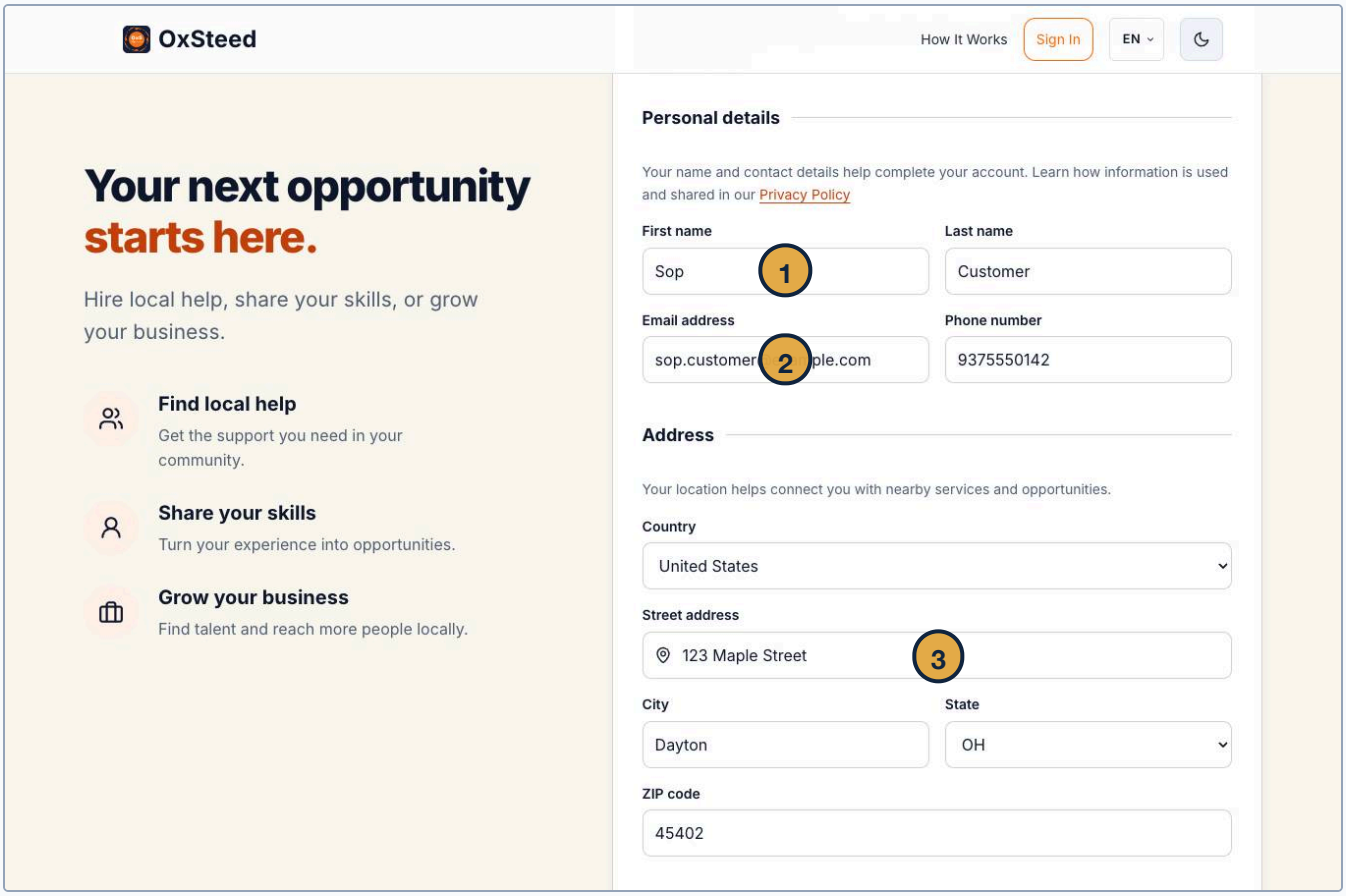

Figure 2. The personal details section of the join form. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **1.** First name and Last name
2. **2.** Email address
3. **3.** Address fields

Step 3: Accept the terms and continue

Tick the checkbox next to "I agree to OxSteed's" terms and privacy links, then choose Continue. Without the checkbox ticked, the form will not submit.

> **Expected result:** The form submits and the "Check your email" step appears.

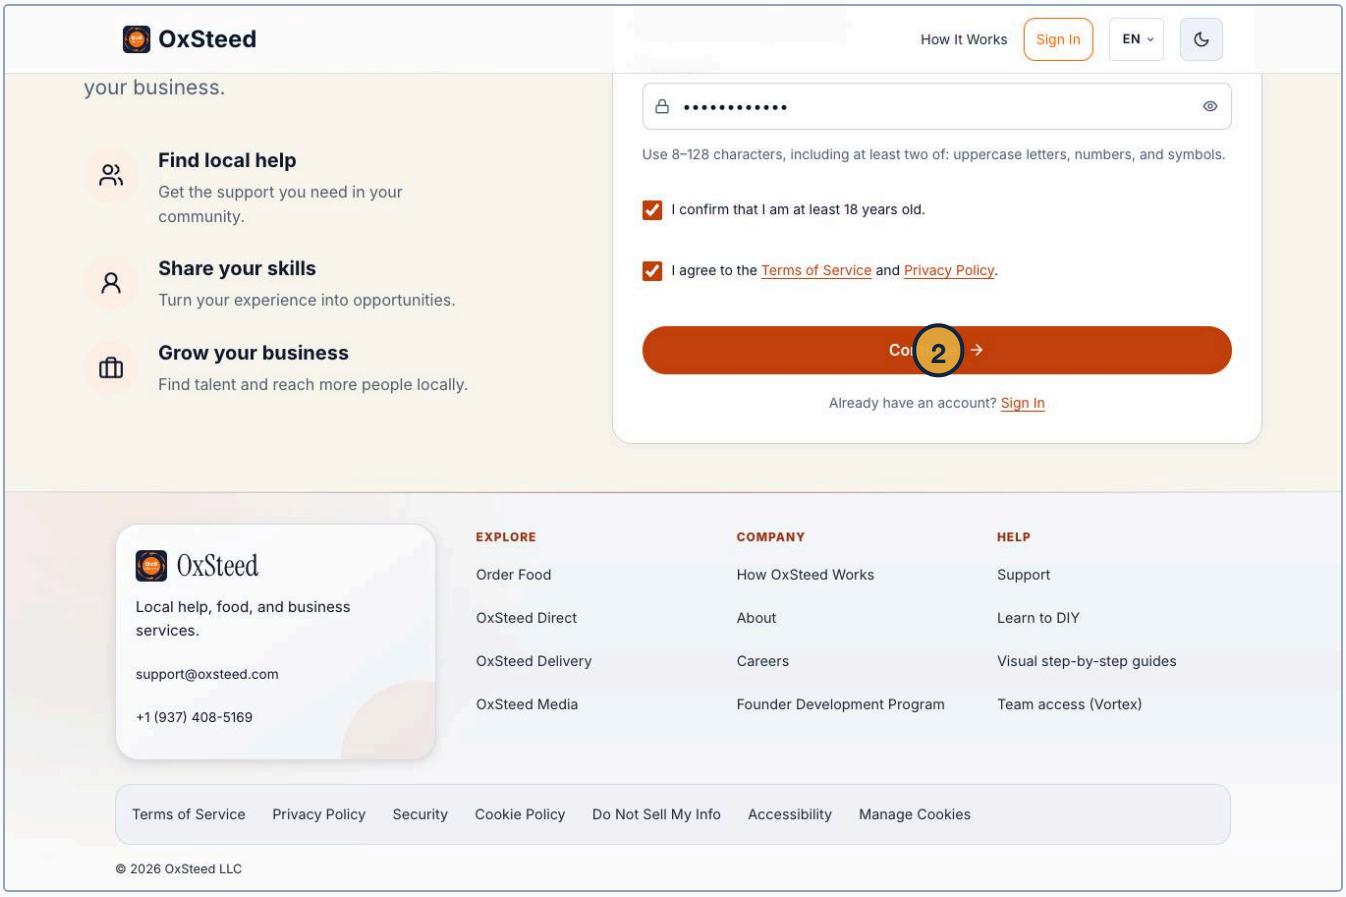

Figure 3. Accept the terms, then choose Continue. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **2.** Continue button

Step 4: Verify your email with the 6-digit code

The page now shows "Check your email" with the hint "We sent a 6-digit code to" your address. Open the email and type the code into the code boxes, then choose "Verify Email & Continue". If nothing arrives, choose "Resend code". If you typed the wrong address, choose "Wrong email or phone? Edit details" to go back and fix it.

> **Expected result:** The code is accepted and you are signed in to your new account.

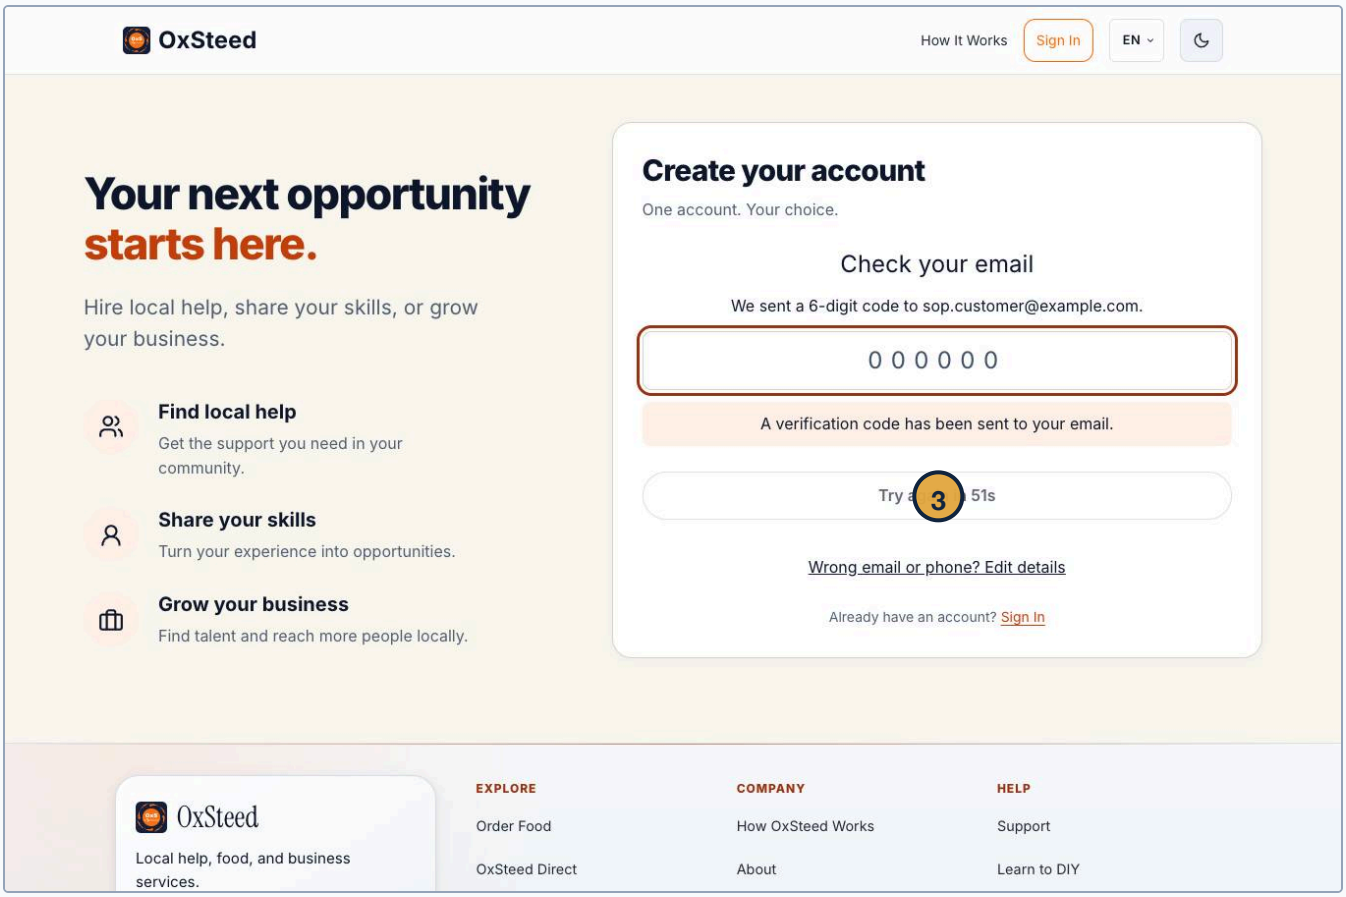

Figure 4. Enter the 6-digit code from your email. *(Image description: Synthetic example: Your next opportunity starts here.)*

1. **3.** Resend code link

Confirm it worked

You land on your dashboard, signed in, and your email shows as verified. Your selected mode (Customer, Helper, or Business Owner) is active.

If something goes wrong

Problem	What to do
The email address is reported as already taken.	That address already has an OxSteed account. Use the sign-in guide instead, or choose "Forgot password?" if you cannot get in.
The 6-digit code never arrives.	Check your spam folder, confirm the address is spelled correctly with "Wrong email or phone? Edit details", then choose "Resend code". Wait a few minutes before requesting again.
The Continue button does nothing.	Look for a highlighted field: the terms checkbox must be ticked, and every required field must be filled. The ZIP code must be valid.

Need help?

If you cannot create an account after retrying, contact support from the Help menu or visit /support.

Guide ID: account-mode-switching | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Switch between customer, helper, business and other modes

Guide ID	**account-mode-switching**
Revision	Revision 1 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/switch-modes

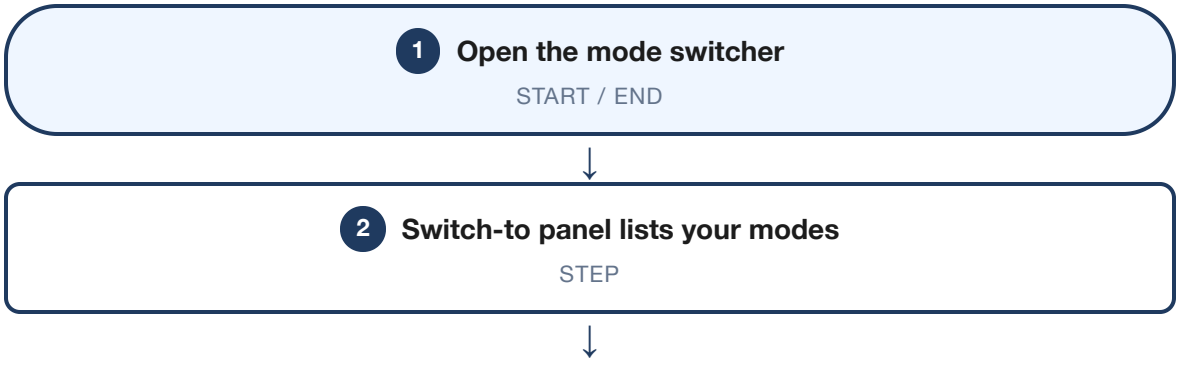

Goal

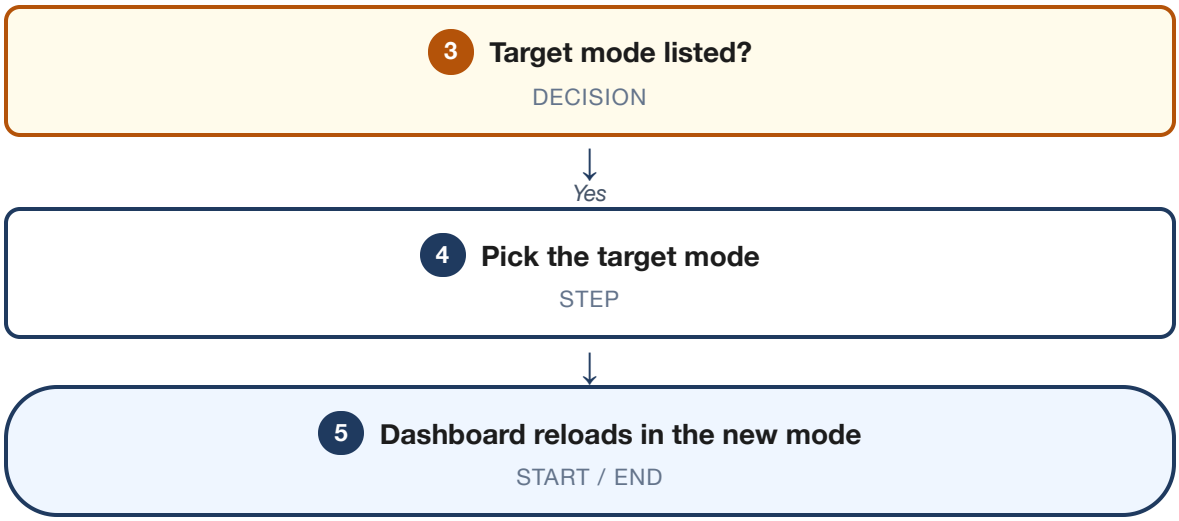

Switch between the modes you belong to (Customer, Helper, Business Owner and granted team modes) without signing out.

Before you start

1. Be signed in to your OxSteed account.
2. Granted modes (business team roles) require a workspace invitation; they do not appear until you accept it.

Process map

- *No:* Target mode listed? → Request or accept a workspace invitation
- *After grant accepted:* Request or accept a workspace invitation → Switch-to panel lists your modes

Text version. 1. In the top navigation, choose the mode button that shows "Mode" and your current mode. 2. The "Switch to" panel lists every mode available to you; your current mode carries a "Current" badge. 3. Choose the mode you want. The button briefly shows "Switching..." and a "Switched to" toast confirms it. 4. Your dashboard reloads for the new mode. If a mode is missing, it is granted by a workspace owner; accept the invitation first.

Steps

Step 1: Open the mode switcher in the navigation

Find the mode switcher button in the top navigation: it shows the label "Mode" with your current mode name next to a colored dot. Choose it to open the switcher panel.

> **Expected result:** The "Switch to" panel opens beneath the button.

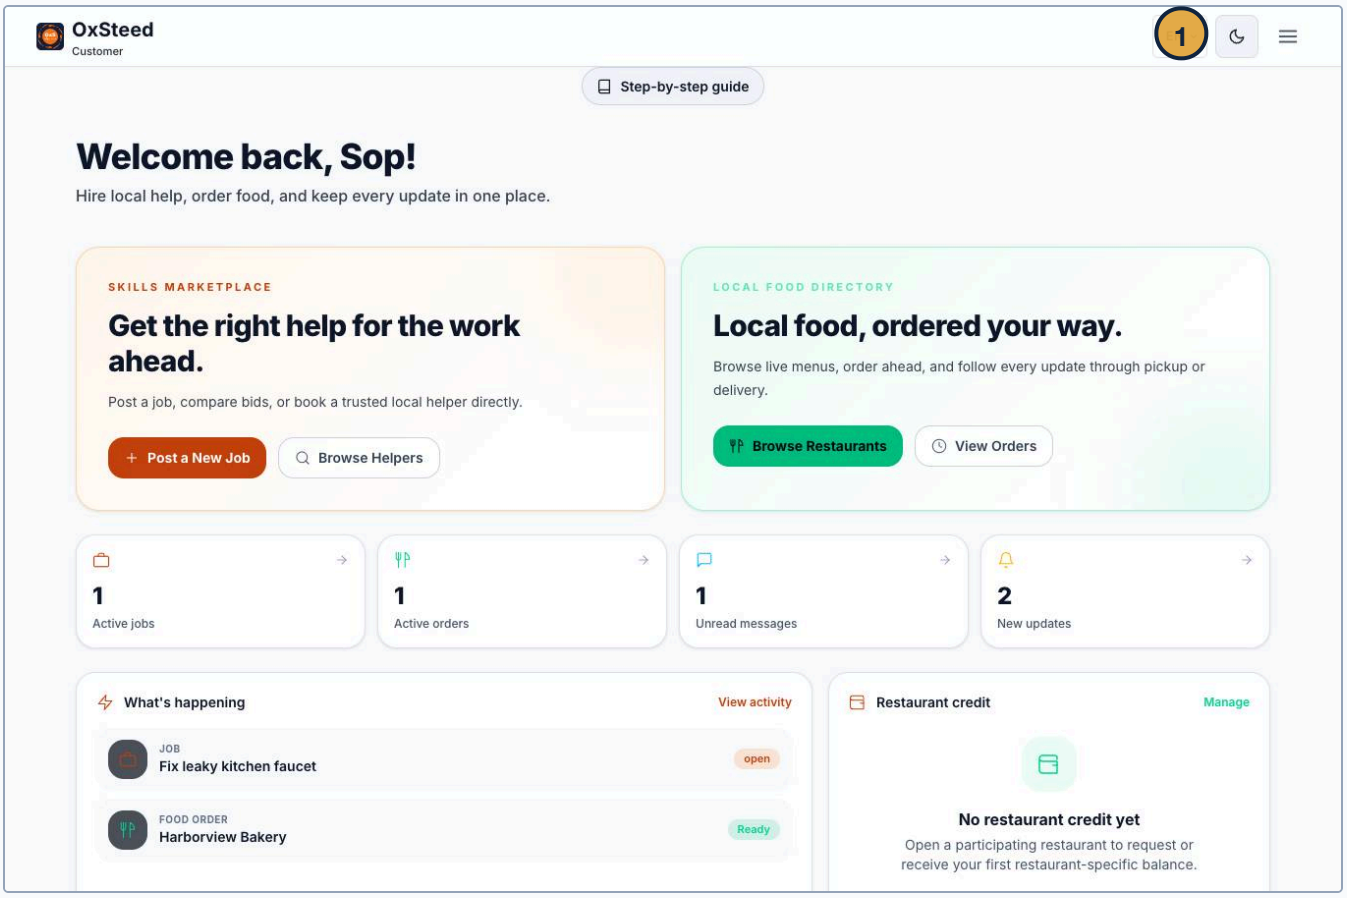

Figure 1. The mode switcher in the top navigation. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Mode switcher button

Step 2: Pick the mode you want to use

The panel is titled "Switch to" and lists your available modes: self-selectable modes such as Customer, Helper, and Business Owner, plus any granted modes (business team roles) a workspace owner gave you. Your current mode shows a "Current" badge and is disabled. Choose the target mode row; it briefly shows "Switching...".

> **Expected result:** A "Switched to" toast confirms the change and the dashboard reloads.

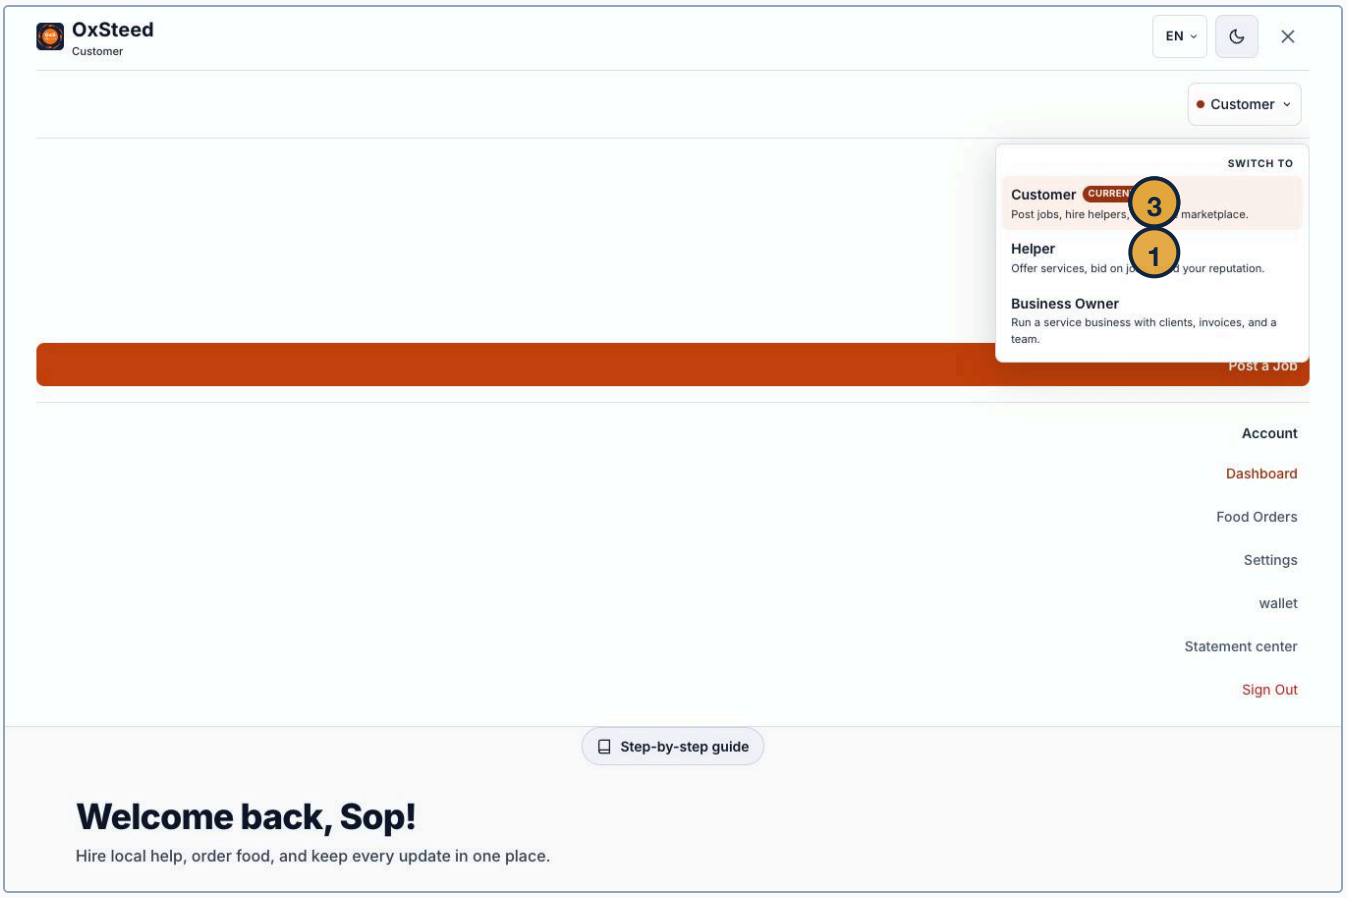

Figure 2. The Switch to panel with your available modes. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Switch to panel
2. **2.** Current badge
3. **3.** Target mode row

Step 3: Confirm the new mode is active

The mode button in the navigation now shows the new mode name, and the dashboard renders that mode's home screen (for example, Helper shows the helper dashboard). If the wrong dashboard appears, your effective mode may fall back to your original account type; check Settings, Account Type.

> **Expected result:** The navigation shows the new mode and the dashboard matches it.

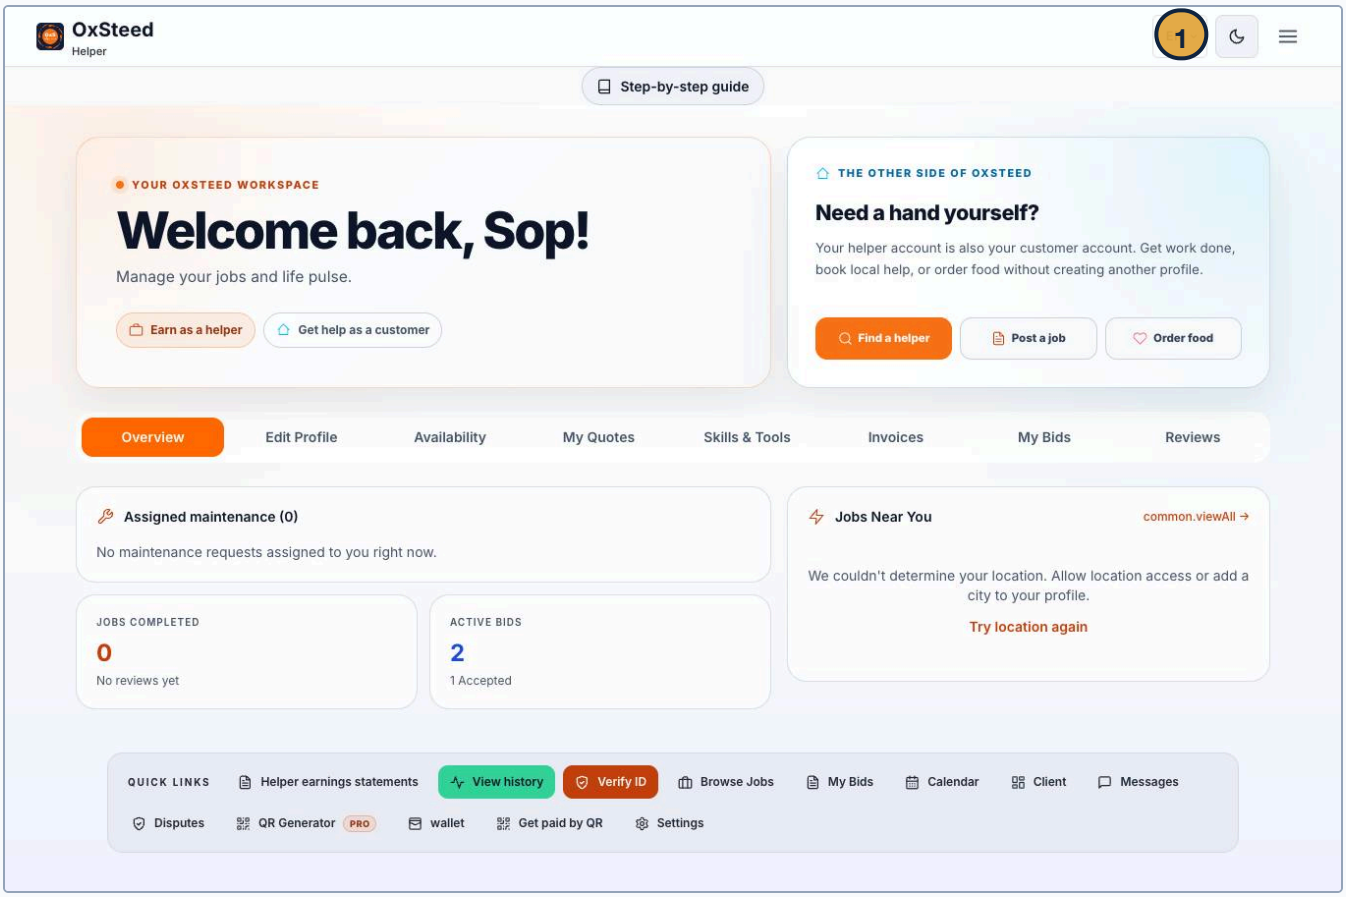

Figure 3. The switcher confirms the new active mode. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** New current mode

Confirm it worked

The mode button shows the new mode and the dashboard content matches it. A "Switched to" toast appeared at the moment of switching.

If something goes wrong

Problem	What to do
The mode you want is not listed.	Self-selectable modes are Customer, Helper, and Business Owner. Business team roles (Manager, Representative, Employee) are granted, not self-selected: a workspace owner must invite you and you must accept the invitation.
You see "Could not switch."	Reload the page and try again. If it persists, sign out and back in; your granted roles are reloaded on sign in.

Need help?

If a granted mode never appears after you accepted an invitation, contact support from the Help menu or visit /support.

Guide ID: account-onboarding | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Complete helper or business onboarding

Guide ID	**account-onboarding**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/account/complete-onboarding

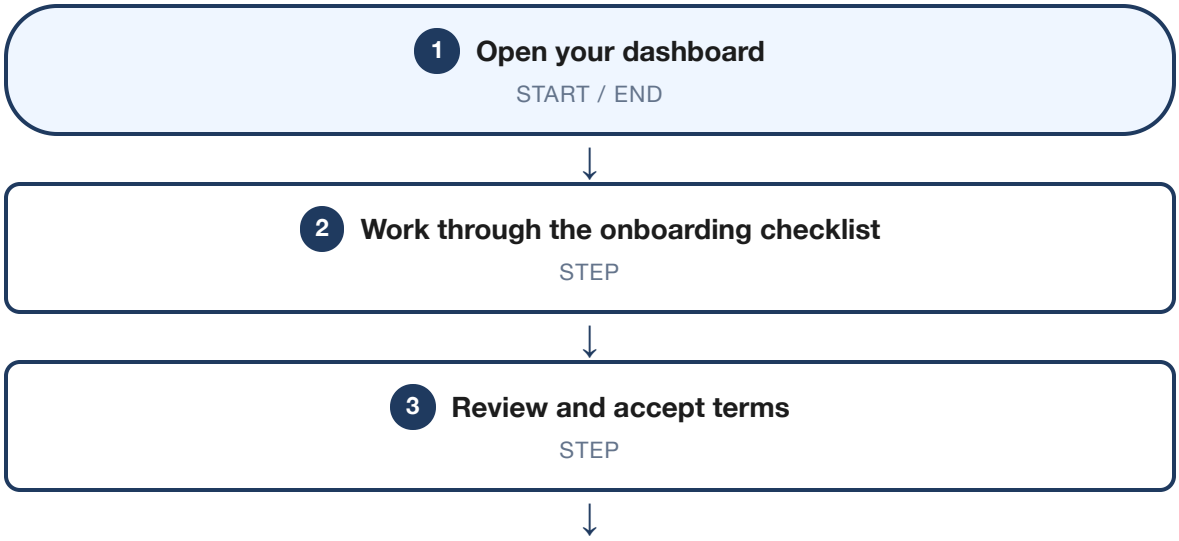

Goal

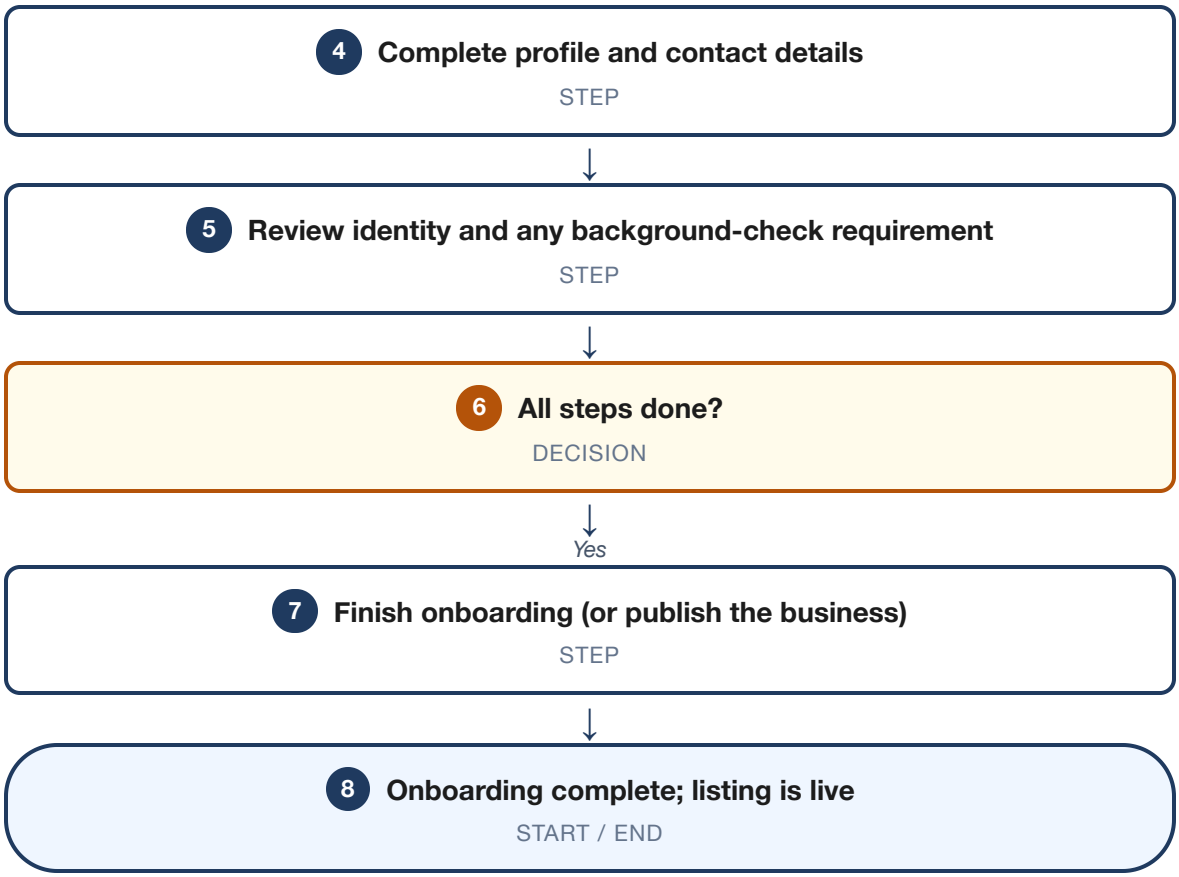

Complete the helper requirements for work, or follow the separate business setup checks. Settings, authorized statements, Support and verification remain accessible during setup.

Before you start

1. Be signed in with the Helper or Business Owner mode active.
2. Helpers: complete identity verification first.

Process map

- *No:* All steps done? → Complete the highlighted step
- Complete the highlighted step → All steps done?

Text version. Open the helper checklist. Review terms, save profile/contact details and complete applicable identity checks. Background checks may be required for certain activities or requested by some clients. Finish onboarding when allowed and check the saved status. Business owners follow their separate business setup checks; ordinary account settings and authorized statements remain accessible.

Steps

Step 1: Find the onboarding checklist on your dashboard

Open your dashboard (/dashboard in Helper mode, /business-hub in Business Owner mode). Helpers see the card "Finish setting up your helper account" with the intro "Complete these steps to appear in search and accept jobs." Each step shows "To do" until it is complete.

> **Expected result:** The checklist lists the remaining onboarding steps with their current state.

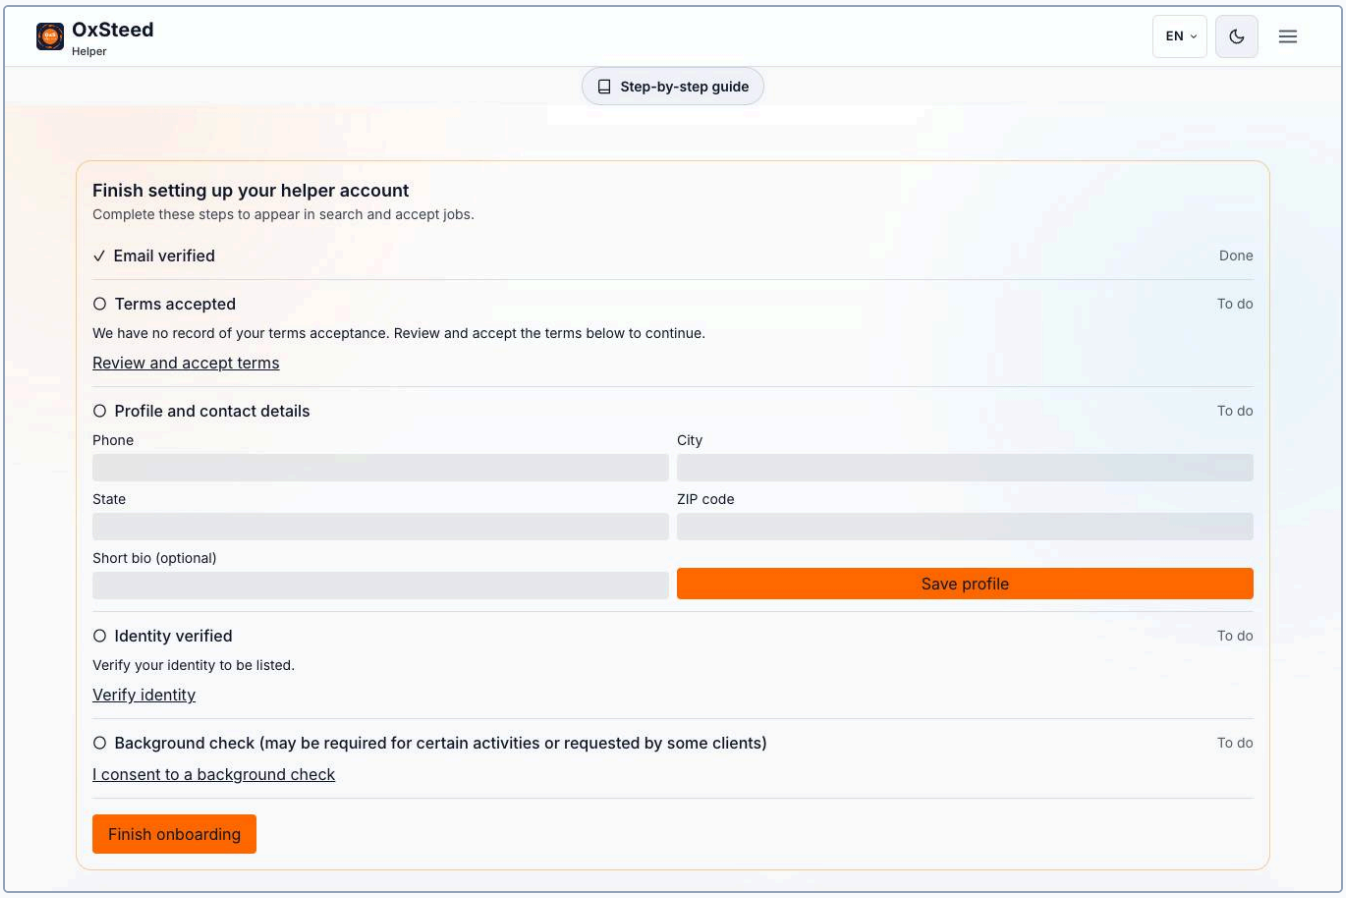

Figure 1. The helper onboarding checklist, desktop view. *(Image description: Synthetic example: Welcome back, Nia!)*

Step 2: Review and accept the terms

If the "Terms accepted" row is not done, open "Review and accept terms", read the terms, and accept them. This is also where helpers who missed the signup checkbox accept terms later.

> **Expected result:** The terms row changes to "Done".

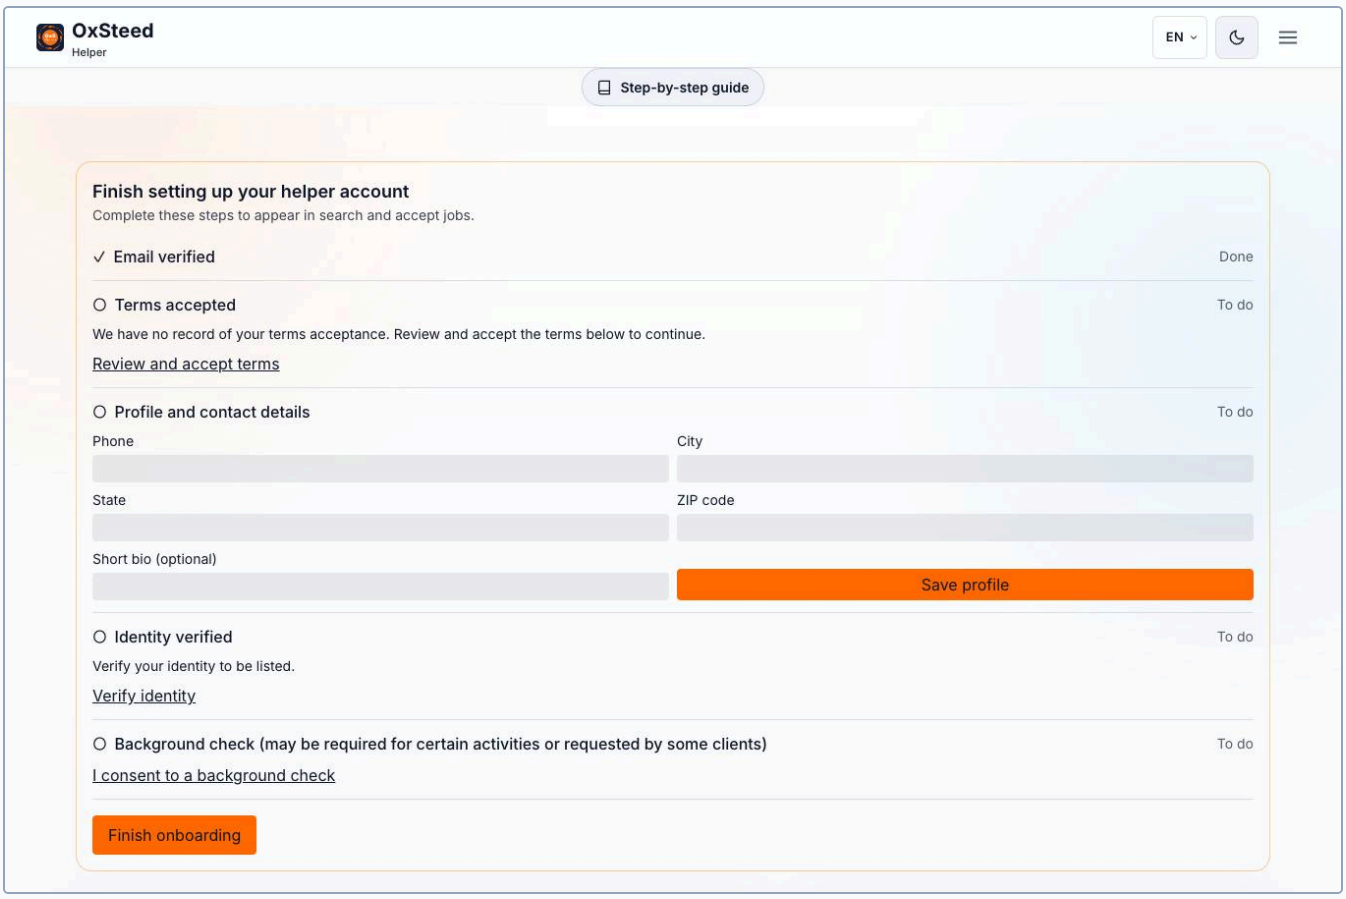

Figure 2. The terms acceptance step. *(Image description: Synthetic example: Welcome back, Nia!)*

Step 3: Complete your profile and contact details

Fill in phone, city, state, ZIP code and bio, then choose Save profile. Check the identity row and follow Verify identity if required. An authorized identity approval or configured skip satisfies only the applicable identity check; it does not complete email, terms or profile requirements. Background checks may be required for certain activities or requested by some clients.

> **Expected result:** Saved profile details are reflected in the checklist. Identity and any applicable background-check status are shown separately.

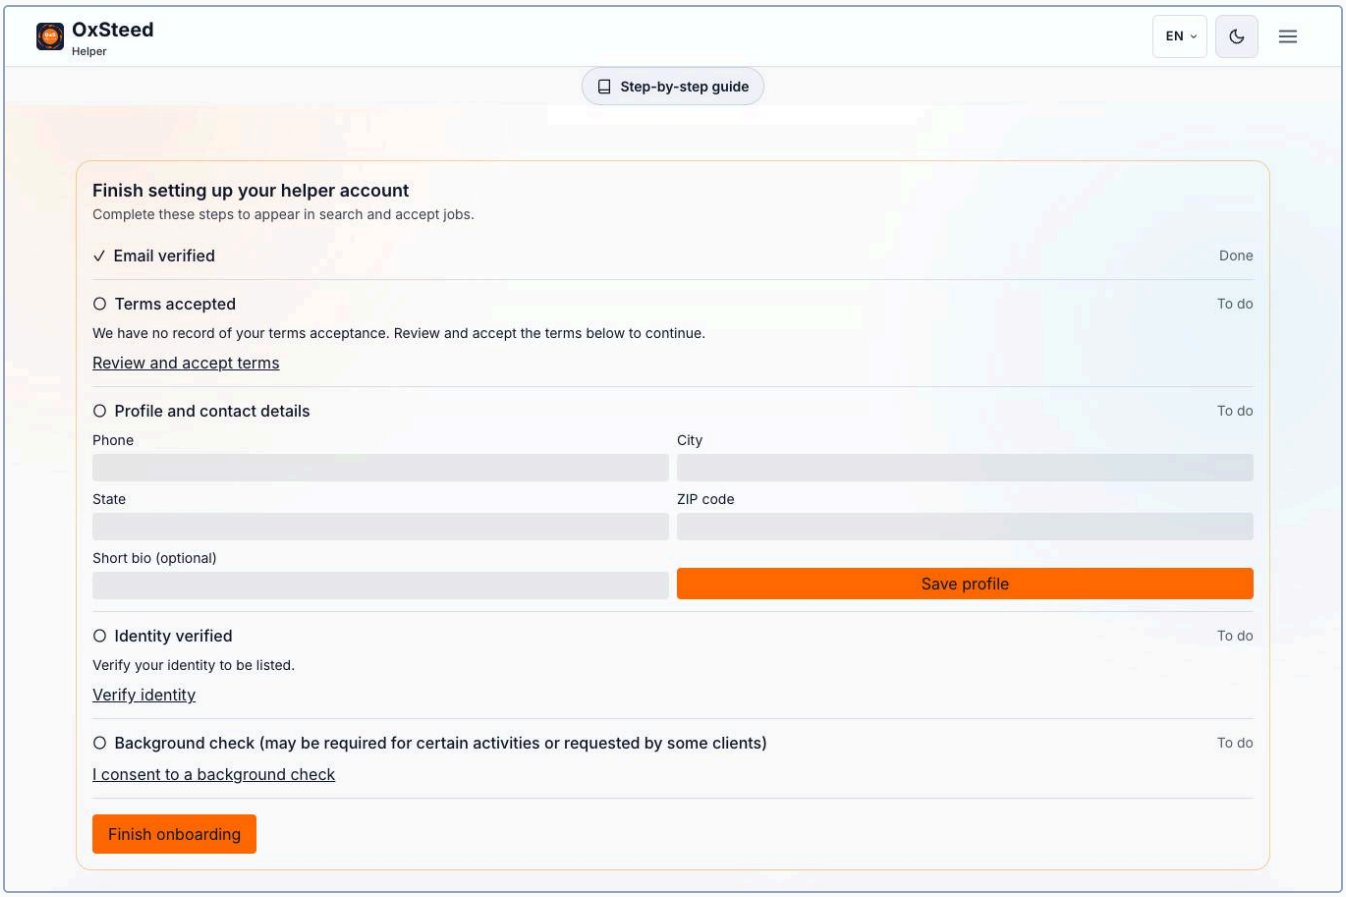

Figure 3. The profile details step with the Save profile button. *(Image description: Synthetic example: Welcome back, Nia!)*

Step 4: Finish onboarding and go live

When the required checks allow it, choose Finish onboarding. Confirm the saved completion state. Business owners use their business setup page and Publish business when its checks permit; business access follows business permissions. Tax-document requirements for receiving payouts are separate and appear in Settings when applicable.

> **Expected result:** The checklist disappears and you can bid on jobs, accept bookings, or take bookings as a business.

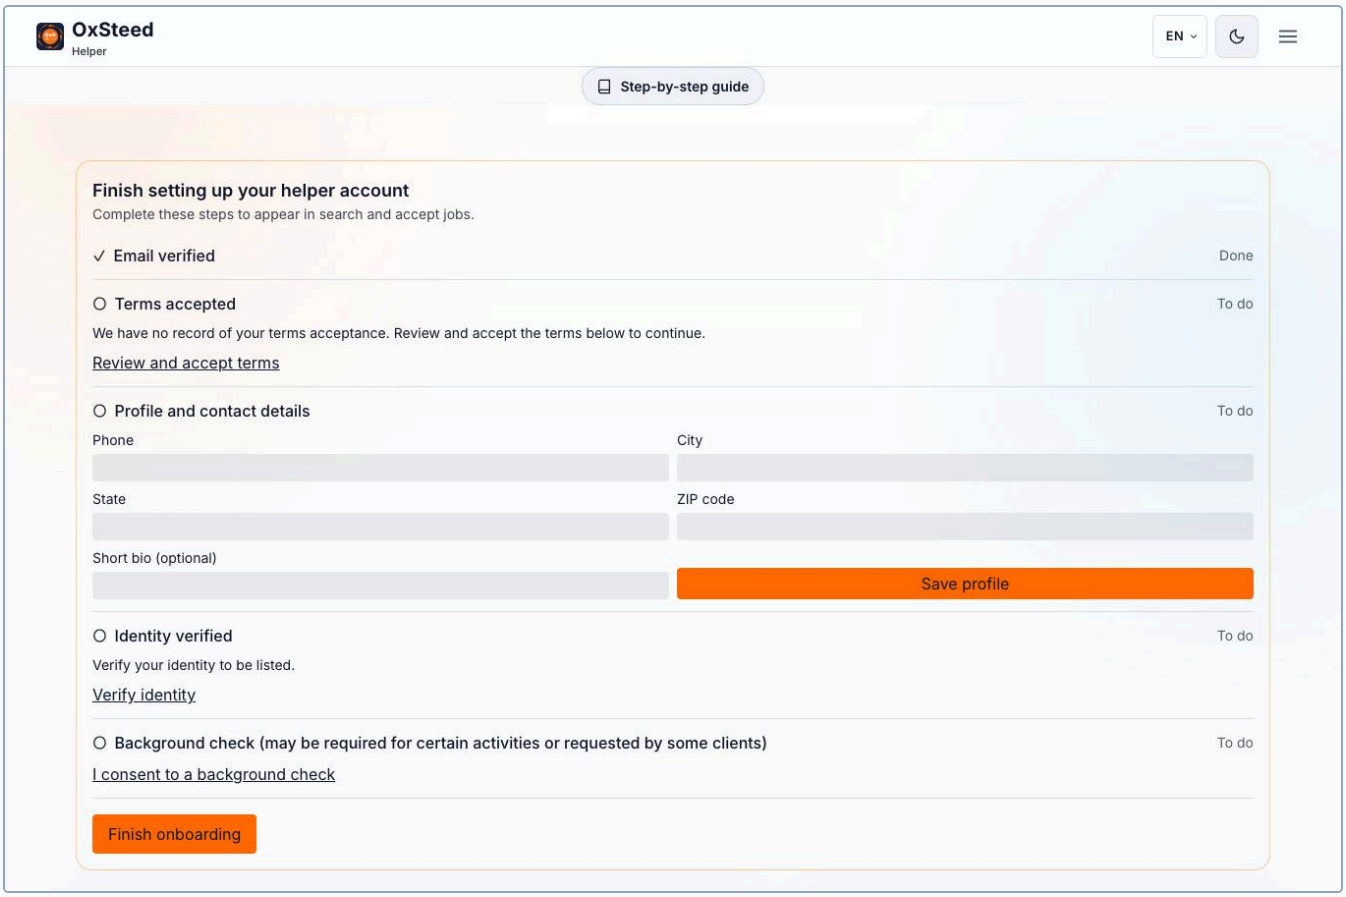

Figure 4. All steps done; choose Finish onboarding. *(Image description: Synthetic example: Welcome back, Nia!)*

Confirm it worked

Confirm the server-reported completion state. Listing and work actions still depend on availability, applicable requirements and permissions; reading this checklist does not enable them.

If something goes wrong

Problem	What to do
A step stays on "To do" after you completed it.	Reload the page; progress is re-derived from your records. If identity shows "Your identity check is being reviewed.", wait for the review to finish.
You cannot bid or accept bookings yet.	Check that onboarding shows complete and that you are in Helper mode. Helpers must complete onboarding; customers can browse and post without it.
The business cannot publish.	Review the remaining checklist items on /business/:businessId/onboarding. Every incomplete check blocks publishing.

Need help?

If a step will not complete despite your records being correct, contact support from the Help menu or visit /support.

Guide ID: account-password-recovery | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Recover a forgotten password

Guide ID	**account-password-recovery**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/recover-password

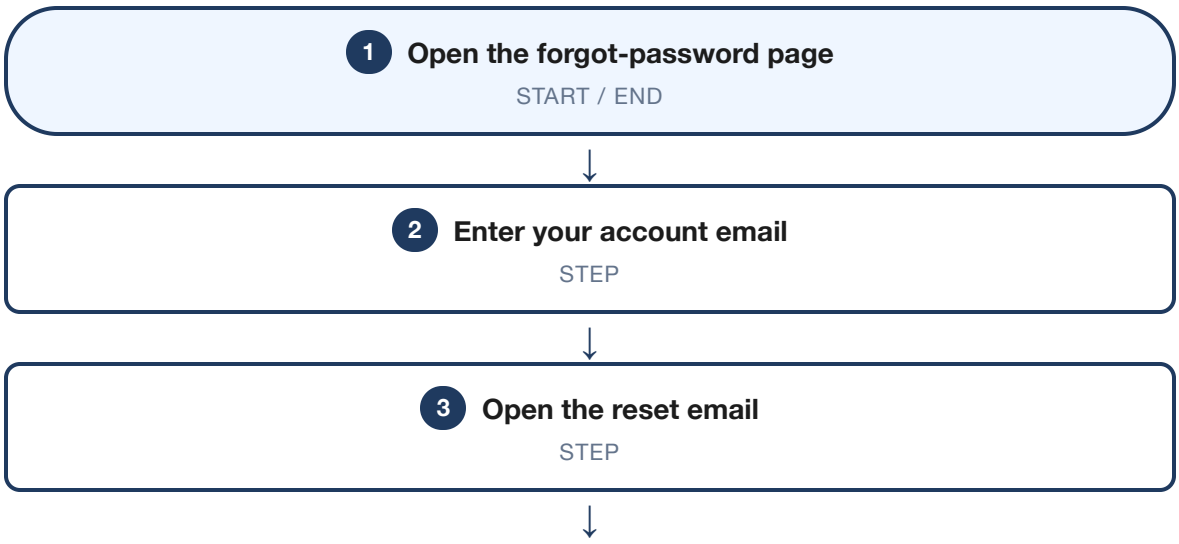

Goal

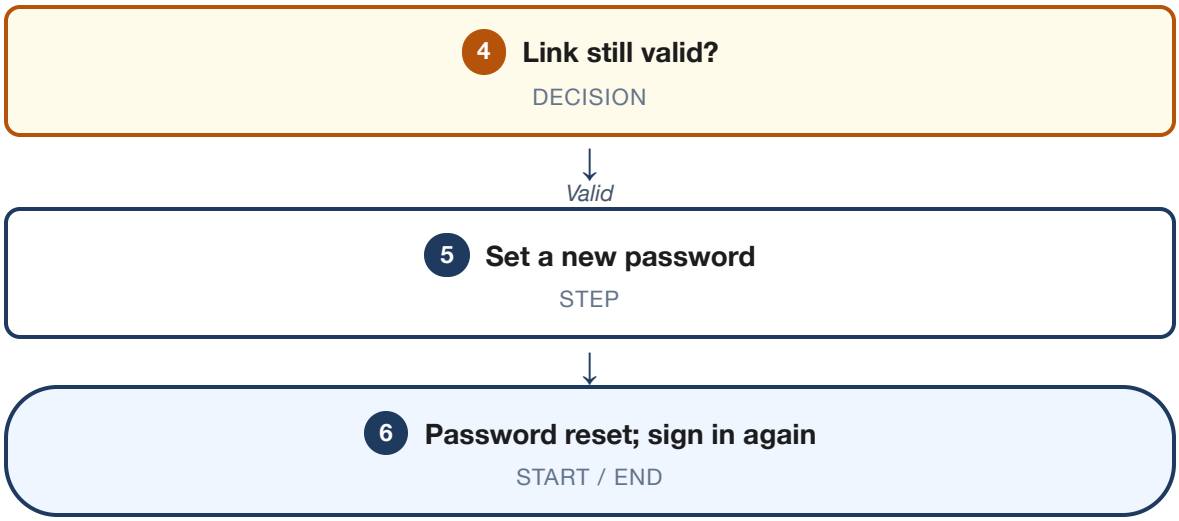

Reset your password with an email link when you cannot sign in.

Before you start

1. Access to the email inbox of your OxSteed account.

Process map

- *Expired or invalid:* Link still valid? → Request a new link
- Request a new link → Open the reset email

Text version. 1. Open the forgot-password page from the sign-in screen. 2. Enter the email address of your account and choose "Send Reset Link". 3. Open the reset email and choose the link. 4. If the link is expired or invalid, request a new one. 5. Enter a new password twice on the "Set New Password" page. 6. Sign in with the new password.

Steps

Step 1: Open the password reset page

From the sign-in page, choose "Forgot password?", or open /forgot-password directly. The page heading is "Reset your password" with the subtitle "Enter your email and we'll send you a link to reset your password."

> **Expected result:** The reset page shows a single Email address field and a "Send Reset Link" button.

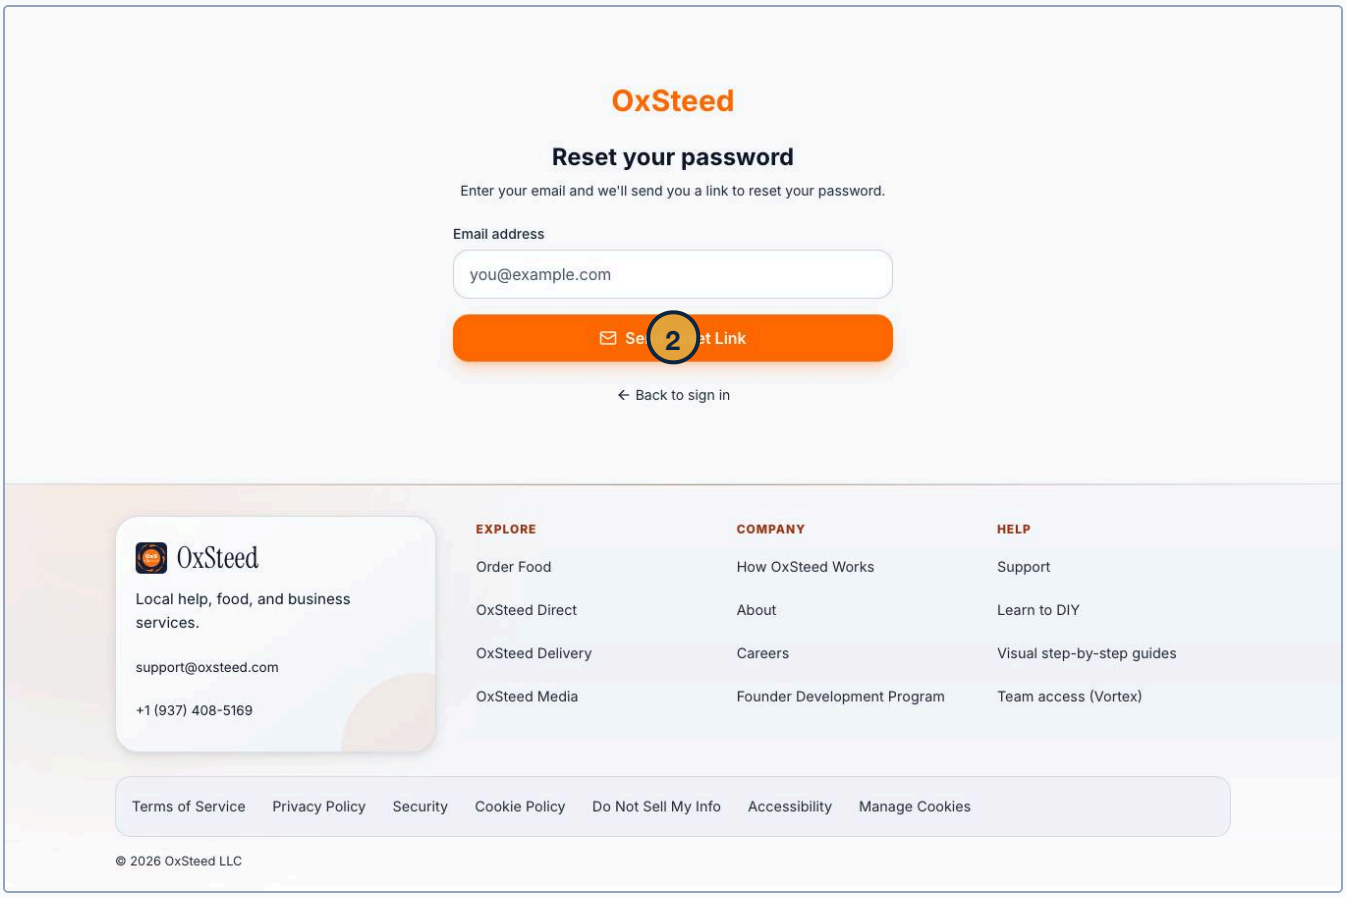

Figure 1. The password reset page, desktop view. *(Image description: Reset your password page with an email field and Send Reset Link button)*

1. **2.** Send Reset Link button

Step 2: Request the reset link

Type your account email address (placeholder "you@example.com") and choose "Send Reset Link". A confirmation tells you the link was sent. If you never get it, check your spam folder, then come back and choose "Try again".

> **Expected result:** A confirmation appears that the reset link was sent to your email.

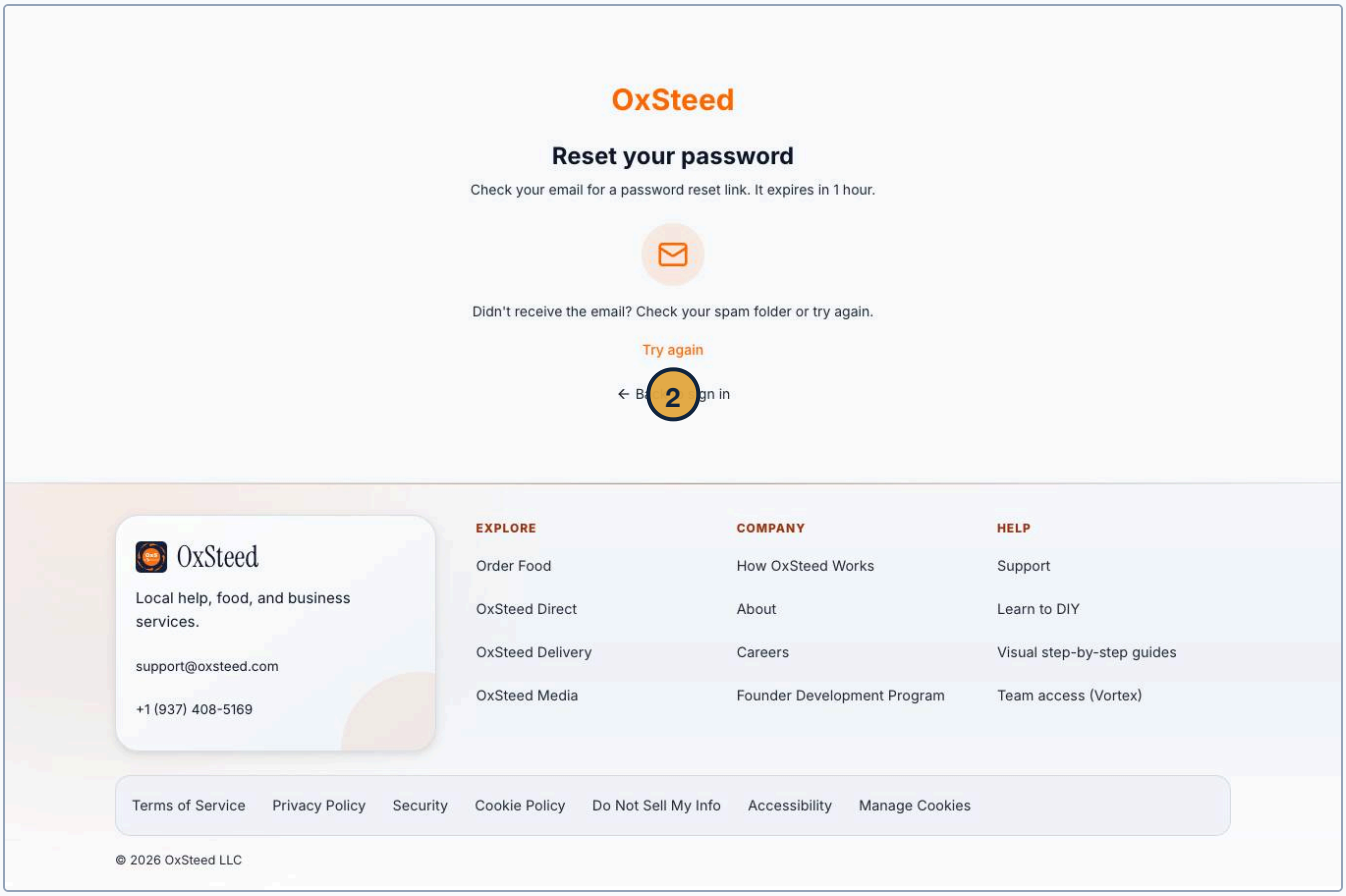

Figure 2. The sent confirmation after requesting the link. *(Image description: Confirmation that the reset link was sent)*

1. **2.** Back to sign in link

Step 3: Set a new password from the email link

Open the email and choose the reset link, which opens /reset-password/:token. The page heading is "Set New Password". Type your new password in the New password field and repeat it in the Confirm password field, then choose "Reset Password". The new password must meet the minimum length shown.

> **Expected result:** A success message appears and a "Go to Sign In now" option is shown.

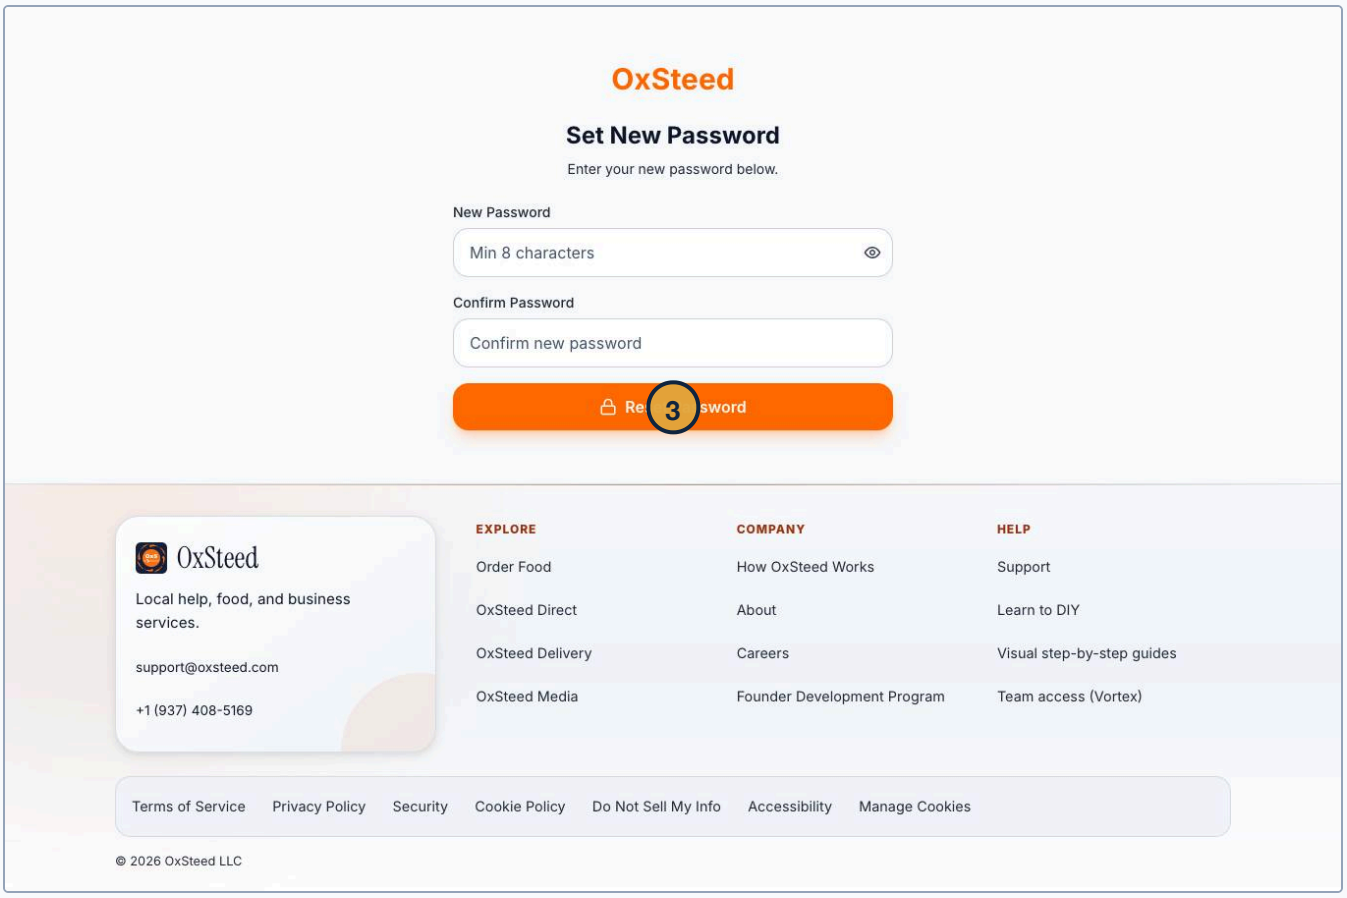

Figure 3. The new password form, desktop view. *(Image description: Set New Password page with new and confirm password fields)*

1. **3.** Reset Password button

Confirm it worked

The success screen appears; sign in at /login with your new password. If the link shows as invalid, request a fresh link.

If something goes wrong

Problem	What to do
The reset link shows as invalid or expired.	Reset links expire for security. Request a new one from /forgot-password and use it right away.
No reset email arrives.	Check the spam folder and confirm you typed the exact email registered on the account. Wait a few minutes before requesting again.
The new password is rejected.	Both fields must match and meet the minimum length. Avoid reusing your most recent passwords.

Need help?

If you no longer have access to the registered email, contact support from the Help menu or visit /support.

Guide ID: account-privacy | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Privacy controls, data export, account deletion

Guide ID	**account-privacy**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/privacy-and-data

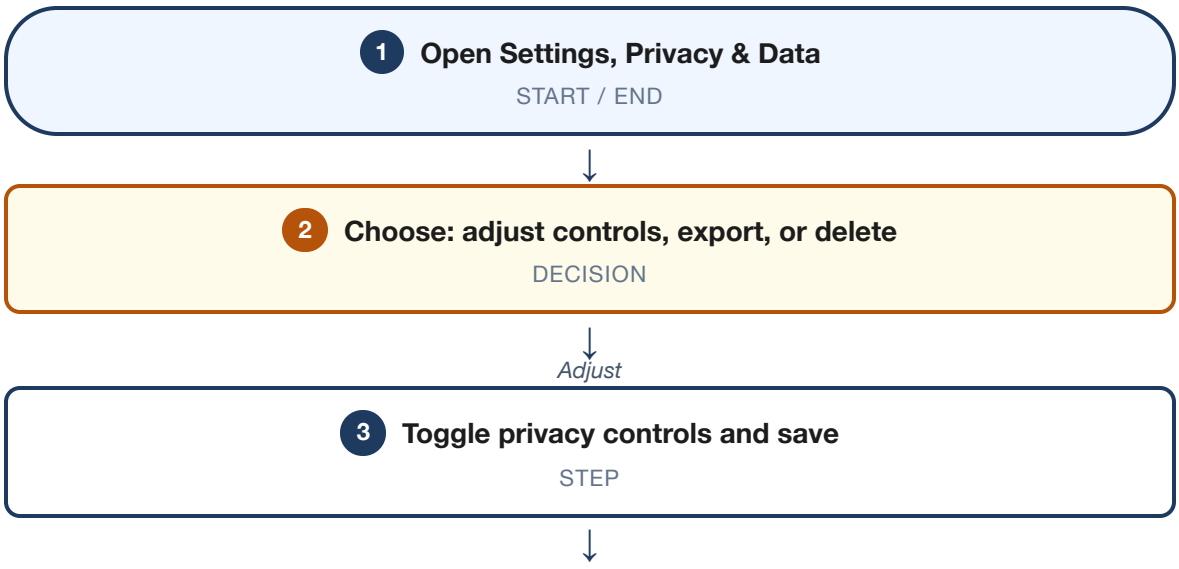

Goal

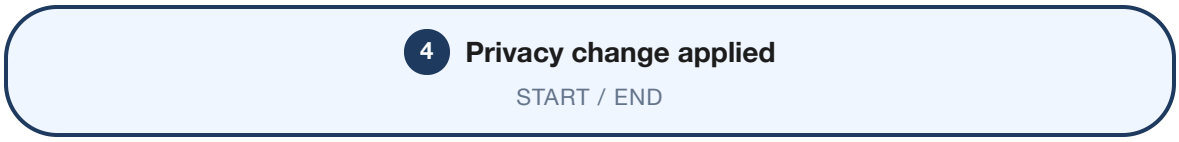

Control your privacy settings, export your data, or delete your account.

Before you start

1. Be signed in for export and deletion; the policy pages are public.

Process map

- *Export:* Choose: adjust controls, export, or delete → Verify password and email code, download export
- *Delete:* Choose: adjust controls, export, or delete → Danger Zone: Delete Account with confirmation
- Verify password and email code, download export → Privacy change applied
- Danger Zone: Delete Account with confirmation → Privacy change applied

Text version. 1. Open Settings and choose the "Privacy & Data" tab. 2. Decide what you want: adjust privacy controls, export your data, or delete your account. 3. For controls, toggle the options (communication, job, live chat, booking visibility) and save. 4. For export, confirm your current password, then enter the six-digit code sent to your email; the export downloads. 5. For deletion, use the "Danger Zone" tab, choose "Delete Account", and confirm in the "Delete Your Account" dialog.

Steps

Step 1: Open the Privacy & Data tab

Choose Settings from your account menu and pick the "Privacy & Data" tab. The page shows privacy preference toggles (for example communication controls, job controls, live chat, and booking visibility). The public legal pages (/privacy, /do-not-sell, /cookie-policy, /terms) are readable without signing in.

> **Expected result:** The privacy toggles load with their current saved states.

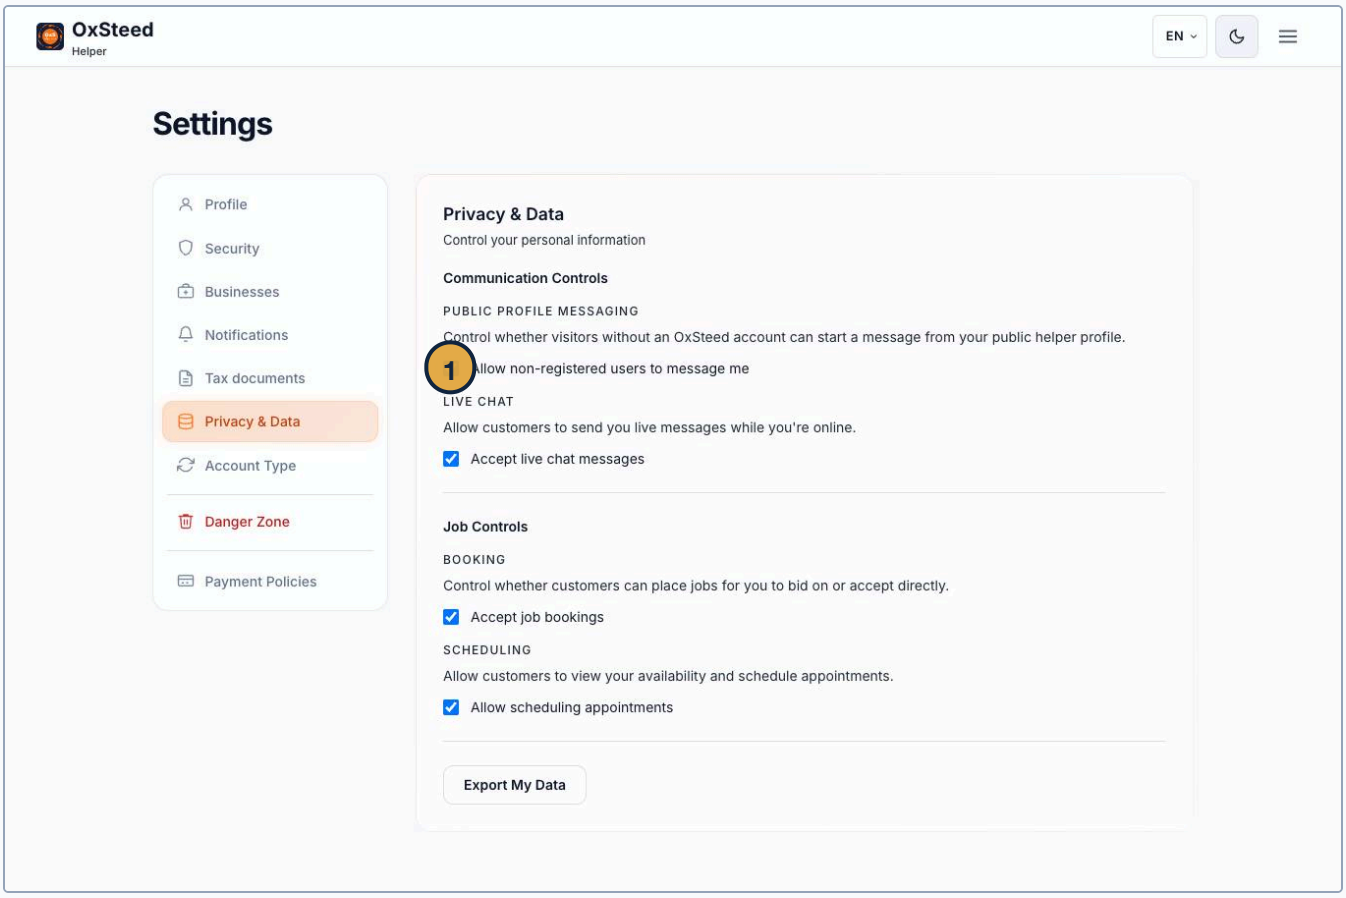

Figure 1. The Privacy & Data tab, desktop view. *(Image description: Synthetic example: Settings)*

1. **1.** Privacy toggles

Step 2: Adjust privacy controls and save

Toggle the controls you want to change (for example who can contact you or see your activity) and choose Save. A confirmation toast shows when the update is stored.

> **Expected result:** The saved states persist after you reload the page.

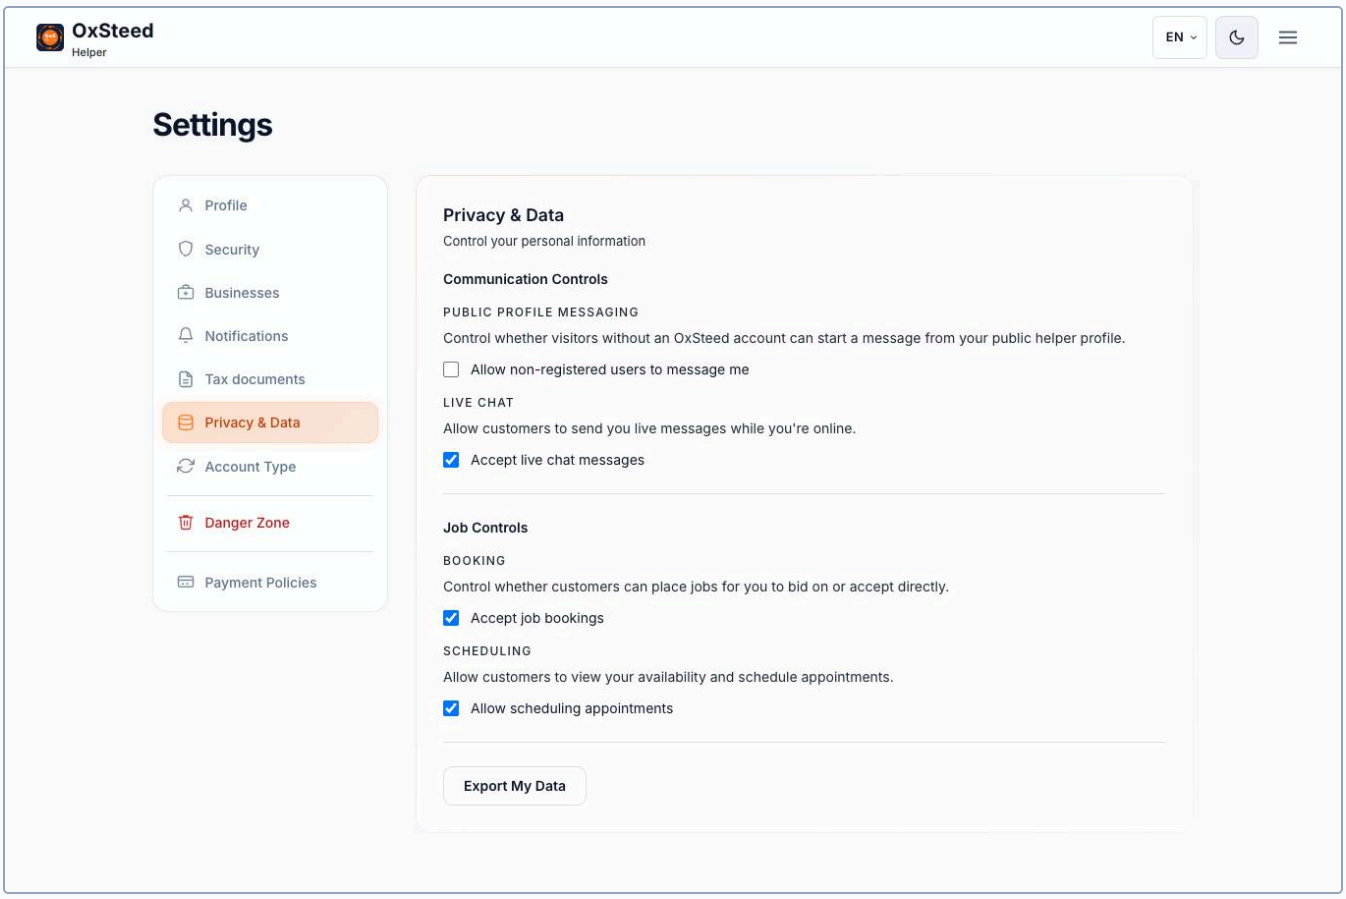

Figure 2. Adjusting privacy controls. *(Image description: Synthetic example: Settings)*

Step 3: Export your data with two-step verification

In the Privacy & Data tab, start the data export. First confirm your current password; a verification code is sent to your email ("A verification code was sent to your email."). Enter the six-digit code, then choose the verify-and-export option to download your data export.

> **Expected result:** The export file downloads to your device.

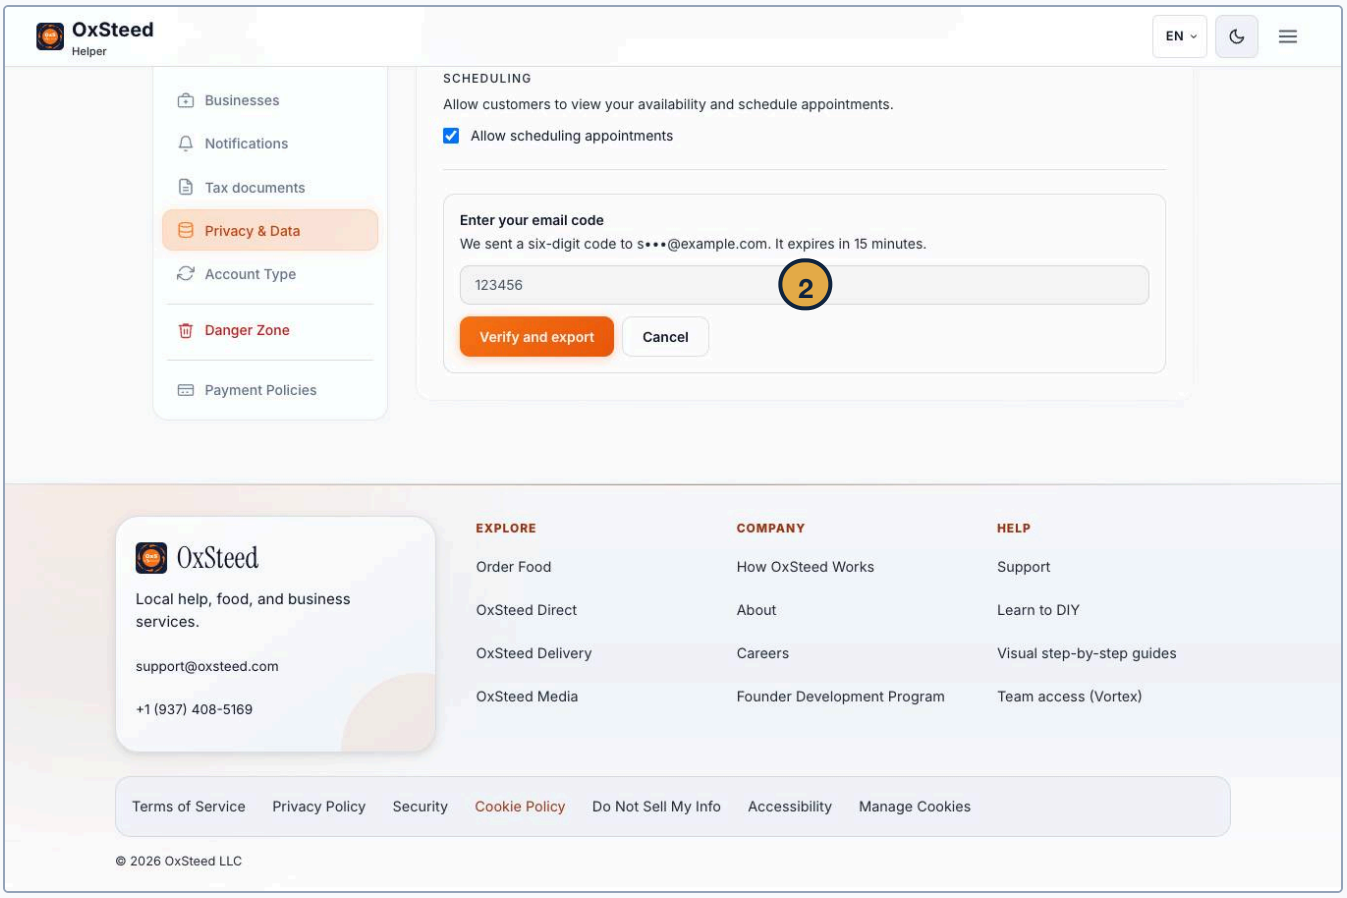

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Settings)*

1. **2.** Six-digit code field

Step 4: Delete your account from the Danger Zone

Choose the "Danger Zone" tab and choose "Delete Account". A confirmation dialog titled "Delete Your Account" explains what is removed (including active jobs and pending balances if any). Type the confirmation as requested and confirm the deletion. This cannot be undone.

> **Expected result:** Your account is deleted and you are signed out.

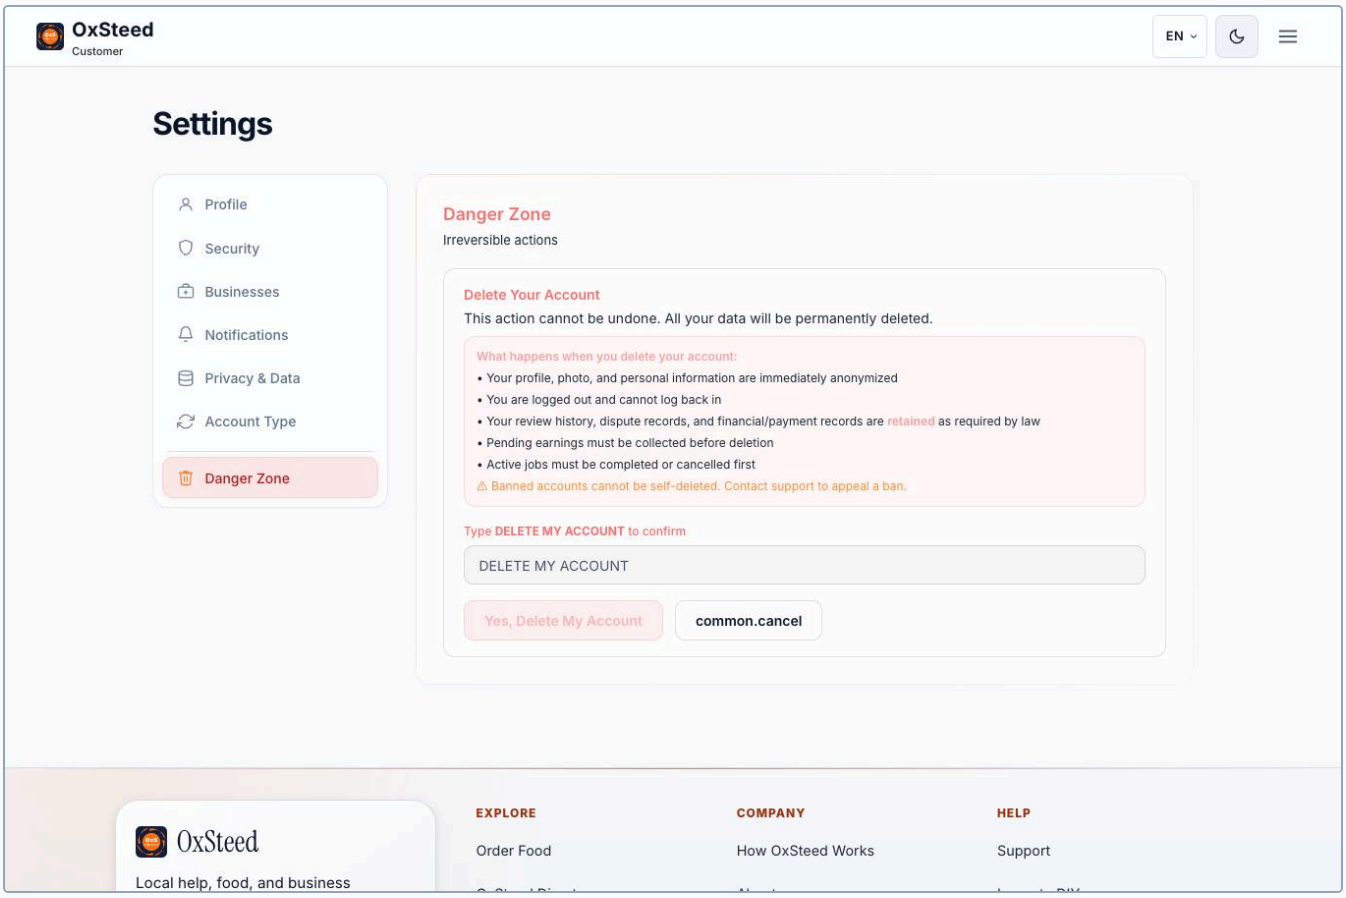

Figure 4. The Delete Your Account confirmation. *(Image description: Synthetic example: Settings)*

Confirm it worked

Privacy toggles keep their new values after a reload; exports download; after deletion you can no longer sign in with that account.

If something goes wrong

Problem	What to do

The export code never arrives.	Check spam, then request a new code. You must enter your current password first; without it no code is sent.
Account deletion is blocked.	The dialog lists blockers such as active jobs or a remaining balance. Finish or cancel those jobs and withdraw balances first, then retry deletion.

Need help?

For data requests you cannot complete yourself, contact support from the Help menu or visit /support.

Guide ID: account-settings | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Manage account settings

Guide ID	**account-settings**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/manage-settings

Goal

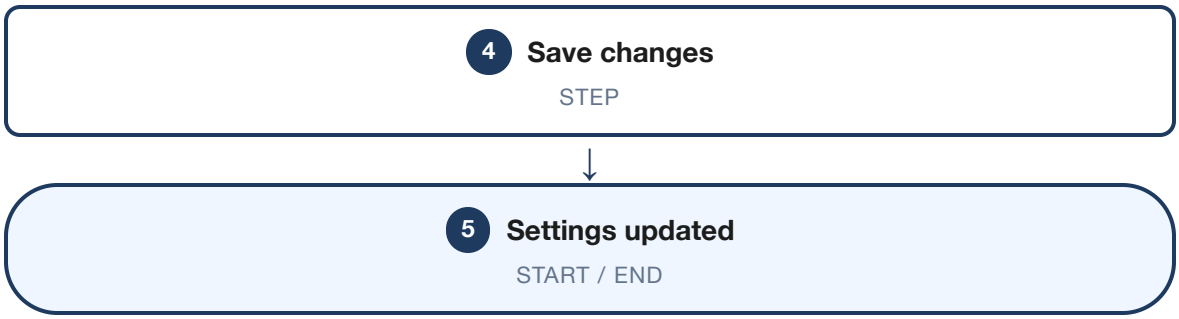

Change your profile, security, notifications, country, businesses, and tax documents from one settings hub.

Before you start

1. Be signed in to your OxSteed account.

Process map

Text version. 1. Open /settings. 2. Pick the tab you need: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, Danger Zone, or Tax documents (helpers only). 3. Edit the fields or toggle the controls on that tab. 4. Save; most changes confirm with a toast. 5. Security changes like 2FA and passkeys take effect immediately.

Steps

Step 1: Open Settings and pick a tab

Choose Settings from your account menu, or open /settings directly. The page shows tabs: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, and Danger Zone. Helpers also see a Tax documents tab. You can deep-link a tab, for example /settings?tab=tax.

> **Expected result:** The settings page loads with the tab list and the Profile tab selected.

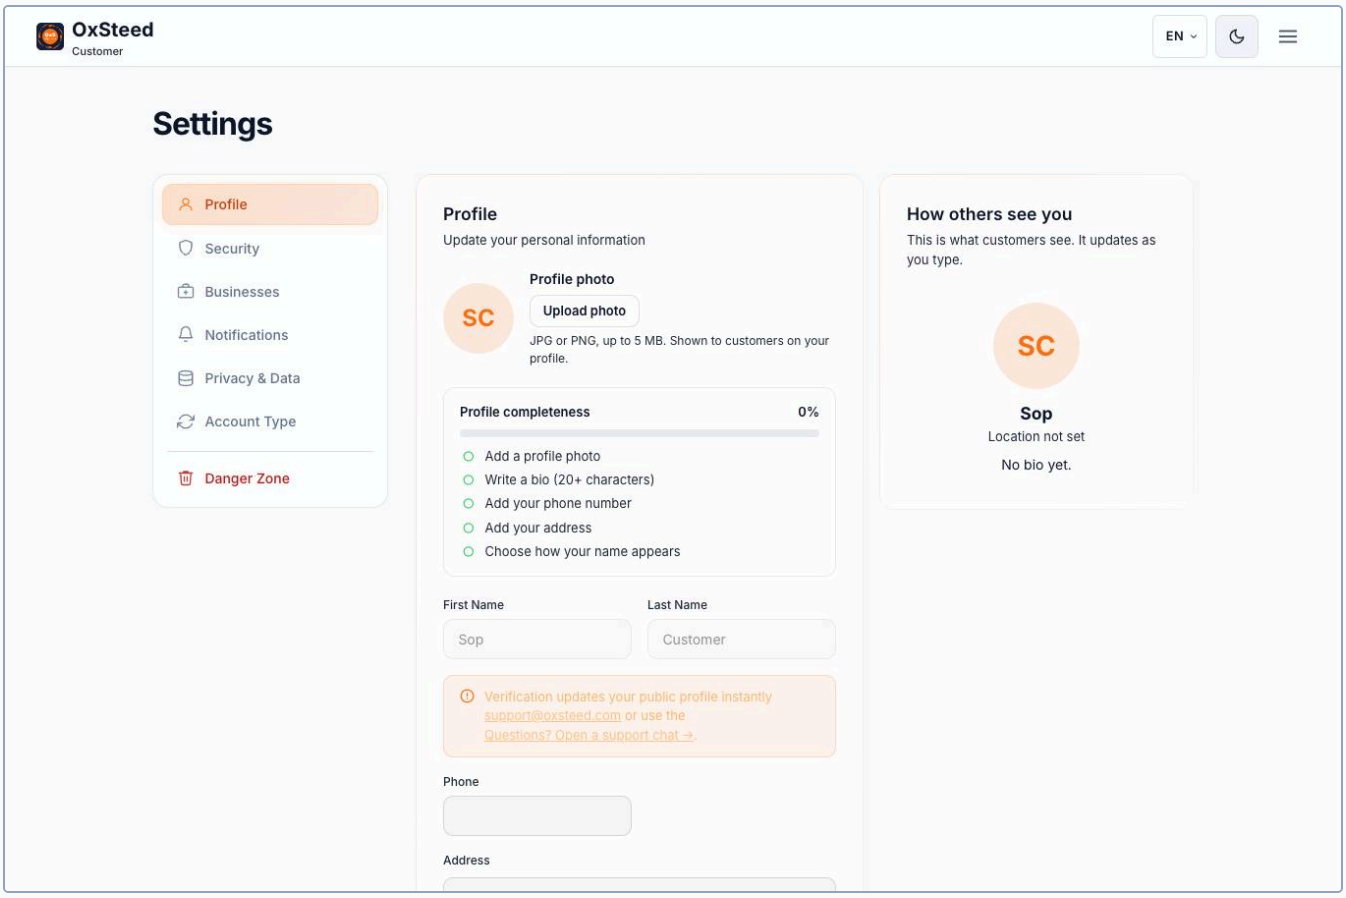

Figure 1. The settings tabs, desktop view. *(Image description: Synthetic example: Settings)*

Step 2: Update your profile or account basics

On the Profile tab, update your name, contact details, and profile photo. On the Account Type tab you can review your "Current Role", see the "Workspaces you belong to", and use "Switch" to move into a granted workspace role.

> **Expected result:** The changed values stay in the fields after saving.

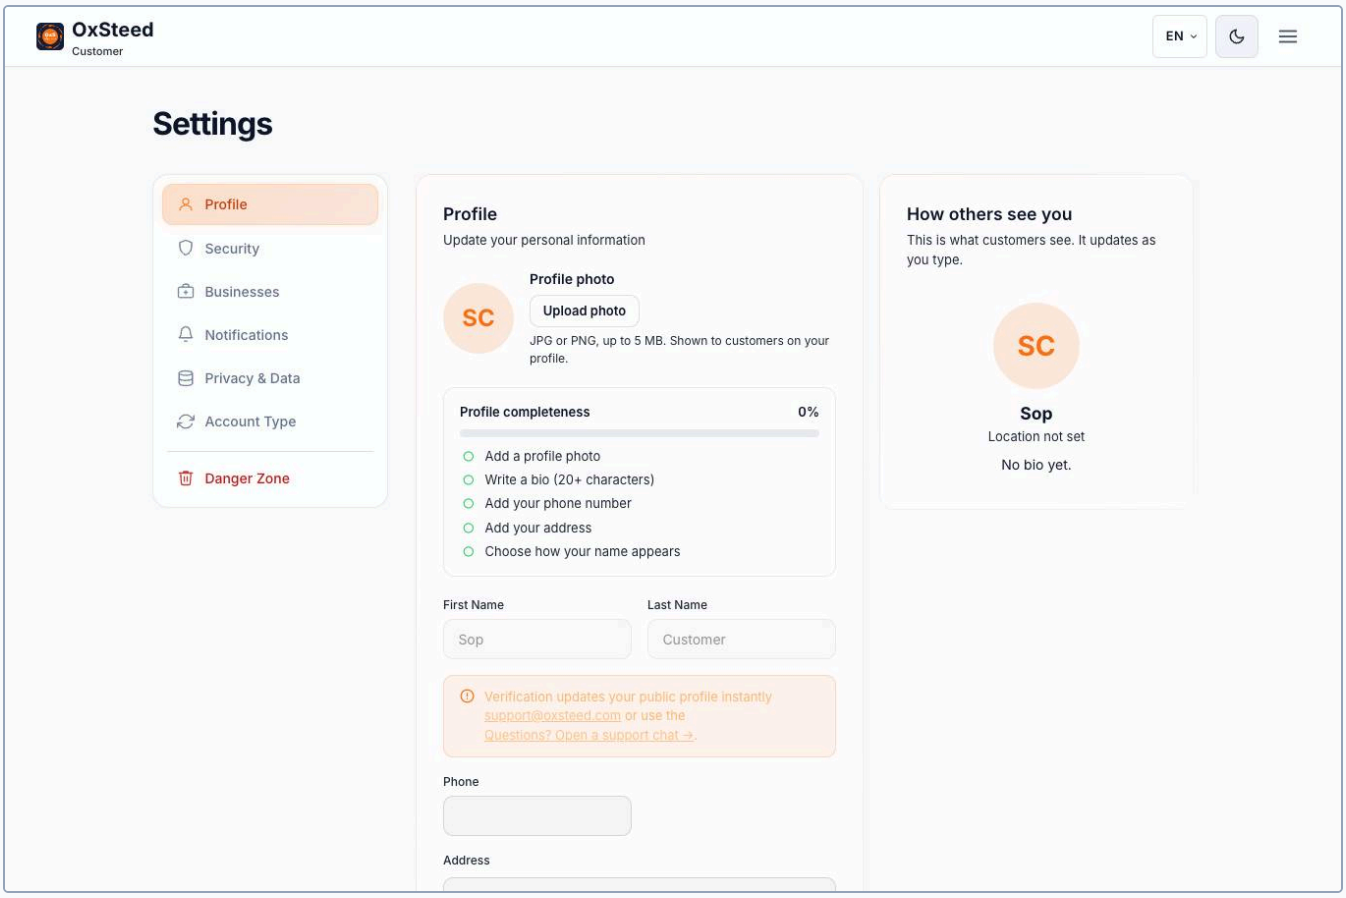

Figure 2. The Profile tab. *(Image description: Synthetic example: Settings)*

Step 3: Manage security: 2FA, passkeys, and sessions

On the Security tab, set up two-factor authentication (TOTP), add or remove passkeys, and review your active sessions. Sessions can be signed out individually from the sessions list. The Notifications tab controls email and push preferences; the country selector sets your marketplace country.

> **Expected result:** Security changes confirm immediately; a new 2FA setup asks you to verify a test code.

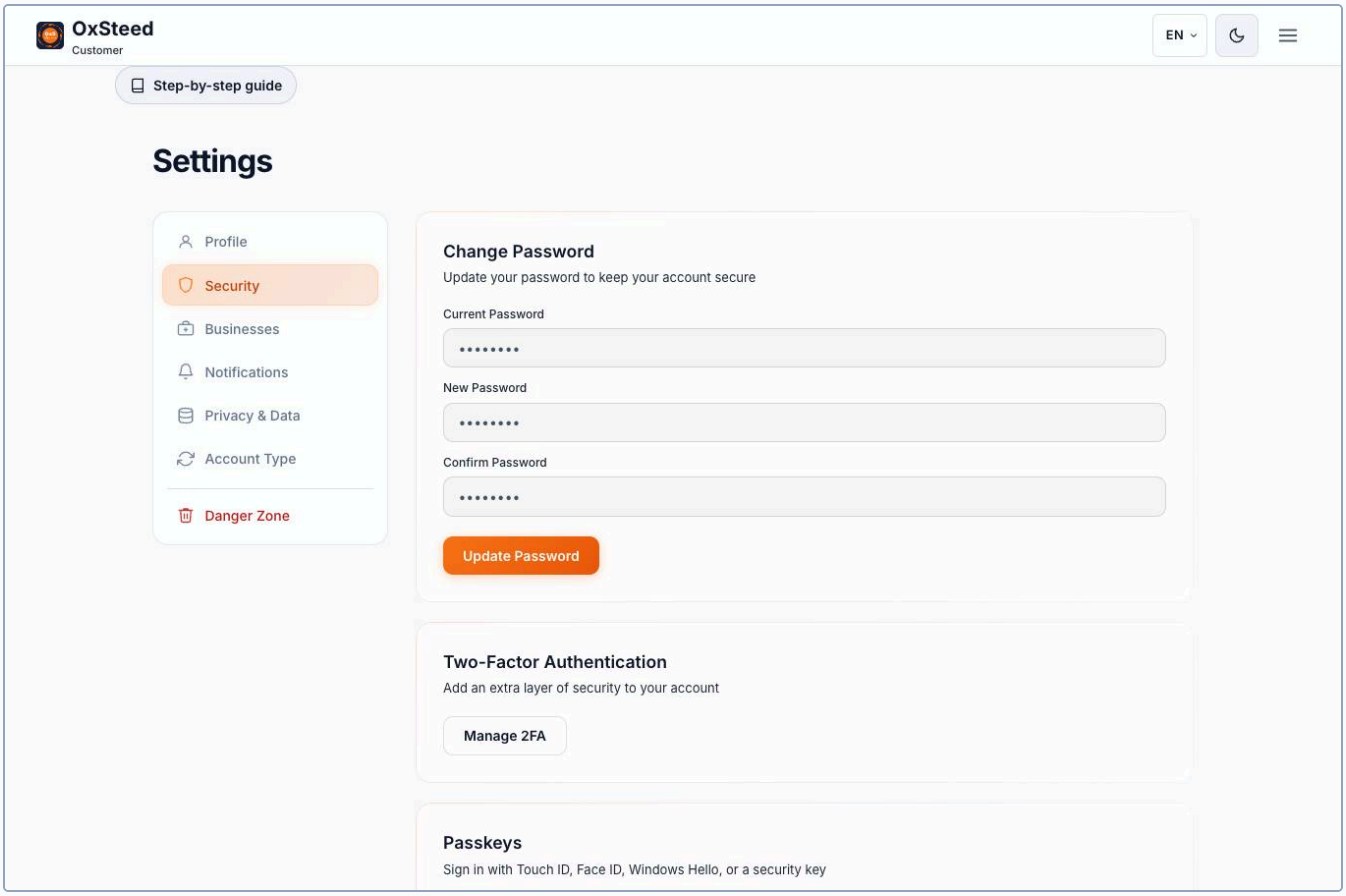

Figure 3. The Security tab: 2FA, passkeys, and sessions. *(Image description: Synthetic example: Settings)*

Step 4: File tax documents as a helper (W-9)

Helpers: open the Tax documents tab and complete "Tax documents (W-9)". The subtitle explains: "File your W-9 so payouts can be released. Your tax ID is stored encrypted." Payouts are gated until your tax identity is on file.

> **Expected result:** The W-9 shows as filed and the payout tax gate is satisfied.

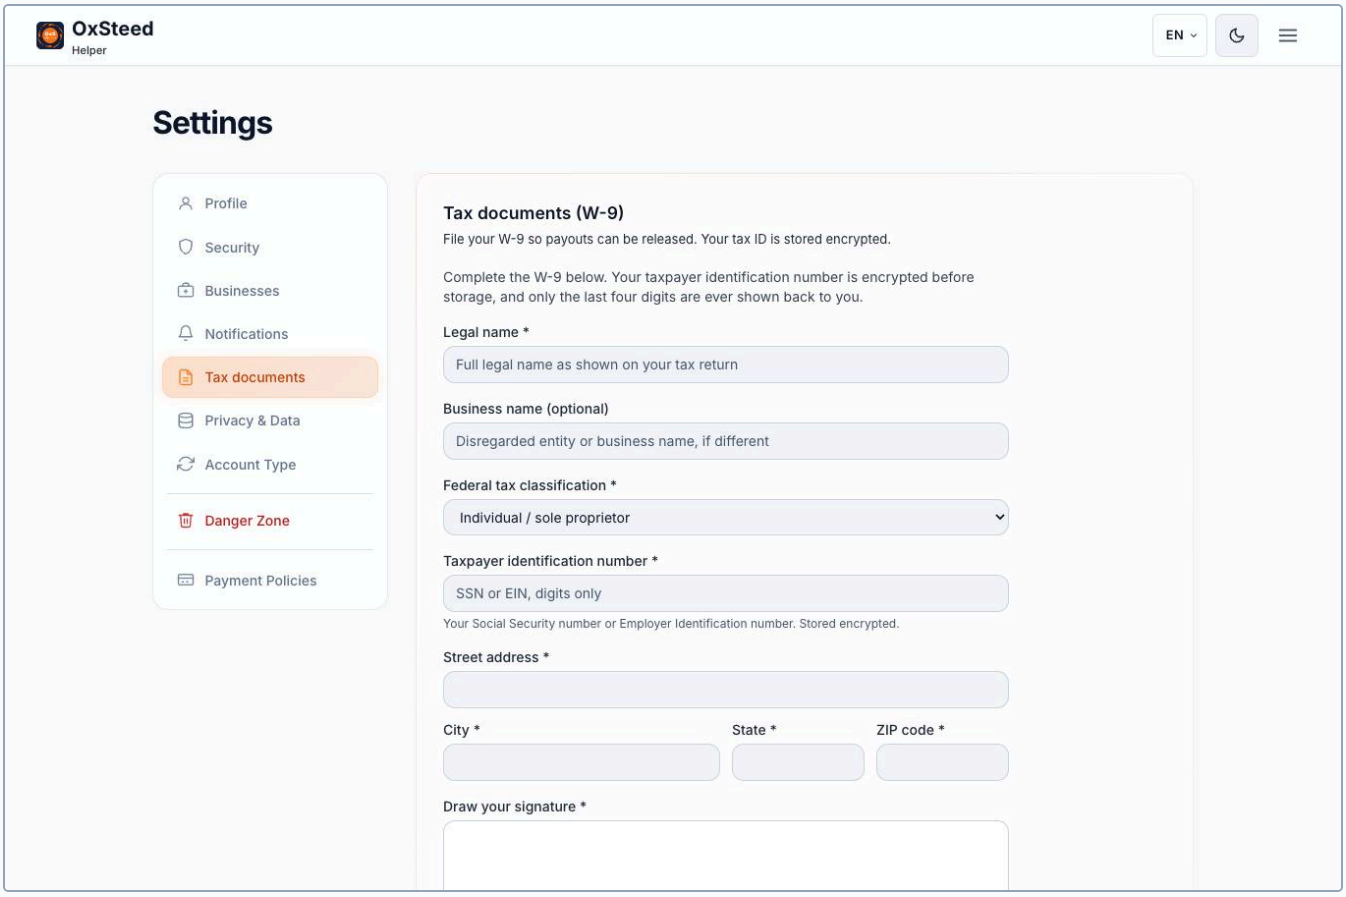

Figure 4. The Tax documents tab for helpers. *(Image description: Synthetic example: Settings)*

Confirm it worked

Each change confirms with a toast or an updated value. Your Security tab reflects the new 2FA or passkey state immediately.

If something goes wrong

Problem	What to do

You cannot find a setting you expected.	Check every tab; some controls are role-specific (the Tax documents tab is helper-only, businesses live under the Businesses tab).
A save fails with an error.	Check the highlighted field for the validation message, fix it, and save again. If it keeps failing, reload the page and retry.

Need help?

For account or security issues you cannot fix in Settings, contact support from the Help menu or visit /support.

Guide ID: account-signin | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Sign in

Guide ID	**account-signin**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/sign-in

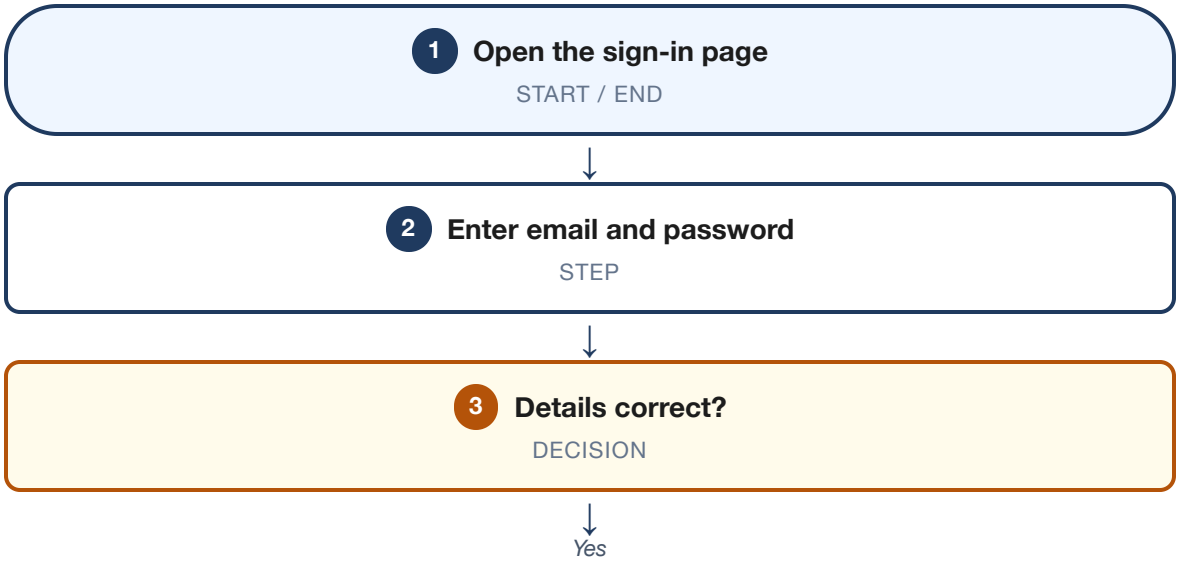

Goal

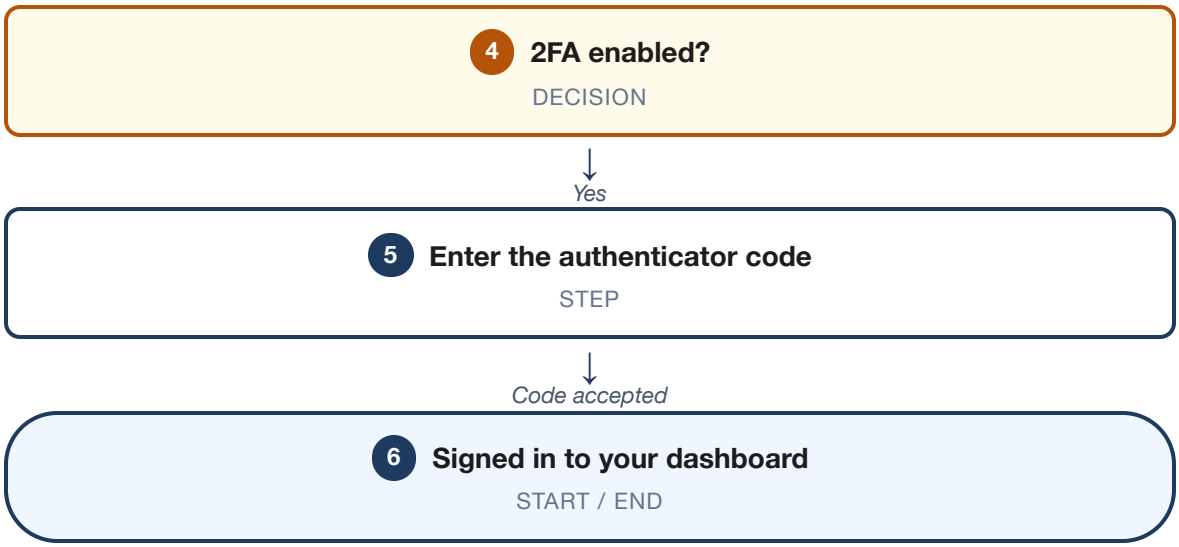

Sign in to your OxSteed account with your email and password, including two-factor and passkey options.

Before you start

1. Have an OxSteed account.
2. If you enabled two-factor authentication, have your authenticator app ready.

Process map

- *No:* Details correct? → Use Forgot password?
- *No:* 2FA enabled? → Signed in to your dashboard
- *Password reset:* Use Forgot password? → Enter email and password

Text version. 1. Open the sign-in page. 2. Enter your email address and password, then choose "Sign in". 3. If the details are wrong, use "Forgot password?" to reset. 4. If two-factor authentication is on, the page switches to "Verify it's you"; enter your Authentication code. 5. You land on your dashboard. Passkey users can sign in with their device instead of typing a password.

Steps

Step 1: Open the sign-in page

Choose "Sign In" in the top navigation, or open /login directly. The page shows the heading "Welcome back" and the subtitle "Sign in to access your local skills marketplace", with an Email address field, a Password field, and a "Sign in" button. New users see a "Join OxSteed" link instead.

> **Expected result:** The sign-in form is visible with empty Email address and Password fields.

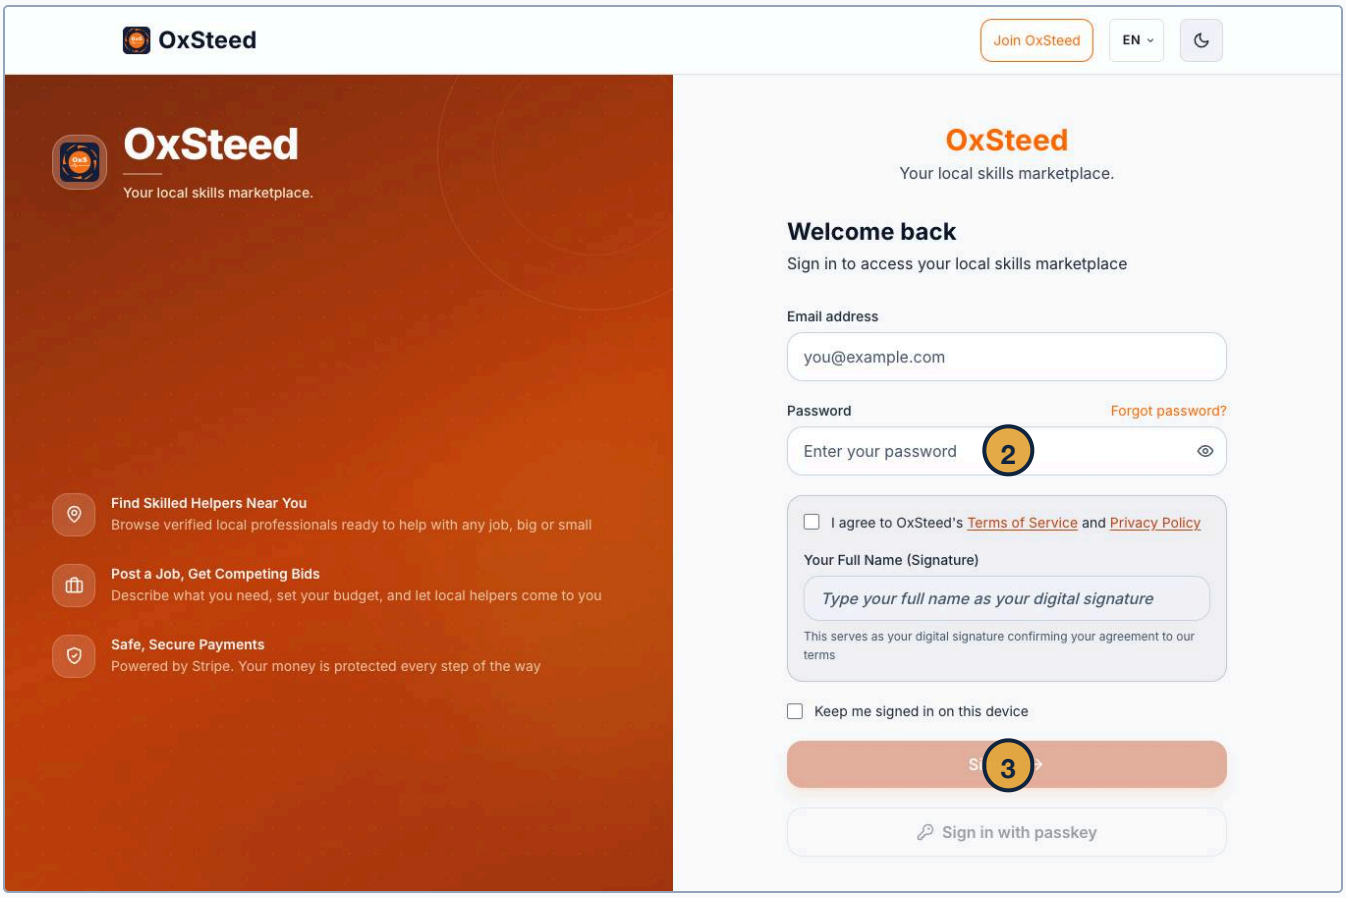

Figure 1. The sign-in page, desktop view. *(Image description: Synthetic example: OxSteed)*

1. **2.** Password field
2. **3.** Sign in button

Step 2: Enter your email and password

Type the email address you registered with into the Email address field (placeholder "you@example.com") and your password into the Password field (placeholder "Enter your password"). Passwords are case sensitive. Use "Show password" if you want to check your typing, then choose "Sign in". The "Forgot password?" link sits next to the password field.

> **Expected result:** The Sign in button shows a loading state, then you are redirected.

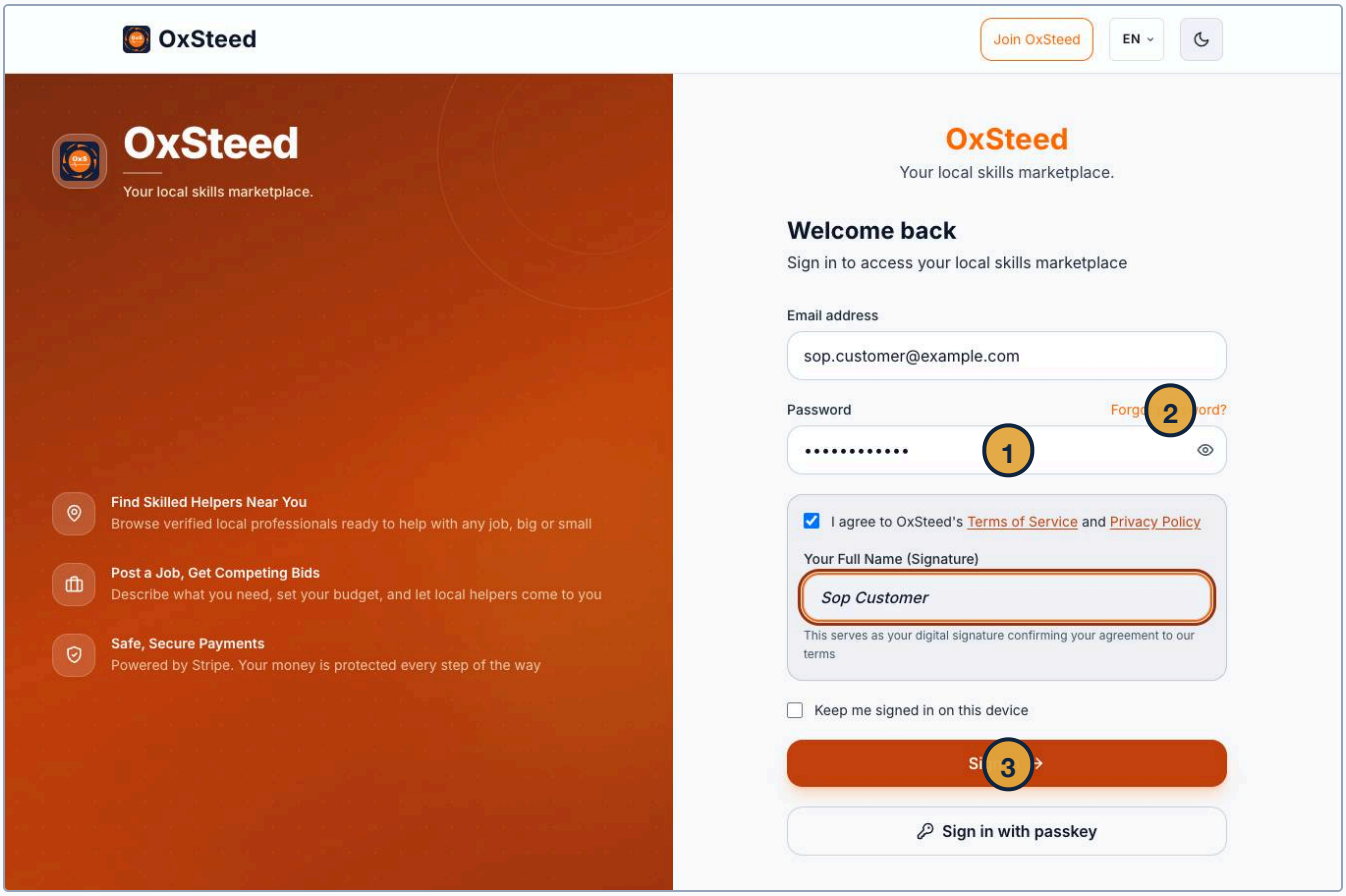

Figure 2. The filled sign-in form before choosing Sign in. *(Image description: Synthetic example: OxSteed)*

1. **1.** Password field
2. **2.** Forgot password? link
3. **3.** Sign in button

Step 3: Complete the two-factor check if prompted

If you enabled two-factor authentication, the page changes to "Verify it's you". Enter the current code from your authenticator app into the Authentication code field and submit. Users with a passkey can choose the passkey option instead of typing a password.

> **Expected result:** The code is accepted and you continue to your dashboard.

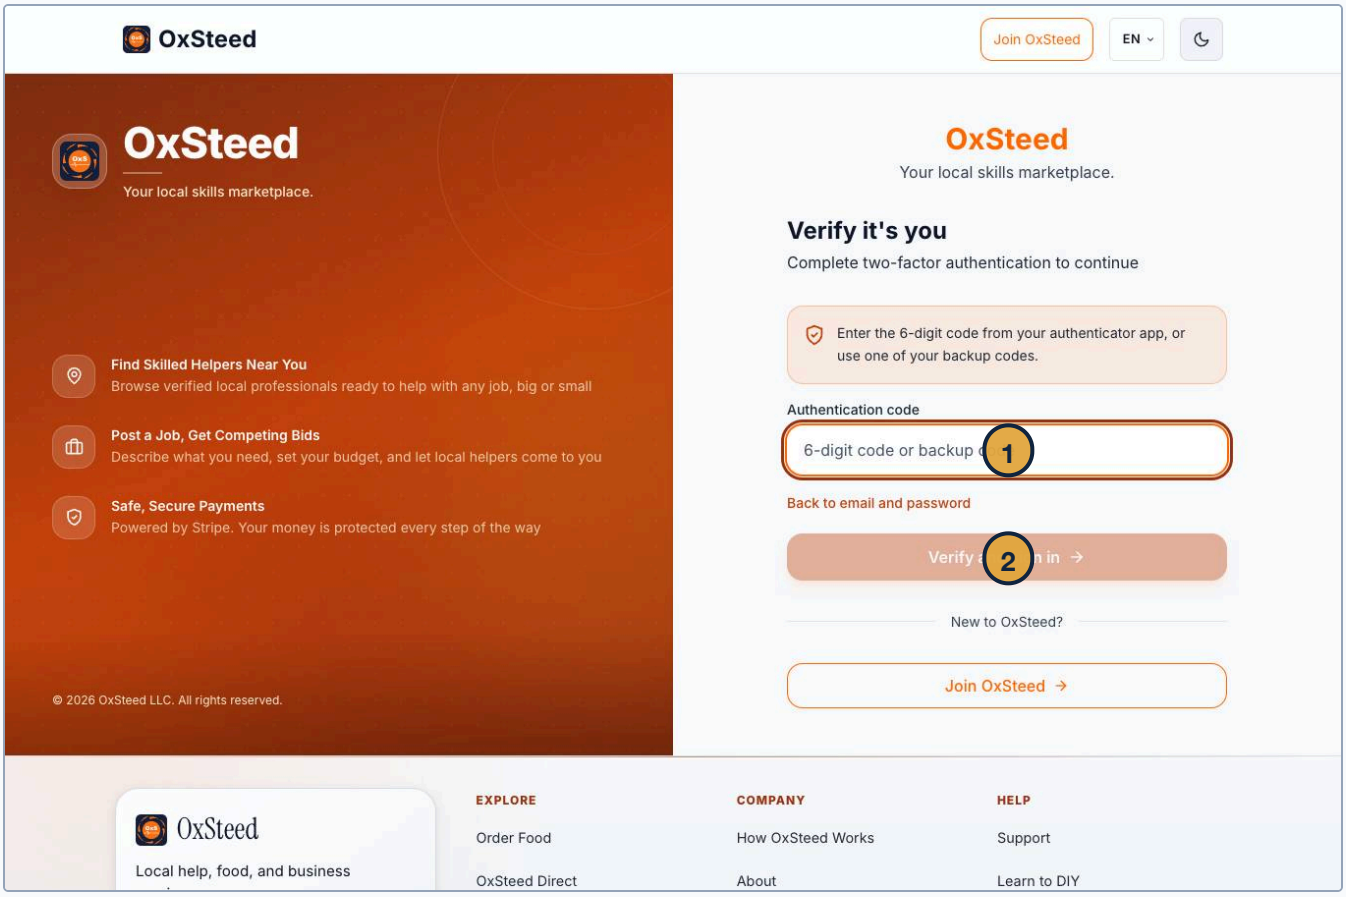

Figure 3. The two-factor step, shown only when 2FA is enabled. *(Image description: Synthetic example: OxSteed)*

1. **1.** Authentication code field
2. **2.** Submit button

Step 4: Confirm you landed on your dashboard

After sign in, your dashboard loads. Open Account in the navigation to find your account actions. If you expected a different mode (for example Helper instead of Customer), use the mode switcher in the navigation.

> **Expected result:** Your dashboard is visible and the Account menu offers your signed-in account actions.

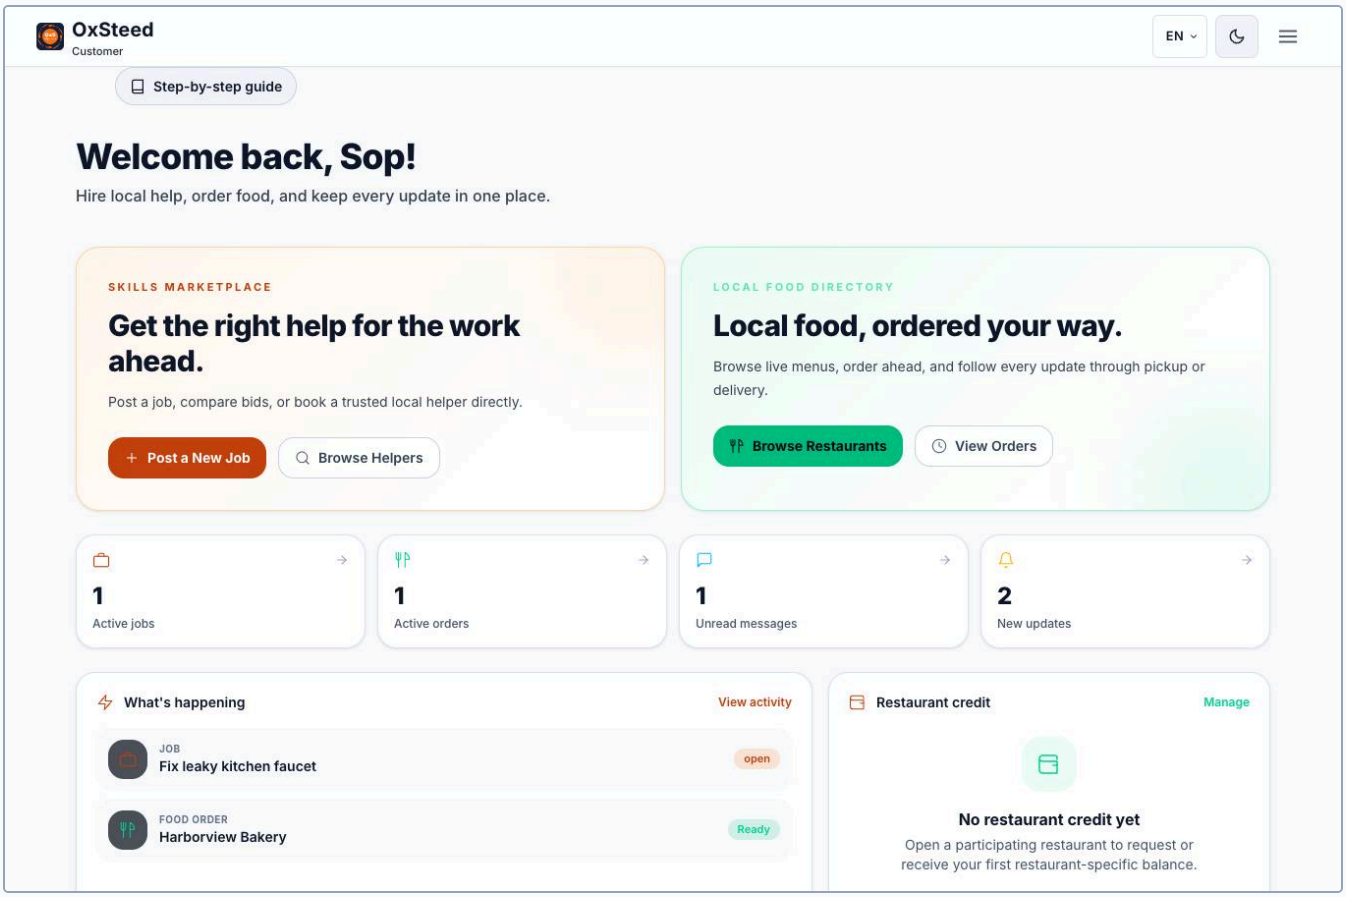

Figure 4. A signed-in dashboard with the account menu. *(Image description: Synthetic example: Welcome back, Sop!)*

Confirm it worked

Your dashboard loads and the Account menu offers your signed-in account actions. Review active sessions anytime under Settings, Security.

If something goes wrong

Problem	What to do

You see "Invalid email or password".	Check for typos and caps lock, then try again. After several failed attempts the sign-in is rate-limited; wait a few minutes or reset the password.
Your two-factor code is rejected.	Make sure your phone clock is set automatically; authenticator codes drift when the clock is off. If you lost the authenticator, use your saved recovery code from the Security tab in Settings.
Passkey sign in fails.	Make sure your browser and device support passkeys and that you use the same device or synced profile where the passkey was created. Fall back to email and password.

Need help?

If you cannot access your account after a password reset, contact support from the Help menu or visit /support.

Guide ID: account-support | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Get help and track support tickets

Guide ID	**account-support**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant
Availability	**Supported**
Online version	/how-it-works/account/get-support

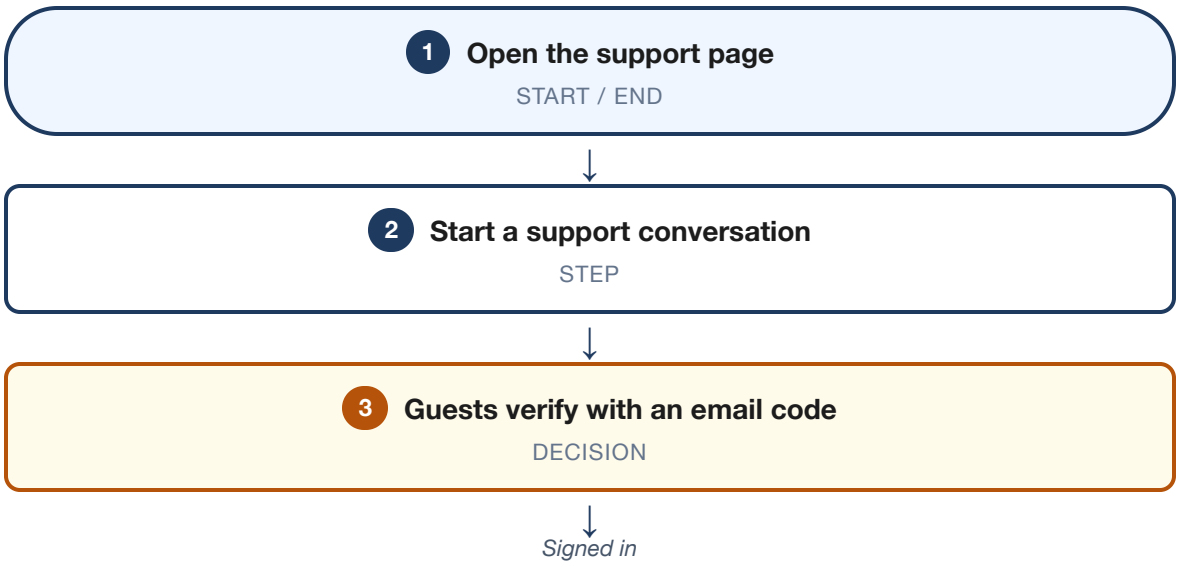

Goal

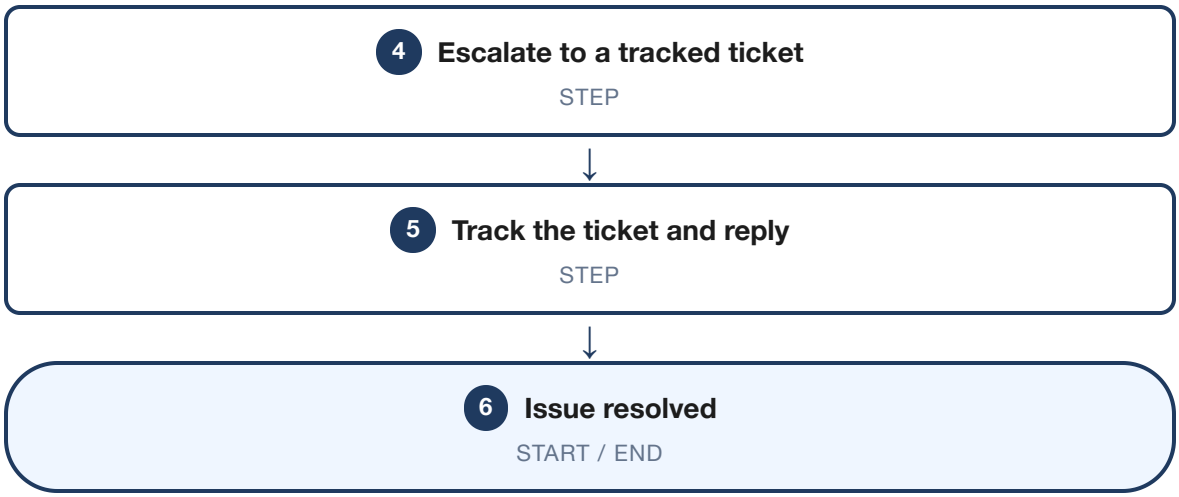

Start a support conversation, escalate it to a tracked ticket, and follow it to resolution.

Before you start

1. Know the job, booking, or order the issue is about, and have photos or receipts ready.

Process map

- *Guest:* Guests verify with an email code → Enter name and email to continue
- Enter name and email to continue → Escalate to a tracked ticket

Text version. 1. Open /support. 2. Start a support conversation and describe the issue; guests verify with an email code first. 3. If the issue needs human follow-up, it is escalated into a tracked ticket and you get a ticket identifier. 4. Track the ticket on /support/my-tickets/:ticketId: read replies under Messages, answer with the Reply box ("Write your reply..."), and reopen it if needed. 5. The ticket closes when the issue is resolved.

Steps

Step 1: Open the support page and start a conversation

Open /support (the Help menu links here). Start a new support conversation and describe what went wrong. The page tells you when escalation is best: "Urgent booking or support failures where normal chat was not enough." Attach an image with "Attach image" when the issue is visible.

> **Expected result:** A support conversation opens and your first message is sent.

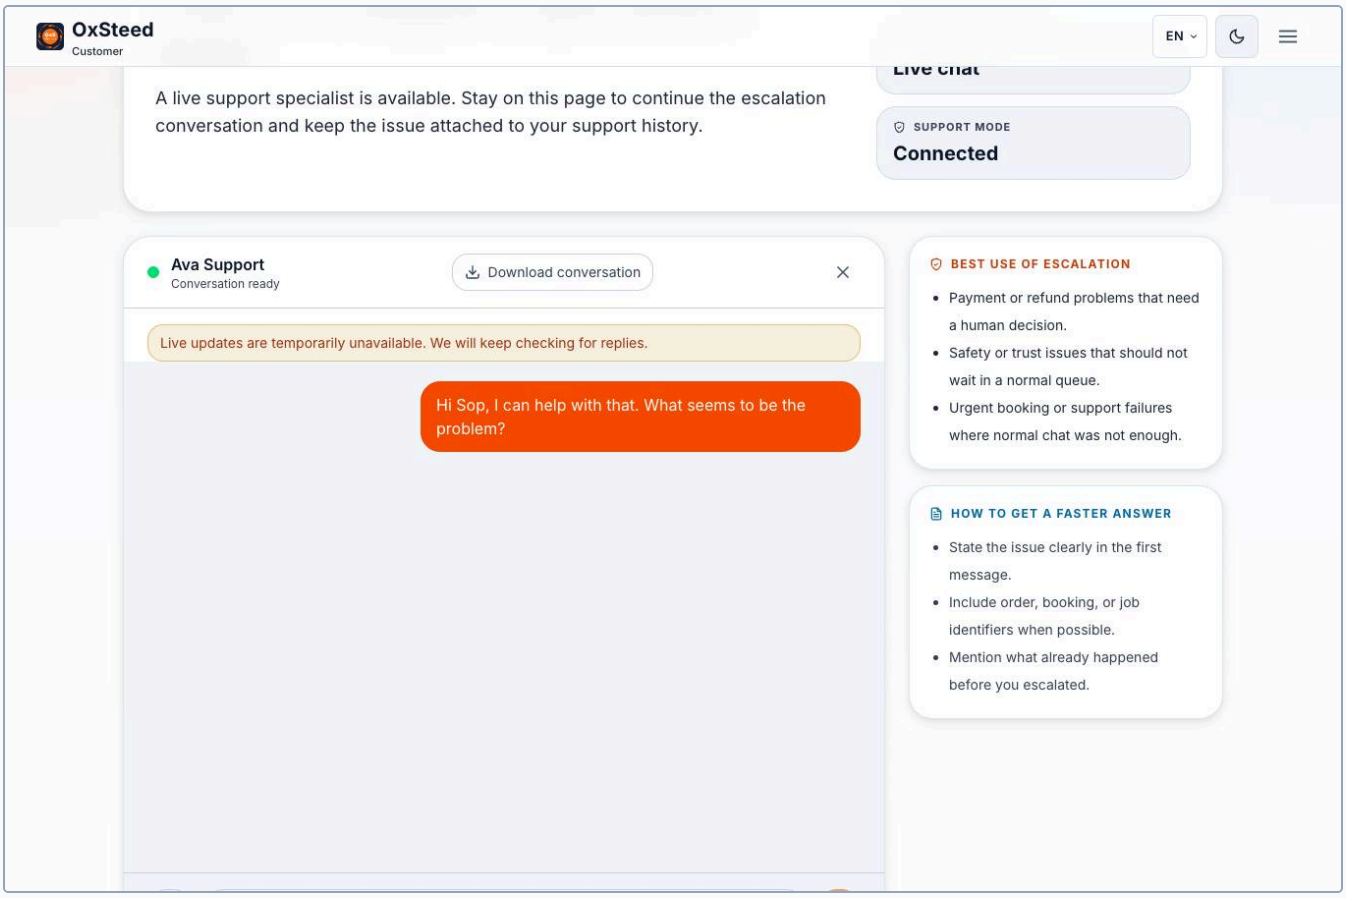

Figure 1. Starting a support conversation, desktop view. *(Image description: Synthetic example: Talk to a support specialist now.)*

Step 2: Escalate to a tracked ticket when needed

For issues that need a human decision (payment or refund problems, safety or trust issues), escalate the conversation. The page explains "What happens after you submit": the escalation becomes a tracked ticket, the team can follow up by email, and "You get a ticket identifier to reference if the issue continues." Save that identifier.

> **Expected result:** You receive a ticket identifier for the tracked ticket.

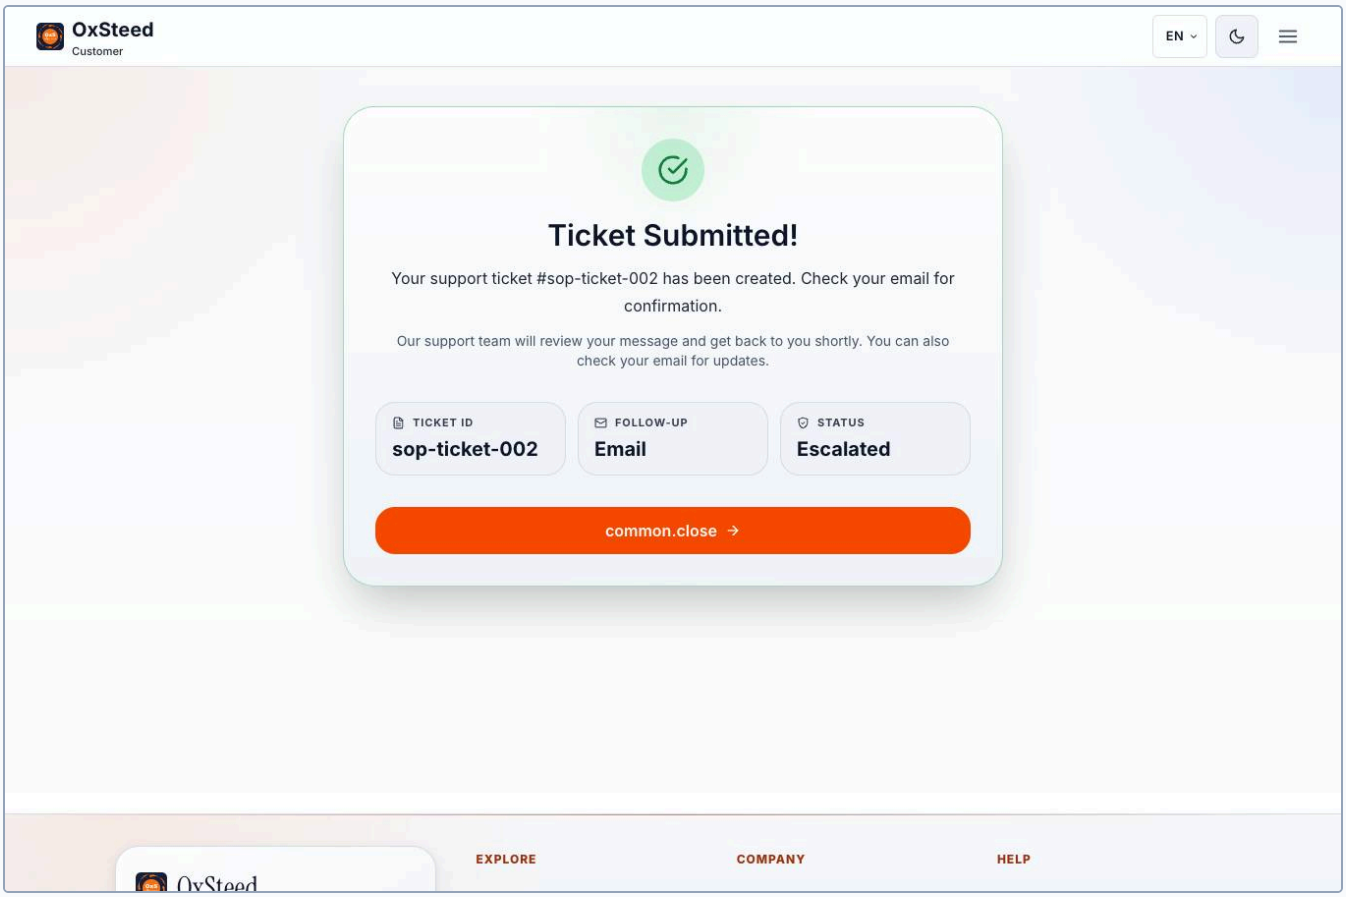

Figure 2. The escalation confirmation with your ticket identifier. *(Image description: Escalation confirmation with the ticket identifier)*

Step 3: Track the ticket and reply to the team

Open your ticket (signed-in users: your tickets list; guests: the ticket link from email). The ticket page shows Category, Priority, and Created, with the "Messages" thread. Write in the Reply box (placeholder "Write your reply...") and choose Reply. If the ticket was closed but the issue continues, reopen it from the support center.

> **Expected result:** Your reply appears in the Messages thread and the team is notified.

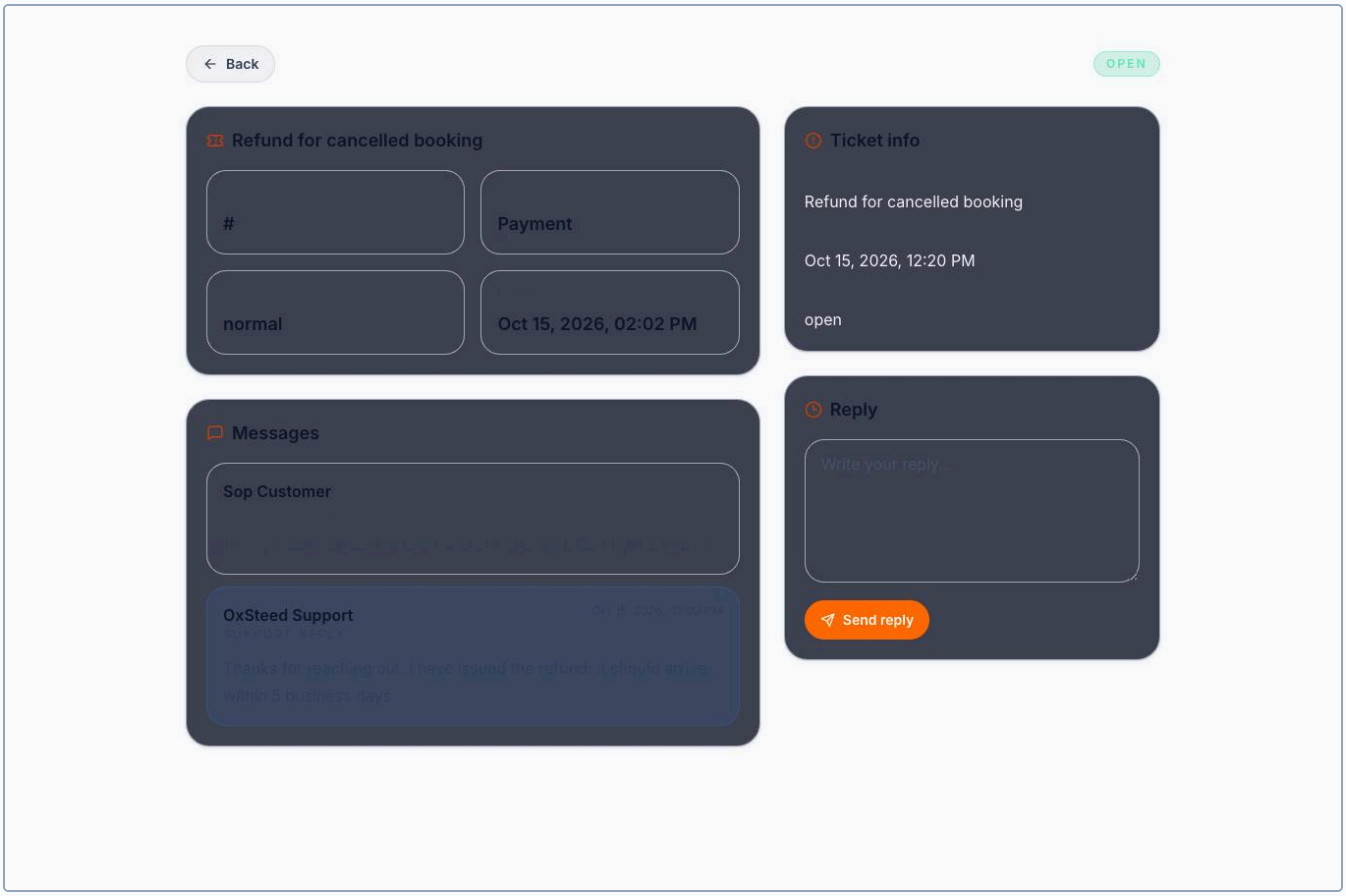

Figure 3. The ticket detail page, desktop view. *(Image description: Ticket detail page with the messages thread and reply box)*

Confirm it worked

The ticket page shows your messages and the team's replies; closed tickets say so and can be reopened.

If something goes wrong

Problem	What to do

The conversation will not verify (guest).	Use the exact email you started the conversation with and enter the code before it expires. Choose the resend option if nothing arrives.
The ticket page fails to load.	Reload and check you opened the current ticket link. If the error persists, start a fresh conversation and reference your ticket identifier.

Need help?

For urgent safety issues, use the direct contact option on the escalation page ("Need a faster response?").

Guide ID: business-work-attention-inbox | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Work the attention inbox

Guide ID	**business-work-attention-inbox**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/work-the-attention-inbox

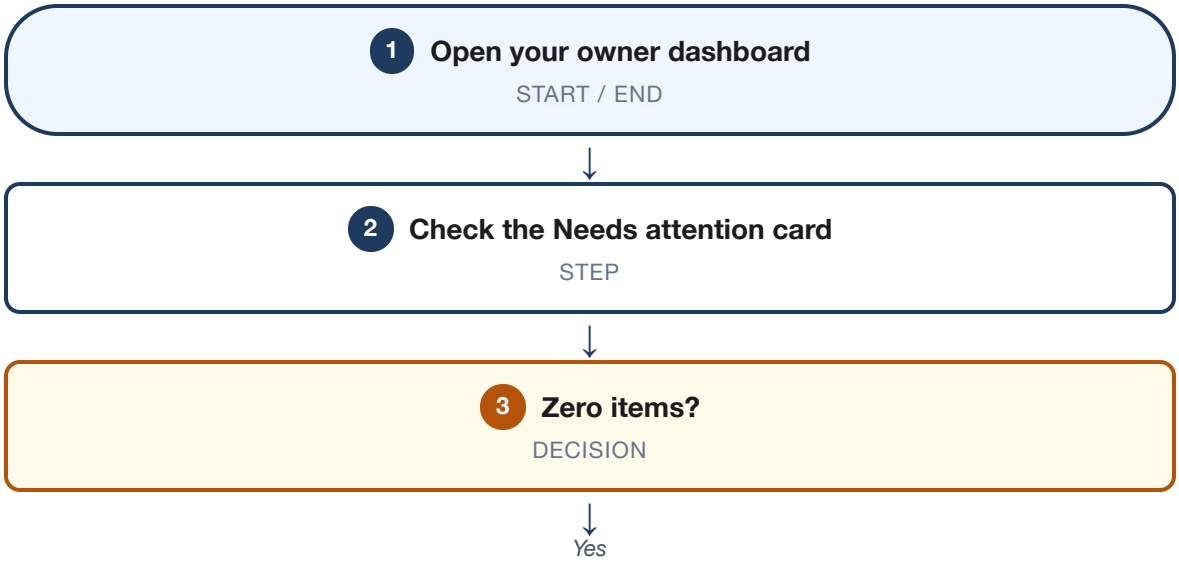

Goal

Clear every item that needs your attention across all your businesses in one place.

Before you start

1. Sign in as a business owner (or manager with access). The dashboard renders the business owner view in business_owner mode.
2. Own or manage at least one business.

Process map

4 Inbox clear

START / END

- *No:* Zero items? → Open the Attention inbox
- Open the Attention inbox → Work each task (open the full page or act inline)
- Work each task (open the full page or act inline) → Back to attention for the next item
- Back to attention for the next item → Work each task (open the full page or act inline)
- *All resolved:* Back to attention for the next item → Inbox clear

Text version. 1. Open your business owner dashboard. 2. Check the Needs attention card for the open item count. 3. If it is zero, you are done. Otherwise open the Attention inbox. 4. Work each task: open its full page or act inline. 5. Go back to attention for the next item. 6. When every item is resolved, the inbox is clear.

Steps

Step 1: Open your owner dashboard

Open /dashboard in business_owner mode. The dashboard aggregates every business you own or manage into per-business cards plus a Needs attention card with the open item count.

> **Expected result:** The dashboard loads with the Needs attention card showing a count.

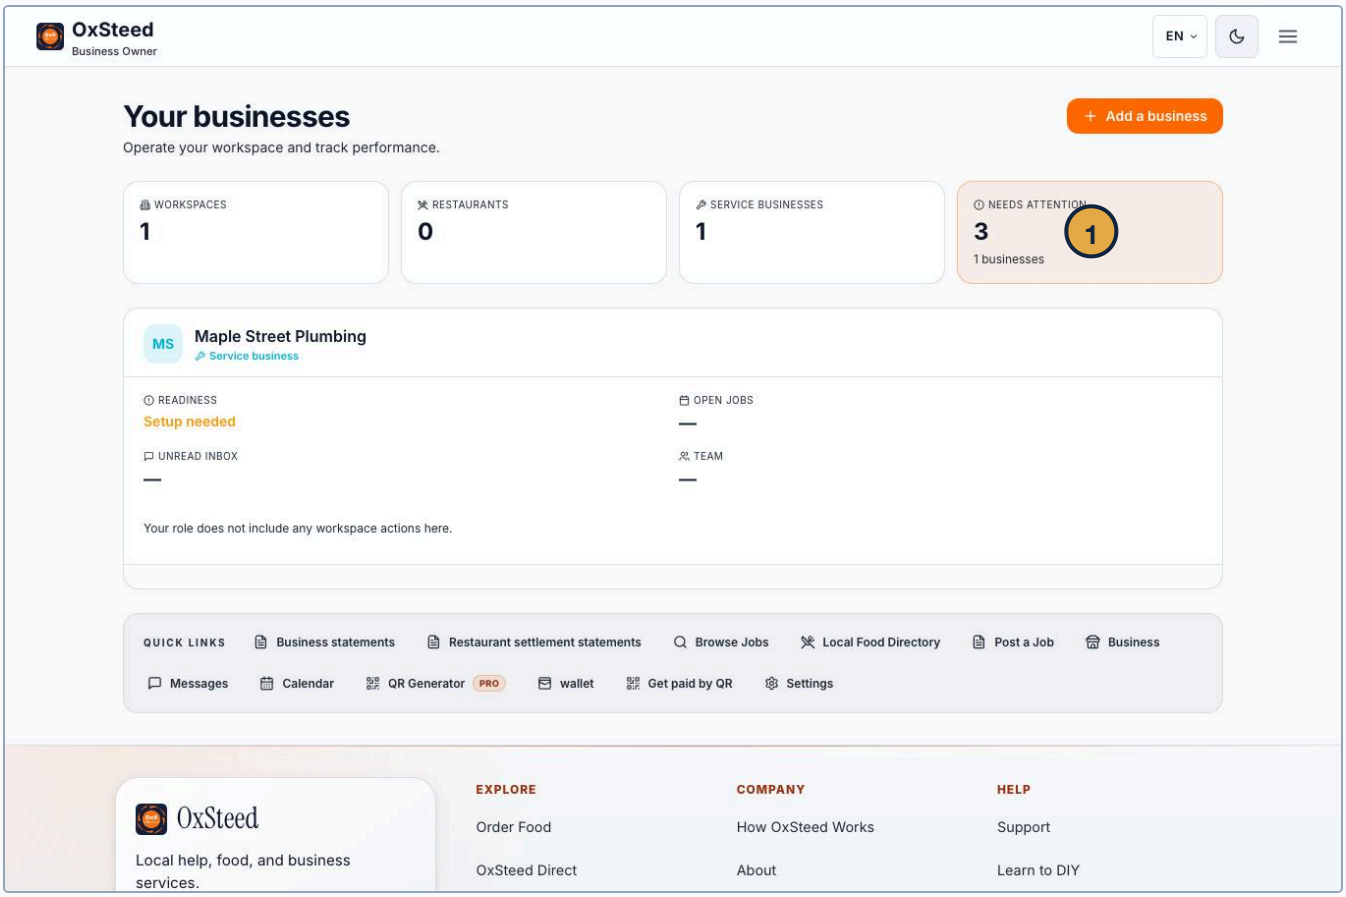

Figure 1. The owner dashboard, desktop view. *(Image description: Synthetic example: Your businesses)*

1. **1.** Needs attention card

Step 2: Open the Attention inbox

Choose the Needs attention card. The Attention inbox dialog opens ("Every open item across your businesses, in one place."), listing every open item. The page behind stays mounted, so your scroll position and business selection are preserved.

> **Expected result:** The Attention inbox dialog opens with the item list.

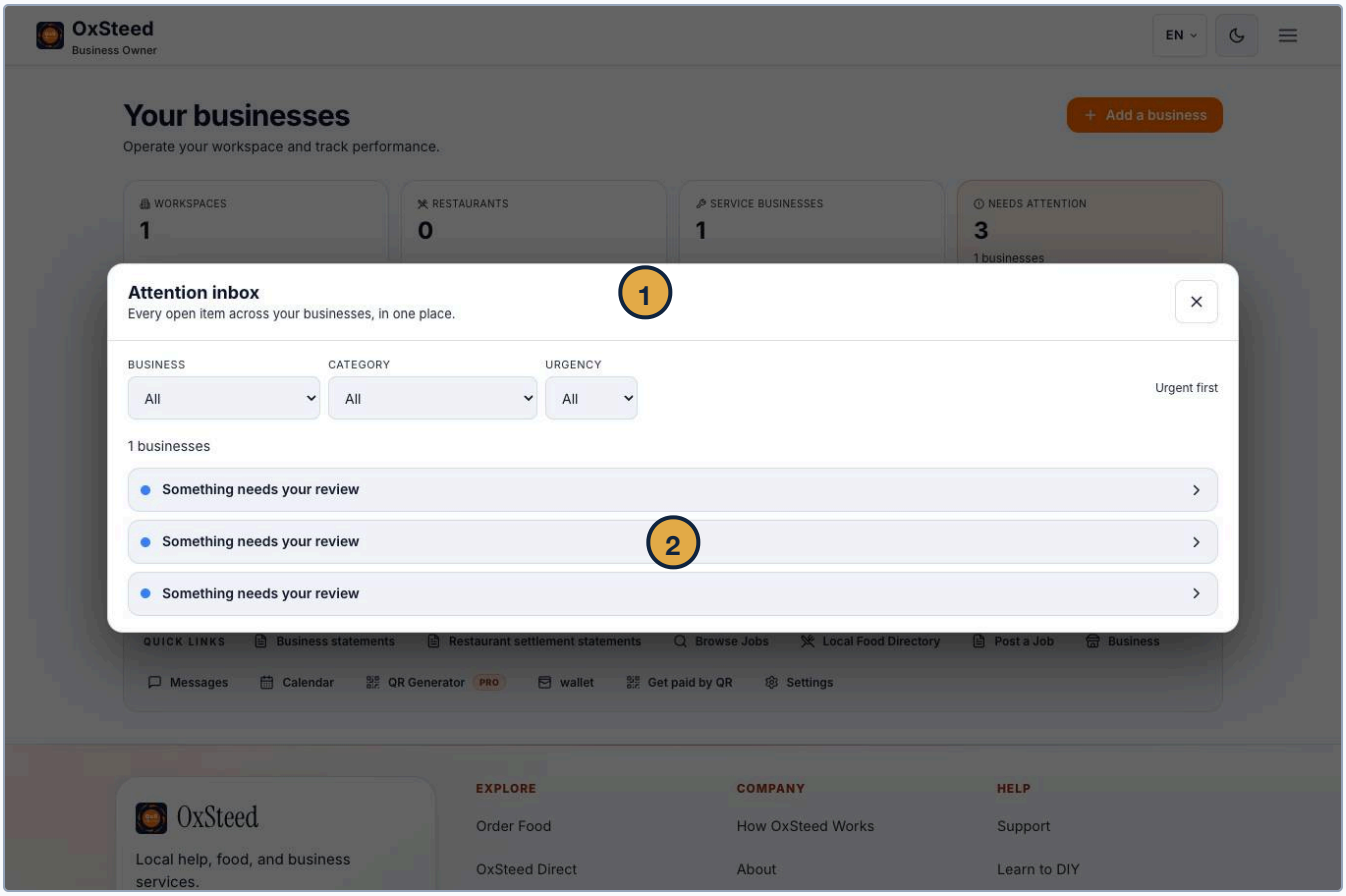

Figure 2. The Attention inbox, desktop view. *(Image description: Synthetic example: Your businesses)*

1. **1.** Attention inbox title
2. **2.** Open items list

Step 3: Work each item

Choose an item to open its task view. Work it inline, or choose Open full page to handle it in its own page. When you finish, choose Back to attention to return to the list and pick the next item. Resolved tasks leave the list.

> **Expected result:** Each worked item resolves and drops off the list.

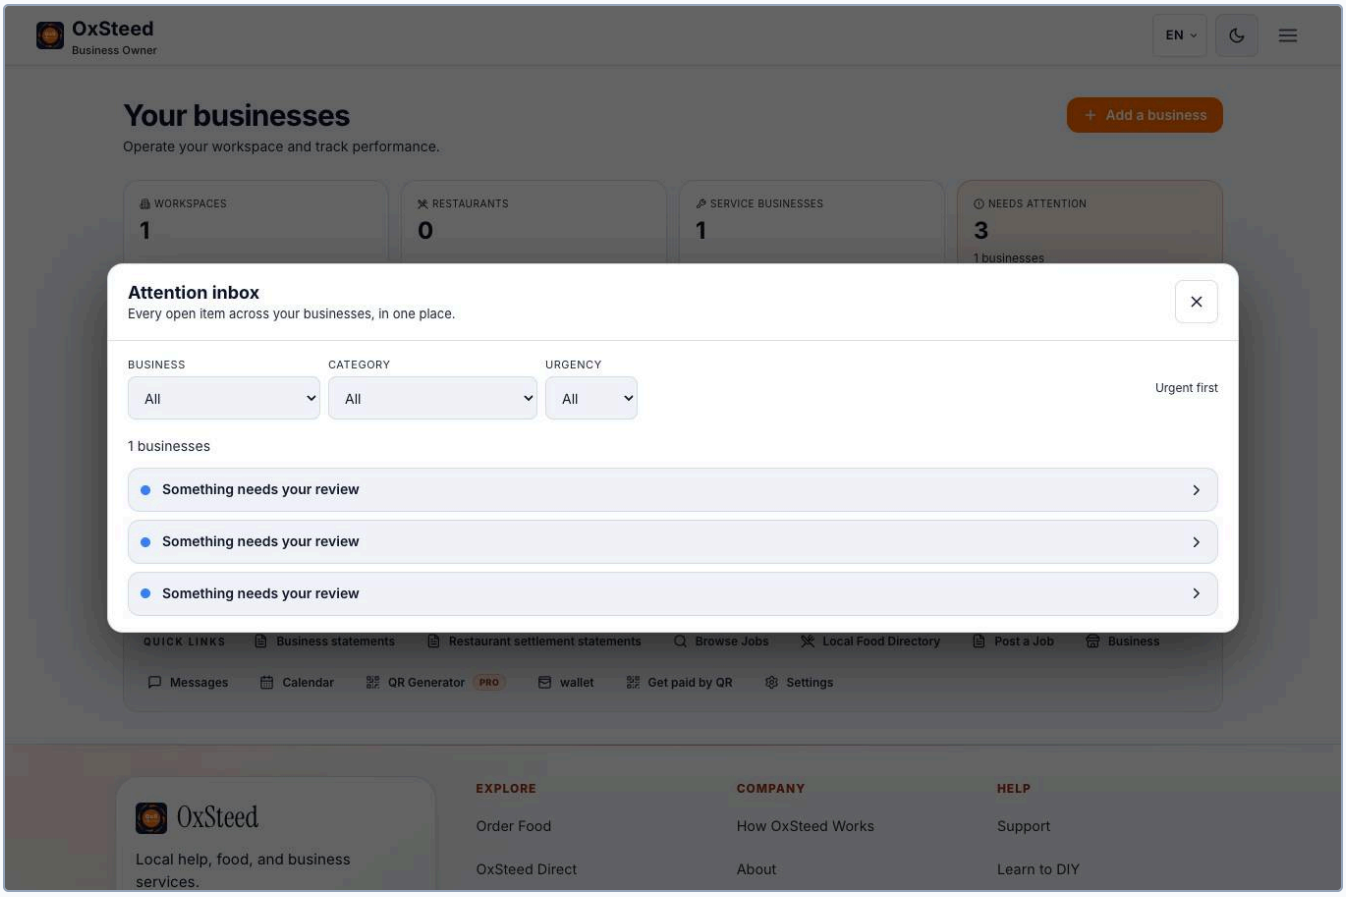

Figure 3. Working an attention item, desktop view. *(Image description: Synthetic example: Your businesses)*

Confirm it worked

The Needs attention count drops to zero and the inbox shows no open items.

If something goes wrong

Problem	What to do

The count does not drop after you worked an item.	Close and reopen the inbox; the count refreshes from the server. If an item persists, open its full page to see what is still incomplete.
You see "Access revoked" on a task.	Your access to that business changed. Ask the business owner to re-grant your role.

Need help?

If the attention inbox fails to load, contact OxSteed Support from the /support page.

SOP LIBRARY / BUSINESS **ENGLISH**

Manage business clients

Guide ID	**business-work-clients**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/manage-business-clients

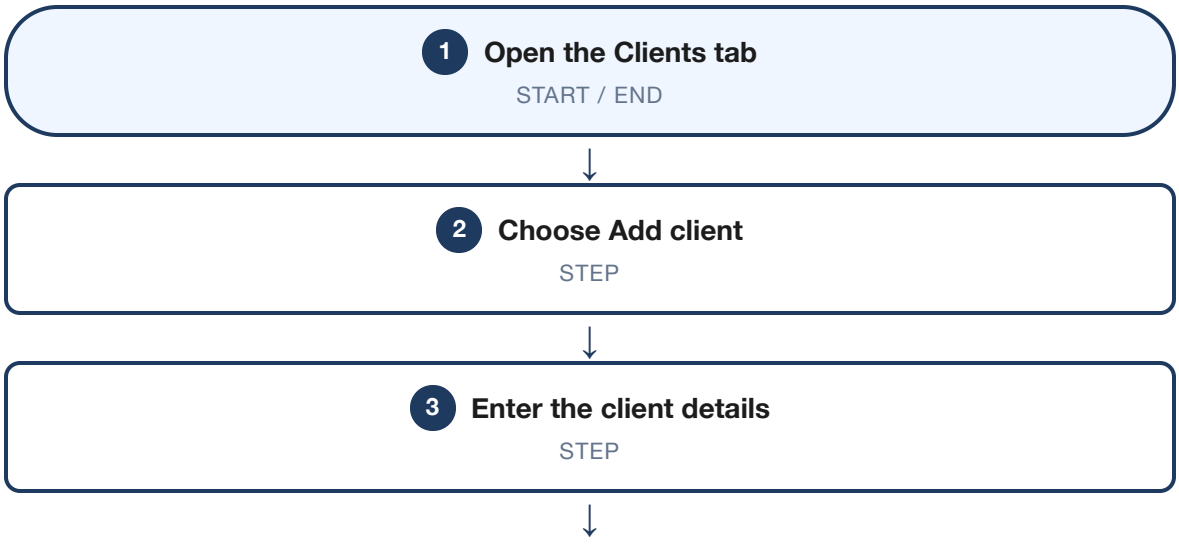

Goal

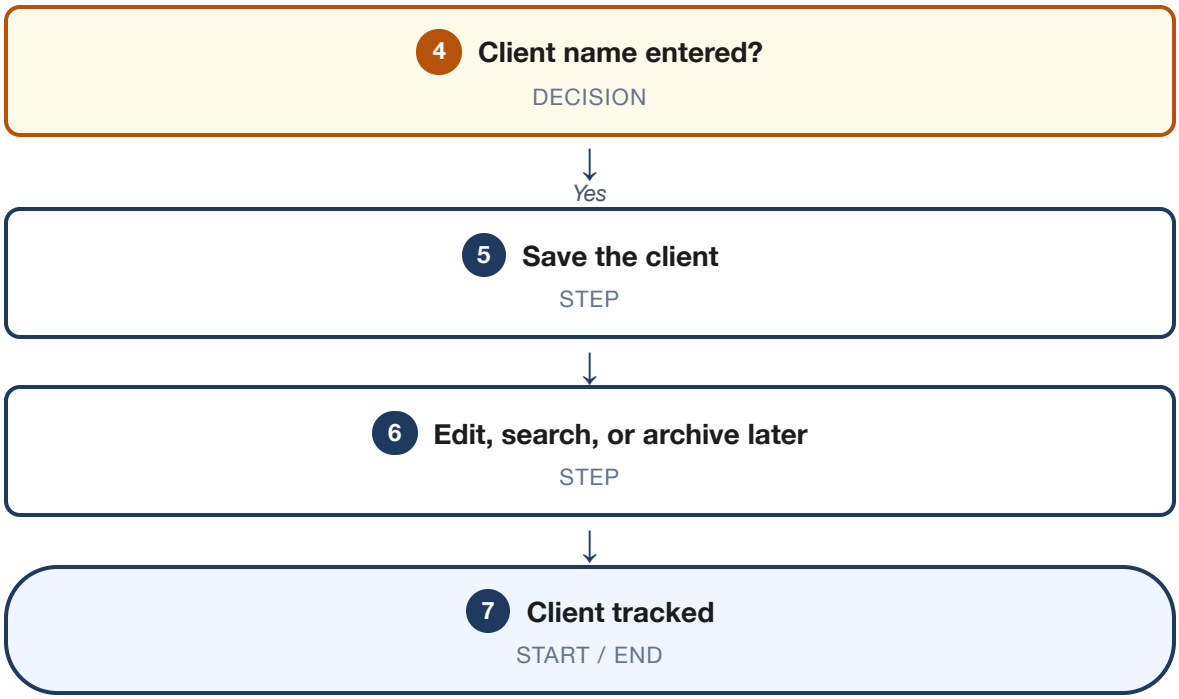

Keep a clean, searchable client list for your business with notes and lifetime value.

Before you start

1. Sign in and open your business in the business hub.
2. Owner or manager capability to edit the business profile.

Process map

- *No:* Client name entered? → Enter the client name
- Enter the client name → Client name entered?

Text version. 1. Open the Clients tab in the business hub. 2. Choose Add client. 3. Enter the client details: name, email, phone, address, status, preferred contact, tags, and internal notes. 4. Check that the client name is entered; if not, enter it and check again. 5. Save the client. 6. Edit, search, or archive clients any time. 7. The client is tracked in your business list.

Steps

Step 1: Open the Clients tab

Open /business-hub?tab=clients for your business. The tab shows your client list with search ("Search by name, email, phone, or tags") and per-client stats: Jobs, Lifetime value, and Last job.

> **Expected result:** Your client list loads.

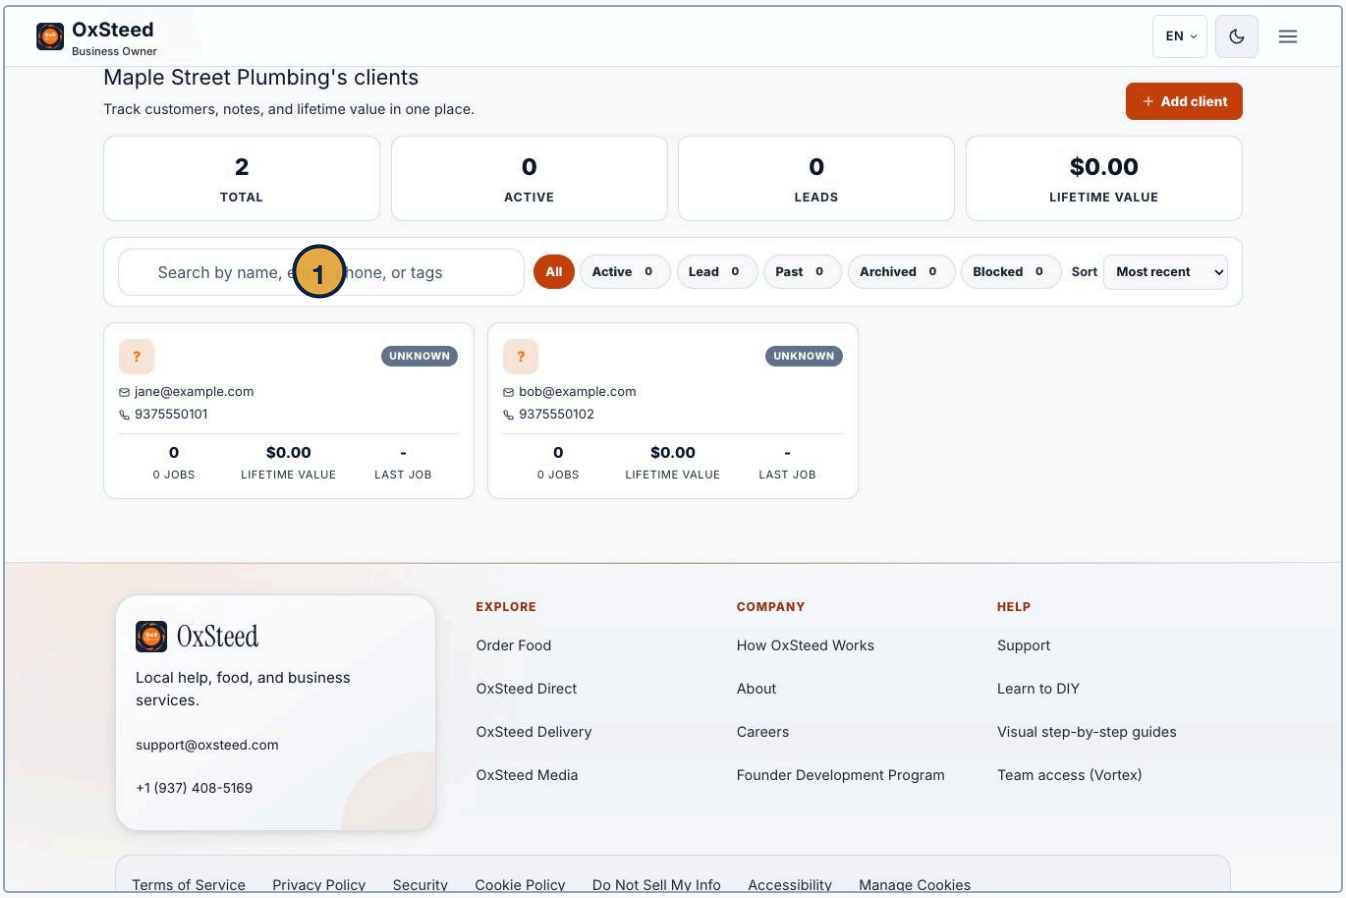

Figure 1. The Clients tab, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Search box

Step 2: Add a client

Choose Add client. In the dialog, enter the Client name (required), Email, and Phone. Add the address (street, city, state, zip), the client status, the preferred contact method (email, phone, or sms), comma-separated tags, and internal notes for your team.

> **Expected result:** The client saves and appears in the list.

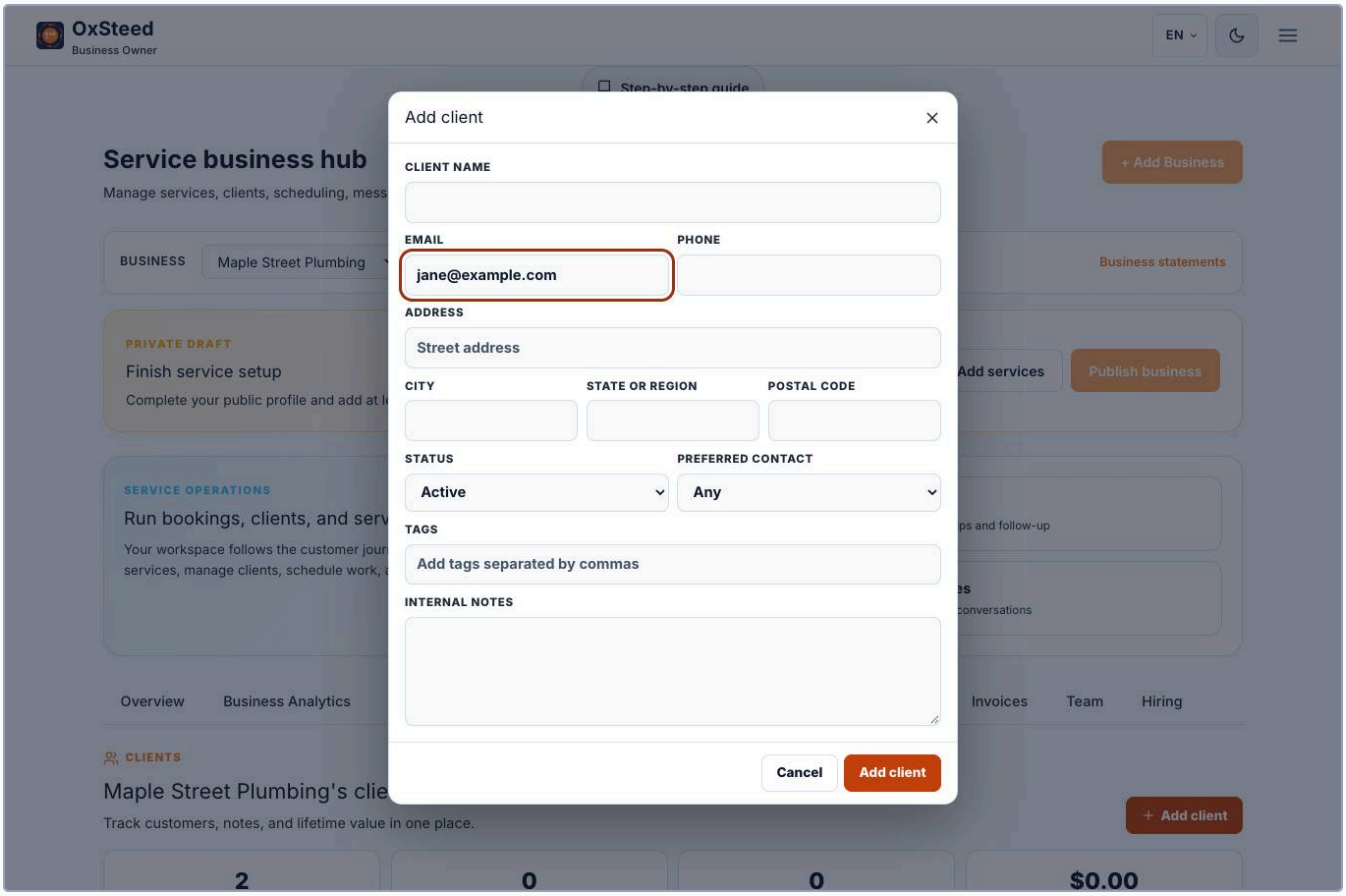

Figure 2. The Add client dialog, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 3: Edit, search, or archive clients

Edit a client from their card when contact details change. Use the search box to find clients by name, email, phone, or tags. Use Archive on a client card to retire a client (with a confirmation prompt); archived clients leave the active list.

> **Expected result:** Edits save; archived clients no longer appear in the active list.

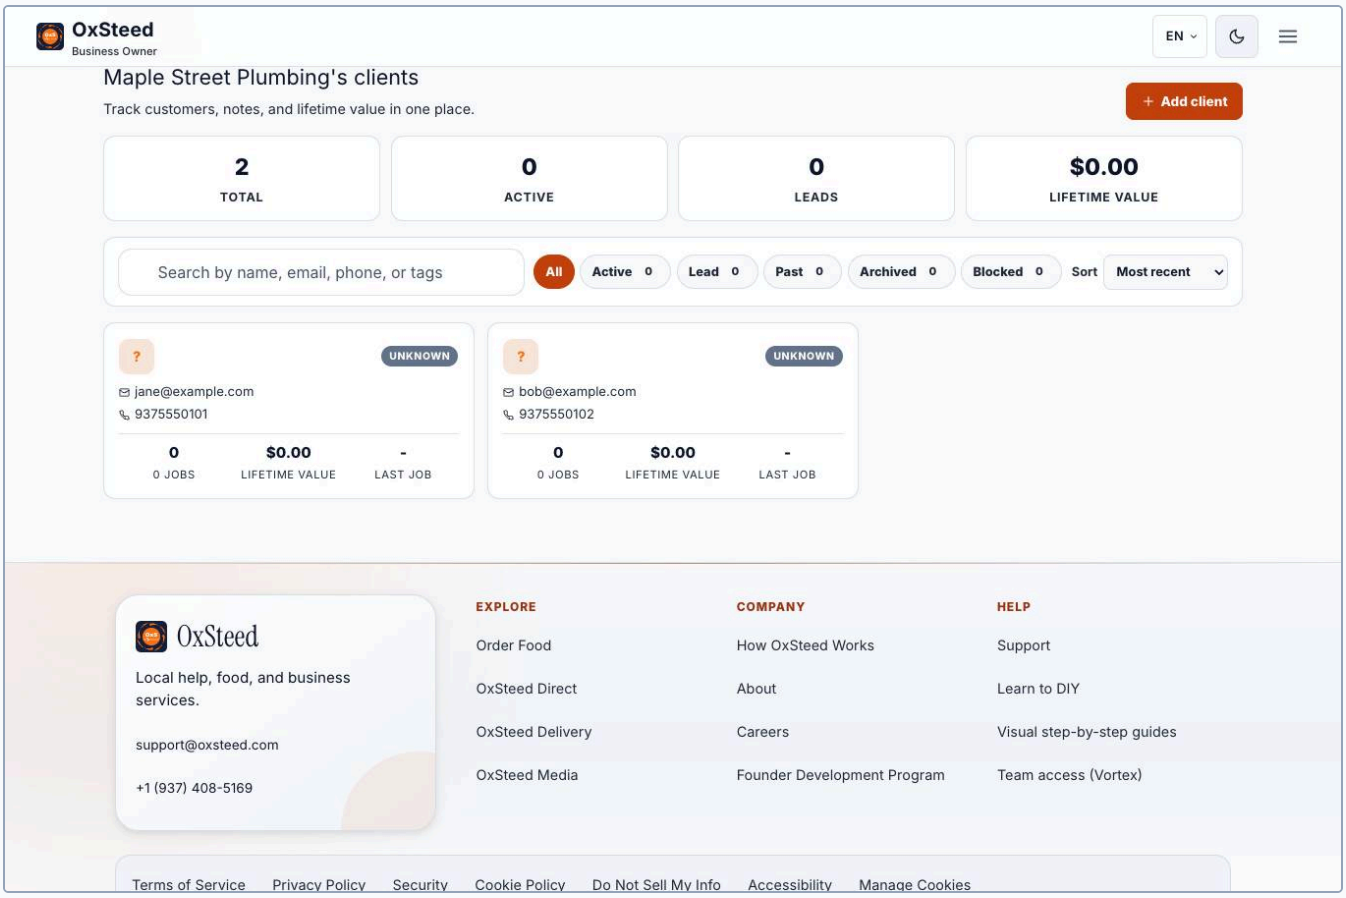

Figure 3. Managing a client, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

The client appears in the Clients tab with correct details and lifetime stats.

If something goes wrong

Problem	What to do
The client does not save.	The client name is required. Enter it and save again.

You archived a client by mistake.	Archiving removes the client from the active list. Re-add the client with their details to restore them.

Need help?

If clients fail to load or save, contact OxSteed Support from the /support page.

SOP LIBRARY / BUSINESS **ENGLISH**

Invoice clients as a business

Guide ID	**business-work-invoices**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/invoice-clients-as-business

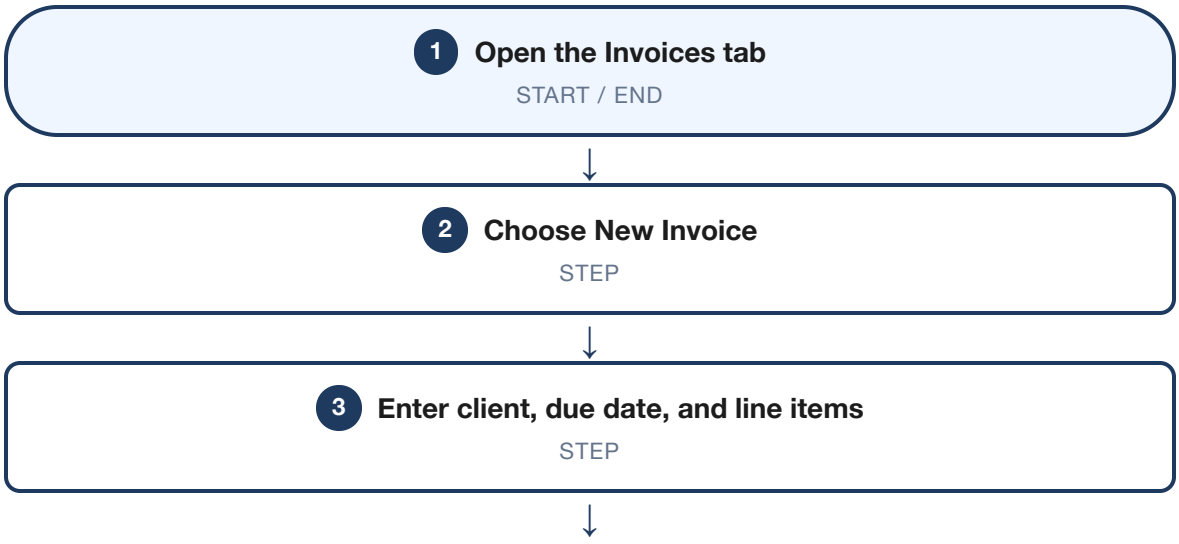

Goal

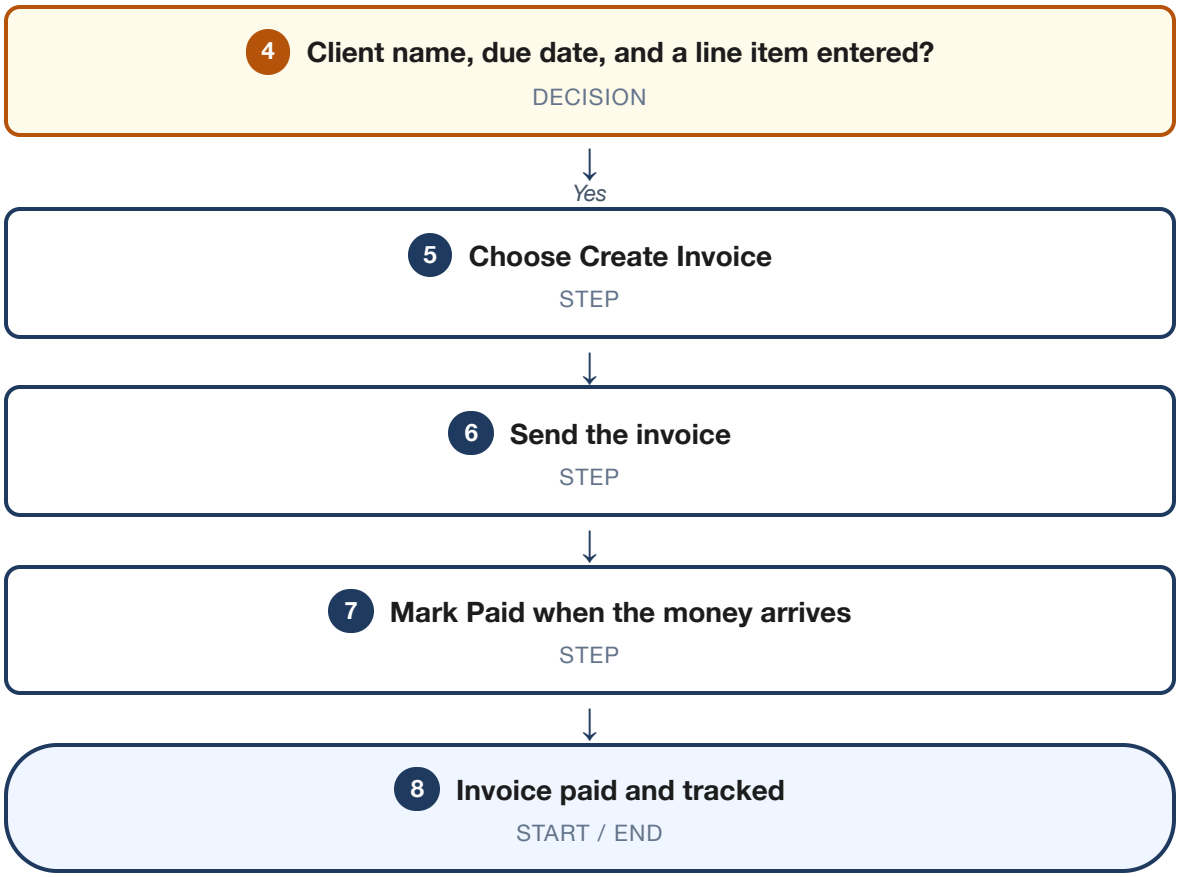

Bill business clients accurately and track every invoice from draft to paid.

Before you start

1. Sign in and open your business in the business hub.
2. Add the client first if they are not in your client list.

Process map

- *No:* Client name, due date, and a line item entered? → Fill the required fields
- Fill the required fields → Client name, due date, and a line item entered?

Text version. 1. Open the Invoices tab in the business hub. 2. Choose New Invoice. 3. Enter the client name, due date, and line items. 4. Check that the client name, due date, and at least one line item are entered; if not, fill them in and check again. 5. Choose Create Invoice. 6. Send the invoice to the client. 7. Mark it Paid when the money arrives. 8. The invoice is tracked to completion.

Steps

Step 1: Open the Invoices tab

Open /business-hub?tab=invoices for your business. The Invoices section shows KPIs for Draft, Sent, Paid, Overdue, and Outstanding totals, plus the invoice table.

> **Expected result:** Your invoices load with correct statuses and totals.

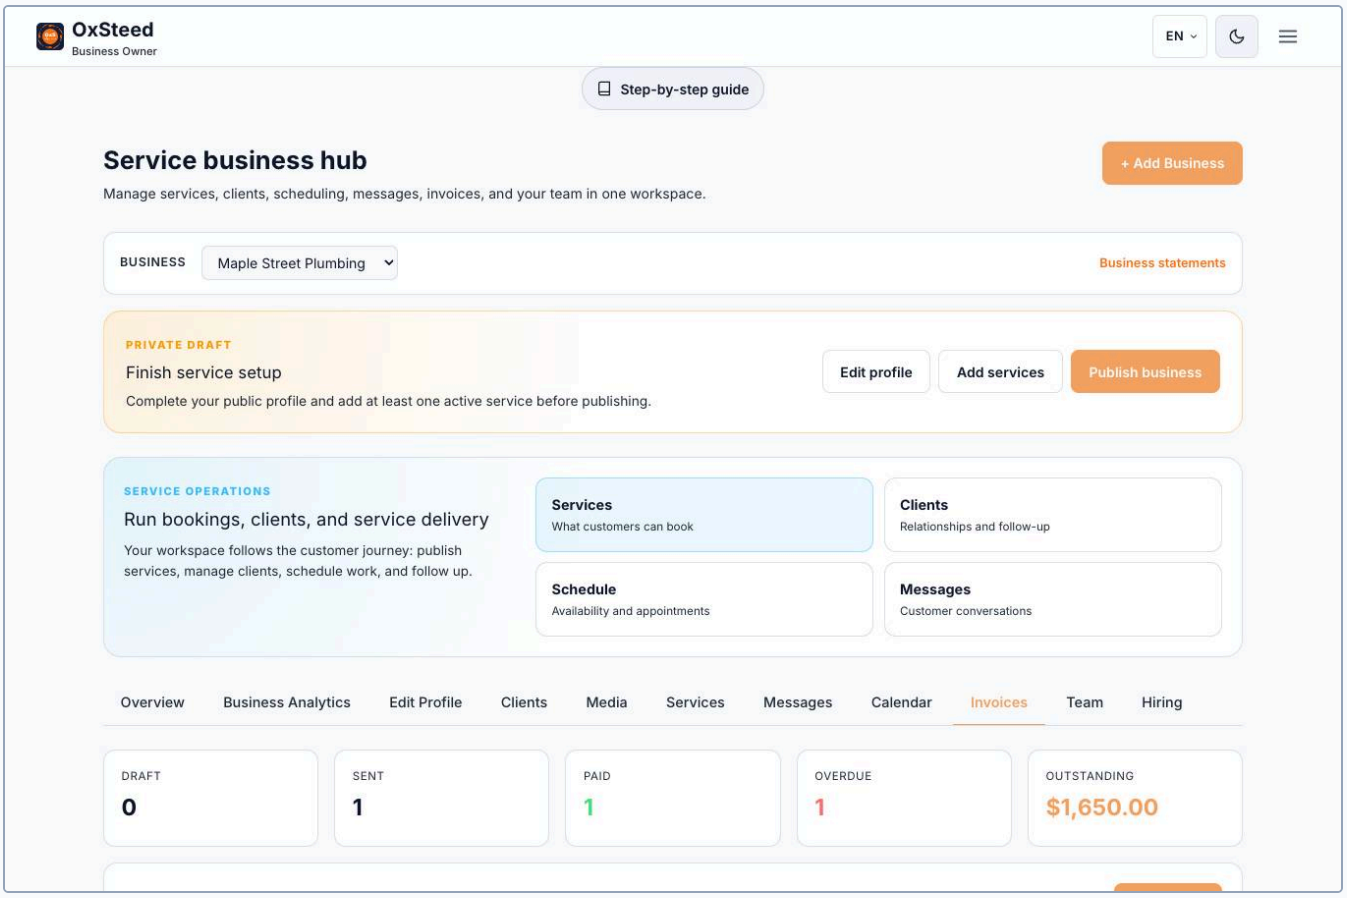

Figure 1. The Invoices tab, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 2: Create a new invoice

Choose the + New Invoice button. In the New Invoice dialog, enter the Client Name, Client Email, Company, and Due Date. Set the Tax Rate and the Status (Draft, Sent, Paid, or Cancelled).

> **Expected result:** The dialog shows your entries with a running total.

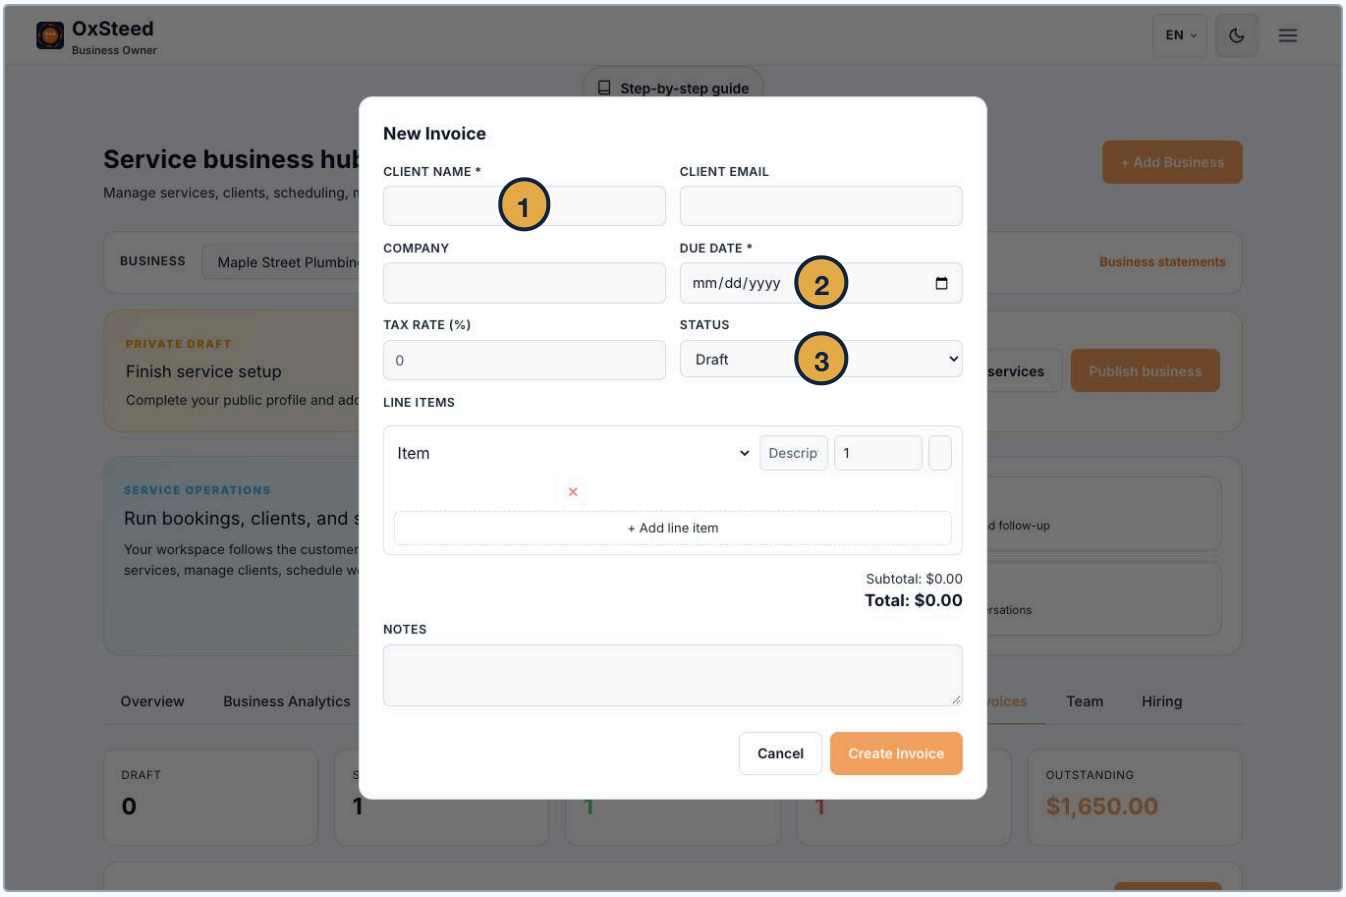

Figure 2. The New Invoice dialog, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Client Name field
2. **2.** Due Date field
3. **3.** Status select

Step 3: Add line items and save

In the Line Items section, add each charge: item, discount, or fee with a description, quantity, and unit price. Use Add Line Item for more lines. Check the Subtotal, Tax, and Total, add Notes if needed, then choose Create Invoice.

> **Expected result:** "Invoice created" appears and the invoice shows in the table as a draft.

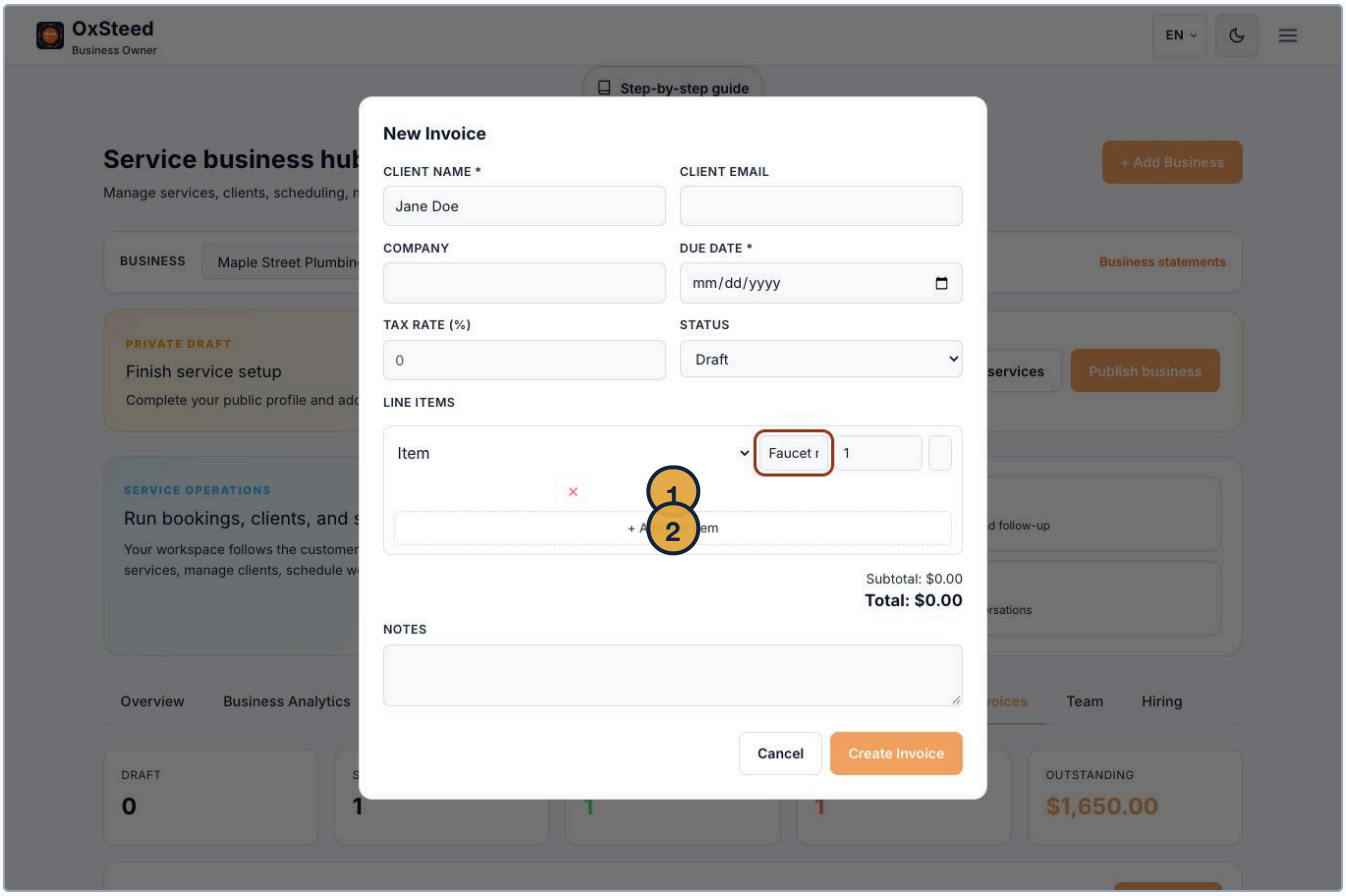

Figure 3. Adding line items, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Line items
2. **2.** Add Line Item

Step 4: Send and mark paid

On the invoice row, choose Send to email it to the client. When payment arrives, choose Mark Paid and enter the amount. Edit changes a draft; Delete removes it after confirmation.

> **Expected result:** The invoice status moves from Draft to Sent to Paid.

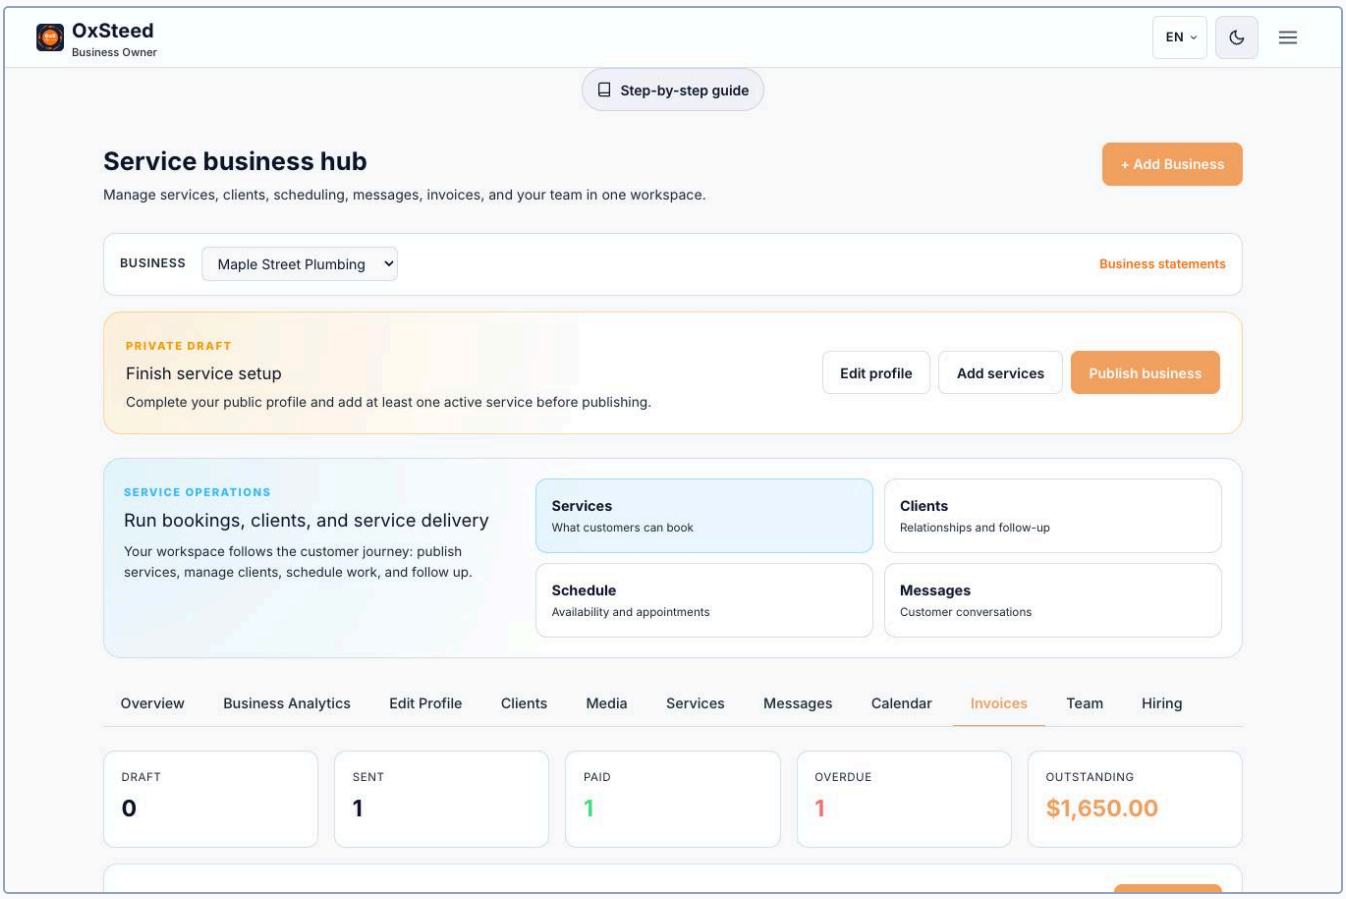

Figure 4. Working an invoice, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

The invoice shows status Paid (or Sent while awaiting payment) and the KPIs update.

If something goes wrong

Problem	What to do
The invoice does not save.	Client Name, Due Date, and at least one line item are required. Fill them and choose Create Invoice again.

The client never got the invoice.	Open the public invoice link (/invoice/p/:token) and share it directly, or send the invoice again from the row.

Need help?

If invoices fail to send, contact OxSteed Support from the /support page.

Guide ID: business-work-jobs | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Post and manage jobs as a business

Guide ID	**business-work-jobs**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/post-and-manage-jobs-as-business

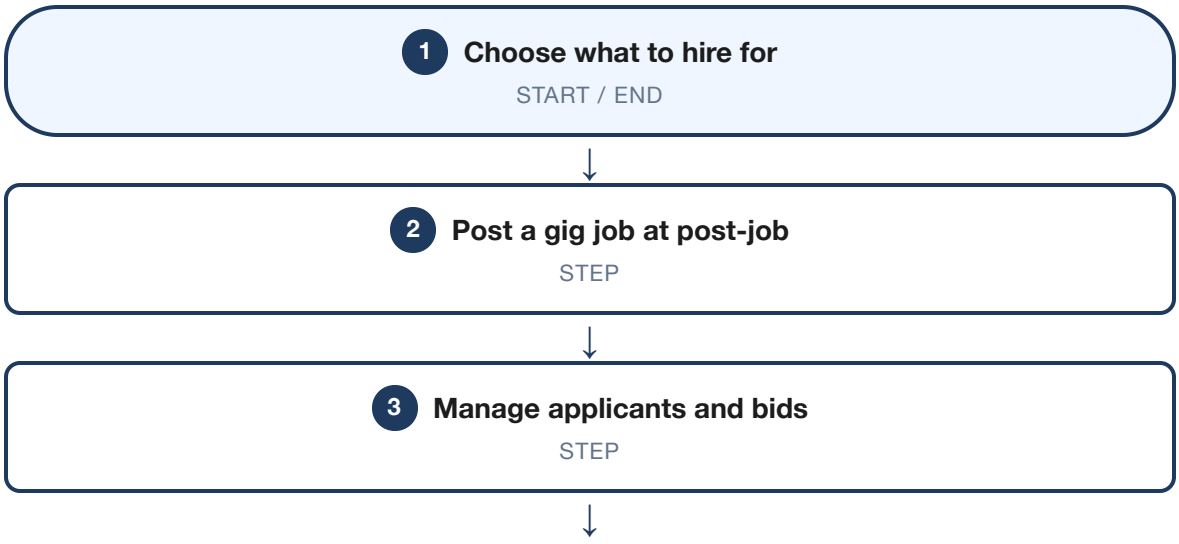

Goal

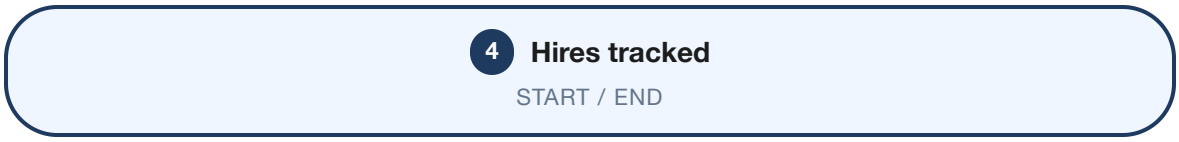

Post gig jobs for helpers and run hiring pipelines for team roles, all from your business.

Before you start

1. Sign in and open your business in the business hub.
2. Know the work, the location, and the budget for the job you want to post.

Process map

- Choose what to hire for → Post a team role in the Hiring tab
- Post a team role in the Hiring tab → Manage applicants and bids

Text version. 1. Decide whether you need gig work or a team role. 2. For gig work, post a job at /post-job using the standard wizard. 3. For team roles, post a role in the Hiring tab of the business hub. 4. Manage bids on gig jobs and move role applicants through the hiring pipeline. 5. Your hires are tracked.

Steps

Step 1: Post a gig job

Open /post-job. The wizard steps you through the job: describe the work ("Tell OxSteed what needs to get done."), define who is qualified to bid ("Define who is qualified to bid."), then review ("Check the post before it goes live."). Choose Post Job to publish.

> **Expected result:** The job goes live and helpers can send bids.

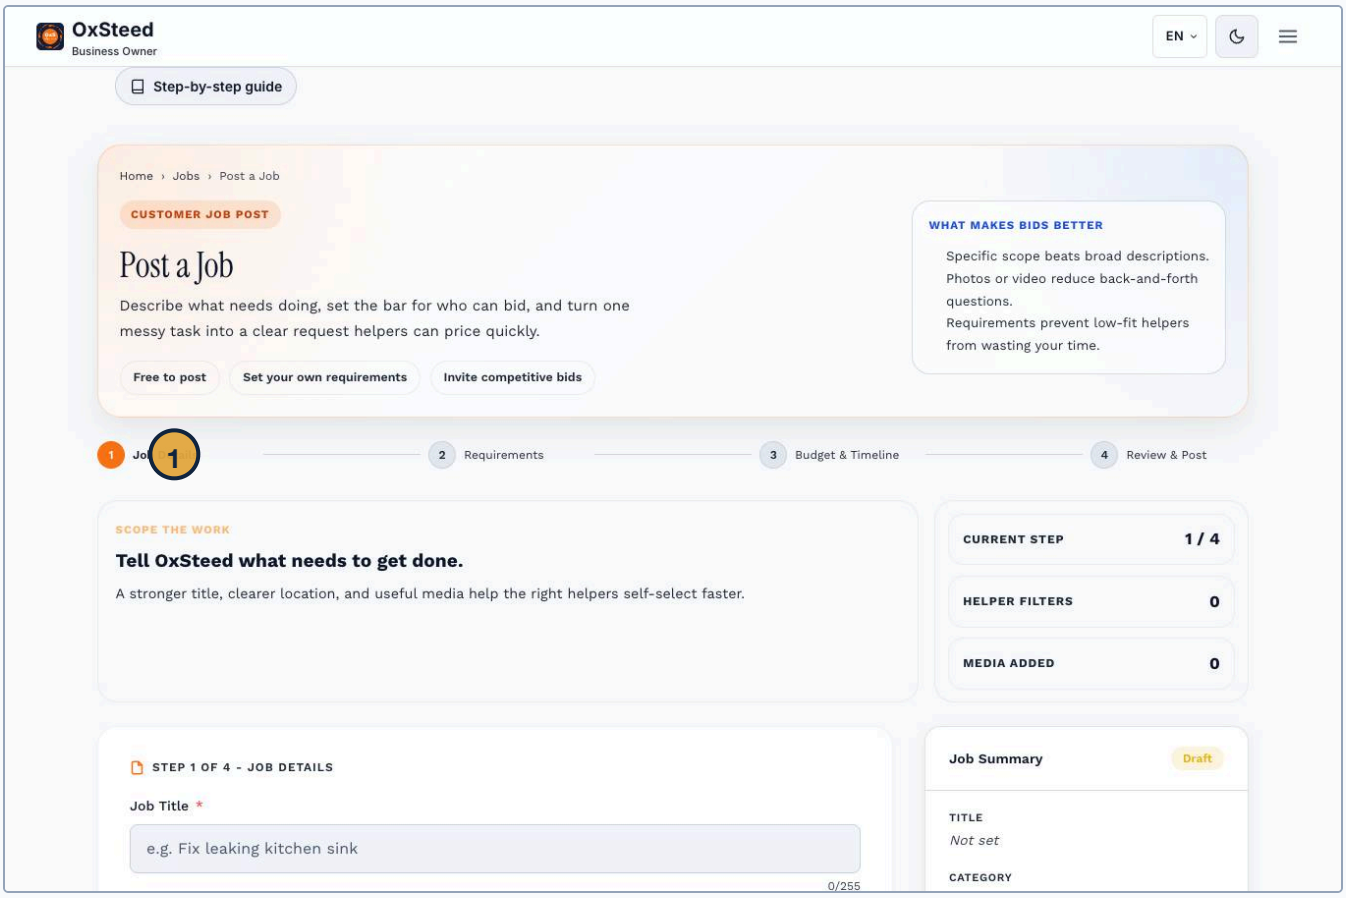

Figure 1. Posting a gig job, desktop view. *(Image description: Synthetic example: Post a Job)*

1. **1.** Job details step

Step 2: Manage gig jobs and bids

Manage posted jobs from My Jobs (/my-jobs): edit, cancel, assign, and mark jobs complete. Compare bids on each job and accept or decline them.

Expected result: Your jobs show current statuses and winning bids.

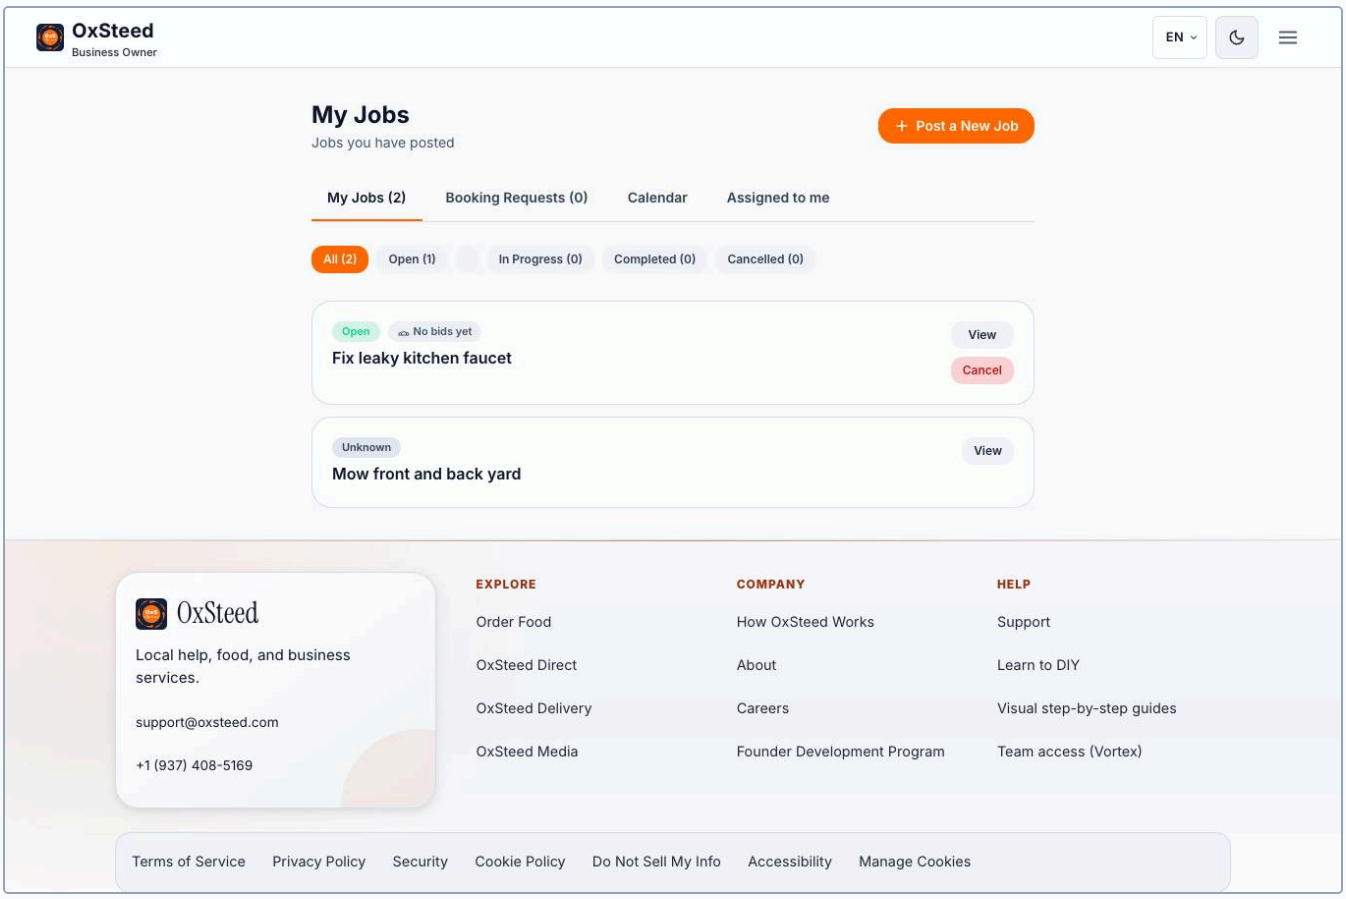

Figure 2. Managing posted jobs, desktop view. *(Image description: Synthetic example: My Jobs)*

Step 3: Post a team role in the Hiring tab

Open /business-hub?tab=hiring for your business. The Hiring pipeline board lets you post a role (choose Post a role) with title, department, employment type, location, pay, and description.

> **Expected result:** The role posts and appears on the pipeline board.

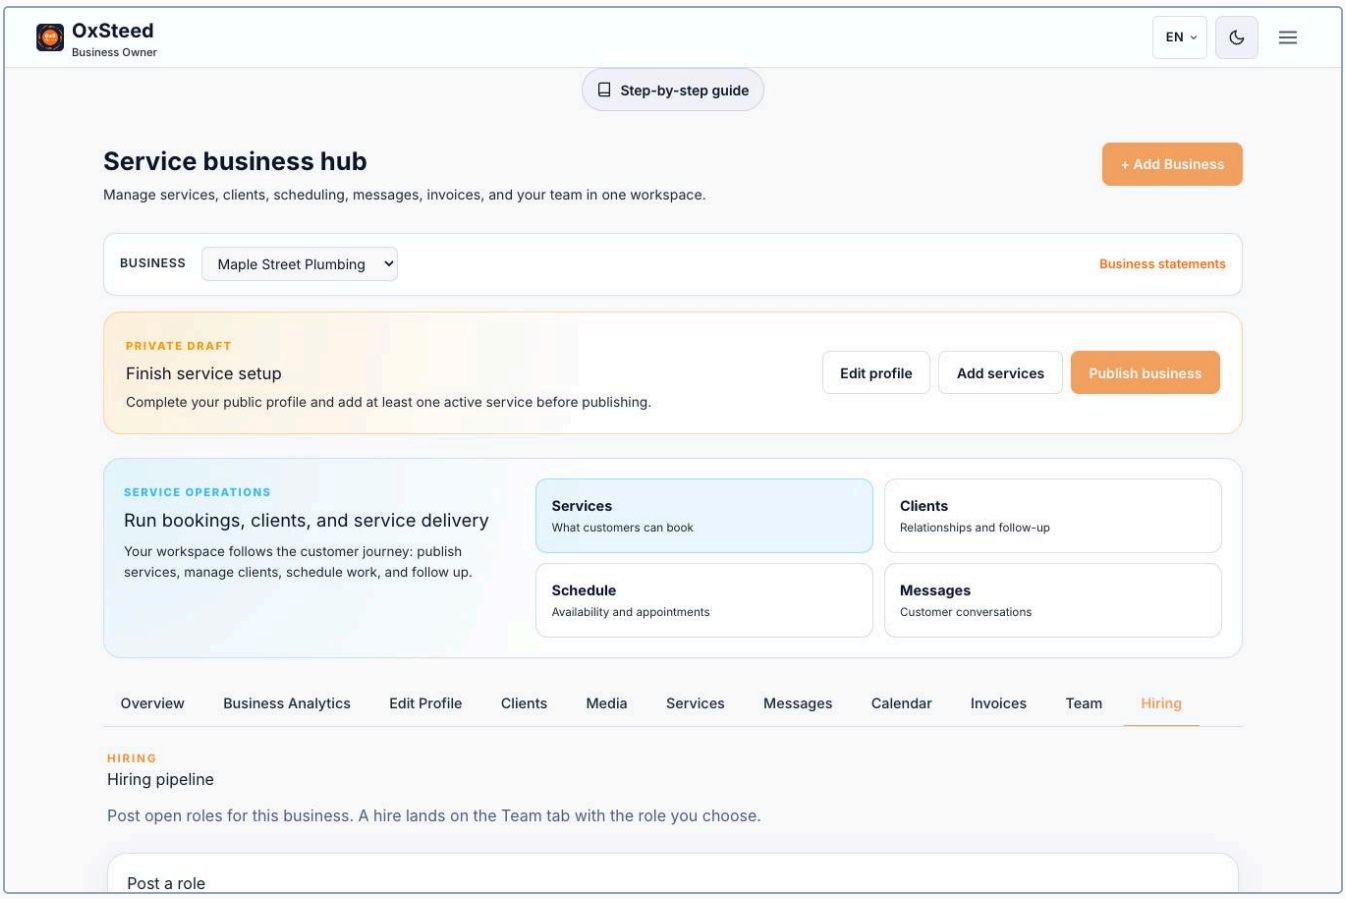

Figure 3. The Hiring tab, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 4: Move applicants through the pipeline

Choose a role to open its pipeline: stages run received, screening, interview, assessment, offer, and hired. Move applicants forward with the stage buttons, book interviews, send offers, and reject those who do not fit.

> **Expected result:** Applicants sit in the correct stage and offers go out.

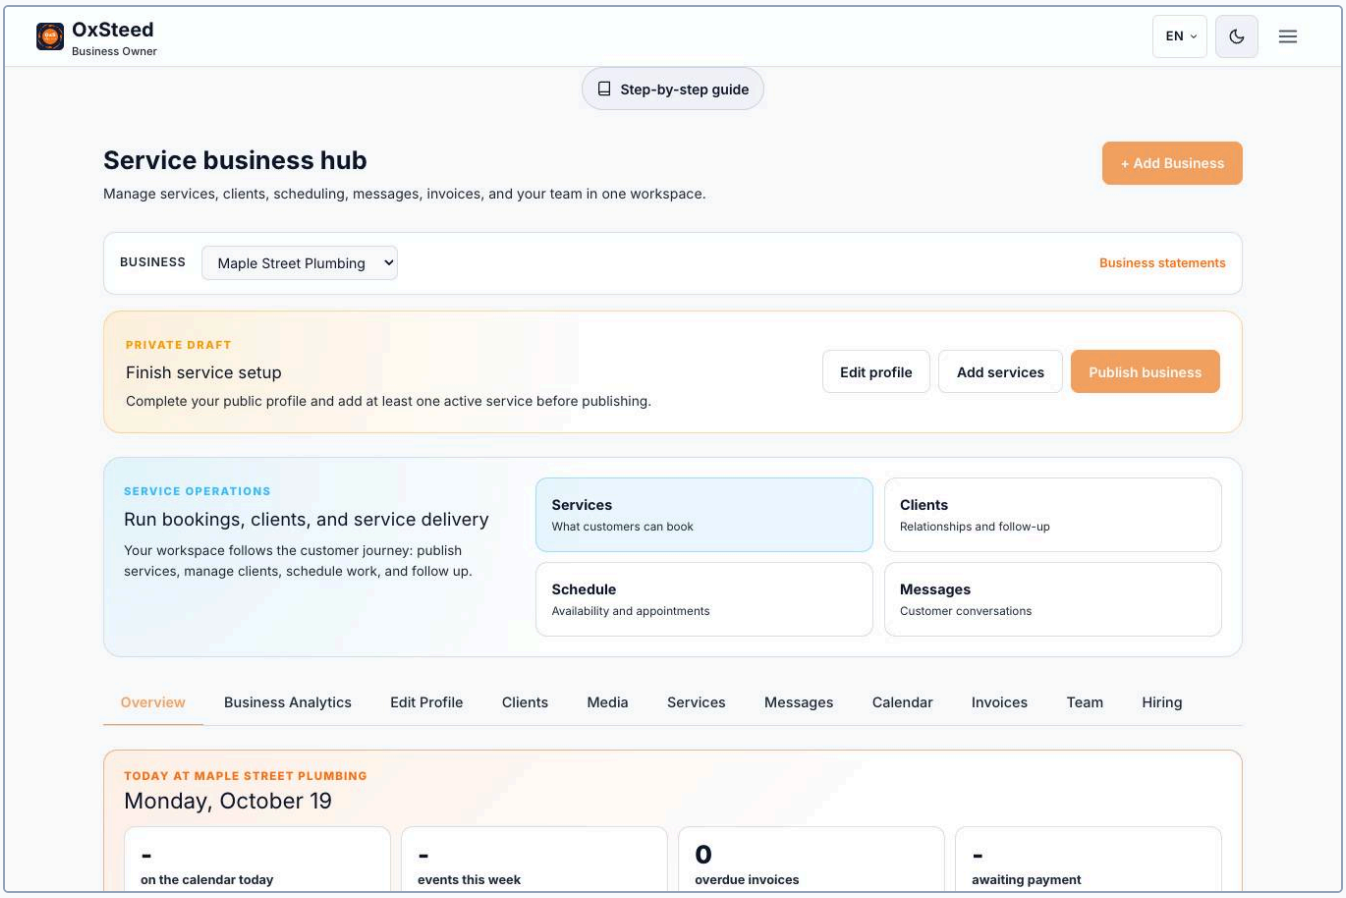

Figure 4. Working the hiring pipeline, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

Gig jobs show bids and statuses in My Jobs; team roles show applicants moving through pipeline stages.

If something goes wrong

Problem	What to do

The job posted but gets no bids.	Add photos and a more specific description, then edit the post. Clear pricing ranges attract more bids.
You cannot see the Hiring tab.	The Hiring tab needs owner or manager capability for the business. Ask the business owner to grant you access.

Need help?

If jobs fail to publish, contact OxSteed Support from the /support page.

Guide ID: business-work-scheduling | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Schedule appointments and manage staff schedules

Guide ID	**business-work-scheduling**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/schedule-appointments-and-staff

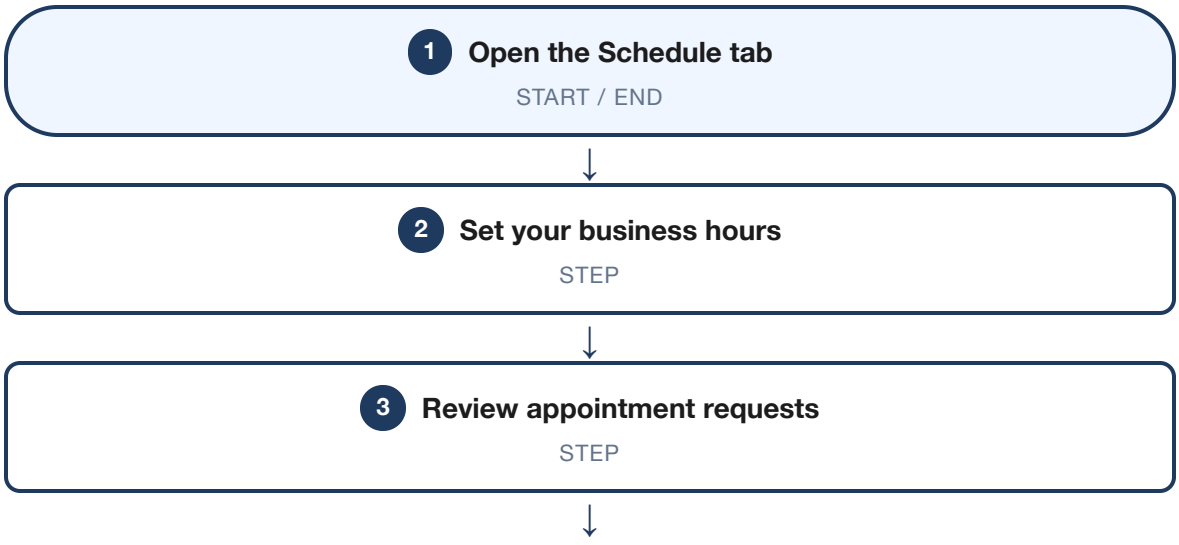

Goal

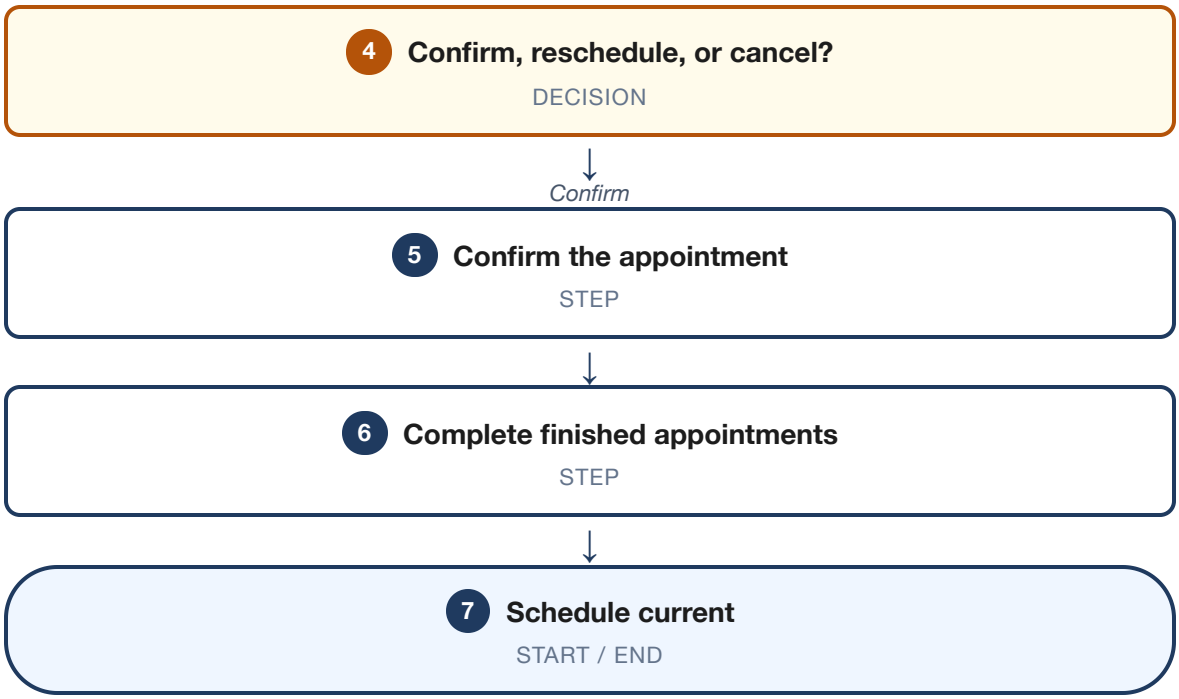

Keep business hours accurate and handle appointment requests without double-booking.

Before you start

1. Sign in and open your business in the business hub.
2. Add at least one bookable service.

Process map

- *Reschedule:* Confirm, reschedule, or cancel? → Reschedule with a new time
- *Cancel:* Confirm, reschedule, or cancel? → Cancel the appointment
- Reschedule with a new time → Complete finished appointments
- Cancel the appointment → Schedule current

Text version. 1. Open the Schedule tab in the business hub. 2. Set your business hours so customers can only book open times. 3. Review appointment requests in the Appointments section. 4. Decide: confirm the appointment, reschedule it with a new time, or cancel it. 5. After the work is done, complete the appointment. 6. Your schedule stays current and accurate.

Steps

Step 1: Open the Schedule tab

Open /business-hub?tab=calendar for your business. The Schedule tab combines business hours, appointments, the business calendar, and follow-up demand in one workspace.

> **Expected result:** The schedule workspace loads with Business Hours, Appointments, and Business Calendar sections.

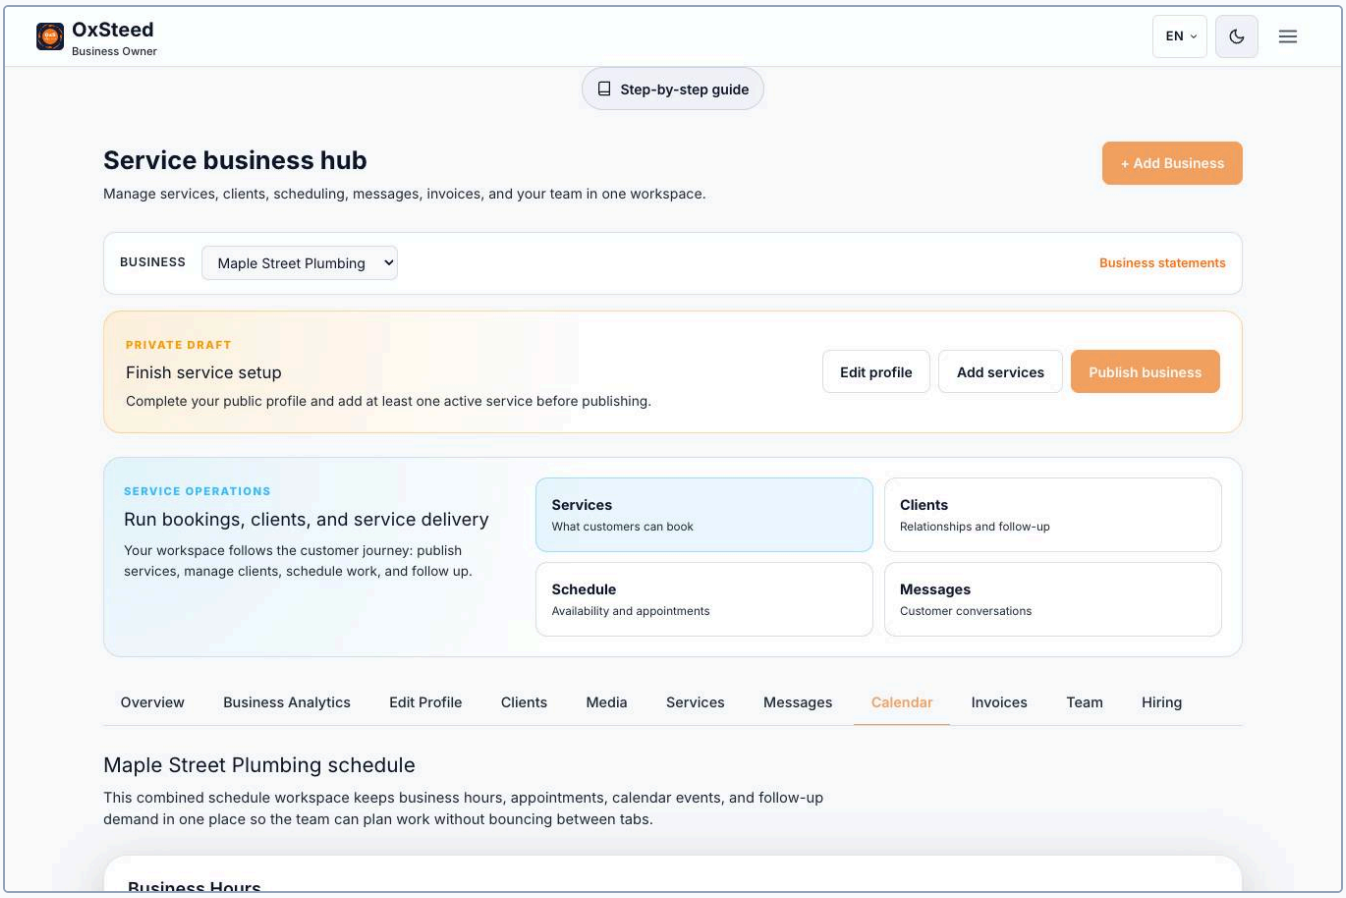

Figure 1. The Schedule tab, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 2: Set your business hours

In the Business Hours section, set open and close times for each day of the week (or mark days closed). Accurate hours prevent bookings when you are closed.

Expected result: Your hours save and apply to customer booking.

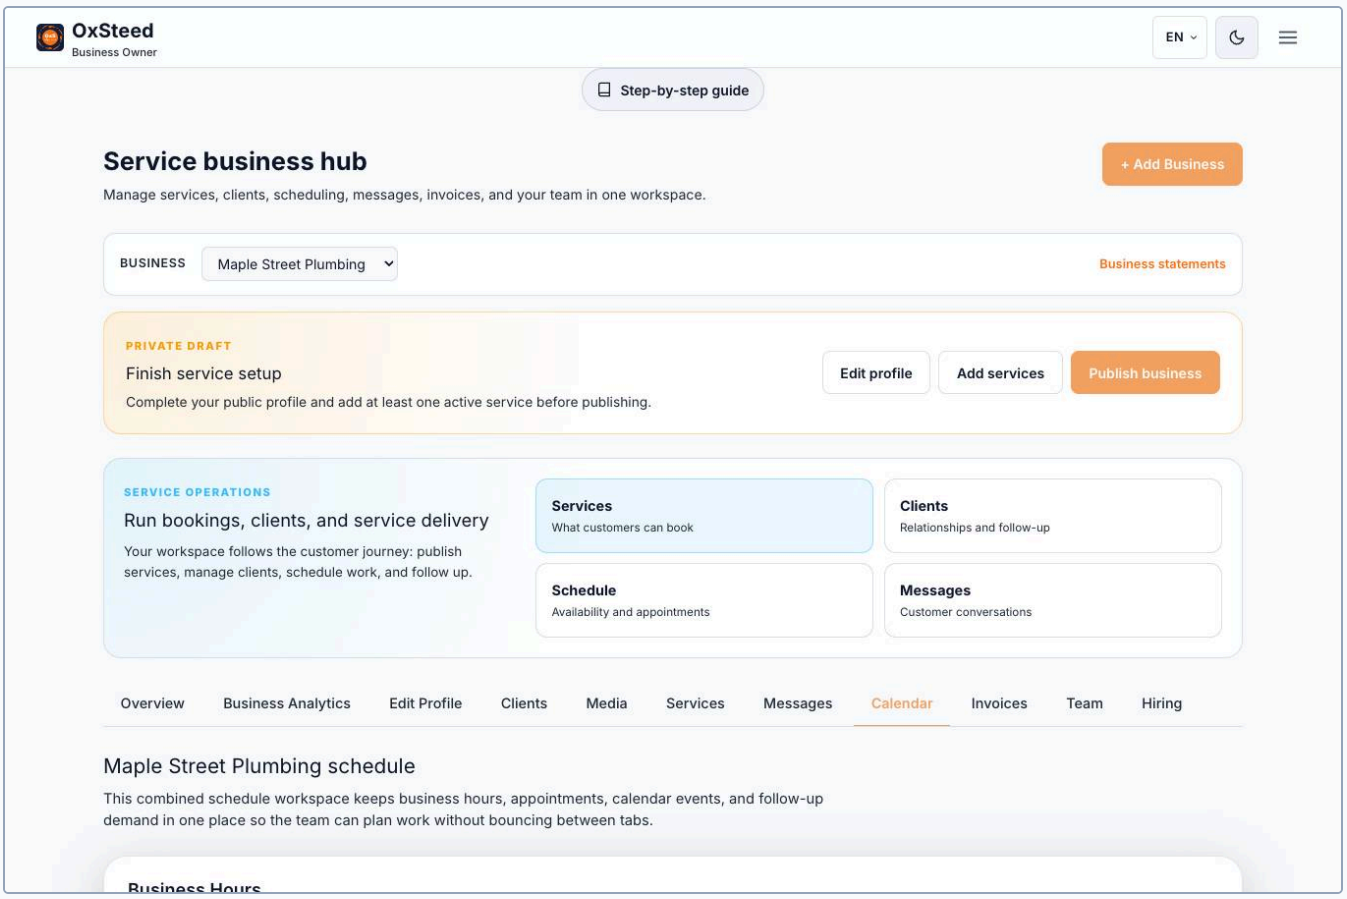

Figure 2. Setting business hours, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 3: Review appointment requests

In the Appointments section, filter by All, Pending, Confirmed, Completed, or Cancelled. Choose an appointment to see the customer, service, time, and any cancellation fee.

> **Expected result:** The appointment detail shows everything you need to decide.

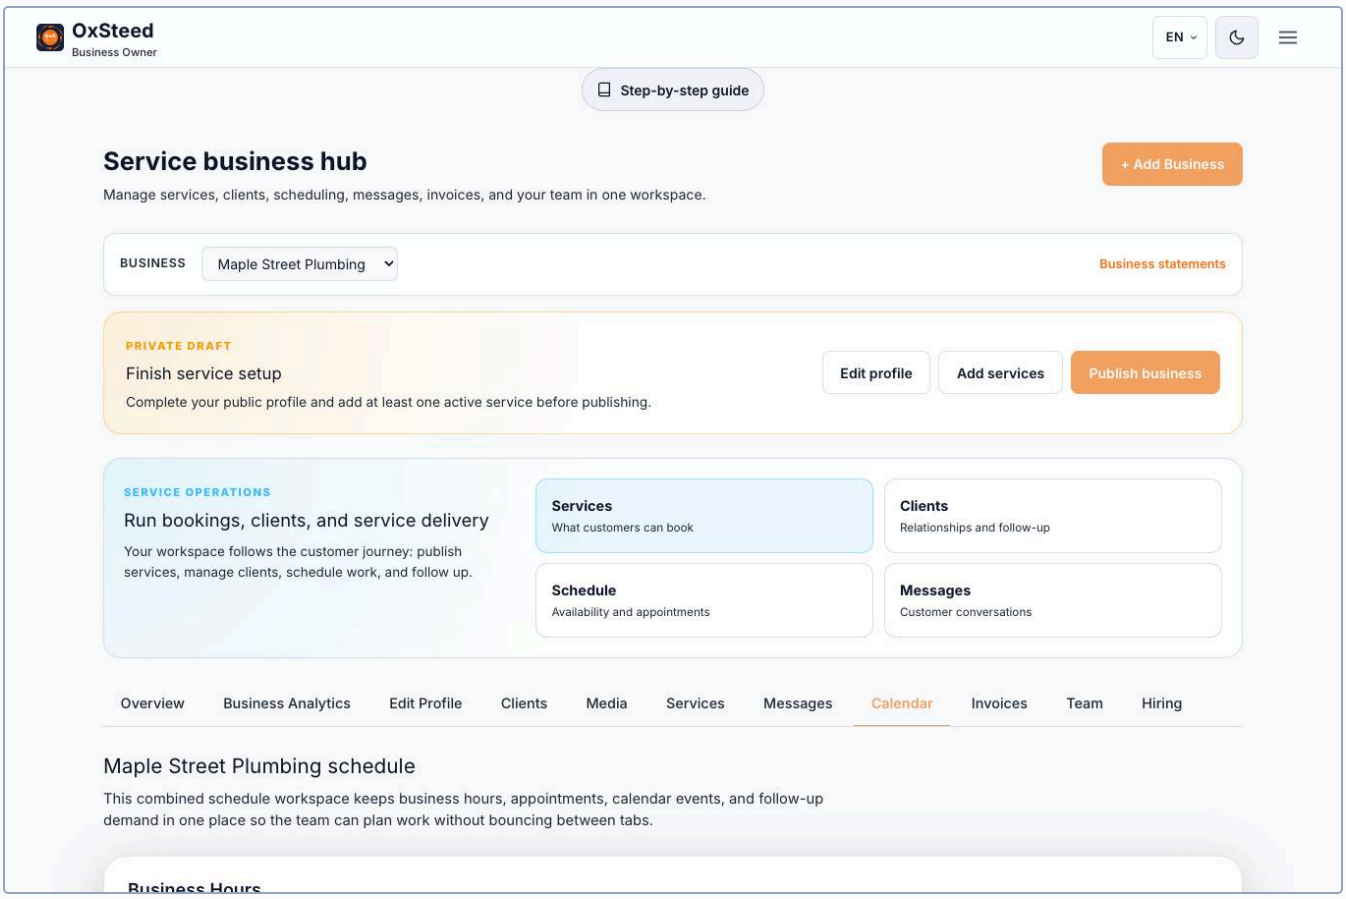

Figure 3. Reviewing appointments, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 4: Confirm, reschedule, cancel, or complete

On the appointment, choose Confirm to lock it in, Reschedule to propose a new time (choose Confirm Reschedule when you agree on a time), Cancel to cancel it (the cancellation policy and any late fee apply), or Complete when the work is done.

> **Expected result:** The appointment status updates and the customer is notified.

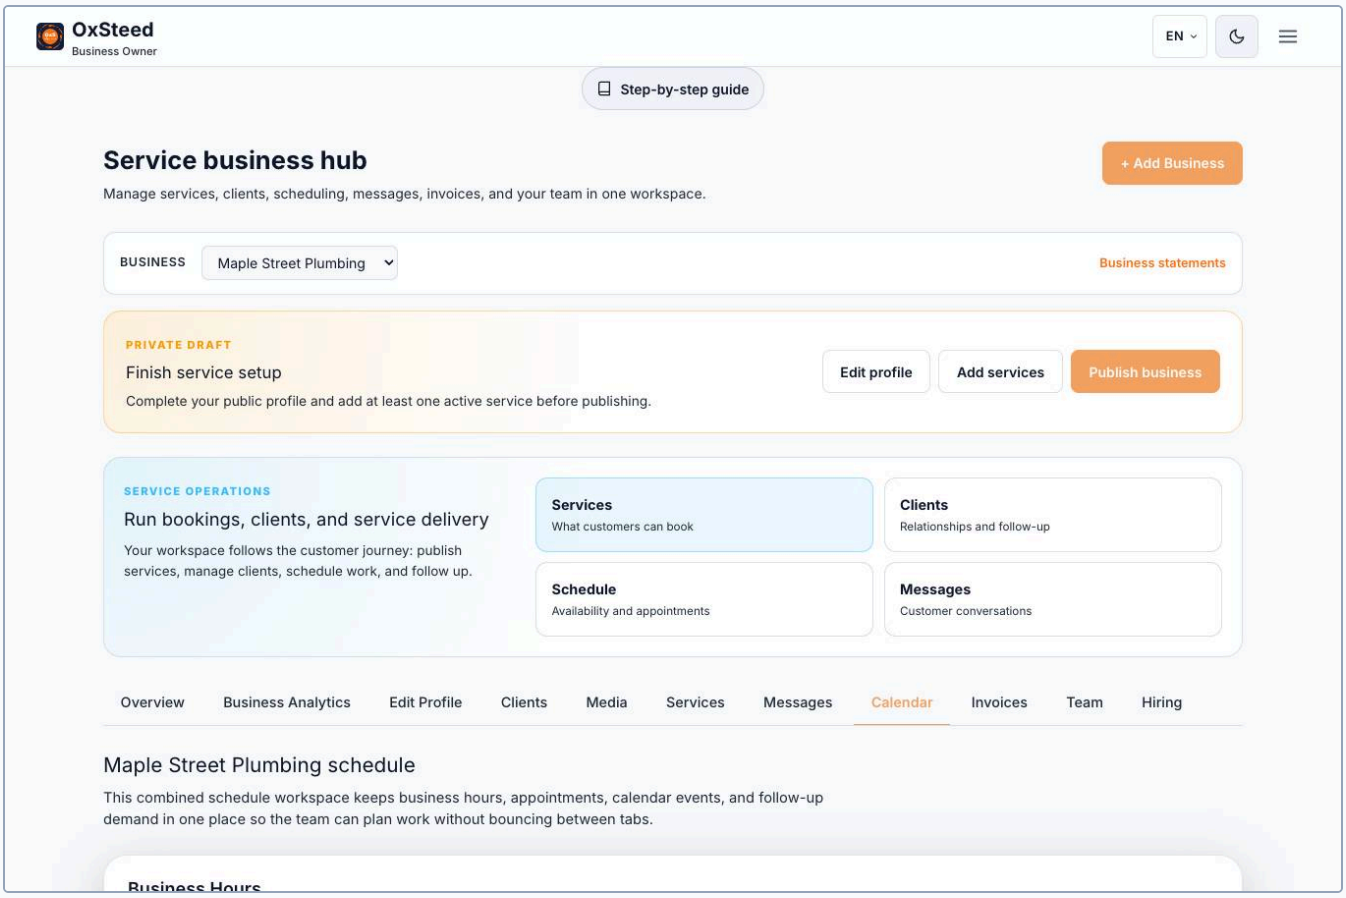

Figure 4. Acting on an appointment, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

Appointments show the correct status (confirmed, rescheduled, cancelled, completed) and your calendar has no double bookings.

If something goes wrong

Problem	What to do

Customers book outside your hours.	Re-check the Business Hours section: closed days must be marked closed and times must be saved.
A cancelled appointment charged a late fee by mistake.	Open the appointment detail to see the cancellation fee recorded. Correct it with your records and tell the customer; fees follow your cancellation policy.

Need help?

If appointments fail to load, contact OxSteed Support from the /support page.

Guide ID: business-work-select | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Select and switch between businesses

Guide ID	**business-work-select**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager, Business representative
Availability	**Supported**
Online version	/how-it-works/business-work/select-and-switch-businesses

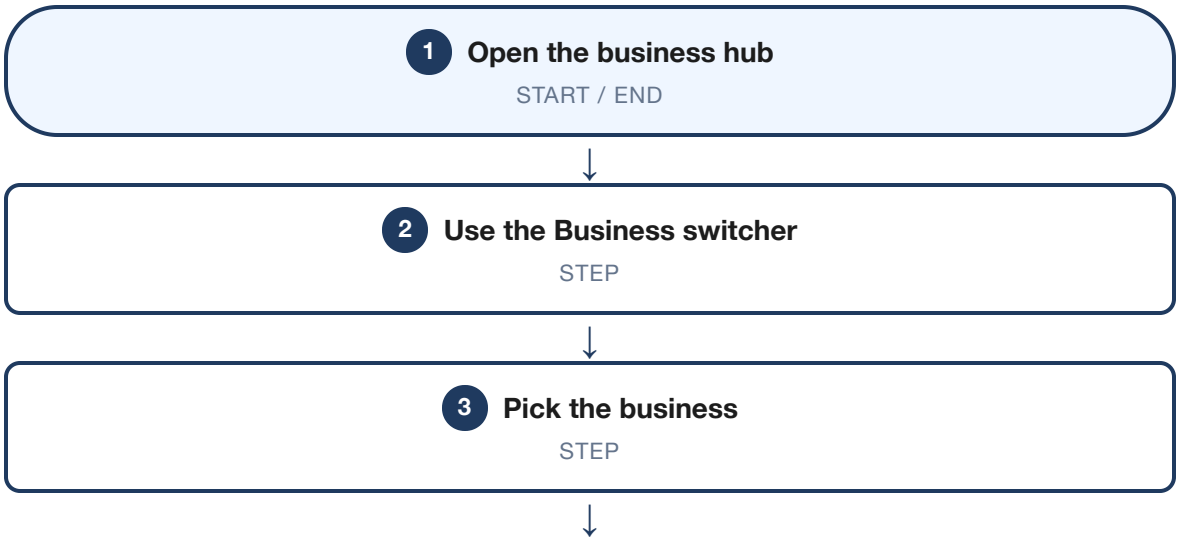

Goal

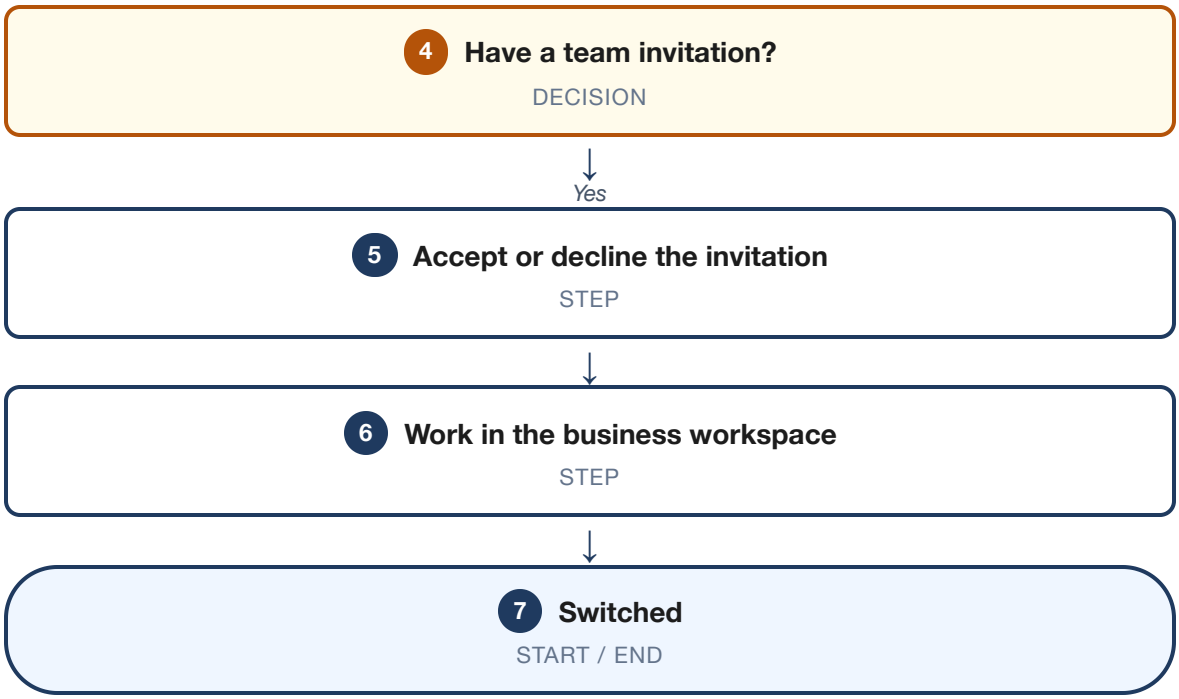

Move between every business you own or manage without losing your place.

Before you start

1. Sign in. You need at least one business you own or have been invited to.
2. Set up your business first if you have none yet.

Process map

- *No:* Have a team invitation? → Work in the business workspace

Text version. 1. Open the business hub. 2. Use the Business switcher at the top. 3. Pick the business you want to work in. 4. If you have a team invitation to another business, accept or decline it in the Team tab. 5. Work in the selected business workspace. 6. Switch again any time from the same switcher.

Steps

Step 1: Open the business hub

Open /business-hub. The hub shows the current business workspace with its tabs (Overview, Clients, Services, Schedule, Invoices, Team, Hiring, and more depending on your business type).

> **Expected result:** The business hub loads with a business selected.

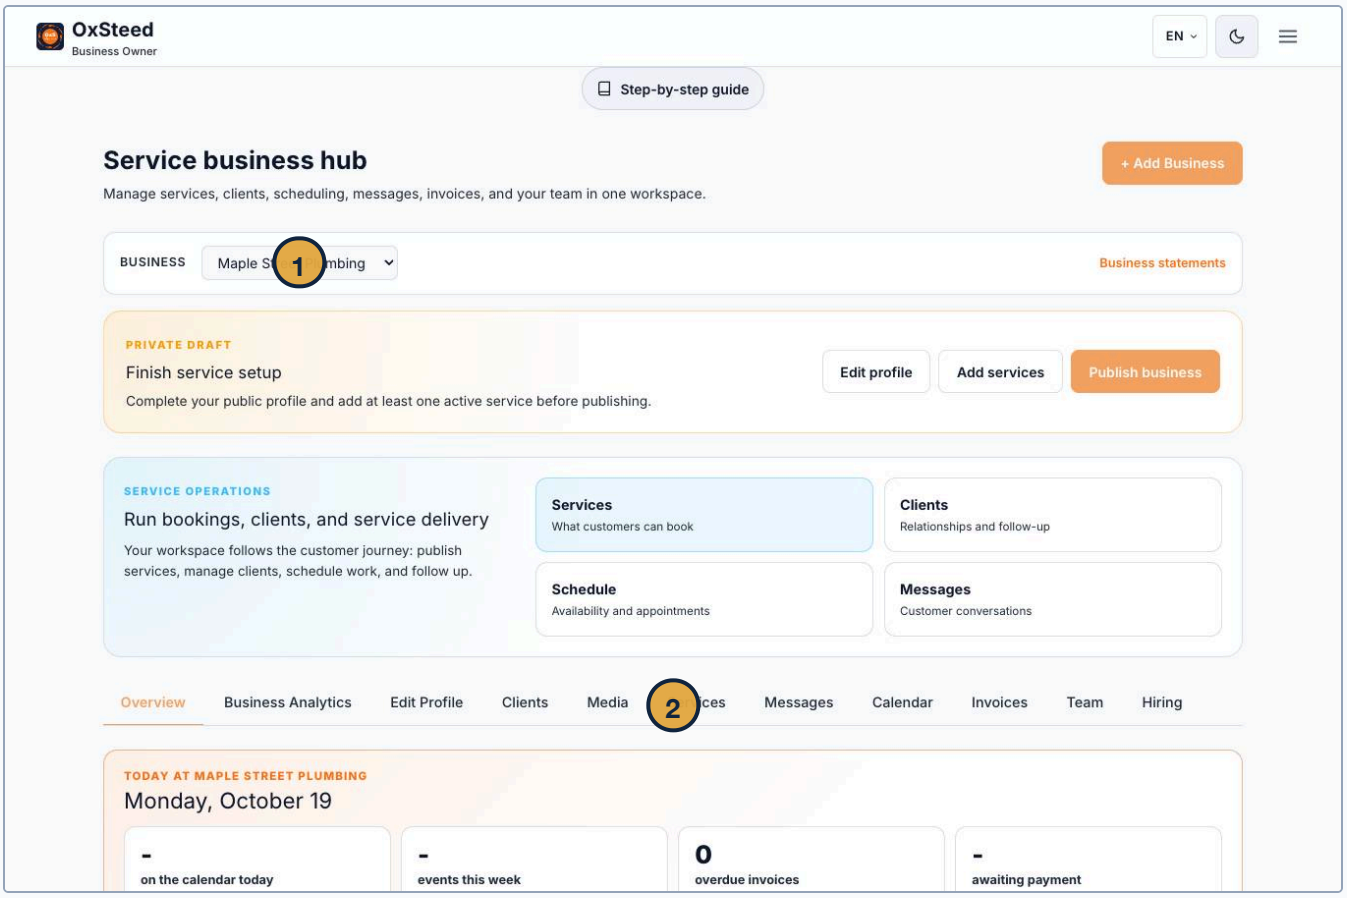

Figure 1. The business hub, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Business switcher
2. **2.** Workspace tabs

Step 2: Use the Business switcher

At the top of the hub, the Business switcher is a dropdown listing every business you own or manage. Each entry shows the business name and, for non-owners, a role tag such as Manager or Representative.

> **Expected result:** The dropdown lists all your businesses with the correct roles.

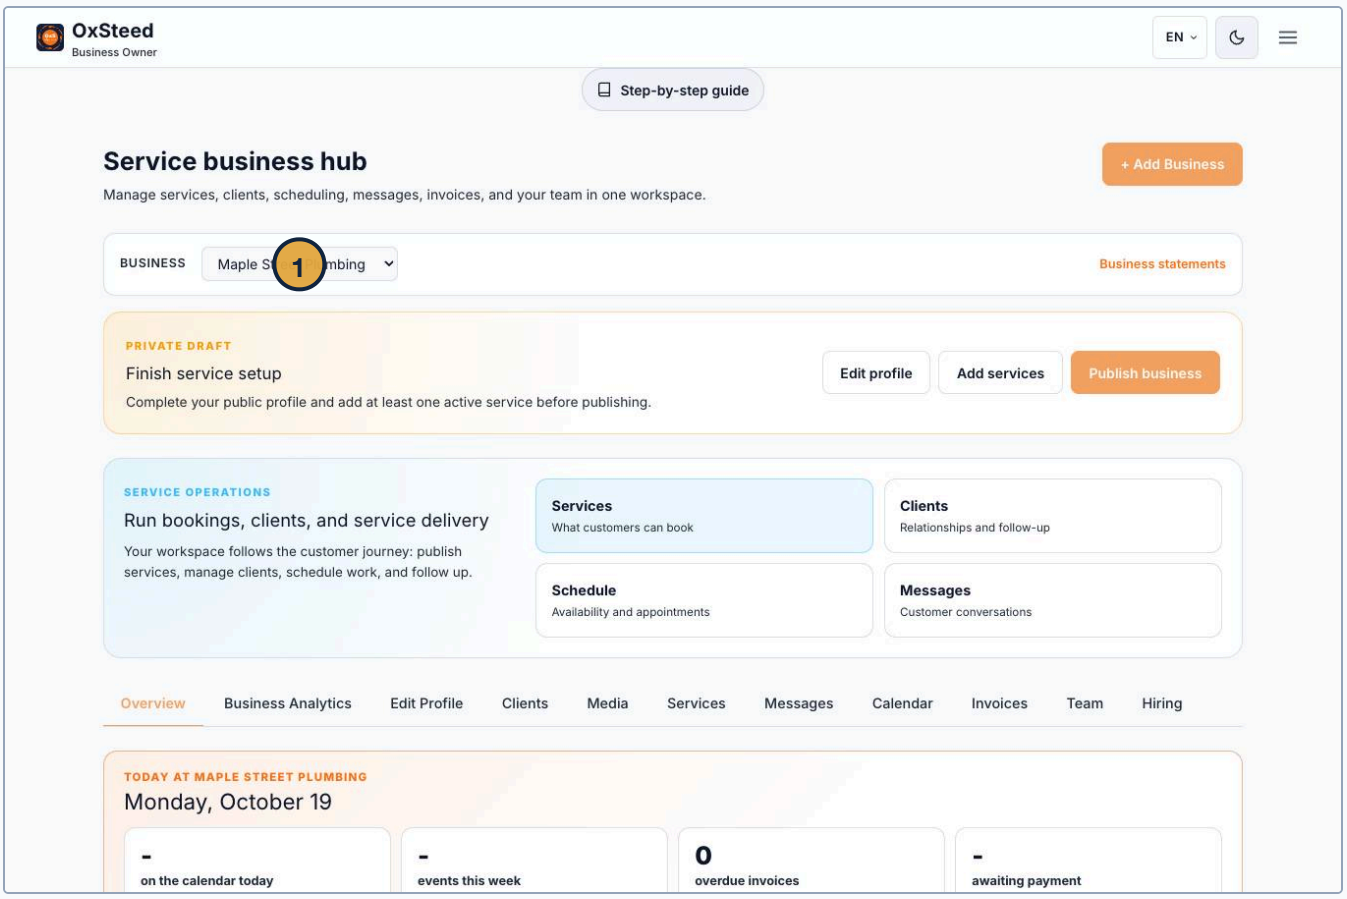

Figure 2. The Business switcher, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Business switcher dropdown

Step 3: Switch and accept invitations

Pick a business in the switcher; the hub reloads that workspace and its tabs. If someone invited you to their team, the Team tab shows Pending Invitations with Accept and Decline. Accepting adds their business to your switcher.

> **Expected result:** The workspace shows the selected business; accepted invitations appear in the switcher.

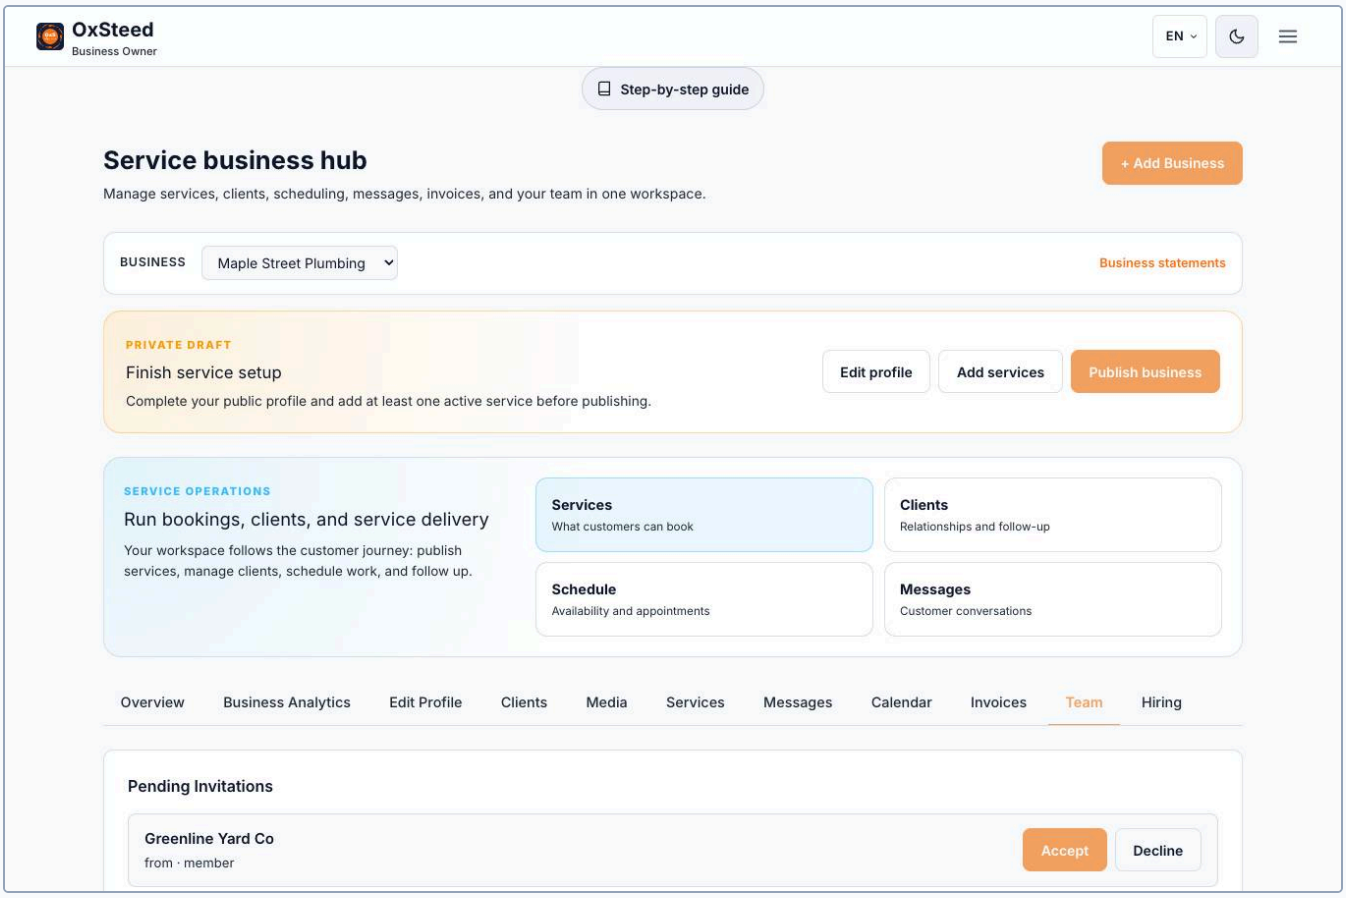

Figure 3. Accepting a team invitation, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

The hub header shows the selected business and your role, and every tab reflects that business.

If something goes wrong

Problem	What to do

A business is missing from the switcher.	Check whether you were invited: open the Team tab and look under Pending Invitations. Invitations you declined are gone; ask the owner to re-invite you.
The hub says you have no businesses.	Use the + Add Business button to start a new business, or ask an owner to invite you to their team.

Need help?

If switching shows the wrong business data, contact OxSteed Support from the /support page.

Guide ID: business-work-services | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Manage business services

Guide ID	**business-work-services**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager
Availability	**Supported**
Online version	/how-it-works/business-work/manage-business-services

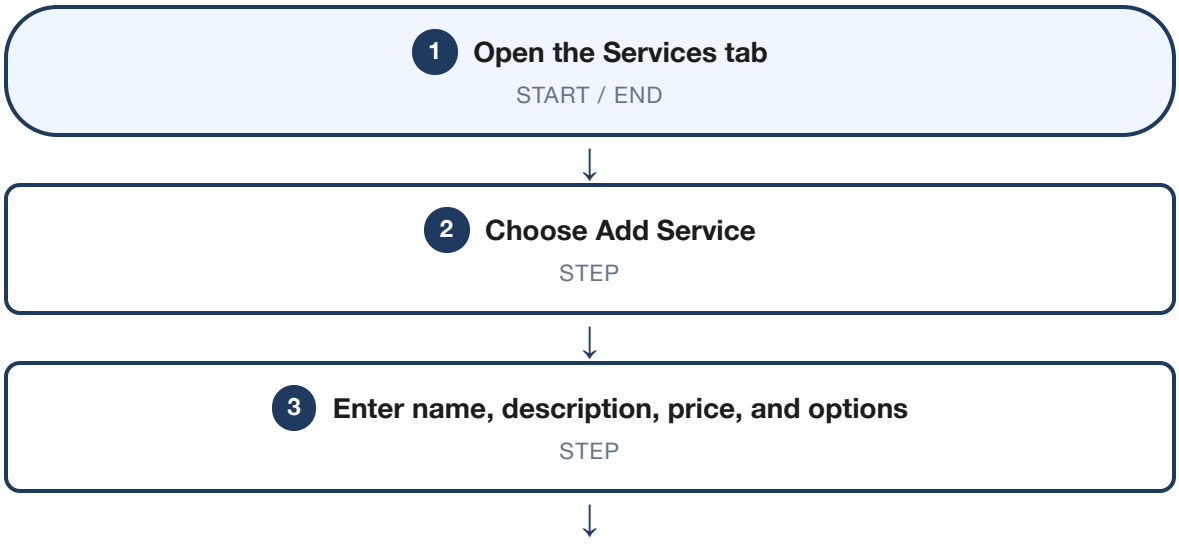

Goal

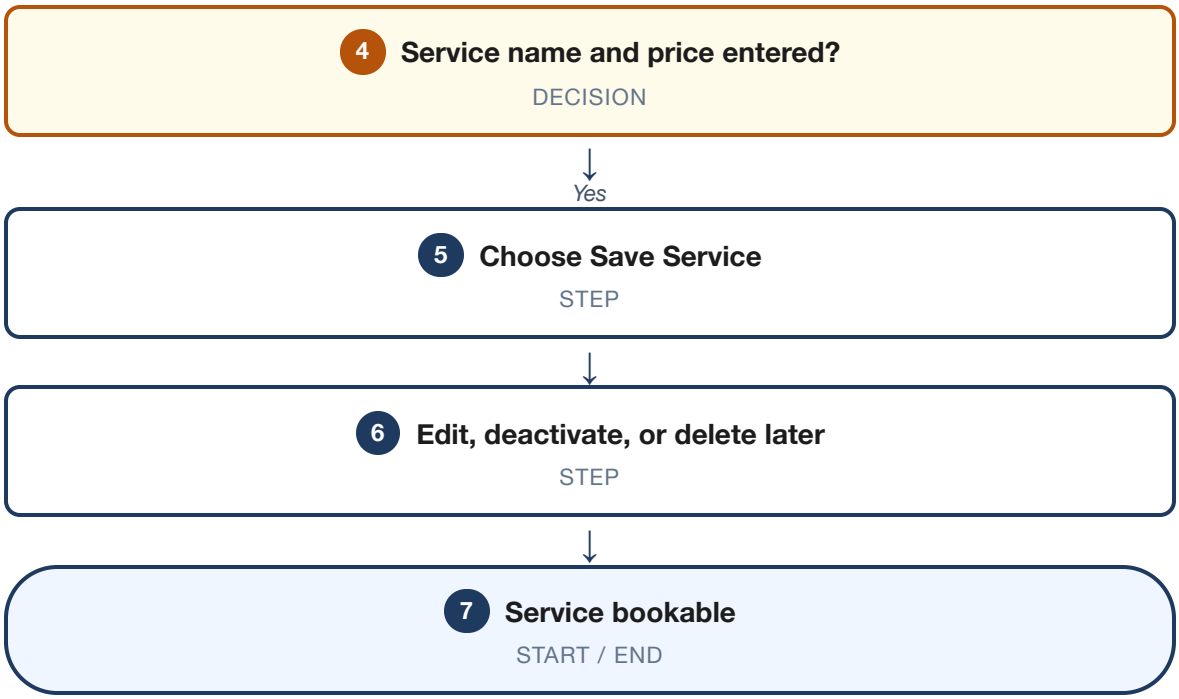

Publish the services your business offers so customers can book them.

Before you start

1. Sign in and open your business in the business hub.
2. Owner or manager capability to edit the business profile.

Process map

- *No:* Service name and price entered? → Fill the required fields
- Fill the required fields → Service name and price entered?

Text version. 1. Open the Services tab in the business hub. 2. Choose Add Service. 3. Enter the service name, description, price, price type, duration, and category. 4. Check that the service name and price are entered; if not, fill them in and check again. 5. Choose Save Service. 6. Edit, deactivate, or delete the service any time. 7. The service is live and bookable.

Steps

Step 1: Open the Services tab

Open /business-hub?tab=services for your business. The Services tab lists your current services, or an empty state inviting you to add your first one.

> **Expected result:** Your service list loads.

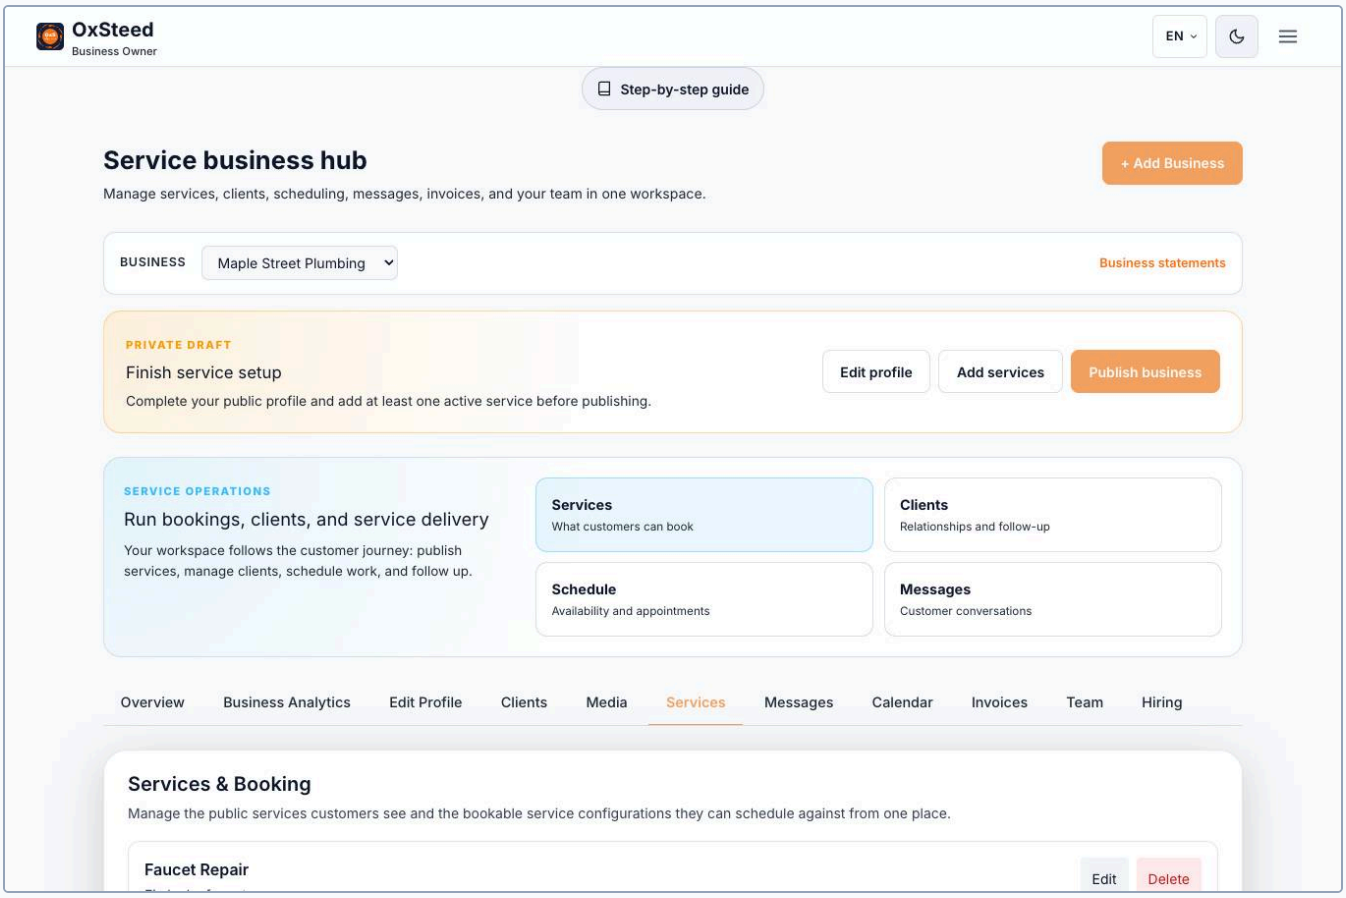

Figure 1. The Services tab, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 2: Add a service

Choose the + Add Service button. The Add Service dialog opens with fields for the service details.

> **Expected result:** The Add Service dialog opens with empty fields.

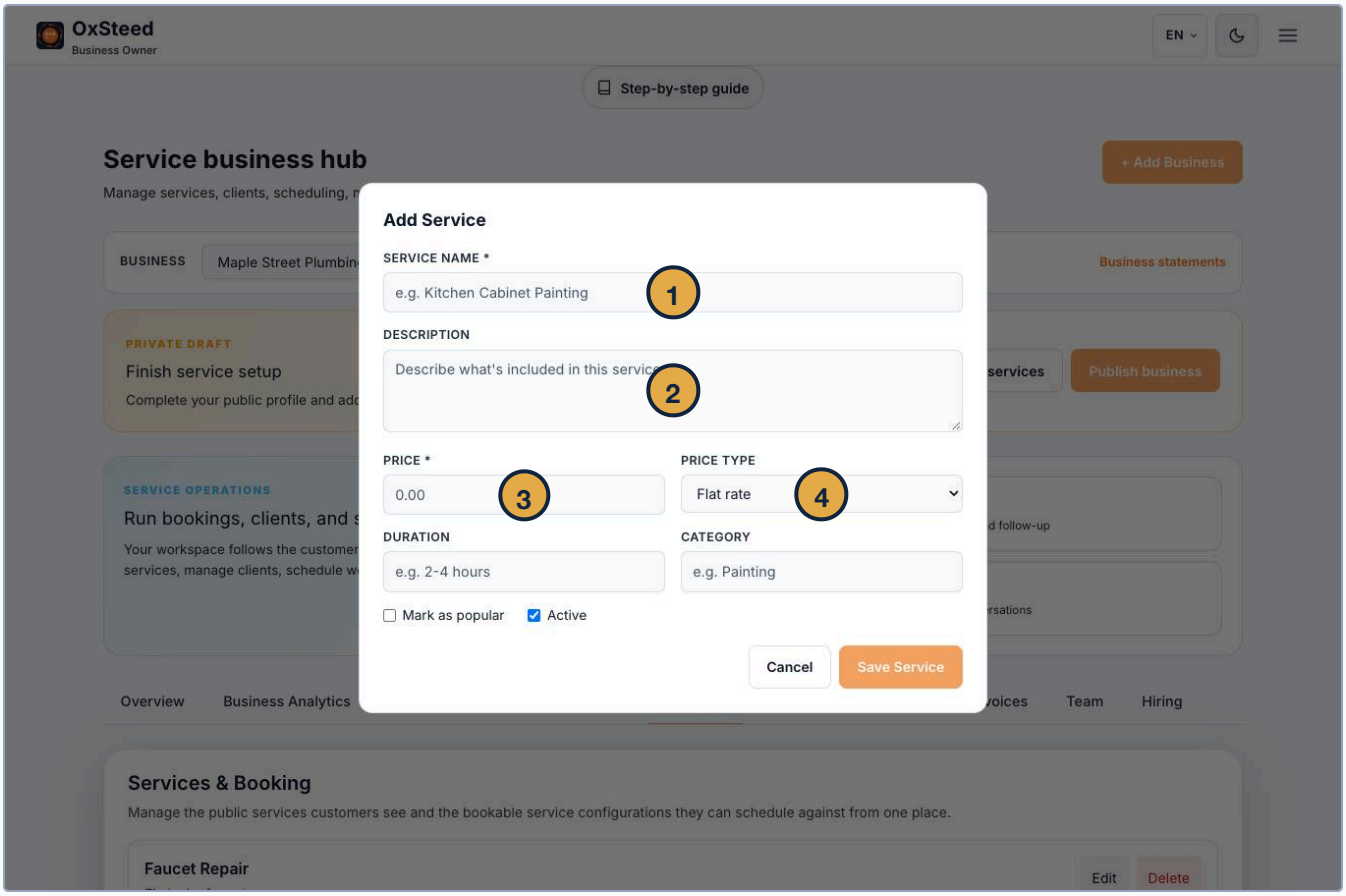

Figure 2. The Add Service dialog, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Service Name field
2. **2.** Description field
3. **3.** Price field
4. **4.** Price Type select

Step 3: Describe and price the service

Enter the Service Name and Description. Set the Price and the Price Type (Flat rate, Per hour, Starting at, or By quote). Add the Duration and Category, tick Mark as popular for featured services, and keep Active on while the service is bookable. Choose Save Service.

> **Expected result:** The service appears in the list and is active.

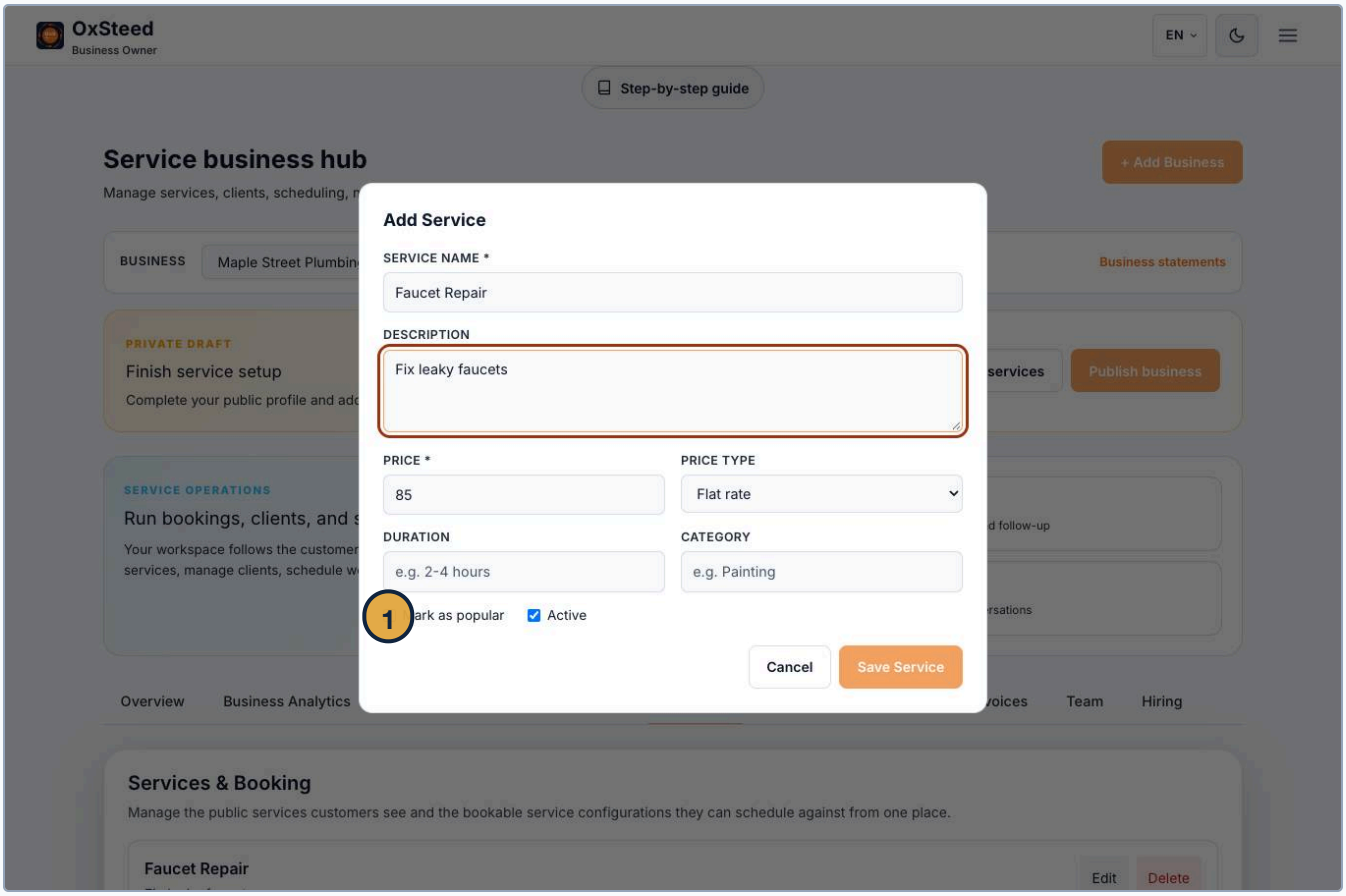

Figure 3. A filled-in service, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Mark as popular and Active toggles

Step 4: Edit or retire a service

Use Edit on a service card to change its details, or Delete to remove it. To hide a service without deleting it, edit it and switch Active off. Inactive services show an inactive marker and are not bookable.

> **Expected result:** Changes apply immediately to what customers see.

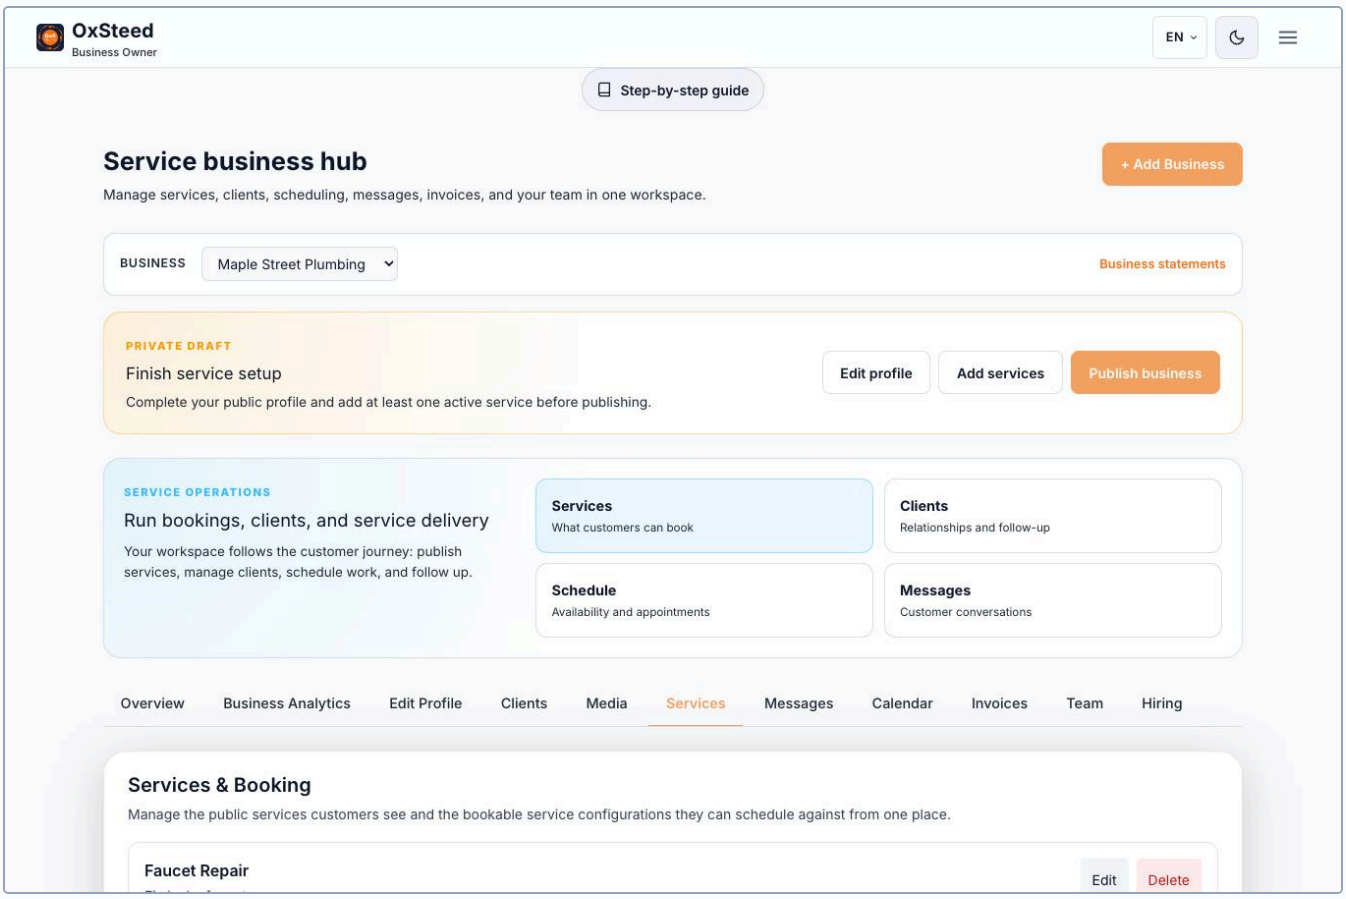

Figure 4. Managing services, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

The service appears in your Services tab and on your public business page, ready to book.

If something goes wrong

Problem	What to do
The service does not save.	Service Name and Price are required. Fill them in and choose Save Service again.

Customers cannot book the service.	Edit the service and confirm Active is on. Check your business hours and availability so the service has bookable times.

Need help?

If services fail to save, contact OxSteed Support from the /support page.

Guide ID: business-work-setup | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Set up your business

Guide ID	**business-work-setup**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner
Availability	**Supported**
Online version	/how-it-works/business-work/set-up-a-business

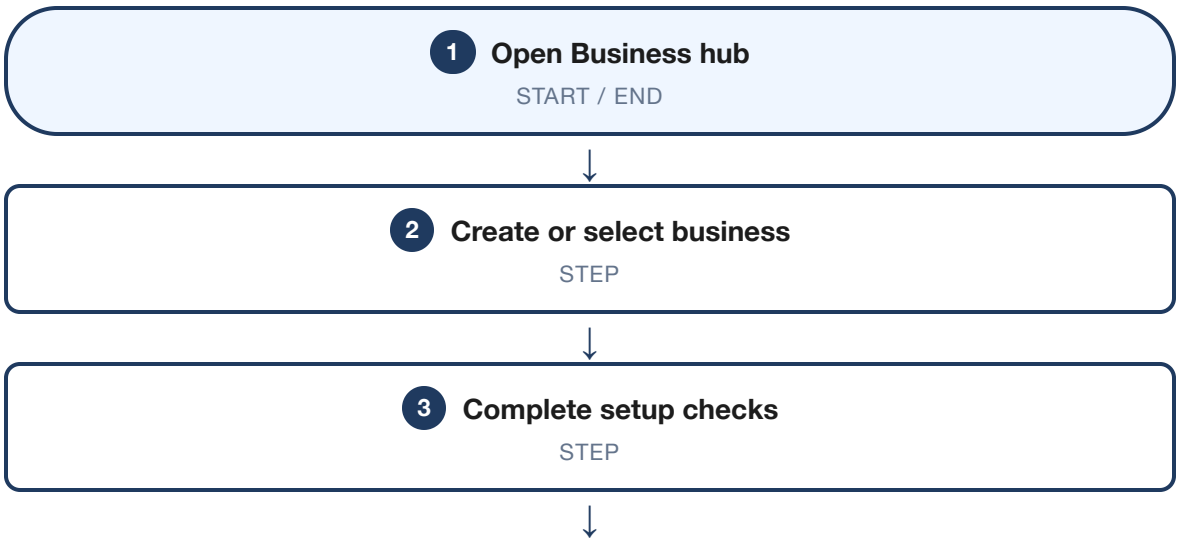

Goal

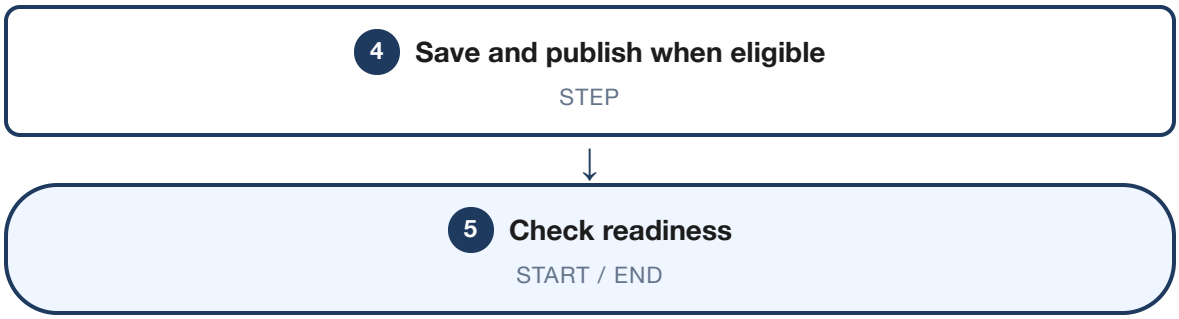

Create or select a business, complete its setup checks, and publish when eligible.

Before you start

1. Sign in with permission to create or manage this business.

Process map

Text version. 1. Open Business hub → 2. Create or select business → 3. Complete setup checks → 4. Save and publish when eligible → 5. Check readiness

Steps

Step 1: Open your business workspace

Open Business hub. Select the business you own or manage. To create a service business, use Add a business and complete the creation form. A consulting intake is separate from creating a business workspace.

> **Expected result:** The selected business name and your permitted workspace tabs are visible.

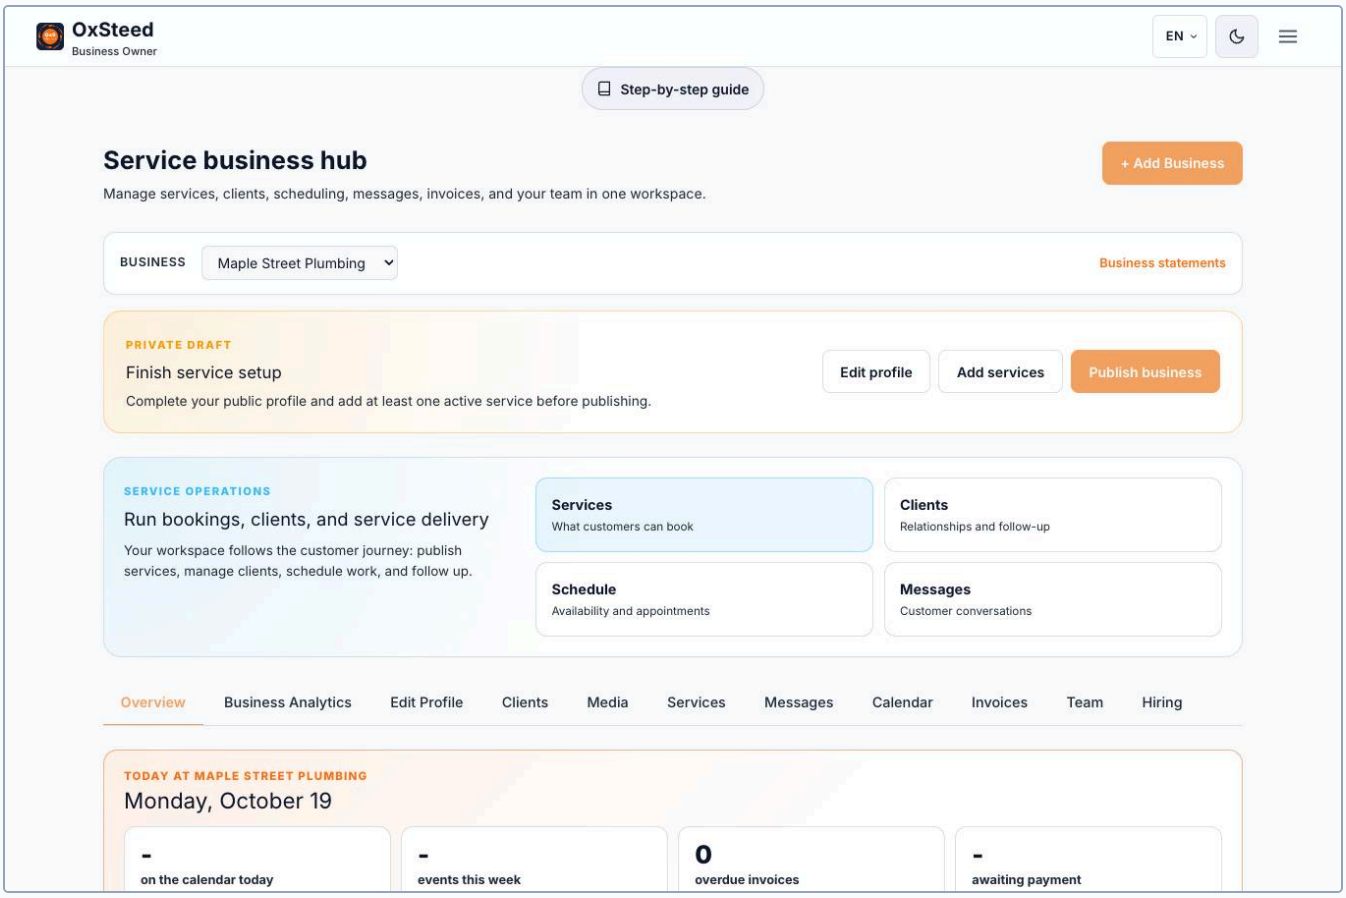

Figure 1. Select or create the business in Business hub. Synthetic example; no live account data. *(Image description: Synthetic example: Service business hub)*

Step 2: Finish setup and check readiness

From your business dashboard, open its Launch step incomplete item when shown. Complete the profile and setup checks. Save changes; publish only when all required checks pass. Restaurant requirements can differ. Return to the workspace and check the readiness status.

> **Expected result:** Saved profile details and current setup status are shown. An incomplete check explains what still needs attention.

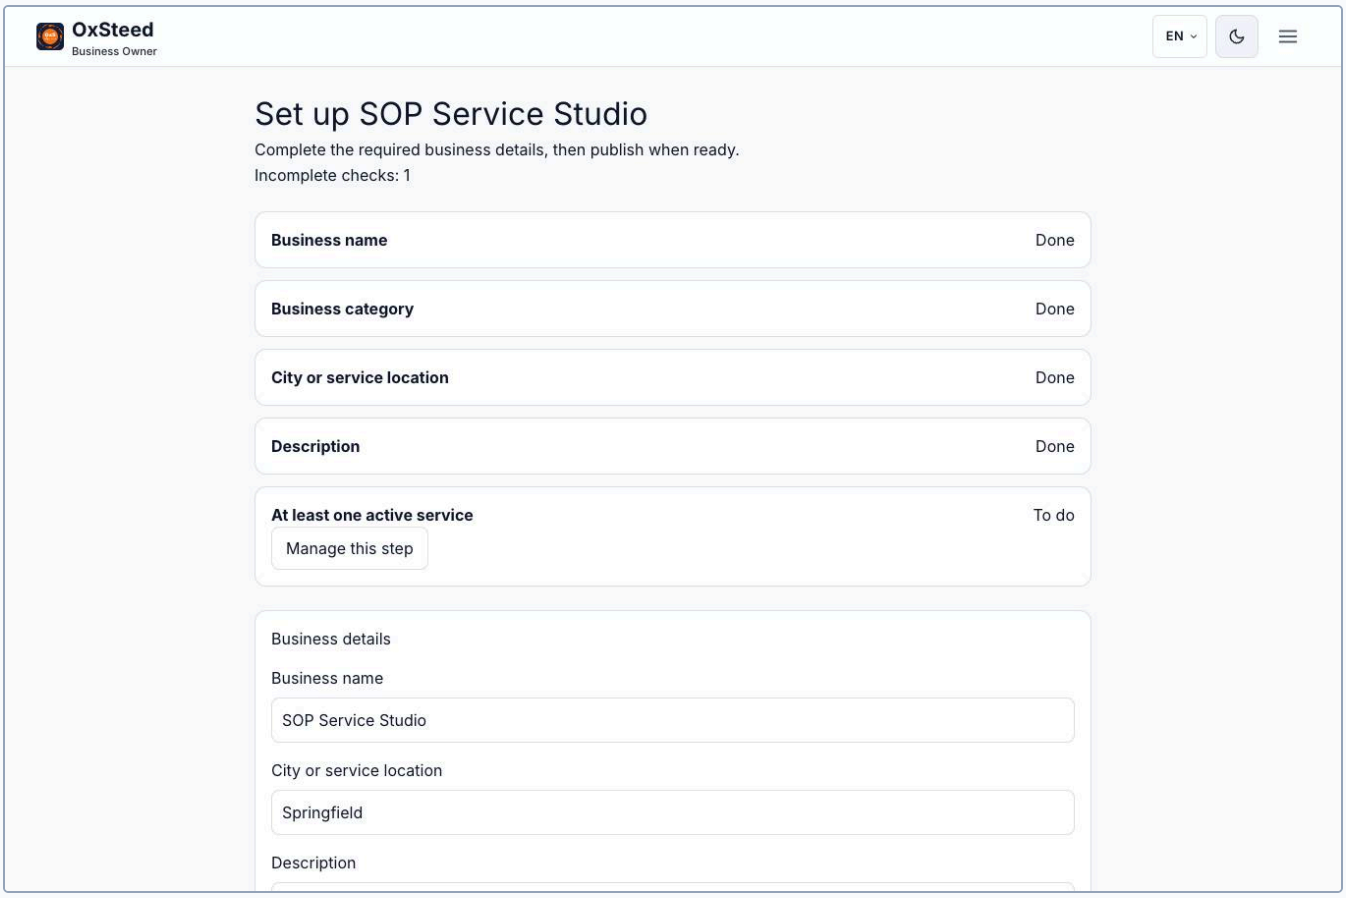

Figure 2. Business setup checks and profile fields. Synthetic example; no live account data. *(Image description: Synthetic example: Set up SOP Service Studio)*

Confirm it worked

The workspace shows your saved business details and actual readiness. Saving a profile does not guarantee approval or publication.

If something goes wrong

Problem	What to do
You cannot edit or publish.	Check that the correct business is selected and that your membership permits the action. Use Support for a missing or failed setup check.

Need help?

If your approved business never appears in the hub, contact OxSteed Support from the /support page.

Guide ID: business-work-specialized-intakes | **Revision:** 2 | **Area:** Business

SOP LIBRARY / BUSINESS **ENGLISH**

Submit specialized intake requests (maintenance, trades, beauty, creative, professional, continuity)

Guide ID	**business-work-specialized-intakes**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Business owner, Business manager, Customer
Availability	**Conditional**
Conditions	• Specialized intake requests require the specializedProfileTemplates launch flag, which is off by default. While it is off, the intake entry buttons are hidden on business profile pages and the public intake API returns 404. The hub intake triage tabs (beauty-ops, creative-ops, continuity-ops, professional-ops, trades-ops, maintenance) are already registered so they appear automatically at launch.
Online version	/how-it-works/business-work/specialized-intake-requests

Goal

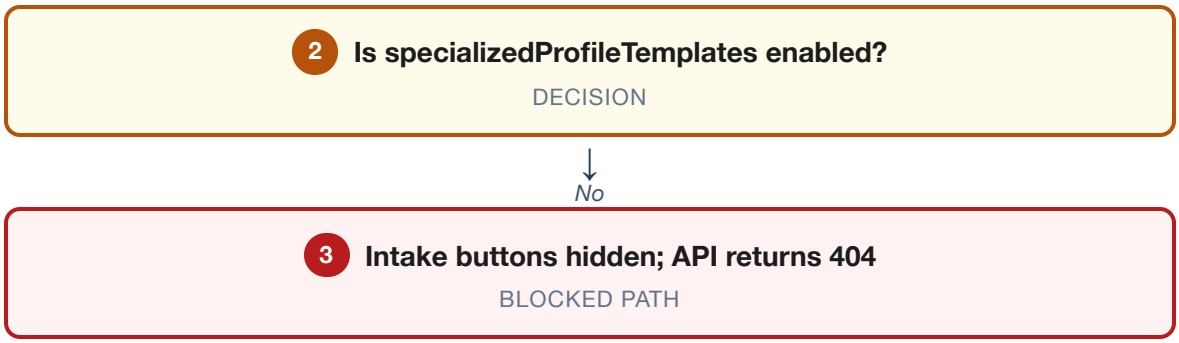

Collect structured intake requests from customers once specialized intake templates are launched.

Before you start

1. A business with a specialized template (property manager, trades, beauty, creative, professional, or continuity).
2. The specializedProfileTemplates launch flag enabled by the platform.

Process map

- *Yes:* Is specializedProfileTemplates enabled? → Choose the intake button for the template
- Choose the intake button for the template → Describe the issue and add details
- Describe the issue and add details → Submit the intake request
- Submit the intake request → Triage it in the hub ops tab
- Triage it in the hub ops tab → Intake tracked

Text version. 1. Open the business profile page. 2. Check whether the specializedProfileTemplates flag is enabled. If it is not, the intake buttons are hidden and the public intake API returns 404; nothing can be submitted. If it is, choose the intake button matching the business template. 3. Describe the issue and add photos, unit details, access notes, and urgency. 4. Submit the intake request. 5. Triage it in the matching hub operations tab. 6. The intake is tracked.

Steps

Step 1: Check whether intakes are available

Open the business profile page. When the specializedProfileTemplates flag is off (the default), the intake entry buttons (maintenance request, trades request, beauty intake, creative intake, professional intake, continuity intake) do not render, and submitting to the public intake API returns a 404. There is nothing to fix: intakes are simply not launched yet.

> **Expected result:** You can tell whether intake buttons are present on the profile page.

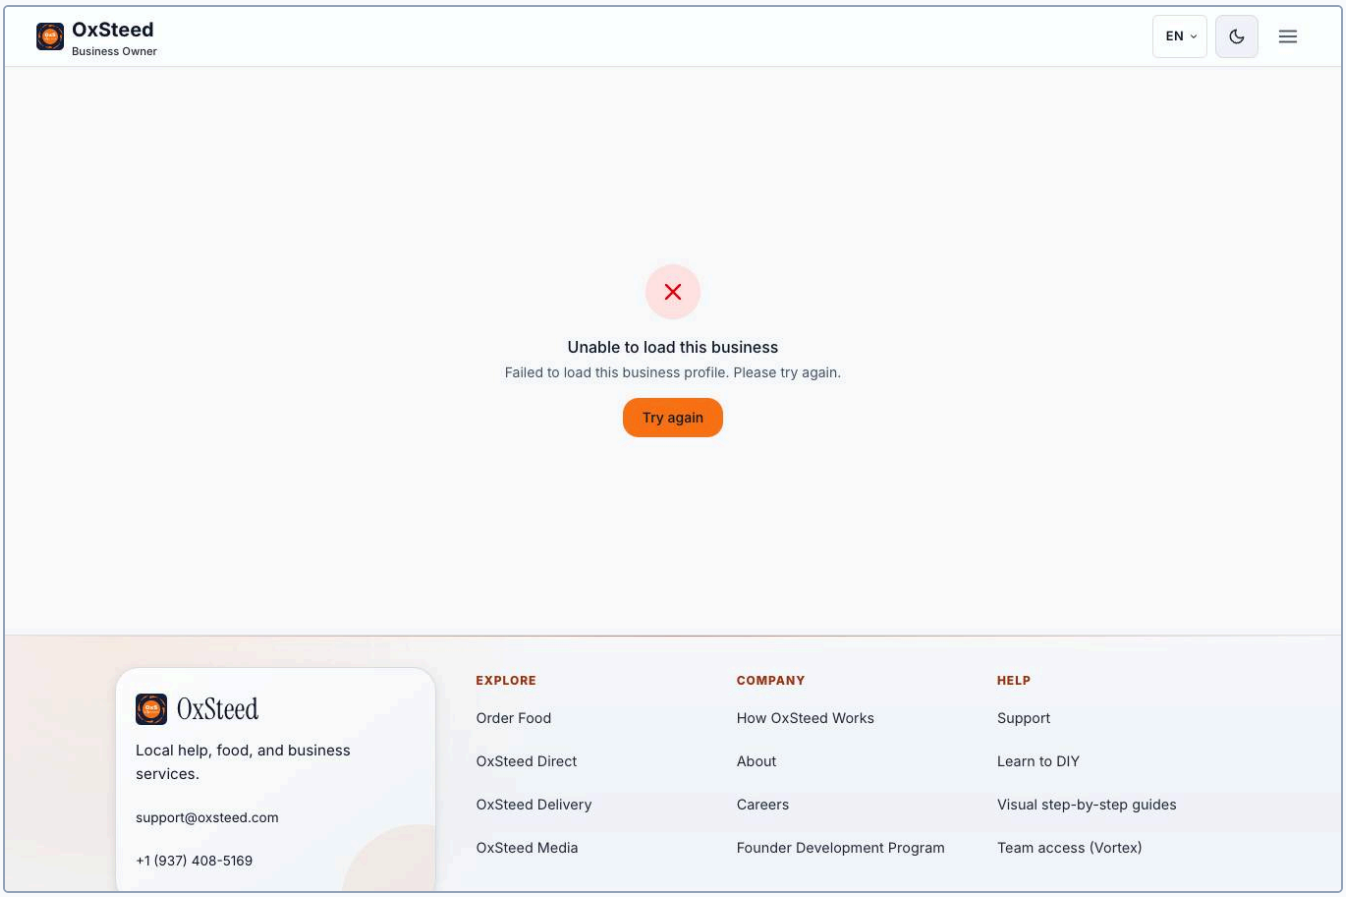

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Business profile page with no intake buttons visible)*

Step 2: Open the intake form (when launched)

When the flag is on, the profile page shows the intake button for the business template (for example, the maintenance request button for a property manager). Choose it to open the intake form, such as "Report an issue to {business name}".

> **Expected result:** The intake form opens with the business context preloaded.

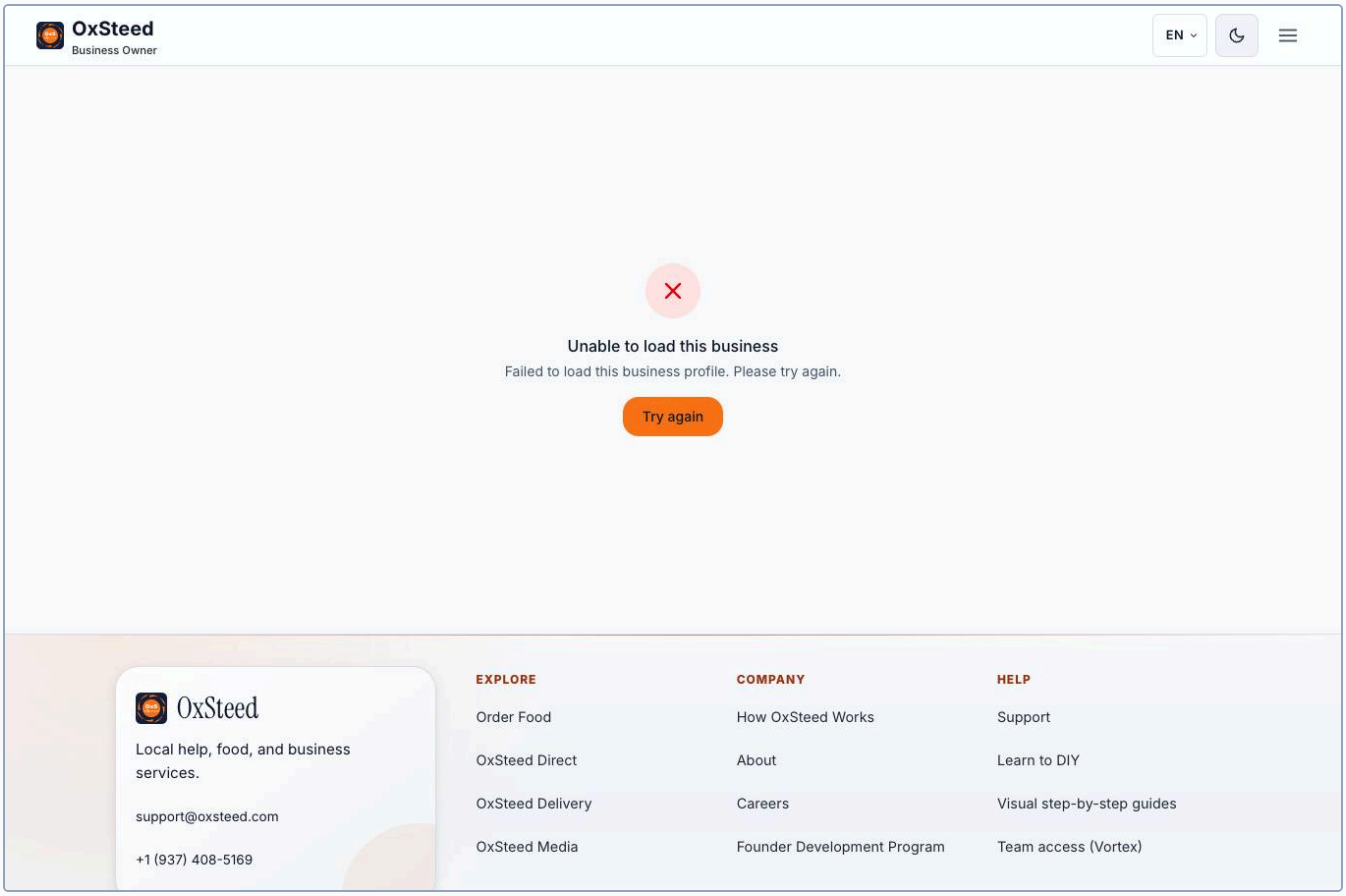

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Maintenance request form with issue categories and details fields)*

Step 3: Describe the request and submit

Pick the issue category, write a clear title and description, and add what helps most: photos, unit details, access notes, urgency, and times that work for entry. Submit the form. You will see a submitted confirmation.

> **Expected result:** The intake submits and a confirmation appears.

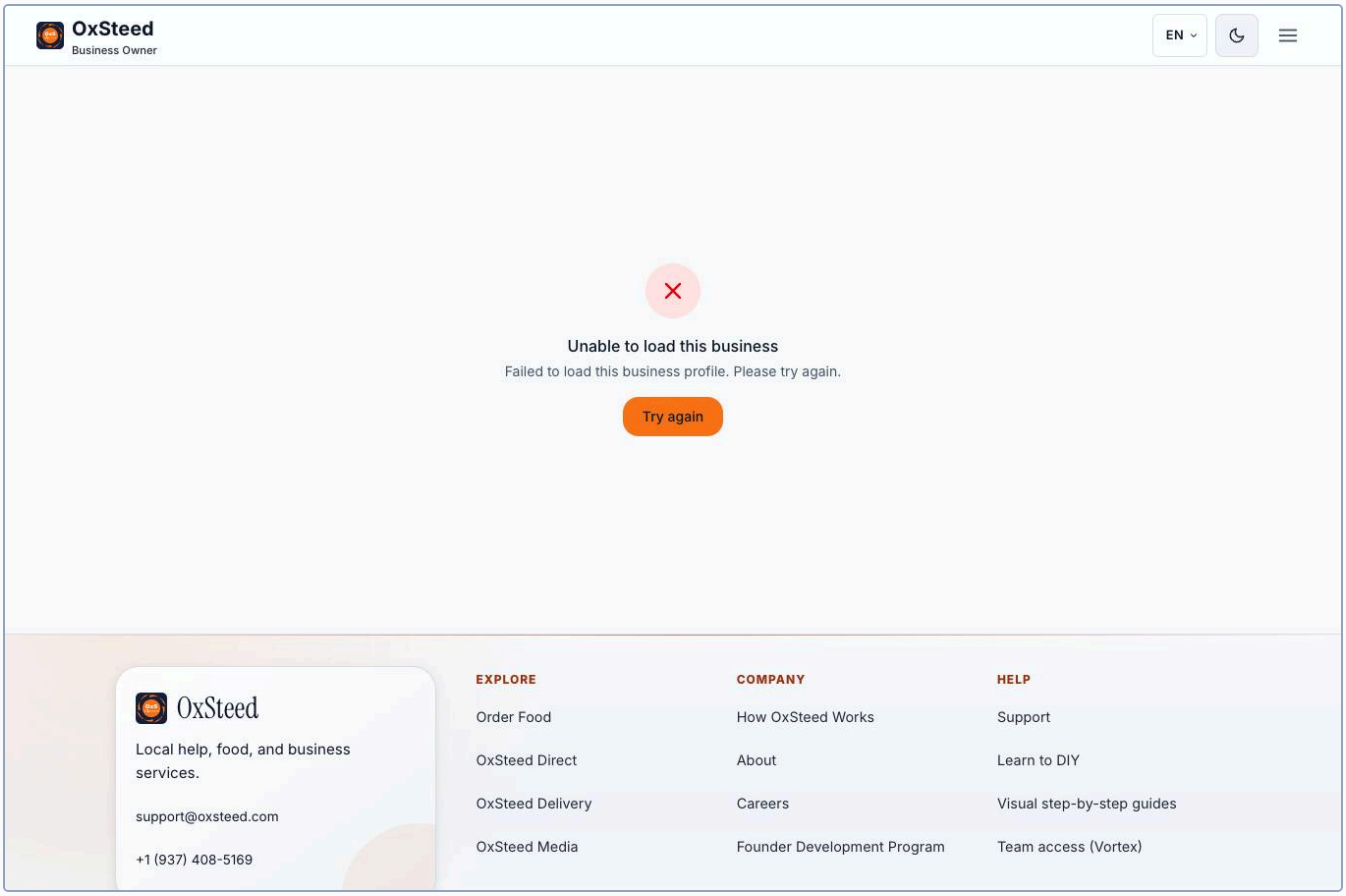

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Filled-in intake form with photos, urgency, and the submit button)*

Step 4: Triage the intake in the hub

Submitted intakes notify the owner with a deep link to the matching operations tab in the business hub (for example, the maintenance tab). Open the tab, review the request, and work it like any other incoming job.

> **Expected result:** The intake appears in the hub ops tab ready to work.

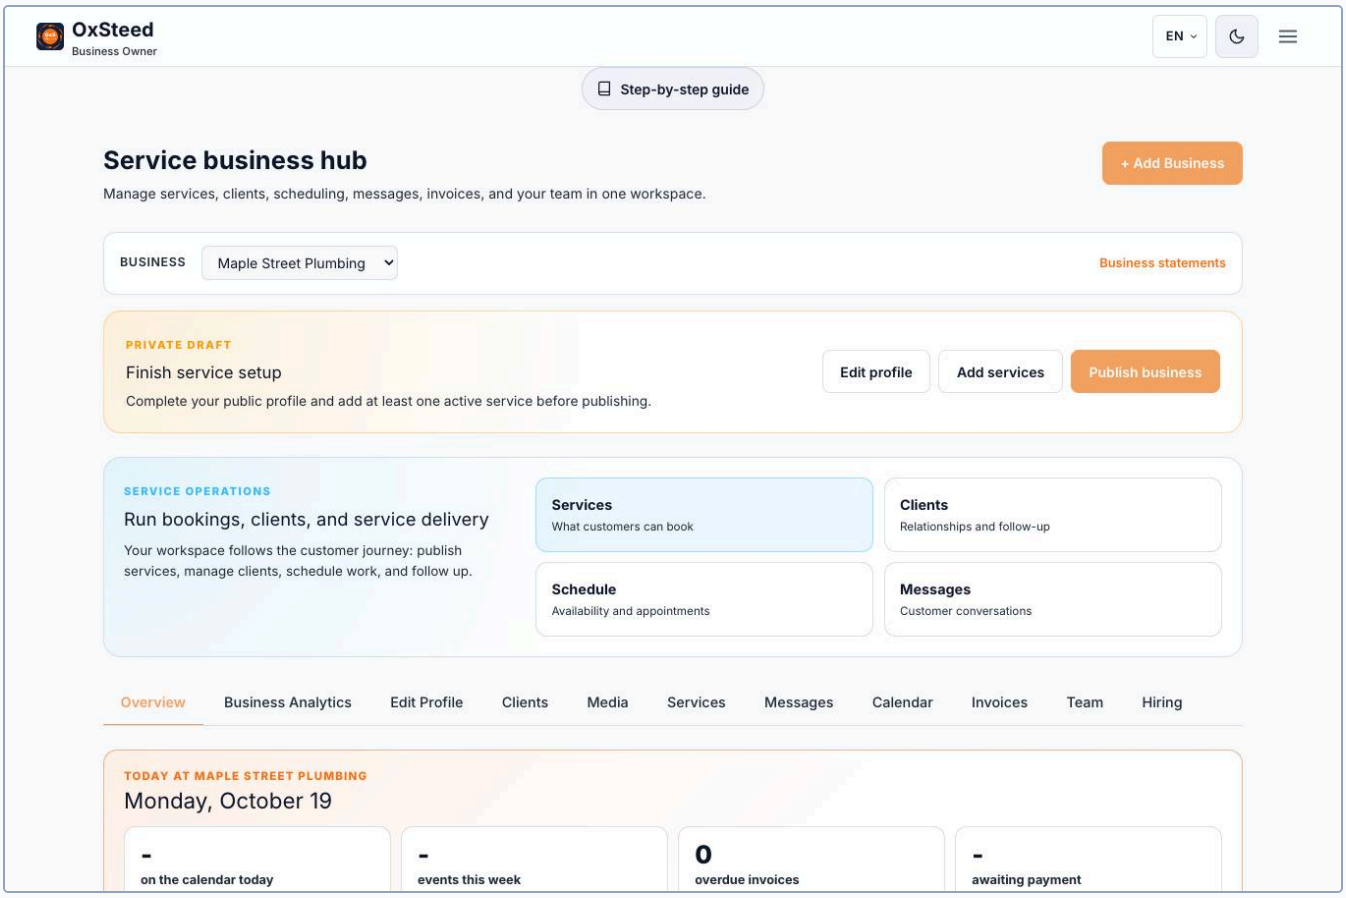

Figure 4. Triaging an intake, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

When launched, intake buttons appear on the profile and submissions land in the hub ops tab. While unlaunched, the 404 on the public intake API confirms the gate is working.

If something goes wrong

Problem	What to do

The intake form returns a 404 on submit.	The specializedProfileTemplates flag is off, so the server blocks the public intake API. This is expected until the platform enables the flag; use the standard job posting flow instead.
You expected intake buttons but see none.	Intake entry points render only while the flag is on and only for businesses with a specialized template. Confirm both with your OxSteed contact.

Need help?

If intakes were announced as launched but still fail, contact OxSteed Support from the /support page.

Availability	**Supported**
Online version	/how-it-works/business-work/manage-team-members-and-roles

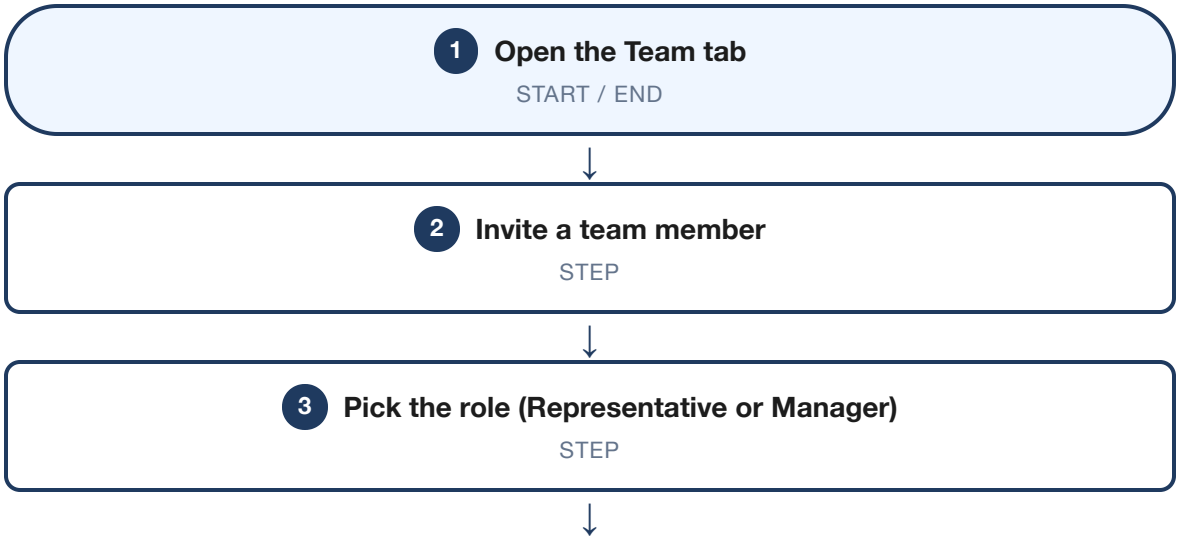

Goal

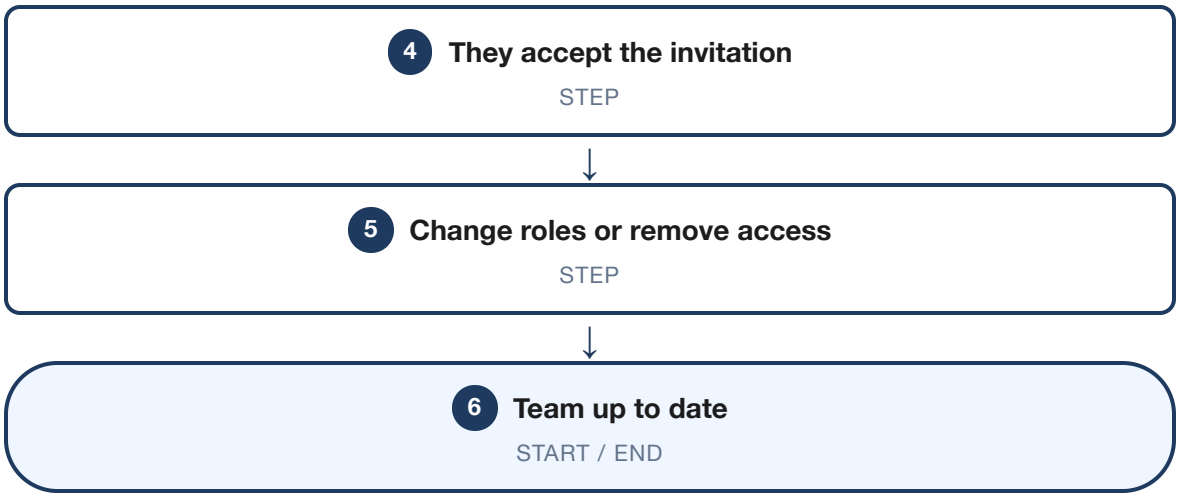

Invite the right people to your business, give each person the right role, and remove access when it is no longer needed.

Before you start

1. Sign in and open your business in the business hub.
2. Owner or manager capability for the business (role changes are checked per business).

Process map

Text version. 1. Open the Team tab in the business hub. 2. Choose the Invite button and enter the email address. 3. Pick the role: Representative (handles leads, follow-ups, and sales conversion) or Manager (day-to-day operations without ownership rights). 4. The invitee gets a notification and accepts. 5. Change roles from the Role column, approve pending members, or remove access when needed. 6. Your team list is current.

Steps

Step 1: Open the Team tab

Open /business-hub?tab=team for your business. The Team Members section lists current members and pending invitations with columns for Name / Email, Role, Status, and Since.

> **Expected result:** The team list loads with each member and their role and status.

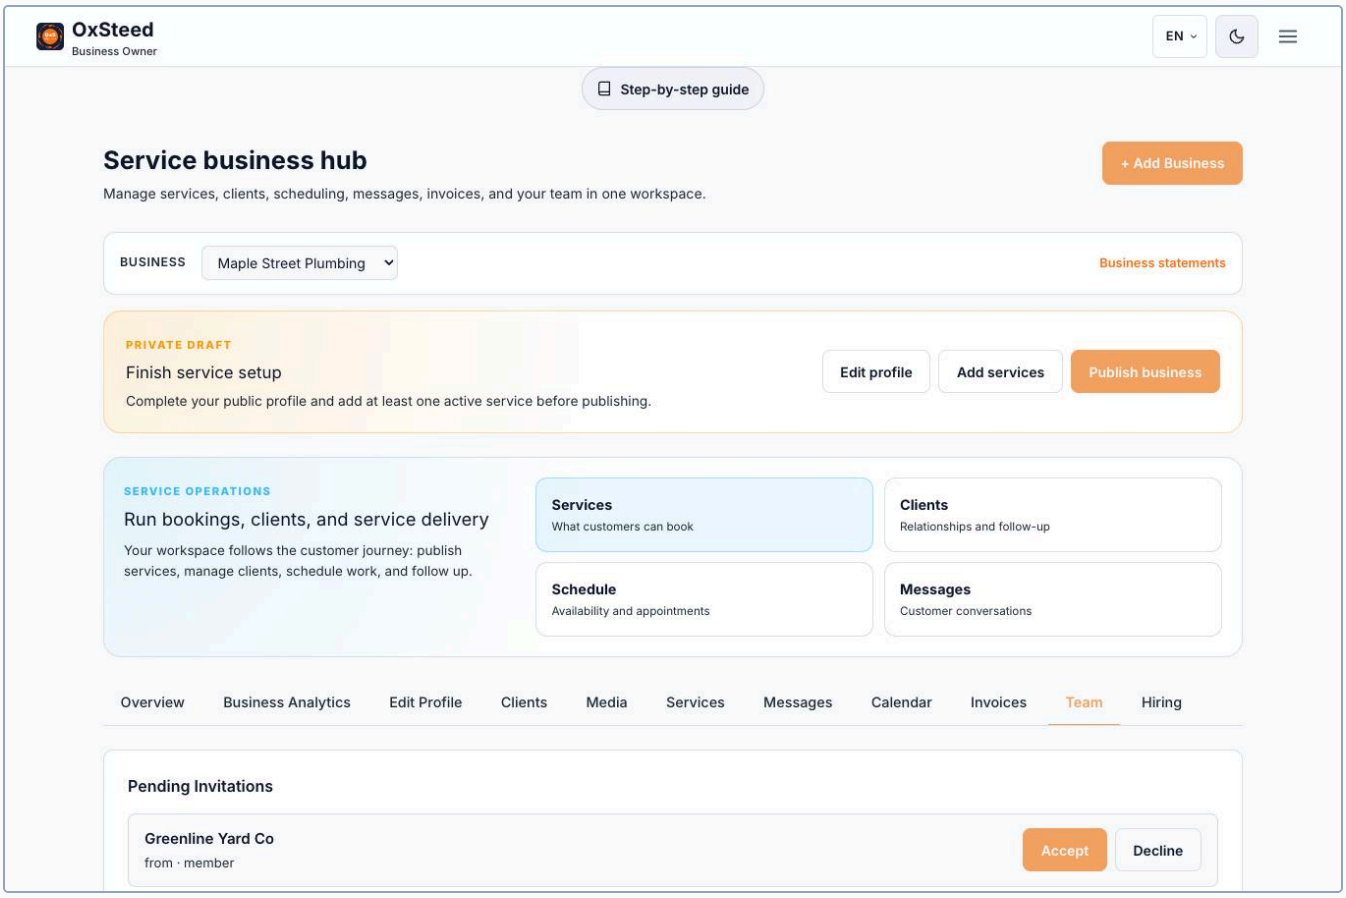

Figure 1. The Team tab, desktop view. *(Image description: Synthetic example: Service business hub)*

Step 2: Invite a team member

Choose the Invite button. In the Invite Team Member dialog, enter the Email address and pick the Role: Representative (handles leads, follow-ups, and sales conversion) or Manager (day-to-day operations without ownership rights). Choose Send Invite.

> **Expected result:** "Invitation sent" appears and the person shows as "Invite sent" in the list.

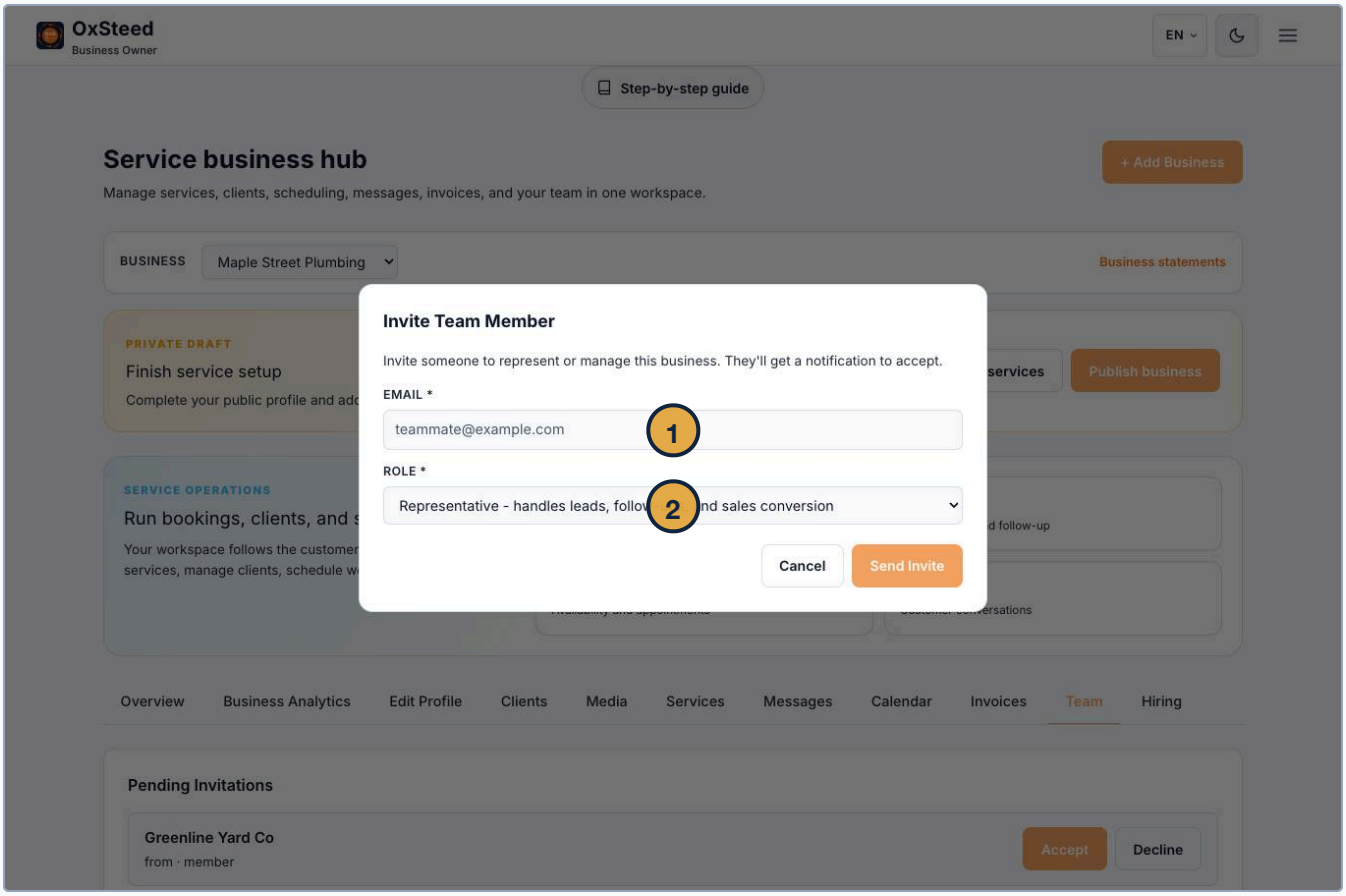

Figure 2. The Invite Team Member dialog, desktop view. *(Image description: Synthetic example: Service business hub)*

1. **1.** Email field
2. **2.** Role select

Step 3: Approve, change roles, and remove access

For members awaiting approval, use Approve or Deny. Change a member role any time from the Role column (Employee, Representative, Manager, Support Agent). To revoke, use Cancel on a pending invite or Remove on an active member.

> **Expected result:** Roles update immediately; removed members lose access.

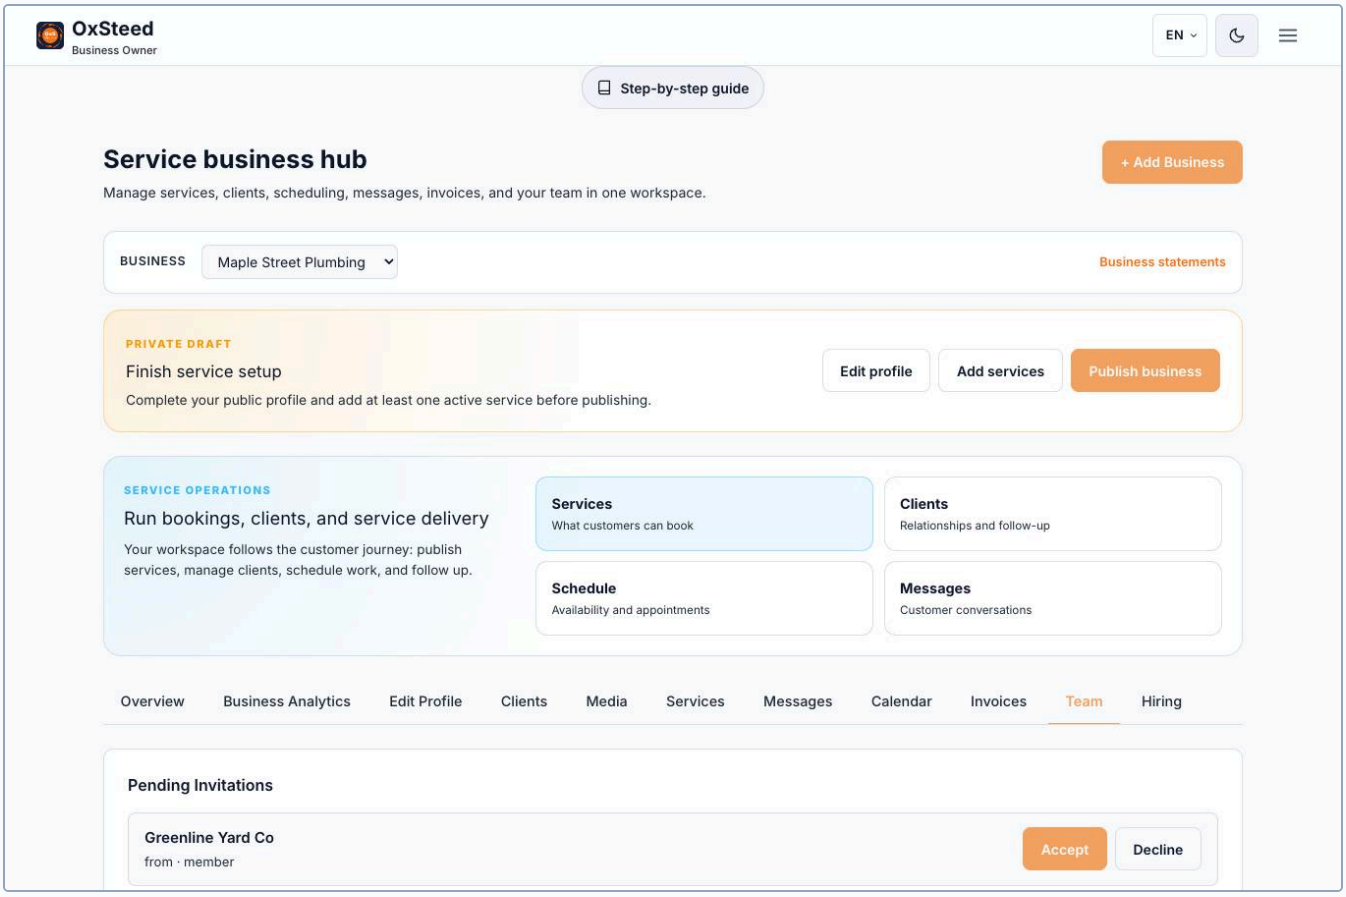

Figure 3. Managing a team member, desktop view. *(Image description: Synthetic example: Service business hub)*

Confirm it worked

The Team Members list shows every member with the correct role and Active status.

If something goes wrong

Problem	What to do

The invitee never got the invitation.	Confirm the email address is spelled correctly, then use Cancel on the pending invite and send a fresh one.
You cannot change a member role.	Role changes need owner or manager capability for the business. Team member modes are granted by the owner, not self-selected.

Need help?

If team invitations fail repeatedly, contact OxSteed Support from the /support page.

Guide ID: financial-archives | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Browse archived statements

Guide ID	**financial-archives**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-archives

Goal

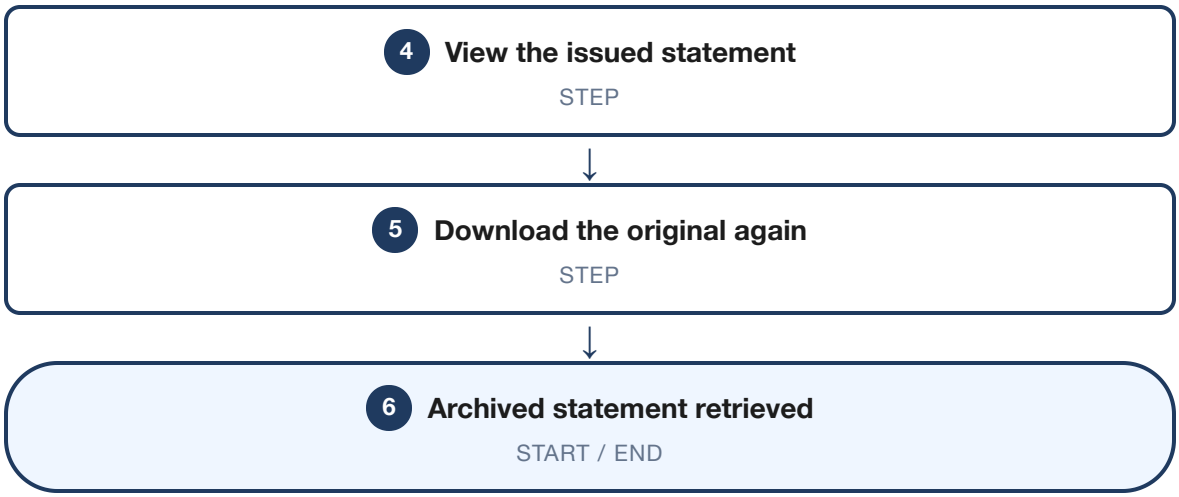

Find issued monthly statements in the archive and view or download the immutable originals.

Before you start

1. Sign in to your OxSteed account.
2. Know which product the statement belongs to (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement).

Process map

Text version. Open a product archive, for example /oxsteed-credit/statements/archive ("Statement archive": "Your issued monthly statements. Originals are immutable; download them again at any time."). Pick the product (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement). Find the statement period ("Jan 1 – Jan 31"), open it ("View"), and download the original ("Download issued", "Download CSV"). Each product has its own archive; they never merge.

Steps

Step 1: Open a statement archive

Open one of the archive routes: /oxsteed-credit/statements/archive for OxSteed Credit, /restaurant-credit/statements/archive for Restaurant Credit, /helper-earnings/statements for helper earnings, /business/statements for business statements, or /restaurant-settlement/statements for restaurant settlement. The page is titled "Statement archive".

> **Expected result:** The archive loads with the product selector and the issued statements.

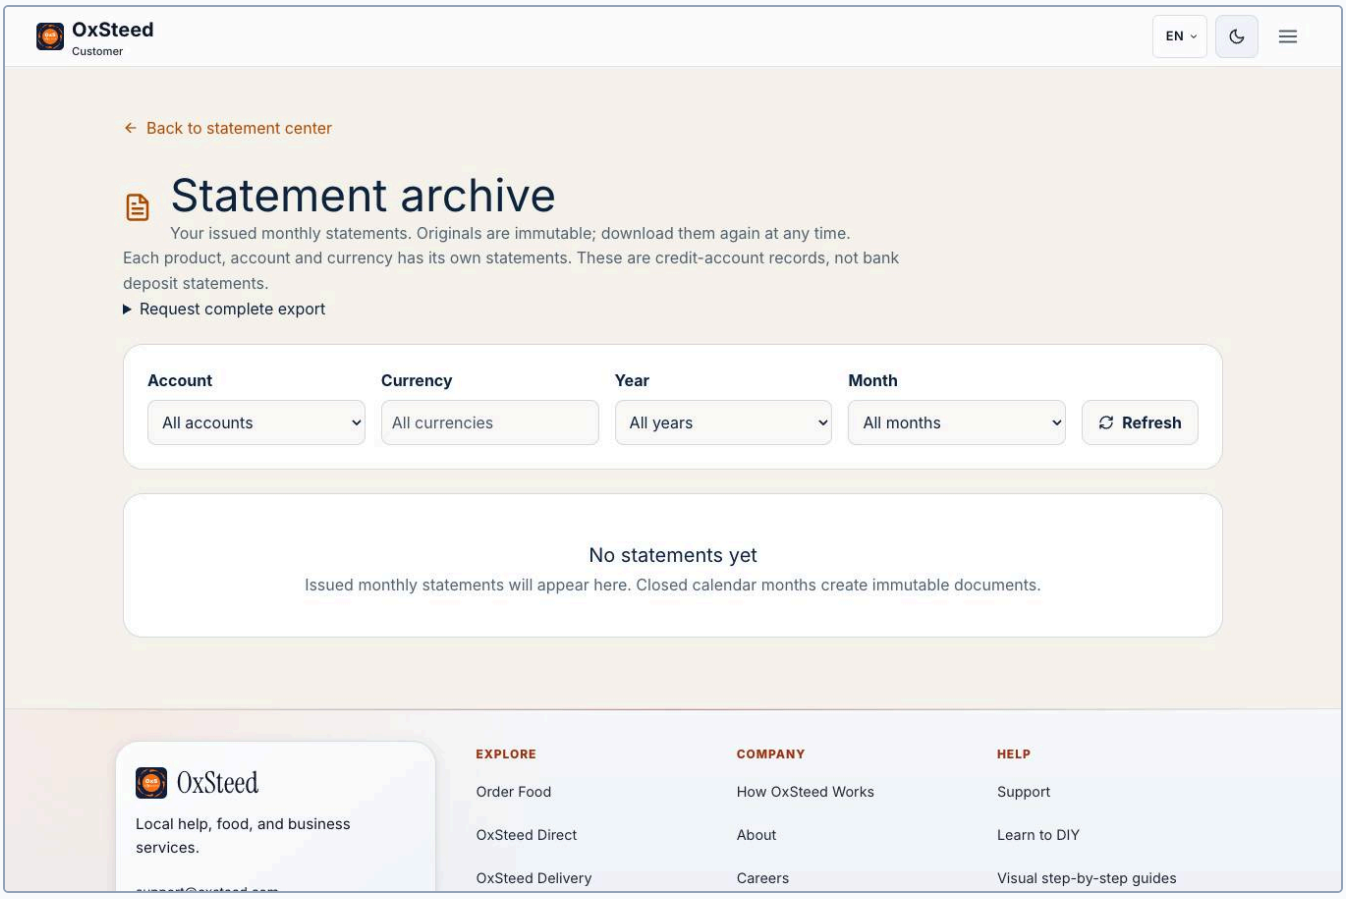

Figure 1. The statement archive, desktop view. *(Image description: Synthetic example: Statement archive)*

Step 2: Pick the product and find the period

Use the "Product" selector to switch products ("Each product, account and currency has its own statements. These are credit-account records, not bank deposit statements."). Find the statement by its period heading ("Jan 1 – Jan 31"). The totals line uses the product's own accounting vocabulary (for example "Opening payable", "Posted earnings", "Settled payouts and status removals", "Closing payable" for helper earnings).

> **Expected result:** The right statement document is on screen with its totals.

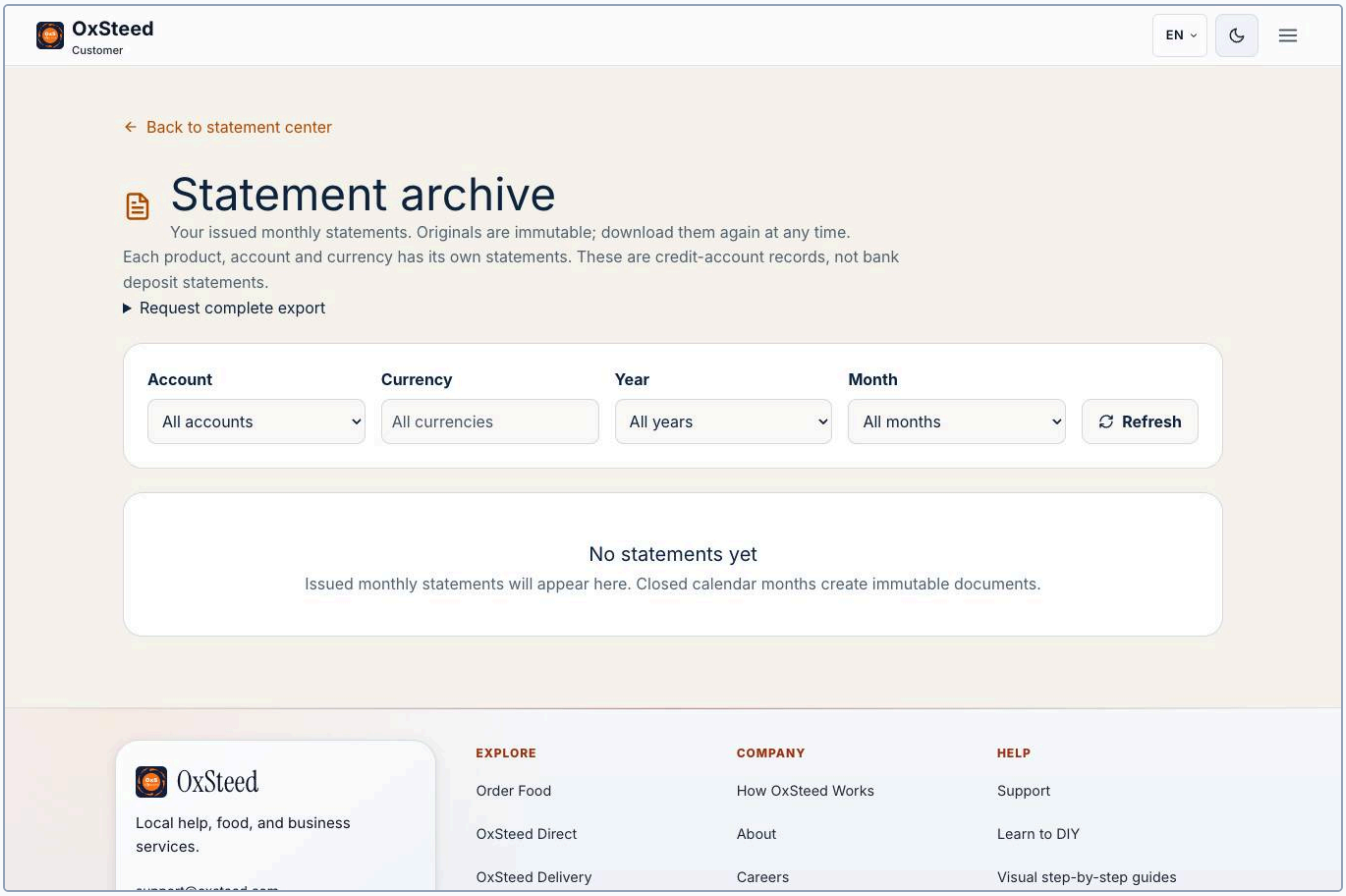

Figure 2. Picking a product and period, desktop view. *(Image description: Synthetic example: Statement archive)*

Step 3: View and download the issued statement

Choose "View" on the statement to read the issued document. Use "Download issued" for the immutable original or "Download CSV" for the data. Originals never change; if a statement was amended, the archive marks it and links the correction.

> **Expected result:** The statement opens or downloads with its full transaction history.

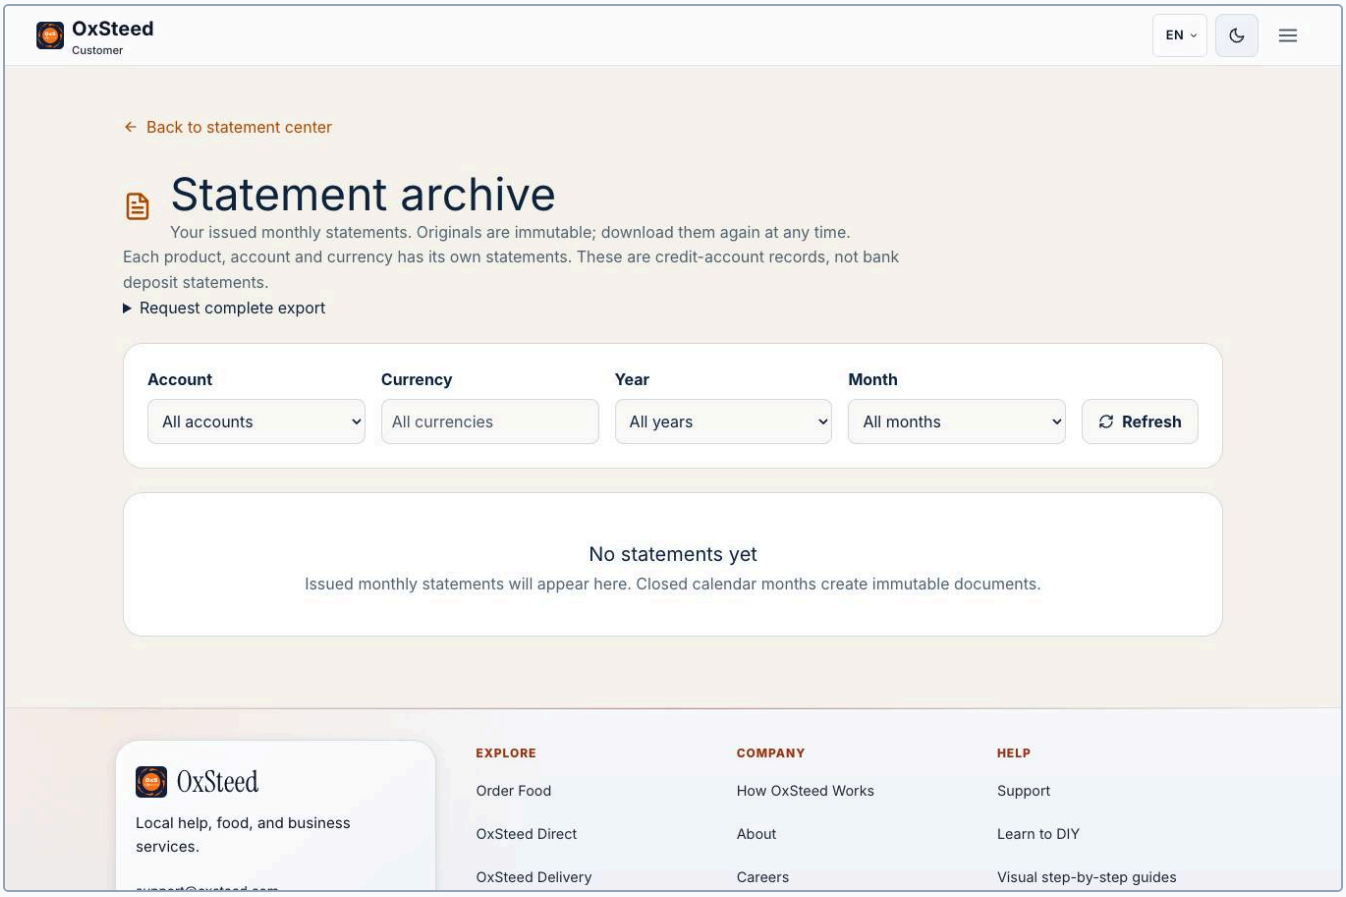

Figure 3. Viewing an issued statement, desktop view. *(Image description: Synthetic example: Statement archive)*

Confirm it worked

You have the issued statement open or downloaded, from the right product archive, with the immutable original.

If something goes wrong

Problem	What to do

The archive shows "No statements yet".	"Issued monthly statements will appear here. Closed calendar months create immutable documents." If you expected one, check the product selector; statements live under their own product.
You cannot find a statement for a different product.	Switch the "Product" selector or open the product's own archive route directly (for example /restaurant-credit/statements/archive).

Need help?

For archive issues, use the in-app support page at /support.

Guide ID: financial-downloads | **Revision:** 3 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Download statement exports

Guide ID	**financial-downloads**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-downloads

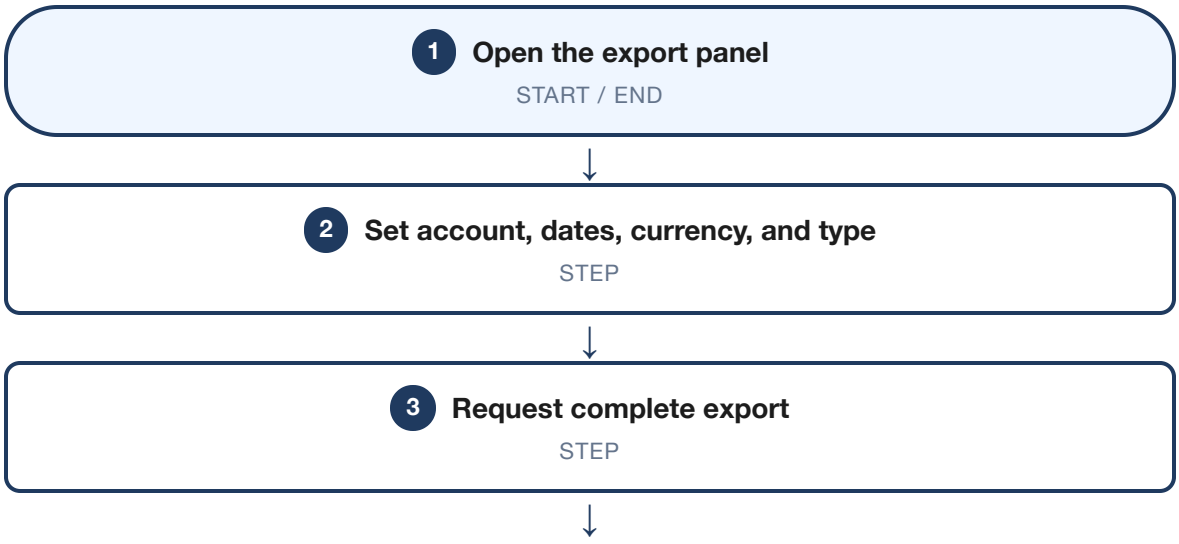

Goal

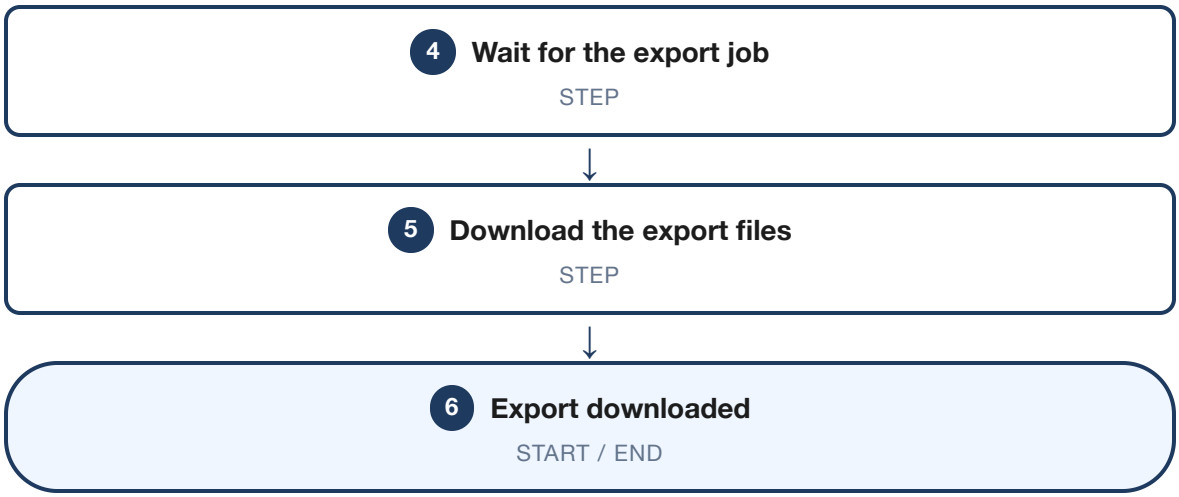

Export statement data as CSV or PDF for accounting, audits, or taxes.

Before you start

1. Sign in to your OxSteed account.
2. Know the account, date range, and format you need.

Process map

Text version. Open the statement archive for an authorized account. Expand Request complete export and choose account, dates, currency and format. Submit the request; follow its job page until complete, then download the files. Failures and cancellations have separate retry or cancel actions when offered.

Steps

Step 1: Open the export panel

From a statement archive, expand the export section and choose "Request complete export". You can also track a specific job at /statements/exports/:jobId. The panel heading reads "Request complete export".

> **Expected result:** The export form loads with the account and period fields.

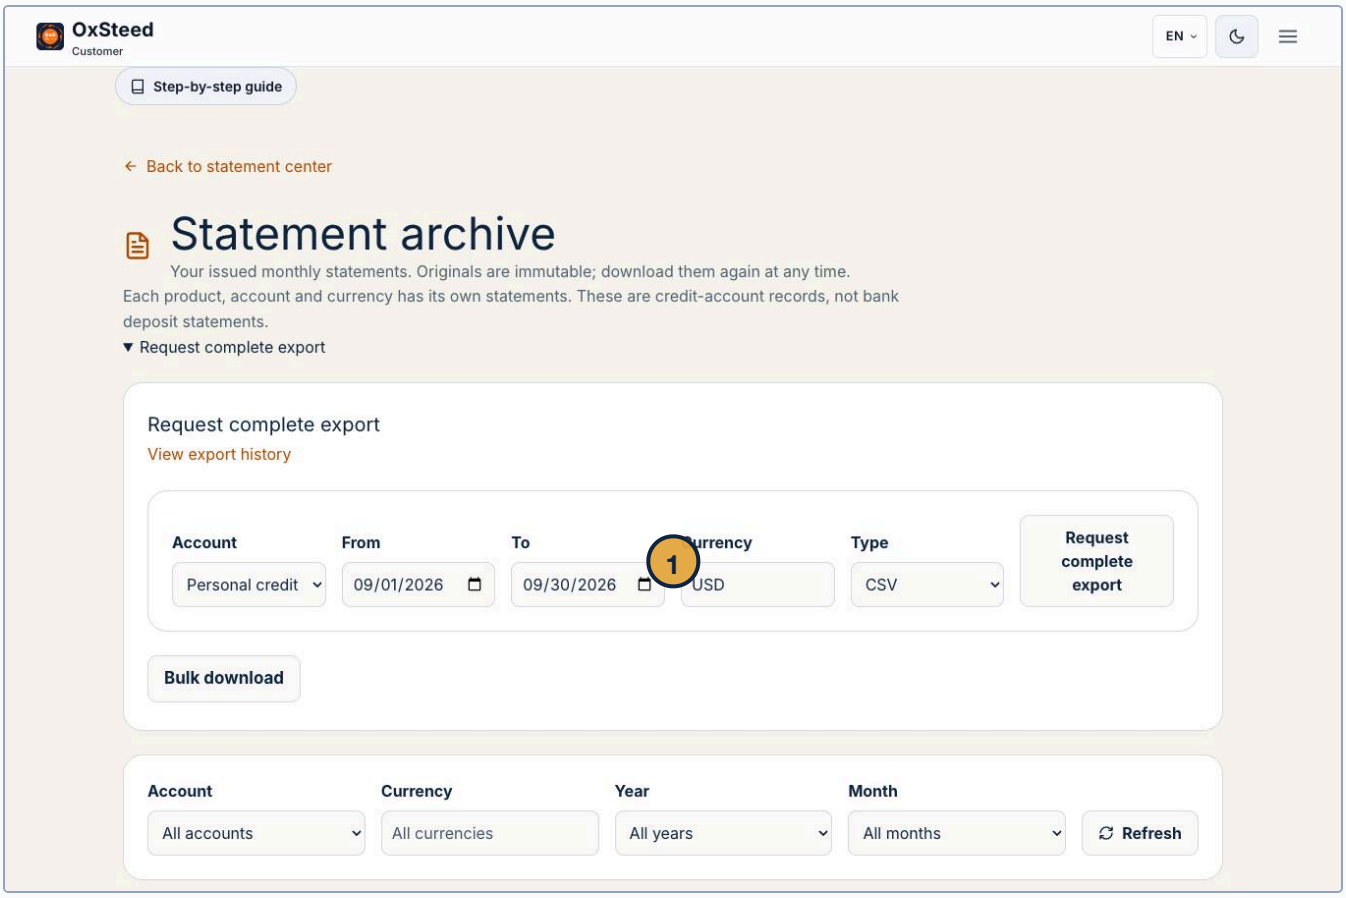

Figure 1. The export panel, desktop view. *(Image description: Synthetic example: Statement archive)*

1. **1.** Export form

Step 2: Set the export parameters and submit

Choose the "Account", the "From" and "To" dates, the "Currency" (3-letter code), and the "Type" (format), then choose "Request complete export". For several accounts at once, use the bulk section: check the accounts, pick the "Type", and start the bulk export.

> **Expected result:** The export job starts and shows its pending state.

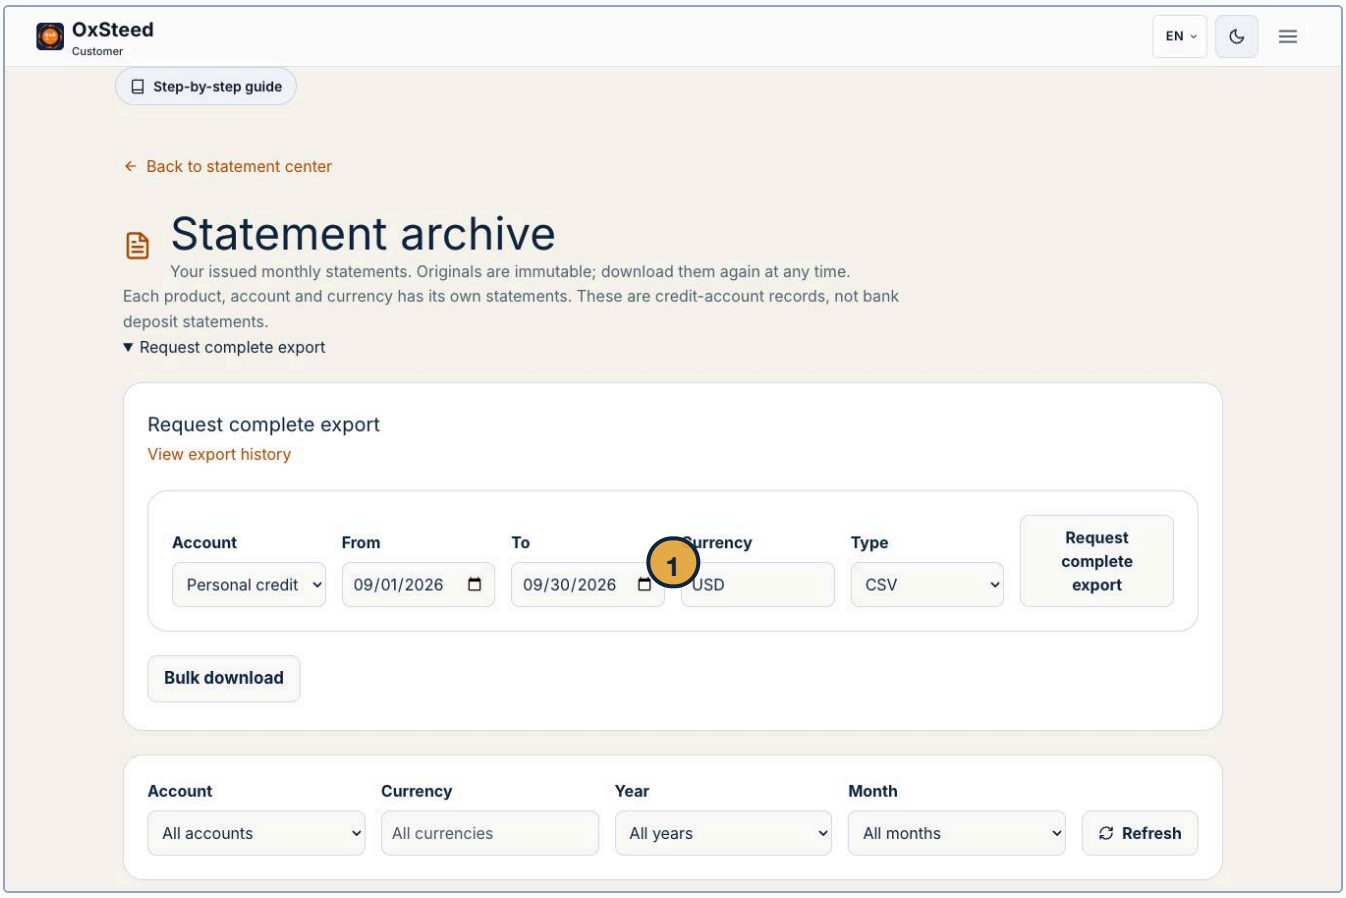

Figure 2. Submitting an export, desktop view. *(Image description: Synthetic example: Statement archive)*

1. **1.** Export form

Step 3: Track the job and download the files

The job shows its state: pending, complete, failed, or cancelled. While it runs you can use "Cancel export"; if it fails and "Retry export" is offered, use it. When complete, the "Export files" section lists each file ("Download CSV · part", with the row range). Use "View export history" for past jobs.

> **Expected result:** The export files download to your device.

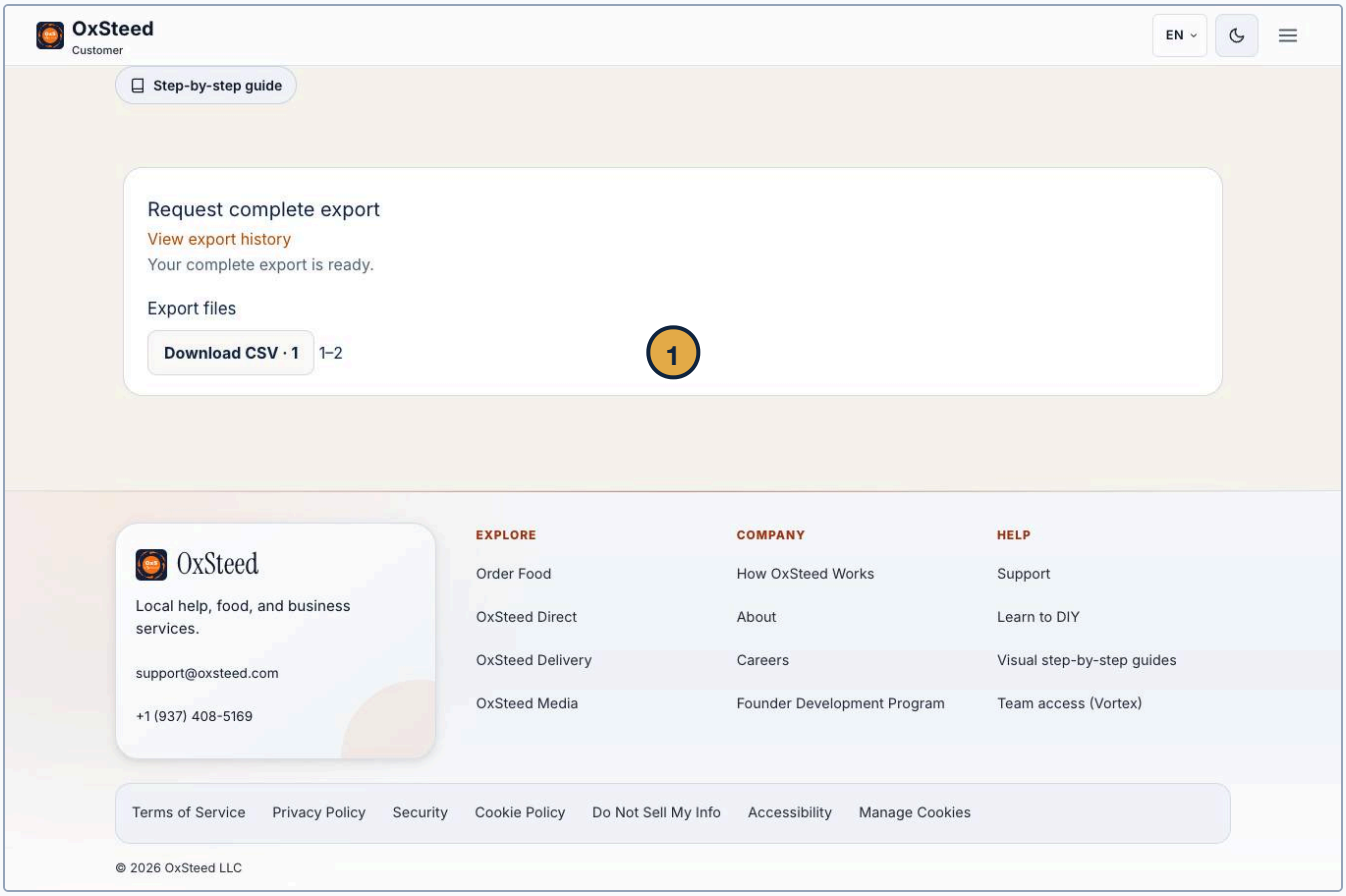

Figure 3. Downloading export files, desktop view. *(Image description: Export files list with download buttons)*

1. **1.** Export files list

Confirm it worked

The export files are on your device and the history lists the completed job.

If something goes wrong

Problem	What to do

The export fails.	You see "Your export could not be completed." Use "Retry export" if offered, or narrow the date range and request again.
The job is still running.	Large date ranges take longer. You can "Cancel export" and re-request a smaller range, or check "View export history" later.

Need help?

For export issues, use the in-app support page at /support.

Guide ID: financial-qr-payments | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Get paid by QR and pay by QR

Guide ID	**financial-qr-payments**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Helper, Business owner, Customer
Availability	**Supported**
Online version	/how-it-works/financial/financial-qr-payments

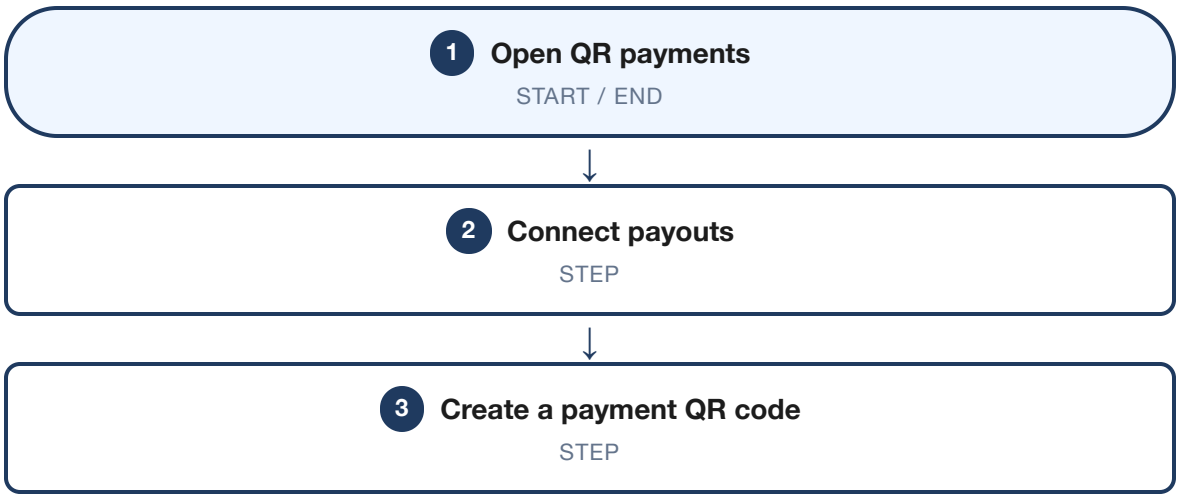

Goal

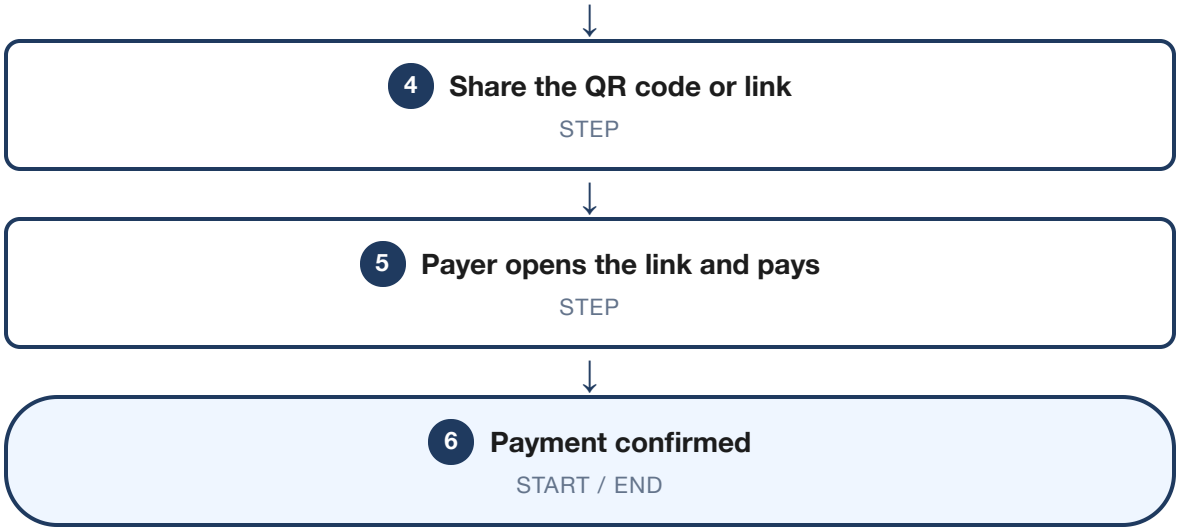

Create reusable QR payment codes as a helper or business, and pay someone by scanning or opening their QR link.

Before you start

1. Sign in to create or manage payment QR codes.
2. Payers need no OxSteed account: "Secure payment powered by Stripe. You do not need an account."

Process map

Text version. Open /qr-payments ("Get paid with QR codes": "Create QR codes your customers can scan to pay you directly. No app needed on their side."). First connect payouts with "Connect payouts". Then create a code under "Create a payment QR code" with a "Label" and either "Customer enters amount" or "Fixed amount". Manage codes under "Your payment QR codes" (Copy link, Download, Print, Activate/Deactivate, Delete). The payer opens /pay/:code, enters the amount if needed, and pays through the secure checkout step.

Steps

Step 1: Open QR payments and connect payouts

Open /qr-payments. If payouts are not connected, you see "Connect payouts first" ("To receive QR payments, connect your bank account with our secure payment partner. It takes a few minutes."). Choose "Connect payouts" and finish the partner setup. If the setup is incomplete you see "Finish Stripe setup" with "Continue in Stripe".

> **Expected result:** The create form and your code list unlock once payouts are connected.

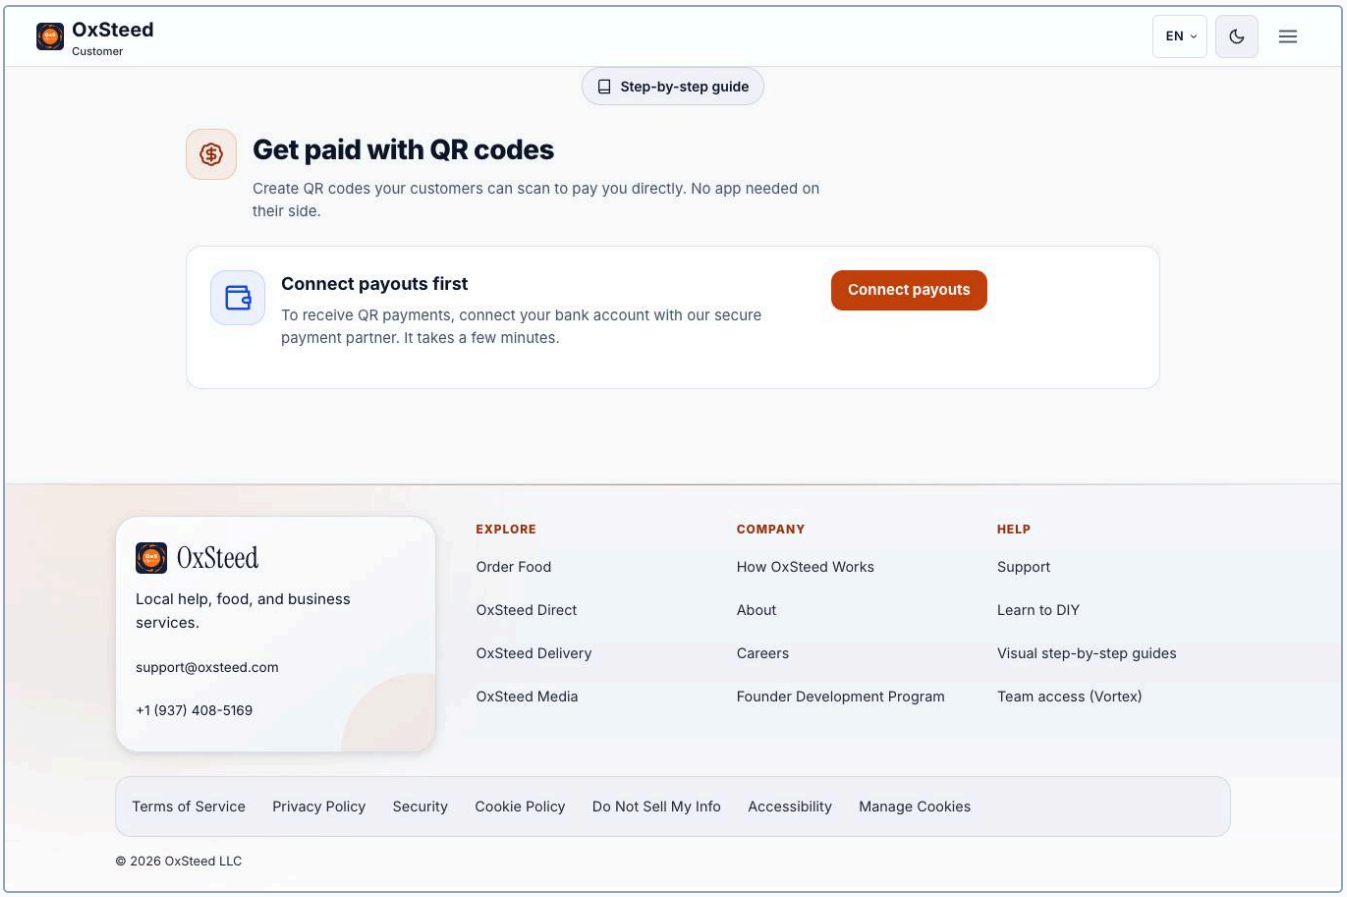

Figure 1. Connecting payouts, desktop view. *(Image description: Synthetic example: Get paid with QR codes)*

Step 2: Create a payment QR code

Under "Create a payment QR code", enter a "Label" ("e.g. Lawn mowing, Bakery pickup"). Under "Amount", pick "Customer enters amount" ("The customer chooses how much to pay when they scan.") or "Fixed amount" ("Every scan pays the same amount.") and enter the "Amount (USD)". Choose "Create QR code".

> **Expected result:** The new code appears under "Your payment QR codes" with its pay link.

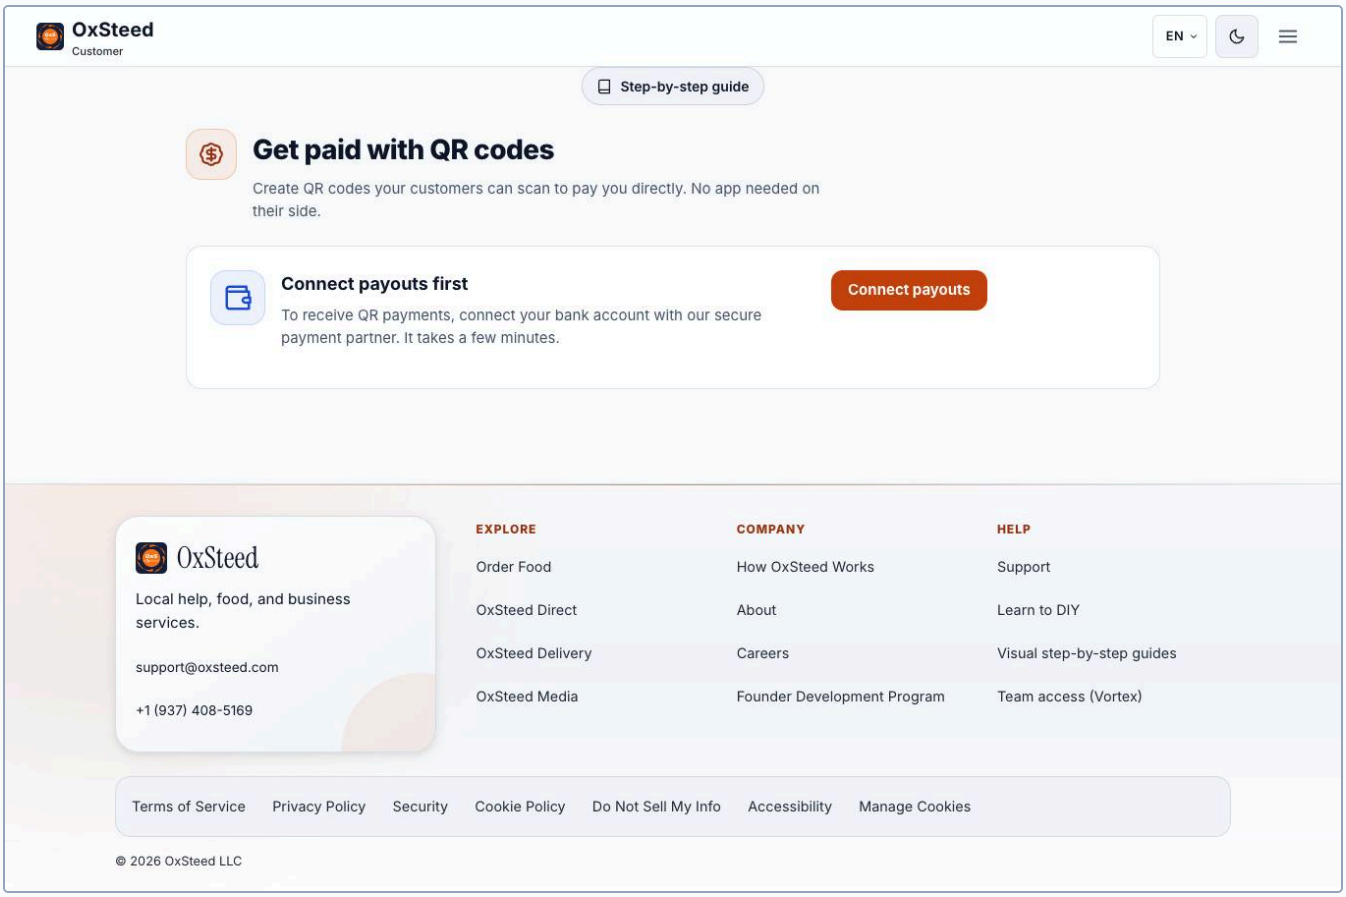

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Get paid with QR codes)*

Step 3: Manage and share your codes

Under "Your payment QR codes", each card shows the label, the "Active"/"Inactive" badge, the amount ("Open amount" for flexible codes), the total received, and the payment count. Use "Copy link" to share the pay URL, "Download" or "Print" for the QR image, the "Activate"/"Deactivate" toggle to control availability, and "Delete" to remove a code.

> **Expected result:** The code is shared or printed and ready to scan.

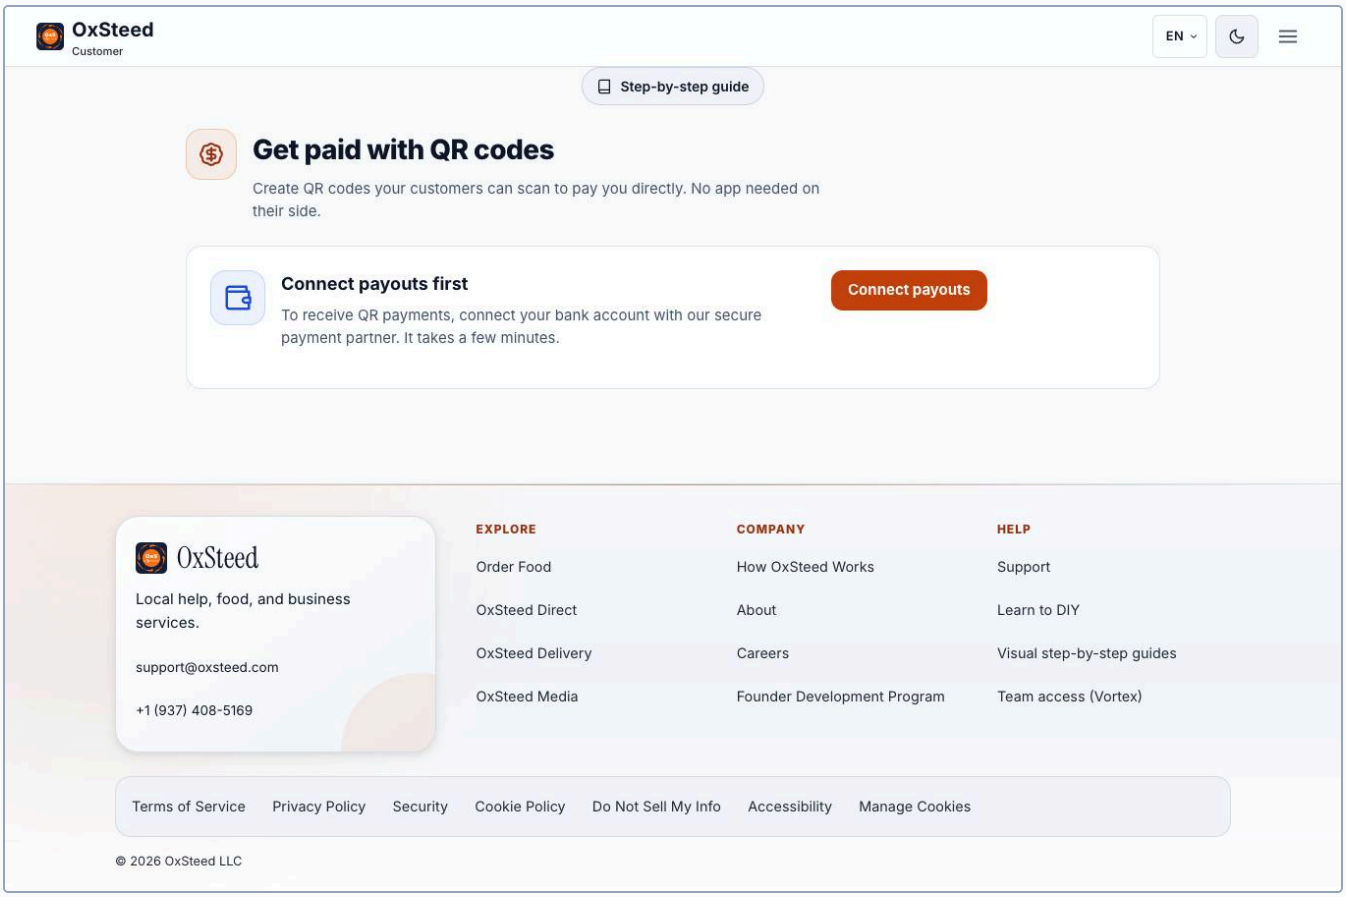

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Get paid with QR codes)*

Step 4: Pay through a QR link as a payer

Open the pay link (/pay/:code) or scan the QR. You see "Pay" plus the recipient name and either "Amount to pay" (fixed) or "Amount (USD)" ("Enter amount") for flexible codes. Optionally enter the "Email for receipt (optional)" ("you@example.com"). Choose the "Pay" button ("Pay X") to continue to the secure checkout step. If the recipient accepts credit, you may also see "Pay with OxSteed Credit".

> **Expected result:** You move to the secure checkout step; OxSteed returns you when the payment completes.

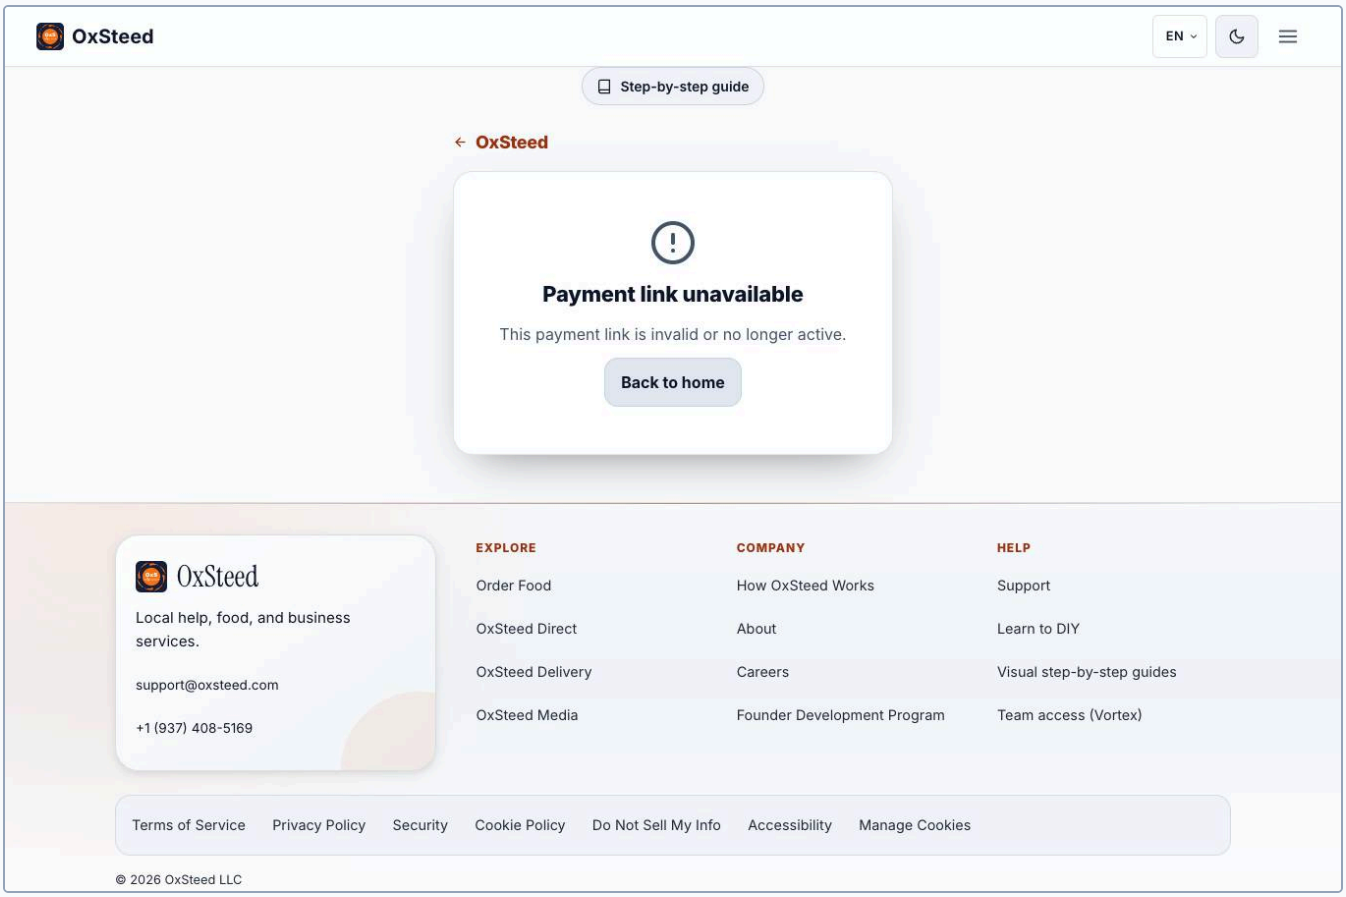

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Payer form with amount and pay button)*

Step 5: Confirm the payment succeeded

After the payment completes you see "Payment successful" with the amount and recipient, and "Back to home". If the link expired, you see "Payment link unavailable" with "Try again" on the current link.

> **Expected result:** The recipient sees the payment in their code stats and the payer has confirmation.

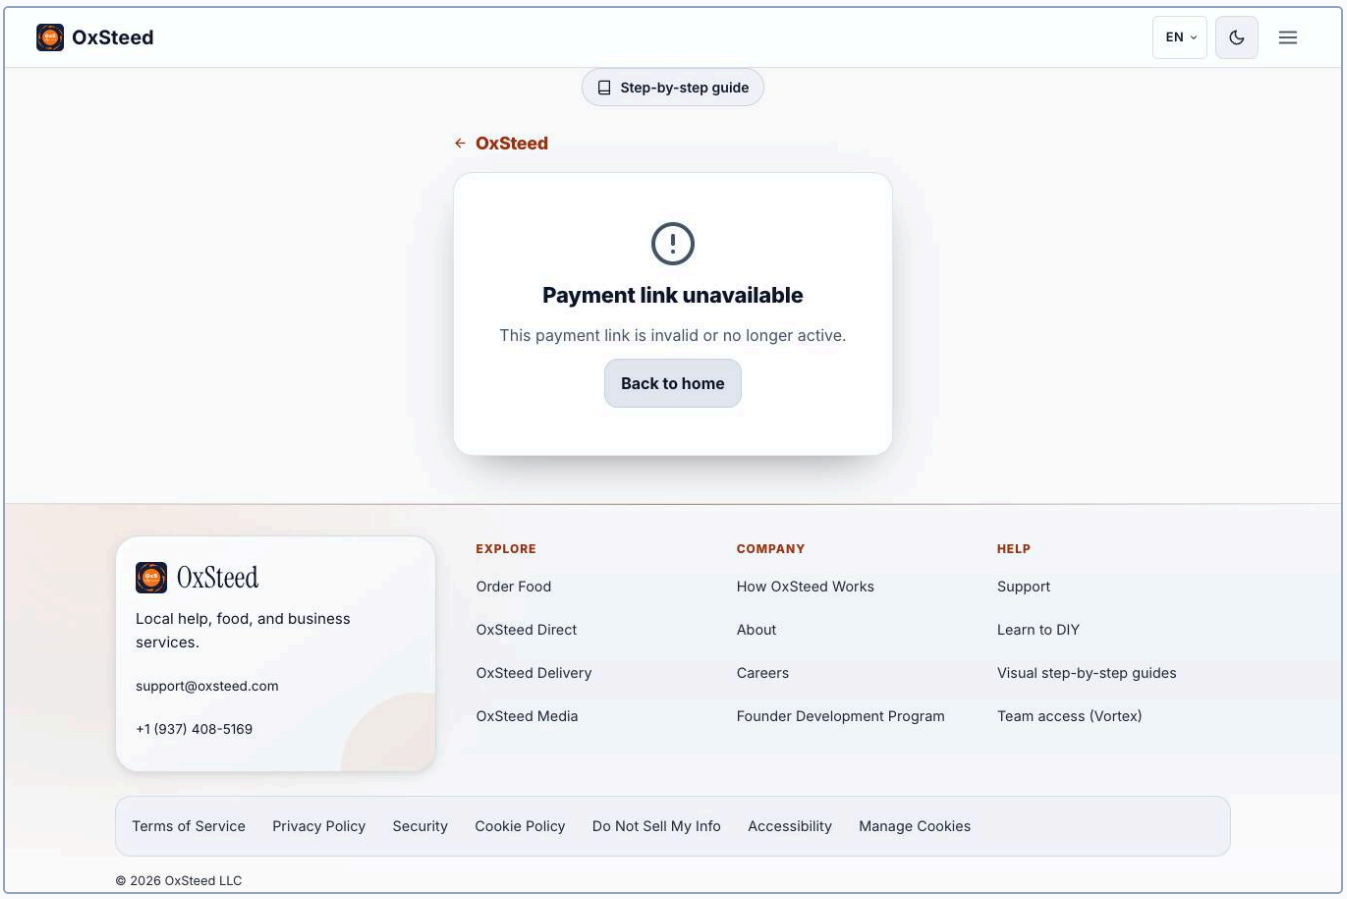

Figure 5. Payment confirmed, desktop view. *(Image description: Payment successful screen)*

Confirm it worked

The code exists under "Your payment QR codes", and payments show "Payment successful" with updated received totals on the card.

If something goes wrong

Problem	What to do

You see "Could not load your QR codes."	Choose "Retry" to reload the list.
A payer sees "Payment link unavailable".	The code was deactivated or deleted. Reactivate it with the "Activate" toggle, or share a new link with "Copy link".
The checkout step does not finish.	Return to /pay/:code and try again. OxSteed only counts the payment once the checkout step completes.

Need help?

For QR payment issues, use the in-app support page at /support.

Guide ID: financial-statements | **Revision:** 2 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS **ENGLISH**

View statements

Guide ID	**financial-statements**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-statements

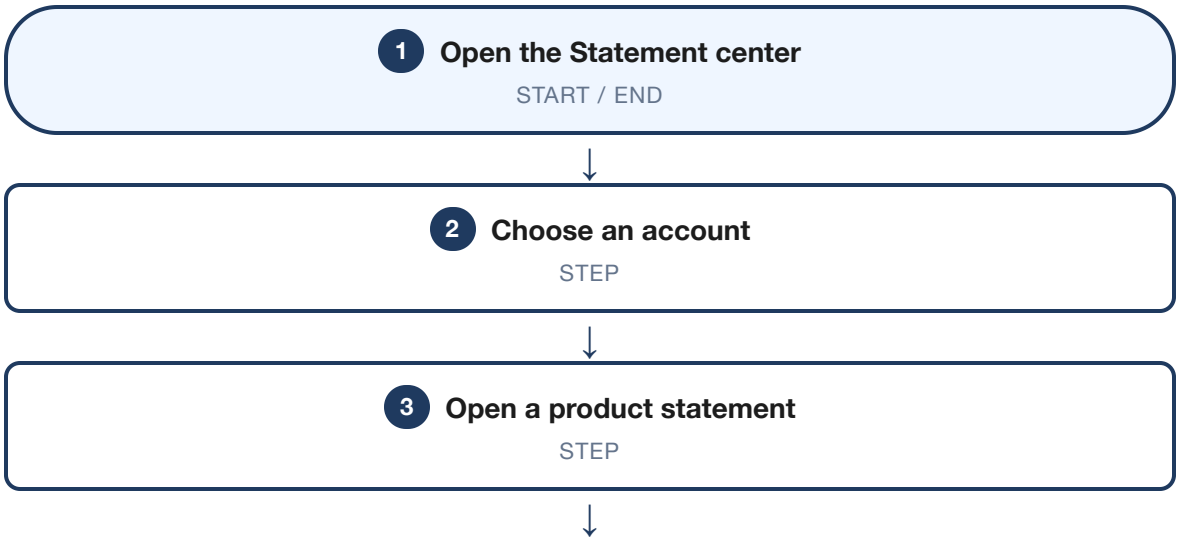

Goal

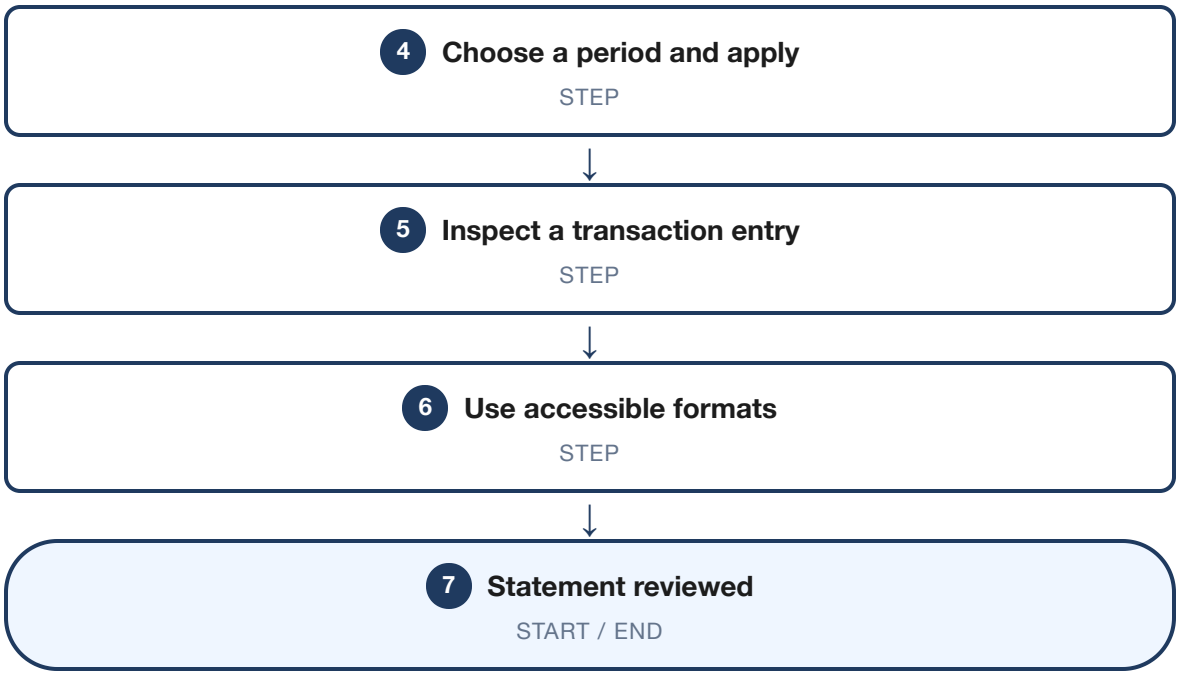

Find and read the right statement: the statement center, product statements, transaction details, and accessible formats.

Before you start

1. Sign in to your OxSteed account.

Process map

Text version. Open /statements ("Statement center": "Choose an account and a period, then review or download your records."). Note "Balances, currencies, and statement types stay separate." Choose an account ("Account and currency"), then open a product statement at /oxsteed-credit/statements or /restaurant-credit/statements ("Account statements": "Choose an account and statement period", then "Apply"). Inspect entries ("Entry details") and report issues. Use the accessible statement page for a tagged PDF, accessible HTML, or CSV.

Steps

Step 1: Open the Statement center and choose an account

Open /statements. The "Statement center" shows "Choose an account" with your statement accounts. Use "Search all records" or "Period activity" to narrow, and "Change account" to switch. The note "Balances, currencies, and statement types stay separate." reminds you each account keeps its own records.

> **Expected result:** The accounts list loads with the selected account's periods.

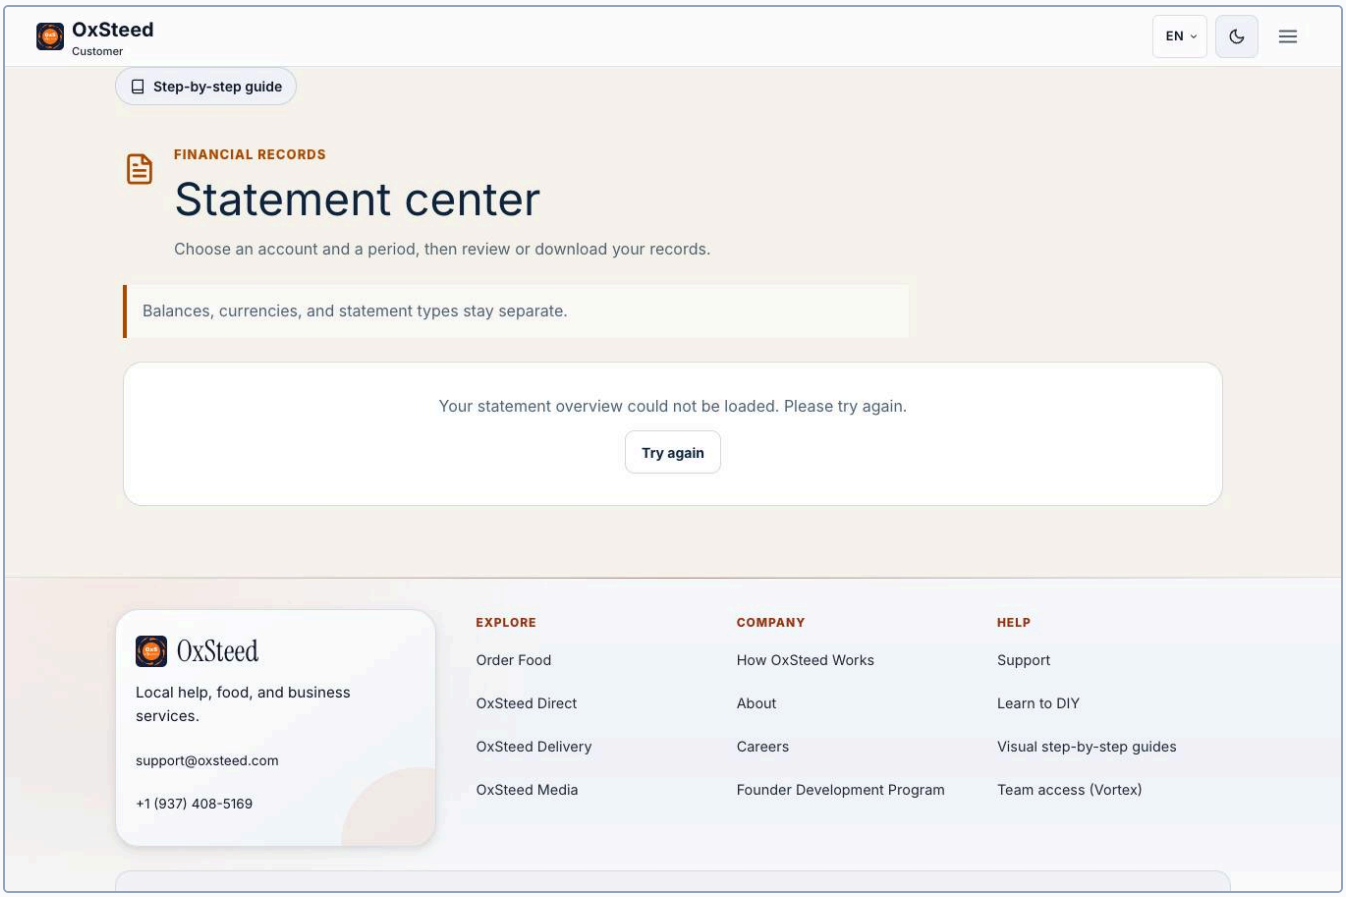

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Statement center)*

Step 2: Open a product statement and choose a period

Open /oxsteed-credit/statements ("OxSteed Credit" statements) or /restaurant-credit/statements ("Restaurant Credit" statements). "Choose an account and statement period" ("Select Apply to generate or retrieve your statement."), then choose "Apply". Dates use UTC; "Closed calendar months create immutable monthly documents on demand. Current or custom periods are interim reports."

> **Expected result:** The "Posted activity" list fills with the period's transactions and "Download PDF" / "Download CSV" appear.

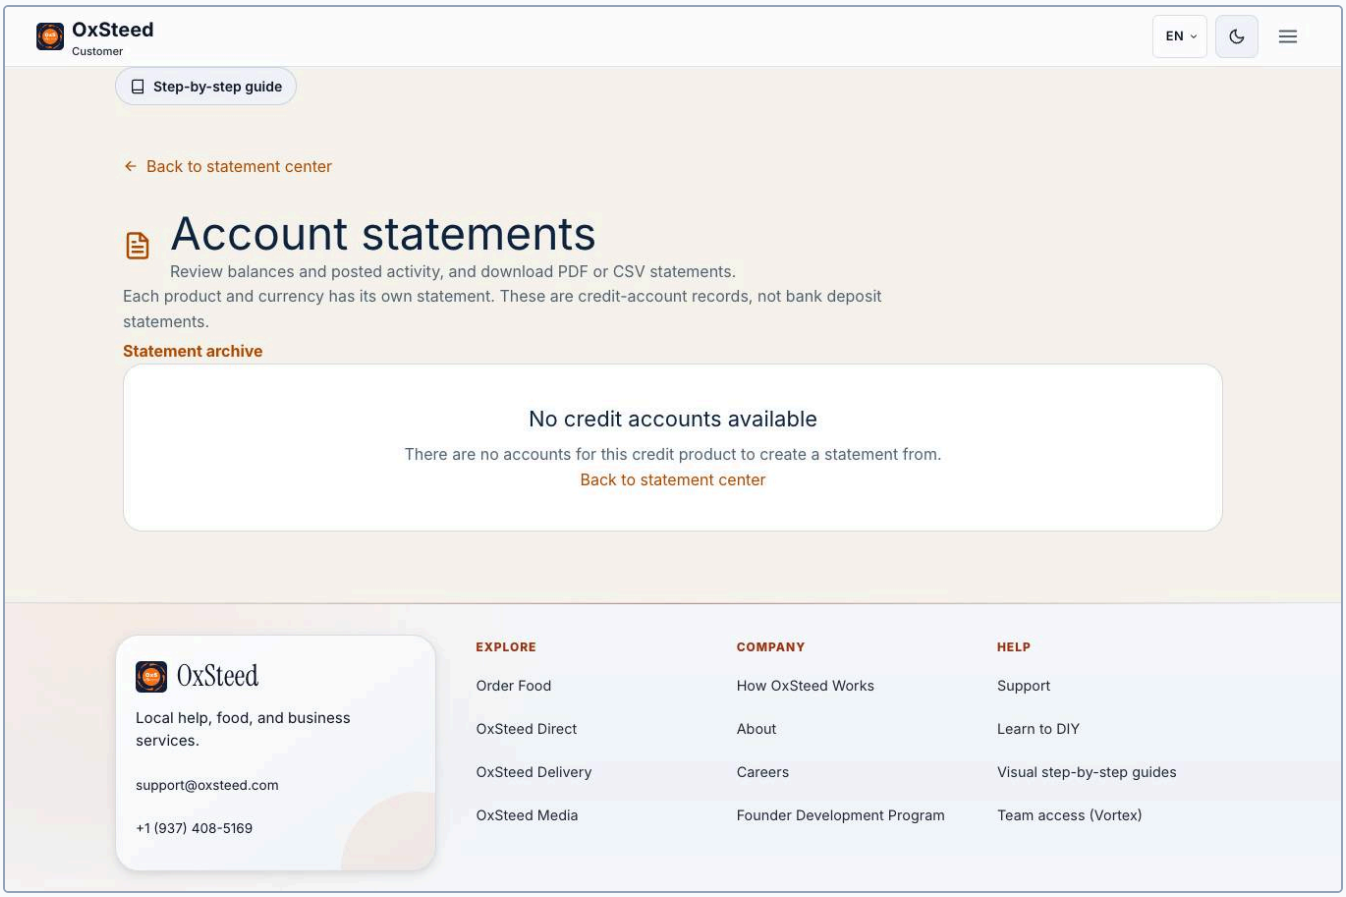

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Account statements)*

Step 3: Filter and review posted activity

In "Posted activity", each row shows the date, type, "Credit"/"Debit", "Description", and "Balance after". Use "Advanced filters" to narrow by "Activity type", "Min amount"/"Max amount", "Direction" ("Debits and credits", "Debits only", "Credits only"), "Status", or related record ("Food orders", "Top-ups and funding", "Settlements and payouts", "Adjustments", "Refunds"), then "Apply filters".

> **Expected result:** The list shows "{{count}} of {{total}} transactions" matching your filters.

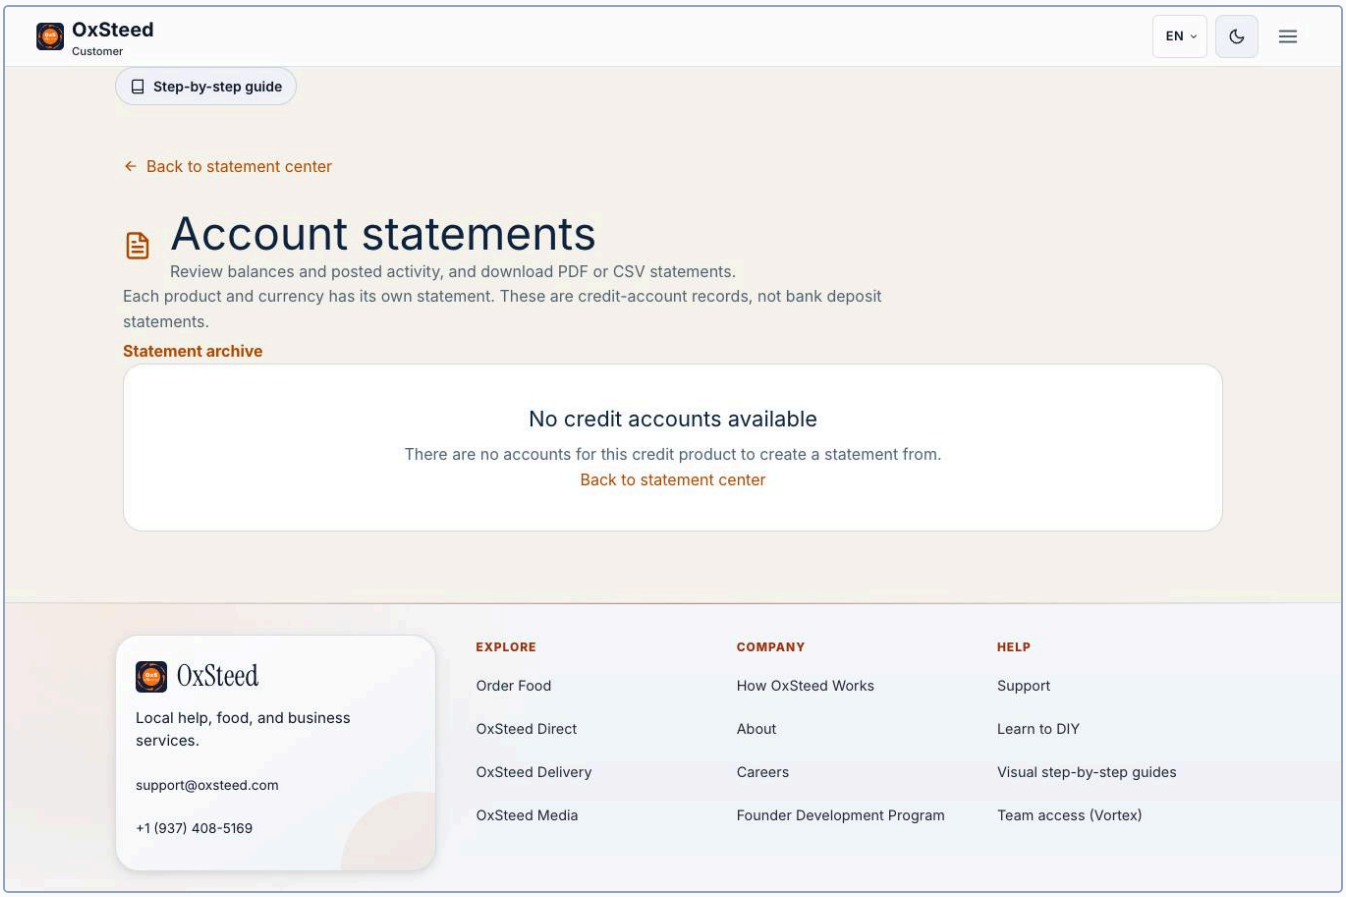

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Account statements)*

Step 4: Inspect a transaction entry

Open an entry to reach /statements/:documentId/entries/:entryId ("Statement transaction": "Entry details"). Review "Posted (UTC)", "Type", "Amount", "Balance after", "Reference", and the related record ("View" opens the linked order or payment). If something looks wrong, use "Report an issue" with a "Reason" and "Details", then "Submit report" ("Tell us what looks wrong. Filing a report never moves money; it opens a case for review.").

> **Expected result:** The entry facts are clear and any issue is filed as a report.

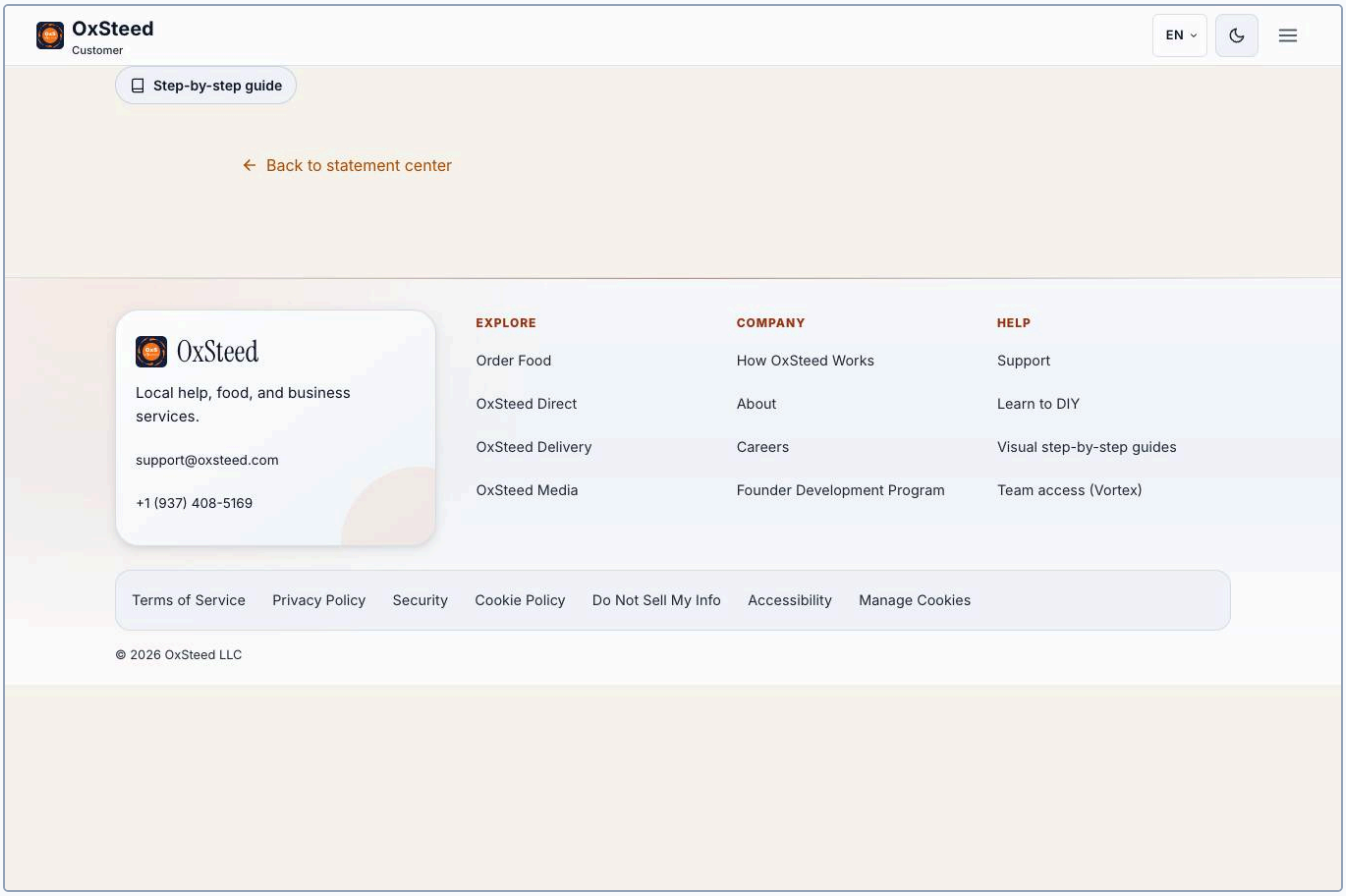

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Entry details with posted date, type, and amounts)*

Step 5: Use accessible formats

Open /statements/:documentId/accessible ("Accessible statement": "Download a tagged PDF, an accessible HTML version, or a CSV of this statement."). Choose "Download accessible PDF" ("Tagged PDF": "A PDF with a tagged structure for screen readers."), "Open accessible HTML" ("Accessible HTML": "The same statement as a web page with a semantic table, headings, and right-to-left support for Arabic."), or "Download CSV" ("CSV data": "Every transaction row as plain data for spreadsheets and screen readers.").

> **Expected result:** The statement downloads in the format you chose.

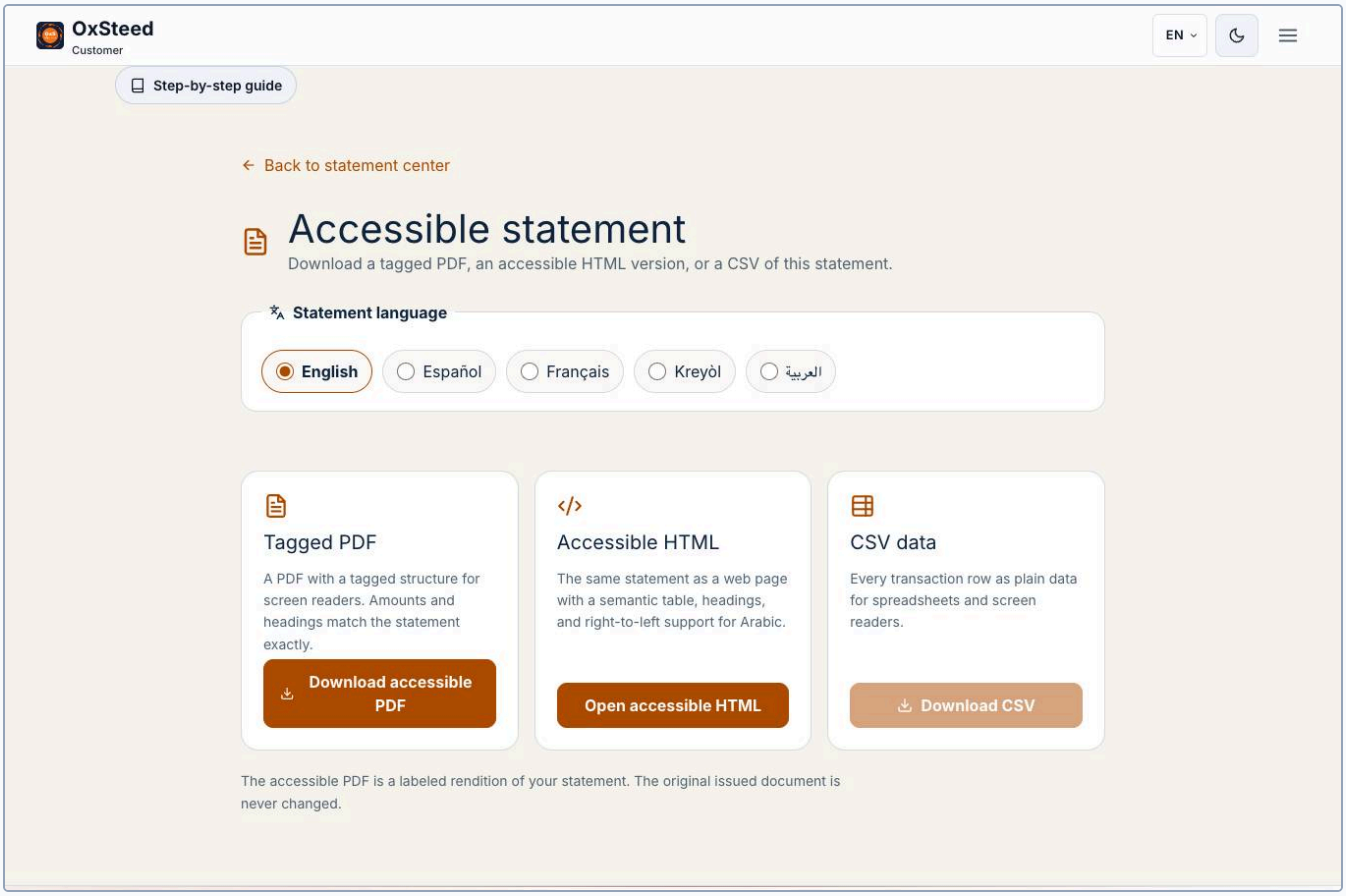

Figure 5. Accessible formats, desktop view. *(Image description: Synthetic example: Accessible statement)*

Confirm it worked

You can open the right account, period, and entry, and download the statement in a usable format.

If something goes wrong

Problem	What to do
The page shows "No statement accounts are available yet."	Accounts appear here when available to you. If you expect one (for example after a top-up), use "Retry" and check the wallet first.
The period shows "No posted activity in this period".	Widen the From/To range or choose a different account; current or custom periods are interim reports and may legitimately be empty.
A report cannot be opened from an entry.	You see "A report cannot be opened from this statement entry. Contact Support for help." Use the in-app support page at /support instead.

Need help?

For statement issues, use the in-app support page at /support.

Guide ID: logistics-sourcing | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Create sourcing requests and collect supplier quotes

Guide ID	**logistics-sourcing**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer), Business owner
Availability	**Supported**
Online version	/how-it-works/logistics/create-sourcing-request

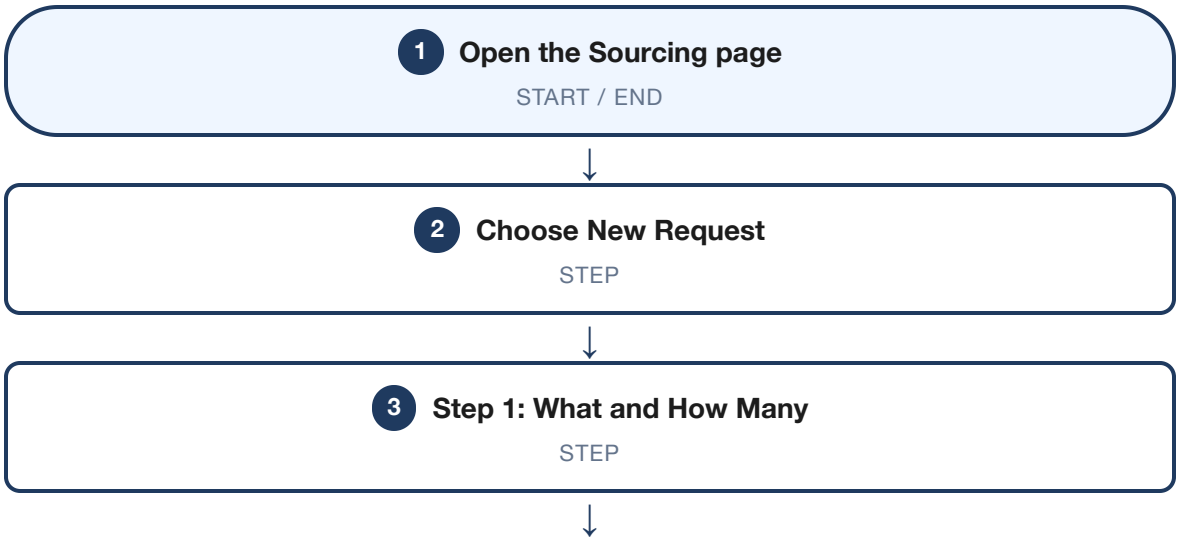

Goal

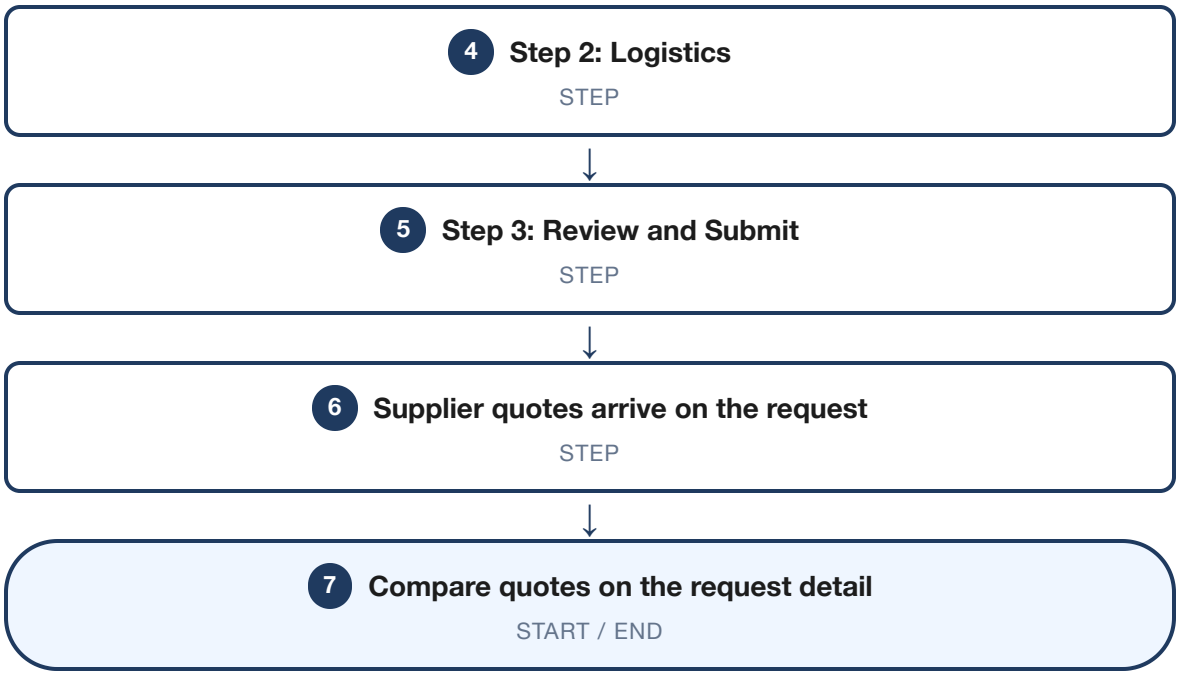

Publish a sourcing request with product specs and logistics details so suppliers can send quotes.

Before you start

1. A signed-in OxSteed account.
2. Product details: title, category, quantity, target price, destination country.

Process map

Text version. 1. Open the Sourcing page. 2. Choose New Request. 3. Complete step 1, What and How Many: product title, category, specs, quantity, and pricing targets. 4. Complete step 2, Logistics: lane, destination country, freight mode, need-by date, and attachments. 5. Review everything in step 3 and choose Submit Request. 6. Supplier quotes arrive on the request, and you compare them on the request detail page.

Steps

Step 1: Open the Sourcing page

Choose Sourcing in the logistics navigation, or open /logistics/sourcing directly. The page is titled "Sourcing" with the subtitle "Request, quote, and convert, from first inquiry to purchase order." Your existing requests appear in a table with columns Reference, Title, Category, Lane, Qty, Status, and Quotes. Choose "New Request" to start.

> **Expected result:** The Sourcing page loads with your request table and the "New Request" button.

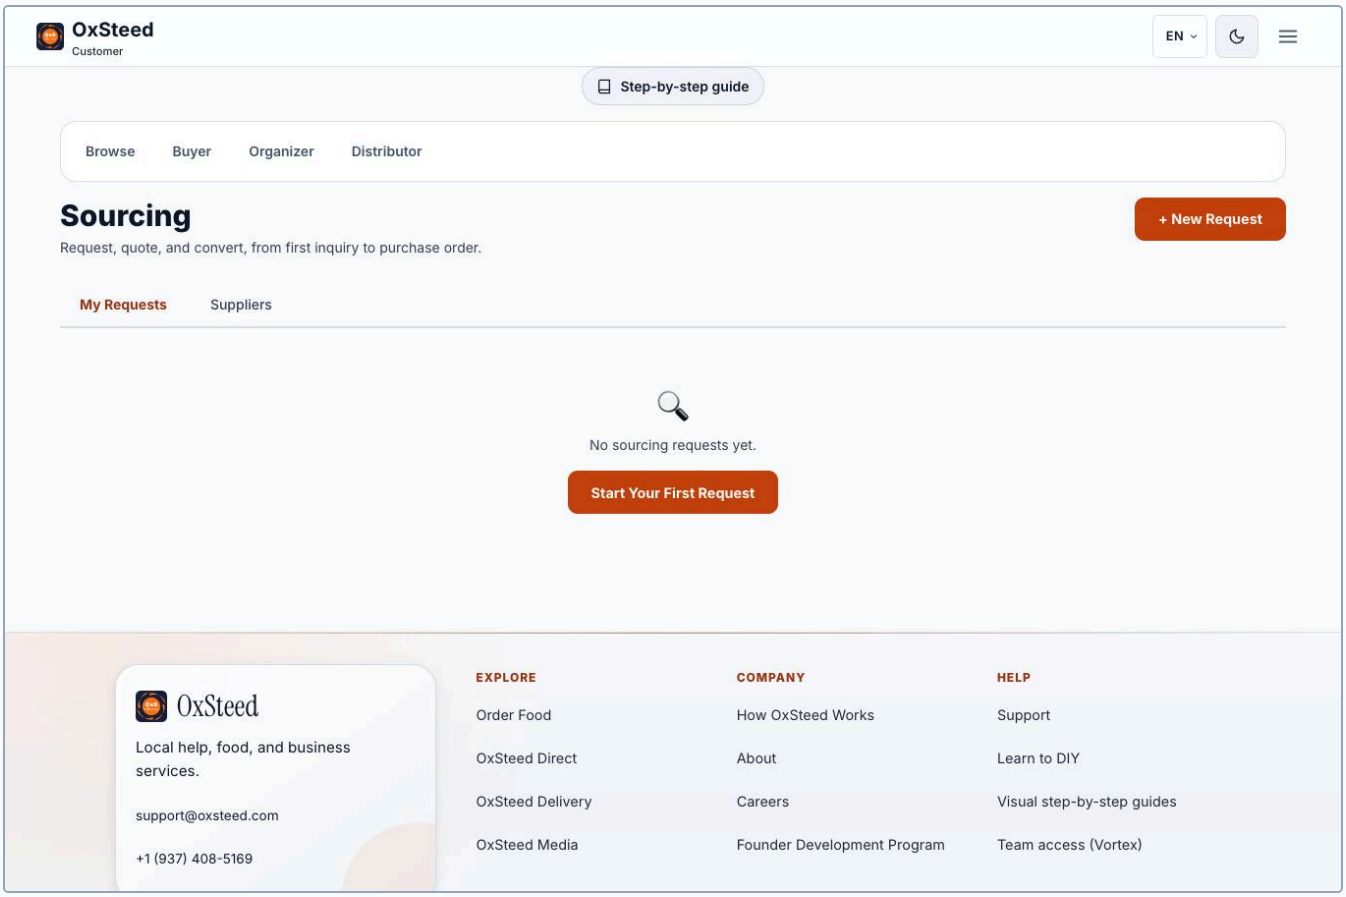

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Sourcing)*

Step 2: Describe what you need and how many

On the "New Sourcing Request" page, step 1 is "What & How Many". Enter "Product Title", choose "Category", write "Description / Specs", and enter "Quantity", "Target Unit Price (USD)", and "Total Budget (USD)". Use the "Back" and "Next" buttons to move between steps.

> **Expected result:** Step 1 fields are complete and "Next" moves you to the Logistics step.

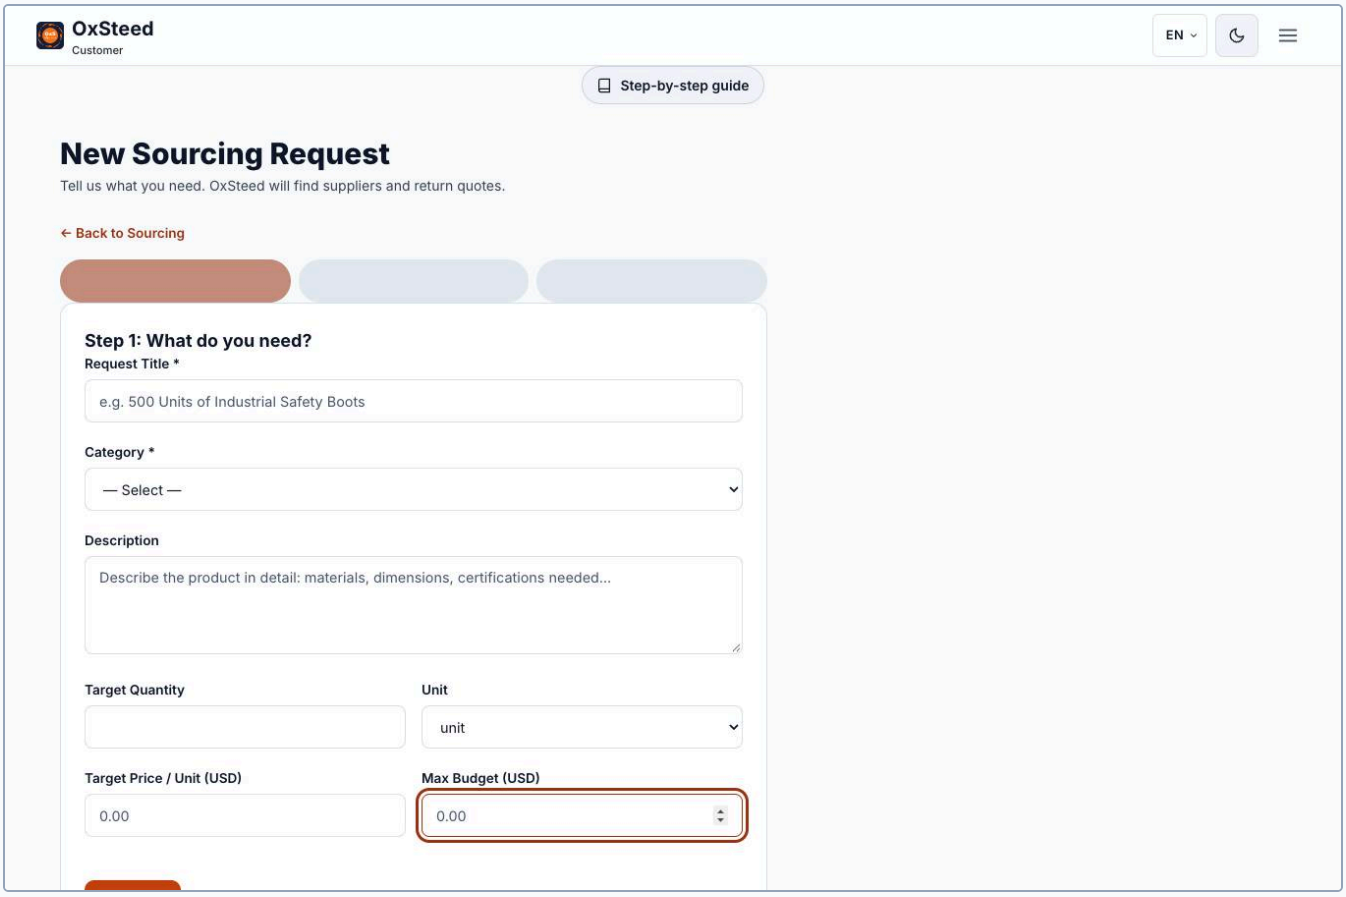

Figure 2. Step 1: What and How Many, desktop view. *(Image description: Synthetic example: New Sourcing Request)*

Step 3: Set the logistics details

Step 2 is "Logistics". Choose the "Lane", "Destination Country", and "Preferred Freight Mode", set "Need By Date", and add "Attachments (optional)" such as spec sheets. Choose "Next" to continue.

> **Expected result:** The logistics fields are complete and you reach the review step.

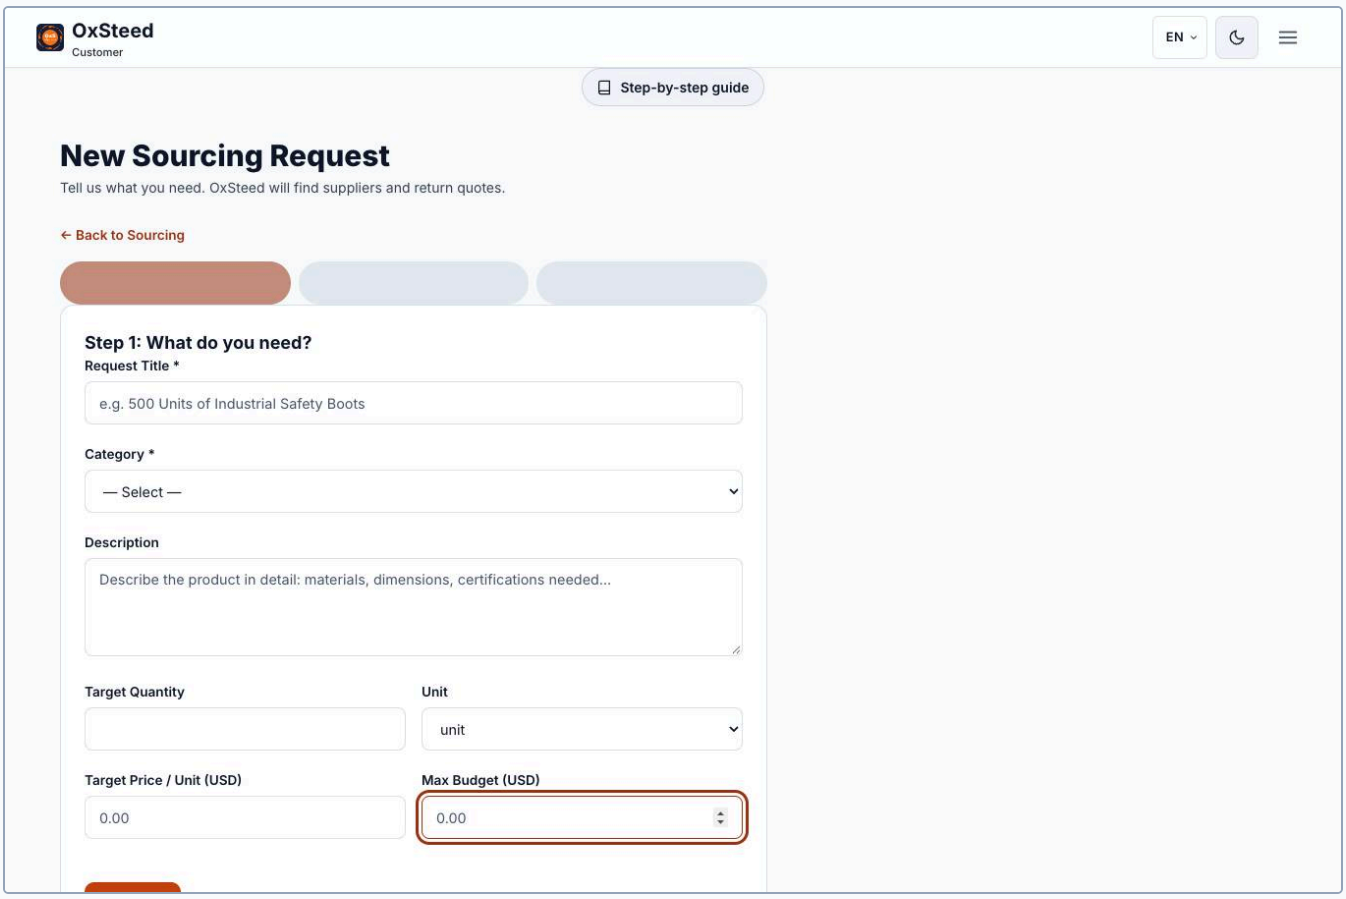

Figure 3. Step 2: Logistics, desktop view. *(Image description: Synthetic example: New Sourcing Request)*

Step 4: Review and submit the request

Step 3 is "Review & Submit" with the heading "Review your request". Check the summary of product, logistics, and pricing. Choose "Submit Request". You land on the request detail page, which shows the "Specifications" section and the "Quotes ({{count}})" section.

> **Expected result:** The request is published and the detail page shows "Quotes (0)" until suppliers respond.

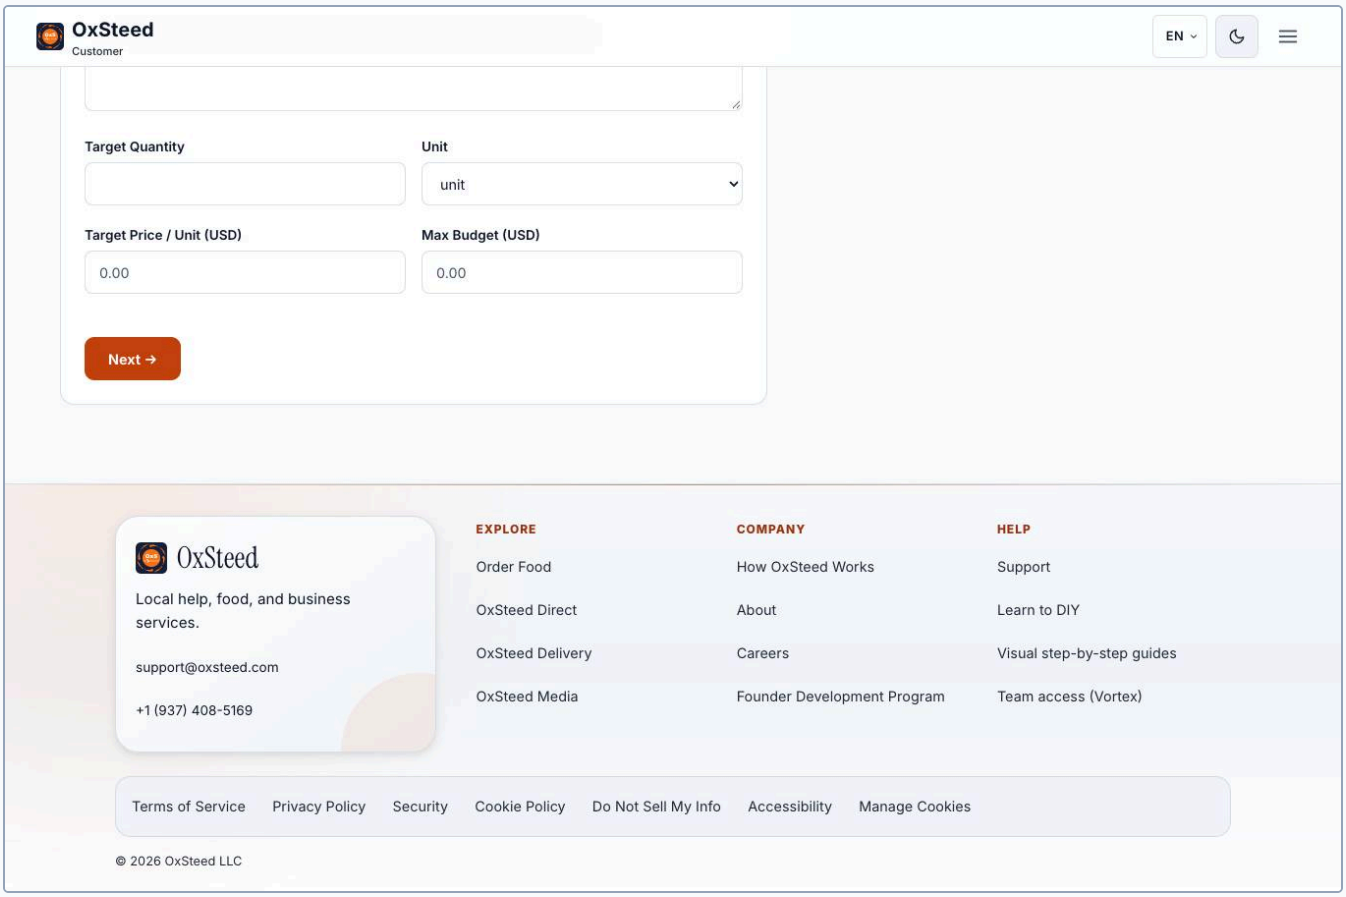

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: New Sourcing Request)*

Step 5: Compare supplier quotes on the request detail

Open your request from the Sourcing table to return to its detail page at /logistics/requests/:id. The "Quotes ({{count}})" section lists each supplier quote with "Quoted qty", "Unit price", "Freight est", and "Lead time" in days. Use "← Back to Sourcing" to return to the table. Accepting a quote and paying happens in the finance and checkout flow (see the accept-quotes guide).

> **Expected result:** You can compare supplier quotes side by side on the request.

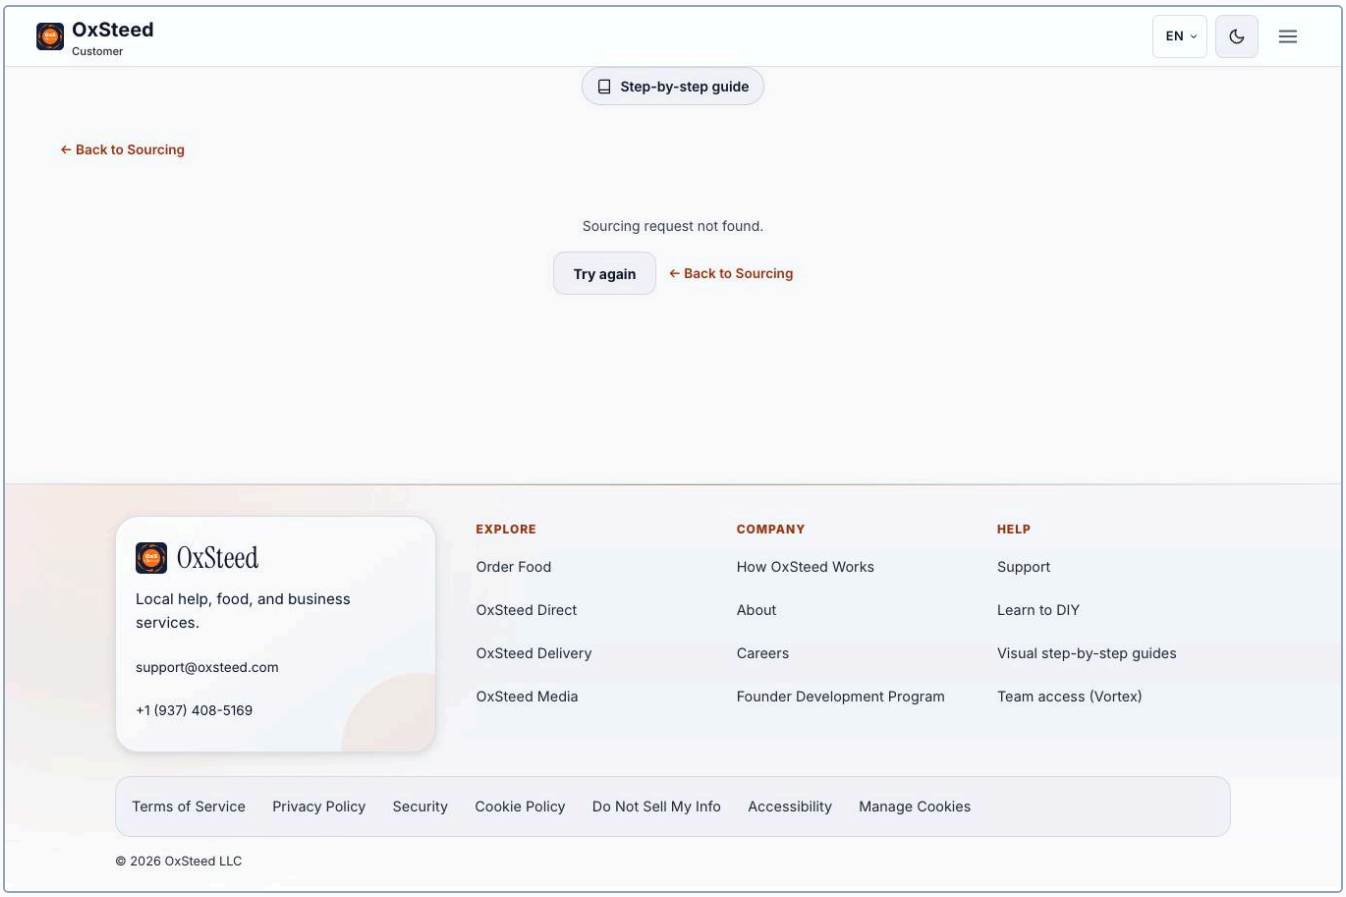

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Request detail page with the quotes table)*

Confirm it worked

Your request appears in the Sourcing table and its detail page lists incoming supplier quotes.

If something goes wrong

Problem	What to do

The request fails to submit.	Go back through the steps and complete every required field. Check your connection and choose "Submit Request" again.
No quotes arrive after a few days.	Check that the lane and destination country are correct, and widen the target price range if it was very tight. Contact support at /support if the request looks stuck.

Need help?

Guide ID: other-calendar | **Revision:** 2 | **Area:** Calendar

SOP LIBRARY / CALENDAR **ENGLISH**

Manage the calendar

Guide ID	**other-calendar**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/calendar/manage-calendar

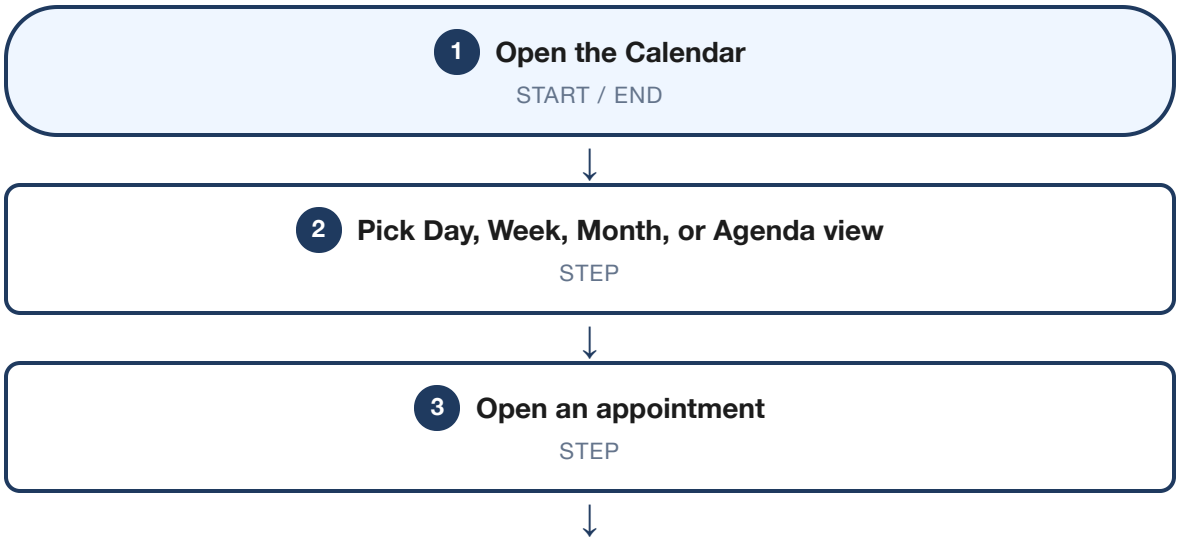

Goal

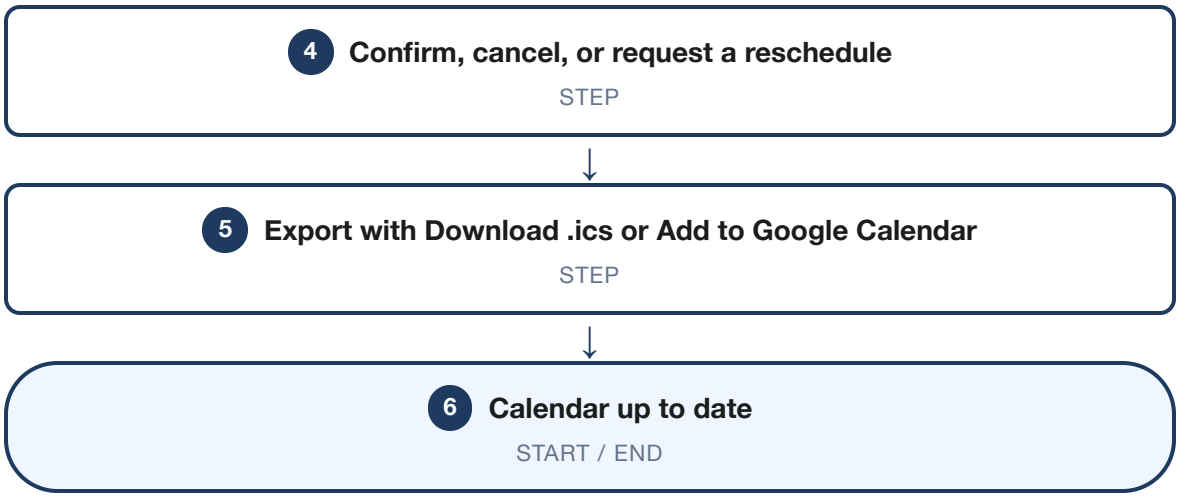

Review appointments, confirm or cancel them, request reschedules, and export to your calendar app.

Before you start

1. A signed-in OxSteed account.
2. Appointments created from bookings or job work.

Process map

Text version. 1. Open the Calendar at /calendar. 2. Switch between Day, Week, Month, and Agenda views. 3. Open an appointment to see its details. 4. Confirm it, cancel it with a reason, or request a reschedule. 5. Export it with "Download .ics" or "Add to Google Calendar". 6. Your calendar stays in sync with your bookings.

Steps

Step 1: Open the Calendar

Open /calendar while signed in. The page is titled "Calendar". The view switcher offers "Day", "Week", "Month", and "Agenda". The legend explains job, booking, and event-type markers. "My Bookings" and "Booking Requests" sections sit alongside the grid.

> **Expected result:** Your appointments appear on the calendar in the selected view.

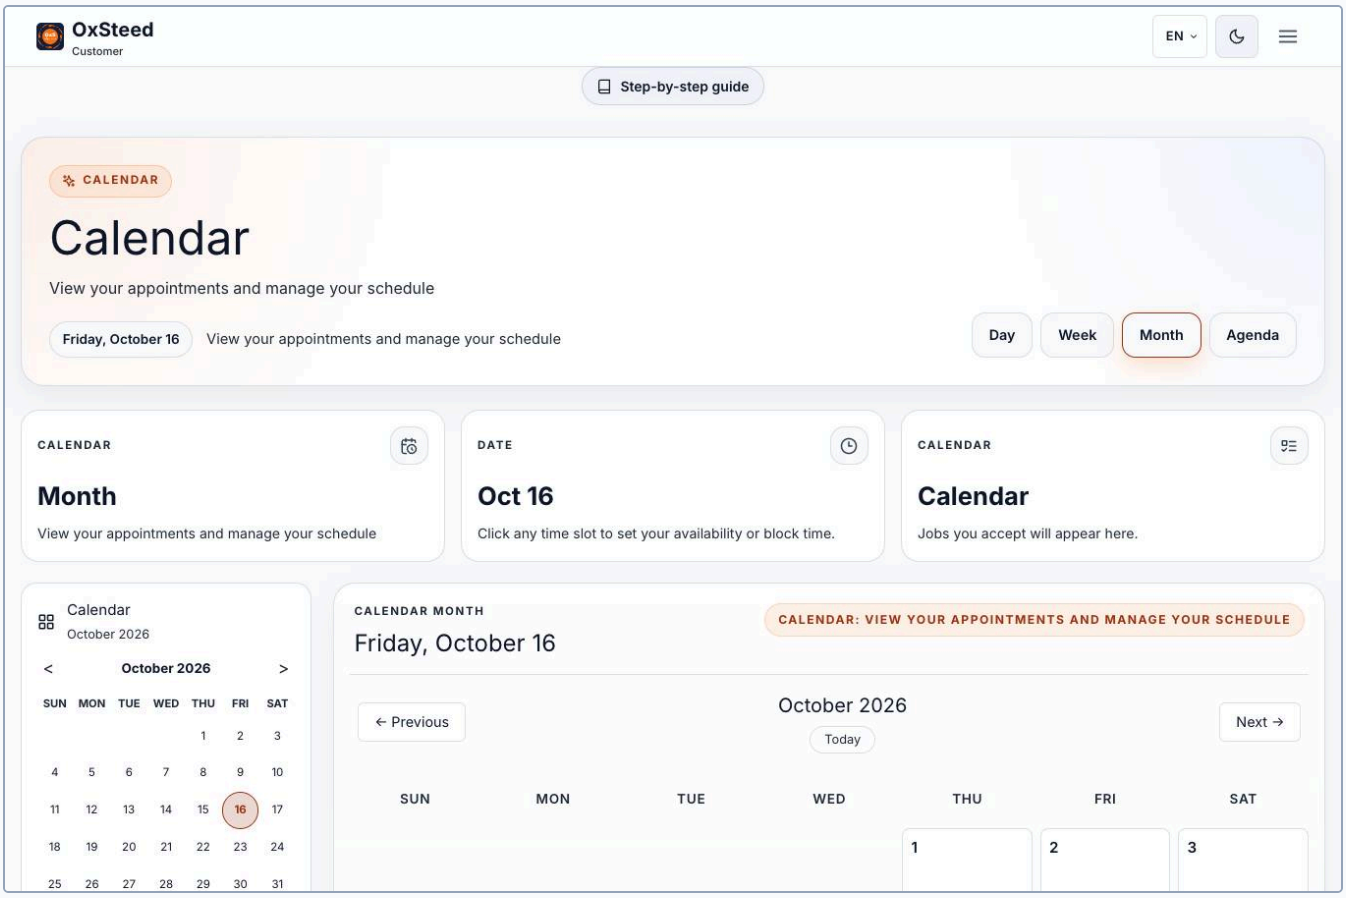

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Calendar)*

Step 2: Open an appointment

Choose an appointment to open /calendar/appointments/:appointmentId. The detail page shows "Appointment Details" with date, time, duration, status (Requested, Confirmed, In Progress, Completed, Cancelled, Rescheduled), plus customer and helper info and notes.

> **Expected result:** The appointment detail page loads with its current status.

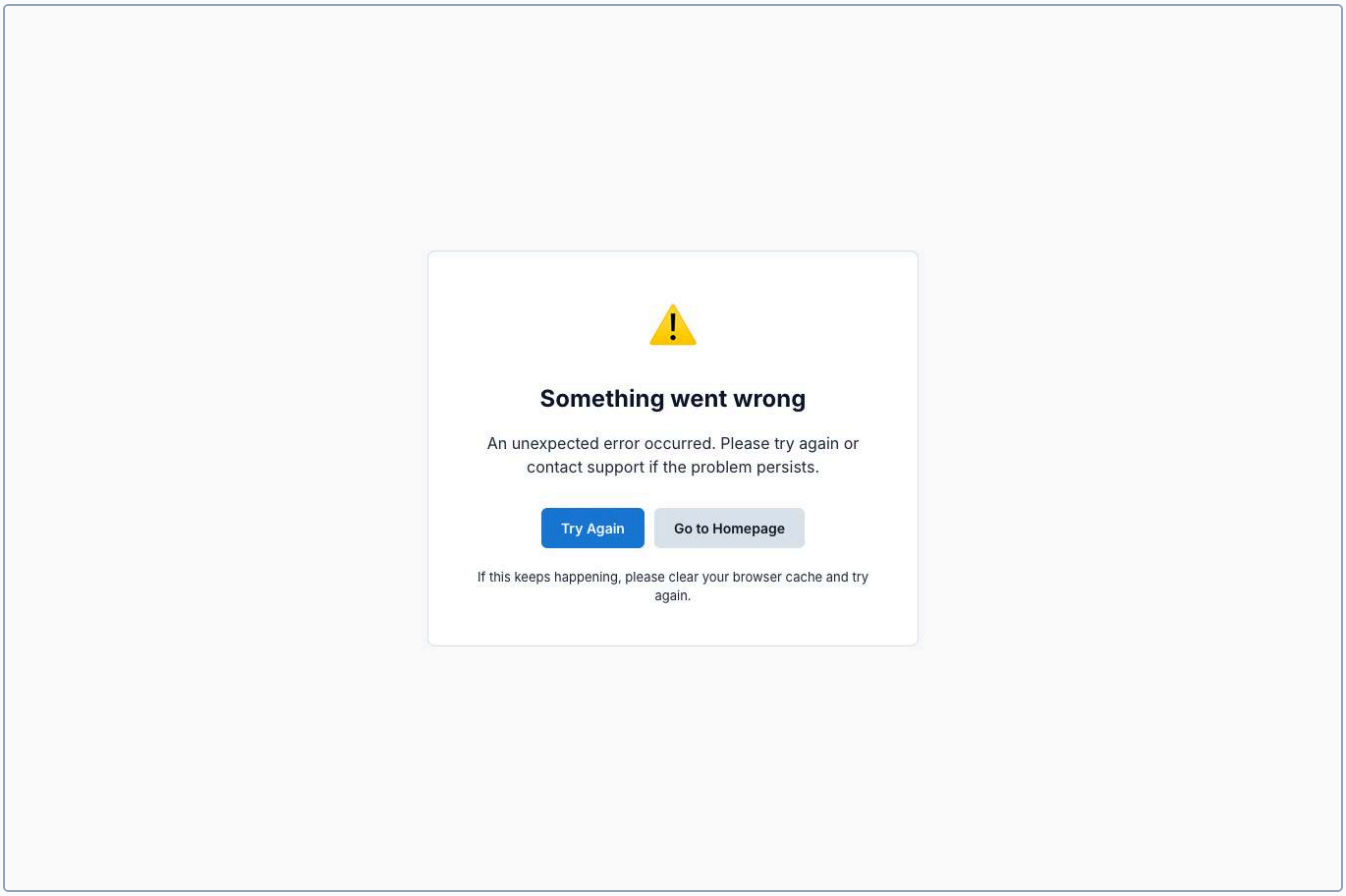

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Something went wrong)*

Step 3: Confirm, cancel, or request a reschedule

Use "Confirm appointment" to confirm a requested appointment. Use "Cancel appointment" to cancel; you can add a "Cancel reason" in the "Cancel reason" field. Use the reschedule action to request a new time. Status changes are saved immediately and both parties are notified.

> **Expected result:** The appointment status updates (for example to Confirmed or Cancelled).

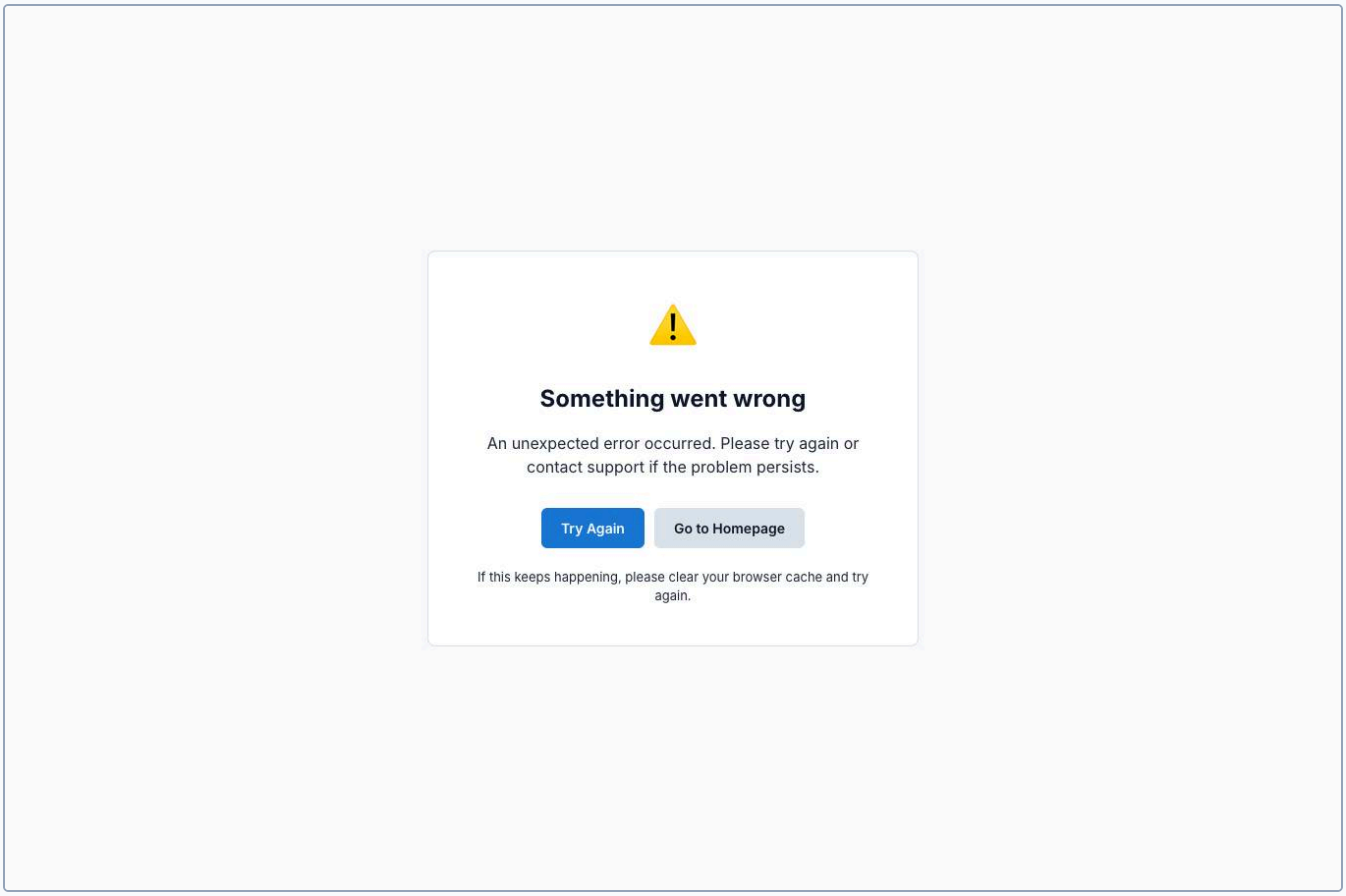

Figure 3. Appointment actions, desktop view. *(Image description: Synthetic example: Something went wrong)*

Step 4: Export the appointment

Use "Download .ics" to save the appointment as an iCalendar file you can import anywhere, or "Add to Google Calendar" to add it directly. Both use the appointment date, time, and duration shown on the detail page.

> **Expected result:** The appointment is saved to your external calendar.

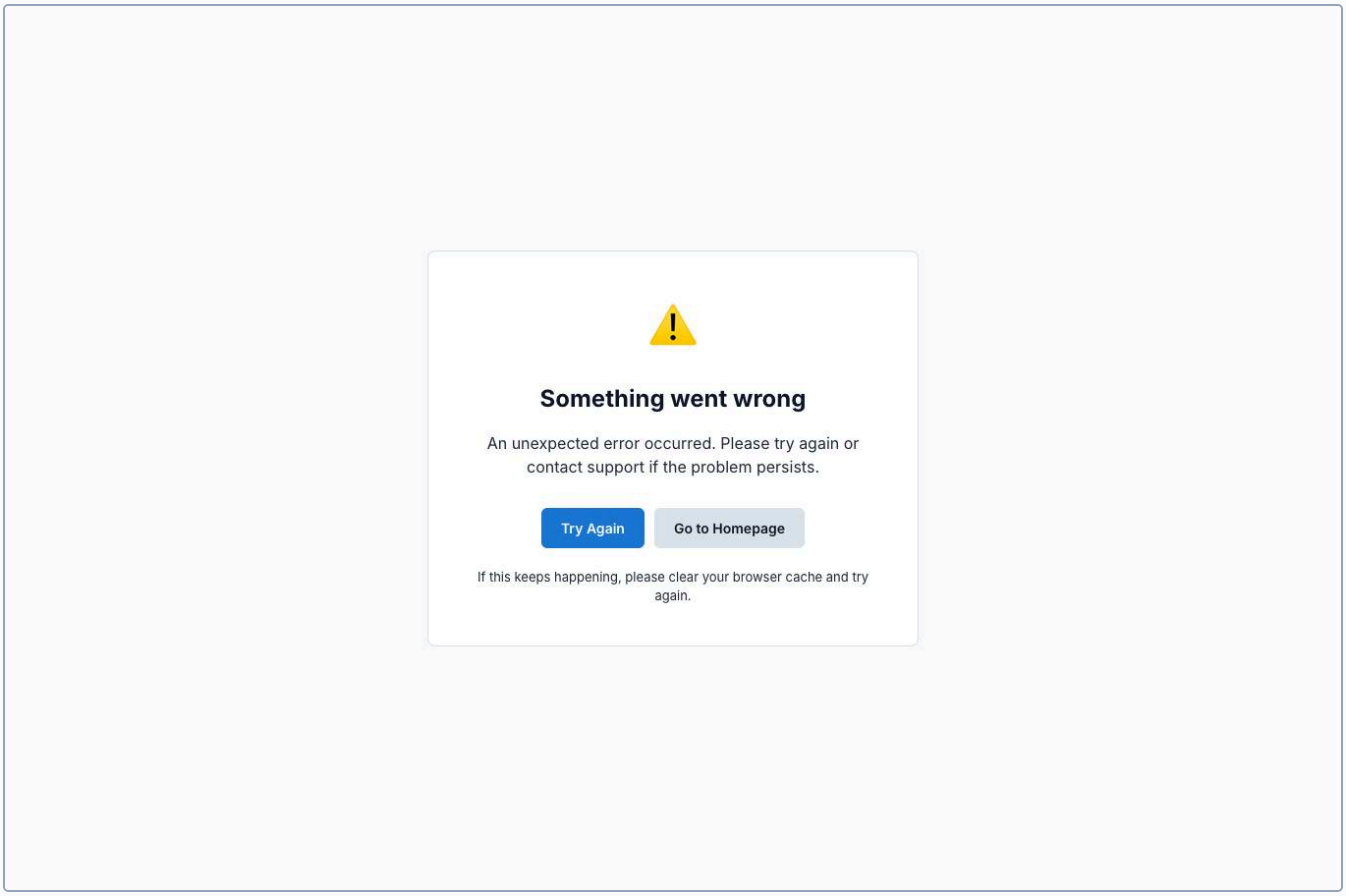

Figure 4. Exporting an appointment, desktop view. *(Image description: Synthetic example: Something went wrong)*

Confirm it worked

The appointment shows the expected status and appears in your external calendar after export.

If something goes wrong

Problem	What to do

An appointment fails to load ("Appointment unavailable").	It may have been cancelled by the other party. Check "My Bookings" for the current state.
You cancelled by mistake.	A cancelled appointment cannot be un-cancelled here. Message the other party to create a new booking.

Need help?

Calendar issues: contact support from the in-app support page at /support.

Guide ID: other-media | **Revision:** 2 | **Area:** Media

SOP LIBRARY / MEDIA **ENGLISH**

Use OxSteed Media (feed, posts, communities)

Guide ID	**other-media**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/media/use-oxsteed-media

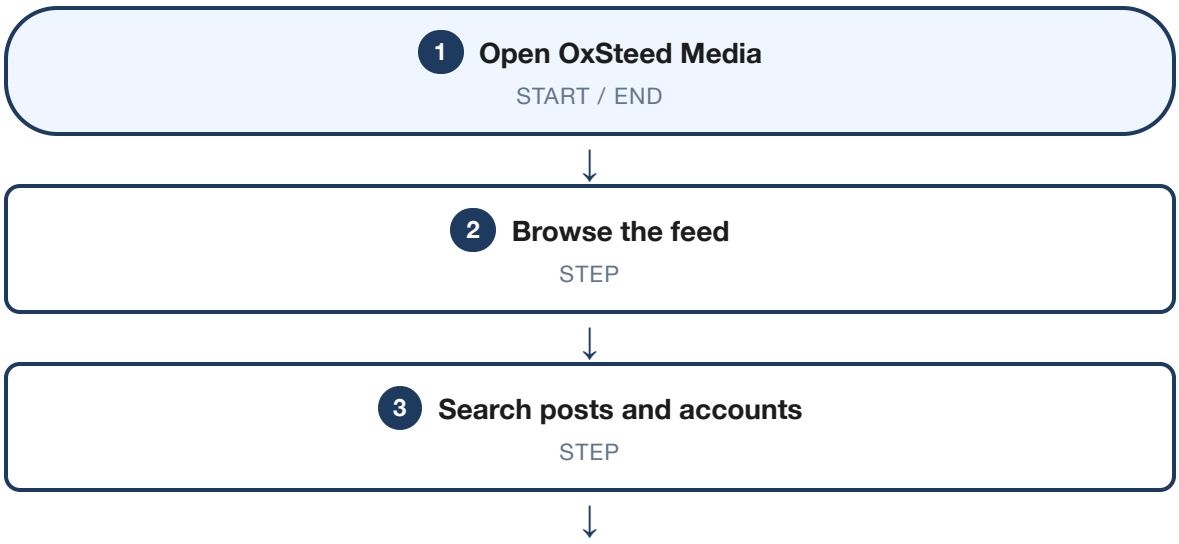

Goal

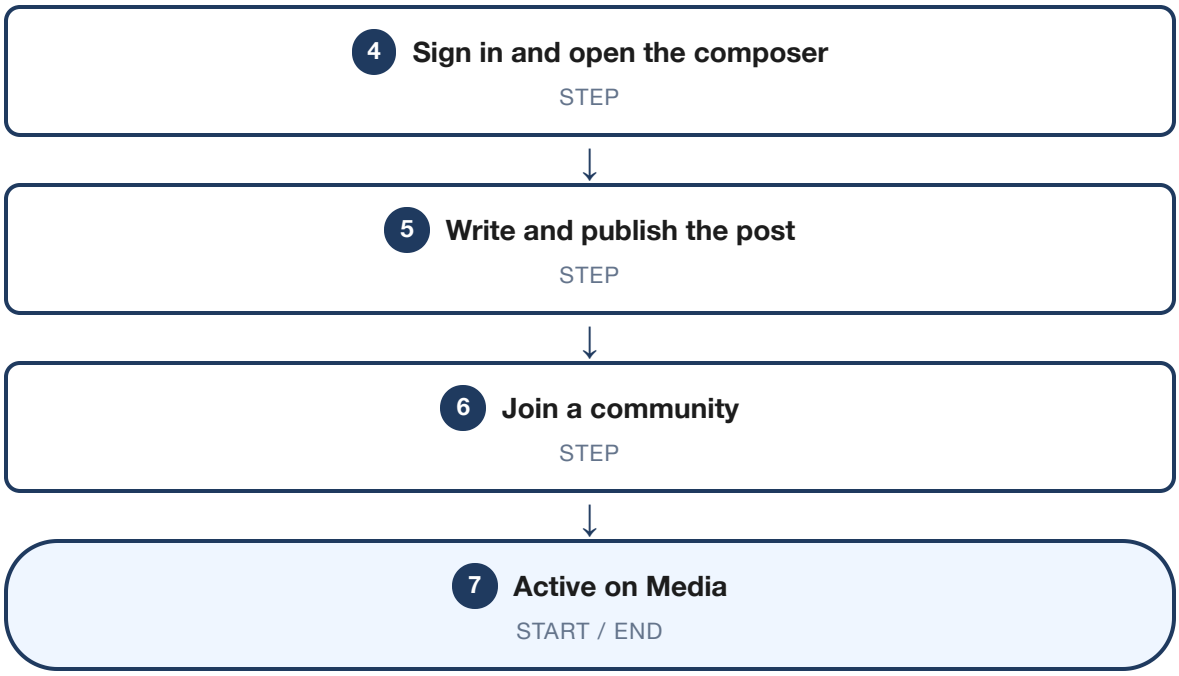

Browse the Media feed, publish a post, and follow communities.

Before you start

1. No account needed to browse. Sign in to post, save, or message.

Process map

Text version. 1. Open OxSteed Media at /media. 2. Browse the feed, titled "OxSteed Media" with the subtitle "Local voices, useful connections, and updates from the OxSteed network." 3. Use Search Media to find posts and accounts. 4. Sign in and open the composer at /media/compose. 5. Write your post ("New post", "What's happening in your local economy?"), choose where it goes, and publish. 6. Join communities at /media/communities to follow topics you care about.

Steps

Step 1: Open OxSteed Media and browse the feed

Open /media. The page is titled "OxSteed Media" with the subtitle "Local voices, useful connections, and updates from the OxSteed network." The composer prompt reads "What's happening nearby?" The navigation offers Home, Search, Spaces, Notifications, Messages, "Saved posts", and Verification. Guests can read; sign-in is required for posting.

> **Expected result:** The feed loads with recent posts from the network.

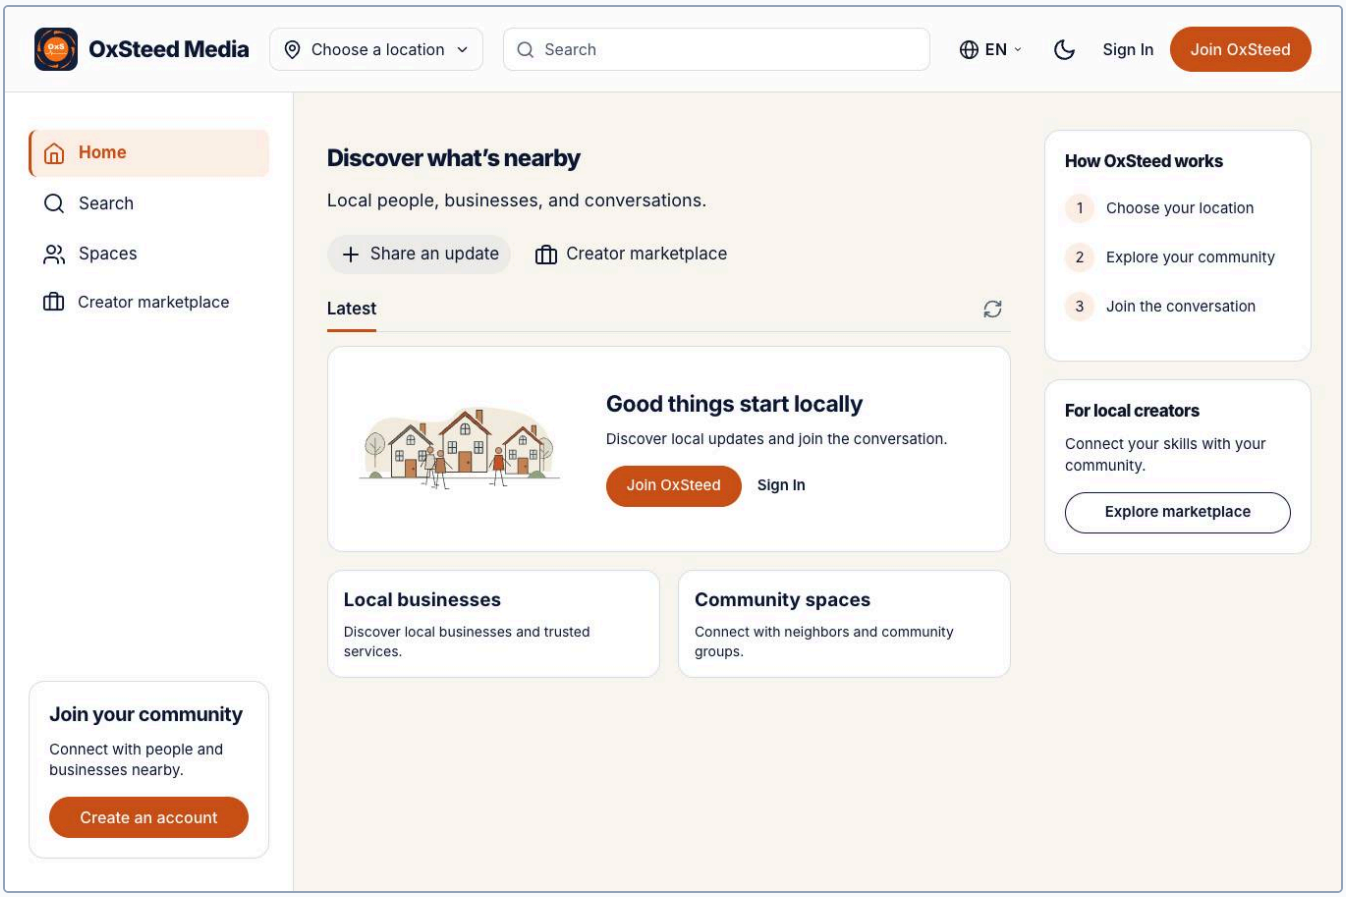

Figure 1. The Media feed, desktop view. *(Image description: Synthetic example: Discover what's nearby)*

Step 2: Search posts and accounts

Open /media/search. The page is titled "Search Media" with the field "Search posts and accounts…" and the "Search" button. Results split into "Accounts" and "Posts" tabs.

> **Expected result:** Matching accounts and posts appear under their tabs.

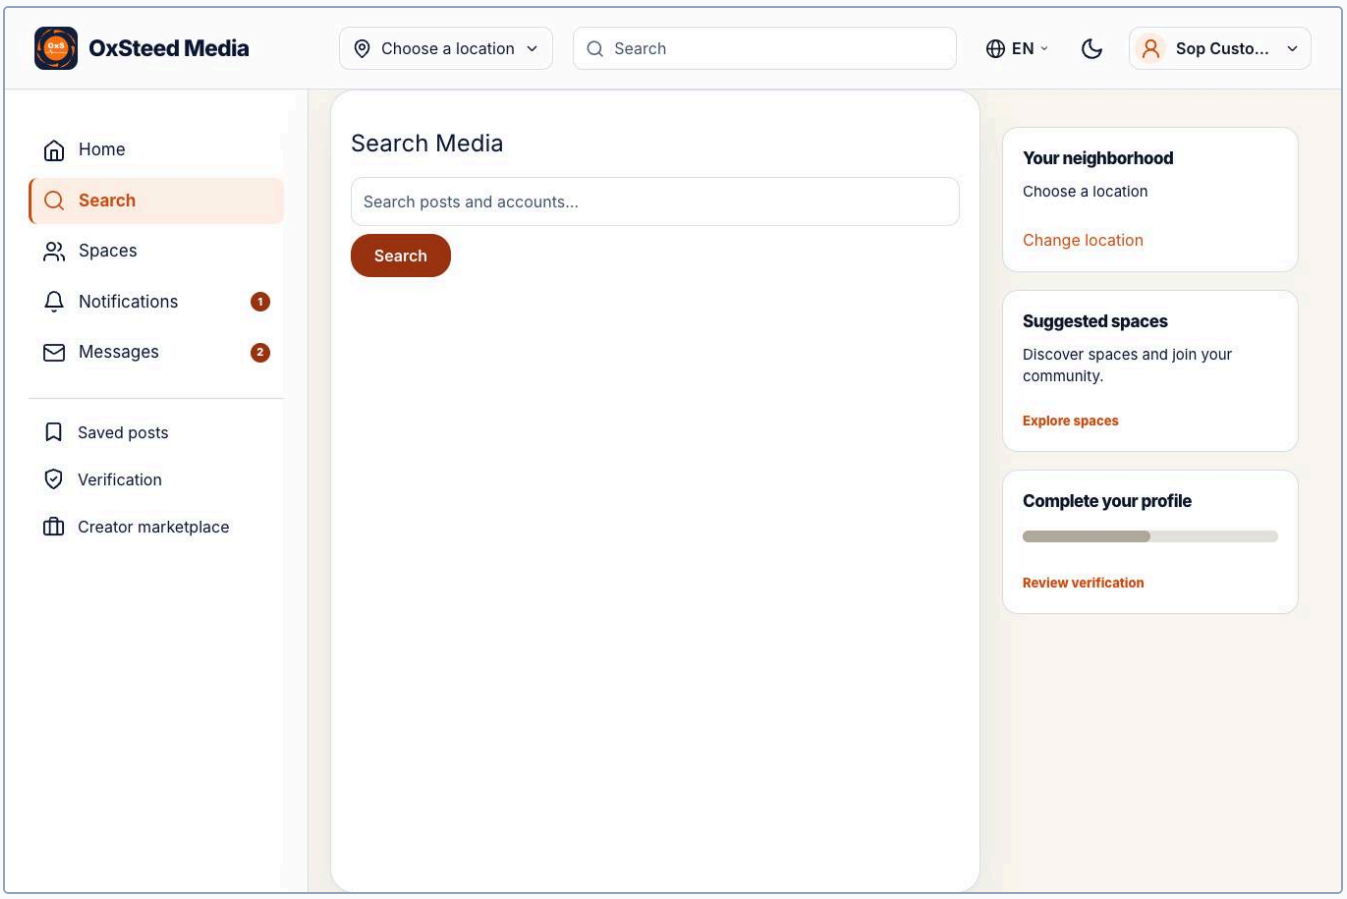

Figure 2. Searching Media, desktop view. *(Image description: Synthetic example: Search Media)*

Step 3: Compose a post

Sign in, then open /media/compose. The page is titled "New post" with the placeholder "What's happening in your local economy?" Choose "Post as" to pick your publishing identity ("My helper profile" for helper accounts). Use "Add link" or "YouTube or Vimeo video" to attach media. "Save draft" keeps your work; "Discard draft" removes it.

> **Expected result:** Your draft is ready in the composer with the correct publishing identity.

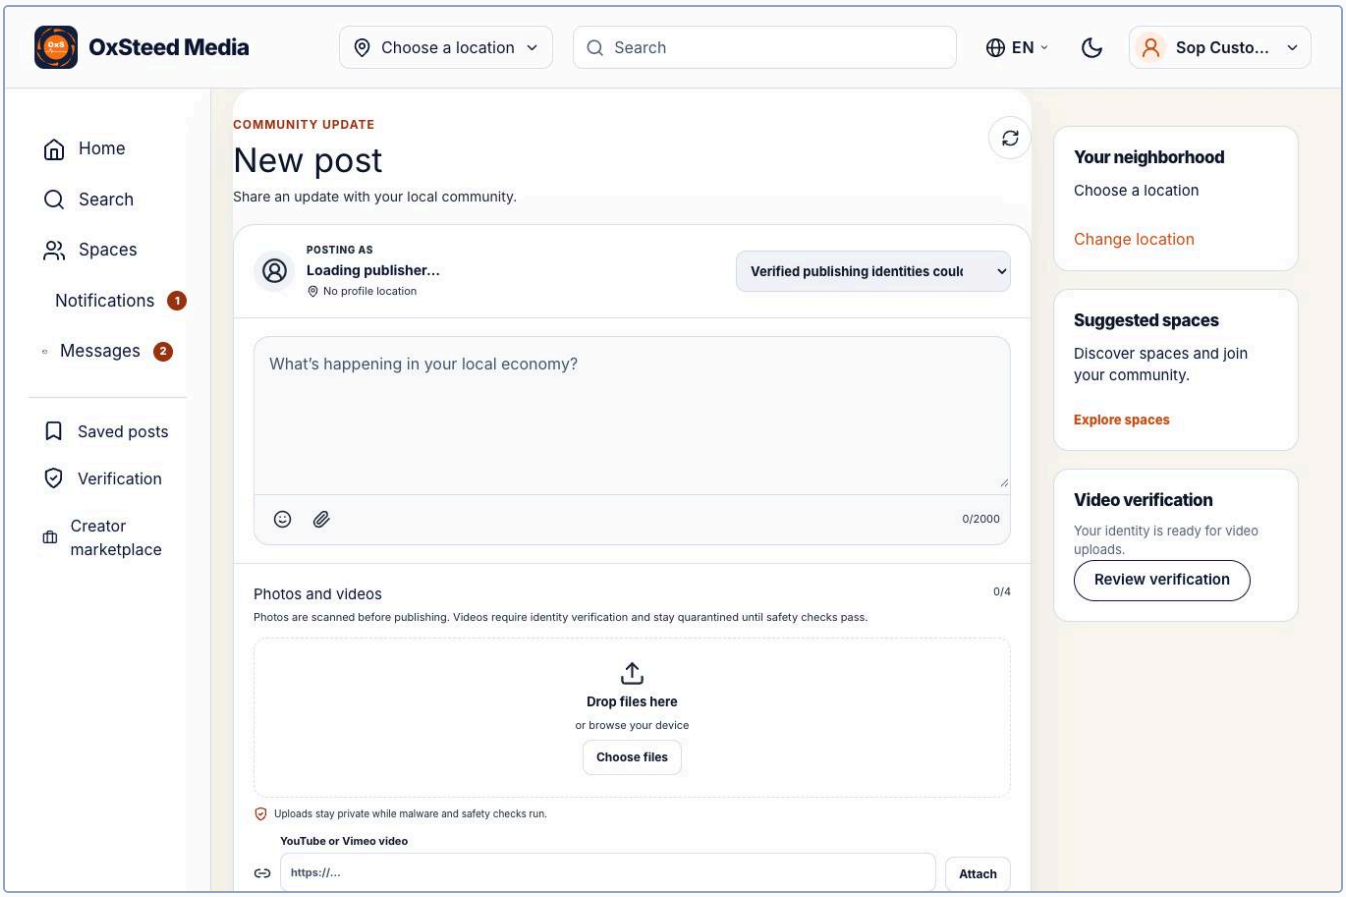

Figure 3. Composing a post, desktop view. *(Image description: Synthetic example: New post)*

Step 4: Publish and explore communities

Publish the post; it appears in the feed and on your profile. Then open /media/communities to browse communities, open a community to read its posts, and follow the ones you care about. Saved posts live under "Saved posts" at /media/bookmarks, and notifications under Notifications.

> **Expected result:** Your post is live in the feed and you follow at least one community.

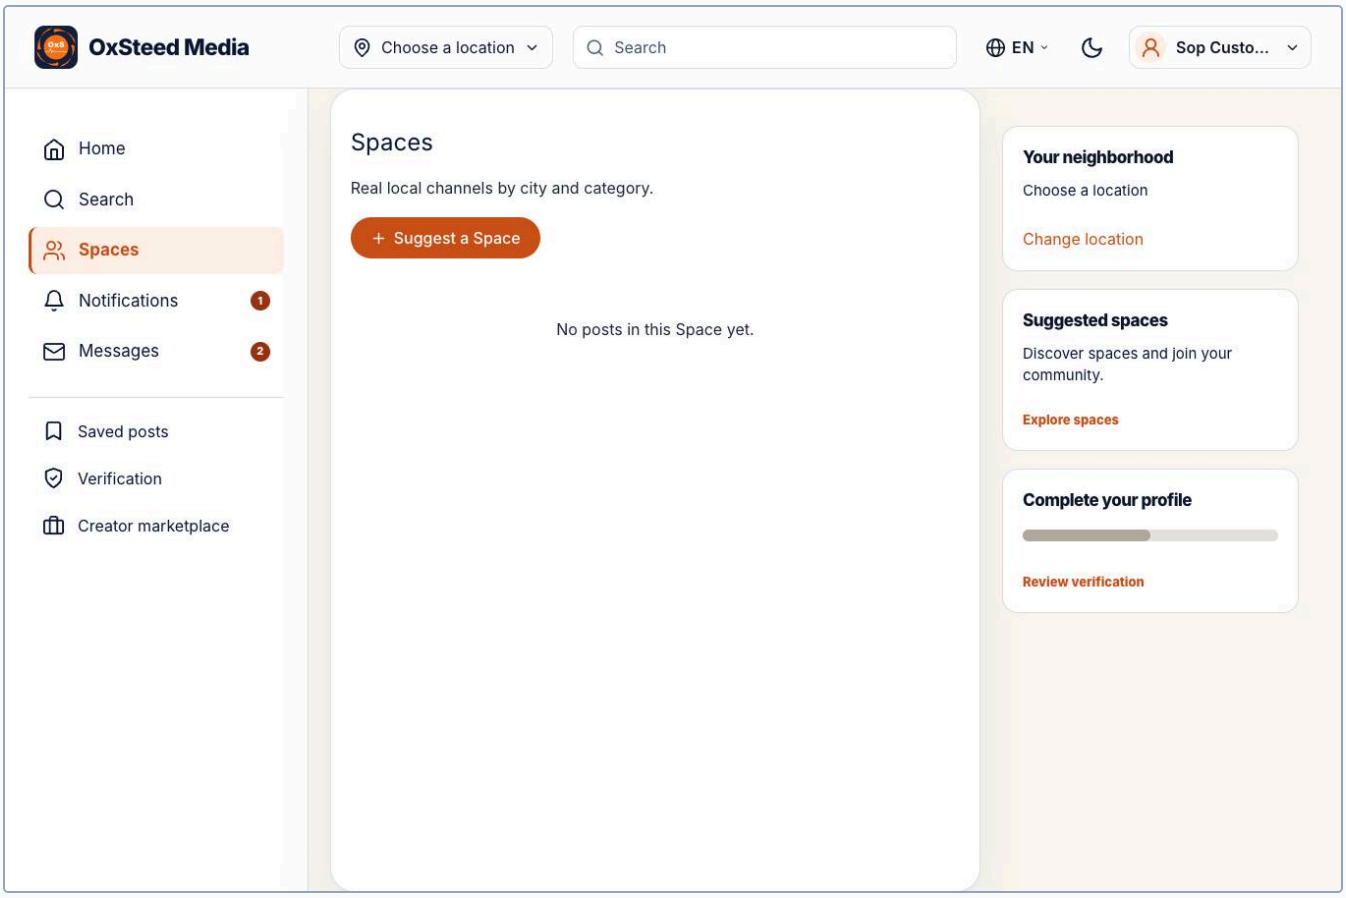

Figure 4. Media communities, desktop view. *(Image description: Synthetic example: Spaces)*

Confirm it worked

Your post appears in the feed and on your profile, and your followed communities show in your list.

If something goes wrong

Problem	What to do

The composer says "Verification required" or "Not verified".	Complete verification first at /media/verification, then return to the composer.
A video attachment fails with "Video posts aren't available right now."	Remove the video and post photos instead, or try again later.

Need help?

Media issues: contact support from the in-app support page at /support.

Related guides

- Message across the platform

Guide ID: other-messages | **Revision:** 2 | **Area:** Messages

SOP LIBRARY / MESSAGES ENGLISH

Message across the platform

Guide ID	**other-messages**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/messages/send-messages

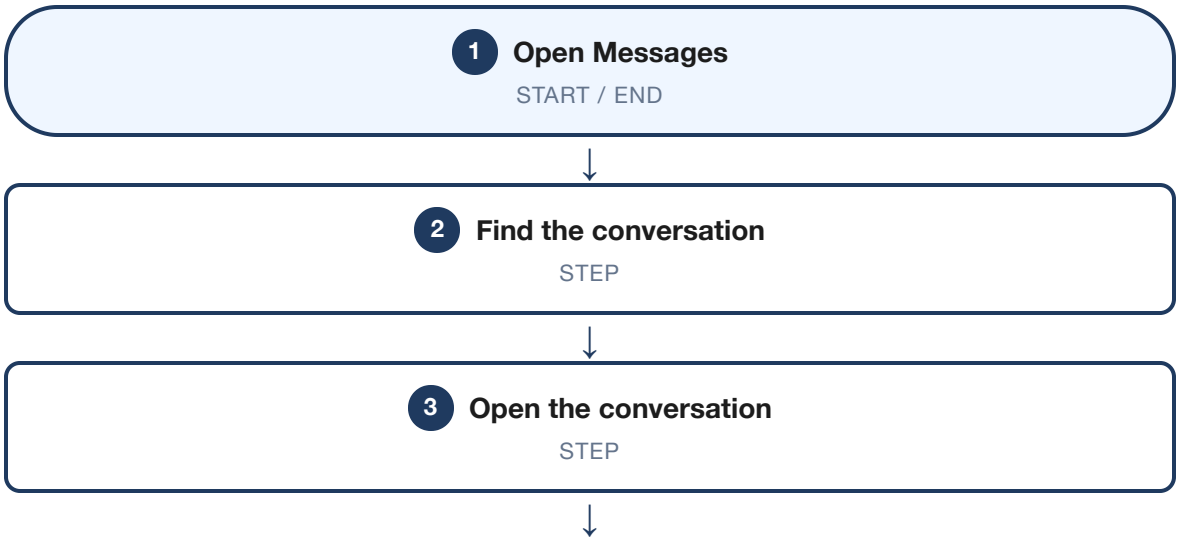

Goal

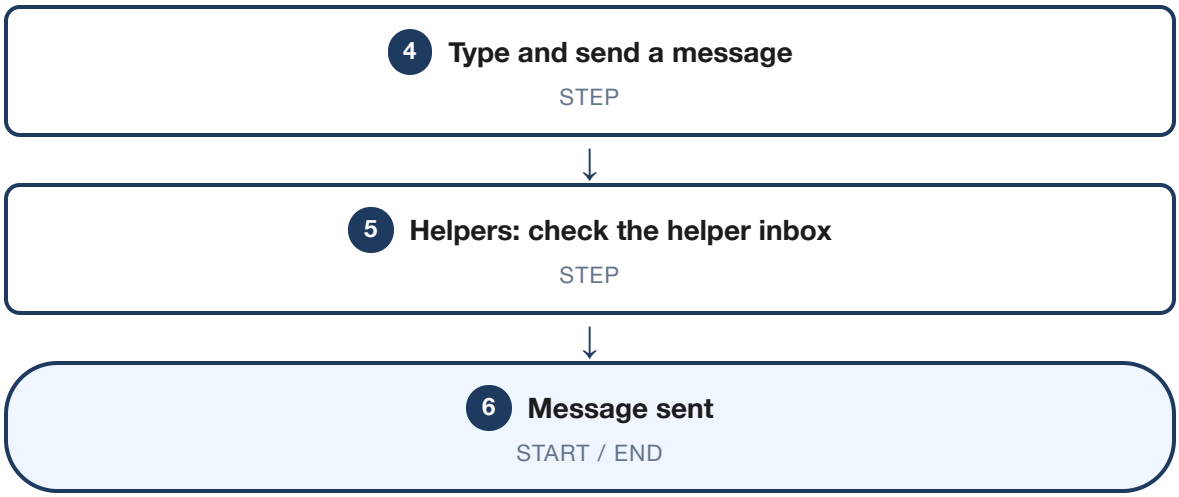

Find a conversation, read messages, and send replies across customer and helper inboxes.

Before you start

1. A signed-in OxSteed account.
2. A job, booking, or inquiry that created a conversation.

Process map

Text version. 1. Open Messages at /messages. 2. Find the conversation in the list; an empty inbox shows "No conversations yet". 3. Open the conversation at /messages/:conversationId. 4. Type in the "Type a message…" box and choose "Send". 5. Helpers have a separate inbox at /helper/messages with the same flow. 6. Your message is delivered and marked seen when read.

Steps

Step 1: Open the Messages inbox

Open /messages while signed in. The page is titled "Messages". The conversation list shows recent threads with unread badges. An empty inbox shows "No conversations yet". Helpers also have a dedicated inbox at /helper/messages with the same layout.

> **Expected result:** Your conversations are listed, newest first.

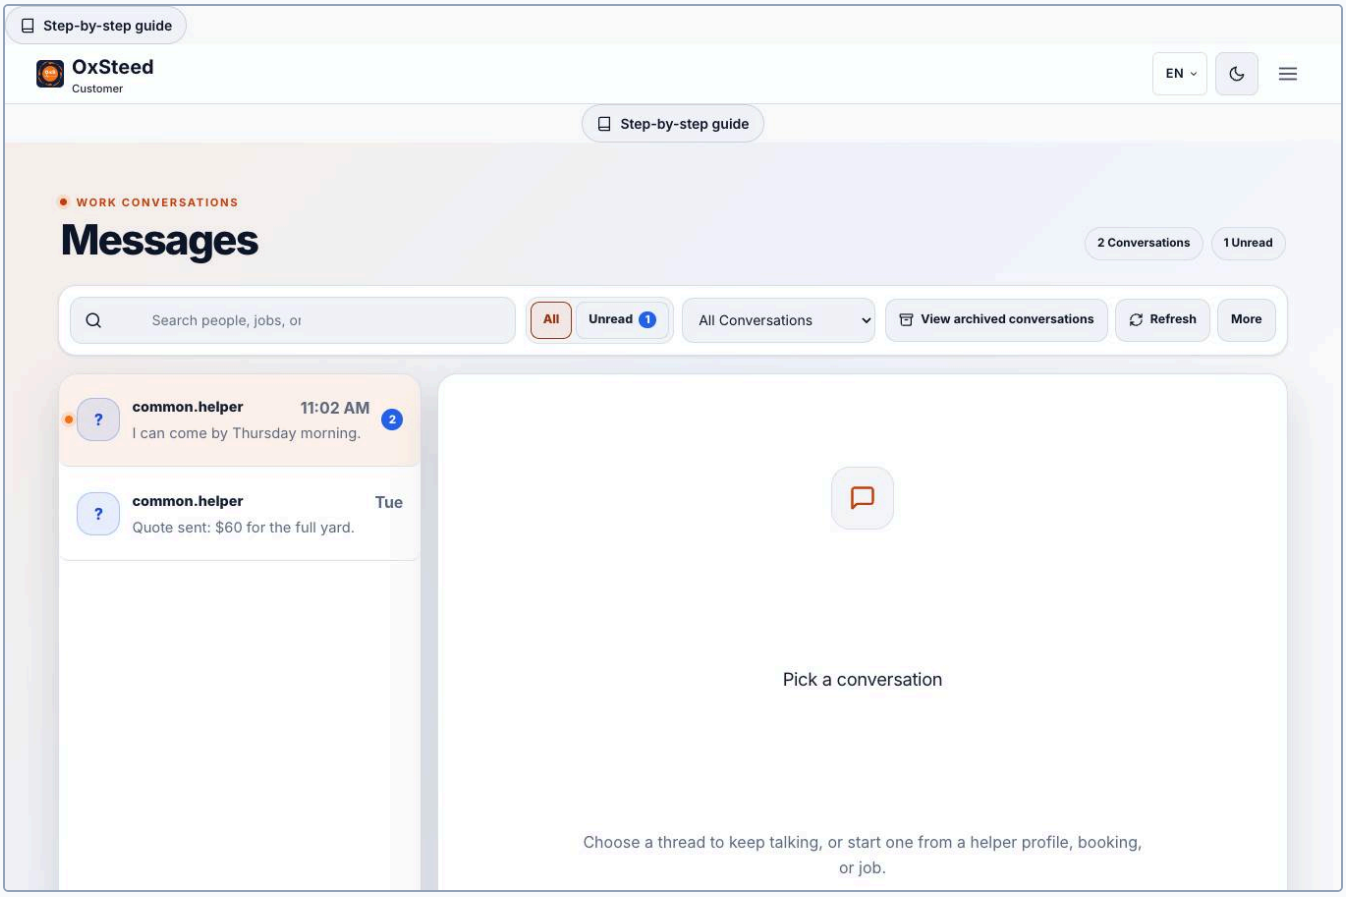

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Step 2: Open a conversation

Choose a conversation to open /messages/:conversationId. The thread shows message history with timestamps ("Today", "Yesterday") and seen indicators. If the conversation is missing, the page shows a not-found message.

> **Expected result:** The full message thread loads.

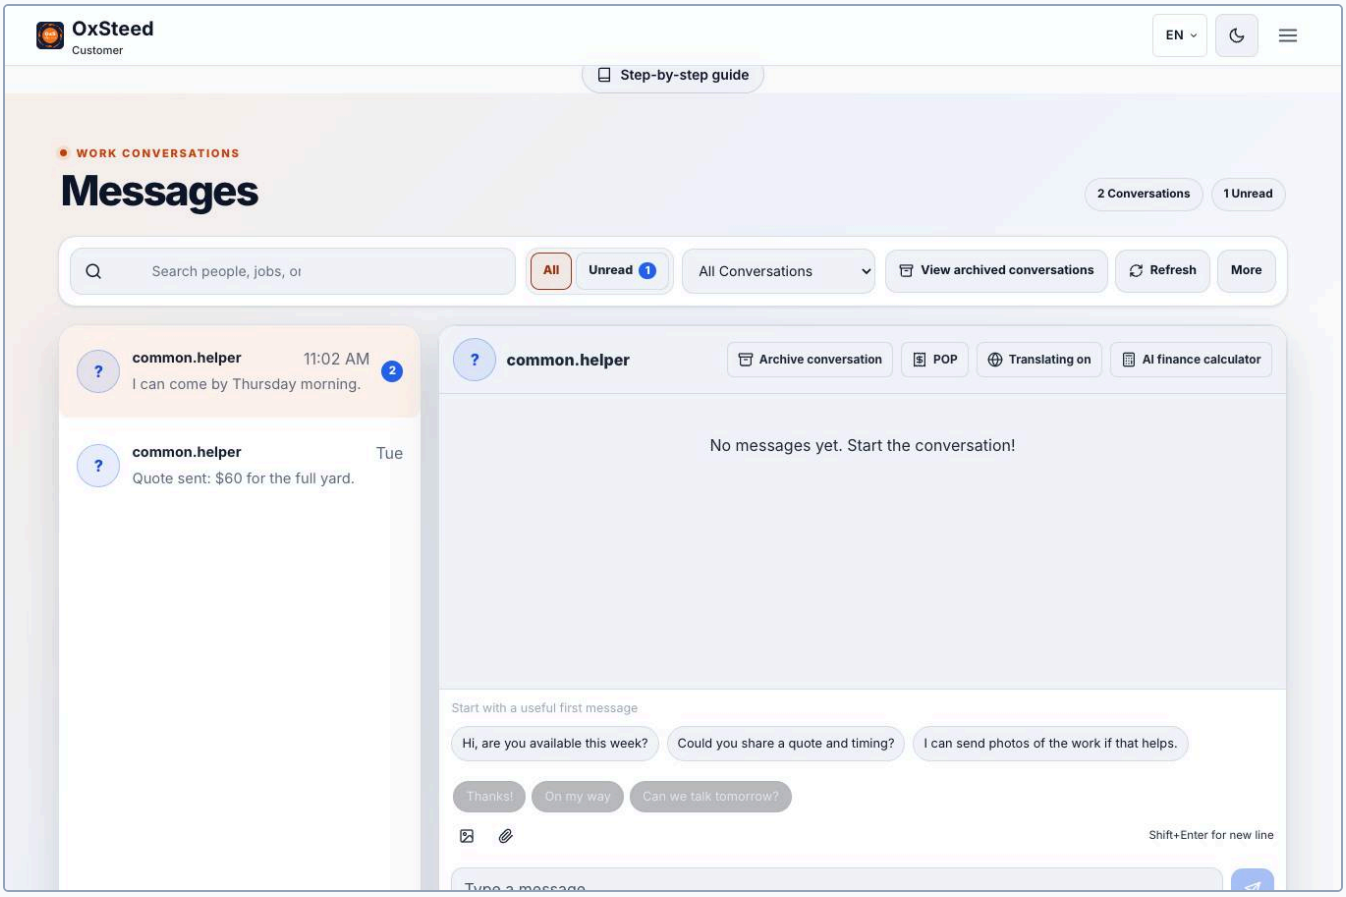

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Messages)*

Step 3: Type and send a message

Type in the "Type a message…" box at the bottom and choose "Send". The other party sees a typing indicator while you write. Your sent message appears in the thread and shows as seen once read.

> **Expected result:** Your message appears in the thread immediately.

Step 4: Check the helper inbox

Helpers: open /helper/messages for the helper inbox, which mirrors the same flow with helper-context threads (guest inquiries, job conversations). Switch back to /messages for customer-context threads.

> **Expected result:** You see helper-context conversations separately from customer ones.

Confirm it worked

Your message appears in the thread and is marked seen when the other party reads it.

If something goes wrong

Problem	What to do

A conversation is missing from the list.	Check the other inbox (customer vs helper). Guest inquiries also appear under their own entry.
Messages fail to send.	Check your connection and try again. If the thread still fails, contact support at /support.

Need help?

Messaging issues: contact support from the in-app support page at /support.
