Standard Operating Procedures

Logistics Handbook

Language: **English**

Revision date: **October 19, 2026**

Guides included: **17**

About this PDF. This handbook was generated from the online guides in the SOP library at **/how-it-works**. The online versions are the primary, most current editions.

Revision info: this edition was generated on 2026-10-19 from the guide data files. Each guide section below carries its own revision line (guide ID and revision number).

Contents

Select a guide to jump to its section.

Account

Switch between customer, helper, business and other modes (rev 1)
Recover a forgotten password (rev 2)
Privacy controls, data export, account deletion (rev 2)
Manage account settings (rev 3)
Sign in (rev 3)

Logistics

Publish and accept quotes (rev 2)
Browse logistics campaigns and lanes (rev 2)
File and track claims (rev 2)
Check trade compliance and restrictions (rev 2)
Confirm payments at checkout (rev 2)
Manage distribution and deliveries (rev 2)
Organize a campaign (rev 2)
Pledge to a campaign (buyer) (rev 2)
Request logistics refunds (rev 2)
Create sourcing requests and collect supplier quotes (rev 2)
Track shipments (rev 2)
Manage warehousing and inventory receipts (rev 2)

Guide ID: account-mode-switching | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Switch between customer, helper, business and other modes

Guide ID	**account-mode-switching**
Revision	Revision 1 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/switch-modes

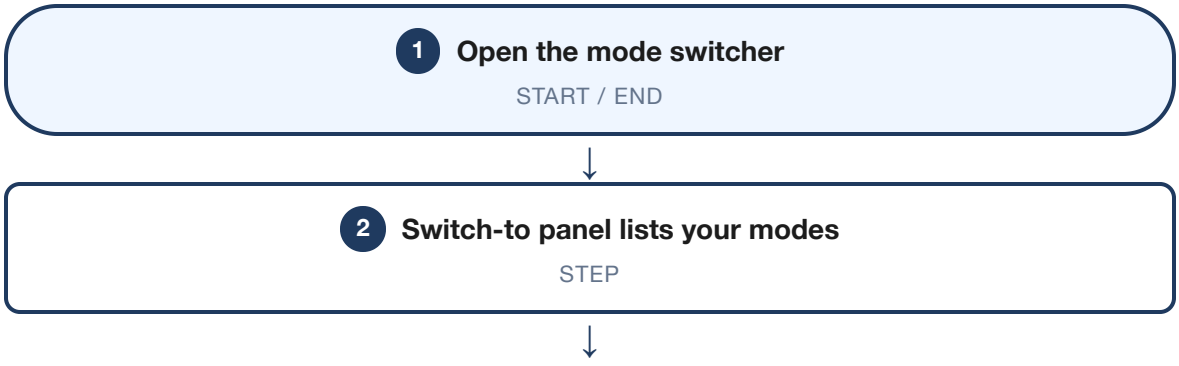

Goal

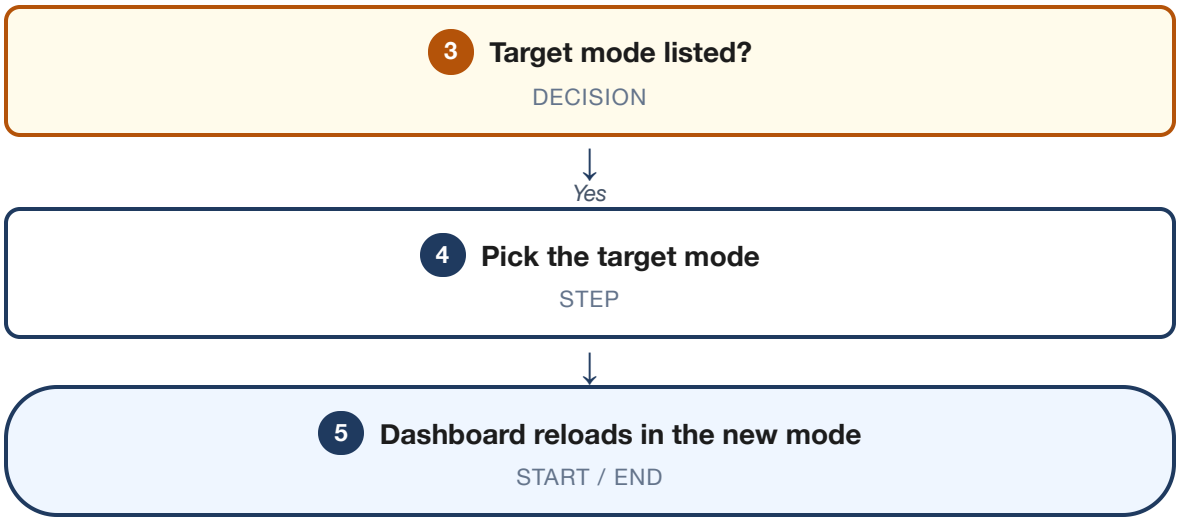

Switch between the modes you belong to (Customer, Helper, Business Owner and granted team modes) without signing out.

Before you start

1. Be signed in to your OxSteed account.
2. Granted modes (business team roles) require a workspace invitation; they do not appear until you accept it.

Process map

- *No:* Target mode listed? → Request or accept a workspace invitation
- *After grant accepted:* Request or accept a workspace invitation → Switch-to panel lists your modes

Text version. 1. In the top navigation, choose the mode button that shows "Mode" and your current mode. 2. The "Switch to" panel lists every mode available to you; your current mode carries a "Current" badge. 3. Choose the mode you want. The button briefly shows "Switching..." and a "Switched to" toast confirms it. 4. Your dashboard reloads for the new mode. If a mode is missing, it is granted by a workspace owner; accept the invitation first.

Steps

Step 1: Open the mode switcher in the navigation

Find the mode switcher button in the top navigation: it shows the label "Mode" with your current mode name next to a colored dot. Choose it to open the switcher panel.

> **Expected result:** The "Switch to" panel opens beneath the button.

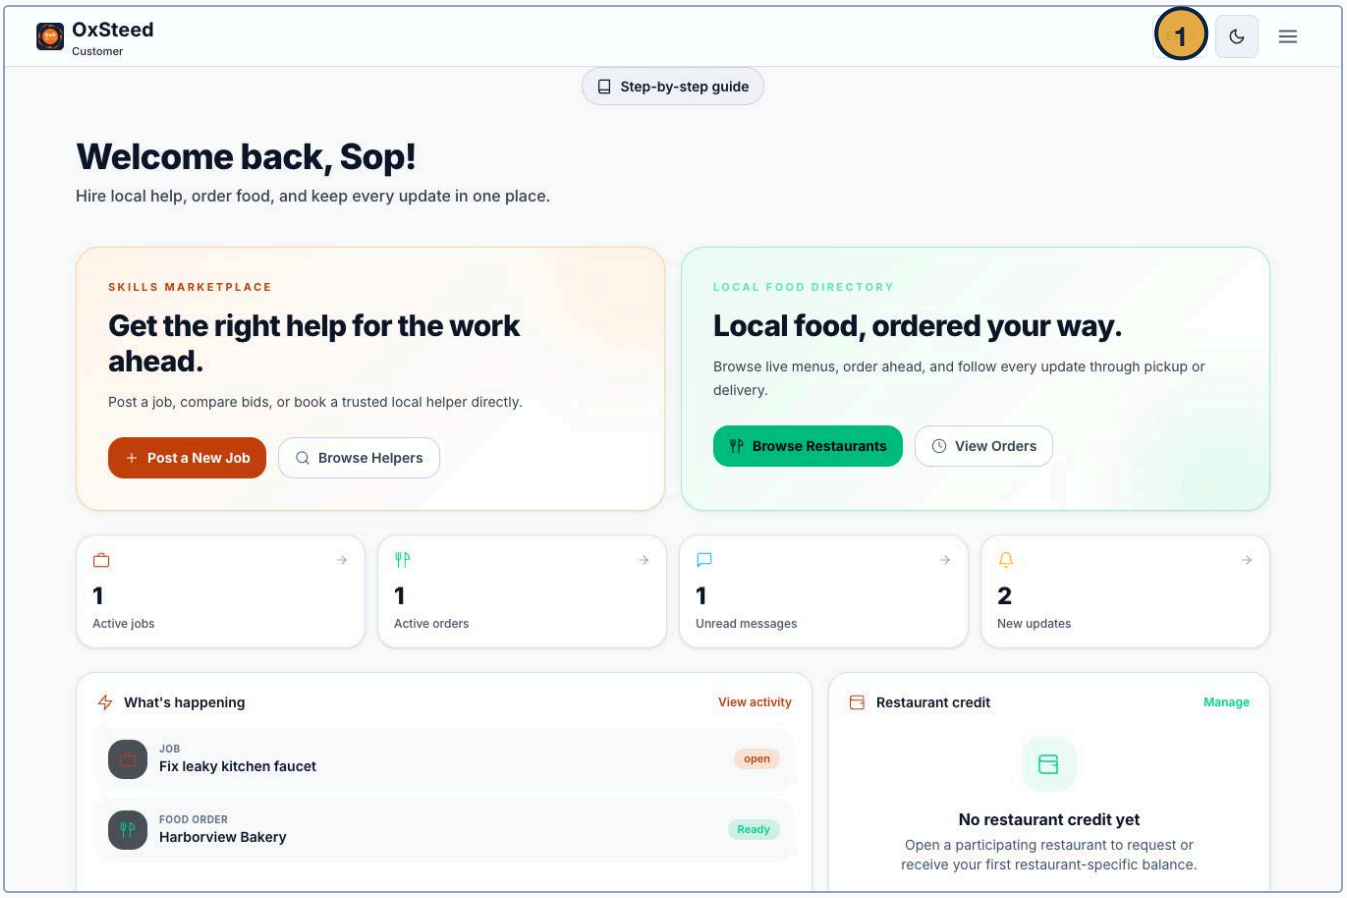

Figure 1. The mode switcher in the top navigation. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Mode switcher button

Step 2: Pick the mode you want to use

The panel is titled "Switch to" and lists your available modes: self-selectable modes such as Customer, Helper, and Business Owner, plus any granted modes (business team roles) a workspace owner gave you. Your current mode shows a "Current" badge and is disabled. Choose the target mode row; it briefly shows "Switching...".

> **Expected result:** A "Switched to" toast confirms the change and the dashboard reloads.

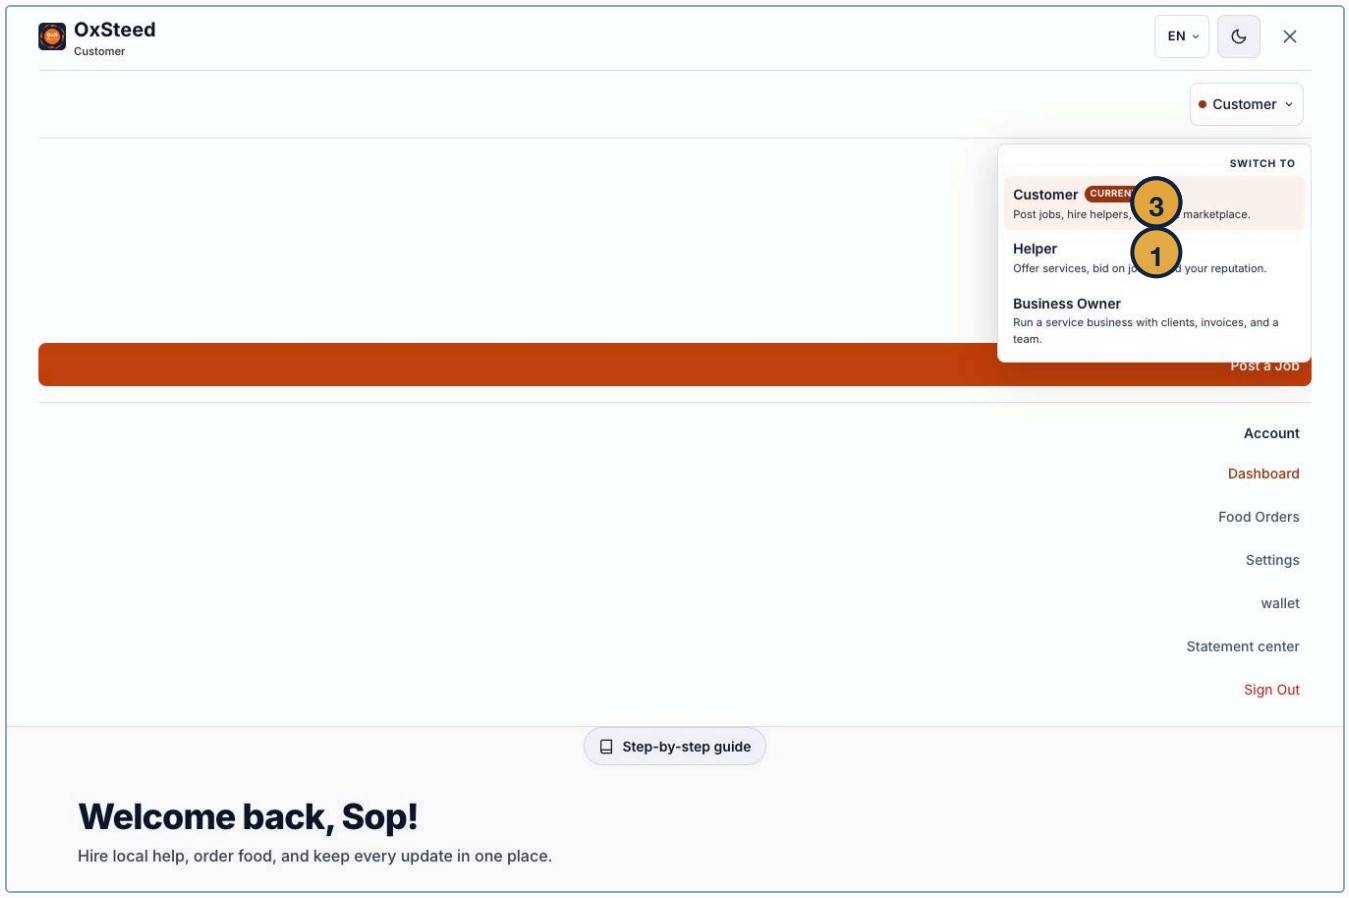

Figure 2. The Switch to panel with your available modes. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** Switch to panel
2. **2.** Current badge
3. **3.** Target mode row

Step 3: Confirm the new mode is active

The mode button in the navigation now shows the new mode name, and the dashboard renders that mode's home screen (for example, Helper shows the helper dashboard). If the wrong dashboard appears, your effective mode may fall back to your original account type; check Settings, Account Type.

> **Expected result:** The navigation shows the new mode and the dashboard matches it.

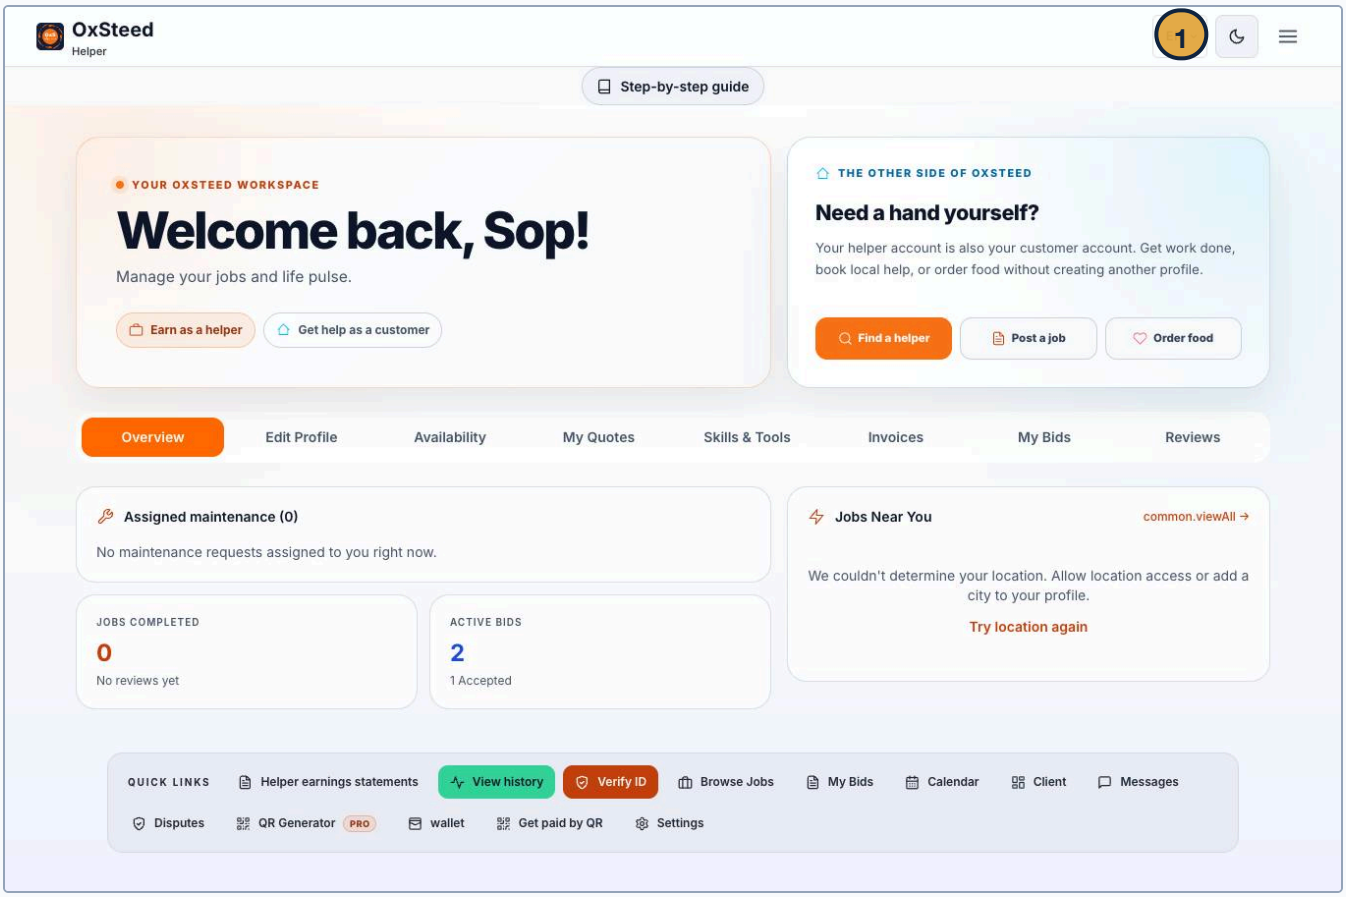

Figure 3. The switcher confirms the new active mode. *(Image description: Synthetic example: Welcome back, Sop!)*

1. **1.** New current mode

Confirm it worked

The mode button shows the new mode and the dashboard content matches it. A "Switched to" toast appeared at the moment of switching.

If something goes wrong

Problem	What to do
The mode you want is not listed.	Self-selectable modes are Customer, Helper, and Business Owner. Business team roles (Manager, Representative, Employee) are granted, not self-selected: a workspace owner must invite you and you must accept the invitation.
You see "Could not switch."	Reload the page and try again. If it persists, sign out and back in; your granted roles are reloaded on sign in.

Need help?

If a granted mode never appears after you accepted an invitation, contact support from the Help menu or visit /support.

Guide ID: account-password-recovery | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Recover a forgotten password

Guide ID	**account-password-recovery**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/recover-password

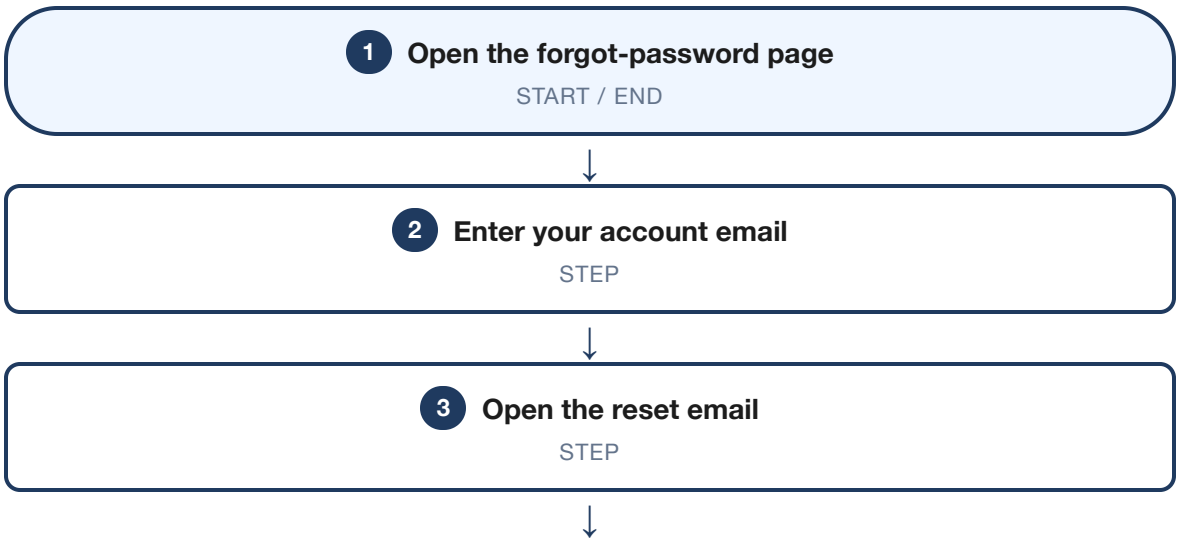

Goal

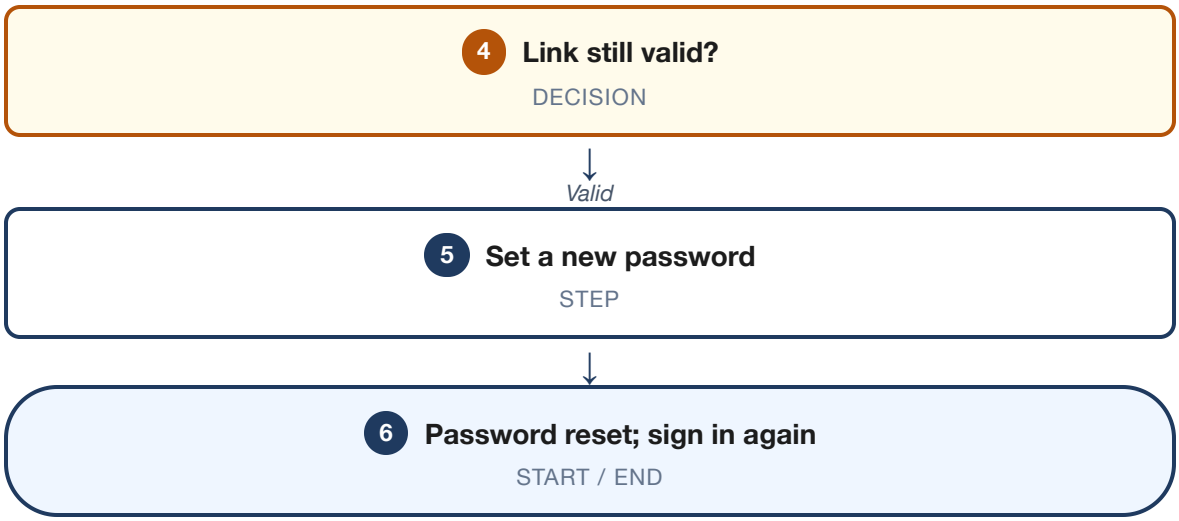

Reset your password with an email link when you cannot sign in.

Before you start

1. Access to the email inbox of your OxSteed account.

Process map

- *Expired or invalid:* Link still valid? → Request a new link
- Request a new link → Open the reset email

Text version. 1. Open the forgot-password page from the sign-in screen. 2. Enter the email address of your account and choose "Send Reset Link". 3. Open the reset email and choose the link. 4. If the link is expired or invalid, request a new one. 5. Enter a new password twice on the "Set New Password" page. 6. Sign in with the new password.

Steps

Step 1: Open the password reset page

From the sign-in page, choose "Forgot password?", or open /forgot-password directly. The page heading is "Reset your password" with the subtitle "Enter your email and we'll send you a link to reset your password."

> **Expected result:** The reset page shows a single Email address field and a "Send Reset Link" button.

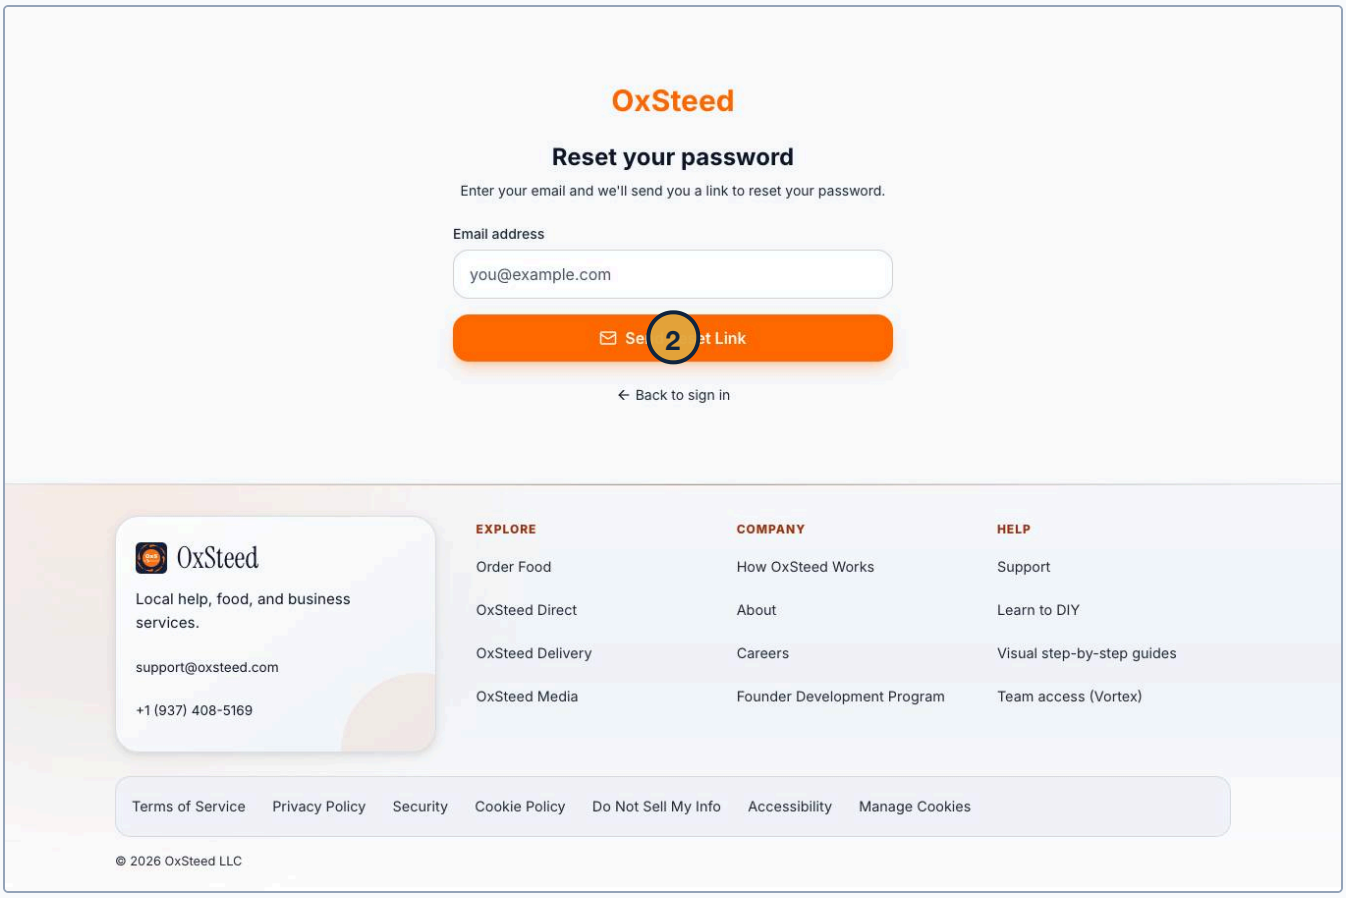

Figure 1. The password reset page, desktop view. *(Image description: Reset your password page with an email field and Send Reset Link button)*

1. **2.** Send Reset Link button

Step 2: Request the reset link

Type your account email address (placeholder "you@example.com") and choose "Send Reset Link". A confirmation tells you the link was sent. If you never get it, check your spam folder, then come back and choose "Try again".

> **Expected result:** A confirmation appears that the reset link was sent to your email.

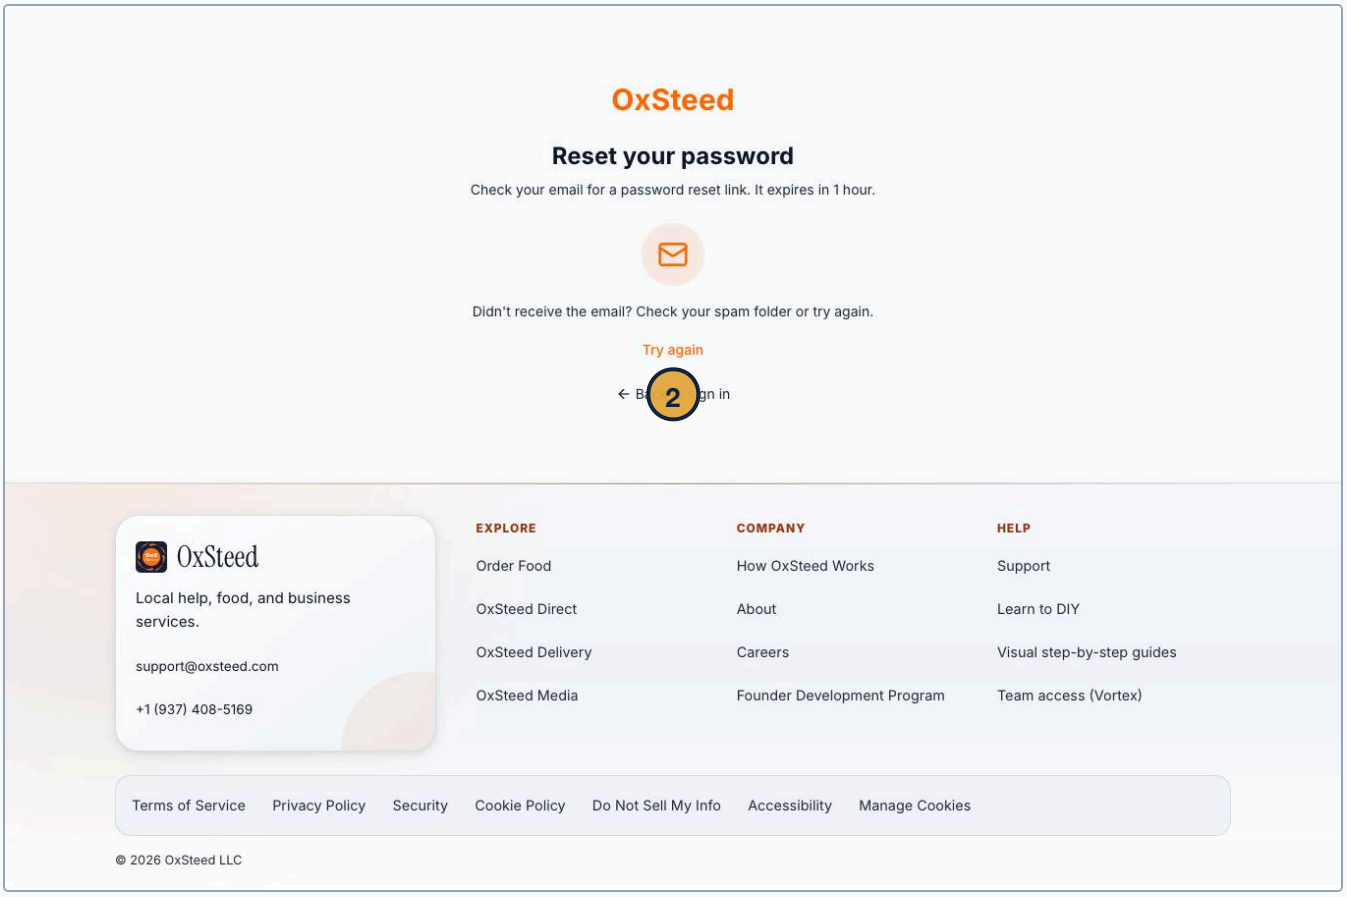

Figure 2. The sent confirmation after requesting the link. *(Image description: Confirmation that the reset link was sent)*

1. **2.** Back to sign in link

Step 3: Set a new password from the email link

Open the email and choose the reset link, which opens /reset-password/:token. The page heading is "Set New Password". Type your new password in the New password field and repeat it in the Confirm password field, then choose "Reset Password". The new password must meet the minimum length shown.

> **Expected result:** A success message appears and a "Go to Sign In now" option is shown.

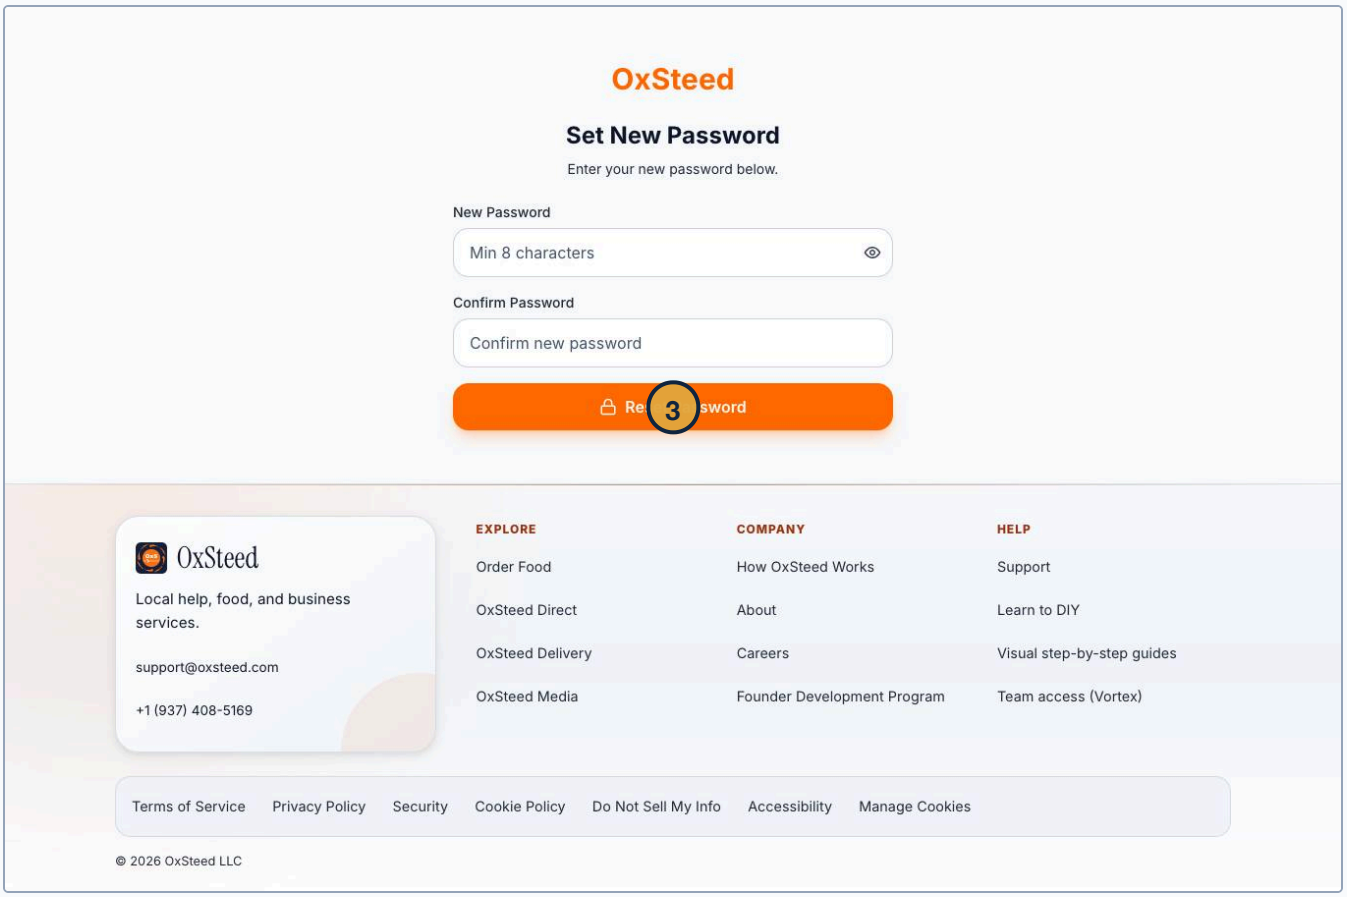

Figure 3. The new password form, desktop view. *(Image description: Set New Password page with new and confirm password fields)*

1. **3.** Reset Password button

Confirm it worked

The success screen appears; sign in at /login with your new password. If the link shows as invalid, request a fresh link.

If something goes wrong

Problem	What to do
The reset link shows as invalid or expired.	Reset links expire for security. Request a new one from /forgot-password and use it right away.
No reset email arrives.	Check the spam folder and confirm you typed the exact email registered on the account. Wait a few minutes before requesting again.
The new password is rejected.	Both fields must match and meet the minimum length. Avoid reusing your most recent passwords.

Need help?

If you no longer have access to the registered email, contact support from the Help menu or visit /support.

Guide ID: account-privacy | **Revision:** 2 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Privacy controls, data export, account deletion

Guide ID	**account-privacy**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/privacy-and-data

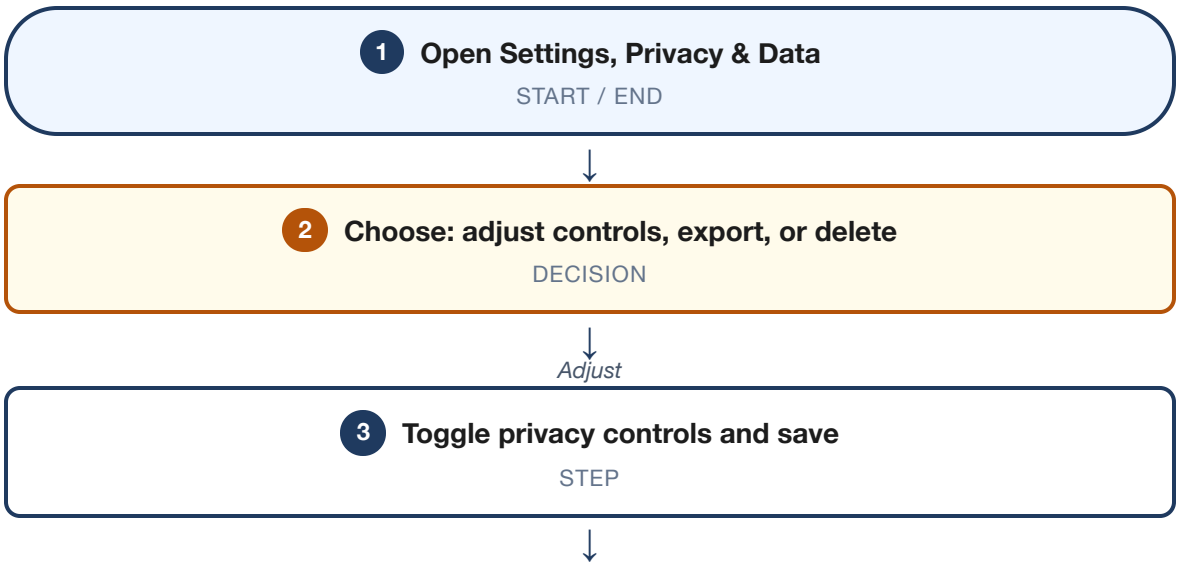

Goal

Control your privacy settings, export your data, or delete your account.

Before you start

1. Be signed in for export and deletion; the policy pages are public.

Process map

4 Privacy change applied

START / END

- *Export:* Choose: adjust controls, export, or delete → Verify password and email code, download export
- *Delete:* Choose: adjust controls, export, or delete → Danger Zone: Delete Account with confirmation
- Verify password and email code, download export → Privacy change applied
- Danger Zone: Delete Account with confirmation → Privacy change applied

Text version. 1. Open Settings and choose the "Privacy & Data" tab. 2. Decide what you want: adjust privacy controls, export your data, or delete your account. 3. For controls, toggle the options (communication, job, live chat, booking visibility) and save. 4. For export, confirm your current password, then enter the six-digit code sent to your email; the export downloads. 5. For deletion, use the "Danger Zone" tab, choose "Delete Account", and confirm in the "Delete Your Account" dialog.

Steps

Step 1: Open the Privacy & Data tab

Choose Settings from your account menu and pick the "Privacy & Data" tab. The page shows privacy preference toggles (for example communication controls, job controls, live chat, and booking visibility). The public legal pages (/privacy, /do-not-sell, /cookie-policy, /terms) are readable without signing in.

> **Expected result:** The privacy toggles load with their current saved states.

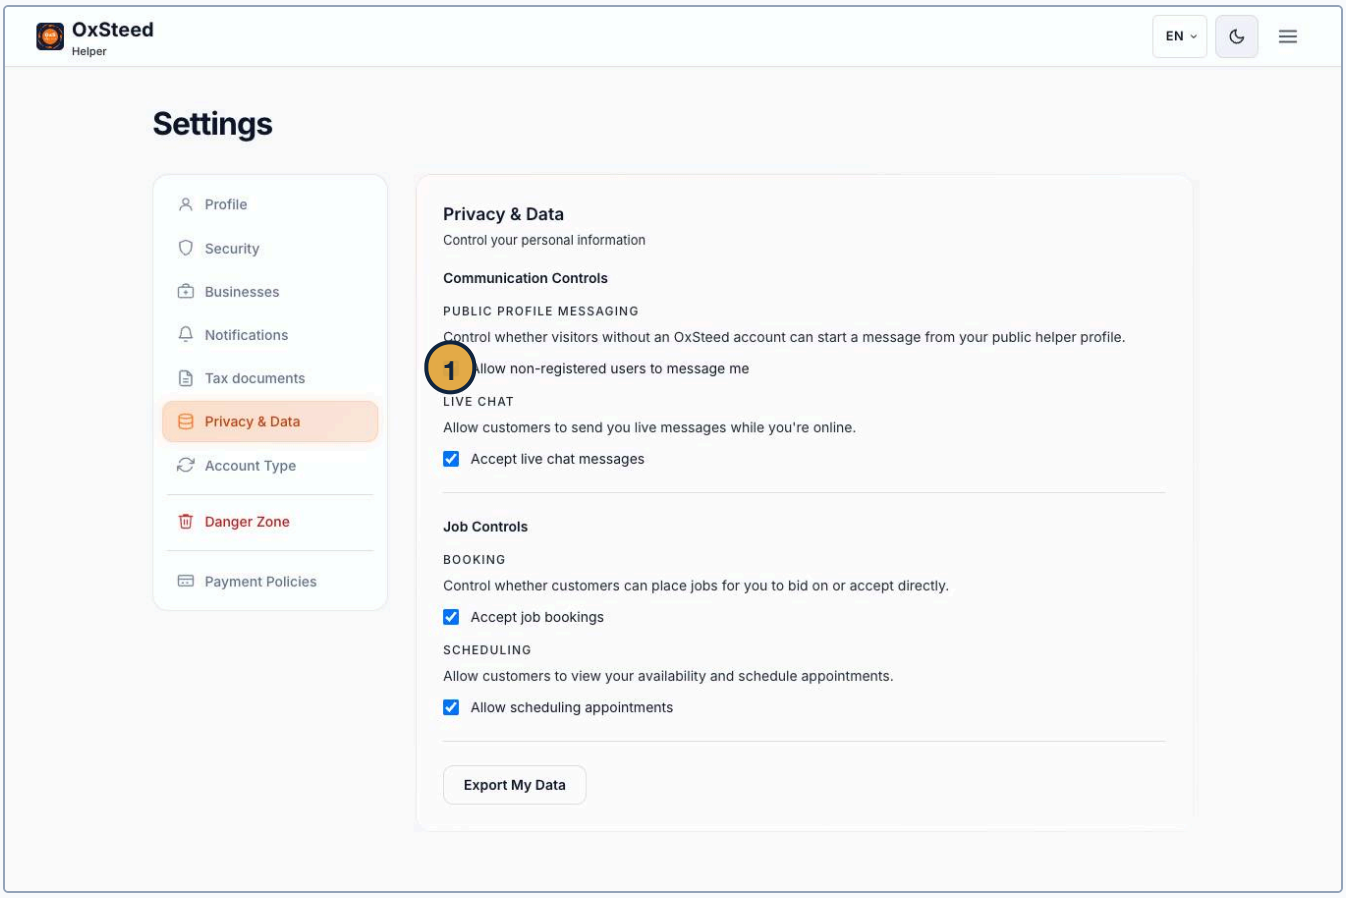

Figure 1. The Privacy & Data tab, desktop view. *(Image description: Synthetic example: Settings)*

1. **1.** Privacy toggles

Step 2: Adjust privacy controls and save

Toggle the controls you want to change (for example who can contact you or see your activity) and choose Save. A confirmation toast shows when the update is stored.

> **Expected result:** The saved states persist after you reload the page.

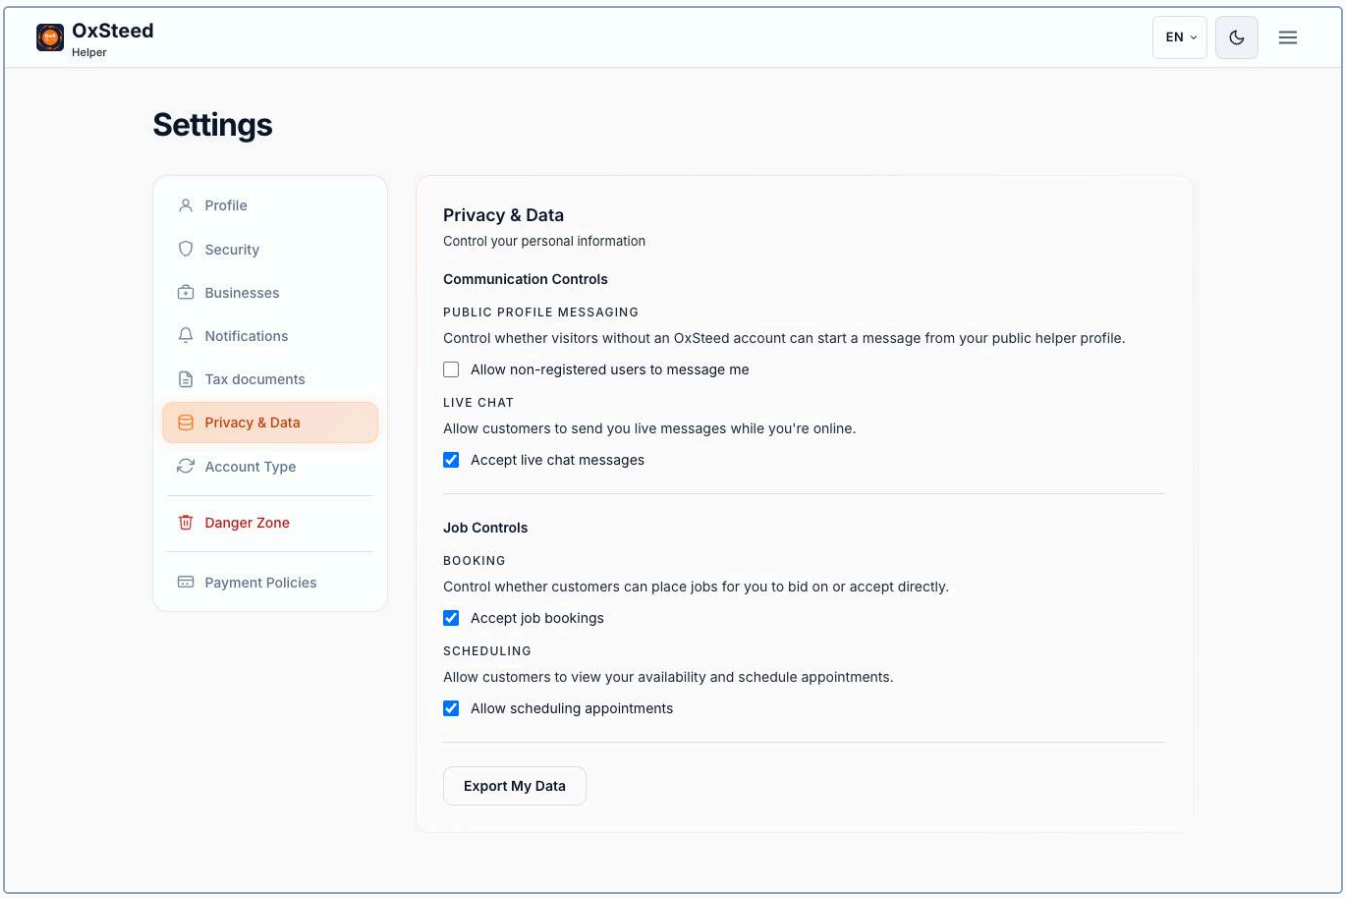

Figure 2. Adjusting privacy controls. *(Image description: Synthetic example: Settings)*

Step 3: Export your data with two-step verification

In the Privacy & Data tab, start the data export. First confirm your current password; a verification code is sent to your email ("A verification code was sent to your email."). Enter the six-digit code, then choose the verify-and-export option to download your data export.

> **Expected result:** The export file downloads to your device.

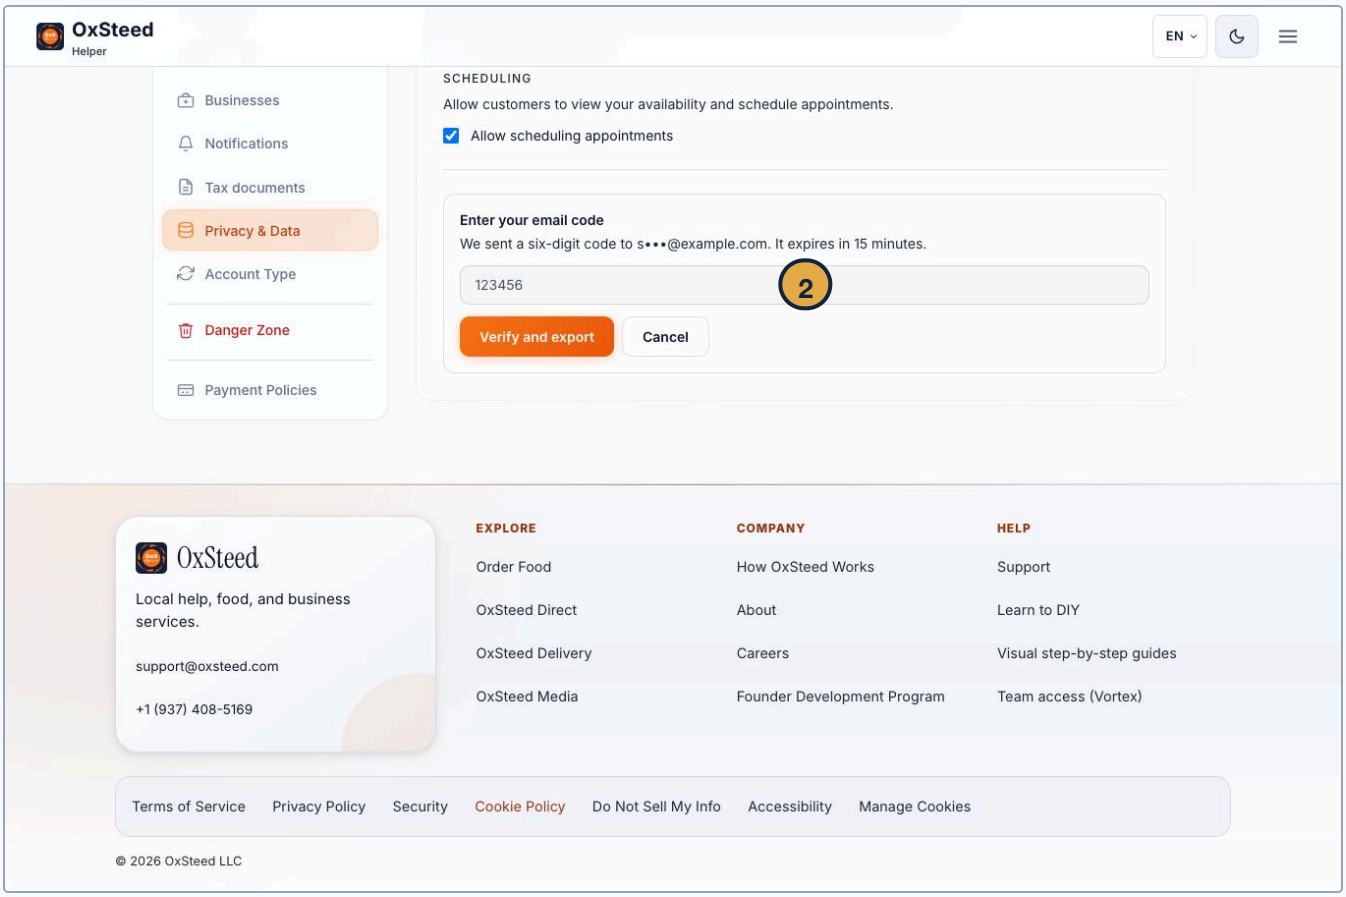

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Settings)*

1. **2.** Six-digit code field

Step 4: Delete your account from the Danger Zone

Choose the "Danger Zone" tab and choose "Delete Account". A confirmation dialog titled "Delete Your Account" explains what is removed (including active jobs and pending balances if any). Type the confirmation as requested and confirm the deletion. This cannot be undone.

> **Expected result:** Your account is deleted and you are signed out.

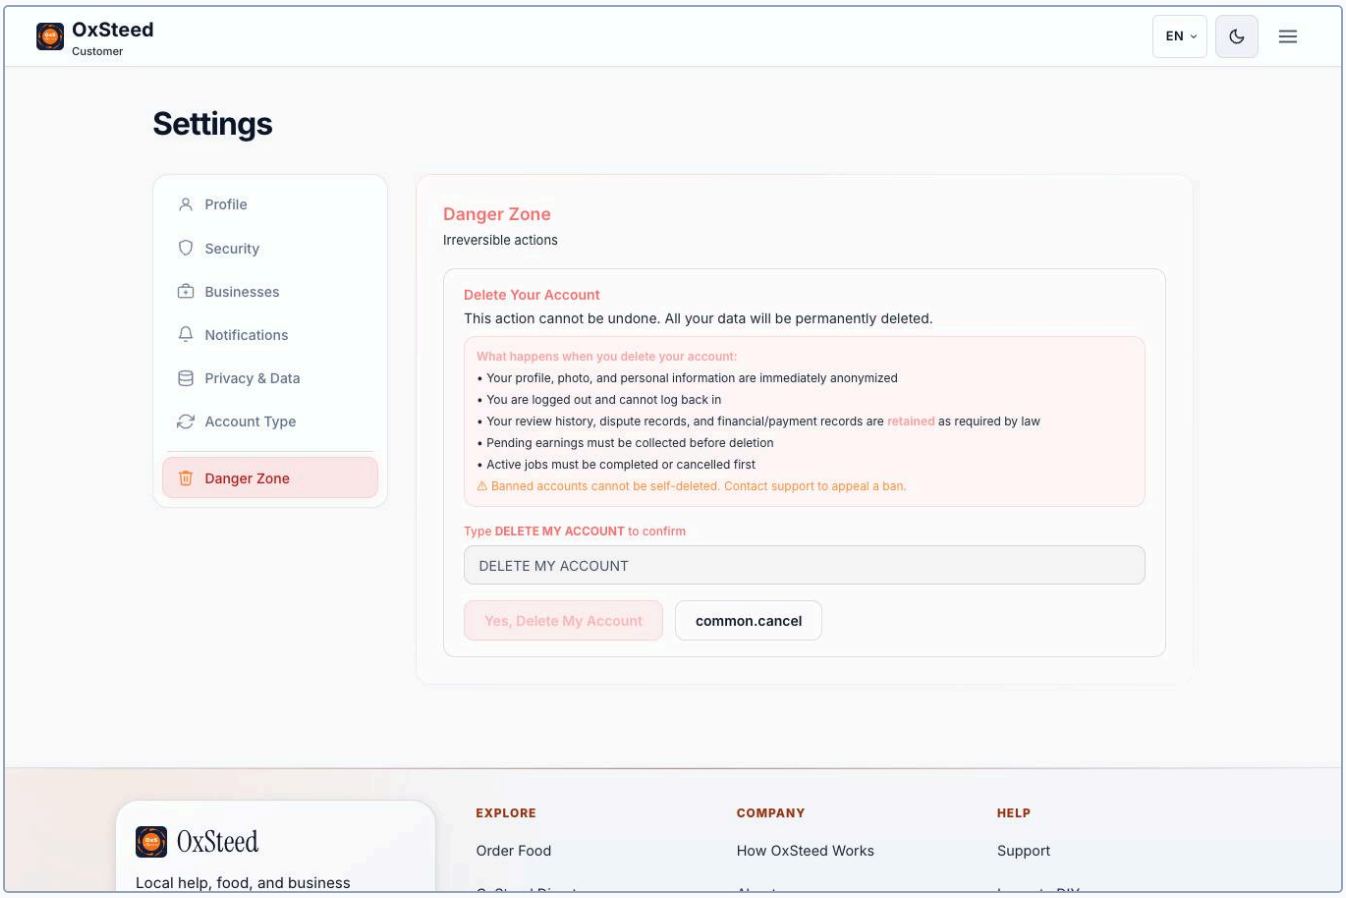

Figure 4. The Delete Your Account confirmation. *(Image description: Synthetic example: Settings)*

Confirm it worked

Privacy toggles keep their new values after a reload; exports download; after deletion you can no longer sign in with that account.

If something goes wrong

Problem	What to do

The export code never arrives.	Check spam, then request a new code. You must enter your current password first; without it no code is sent.
Account deletion is blocked.	The dialog lists blockers such as active jobs or a remaining balance. Finish or cancel those jobs and withdraw balances first, then retry deletion.

Need help?

For data requests you cannot complete yourself, contact support from the Help menu or visit /support.

Guide ID: account-settings | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Manage account settings

Guide ID	**account-settings**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/manage-settings

Goal

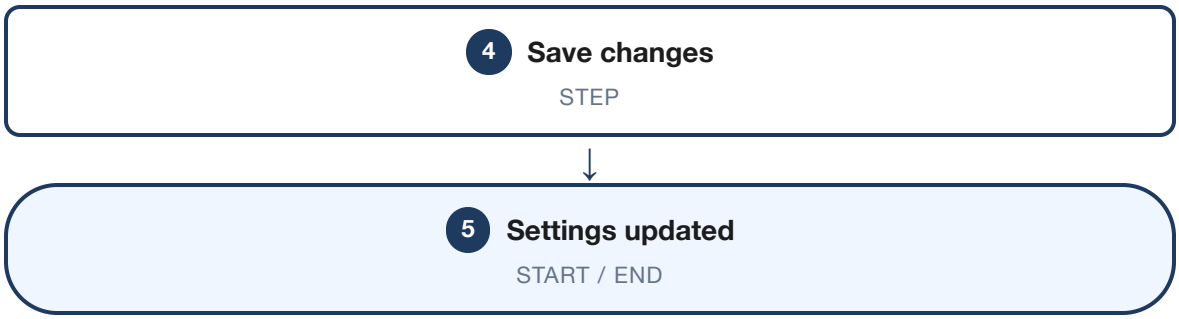

Change your profile, security, notifications, country, businesses, and tax documents from one settings hub.

Before you start

1. Be signed in to your OxSteed account.

Process map

Text version. 1. Open /settings. 2. Pick the tab you need: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, Danger Zone, or Tax documents (helpers only). 3. Edit the fields or toggle the controls on that tab. 4. Save; most changes confirm with a toast. 5. Security changes like 2FA and passkeys take effect immediately.

Steps

Step 1: Open Settings and pick a tab

Choose Settings from your account menu, or open /settings directly. The page shows tabs: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, and Danger Zone. Helpers also see a Tax documents tab. You can deep-link a tab, for example /settings?tab=tax.

> **Expected result:** The settings page loads with the tab list and the Profile tab selected.

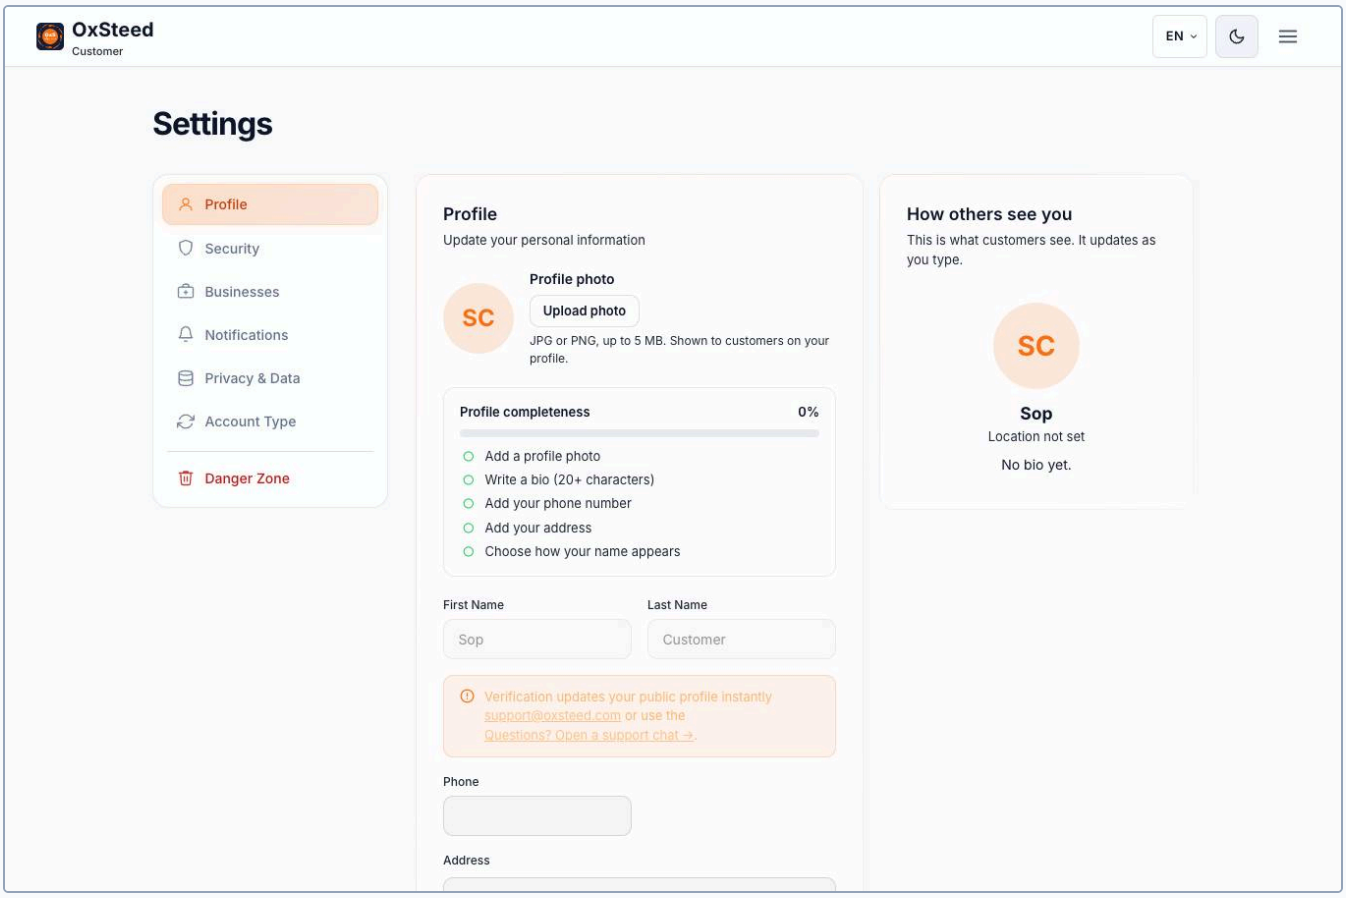

Figure 1. The settings tabs, desktop view. *(Image description: Synthetic example: Settings)*

Step 2: Update your profile or account basics

On the Profile tab, update your name, contact details, and profile photo. On the Account Type tab you can review your "Current Role", see the "Workspaces you belong to", and use "Switch" to move into a granted workspace role.

> **Expected result:** The changed values stay in the fields after saving.

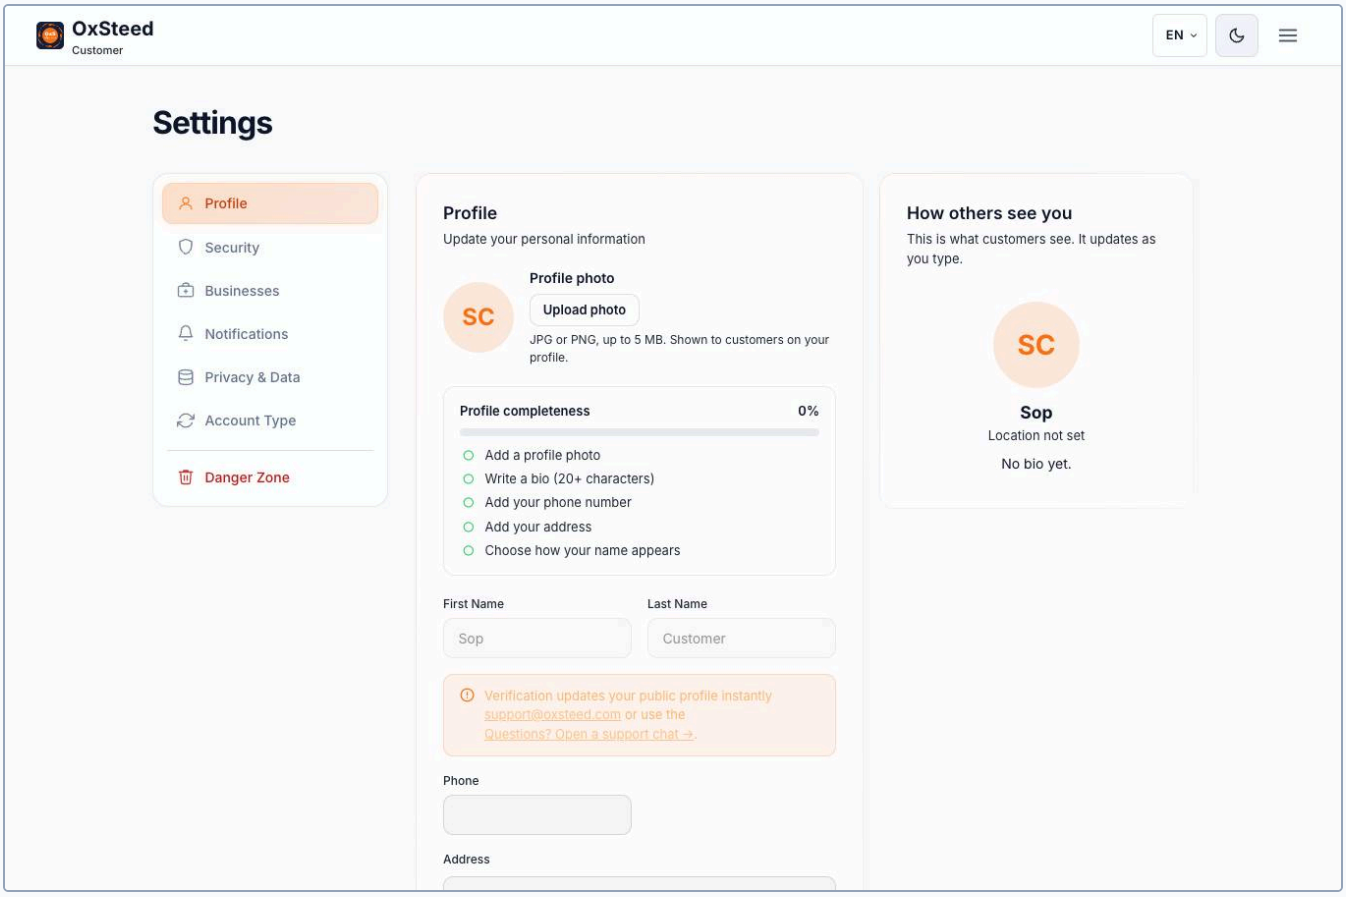

Figure 2. The Profile tab. *(Image description: Synthetic example: Settings)*

Step 3: Manage security: 2FA, passkeys, and sessions

On the Security tab, set up two-factor authentication (TOTP), add or remove passkeys, and review your active sessions. Sessions can be signed out individually from the sessions list. The Notifications tab controls email and push preferences; the country selector sets your marketplace country.

> **Expected result:** Security changes confirm immediately; a new 2FA setup asks you to verify a test code.

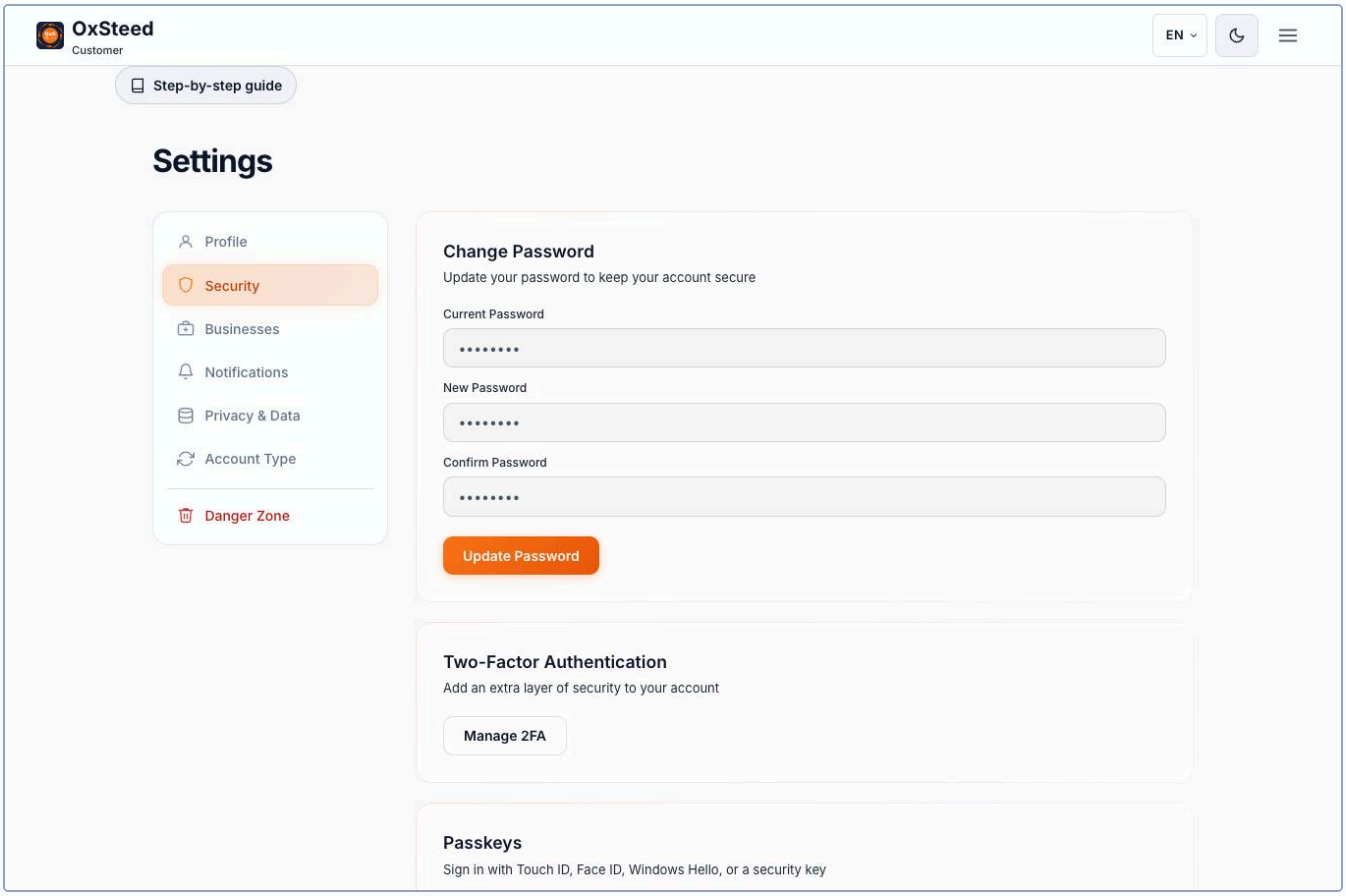

Figure 3. The Security tab: 2FA, passkeys, and sessions. *(Image description: Synthetic example: Settings)*

Step 4: File tax documents as a helper (W-9)

Helpers: open the Tax documents tab and complete "Tax documents (W-9)". The subtitle explains: "File your W-9 so payouts can be released. Your tax ID is stored encrypted." Payouts are gated until your tax identity is on file.

> **Expected result:** The W-9 shows as filed and the payout tax gate is satisfied.

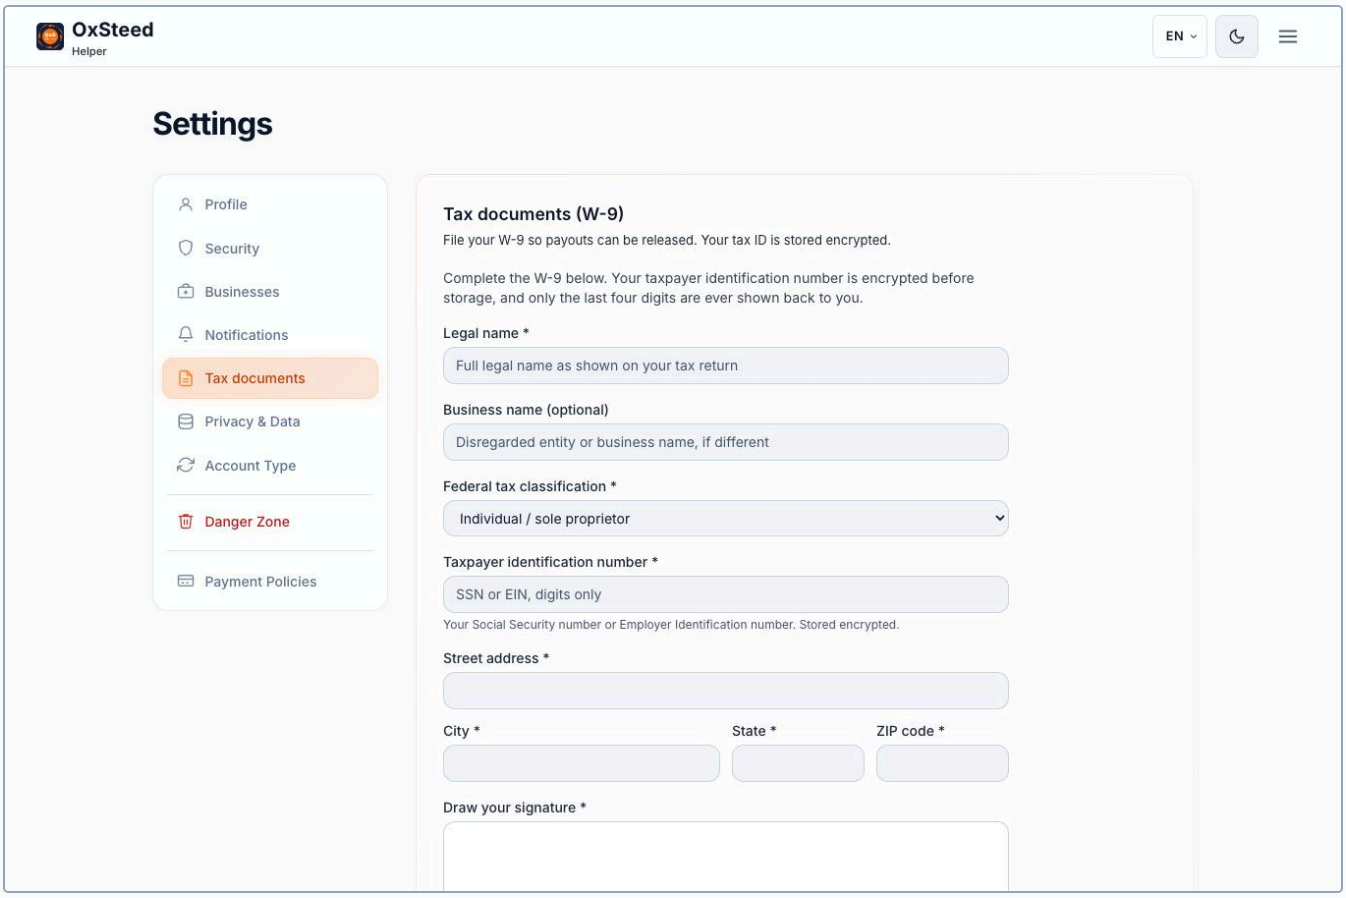

Figure 4. The Tax documents tab for helpers. *(Image description: Synthetic example: Settings)*

Confirm it worked

Each change confirms with a toast or an updated value. Your Security tab reflects the new 2FA or passkey state immediately.

If something goes wrong

Problem	What to do

You cannot find a setting you expected.	Check every tab; some controls are role-specific (the Tax documents tab is helper-only, businesses live under the Businesses tab).
A save fails with an error.	Check the highlighted field for the validation message, fix it, and save again. If it keeps failing, reload the page and retry.

Need help?

For account or security issues you cannot fix in Settings, contact support from the Help menu or visit /support.

Guide ID: account-signin | **Revision:** 3 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Sign in

Guide ID	**account-signin**
Revision	Revision 3 (generated October 19, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/sign-in

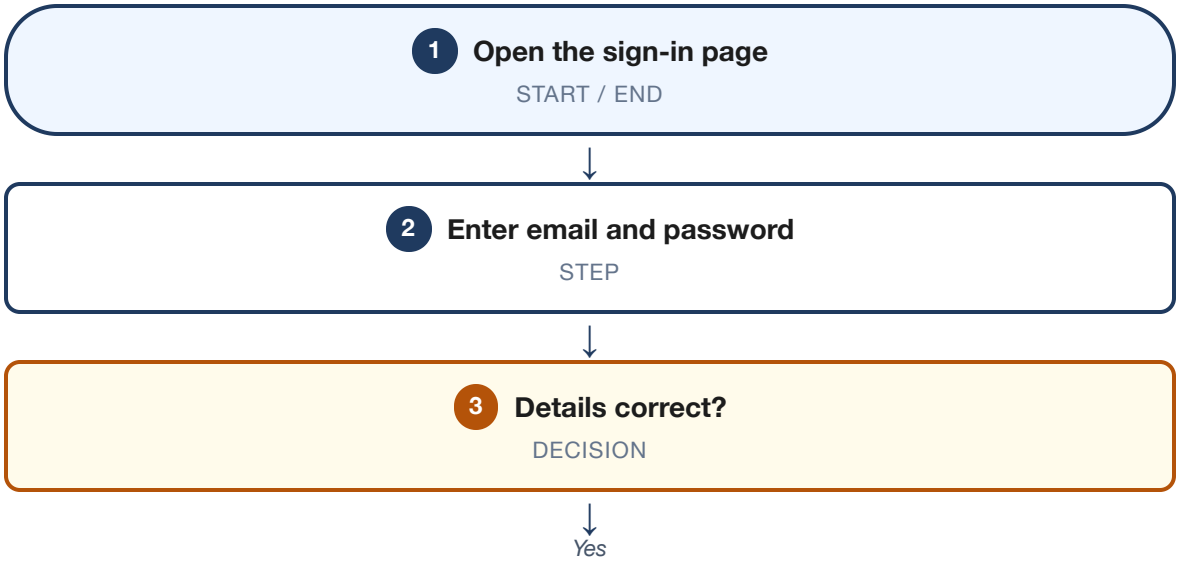

Goal

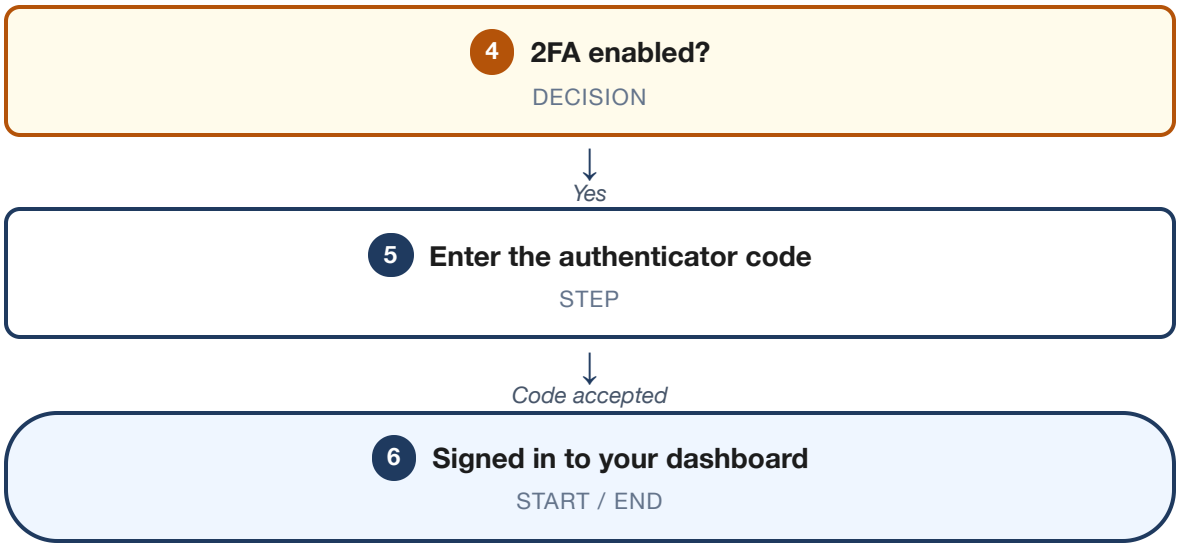

Sign in to your OxSteed account with your email and password, including two-factor and passkey options.

Before you start

1. Have an OxSteed account.
2. If you enabled two-factor authentication, have your authenticator app ready.

Process map

- *No:* Details correct? → Use Forgot password?
- *No:* 2FA enabled? → Signed in to your dashboard
- *Password reset:* Use Forgot password? → Enter email and password

Text version. 1. Open the sign-in page. 2. Enter your email address and password, then choose "Sign in". 3. If the details are wrong, use "Forgot password?" to reset. 4. If two-factor authentication is on, the page switches to "Verify it's you"; enter your Authentication code. 5. You land on your dashboard. Passkey users can sign in with their device instead of typing a password.

Steps

Step 1: Open the sign-in page

Choose "Sign In" in the top navigation, or open /login directly. The page shows the heading "Welcome back" and the subtitle "Sign in to access your local skills marketplace", with an Email address field, a Password field, and a "Sign in" button. New users see a "Join OxSteed" link instead.

> **Expected result:** The sign-in form is visible with empty Email address and Password fields.

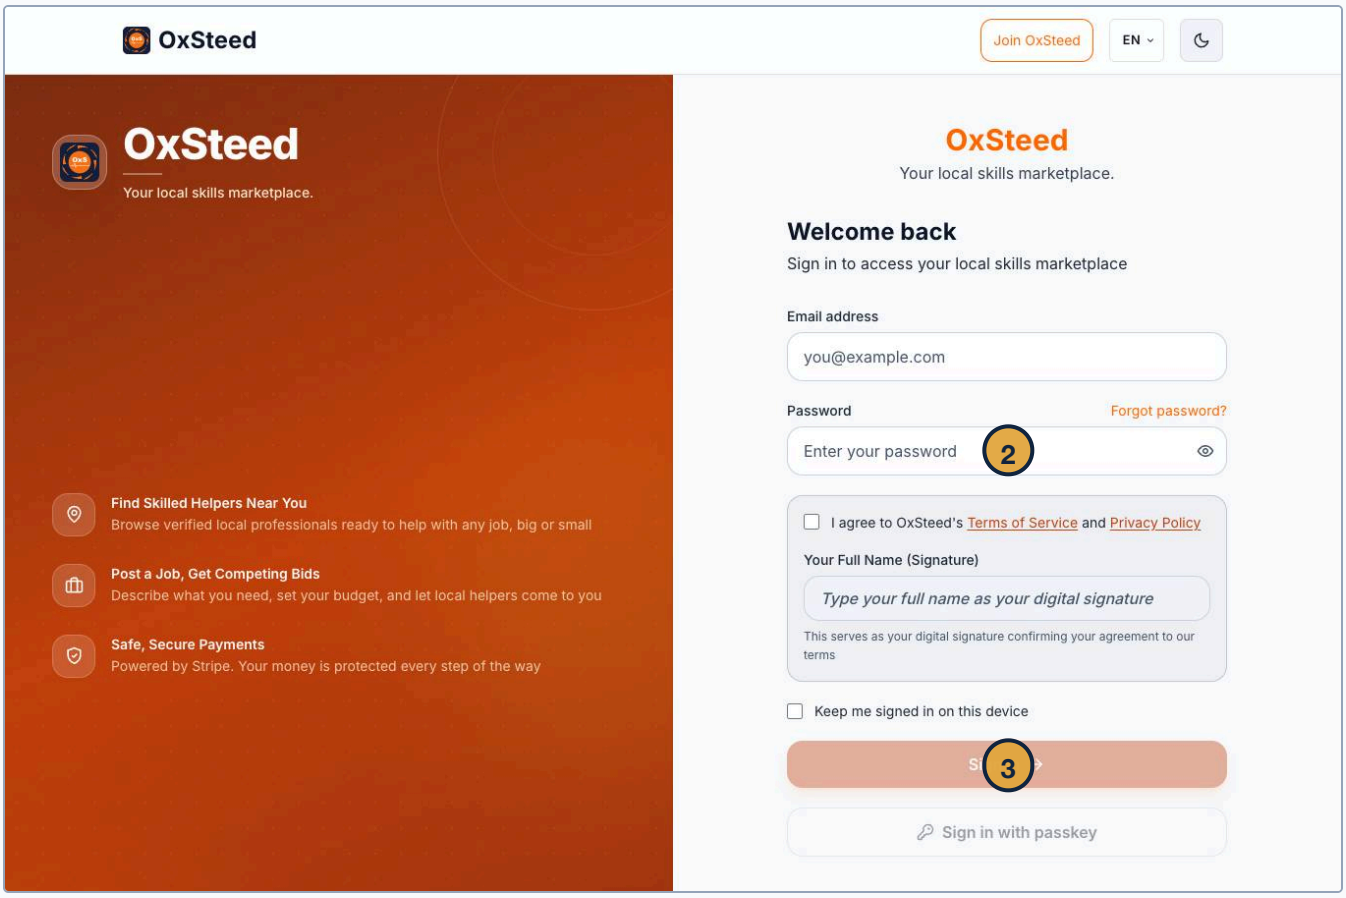

Figure 1. The sign-in page, desktop view. *(Image description: Synthetic example: OxSteed)*

1. **2.** Password field
2. **3.** Sign in button

Step 2: Enter your email and password

Type the email address you registered with into the Email address field (placeholder "you@example.com") and your password into the Password field (placeholder "Enter your password"). Passwords are case sensitive. Use "Show password" if you want to check your typing, then choose "Sign in". The "Forgot password?" link sits next to the password field.

> **Expected result:** The Sign in button shows a loading state, then you are redirected.

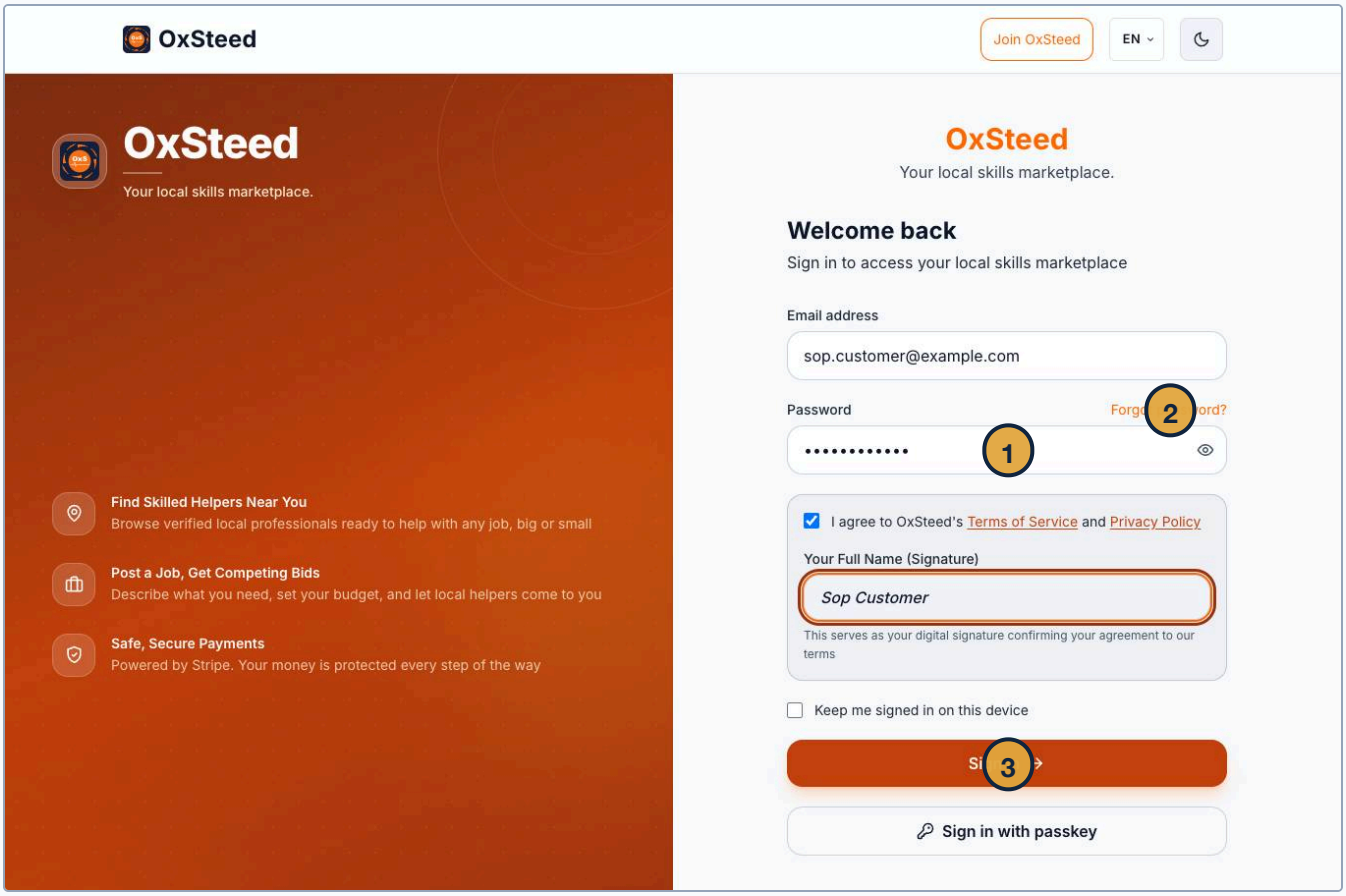

Figure 2. The filled sign-in form before choosing Sign in. *(Image description: Synthetic example: OxSteed)*

1. **1.** Password field
2. **2.** Forgot password? link
3. **3.** Sign in button

Step 3: Complete the two-factor check if prompted

If you enabled two-factor authentication, the page changes to "Verify it's you". Enter the current code from your authenticator app into the Authentication code field and submit. Users with a passkey can choose the passkey option instead of typing a password.

> **Expected result:** The code is accepted and you continue to your dashboard.

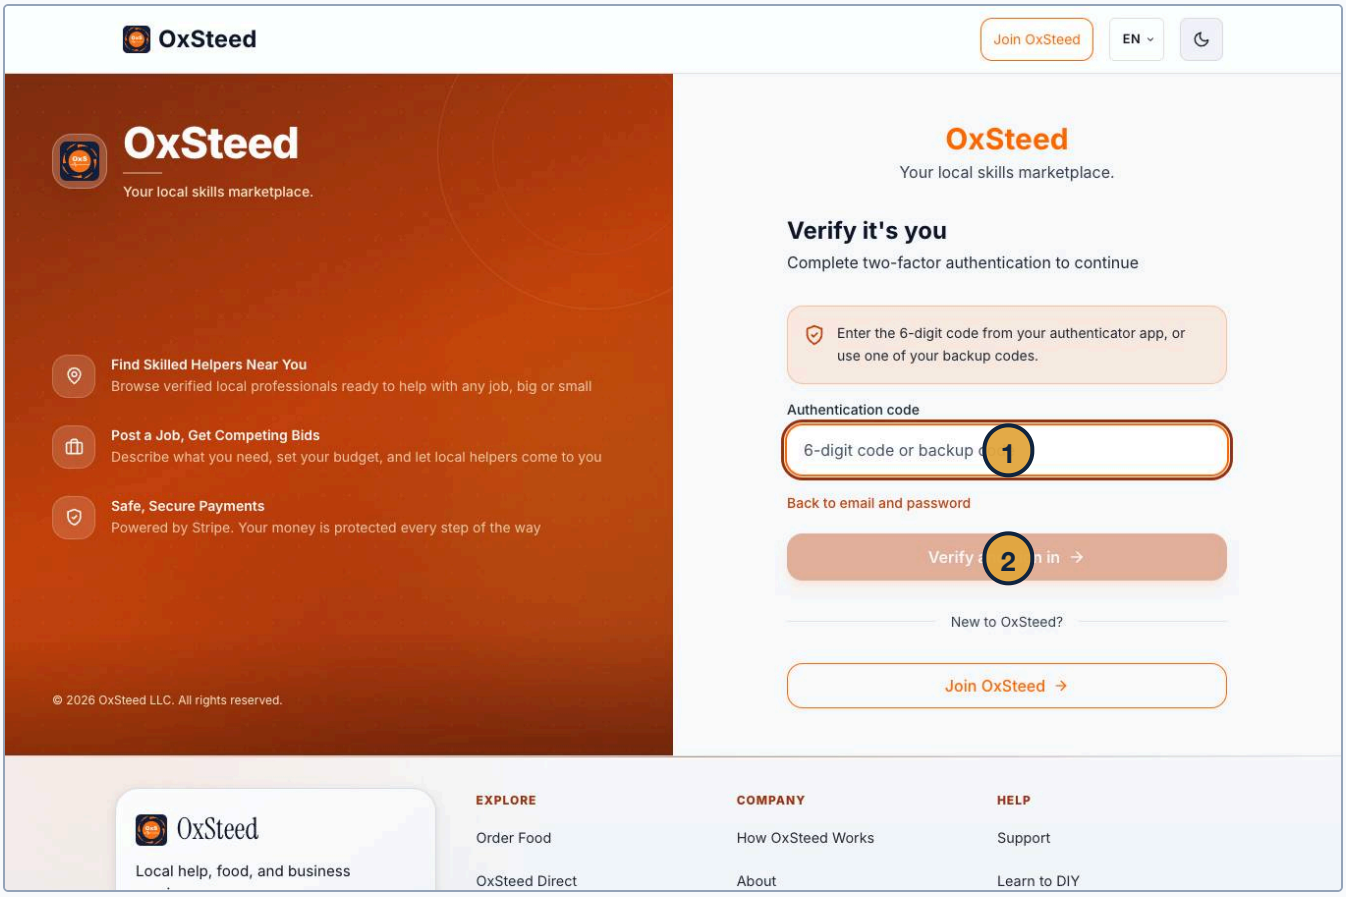

Figure 3. The two-factor step, shown only when 2FA is enabled. *(Image description: Synthetic example: OxSteed)*

1. **1.** Authentication code field
2. **2.** Submit button

Step 4: Confirm you landed on your dashboard

After sign in, your dashboard loads. Open Account in the navigation to find your account actions. If you expected a different mode (for example Helper instead of Customer), use the mode switcher in the navigation.

> **Expected result:** Your dashboard is visible and the Account menu offers your signed-in account actions.

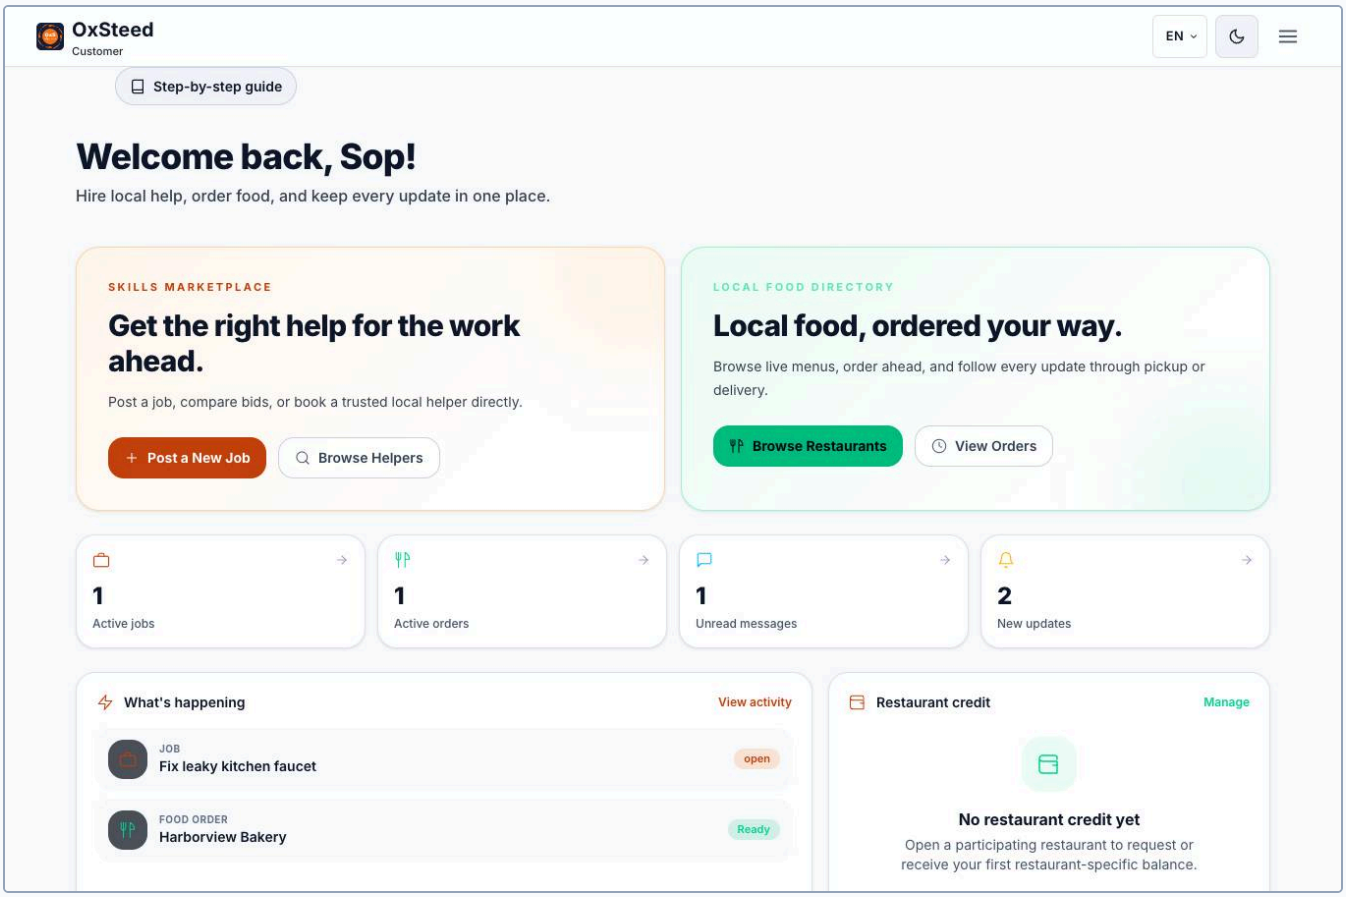

Figure 4. A signed-in dashboard with the account menu. *(Image description: Synthetic example: Welcome back, Sop!)*

Confirm it worked

Your dashboard loads and the Account menu offers your signed-in account actions. Review active sessions anytime under Settings, Security.

If something goes wrong

Problem	What to do

You see "Invalid email or password".	Check for typos and caps lock, then try again. After several failed attempts the sign-in is rate-limited; wait a few minutes or reset the password.
Your two-factor code is rejected.	Make sure your phone clock is set automatically; authenticator codes drift when the clock is off. If you lost the authenticator, use your saved recovery code from the Security tab in Settings.
Passkey sign in fails.	Make sure your browser and device support passkeys and that you use the same device or synced profile where the passkey was created. Fall back to email and password.

Need help?

If you cannot access your account after a password reset, contact support from the Help menu or visit /support.

Guide ID: logistics-accept-quotes | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Publish and accept quotes

Guide ID	**logistics-accept-quotes**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer)
Availability	**Conditional**
Conditions	• Requires LOGISTICS_PAYMENTS_ENABLED=true (default off). While disabled, the quote lifecycle routes answer 503 and the checkout shows a disabled state.
Online version	/how-it-works/logistics/accept-logistics-quotes

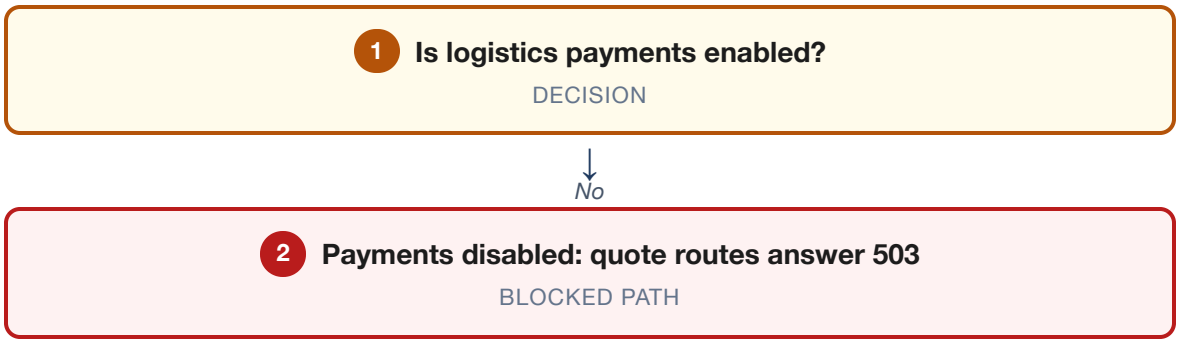

Goal

Review a published quote version and accept it so payment can proceed.

Before you start

1. A signed-in OxSteed account.
2. A sourcing request or order with a published quote.

Process map

- *Yes:* Is logistics payments enabled? → Supplier publishes a new quote version

- Supplier publishes a new quote version → You are notified: New quote needs your acceptance
- You are notified: New quote needs your acceptance → Open checkout
- Open checkout → Review What changed
- Review What changed → Choose Accept quote version N
- Choose Accept quote version N → Quote accepted: you can now pay

Text version. 1. First check the condition: logistics payments must be enabled, otherwise the quote routes answer 503 and checkout is disabled. 2. The supplier publishes a new quote version against your request. 3. You receive the notification "New quote needs your acceptance". 4. Open checkout. 5. The acceptance gate shows "A new quote needs your acceptance" with a "What changed" comparison table. 6. Review the changes, then choose "Accept quote version N". 7. The quote is accepted and you can now pay. Payment is paused until you accept the current quote, and you cannot pay against an older version.

Steps

Step 1: Confirm payments are enabled

This flow only works when logistics payments are enabled (LOGISTICS_PAYMENTS_ENABLED=true, default off). While disabled, the quote lifecycle routes answer 503 and the checkout shows the disabled state "Online payments are not enabled yet. Please try again later." If you see that message, stop here and contact support; the steps below do not apply.

> **Expected result:** Checkout loads normally instead of showing the payments-disabled message.

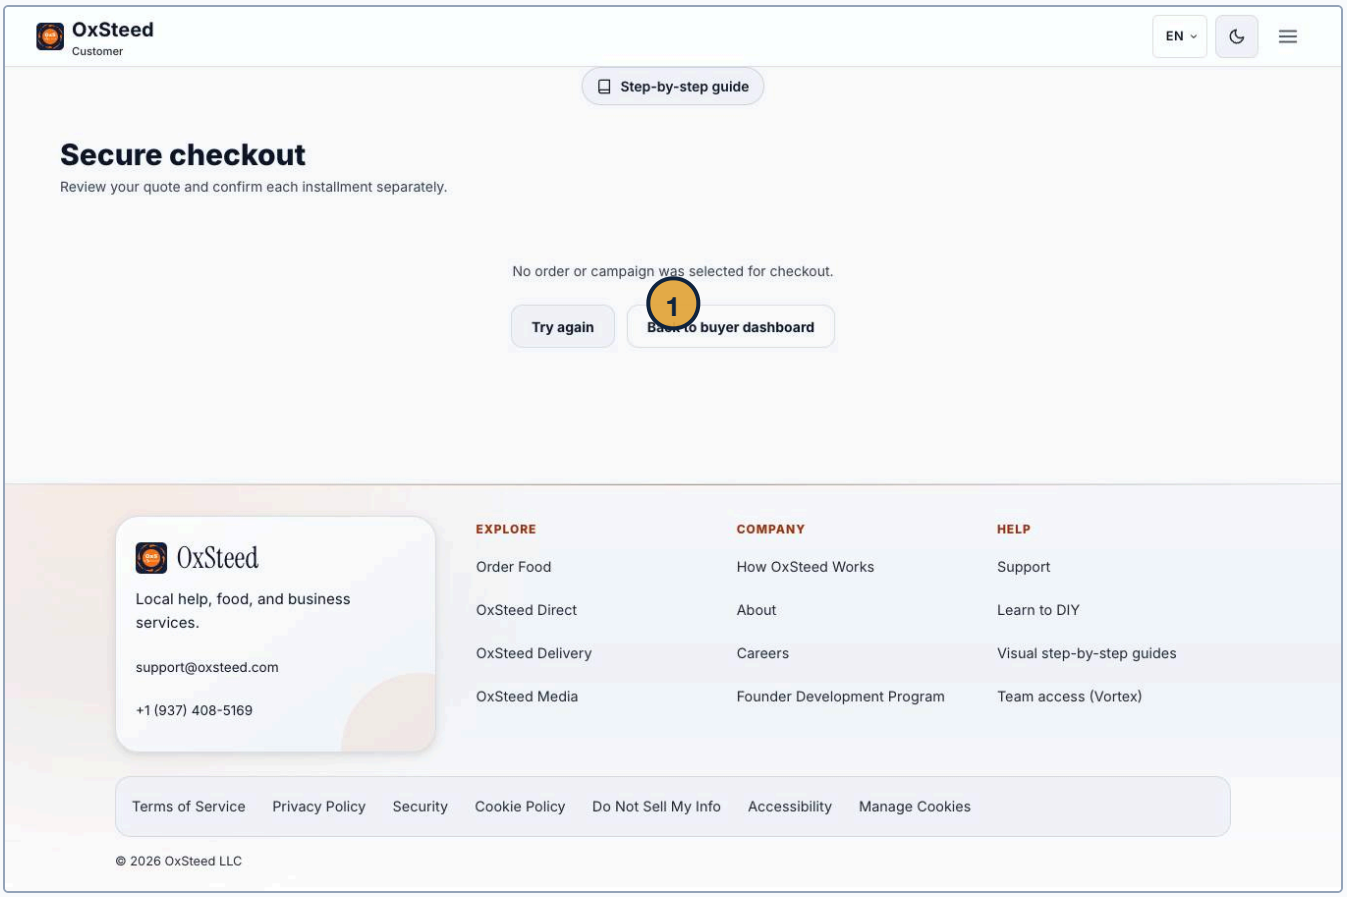

Figure 1. The disabled checkout state, desktop view. *(Image description: Synthetic example: Secure checkout)*

1. **1.** Payments disabled message

Step 2: Open checkout when a new quote needs your acceptance

When the supplier publishes a new quote version, you receive the notification "New quote needs your acceptance". Open /logistics/checkout. The acceptance gate appears with the heading "A new quote needs your acceptance" and the text "Version N replaces version M. Review what changed, then accept it to continue to payment. You cannot pay against the older version."

> **Expected result:** The quote acceptance gate is visible at the top of checkout.

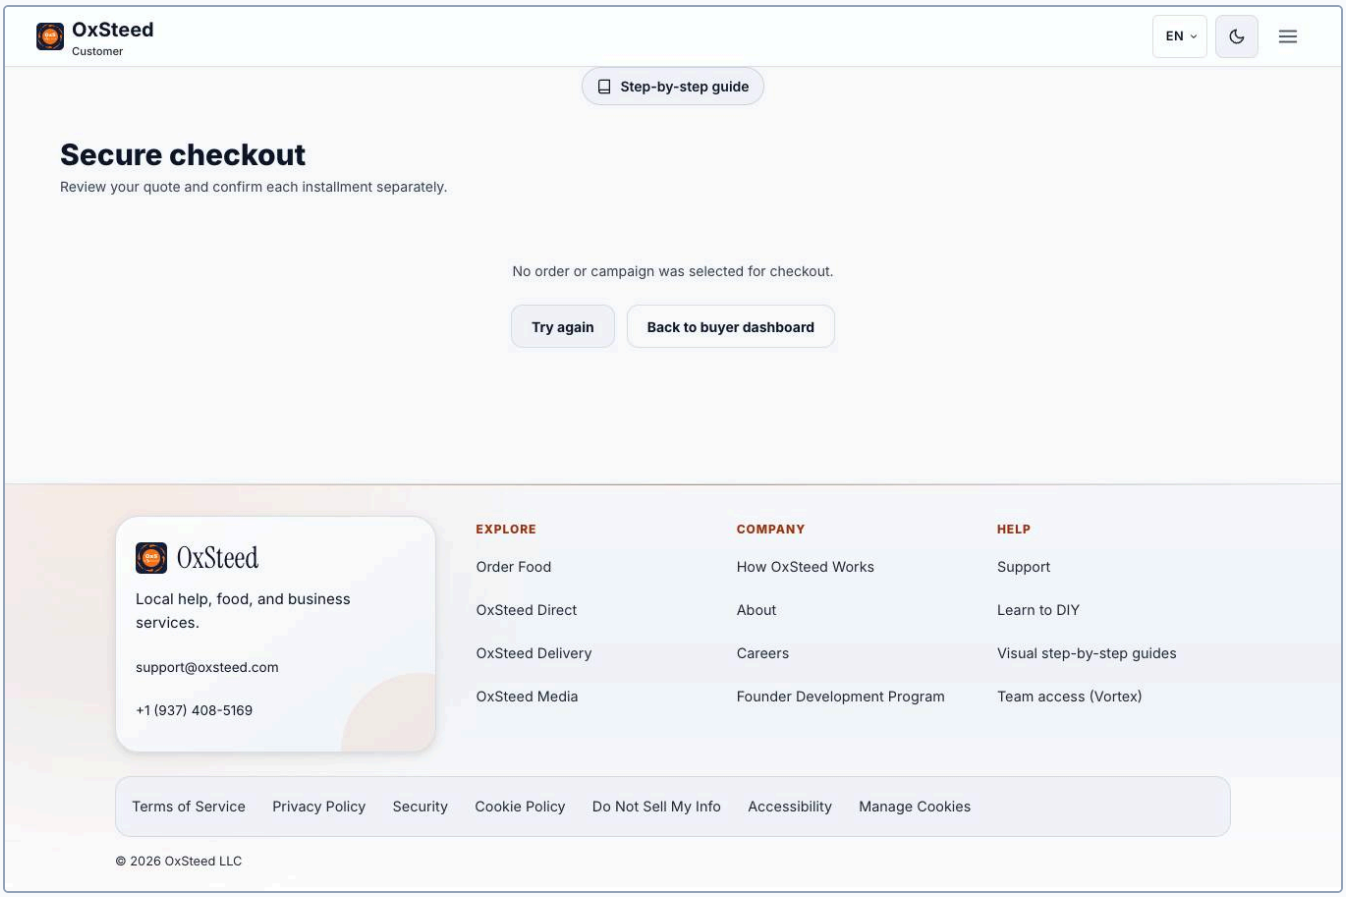

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Secure checkout)*

Step 3: Review what changed between versions

Read the "What changed" table. Each row shows the item, whether it was Added, Removed, or Changed, and the "Total changed by {{amount}}". If nothing changed at the line level, the table shows "No line-item changes in this version."

> **Expected result:** You understand exactly what is different in the new quote version.

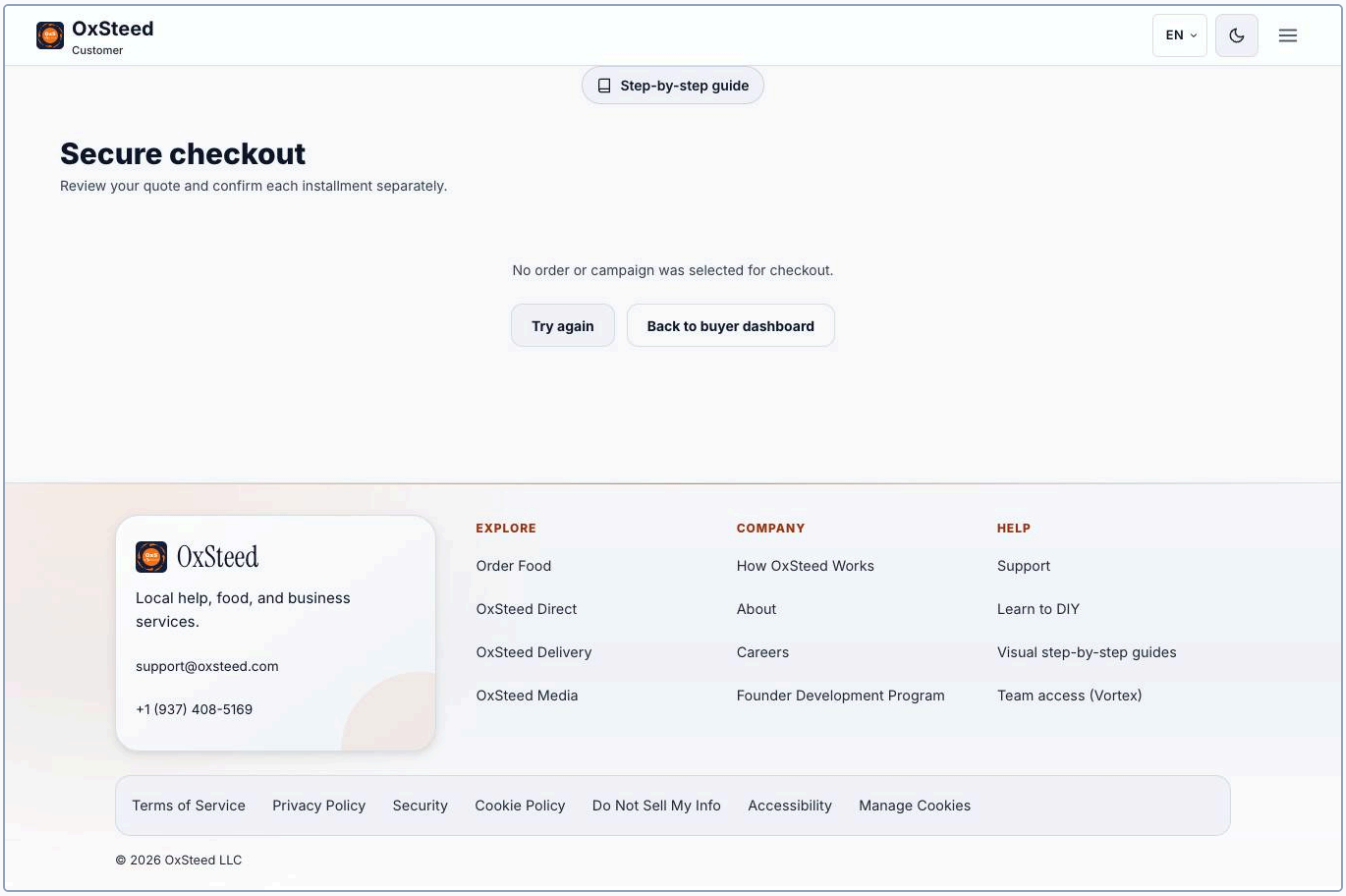

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Secure checkout)*

Step 4: Accept the quote version

Choose "Accept quote version N" to accept, or "Not now" to decline and decide later. After accepting, the message reads "Quote version N accepted. You can now pay." Until you accept, the notice stays: "Payment is paused until you accept the current quote." Continue to the payment confirmation step next.

> **Expected result:** The quote is accepted and checkout continues to the payment method step.

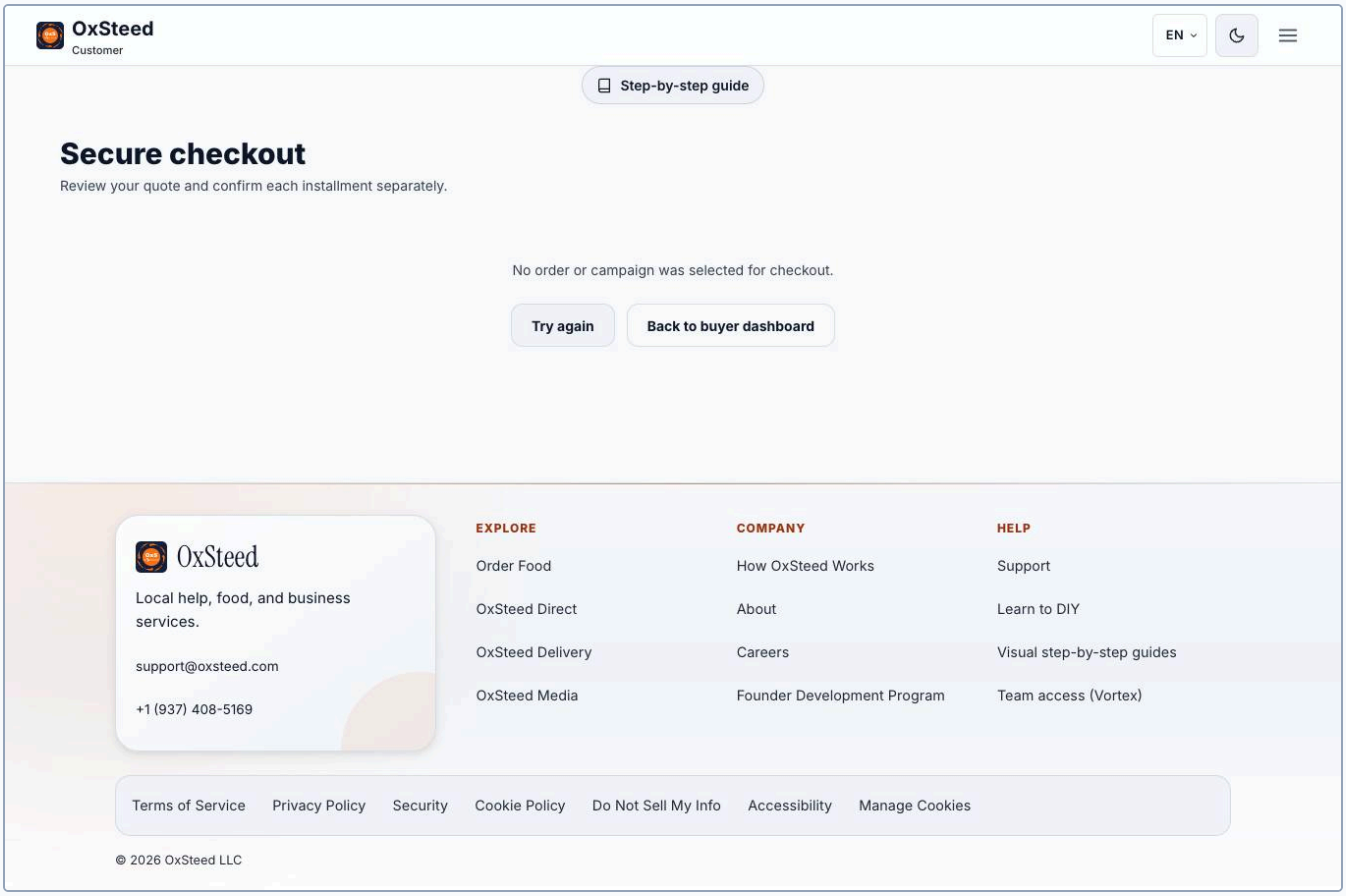

Figure 4. After accepting the quote, desktop view. *(Image description: Synthetic example: Secure checkout)*

Confirm it worked

Checkout shows "Quote version N accepted. You can now pay." and the payment step is no longer paused.

If something goes wrong

Problem	What to do

The quote routes answer 503 or checkout shows the payments-disabled message.	Logistics payments are not enabled in this environment. Contact support at /support to confirm when the feature is on.
A newer quote version arrived while you were reviewing.	The gate refreshes to the latest version. Review the new "What changed" table before accepting again.

Need help?

Quote or payment issues: contact support from the in-app support page at /support.

Guide ID: logistics-browse | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Browse logistics campaigns and lanes

Guide ID	**logistics-browse**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Customer, Logistics participant
Availability	**Supported**
Online version	/how-it-works/logistics/browse-logistics-campaigns

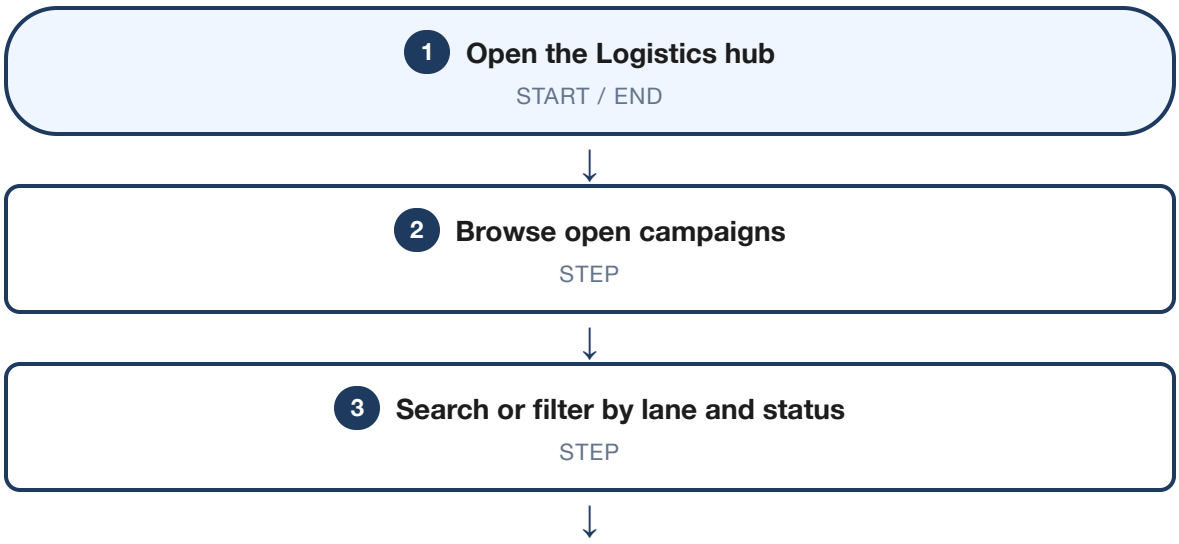

Goal

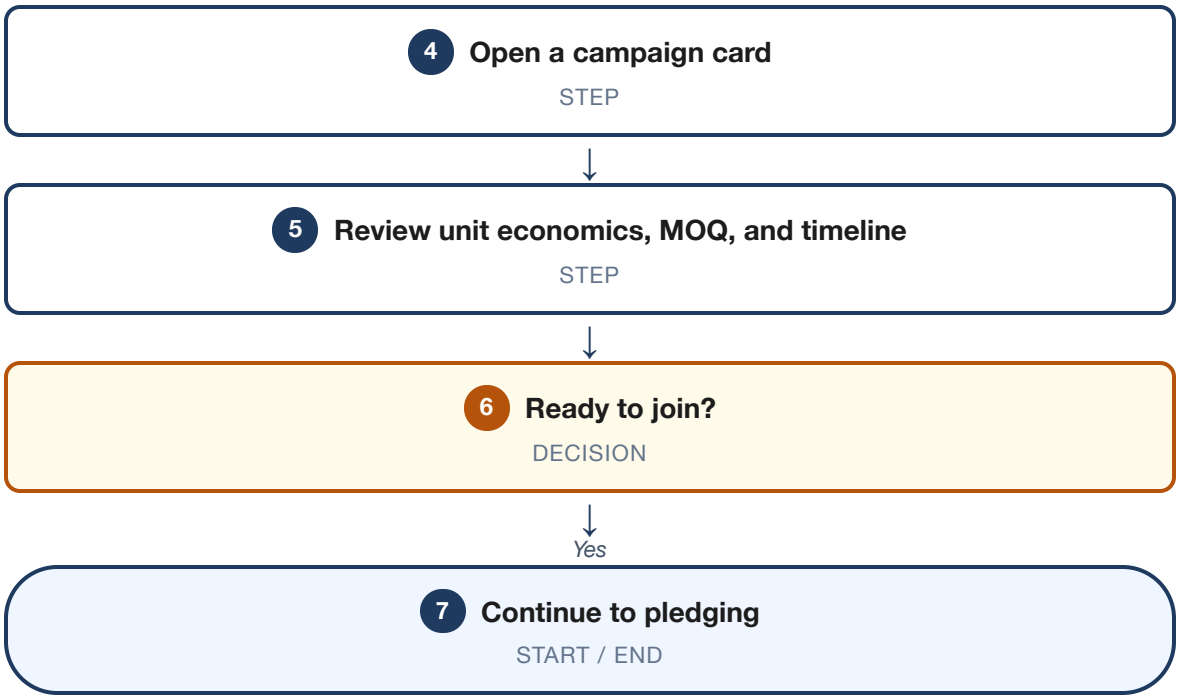

Find an open pooled logistics campaign and review its pricing, lane, and timeline before joining.

Before you start

1. A free OxSteed account is enough to browse. Sign in to pledge or participate.

Process map

- *Not yet:* Ready to join? → Search or filter by lane and status

Text version. 1. Open the Logistics hub. 2. Browse the open campaigns list. 3. Use search and the lane and status filters to narrow the list. 4. Open a campaign card to see its detail page. 5. Review the unit economics, MOQ progress, and timeline. 6. If the campaign fits your needs, continue to pledging; otherwise refine your filters and keep browsing.

Steps

Step 1: Open the Logistics hub

Choose Logistics in the main navigation, or open /logistics directly. The page is titled "OxSteed Logistics" with the subtitle "End-to-end import, sourcing, pooled procurement, and distribution." Guests see the hero section "Global supply chains were built for corporations." plus the "How pooled buying works" section and role cards for buyer, organizer, and business.

> **Expected result:** The Logistics hub loads with open campaigns listed under "Open Campaigns".

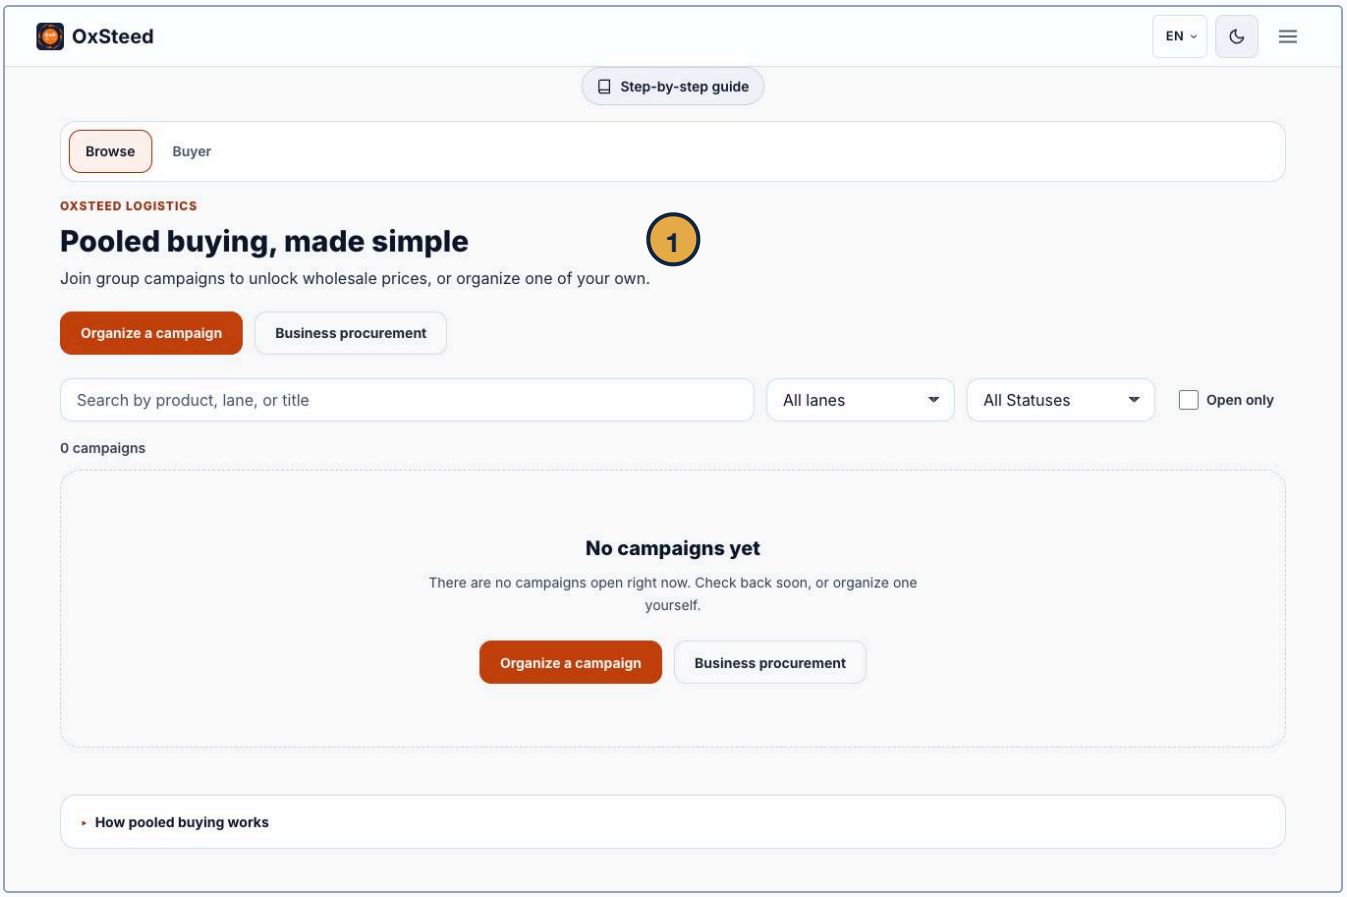

Figure 1. The Logistics hub with open campaigns, desktop view. *(Image description: Synthetic example: Pooled buying, made simple)*

1. **1.** Page title

Step 2: Search and filter campaigns

Use the "Search campaigns" field (placeholder "Search by product, lane, or title") to find a product. Use the "Status" and "Lane" dropdowns to narrow by lifecycle and trade lane. The results count shows "{{count}} campaigns". If nothing matches, you see "No campaigns match your filters" with a "Clear filters" button to reset.

> **Expected result:** The campaign list updates to match your search and filters.

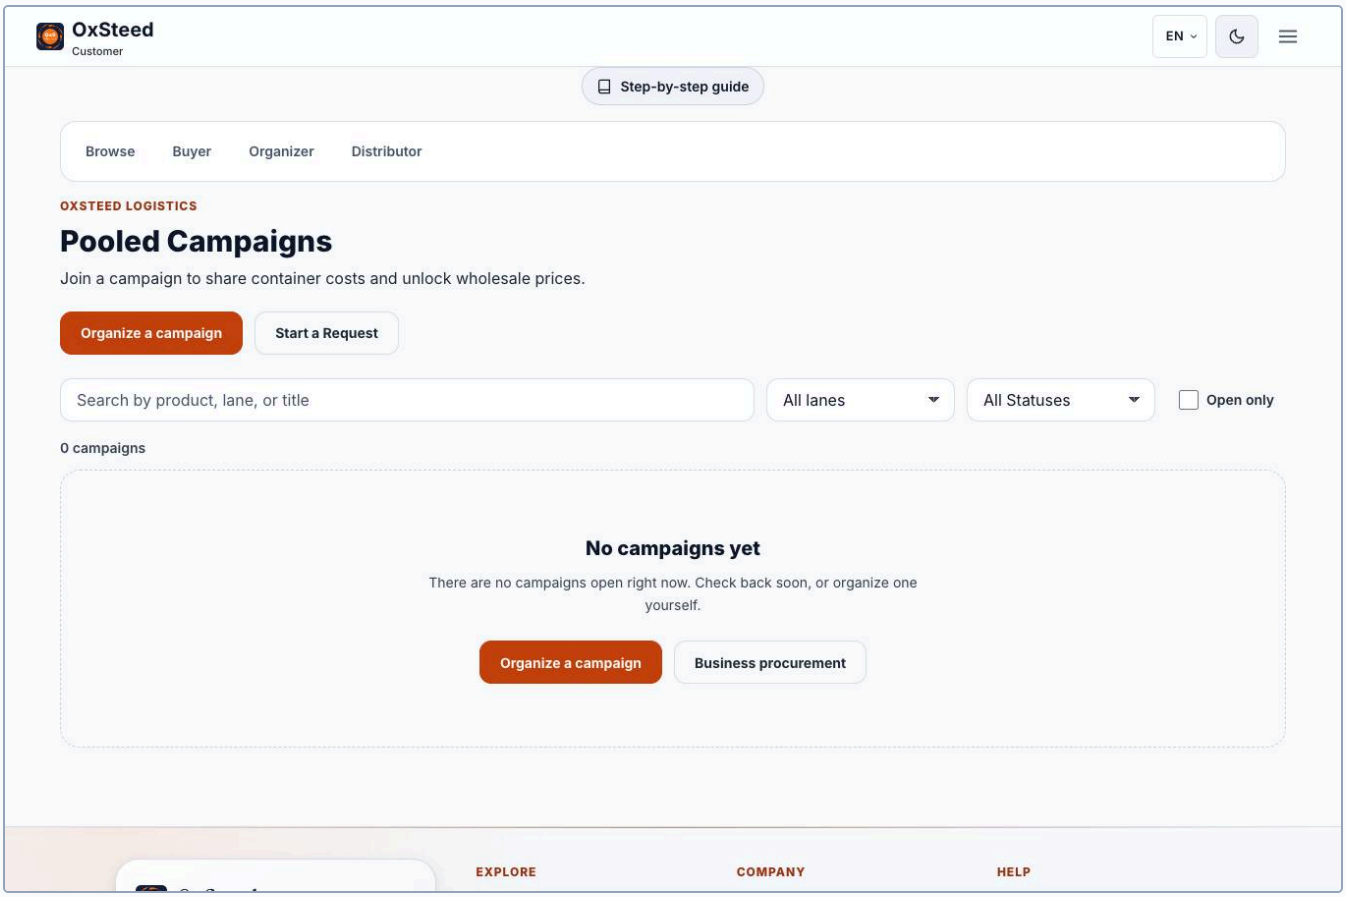

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Pooled Campaigns)*

Step 3: Open a campaign and review the details

Choose "View Details" on a campaign card. The detail page shows the "Unit Economics" panel (Product Cost, Freight (est.), OxSteed Markup, Fees, Landed Cost / unit, Deposit (30%)), the "Timeline" panel (Open Date, Close Date, Lock Date, Expected Ship, Expected Arrival), and "MOQ progress" ("{{committed}} / {{target}} units committed"). Check the participants list and the delivery preference options (Warehouse Pickup, Ship to Me, Freight Forward).

> **Expected result:** You can see the full landed cost, timeline, and MOQ progress for the campaign.

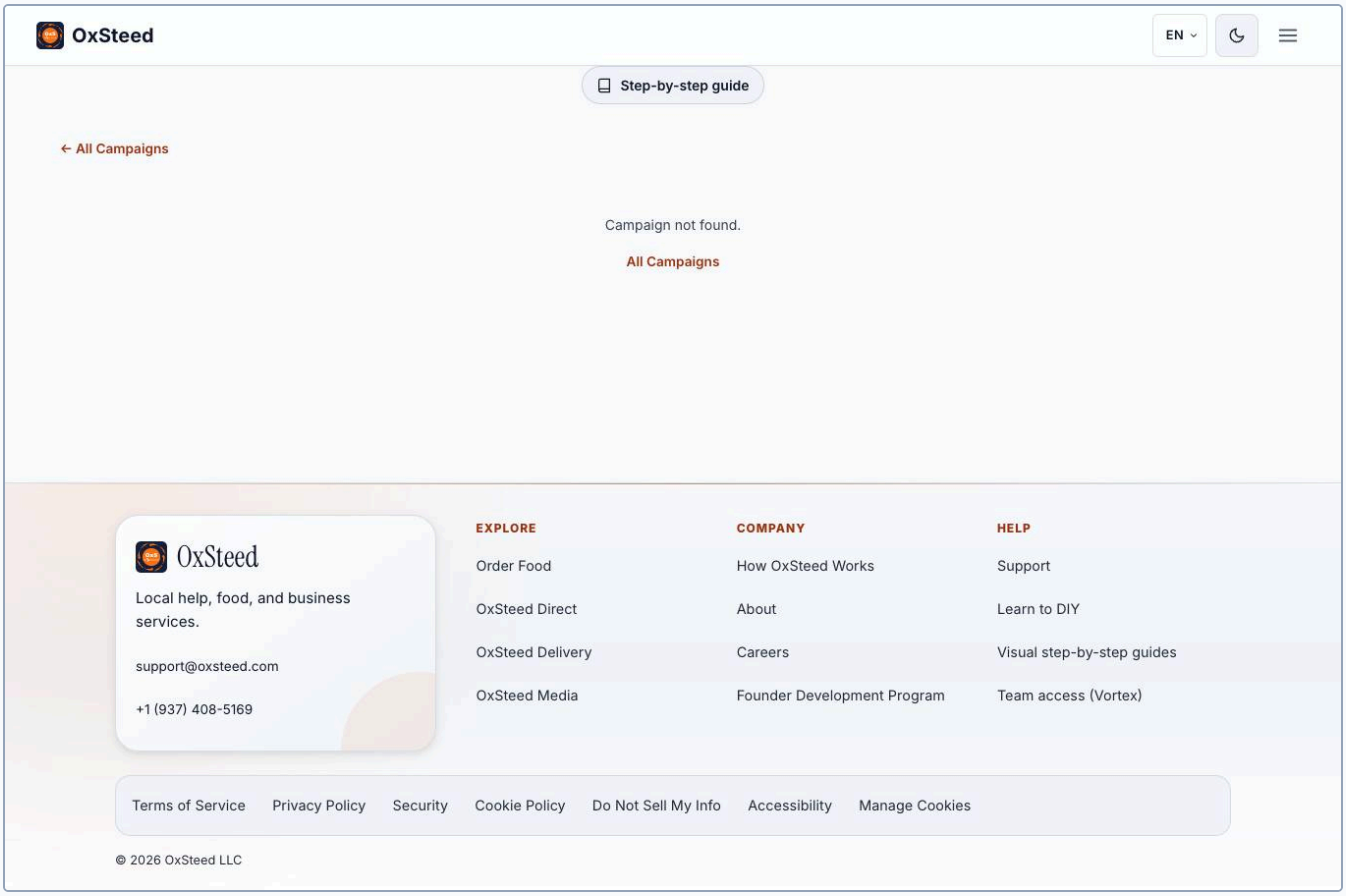

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Campaign detail with unit economics, timeline, and MOQ progress)*

Step 4: Pick your path from the role cards

Back on the hub, the "Which one are you?" role cards offer three paths: "Join a group shipment" with the "Browse campaigns" button for buyers, "Run a group buy" with the "Start a campaign" button for organizers, and "Restock without the broker" with the "Explore procurement" button for businesses. Choose the card that matches what you want to do next.

> **Expected result:** You land on the buyer, organizer, or procurement entry point for your role.

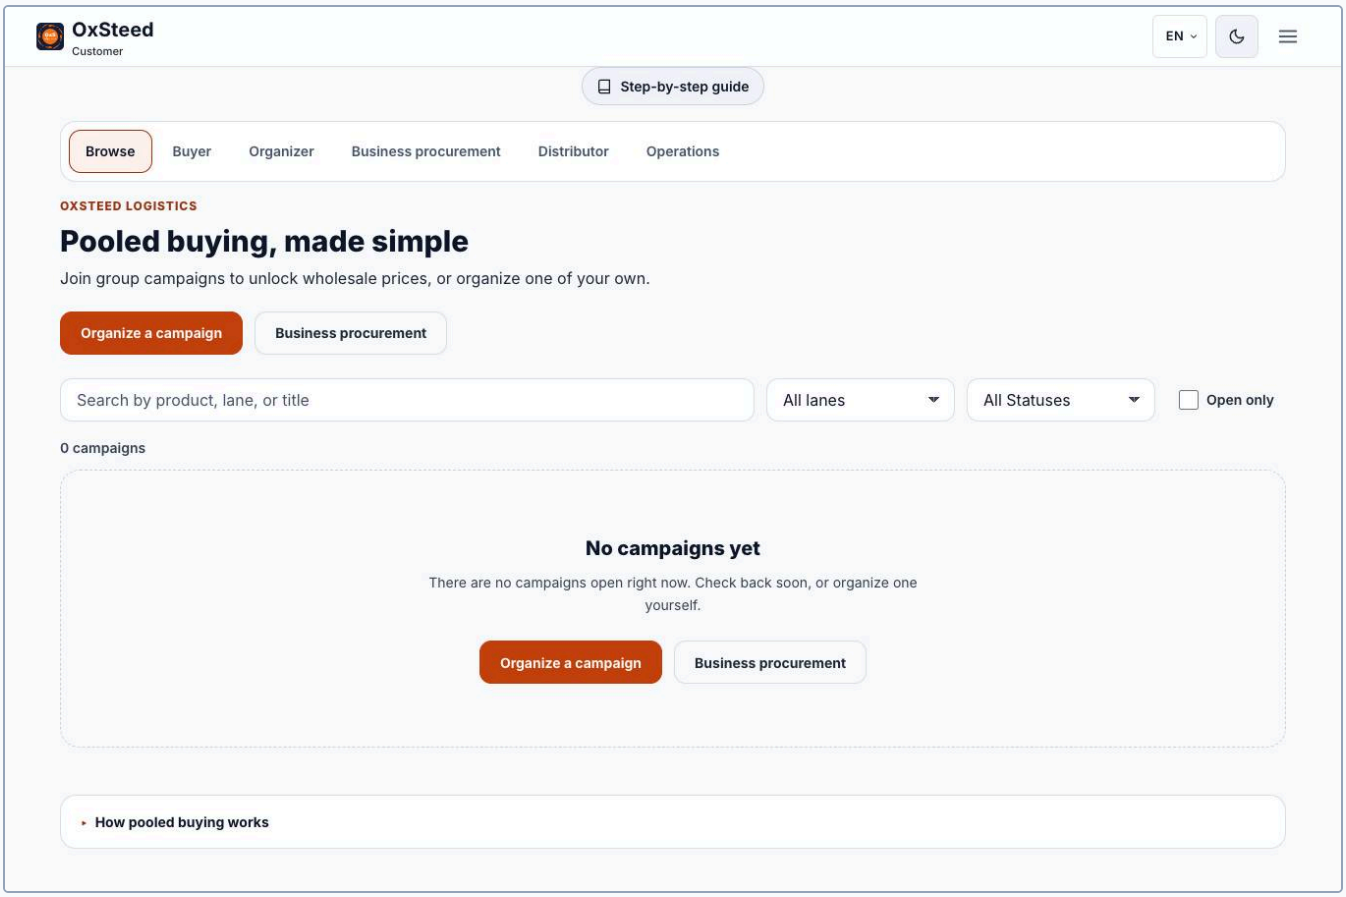

Figure 4. Role cards on the Logistics hub, desktop view. *(Image description: Synthetic example: Pooled buying, made simple)*

Confirm it worked

You opened a campaign detail page and can read its unit economics, MOQ progress, and timeline.

If something goes wrong

Problem	What to do

You see "No campaigns match your filters".	Choose "Clear filters" and broaden the lane or status selection, or try a simpler search term.
The hub shows "No campaigns yet".	No campaigns are open right now. Check back later, or organize one yourself with "Organize a campaign".

Need help?

Questions about a campaign or lane: contact support from the in-app support page at /support.

Guide ID: logistics-claims | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

File and track claims

Guide ID	**logistics-claims**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer)
Availability	**Supported**
Online version	/how-it-works/logistics/file-and-track-claims

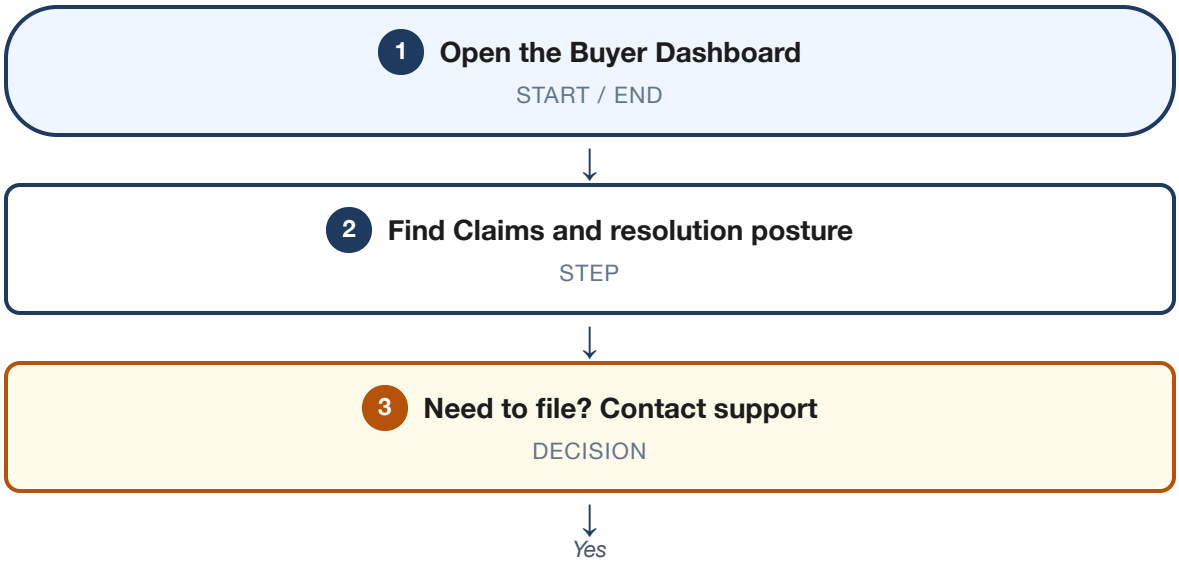

Goal

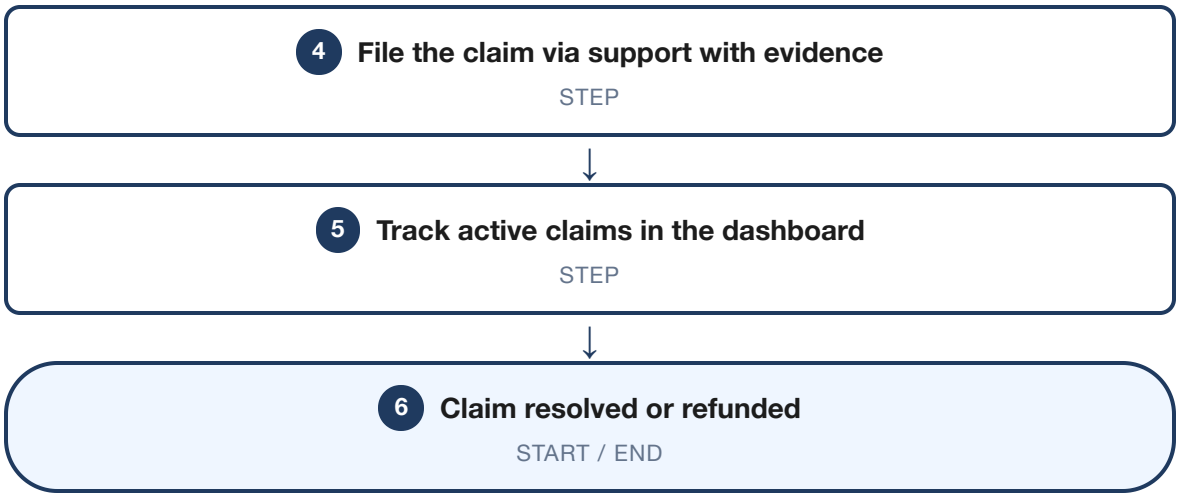

Report a logistics problem as a claim and track its resolution from the Buyer Dashboard.

Before you start

1. A signed-in OxSteed account.
2. A shipment, order, or inventory outcome that needs operator review.

Process map

- *No:* Need to file? Contact support → Track active claims in the dashboard

Text version. 1. Open the Buyer Dashboard. 2. Scroll to the "Claims and resolution posture" section, which lists your claims and refund cases. 3. There is no standalone claims page and no "File a claim" button: to file a new claim, contact support from /support with the claim type (shortage, damage, delay, wrong items, customs rejection, or fraud), the shipment or order reference, and your evidence. 4. Once filed, the claim appears in the dashboard where you track it. 5. Resolution may end in operator review or a linked refund case.

Steps

Step 1: Open the Buyer Dashboard claims section

Sign in and open /logistics/buyer, the "Buyer Dashboard". The "Claims & refunds" metric at the top shows your open issues, and the "Claims and resolution posture" section below lists active claims ("{{count}} active claims"), refund cases ("{{count}} refund cases"), and delivery records tracked. The hint reads: "Use claims when a shipment, order, or inventory outcome needs operator intervention or evidence review."

> **Expected result:** You see your existing claims and their statuses in one section.

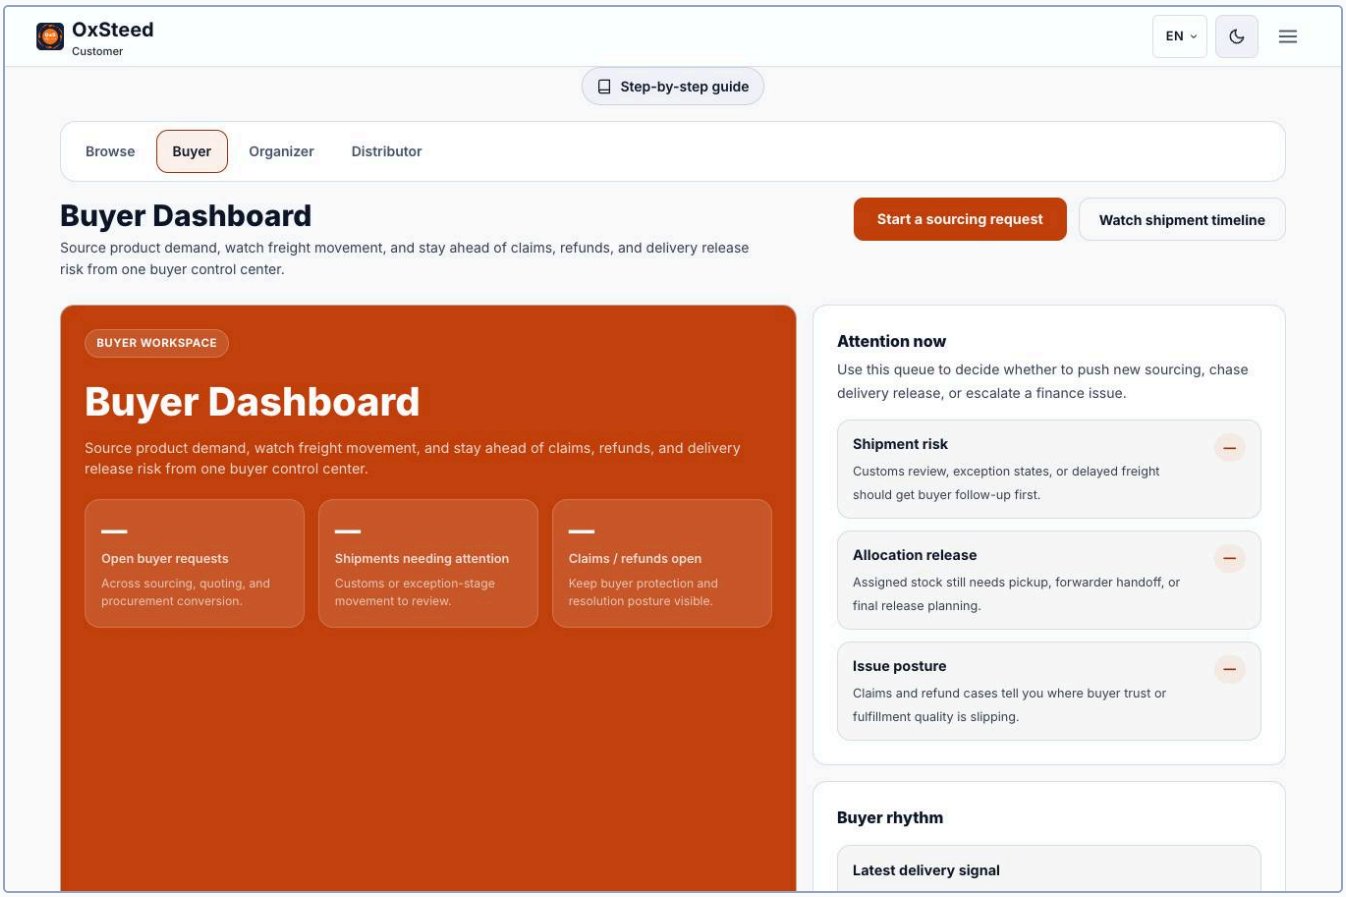

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Buyer Dashboard)*

Step 2: File a new claim through support

Note: there is no standalone claims page and no in-app "File a claim" button. Open /support and open a support ticket or conversation. Include the claim type (shortage, damage, delay, wrong items, customs rejection, or fraud), the shipment or order reference, the claimed amount in USD if any, and attach evidence such as photos, documents, or delivery records.

> **Expected result:** Support confirms receipt of your claim filing.

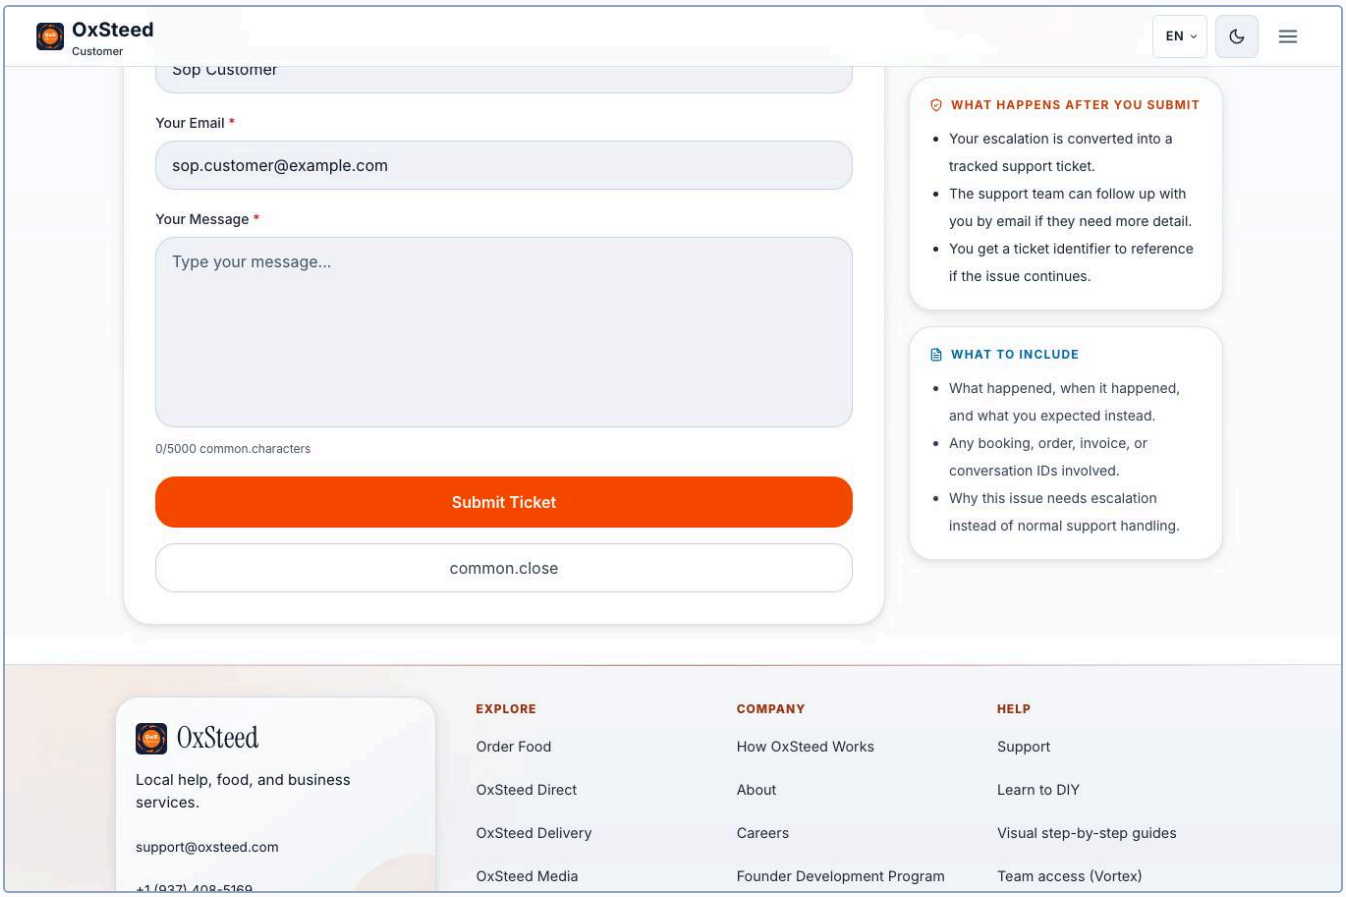

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Our agents are currently unavailable)*

Step 3: Track the claim in the Buyer Dashboard

Return to /logistics/buyer. Filed claims appear in the "Claims and resolution posture" section with their status (open, reviewing, resolved). The metric note "Operator review may be needed on open issues" tells you when an operator still needs to act. Keep delivery status close to claims so you can connect failed fulfillment with actual release history.

> **Expected result:** Your filed claim is listed with its current status.

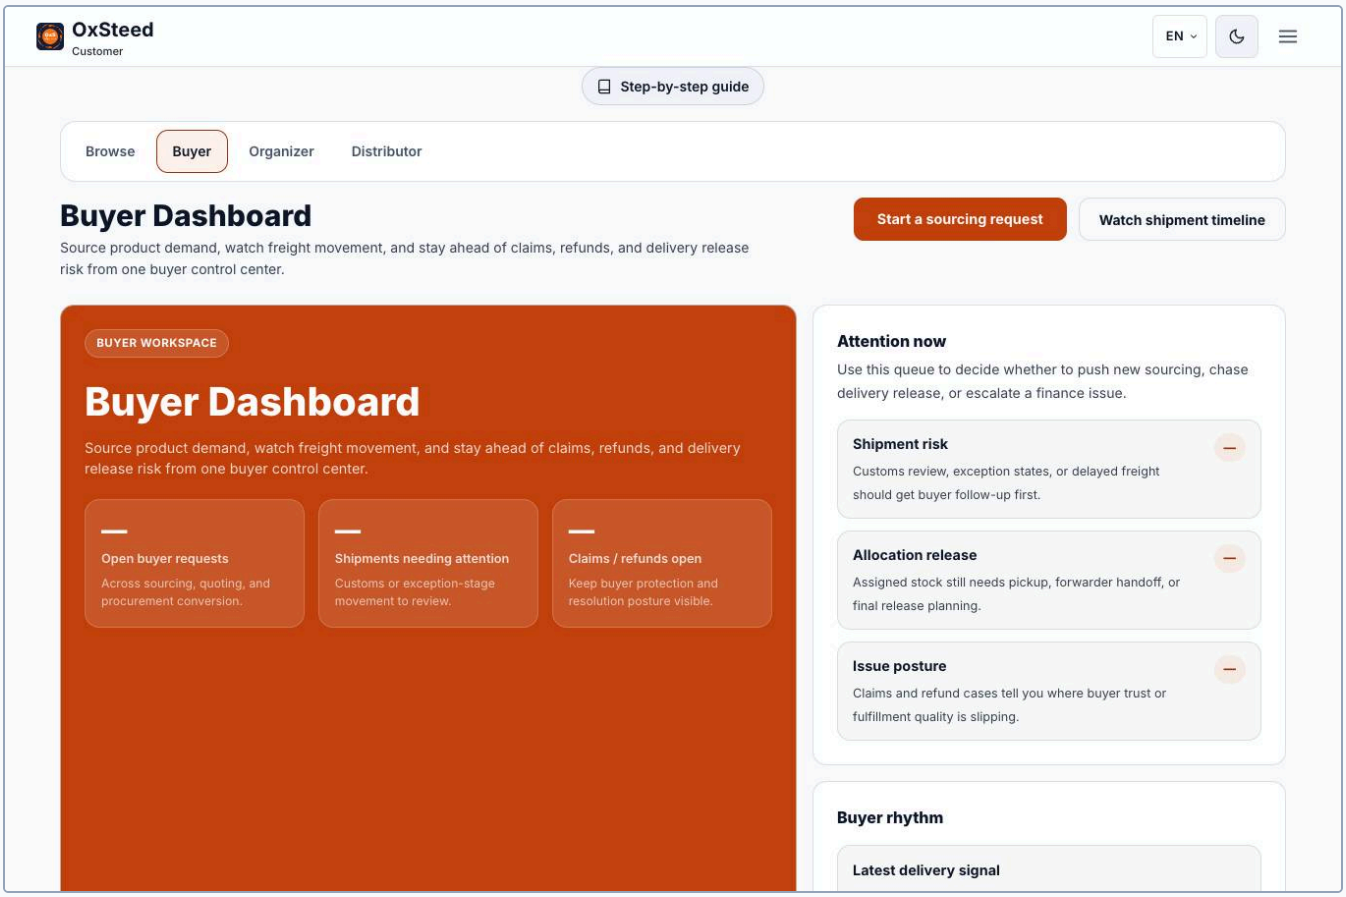

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Buyer Dashboard)*

Step 4: Follow linked refunds in Finance

If the claim leads to a refund, open the "Finance workspace" link from the claims section, or go to /logistics/finance. The "Refund Requests" panel lists linked refund cases and their statuses. See the logistics refund requests guide for the refund workflow.

> **Expected result:** Any refund case linked to your claim is visible in Finance.

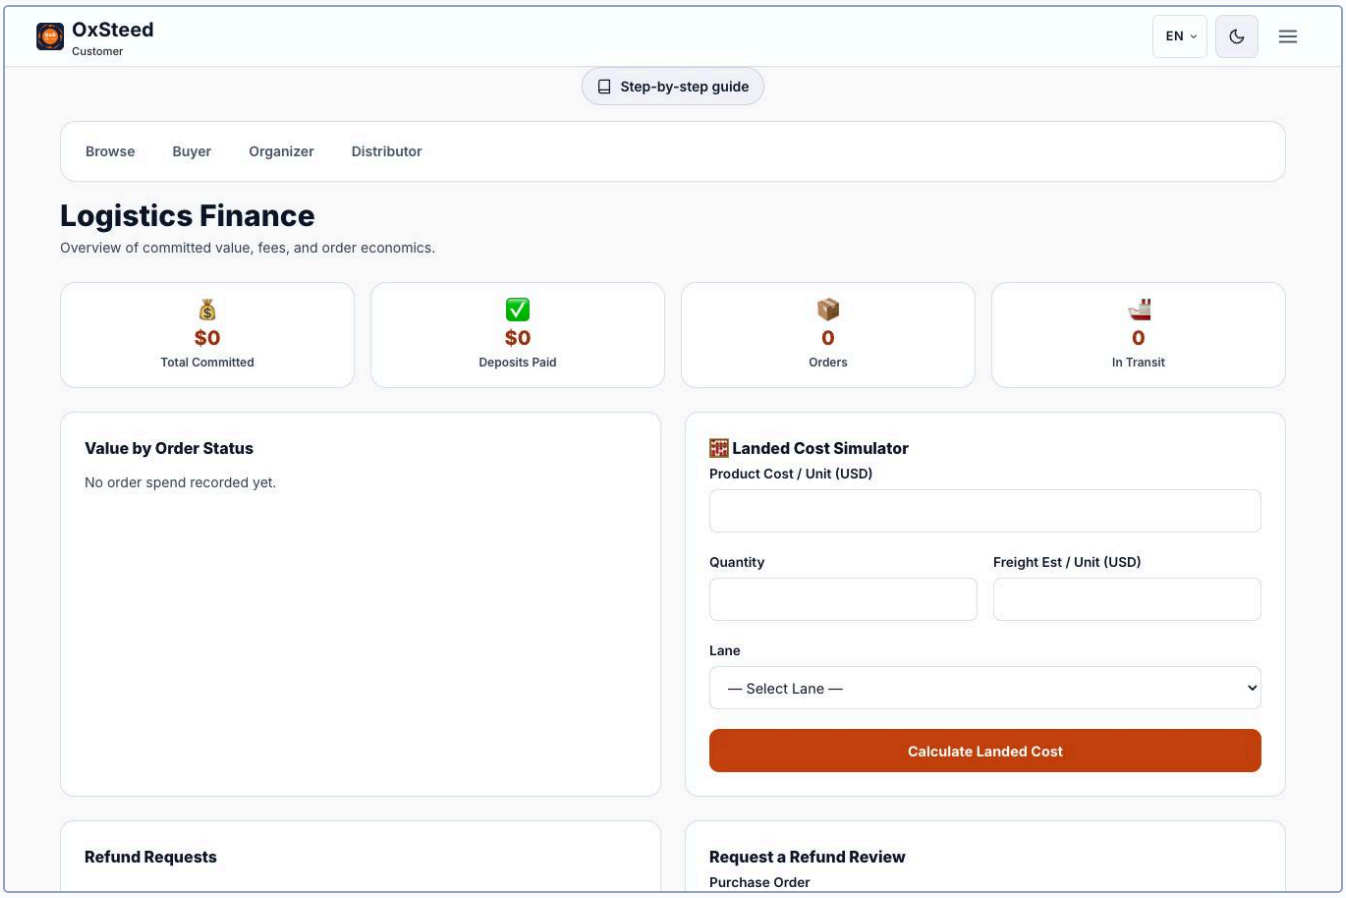

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Logistics Finance)*

Confirm it worked

Your claim is listed in the Buyer Dashboard "Claims and resolution posture" section with its status, and any linked refund case appears in Finance.

If something goes wrong

Problem	What to do

You cannot find a "File a claim" button.	That is expected: there is no standalone claims page. File through support at /support with the claim type, reference, and evidence.
A claim stays open with "Operator review may be needed".	Add any missing evidence through your support thread, then allow operator review time. Escalate via /support/escalation if it is urgent.

Need help?

Claim filing and status: contact support from the in-app support page at /support.

Guide ID: logistics-compliance | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Check trade compliance and restrictions

Guide ID	**logistics-compliance**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer), Logistics participant (organizer)
Availability	**Supported**
Online version	/how-it-works/logistics/check-trade-compliance

Goal

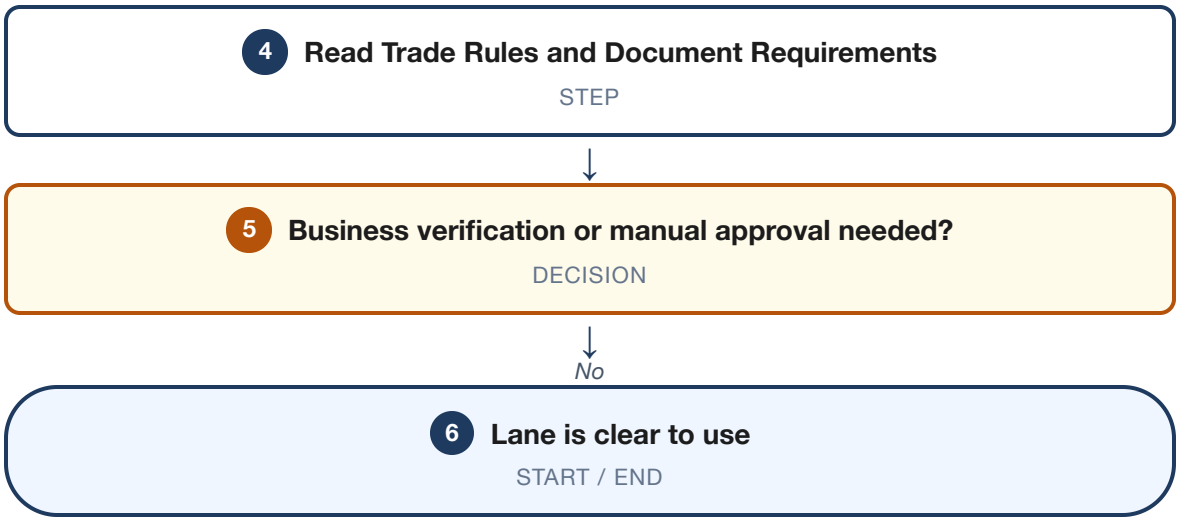

Check lane risk tiers, trade rules, and document requirements before committing to a lane.

Before you start

1. A signed-in OxSteed account.
2. The lane and destination country you plan to use.

Process map

- *Yes: complete the requirement first:* Business verification or manual approval needed? → Review the Lane Risk Overview

Text version. 1. Open the Compliance page. 2. Review the "Lane Risk Overview": risk tier, markup, customs complexity, and flags per lane. 3. Filter by lane or country code to focus on your route. 4. Read the "Trade Rules" table and the "Document Requirements" section. 5. Check whether the lane needs "Business Verification" or "Manual Approval". If it does, complete that requirement before committing; otherwise the lane is clear to use.

Steps

Step 1: Open the Compliance page

Choose Compliance in the logistics navigation, or open /logistics/compliance directly. The page is titled "Compliance & Restrictions" with the subtitle "Lane risk tiers and trade rules governing your logistics lanes."

> **Expected result:** The compliance page loads with the lane risk and trade rules sections.

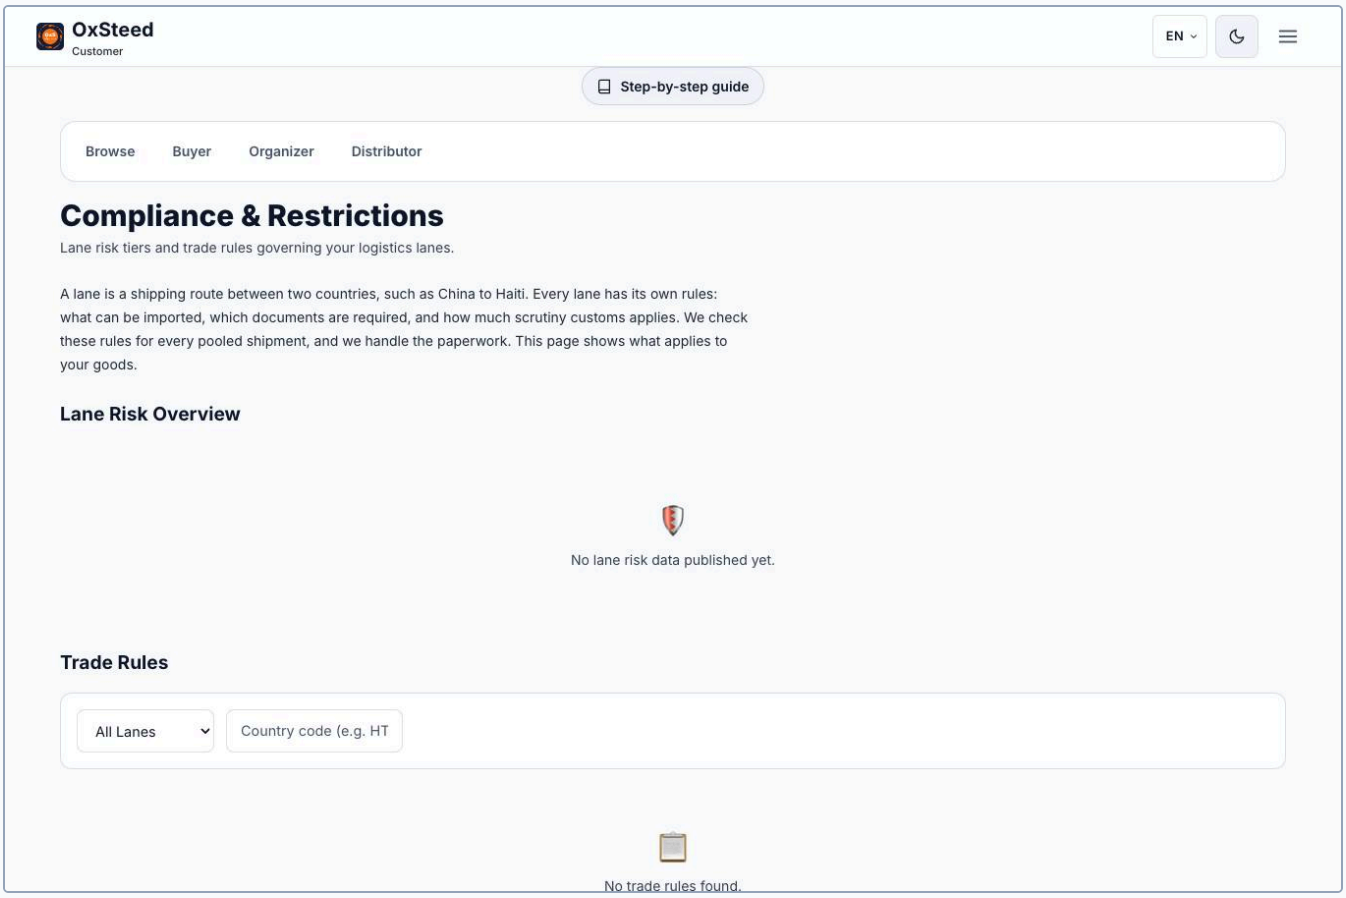

Figure 1. The Compliance page, desktop view. *(Image description: Synthetic example: Compliance & Restrictions)*

Step 2: Review the Lane Risk Overview

Read the "Lane Risk Overview" table: columns Lane, Route, Risk Tier, Markup, Customs, and Flags. Risk tiers are Low, Managed, Restricted, or Prohibited. A Prohibited lane cannot be used; Restricted and Managed lanes may need extra steps.

> **Expected result:** You know the risk tier and customs complexity of your lane.

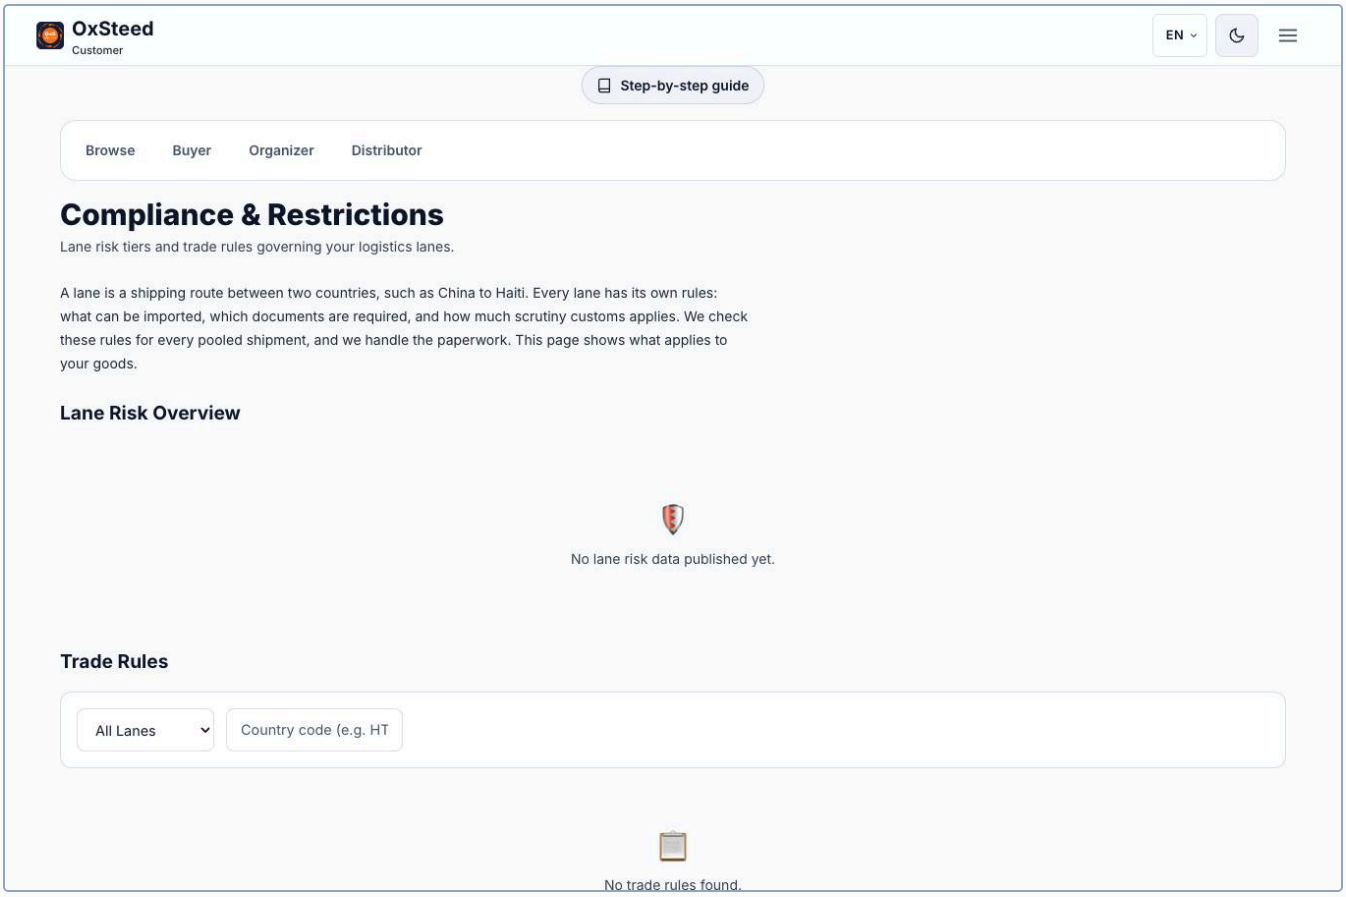

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Compliance & Restrictions)*

Step 3: Filter by lane or country

Use "Filter by lane" (with the "All Lanes" option) and "Filter by country code" (placeholder "Country code (e.g. HT)") to narrow the view to your route. This focuses both the risk overview and the trade rules.

> **Expected result:** Only rules for your lane and country remain visible.

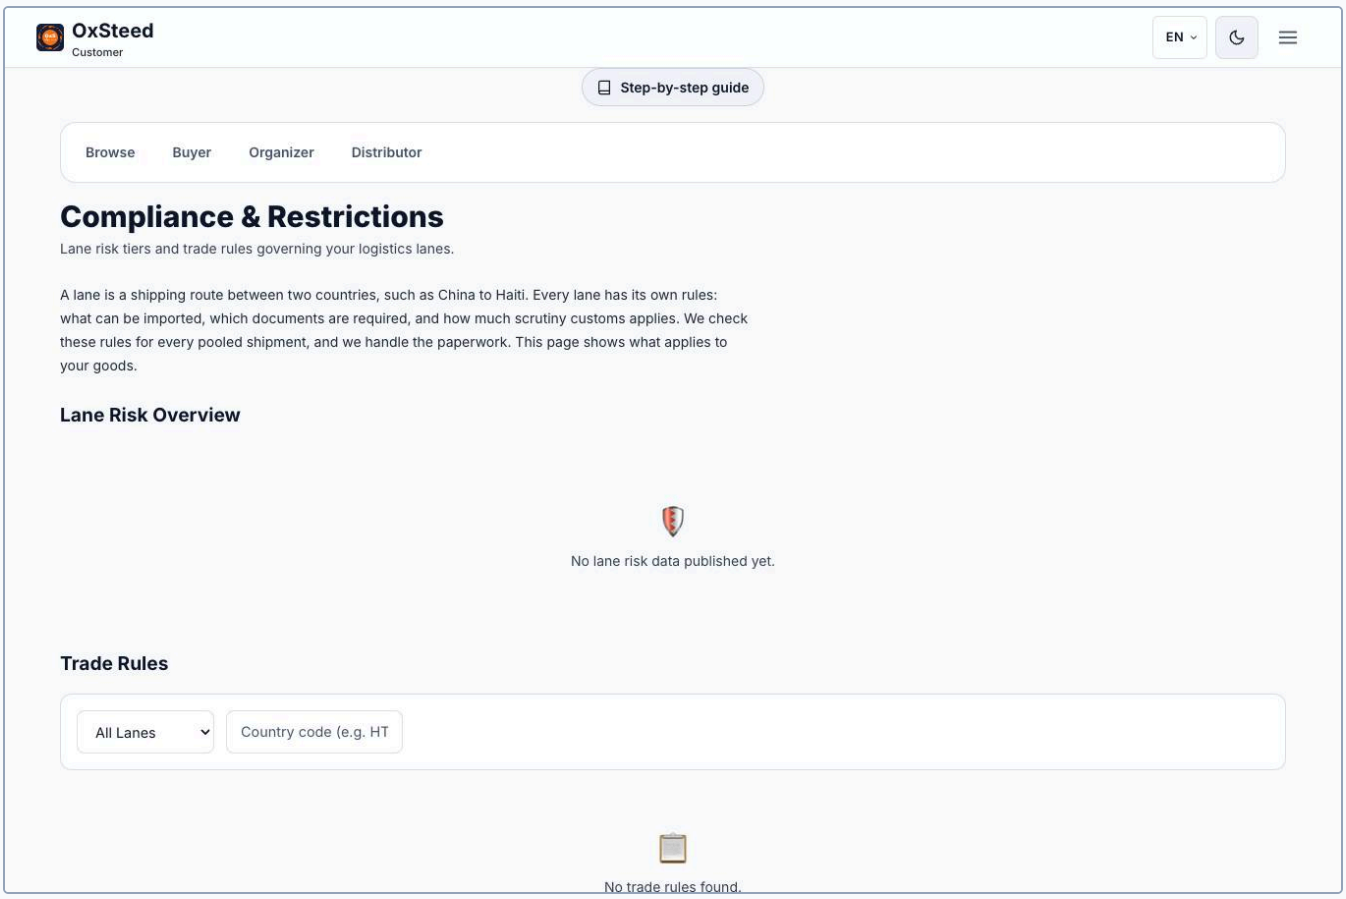

Figure 3. Filtering compliance data, desktop view. *(Image description: Synthetic example: Compliance & Restrictions)*

Step 4: Read trade rules and document requirements

Read the "Trade Rules" table: columns Lane, Type, Country, Category, Severity, Doc Required, and Notes. Check the "Document Requirements" and "Risk Tiers" sections for what paperwork your goods need. Look for the flags "Business Verification" ("Business verification required") and "Manual Approval" ("Manual approval required"): when present, complete verification or wait for manual approval before pledging or organizing on that lane.

> **Expected result:** You know which documents and approvals your lane requires.

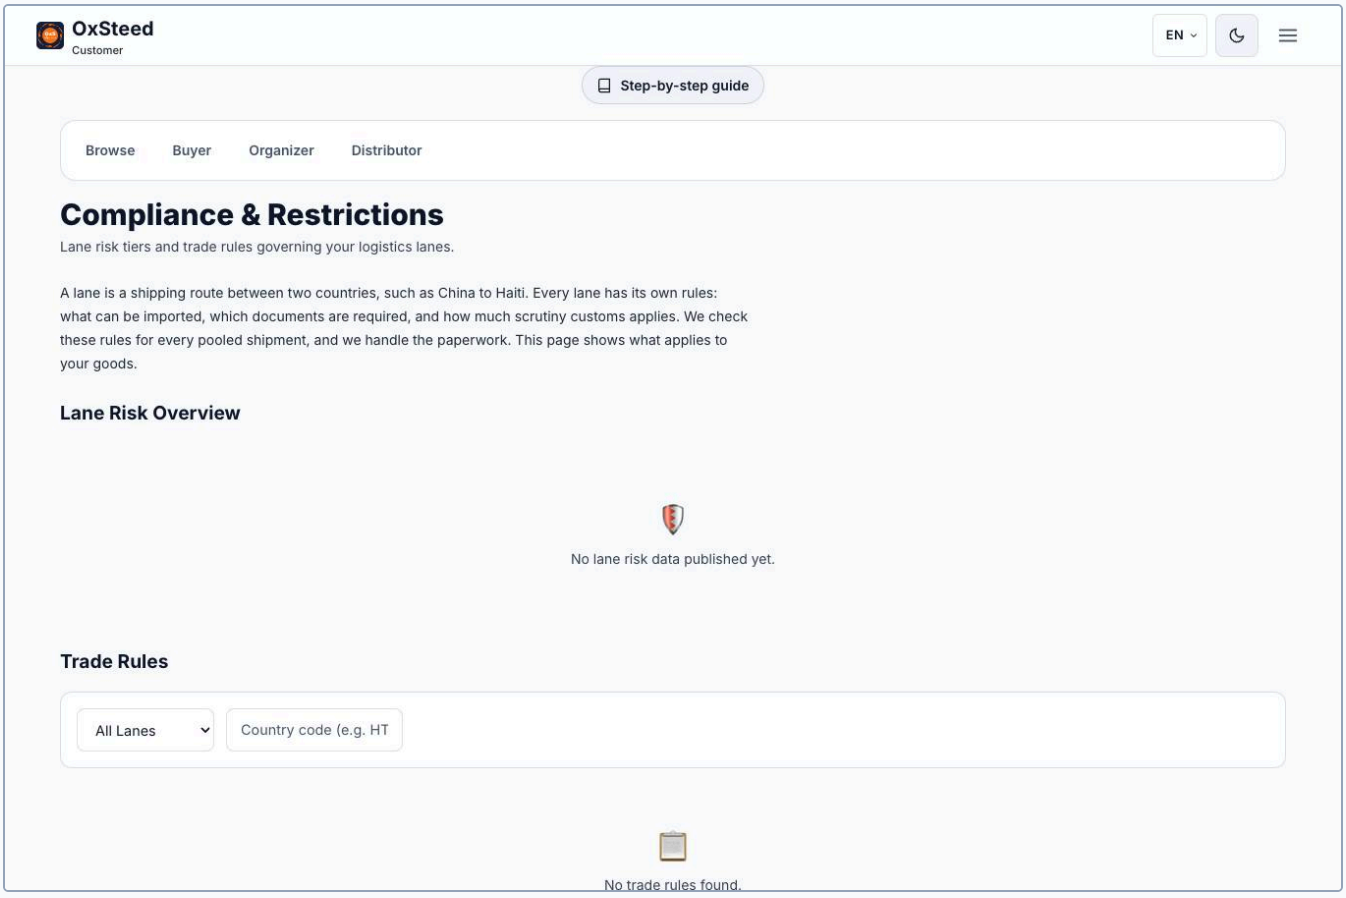

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Compliance & Restrictions)*

Confirm it worked

You can state the risk tier, required documents, and any verification or approval your lane needs.

If something goes wrong

Problem	What to do
The page shows "No lane risk data published yet."	Risk data has not been published for that lane. Contact support at /support before committing units.
Your lane is Restricted or requires manual approval.	Complete business verification or submit for manual approval first. Campaigns and pledges on gated lanes are blocked until it clears.

Need help?

Compliance questions: contact support from the in-app support page at /support.

Guide ID: logistics-confirm-payments | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Confirm payments at checkout

Guide ID	**logistics-confirm-payments**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer)
Availability	**Conditional**
Conditions	• Requires LOGISTICS_PAYMENTS_ENABLED=true (default off). While disabled, every checkout route answers 503 and the checkout shows the disabled state "Online payments are not enabled yet. Please try again later."
Online version	/how-it-works/logistics/confirm-logistics-payment

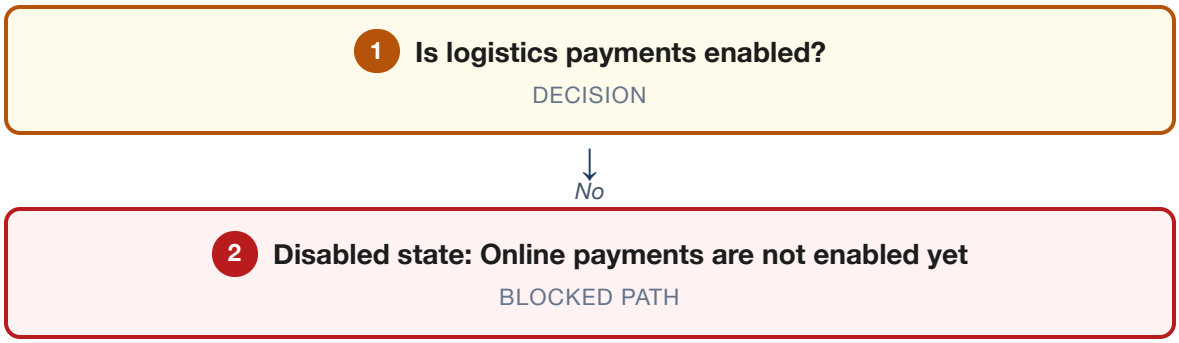

Goal

Confirm and pay a logistics order installment by card via Stripe or from OxSteed Credit.

Before you start

1. A signed-in OxSteed account.
2. An accepted quote version on the order. Accept the current quote first.

Process map

- *Yes:* Is logistics payments enabled? → Open checkout

- Open checkout → Current quote accepted?
- *Yes:* Current quote accepted? → Choose Card via Stripe or OxSteed Credit
- *No: accept the quote first:* Current quote accepted? → Open checkout
- Choose Card via Stripe or OxSteed Credit → Tick the confirmation box and choose Confirm and pay
- Tick the confirmation box and choose Confirm and pay → Payment submitted; webhook confirms settlement

Text version. 1. Check that logistics payments are enabled; otherwise checkout shows the disabled state and the routes answer 503. 2. Open checkout. 3. Make sure the current quote version is accepted; payment is paused until it is. 4. Choose how to pay the installment: "Card via Stripe" or "OxSteed Credit". Each installment uses exactly one method. 5. Tick the confirmation checkbox and choose "Confirm and pay". 6. The payment is submitted; settlement is confirmed by a signed webhook, and history appears on the payments page.

Steps

Step 1: Open checkout and check the state

Open /logistics/checkout for your order. If logistics payments are disabled, you see "Online payments are not enabled yet. Please try again later." and cannot proceed. Otherwise the page shows "Review and confirm" with the line "You are about to pay {{amount}} ({{installment}}) for order {{reference}} using {{method}}."

> **Expected result:** The checkout page loads in its normal state without the disabled message.

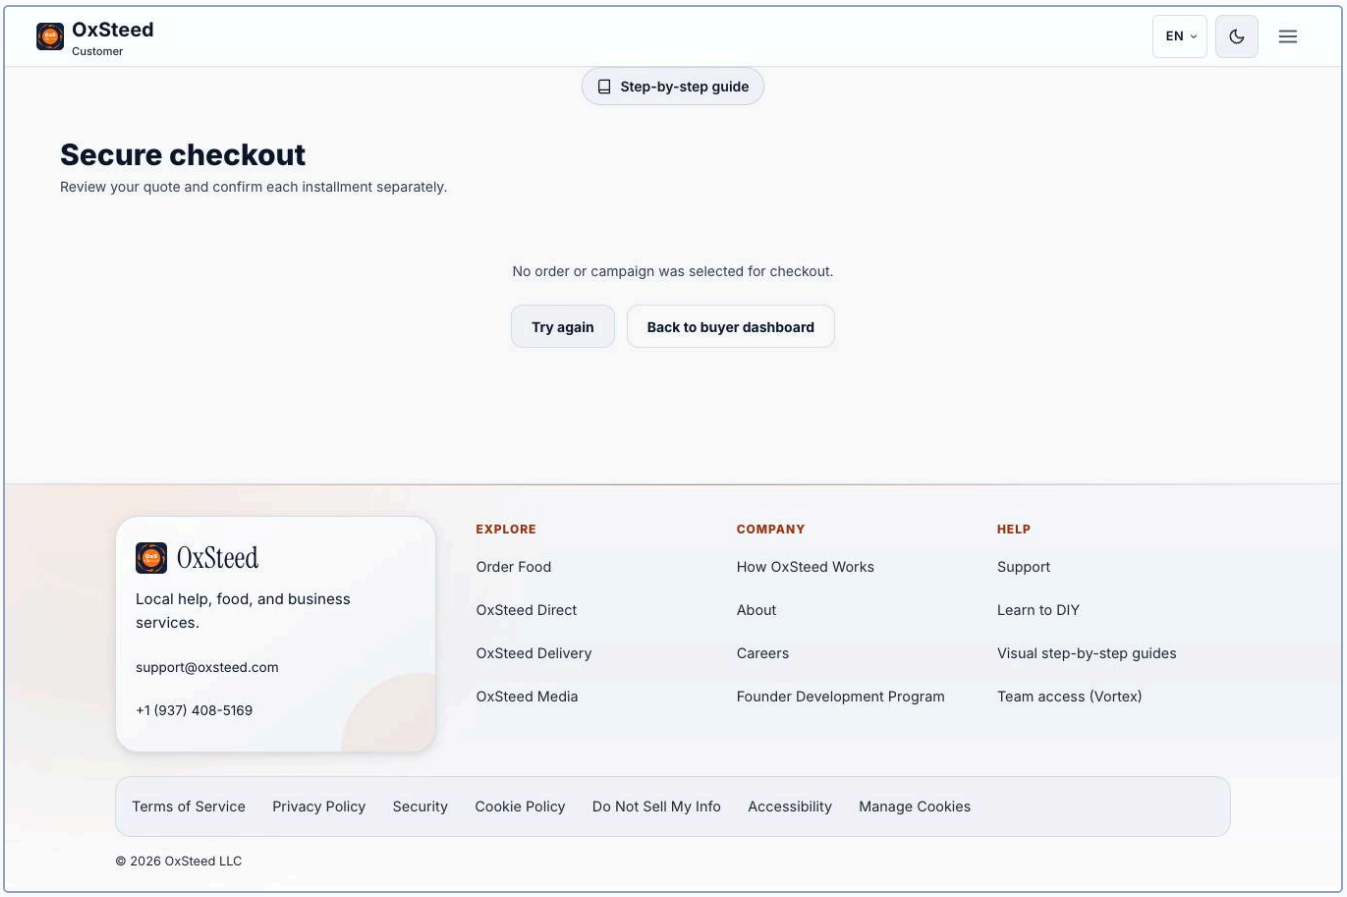

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Secure checkout)*

Step 2: Choose a payment method

Under "Choose how to pay this installment", pick "Card via Stripe" ("Pay with a debit or credit card. You enter card details each time; nothing is saved or auto-charged.") or "OxSteed Credit" ("Pay from your OxSteed Credit balance."). Card details are handled by Stripe; OxSteed never sees or stores your card number. The note reads: "Each installment is paid with exactly one method. No mixed funding, and nothing is charged without your explicit confirmation."

> **Expected result:** Your chosen method is selected and its detail panel is visible.

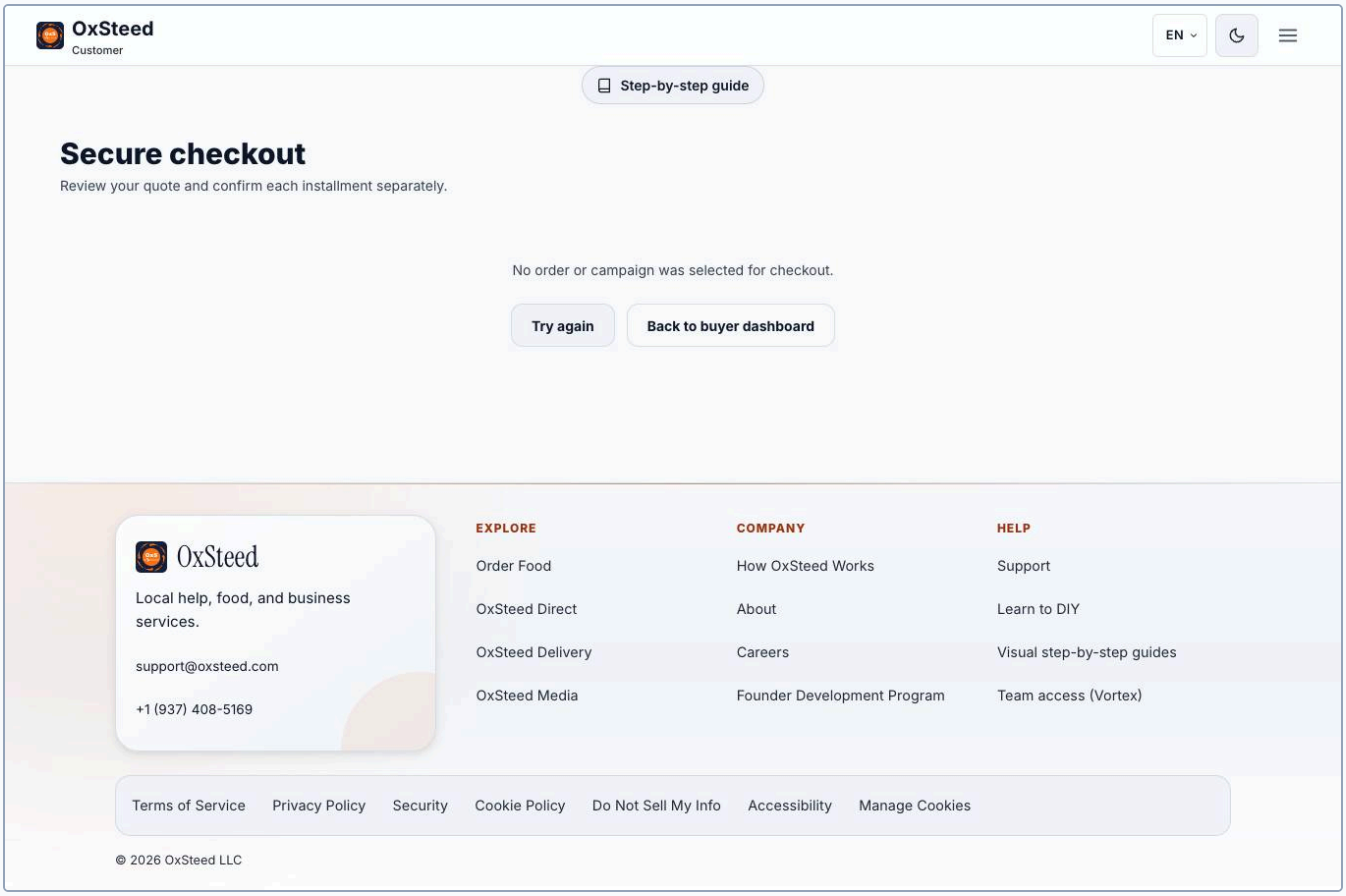

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Secure checkout)*

Step 3: Confirm and pay

Tick the confirmation checkbox: "I confirm I want OxSteed to charge {{amount}} to {{method}} for the {{installment}} of order {{reference}}." Without the tick, the button stays blocked with "Please tick the confirmation box to continue." Then choose "Continue to confirmation" and "Confirm and pay {{amount}}". The button shows "Submitting payment…" while the payment is sent.

> **Expected result:** The payment attempt is submitted without a duplicate-charge error.

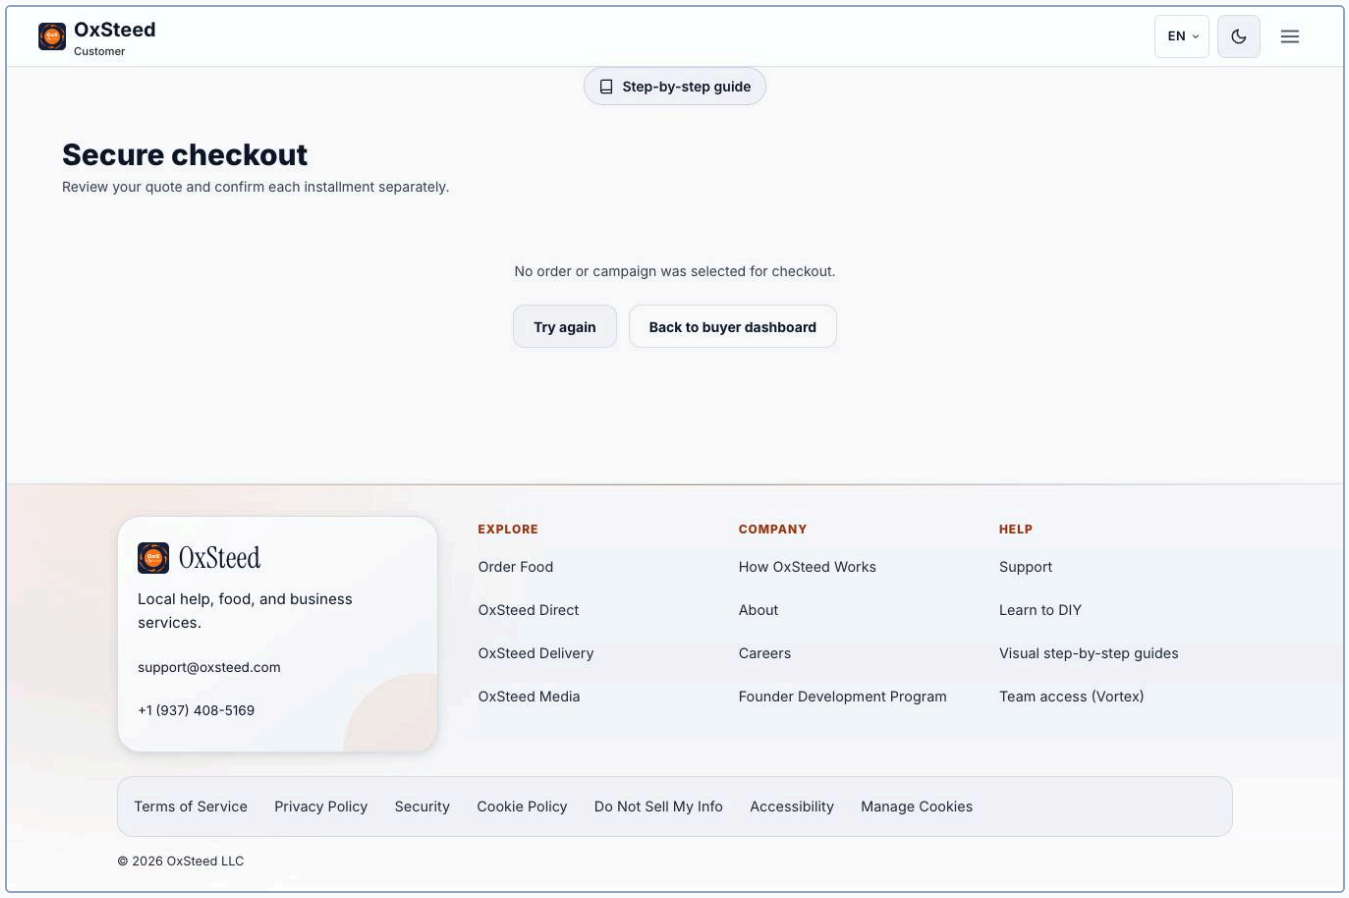

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Secure checkout)*

Step 4: Verify the payment in history

Open /logistics/payments to review the payment attempt and its status. Settlement is confirmed by signed webhook only; the payments page shows the current status per attempt. If the quote changed while you were checking out, you see "The quote changed while you were checking out. Review the new version before paying." and must accept the new version first.

> **Expected result:** The payment attempt appears in your payment history with its current status.

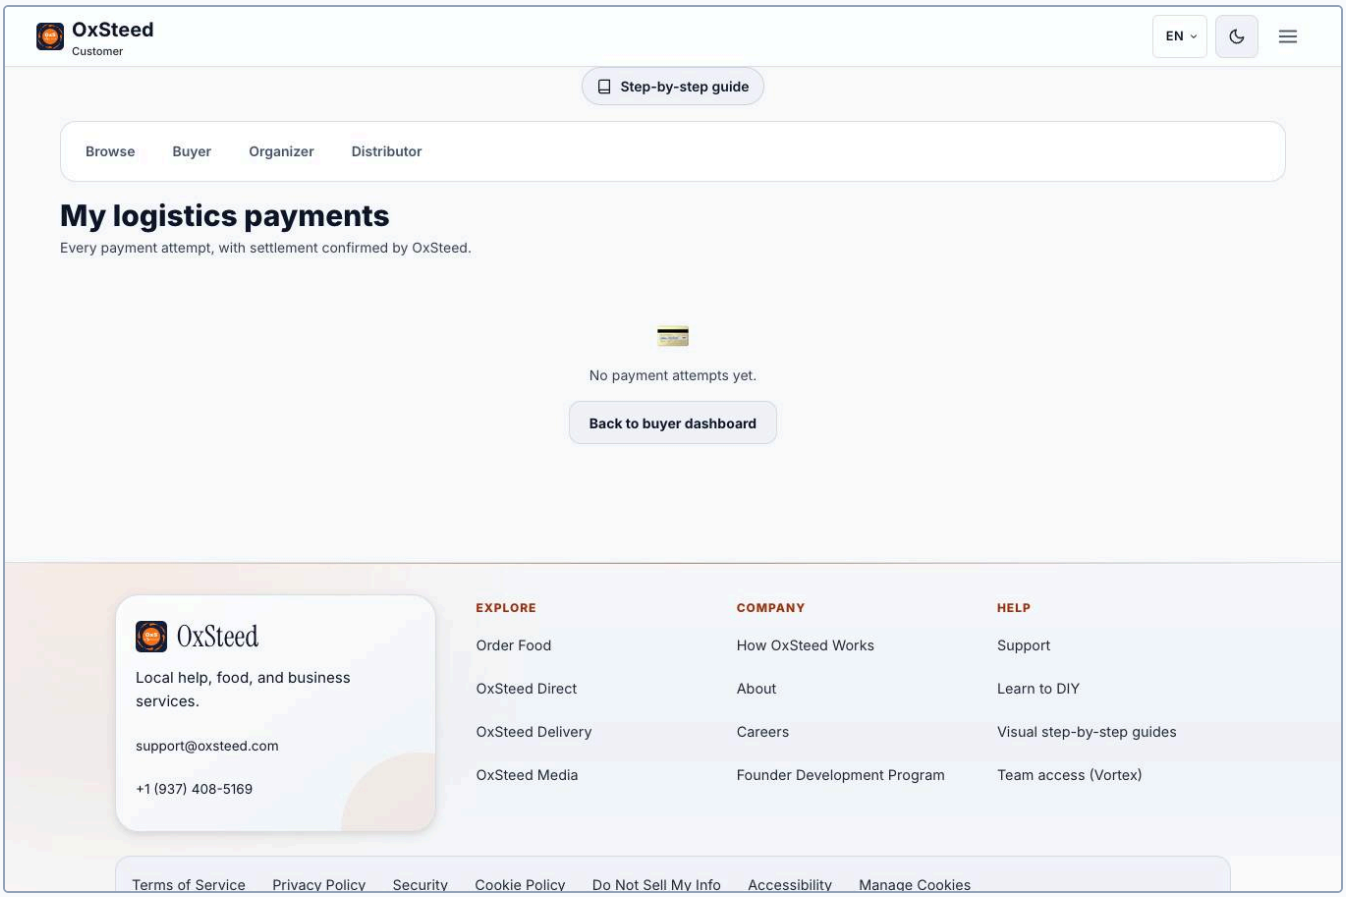

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: My logistics payments)*

Confirm it worked

The payments page lists the attempt with its status, and no duplicate payment was created.

If something goes wrong

Problem	What to do

You see "This payment was already submitted. Check the payment status instead of paying again."	Do not pay again. Open /logistics/payments and check the existing attempt status; the charge is not duplicated.
You see "The quote changed while you were checking out."	Return to checkout, review the new quote version in the acceptance gate, and accept it before confirming payment.
You see "Online payments are not enabled yet."	Logistics payments are disabled in this environment. Contact support at /support; do not attempt payment another way.

Need help?

Payment issues: contact support from the in-app support page at /support.

Guide ID: logistics-distribution | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS **ENGLISH**

Manage distribution and deliveries

Guide ID	**logistics-distribution**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (distributor), Logistics participant (organizer)
Availability	**Supported**
Online version	/how-it-works/logistics/manage-distribution

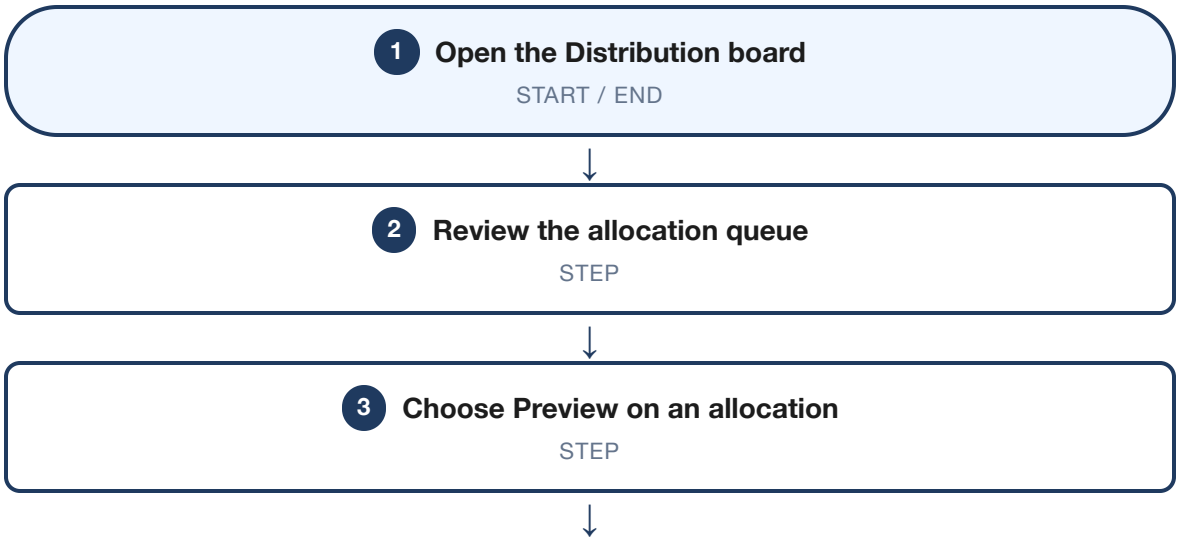

Goal

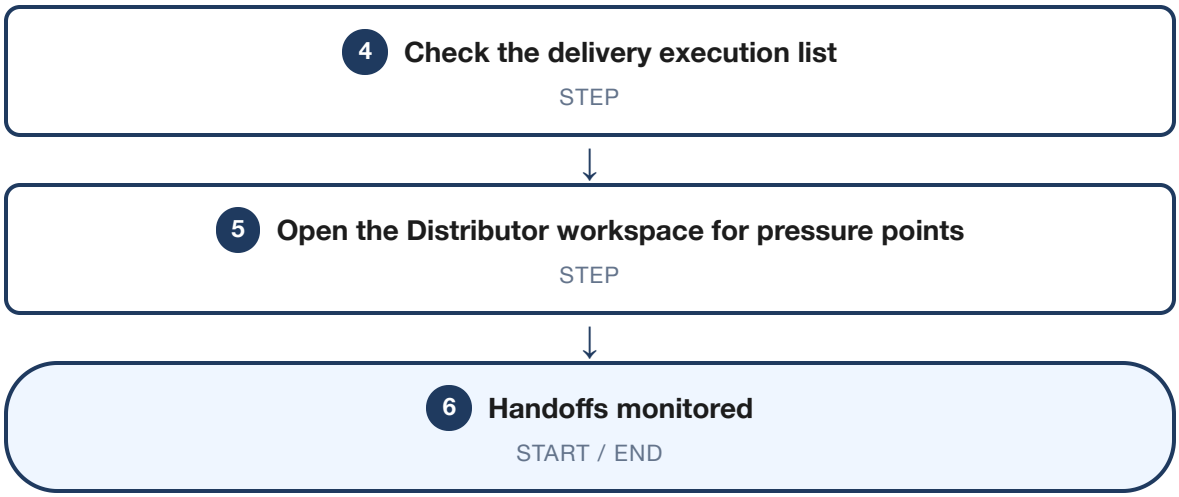

Review allocations and delivery orders, and keep final-mile handoffs moving.

Before you start

1. A signed-in OxSteed account with distributor or organizer access.
2. Stock that has arrived and been warehoused upstream.

Process map

Text version. 1. Open the Distribution board. 2. Review the allocation queue: each card shows the recipient, warehouse, release method, and allocated quantity. 3. Choose Preview on an allocation to inspect it. 4. Check the "Delivery execution" section for delivery orders and their status. 5. Open the Distributor workspace to see pressure points: pending release lots, deliveries in motion, and failed or cancelled drops. 6. Keep monitoring until every lot is handed off.

Steps

Step 1: Open the Distribution board

Choose Distribution in the logistics navigation, or open /logistics/distribution directly. The page is titled "Distribution" with the "Allocation queue" section and the "Delivery execution" section. A link "Open warehousing →" jumps to the warehousing page for upstream stock.

> **Expected result:** The Distribution board loads with allocation cards and delivery orders.

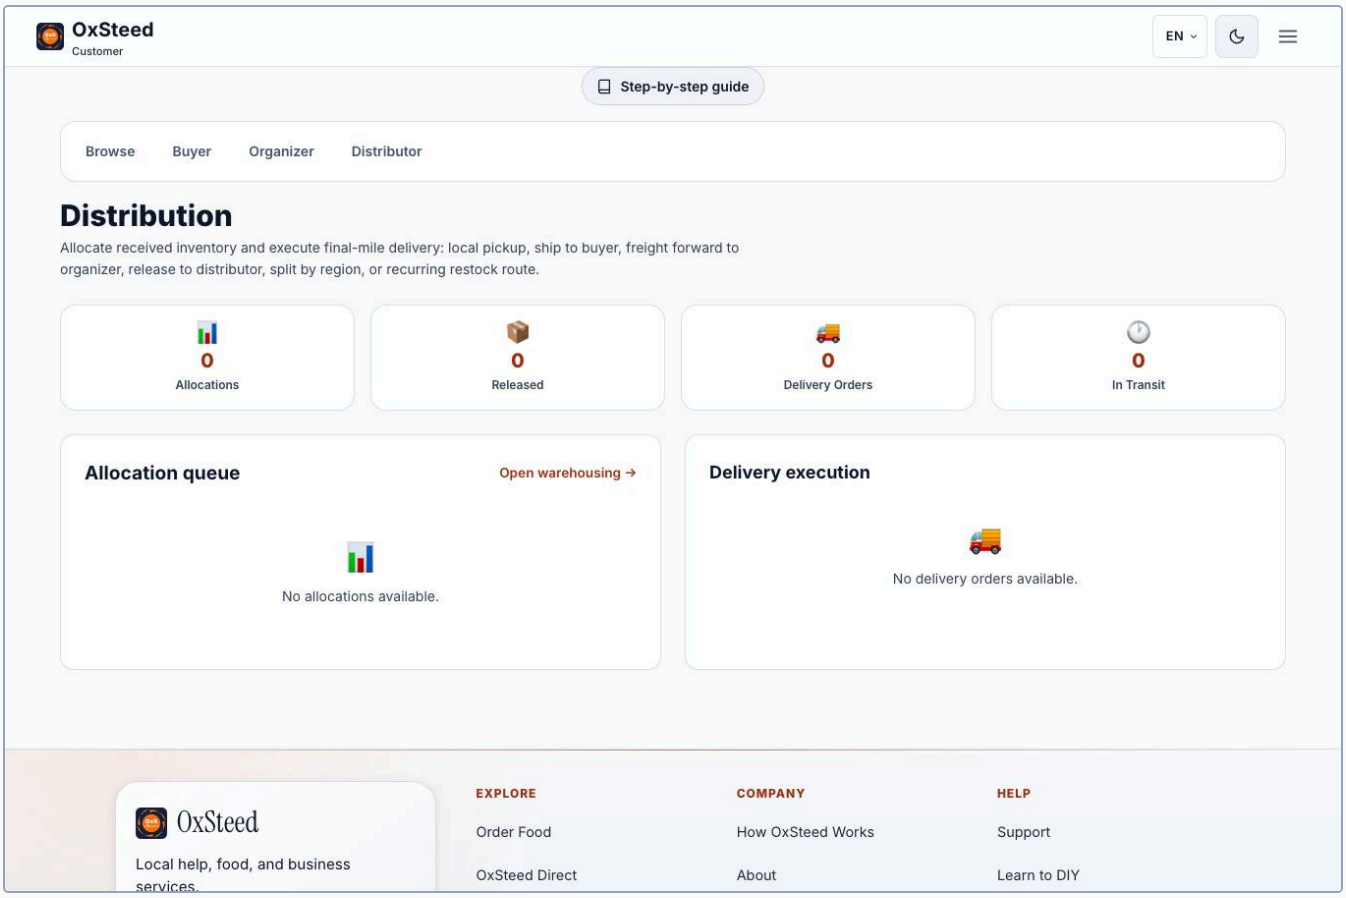

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Distribution)*

Step 2: Review the allocation queue

Each allocation card shows the buyer or recipient name, the warehouse, the release method (for example "release pending"), and "Allocated qty". Release methods include Local pickup, Ship to buyer, Freight forward, Release to distributor, Bulk handoff, and Restock route. Choose "Preview" on a card to inspect the allocation in detail.

> **Expected result:** You can read the recipient, release method, and quantity for each allocation.

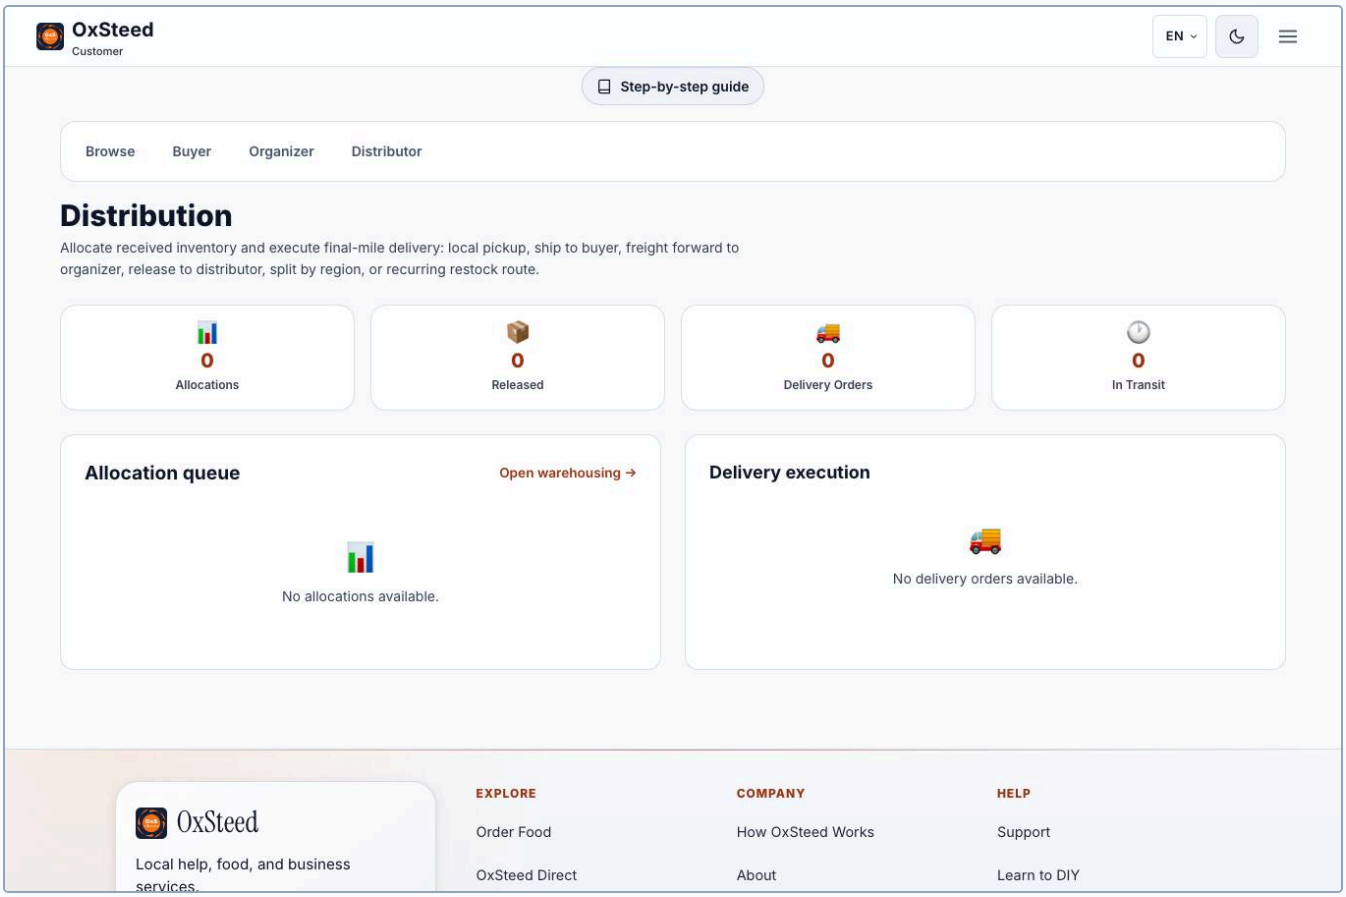

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Distribution)*

Step 3: Check the delivery execution list

Scroll to "Delivery execution". Each delivery order card shows the recipient, status, and tracking details. The stats strip at the top summarizes Allocations, Released, Delivery Orders, and In Transit counts.

> **Expected result:** You can see which deliveries are in transit and which are complete.

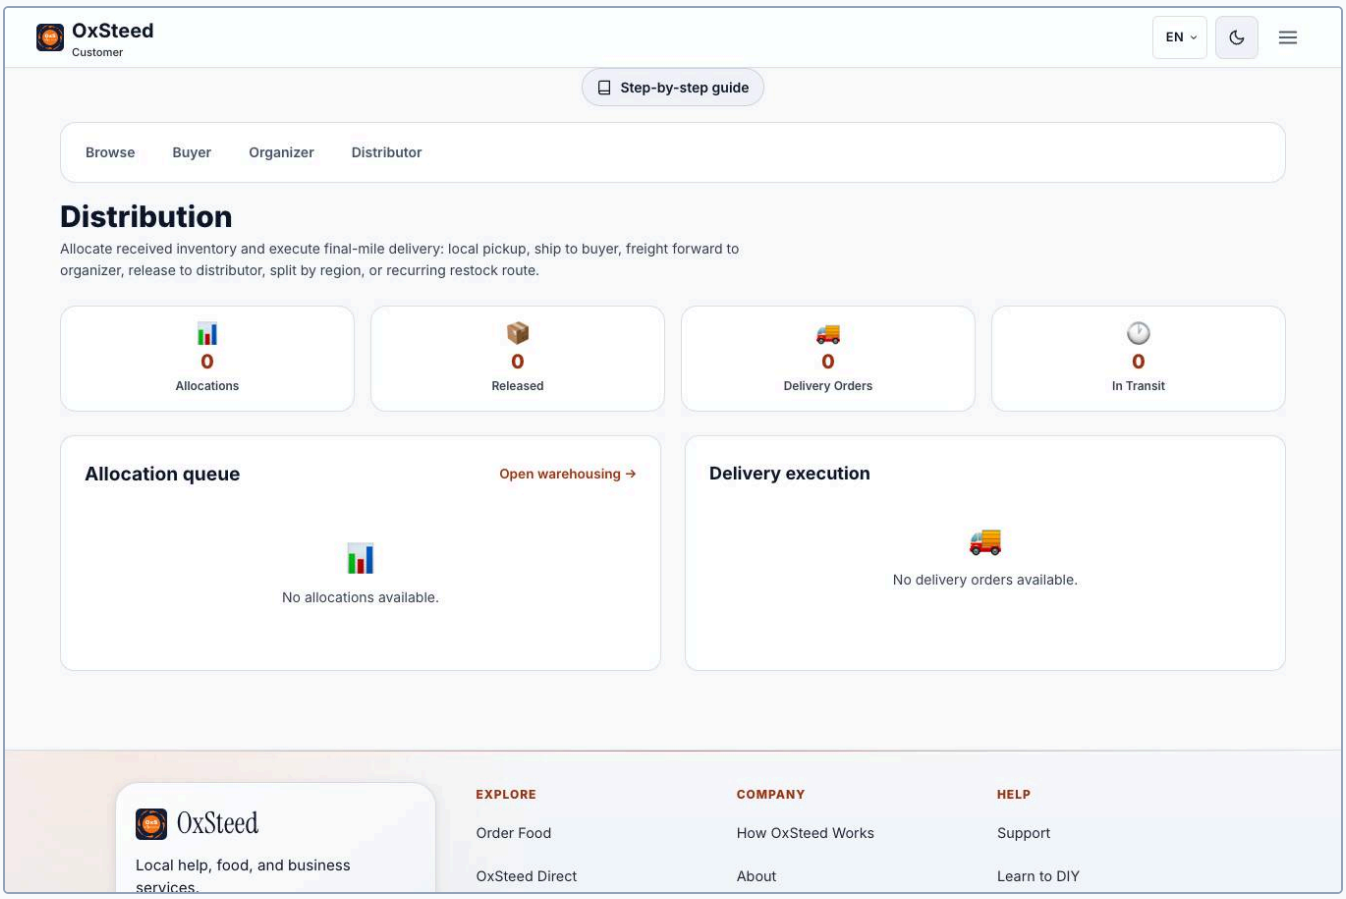

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Distribution)*

Step 4: Work the Distributor workspace pressure points

Open /logistics/distributor, the "Distributor / Reseller Workspace". The actions "Open distribution board" and "Check warehouse readiness" sit under the subtitle "Track allocated inventory, manage release methods, and keep final-mile handoff execution clean across resale or community distribution." The "Distribution pressure points" panel flags lots waiting on release, scheduled deliveries, and failed or cancelled drops that need rerouting or recipient follow-up.

> **Expected result:** You know which lots need release action and which deliveries failed.

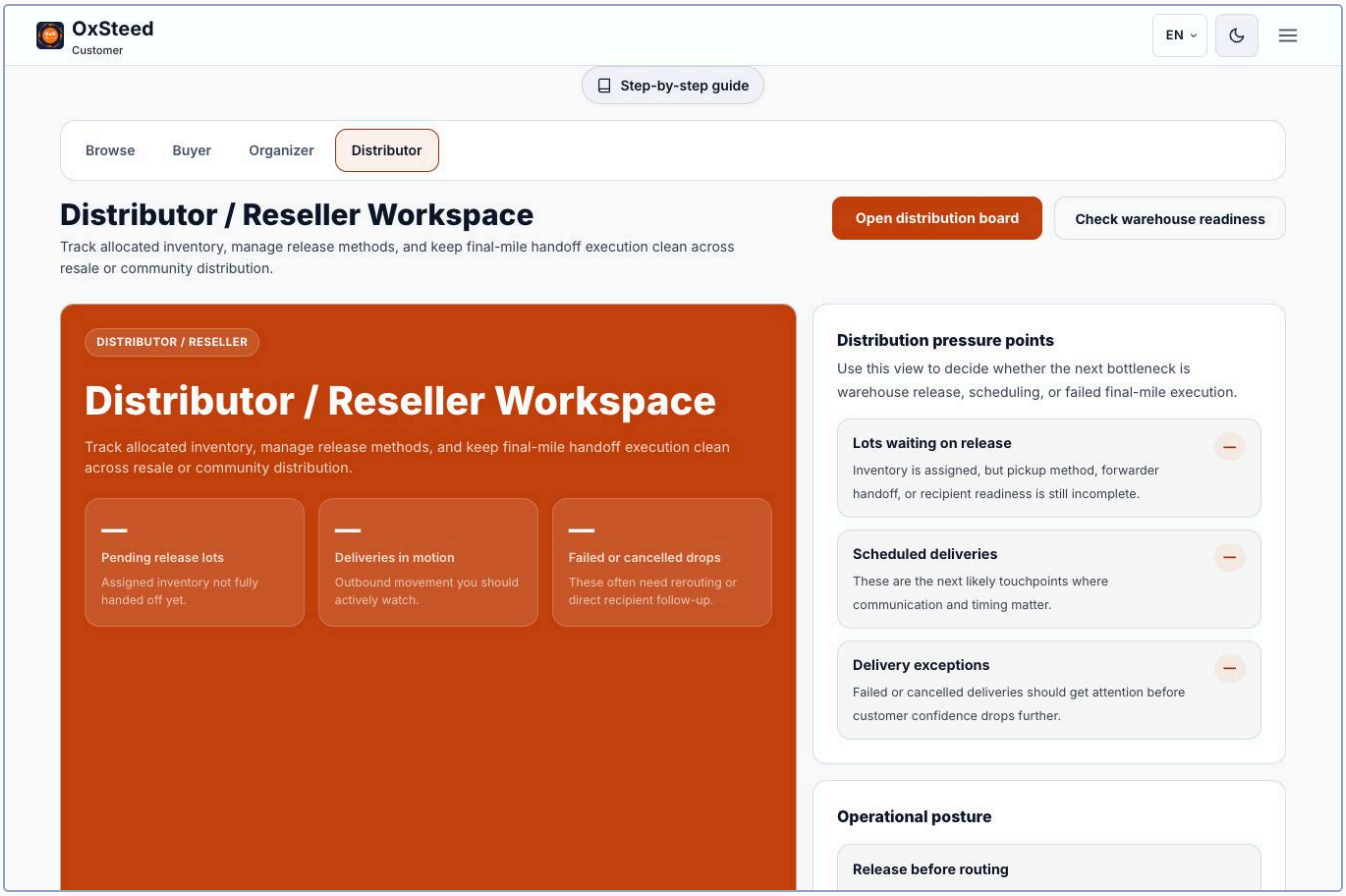

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Distributor / Reseller Workspace)*

Confirm it worked

Allocation cards show released quantities and delivery orders show current status on the board.

If something goes wrong

Problem	What to do
The board shows "No allocations available."	Allocations are created upstream after warehousing receives stock. Check /logistics/warehousing first.
A delivery failed or was cancelled.	Find it in the pressure points panel, reroute or contact the recipient, then confirm the new delivery status on the board.

Need help?

Distribution or delivery issues: contact support from the in-app support page at /support.

Guide ID: logistics-organize-campaign | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Organize a campaign

Guide ID	**logistics-organize-campaign**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (organizer)
Availability	**Supported**
Online version	/how-it-works/logistics/organize-a-campaign

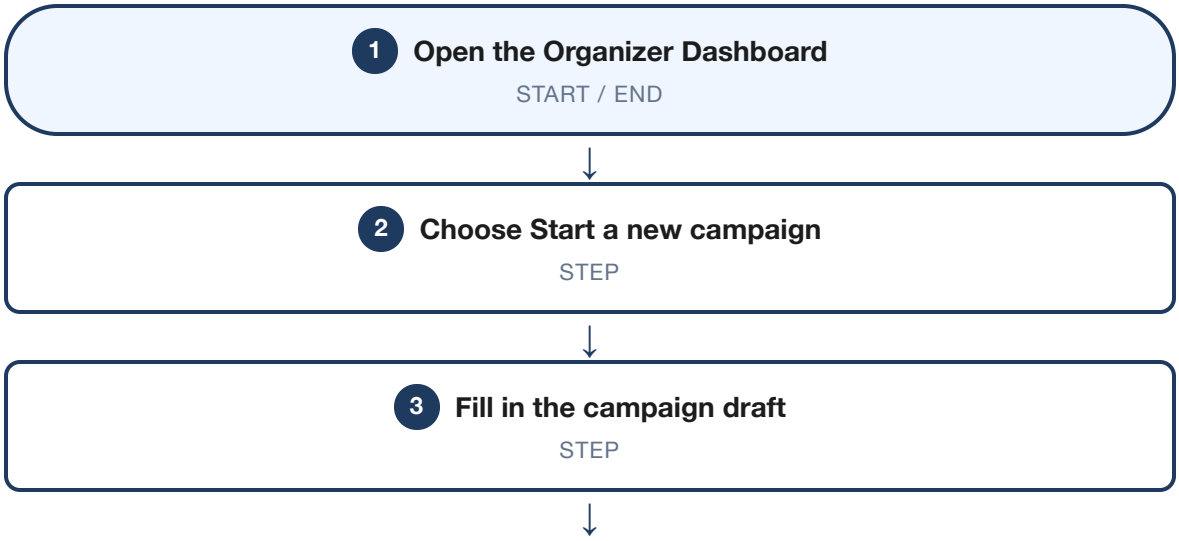

Goal

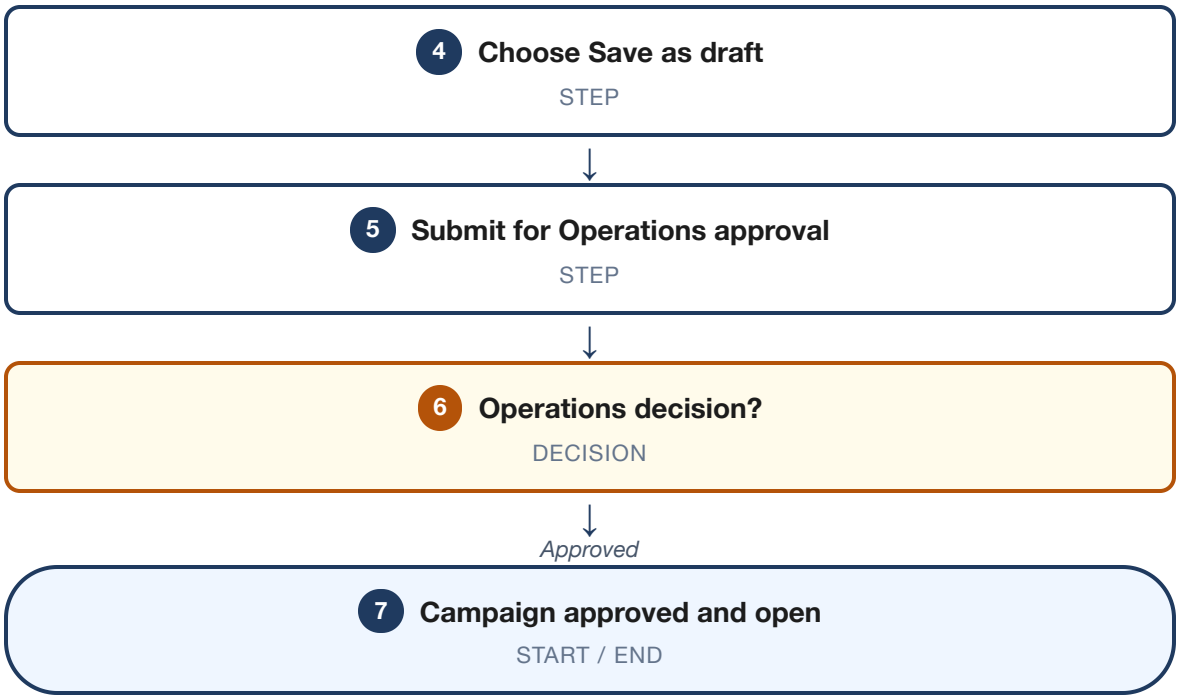

Create a pooled logistics campaign draft, submit it for Operations approval, and rally buyers toward the MOQ.

Before you start

1. A signed-in OxSteed account.
2. A product, a trade lane, and a target minimum quantity (MOQ).

Process map

- *Revisions requested:* Operations decision? → Revise and resubmit
- *Rejected:* Operations decision? → Fill in the campaign draft
- Revise and resubmit → Submit for Operations approval

Text version. 1. Open the Organizer Dashboard. 2. Choose Start a new campaign. 3. Fill in the campaign draft: title, description, lane, MOQ, dates, and a pricing sketch. 4. Choose Save as draft. 5. Submit the draft for Operations approval. 6. Operations approves, requests revisions, or rejects. If revisions are requested, update the draft and submit again; once approved, the campaign opens to buyers.

Steps

Step 1: Open the Organizer Dashboard

Choose Organizer in the logistics navigation, or open /logistics/organizer directly. The "Organizer Dashboard" page shows your stats ("Campaigns still in motion", "Committed units", "Handoffs to coordinate") and an "Organizer campaigns" list. The dashboard also surfaces "Organizer pressure points" such as "MOQ momentum gaps".

> **Expected result:** The Organizer Dashboard loads with your campaign list and stats.

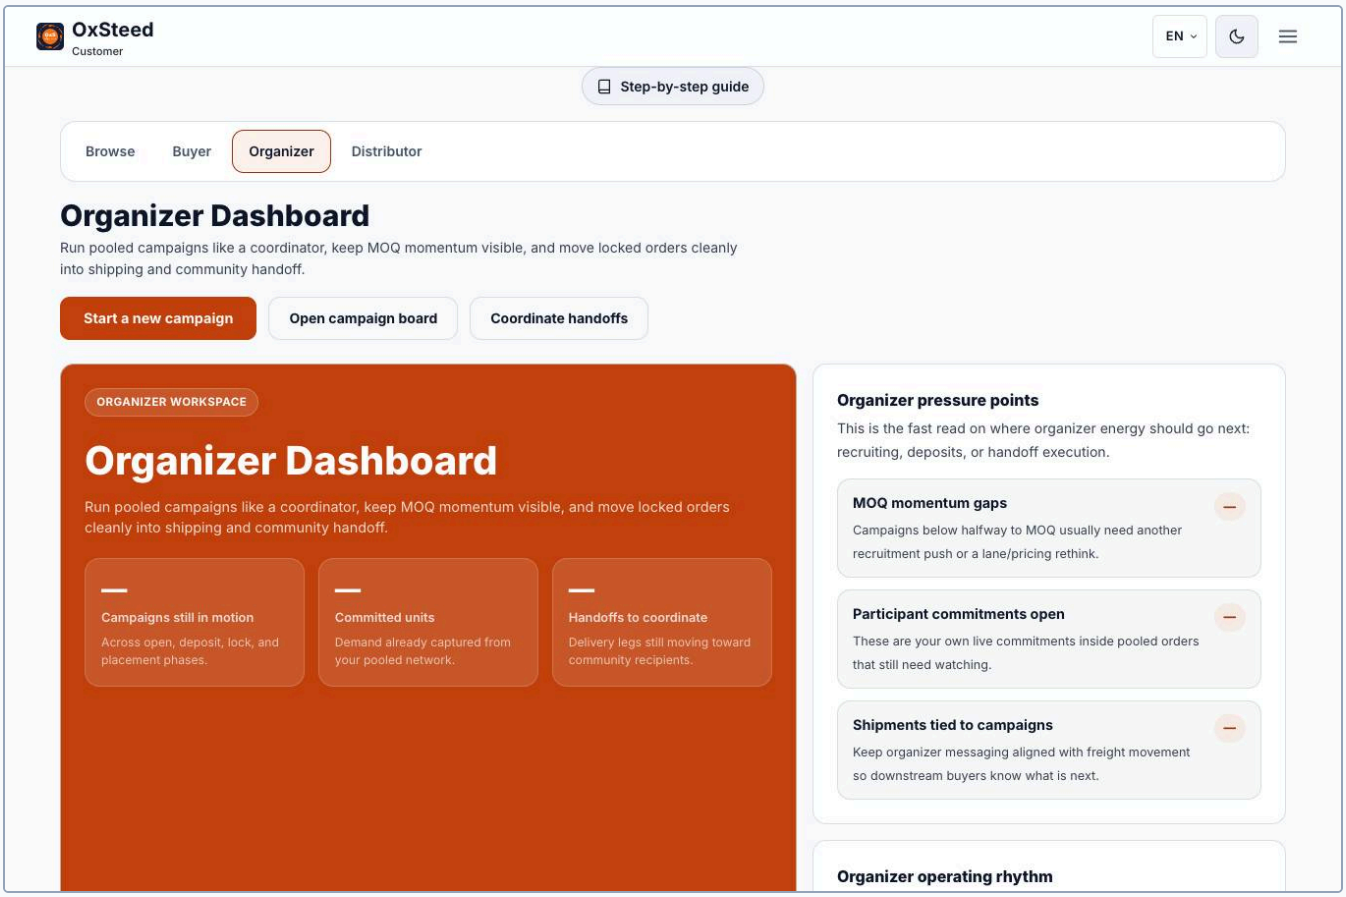

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Organizer Dashboard)*

Step 2: Start a new campaign draft

Choose "Start a new campaign" to open /logistics/campaigns/new, titled "Start a new campaign" with the subtitle "Draft your pooled campaign. Review it and submit it for Operations approval when it is ready." Fill in "Campaign title" (for example "2,000 units of solar lanterns"), "Description", "Trade lane", "Minimum quantity (MOQ)", "Max participants (optional)", and the dates: "Pledge close date", "Lock date", "Expected ship date", "Expected arrival date". Watch the "Lane checks" panel: some lanes show "Business verification is required to run a campaign on this lane" or "Manual compliance approval is required before this campaign can be published".

> **Expected result:** All required fields are filled and no validation errors appear.

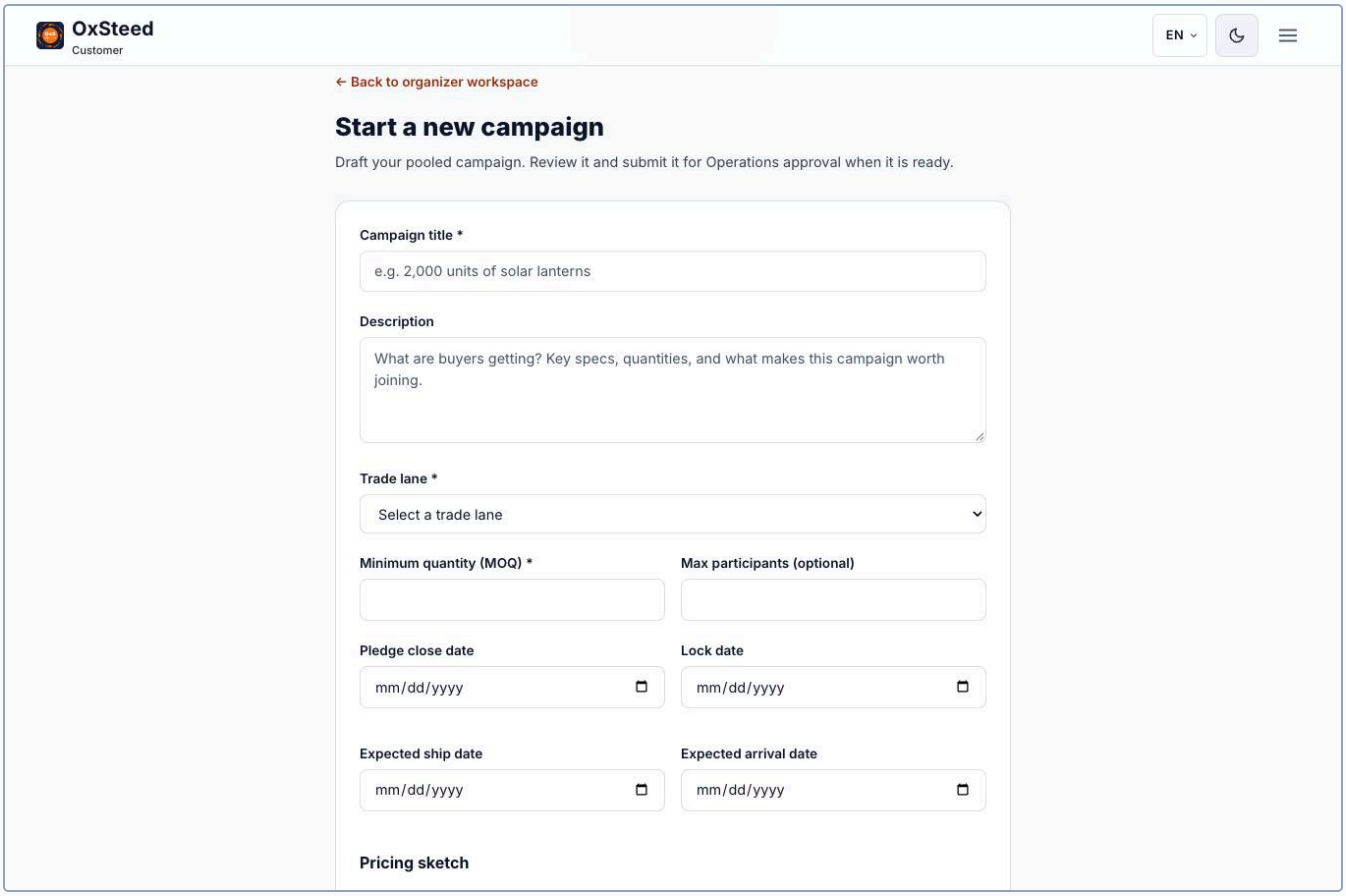

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Start a new campaign)*

Step 3: Add the pricing sketch and save the draft

In the "Pricing sketch" section enter "Unit product cost (USD)", "Unit freight estimate (USD)", "Deposit percentage", and "Cancellation policy". The hint reads "A rough sketch is enough for the draft. OxSteed computes the landed cost; Operations confirms pricing at review." Choose "Save as draft" and wait for the "Draft saved." confirmation.

> **Expected result:** You see the "Draft saved." confirmation.

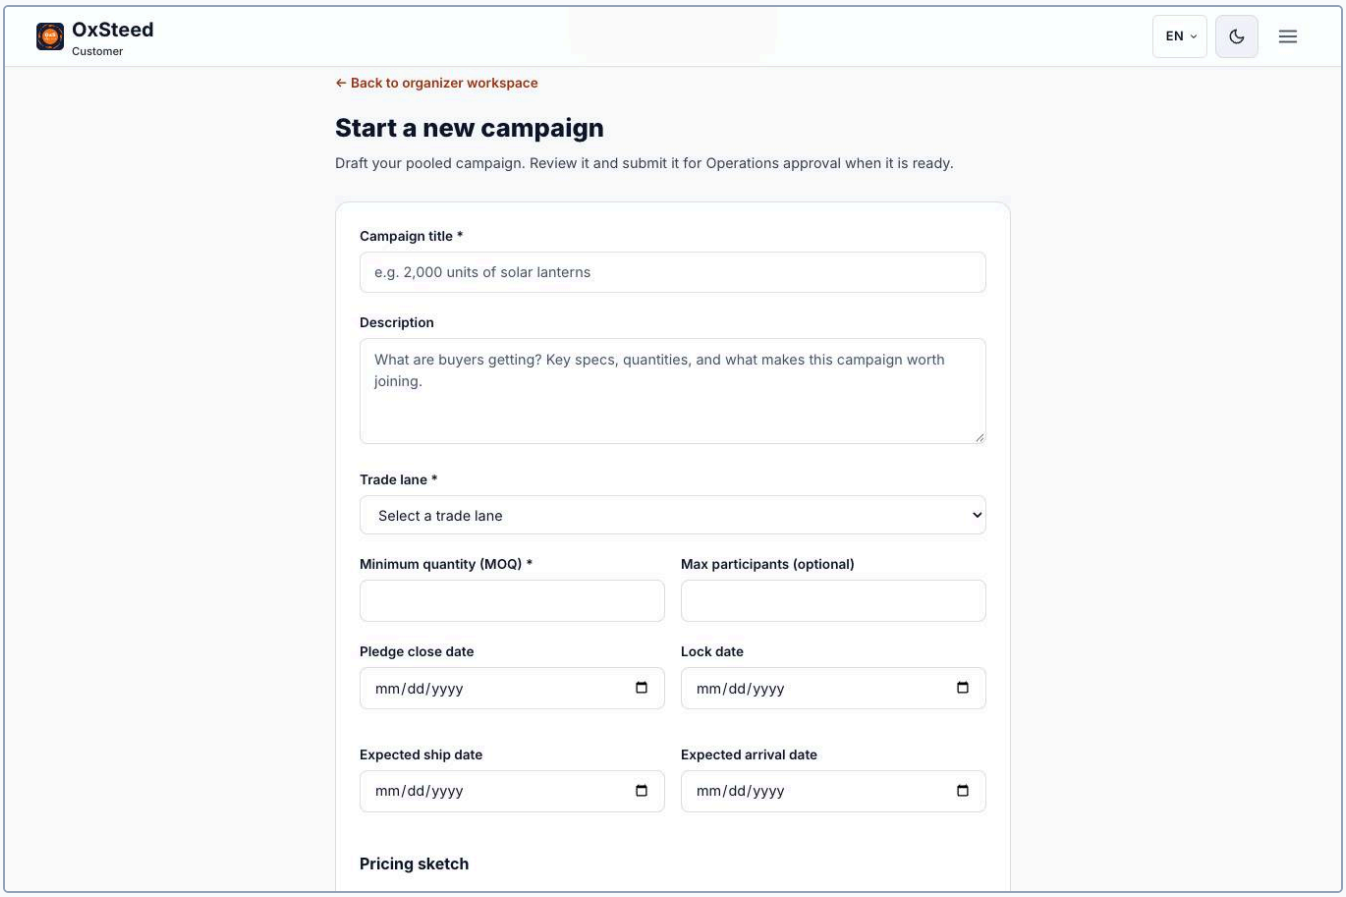

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Start a new campaign)*

Step 4: Submit for Operations approval and track the decision

From the draft or the Organizer Dashboard, submit the campaign for Operations approval. The "Approval" panel shows the state: "Draft", "Pending review", "Revisions requested", "Approved", or "Rejected". If revisions are requested, edit the campaign at /logistics/campaigns/:id/edit and submit again. Once approved, the campaign opens to buyers and appears on the public campaign list.

> **Expected result:** The campaign shows "Pending review", then "Approved" once Operations decides.

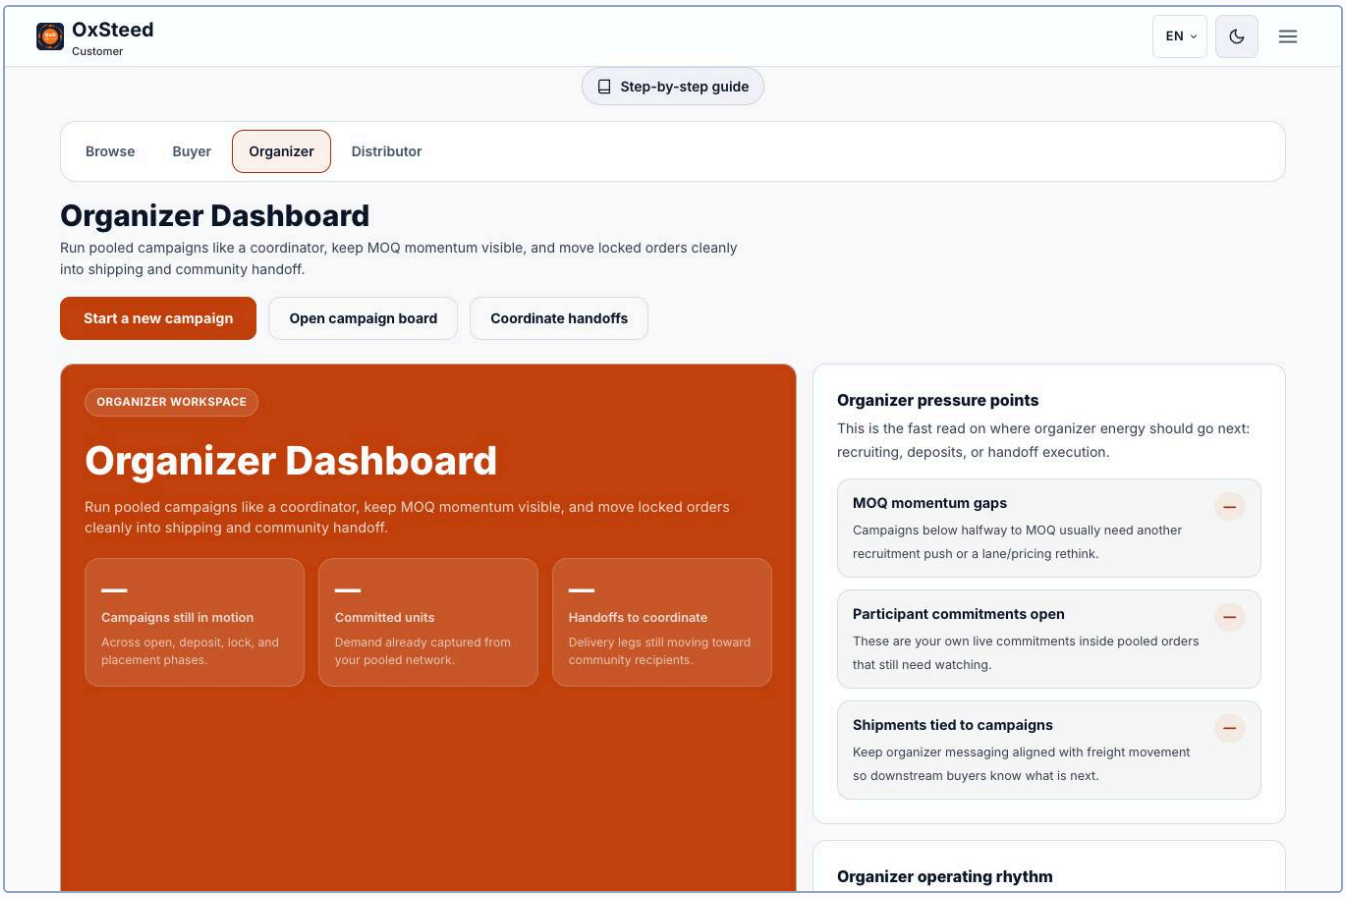

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Organizer Dashboard)*

Confirm it worked

The campaign appears on the public campaign list with status Open, and buyers can pledge units toward the MOQ.

If something goes wrong

Problem	What to do
The form refuses to save: "A title is required." or "Choose a trade lane."	Complete the highlighted required fields. The MOQ must be at least 1.
Operations requested revisions.	Read the revision notes on the approval panel, edit the campaign, and submit again. The approval history is kept on the campaign.
Your lane shows a manual compliance approval requirement.	Submit the draft anyway; Operations handles the manual approval at review. You cannot publish until it clears.

Need help?

Guide ID: logistics-pledge | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Pledge to a campaign (buyer)

Guide ID	**logistics-pledge**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer)
Availability	**Supported**
Online version	/how-it-works/logistics/pledge-to-a-campaign

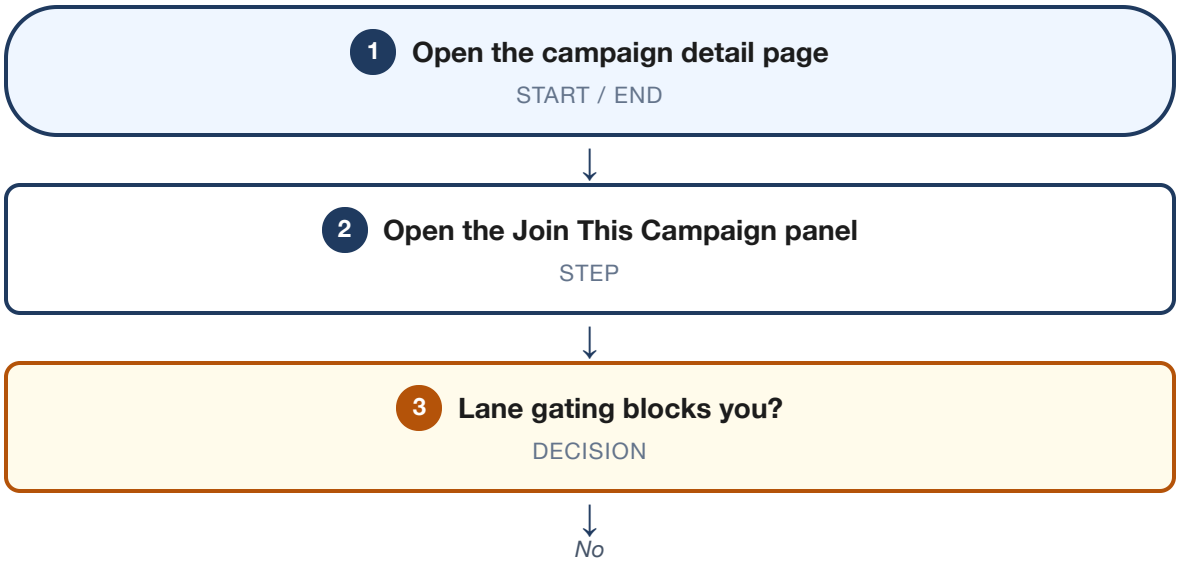

Goal

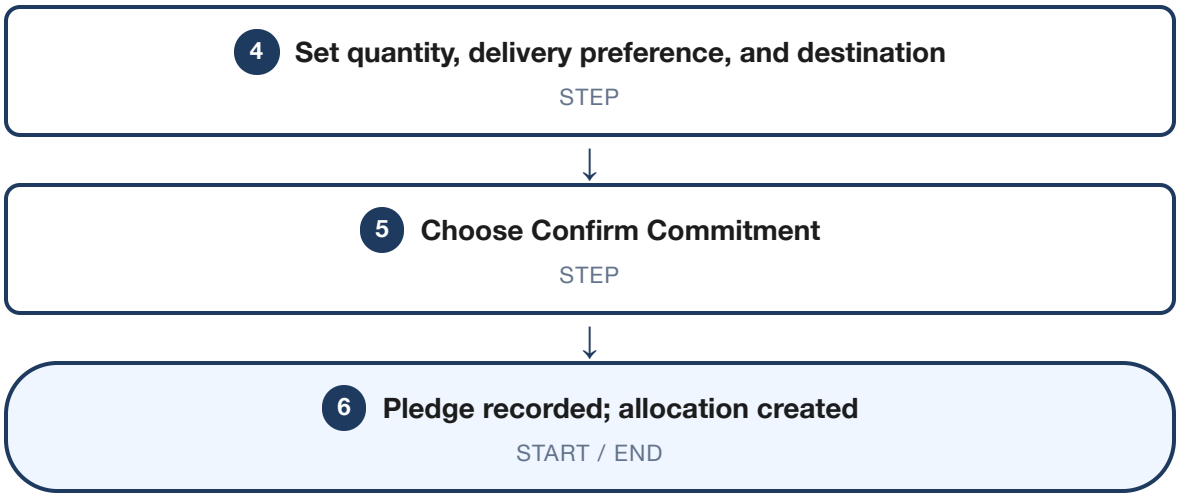

Commit units to an open logistics campaign so your demand counts toward the minimum order quantity.

Before you start

1. A signed-in OxSteed account.
2. A campaign you have reviewed. Browse campaigns first.

Process map

- *Yes:* Lane gating blocks you? → Lane gating blocked

Text version. 1. Open the campaign detail page. 2. Open the Join This Campaign panel. 3. Check whether lane gating applies: verified business context, reseller approval, or manual compliance approval may be required. If you are blocked, the campaign states the reason. 4. Otherwise set your quantity, delivery preference, and destination country. 5. Choose Confirm Commitment. 6. Your pledge is recorded and an allocation tracks your share.

Steps

Step 1: Open the campaign and the join panel

Sign in, then open the campaign from /logistics/campaigns. Scroll to the "Join This Campaign" panel. If you have already pledged, the panel shows "You've already joined this campaign." instead of the form.

> **Expected result:** The join panel shows "Quantity to commit", "Delivery Preference", and "Destination country" fields.

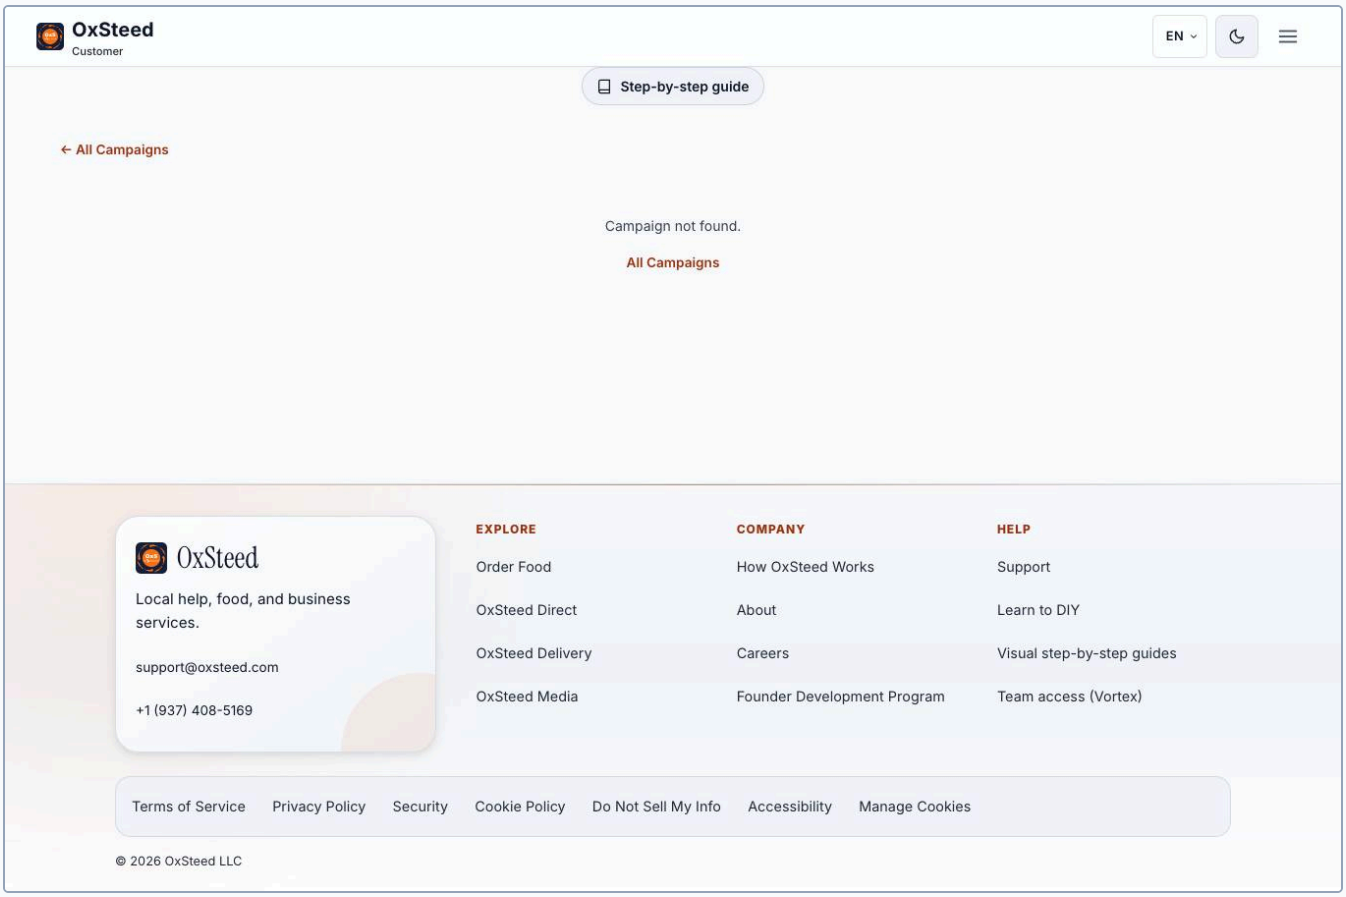

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Join This Campaign panel on a campaign detail page)*

Step 2: Check lane gating before pledging

Read the "Lane gating" panel on the campaign page. Some lanes require verified business context, reseller or distributor approval, or manual compliance approval. If your role or destination is blocked, the panel shows the reason, for example "Verified business context is required for this campaign lane." Resolve the requirement before continuing.

> **Expected result:** You know whether your account can pledge on this lane, and the reason if not.

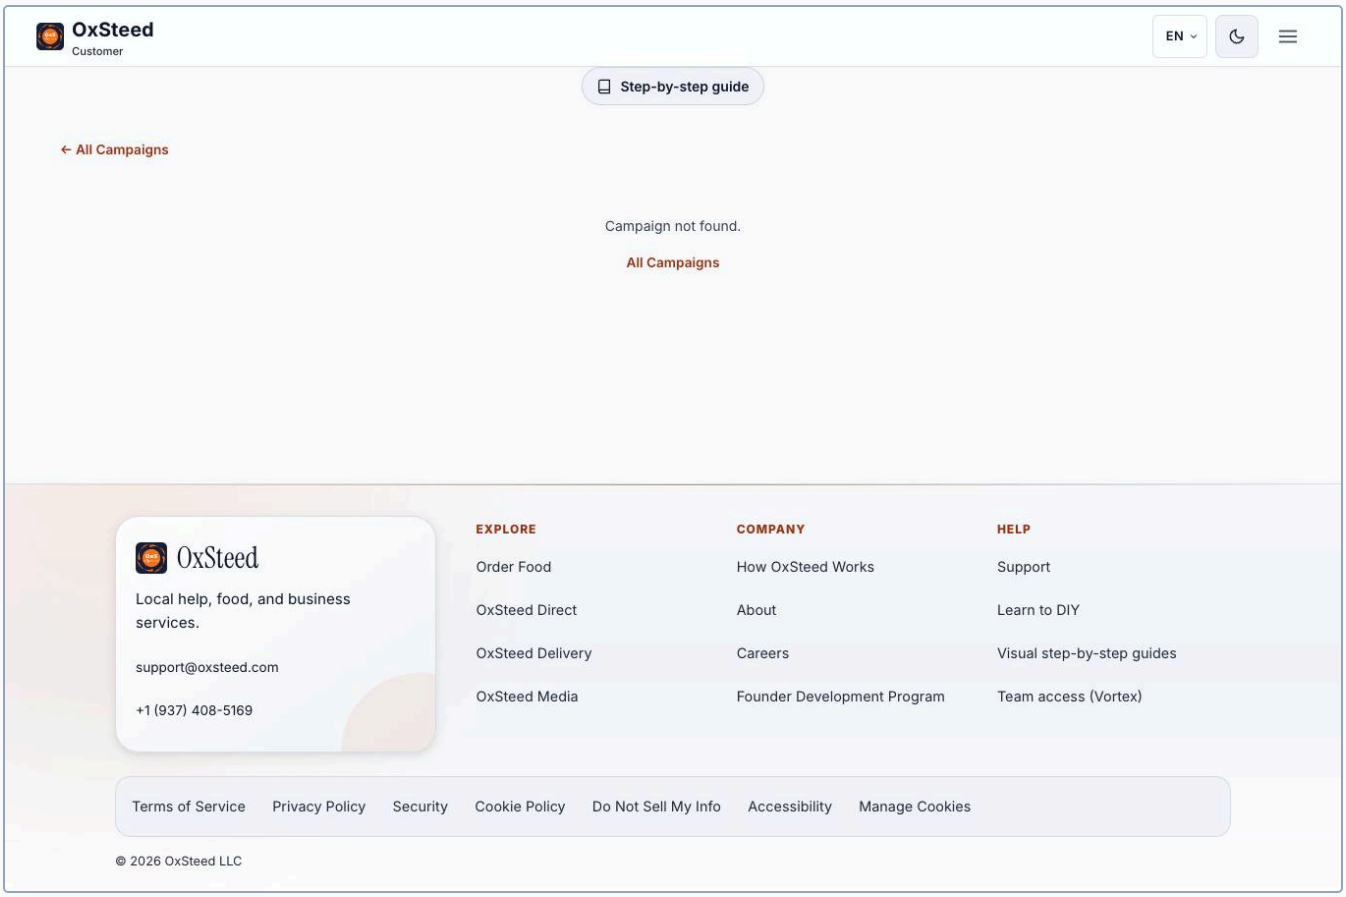

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Lane gating panel with approval requirements)*

Step 3: Set quantity, delivery preference, and destination

Enter the "Quantity to commit" and review the "Subtotal" and "Deposit". Choose a "Delivery Preference": "Warehouse Pickup", "Ship to Me", or "Freight Forward". Set "Destination country" and read the "Cancellation Policy". Note the warning: "Committed quantities cannot be reduced after the campaign locks."

> **Expected result:** The subtotal and deposit update to match your quantity and preference.

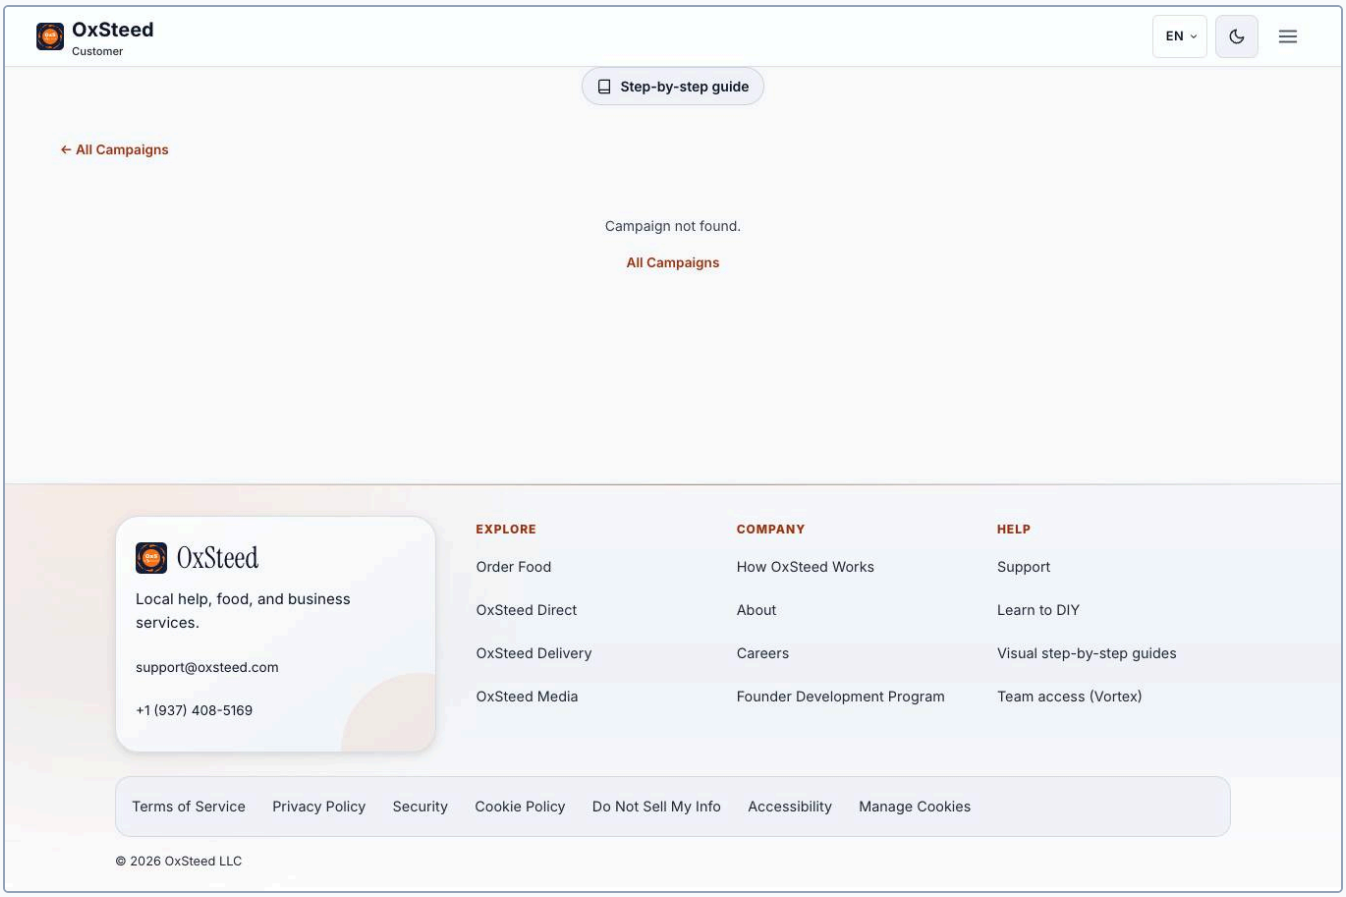

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Completed join form with subtotal and deposit shown)*

Step 4: Choose Confirm Commitment

Choose "Confirm Commitment". Your pledge counts toward the campaign MOQ. Open the "Buyer Dashboard" at /logistics/buyer to see your participation, or open the allocation detail page at /logistics/allocations/:id to track your share. From the allocation page you can release the allocation if your plans change.

> **Expected result:** The campaign shows you as joined, and your allocation appears in the Buyer Dashboard.

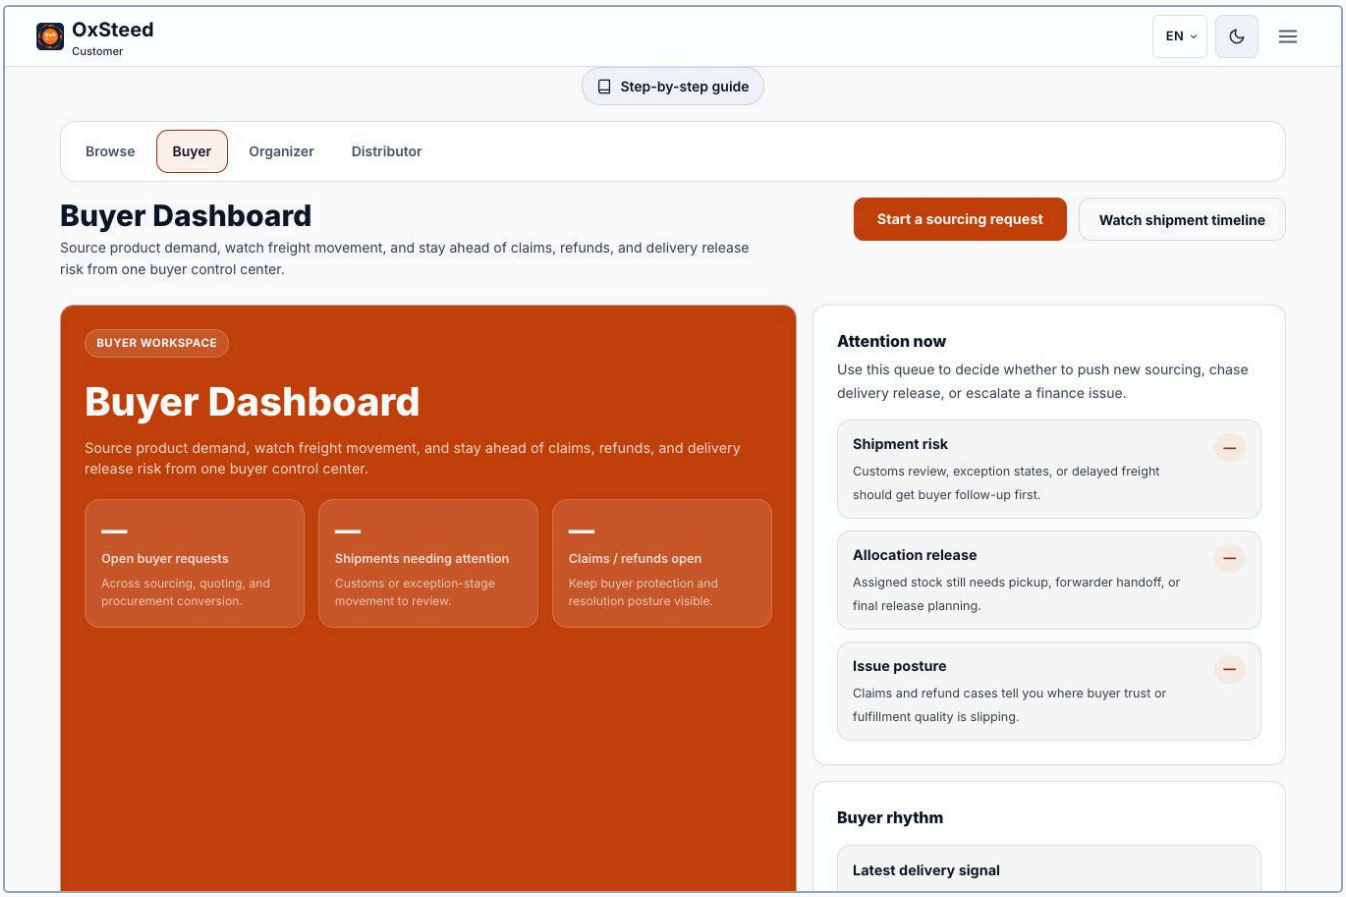

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Buyer Dashboard)*

Confirm it worked

The campaign page shows "You've already joined this campaign." and your allocation appears under the Buyer Dashboard participation list.

If something goes wrong

Problem	What to do
The join panel says your role or destination is blocked for this lane.	Read the "Lane gating" reason shown on the page. Complete business verification, request reseller approval, or contact support for manual compliance approval.
You pledged but the allocation does not appear in the Buyer Dashboard.	Refresh the page and check /logistics/buyer again. If it still does not appear, contact support at /support with the campaign name.

Need help?

Pledge or allocation issues: contact support from the in-app support page at /support.

Guide ID: logistics-refund-requests | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Request logistics refunds

Guide ID	**logistics-refund-requests**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer)
Availability	**Supported**
Online version	/how-it-works/logistics/request-logistics-refund

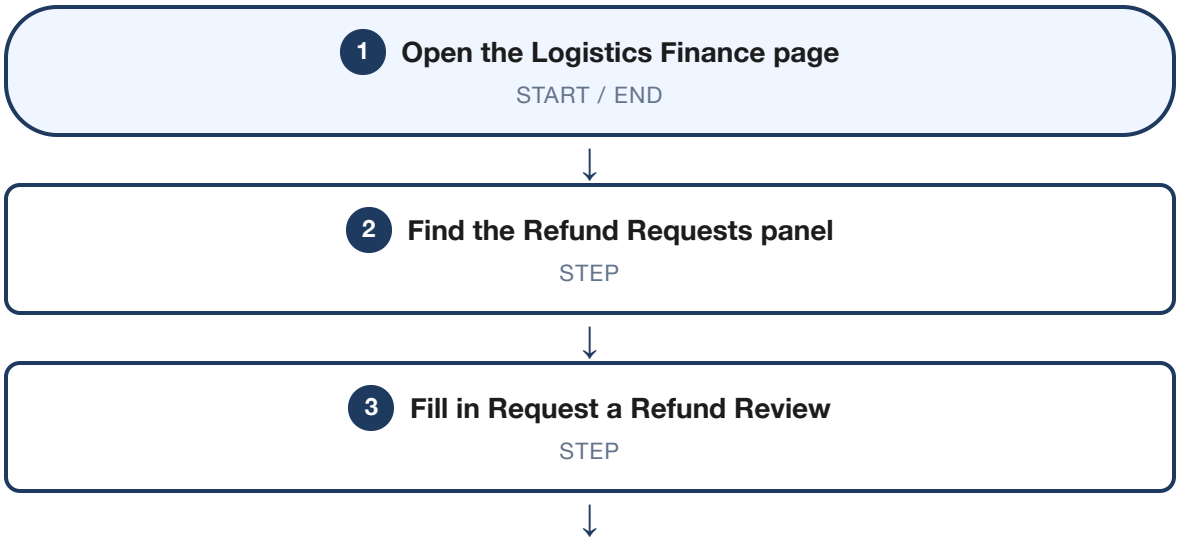

Goal

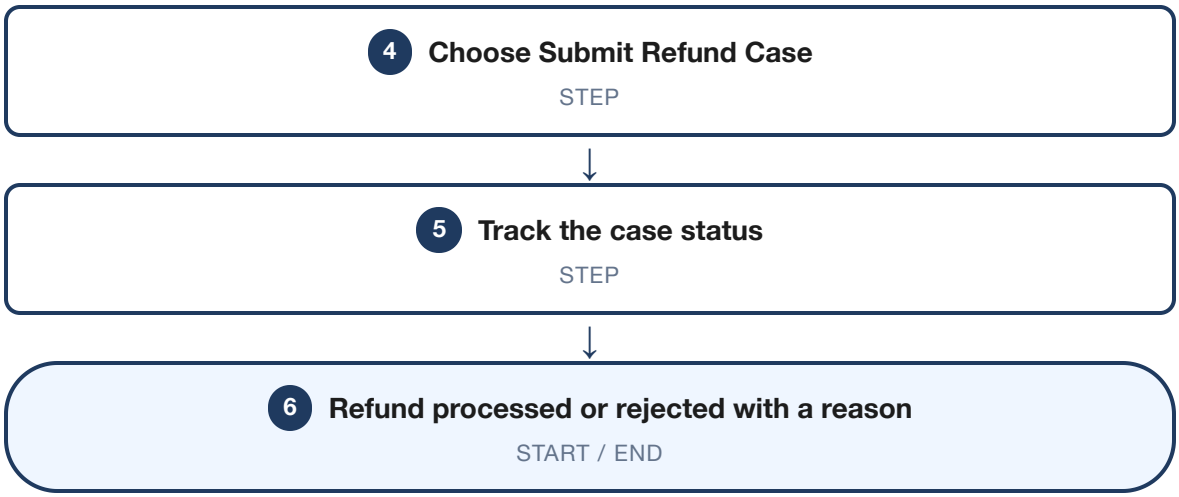

Submit a logistics refund case for operator review and track it to completion.

Before you start

1. A signed-in OxSteed account.
2. A purchase order to attach the refund to, ideally with a related claim.

Process map

Text version. 1. Open the Logistics Finance page. 2. Find the "Refund Requests" panel. Note: there is no standalone refund page; requesting and tracking happen here. 3. Fill in the "Request a Refund Review" form: purchase order, reason, amount, and notes. 4. Choose "Submit Refund Case" and wait for the "Refund case submitted for review." confirmation. 5. Track the case through its statuses: Proposed, Approved, Executing, Processed, Failed, Rejected, or Expired. 6. Refund approval is a dual-admin review: one admin proposes and a different admin approves.

Steps

Step 1: Open the Logistics Finance page

Choose Finance in the logistics navigation, or open /logistics/finance directly. The page is titled "Logistics Finance" with the subtitle "Overview of committed value, fees, and order economics." The KPI strip shows "Total Committed", "Deposits Paid", "Orders", and "In Transit".

> **Expected result:** The Finance page loads with your order and spend overview.

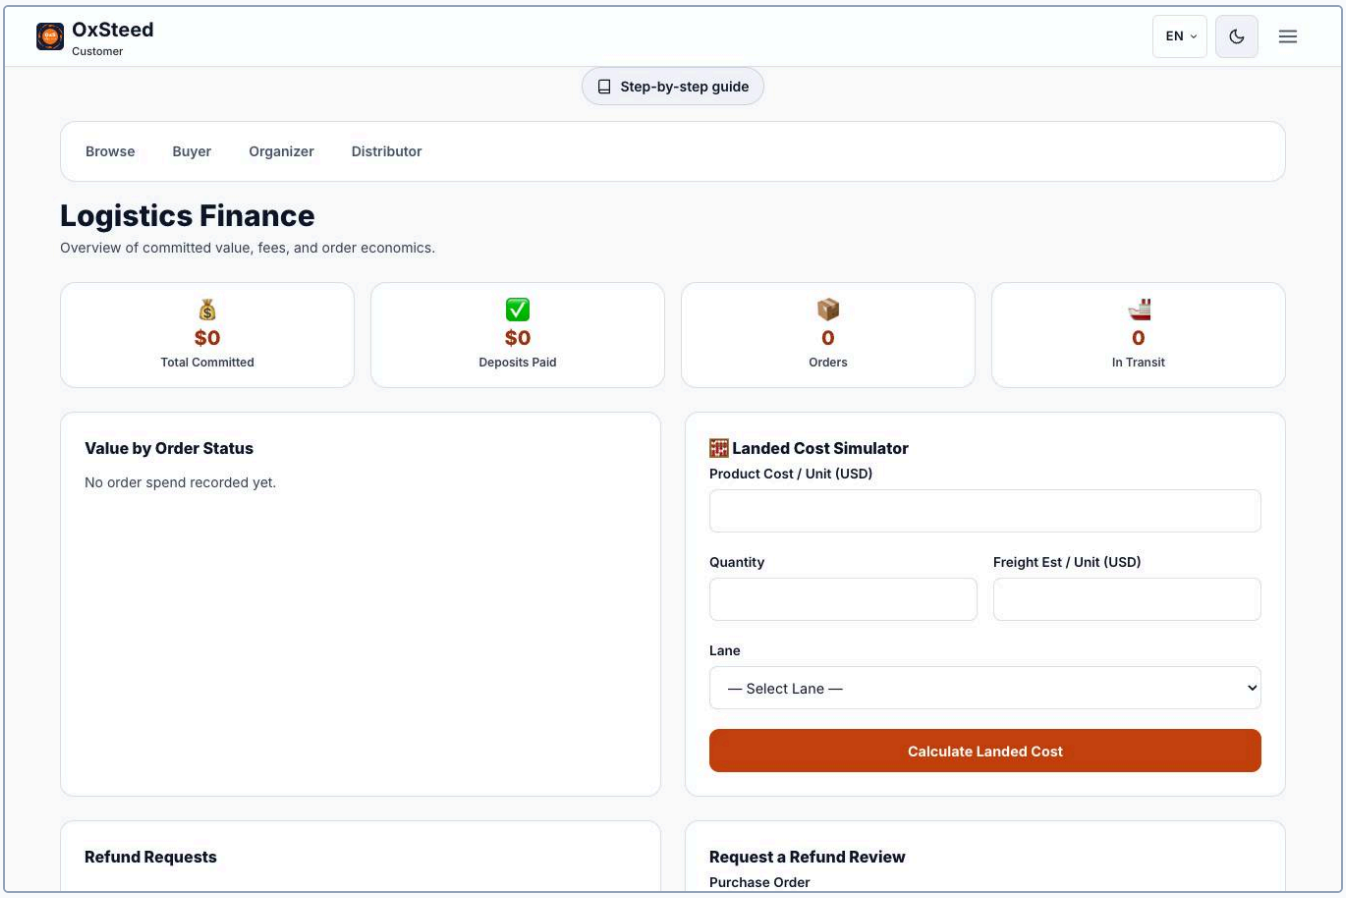

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Logistics Finance)*

Step 2: Open the Refund Requests panel

Scroll to the "Refund Requests" panel. It lists your existing cases in a table with columns Reference, Amount, Method (Stripe or OxSteed Credit), Reason, Proposed by, Status, and Created. A "Filter by status" dropdown filters the list; "All statuses" shows everything. There is no separate refunds route; this panel is the whole surface.

> **Expected result:** You see your existing refund cases, or "No refund cases submitted yet."

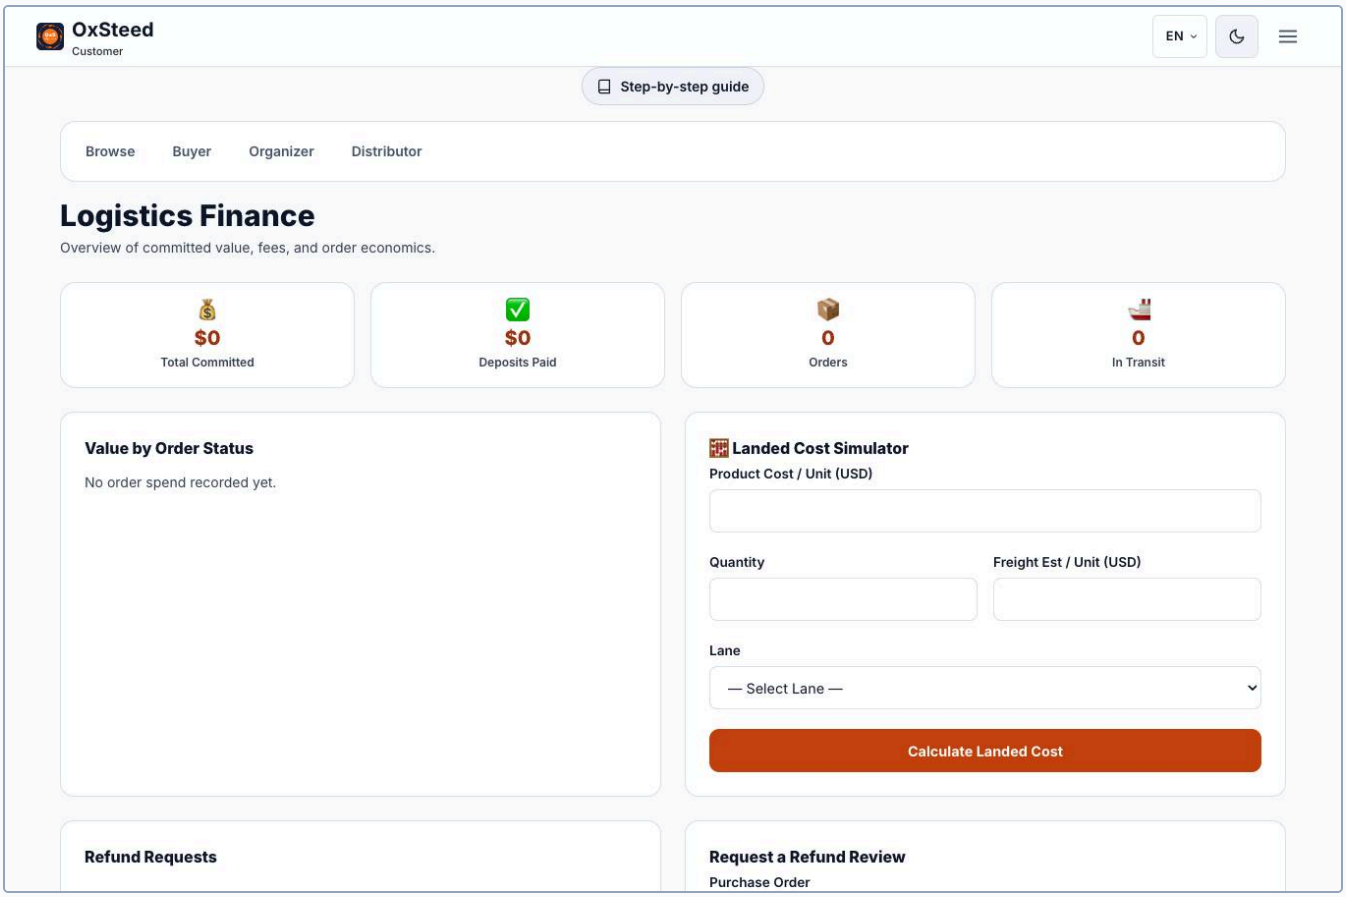

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Logistics Finance)*

Step 3: Fill in Request a Refund Review

Open the "Request a Refund Review" form. Choose the "Purchase Order" (" - Select order - "), enter the "Refund Reason", the "Requested Amount (USD)", and "Notes" explaining the situation. Link the related claim reference in the notes when one exists.

> **Expected result:** The form is complete with a selected order, reason, amount, and notes.

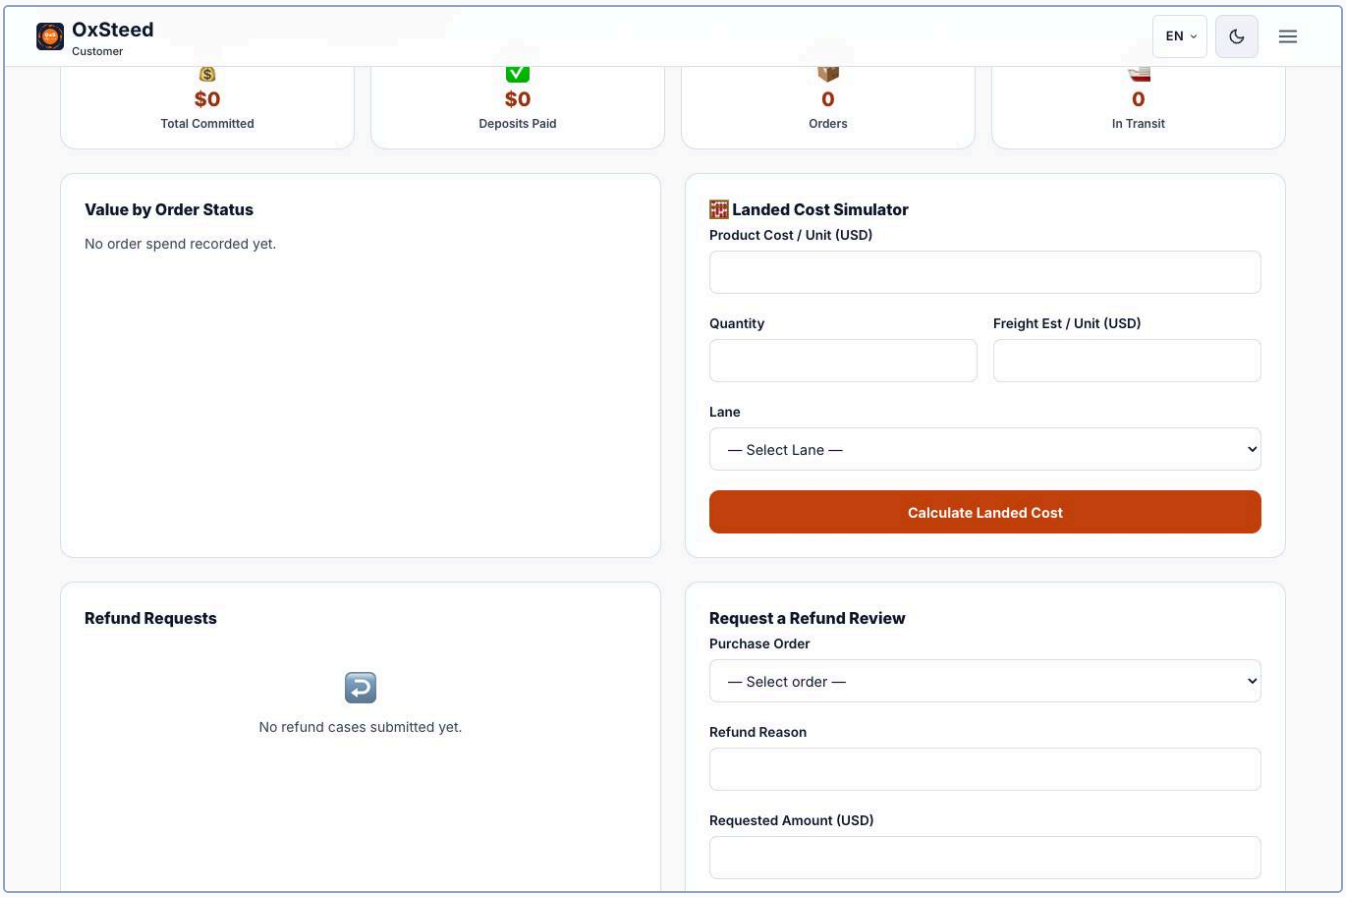

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Logistics Finance)*

Step 4: Submit and track the case

Choose "Submit Refund Case" and wait for the confirmation "Refund case submitted for review." The case appears in the table with status "Proposed". Dual-admin review applies: one admin proposes, a different admin approves with fresh authentication, then the refund is executed. You cannot approve your own proposal: the page blocks self-approval with "You proposed this refund. A different admin must approve it." Track the case as it moves to "Approved", "Executing", "Processed", or "Rejected".

> **Expected result:** The new case is listed with status "Proposed".

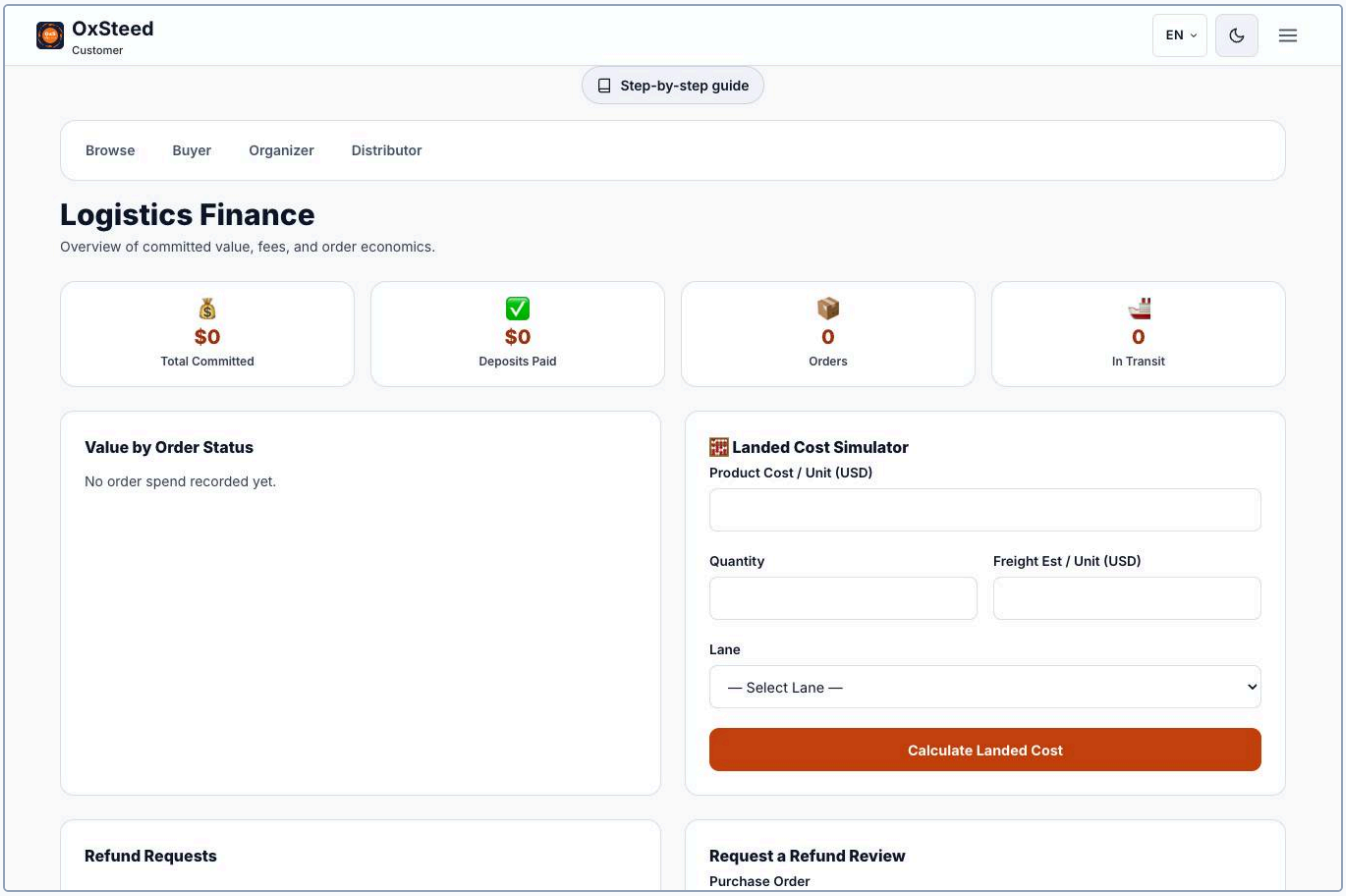

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Logistics Finance)*

Confirm it worked

The refund case appears in the Refund Requests table with status "Proposed", and you saw the "Refund case submitted for review." confirmation.

If something goes wrong

Problem	What to do
The submit button does nothing or shows an error.	Check that a purchase order is selected and the amount is filled in. Refresh and submit once; duplicate submissions are blocked server-side.
The case was rejected.	Read the rejection reason on the case, add missing evidence or correct the amount, and submit a new case.

Need help?

Refund questions: contact support from the in-app support page at /support.

Guide ID: logistics-sourcing | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS ENGLISH

Create sourcing requests and collect supplier quotes

Guide ID	**logistics-sourcing**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer), Business owner
Availability	**Supported**
Online version	/how-it-works/logistics/create-sourcing-request

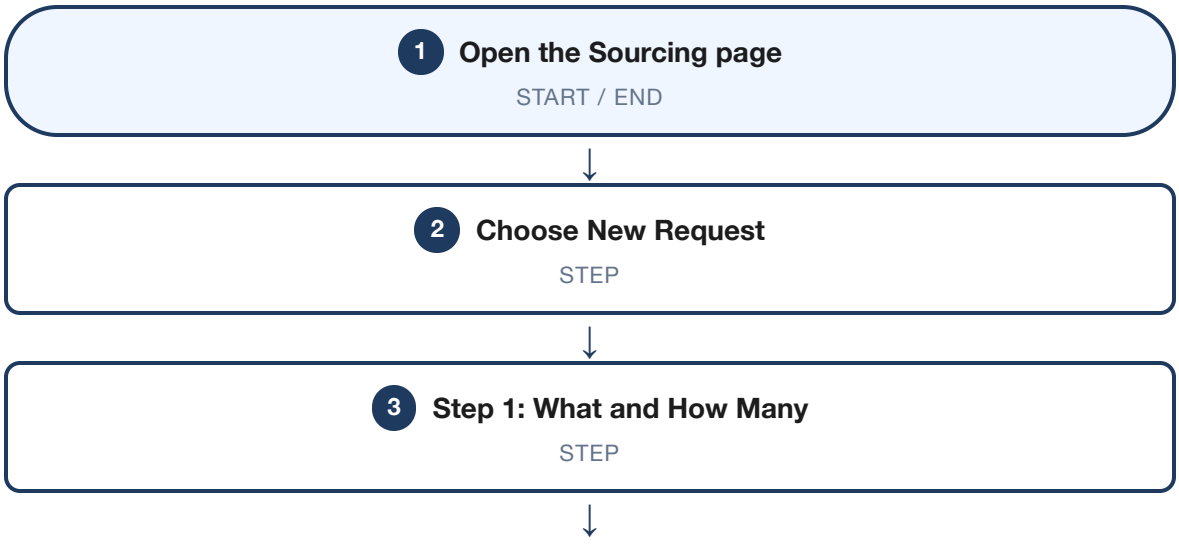

Goal

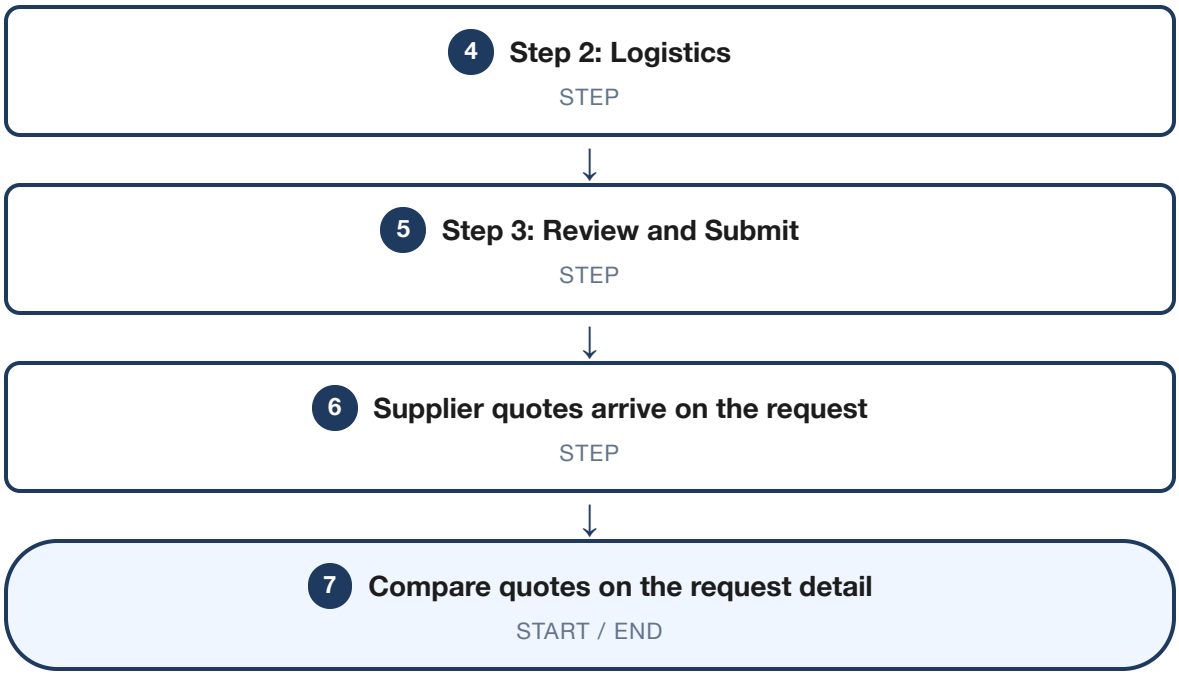

Publish a sourcing request with product specs and logistics details so suppliers can send quotes.

Before you start

1. A signed-in OxSteed account.
2. Product details: title, category, quantity, target price, destination country.

Process map

Text version. 1. Open the Sourcing page. 2. Choose New Request. 3. Complete step 1, What and How Many: product title, category, specs, quantity, and pricing targets. 4. Complete step 2, Logistics: lane, destination country, freight mode, need-by date, and attachments. 5. Review everything in step 3 and choose Submit Request. 6. Supplier quotes arrive on the request, and you compare them on the request detail page.

Steps

Step 1: Open the Sourcing page

Choose Sourcing in the logistics navigation, or open /logistics/sourcing directly. The page is titled "Sourcing" with the subtitle "Request, quote, and convert, from first inquiry to purchase order." Your existing requests appear in a table with columns Reference, Title, Category, Lane, Qty, Status, and Quotes. Choose "New Request" to start.

> **Expected result:** The Sourcing page loads with your request table and the "New Request" button.

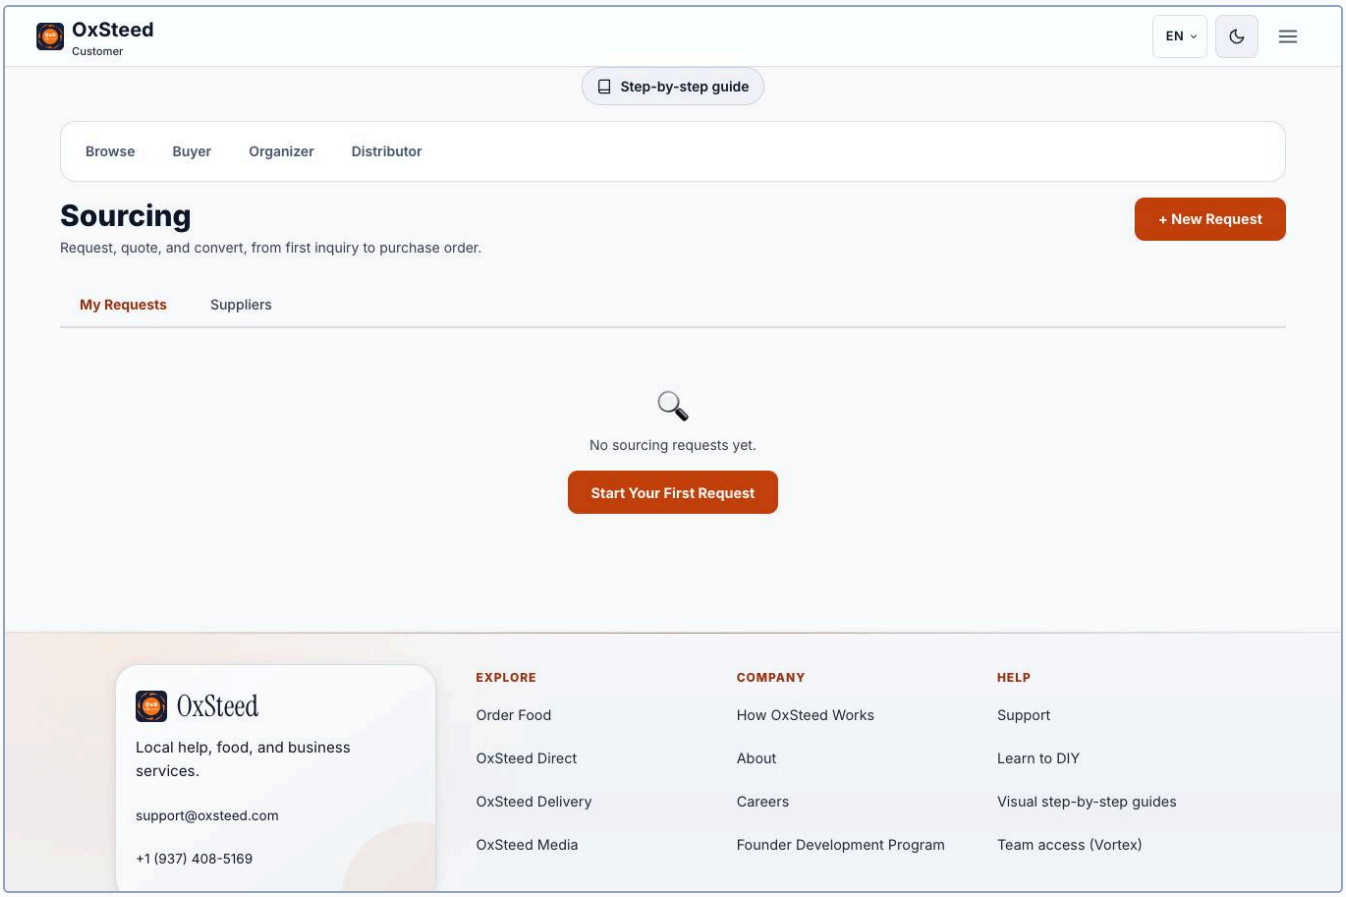

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Sourcing)*

Step 2: Describe what you need and how many

On the "New Sourcing Request" page, step 1 is "What & How Many". Enter "Product Title", choose "Category", write "Description / Specs", and enter "Quantity", "Target Unit Price (USD)", and "Total Budget (USD)". Use the "Back" and "Next" buttons to move between steps.

> **Expected result:** Step 1 fields are complete and "Next" moves you to the Logistics step.

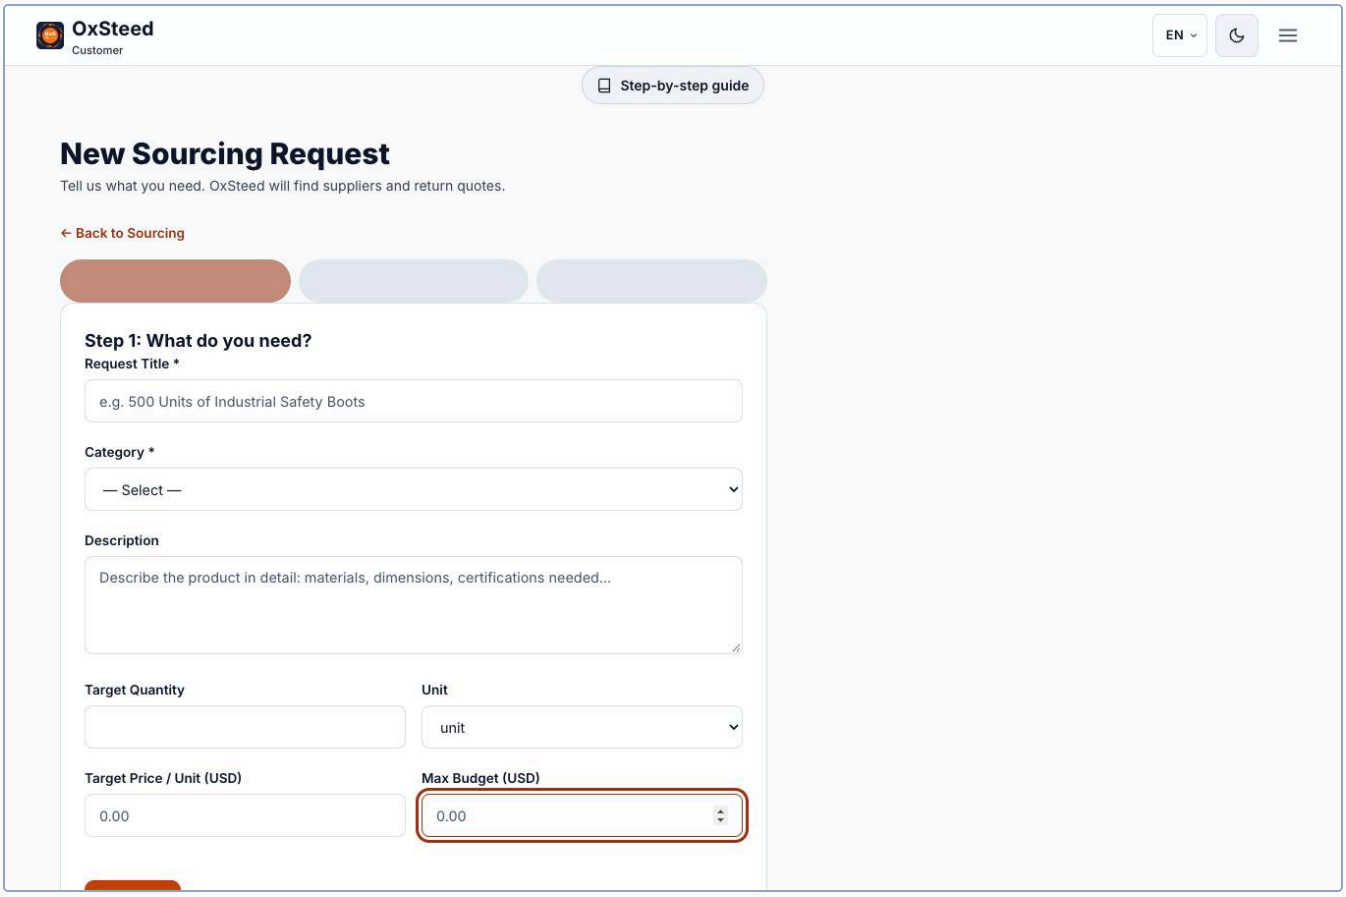

Figure 2. Step 1: What and How Many, desktop view. *(Image description: Synthetic example: New Sourcing Request)*

Step 3: Set the logistics details

Step 2 is "Logistics". Choose the "Lane", "Destination Country", and "Preferred Freight Mode", set "Need By Date", and add "Attachments (optional)" such as spec sheets. Choose "Next" to continue.

> **Expected result:** The logistics fields are complete and you reach the review step.

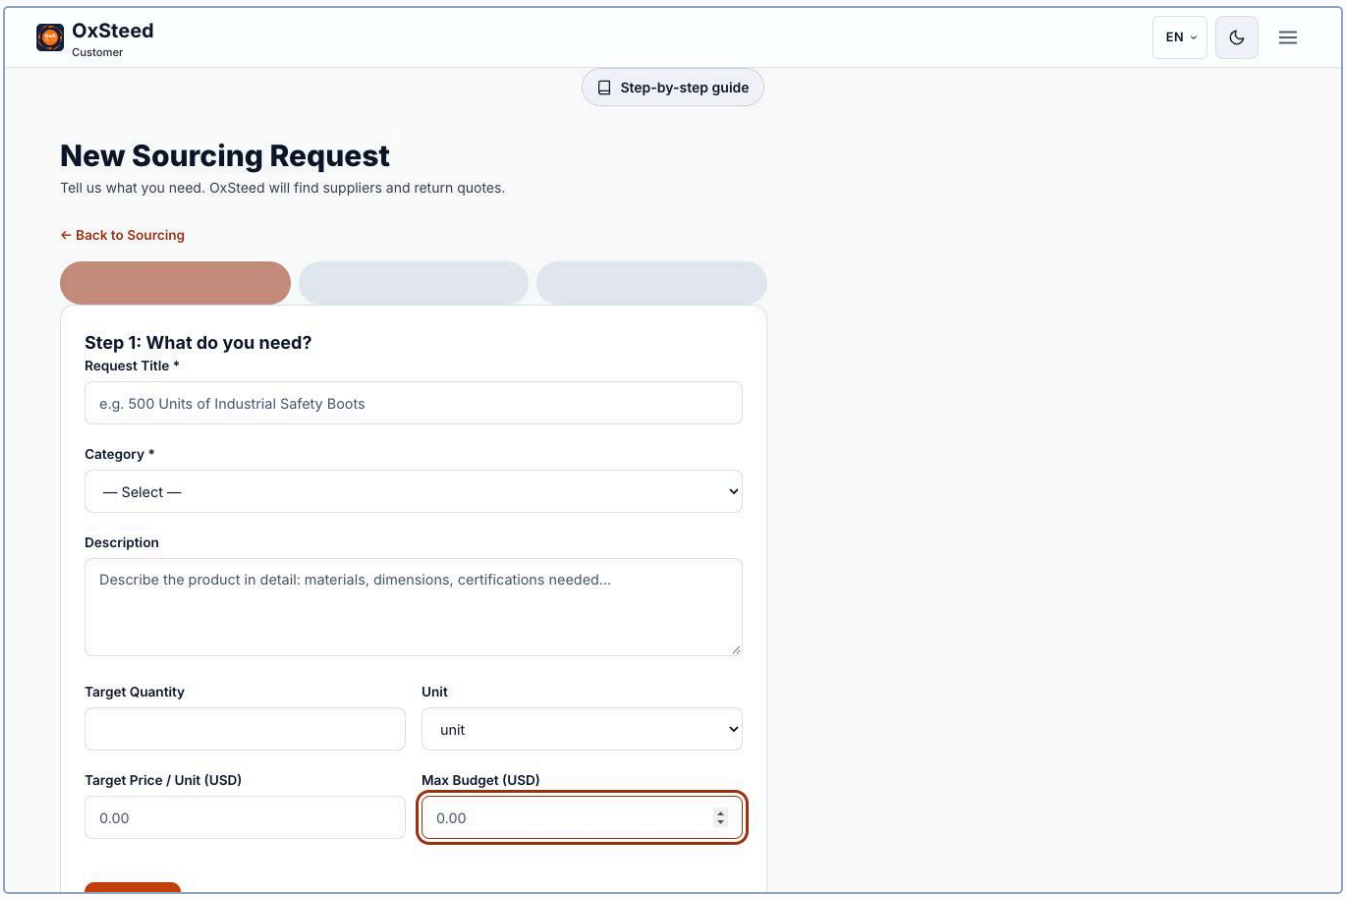

Figure 3. Step 2: Logistics, desktop view. *(Image description: Synthetic example: New Sourcing Request)*

Step 4: Review and submit the request

Step 3 is "Review & Submit" with the heading "Review your request". Check the summary of product, logistics, and pricing. Choose "Submit Request". You land on the request detail page, which shows the "Specifications" section and the "Quotes ({{count}})" section.

> **Expected result:** The request is published and the detail page shows "Quotes (0)" until suppliers respond.

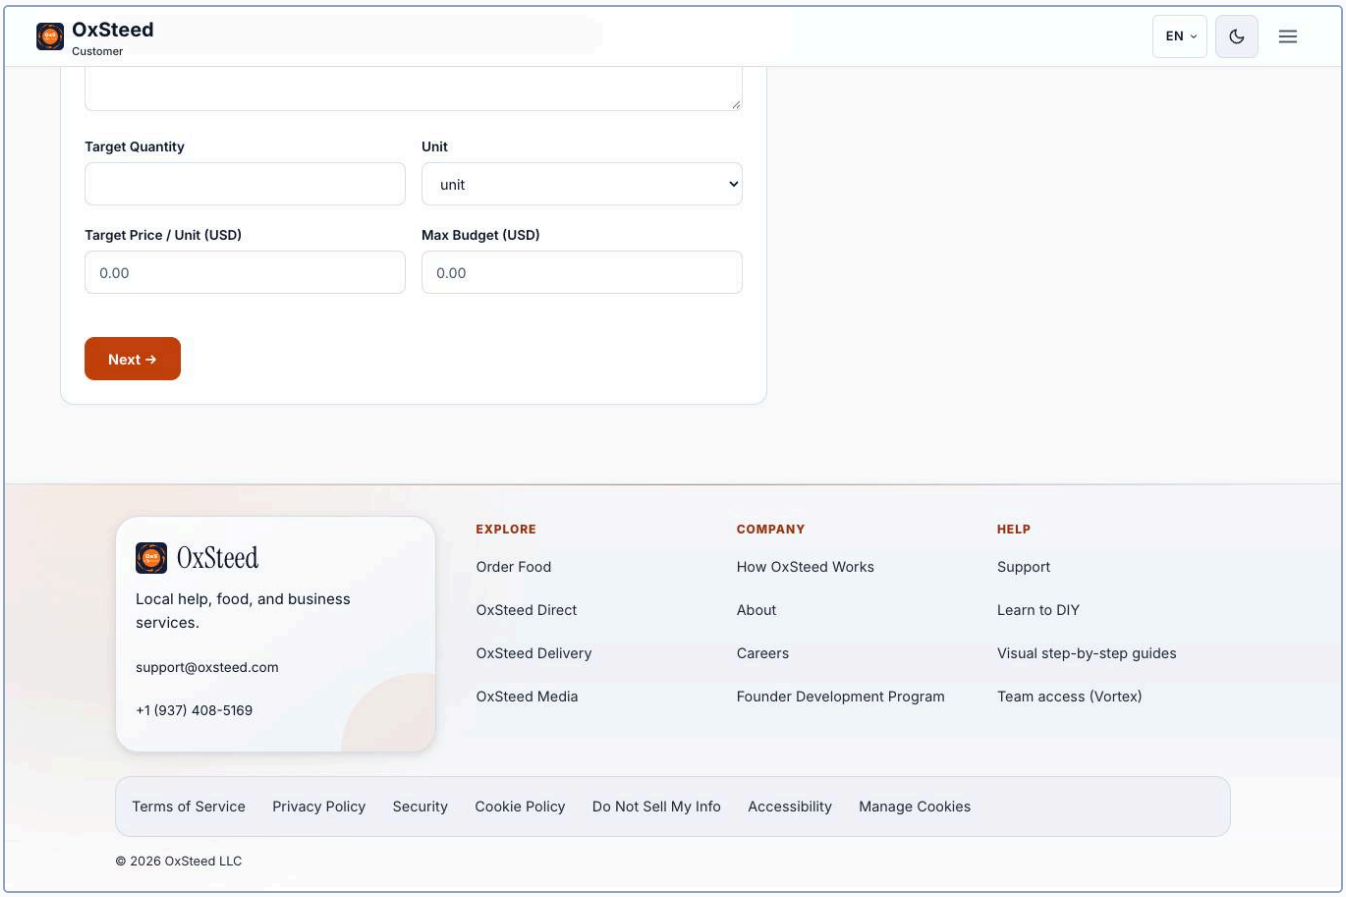

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: New Sourcing Request)*

Step 5: Compare supplier quotes on the request detail

Open your request from the Sourcing table to return to its detail page at /logistics/requests/:id. The "Quotes ({{count}})" section lists each supplier quote with "Quoted qty", "Unit price", "Freight est", and "Lead time" in days. Use "← Back to Sourcing" to return to the table. Accepting a quote and paying happens in the finance and checkout flow (see the accept-quotes guide).

> **Expected result:** You can compare supplier quotes side by side on the request.

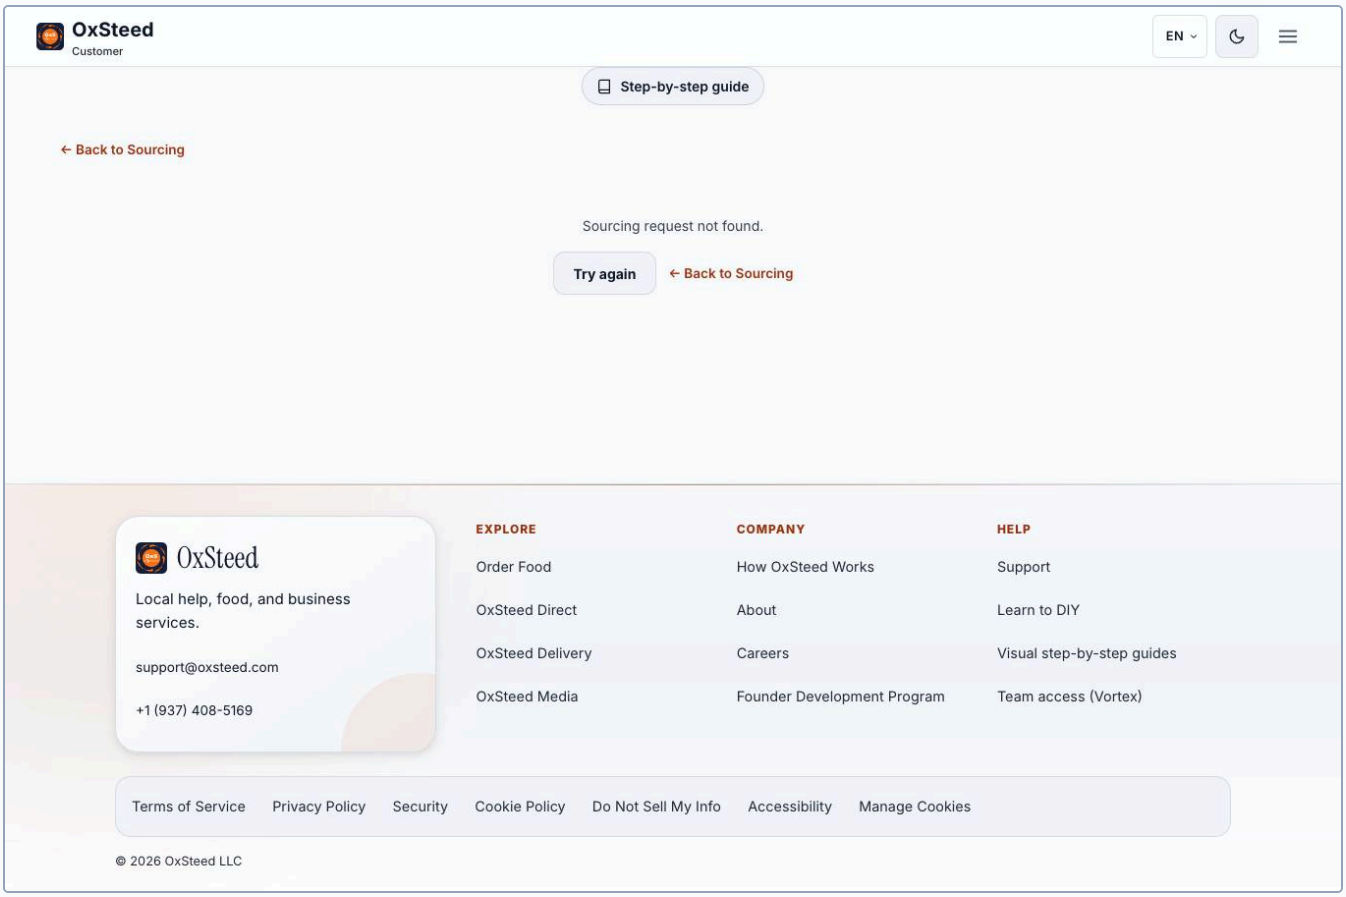

Figure 5. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Request detail page with the quotes table)*

Confirm it worked

Your request appears in the Sourcing table and its detail page lists incoming supplier quotes.

If something goes wrong

Problem	What to do

The request fails to submit.	Go back through the steps and complete every required field. Check your connection and choose "Submit Request" again.
No quotes arrive after a few days.	Check that the lane and destination country are correct, and widen the target price range if it was very tight. Contact support at /support if the request looks stuck.

Need help?

Sourcing or quote questions: contact support from the in-app support page at /support.

Guide ID: logistics-track-shipments | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS **ENGLISH**

Track shipments

Guide ID	**logistics-track-shipments**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (buyer), Logistics participant (organizer)
Availability	**Supported**
Online version	/how-it-works/logistics/track-shipments

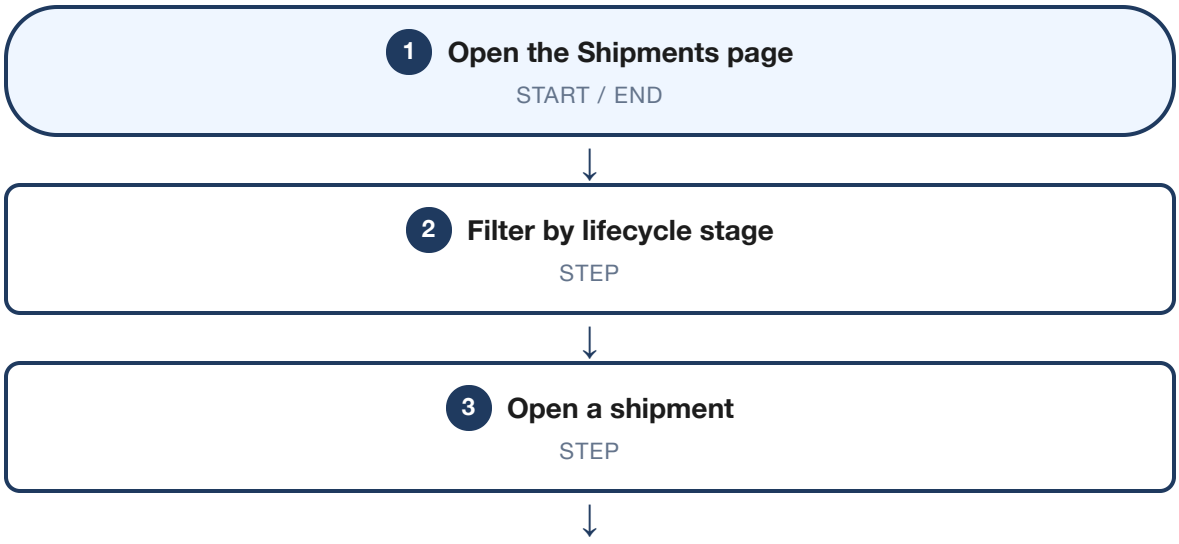

Goal

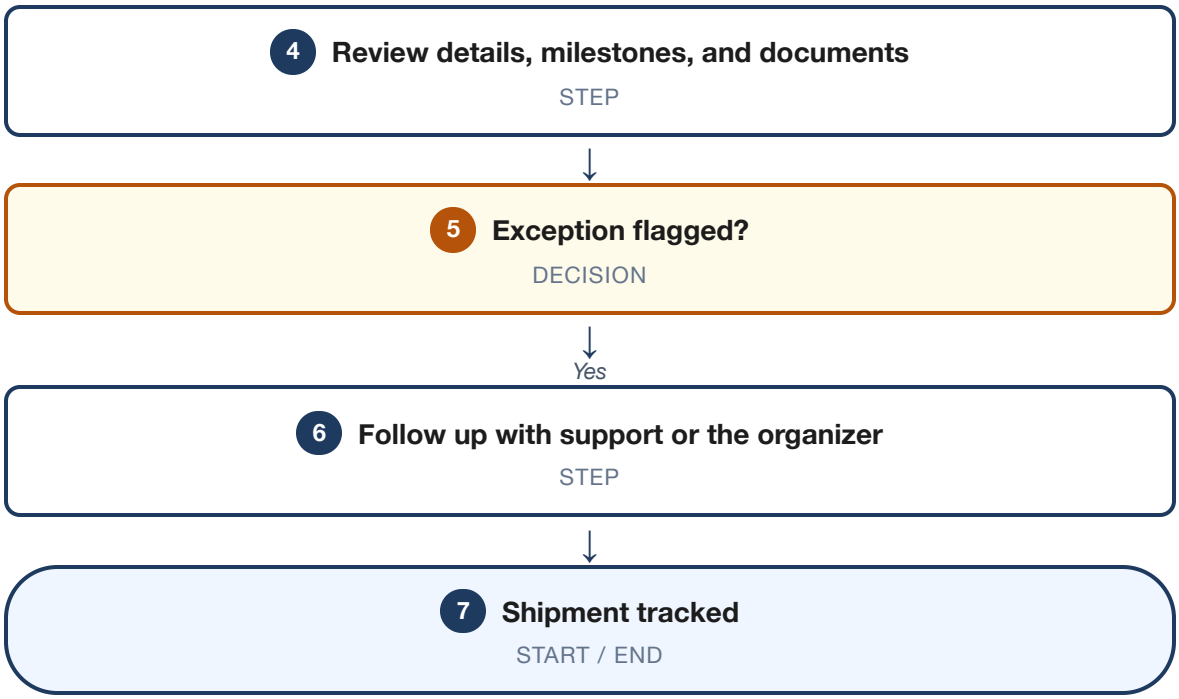

Monitor your logistics shipments, review milestones and documents, and spot exceptions early.

Before you start

1. A signed-in OxSteed account.
2. At least one shipment tied to your orders or campaigns.

Process map

- *No:* Exception flagged? → Shipment tracked

Text version. 1. Open the Shipments page. 2. Filter by lifecycle stage to find the shipment you need. 3. Open the shipment detail page. 4. Review the shipment details, milestones, and documents. 5. If an exception is flagged, follow up with support or your organizer. 6. Otherwise the shipment stays tracked until delivery.

Steps

Step 1: Open the Shipments page

Choose Shipments in the logistics navigation, or open /logistics/shipments directly. The page is titled "Shipments" with the subtitle "Track your goods in transit." The table shows columns Reference, Route, Carrier, Tracking #, Weight, CBM, ETA, and Status. From the Buyer Dashboard you can also use "Back to Buyer workspace" to return.

> **Expected result:** Your shipments appear in the table with carrier, tracking number, ETA, and status.

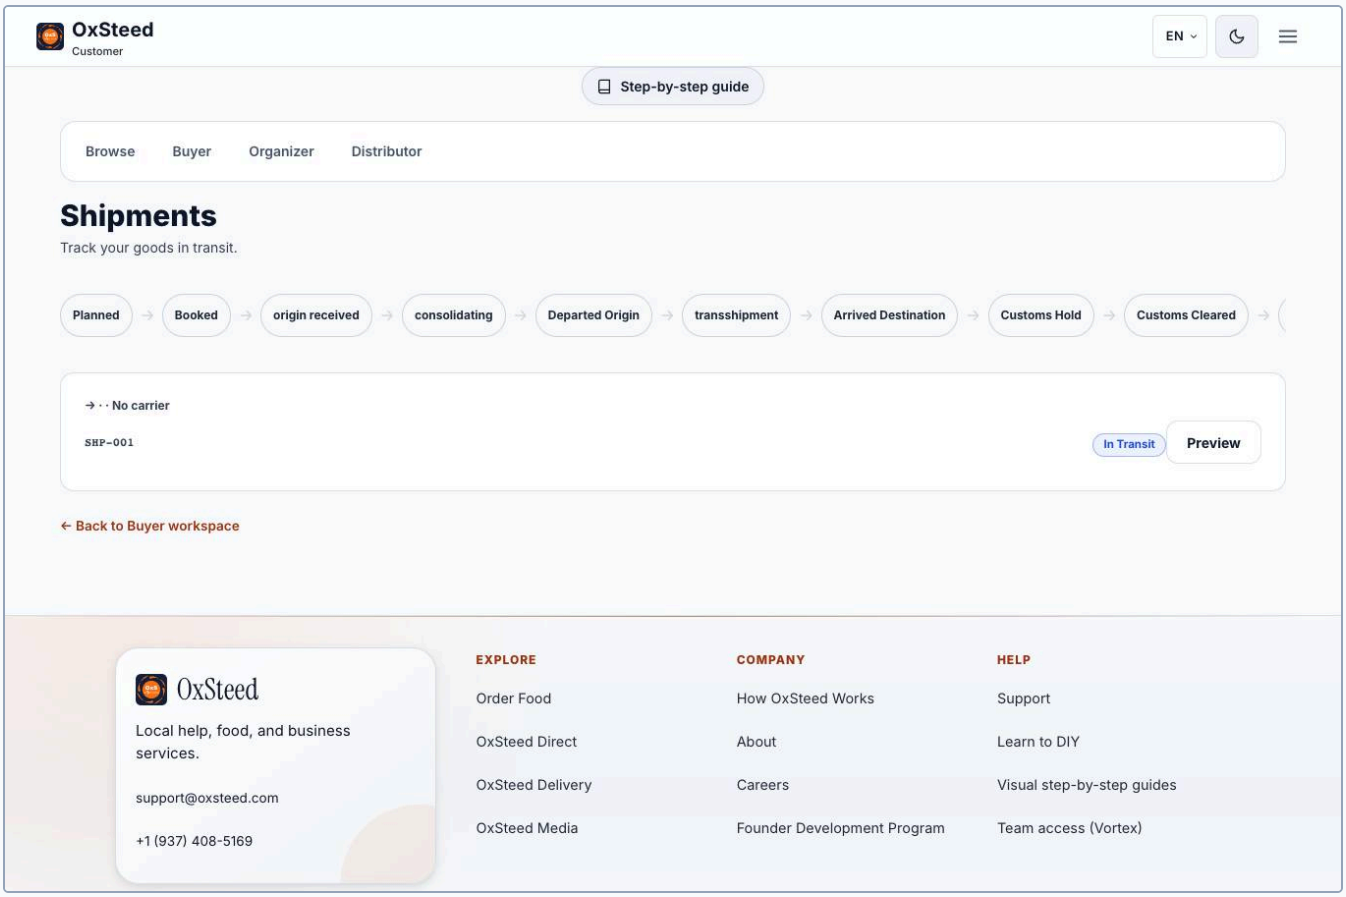

Figure 1. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Shipments)*

Step 2: Filter by lifecycle stage

Use the "Filter by lifecycle stage" dropdown to narrow the list, for example to in-transit or exception shipments. The "All" option clears the filter and shows every shipment.

> **Expected result:** The table shows only shipments in the selected lifecycle stage.

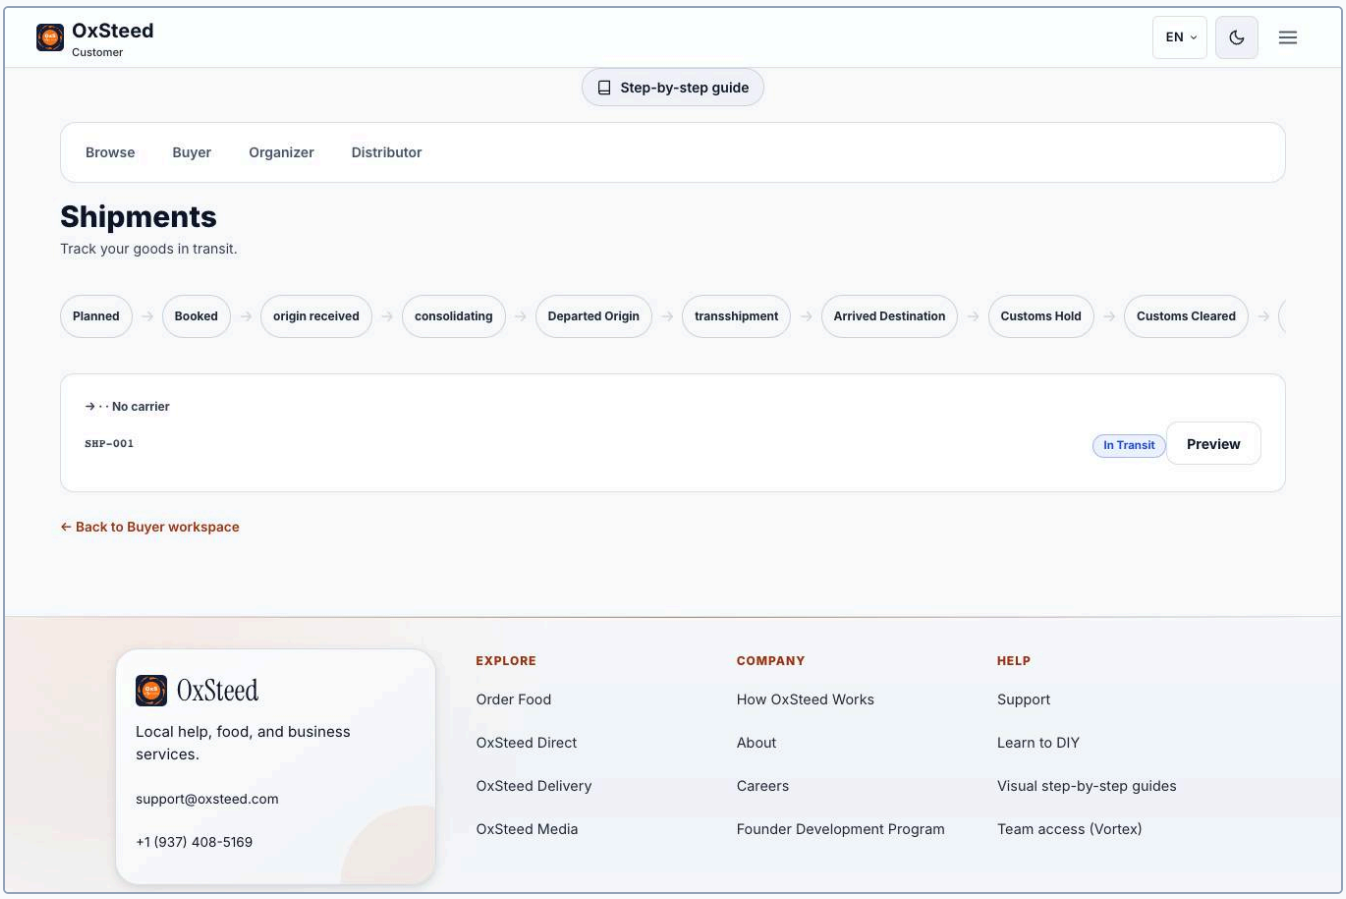

Figure 2. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Shipments)*

Step 3: Open a shipment detail page

Choose the shipment reference to open /logistics/shipments/:id. The "Shipment details" section shows Carrier, Tracking number, Booking ref, Origin port, Destination port, Total cartons, Total weight (kg), Total CBM, and ETA. Use "← Back to Shipments" to return to the list.

> **Expected result:** The shipment detail page loads with carrier, route, and ETA visible.

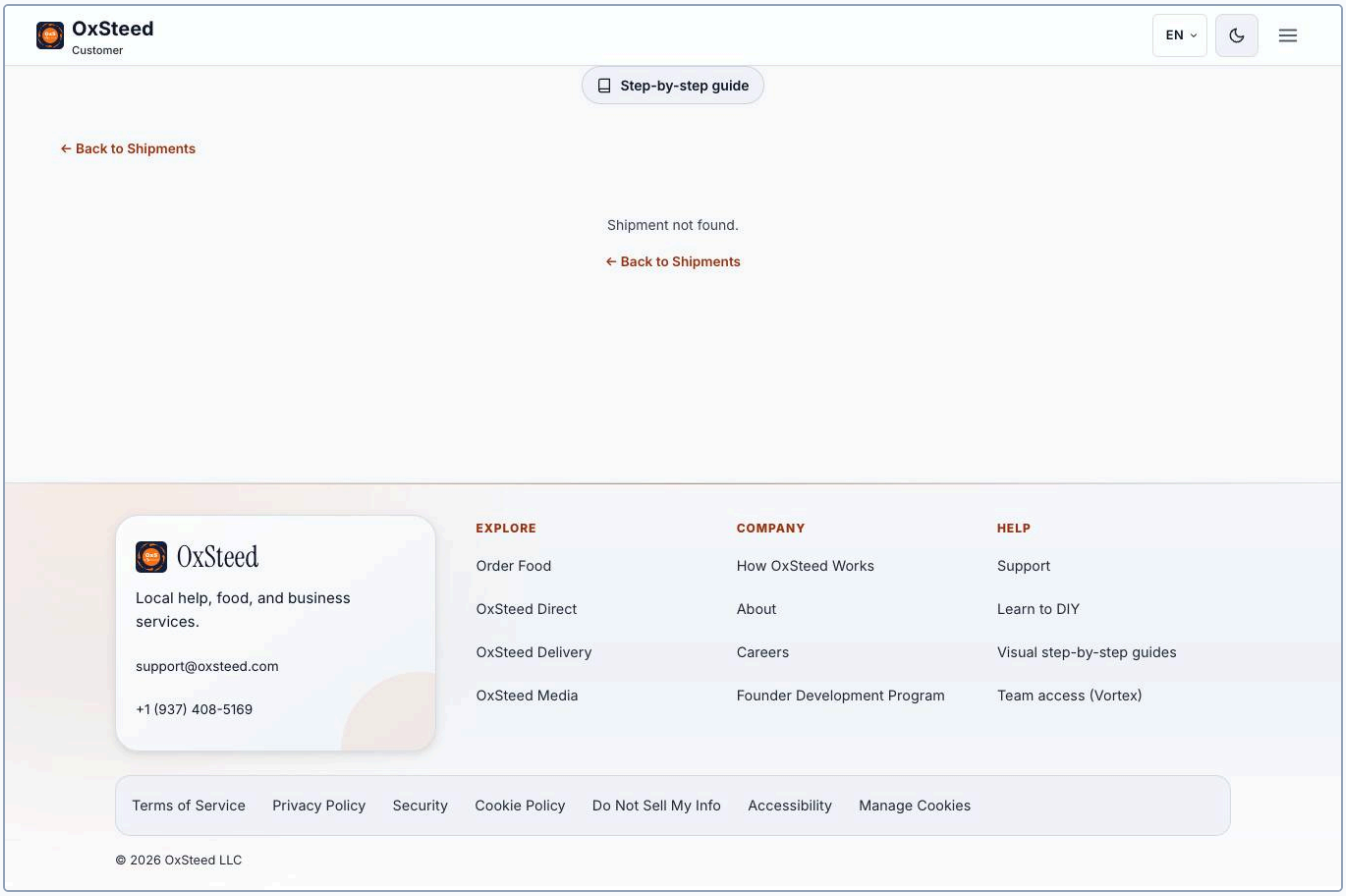

Figure 3. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Shipment details with carrier, ports, and ETA)*

Step 4: Review milestones and documents

Scroll to the "Milestones" section to see recorded movement events with locations and notes. The "Documents ({{count}})" section lists shipping documents; if none exist it shows "No shipping documents uploaded." If a shipment carries an "Exception" status, follow up with support at /support or your campaign organizer before it reaches customs or the warehouse.

> **Expected result:** You can trace the shipment timeline and open its documents.

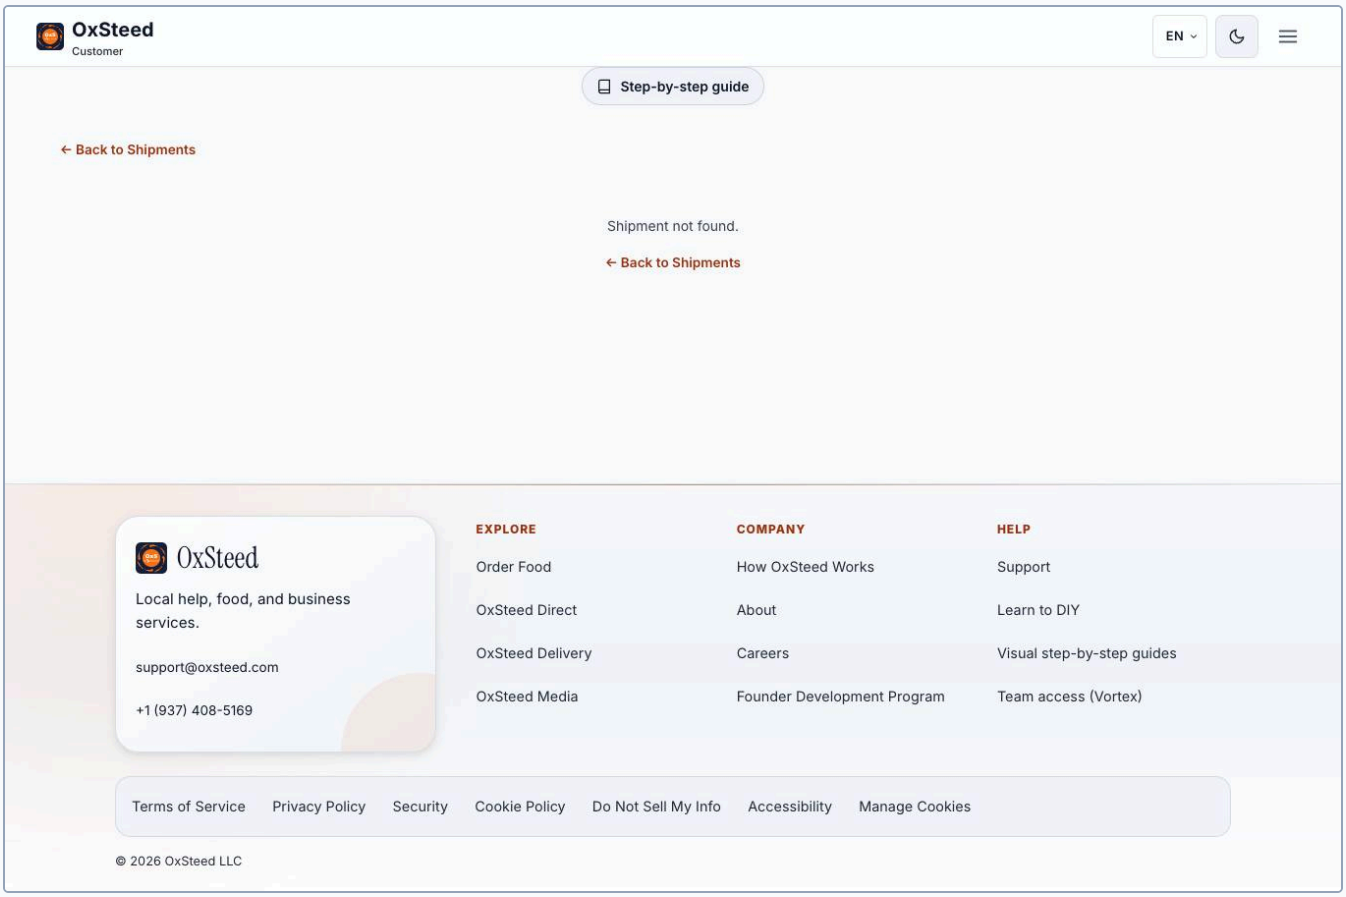

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Milestones timeline and shipping documents)*

Confirm it worked

You can open any shipment and read its milestones, documents, and current status.

If something goes wrong

Problem	What to do

The list shows "No shipments found."	Check the lifecycle filter is set to "All". If still empty, no shipments are tied to your account yet; confirm your campaign reached lock.
Tracking info looks stale or missing.	Milestone and document data is recorded by the carrier feed and operators. Contact support at /support with the shipment reference.

Guide ID: logistics-warehousing | **Revision:** 2 | **Area:** Logistics

SOP LIBRARY / LOGISTICS **ENGLISH**

Manage warehousing and inventory receipts

Guide ID	**logistics-warehousing**
Revision	Revision 2 (generated October 19, 2026)
Intended for	Logistics participant (distributor), Logistics participant (organizer)
Availability	**Supported**
Online version	/how-it-works/logistics/manage-warehousing

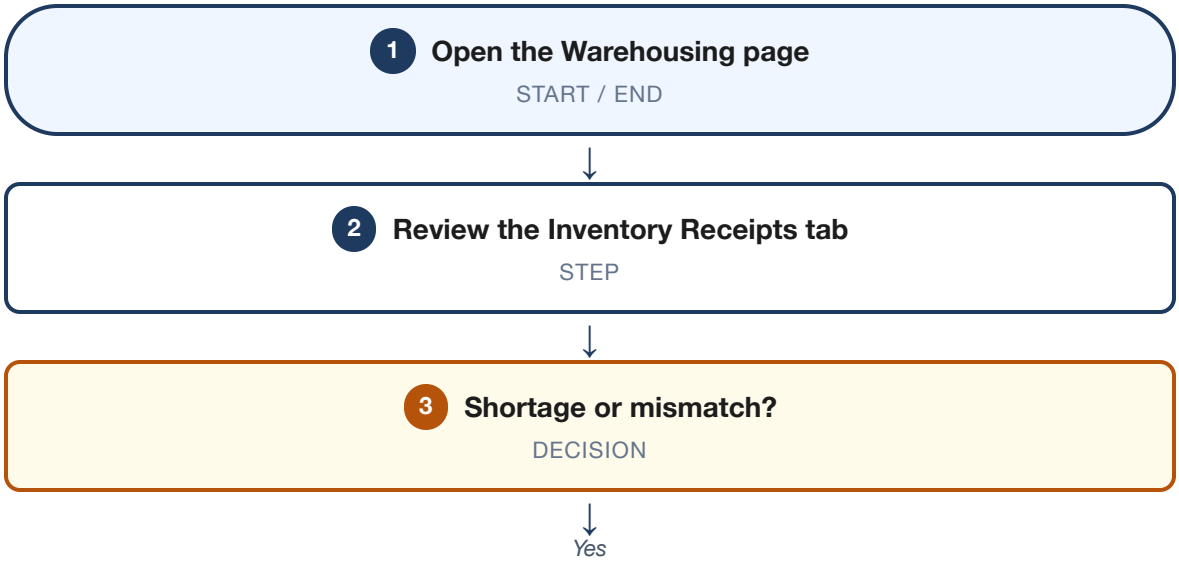

Goal

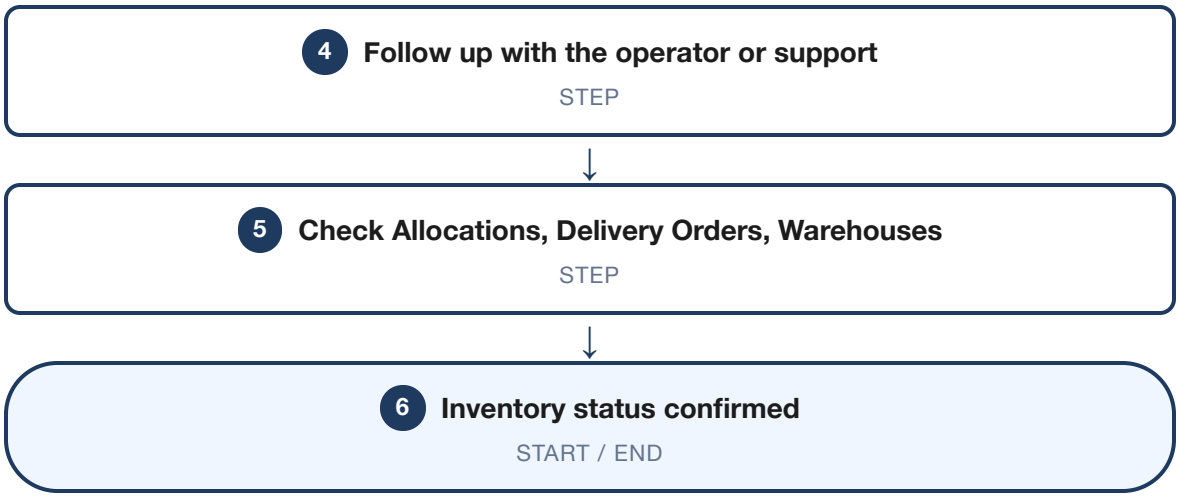

Review inventory receipts, allocations, delivery orders, and warehouses to confirm stock is received and released.

Before you start

1. A signed-in OxSteed account.
2. Stock moving through your campaigns or orders.

Process map

- *No:* Shortage or mismatch? → Check Allocations, Delivery Orders, Warehouses

Text version. 1. Open the Warehousing page. 2. Review the "Inventory Receipts" tab: expected vs received quantities, shortages, and status per receipt. The page is read-only; receiving and reconciliation are performed by operators, and you monitor status here. 3. If a receipt shows a shortage or mismatch, follow up with the operator or support. 4. Check the "Allocations", "Delivery Orders", and "Warehouses" tabs for downstream and upstream status. 5. Confirm the inventory position is correct.

Steps

Step 1: Open the Warehousing page

Choose Warehousing in the logistics navigation, or open /logistics/warehousing directly. The page is titled "Warehousing" with the subtitle "Receive, reconcile, allocate, and release inventory to buyers." Four tabs sit in the tab list ("Warehousing views"): "Inventory Receipts", "Allocations", "Delivery Orders", and "Warehouses".

> **Expected result:** The Warehousing page loads with the Inventory Receipts tab selected.

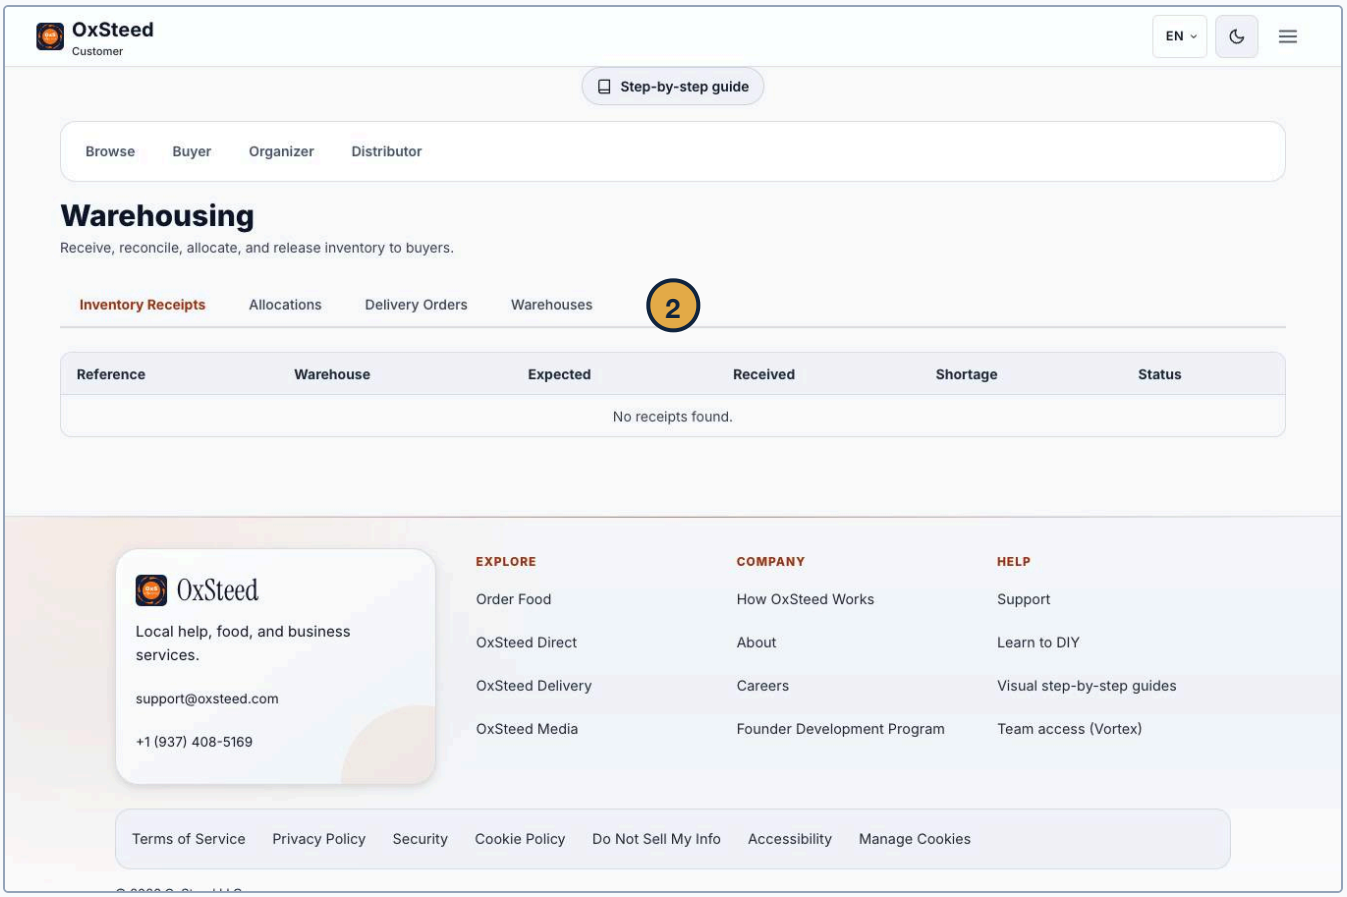

Figure 1. The Warehousing page, desktop view. *(Image description: Synthetic example: Warehousing)*

1. **2.** Tab list

Step 2: Review inventory receipts

On the "Inventory Receipts" tab, the table shows columns Reference, Warehouse, Expected, Received, Shortage, and Status. A fully received row has received equal to expected; a short row flags a shortage. Note: this page has no Receive or Reconcile buttons; receiving is recorded by operators and you monitor it here. If data fails to load, the page shows "Data unavailable" with a "Try again" button.

> **Expected result:** You can read expected, received, shortage, and status for each receipt.

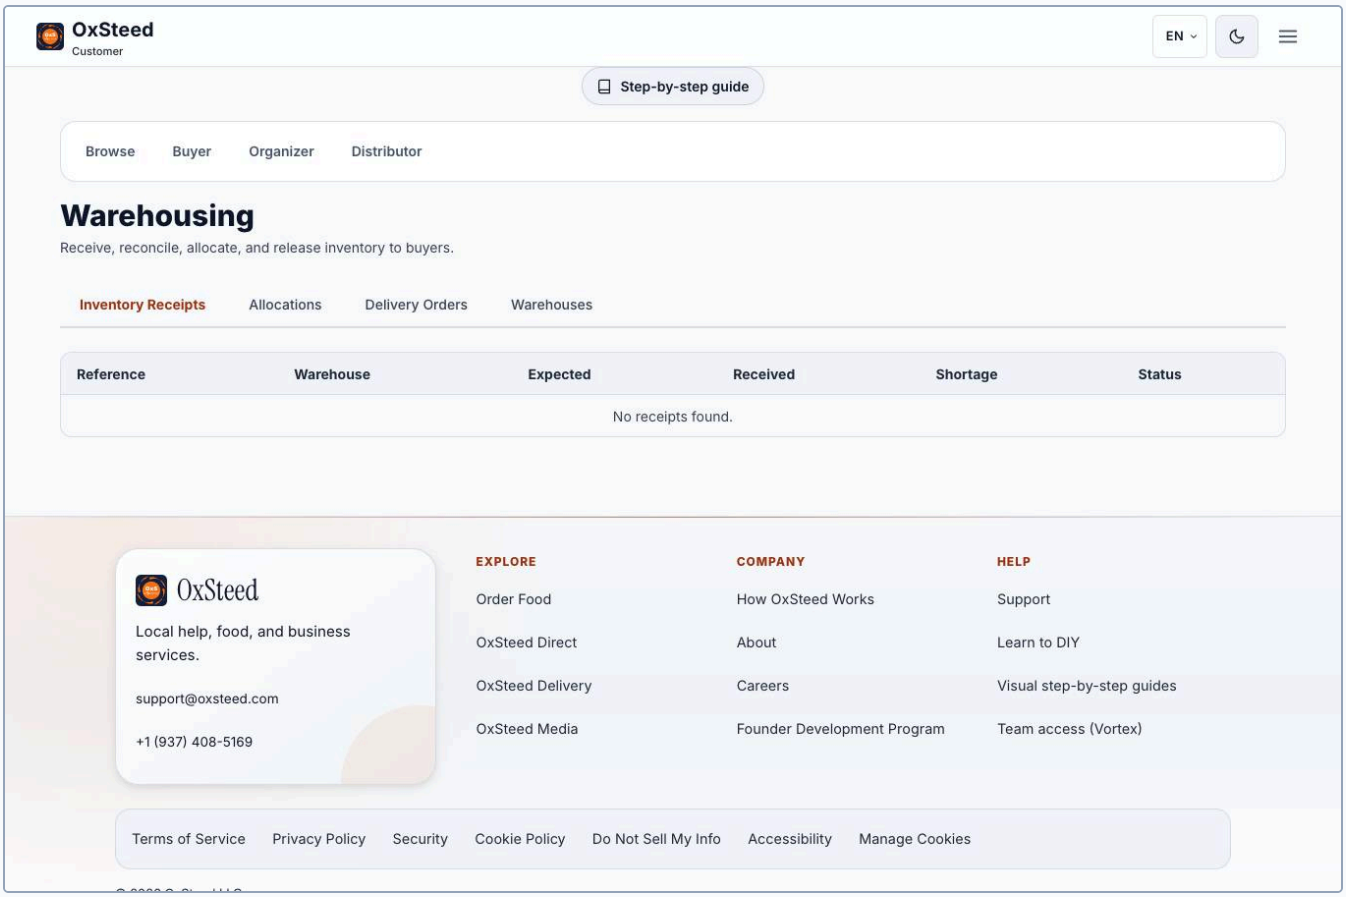

Figure 2. Inventory receipts, desktop view. *(Image description: Synthetic example: Warehousing)*

Step 3: Check allocations and delivery orders

Choose the "Allocations" tab to see buyer allocations with Buyer, Qty, Release Method, and Released columns. Choose "Delivery Orders" for outbound delivery status. These views are also read-only here; release and delivery actions live on the Distribution board.

> **Expected result:** You can confirm which allocations are released and where deliveries stand.

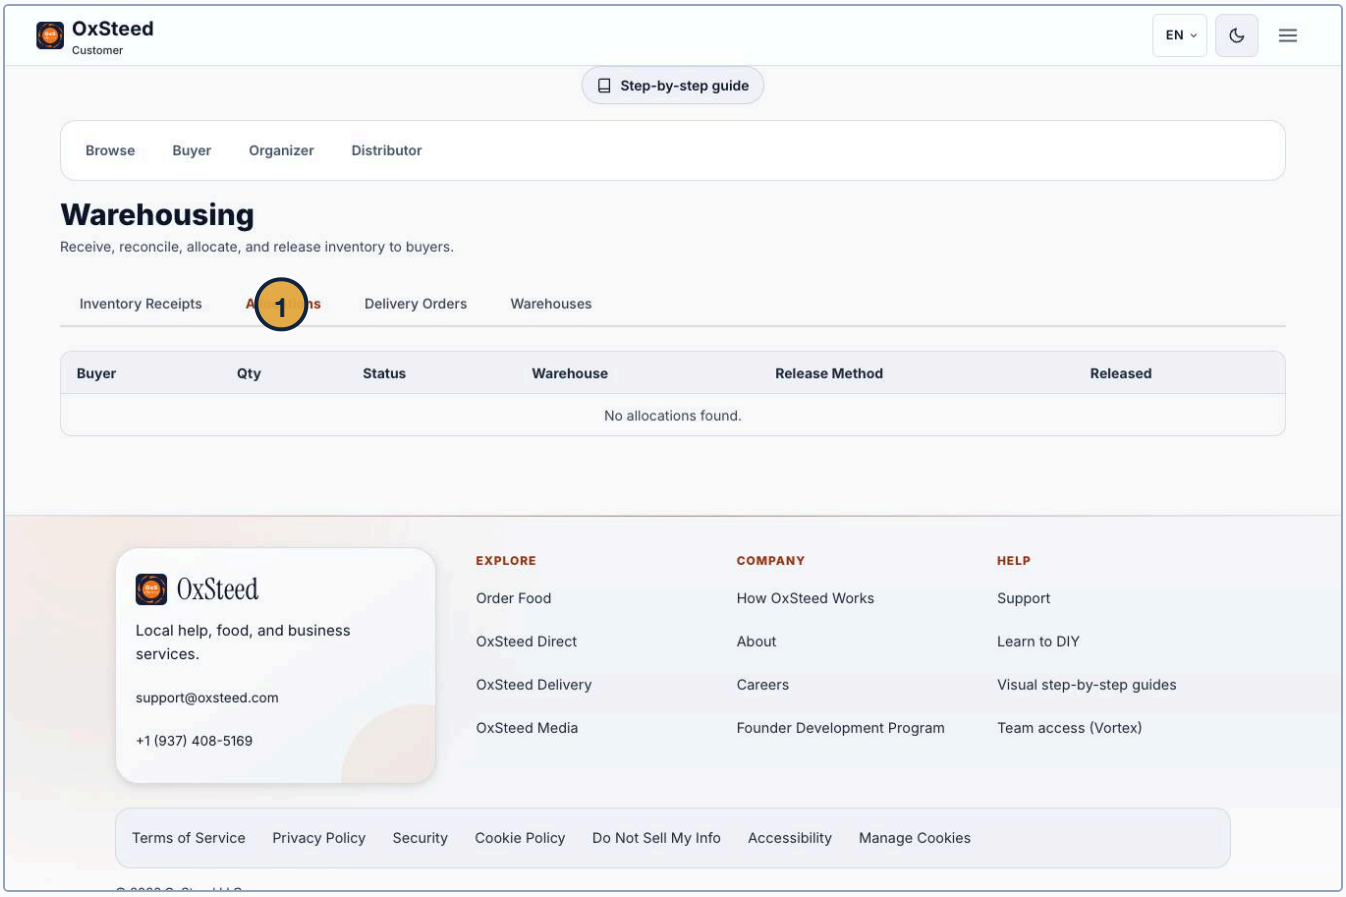

Figure 3. Allocations, desktop view. *(Image description: Synthetic example: Warehousing)*

1. **1.** Allocations tab selected

Step 4: Review the warehouses list

Choose the "Warehouses" tab to see the warehouses involved in your supply chain, including bonded status where shown. If a tab shows "No receipts found", "No allocations found", "No delivery orders found", or "No warehouses found", there is simply no data for that view yet.

> **Expected result:** You can see the warehouse list for your supply chain.

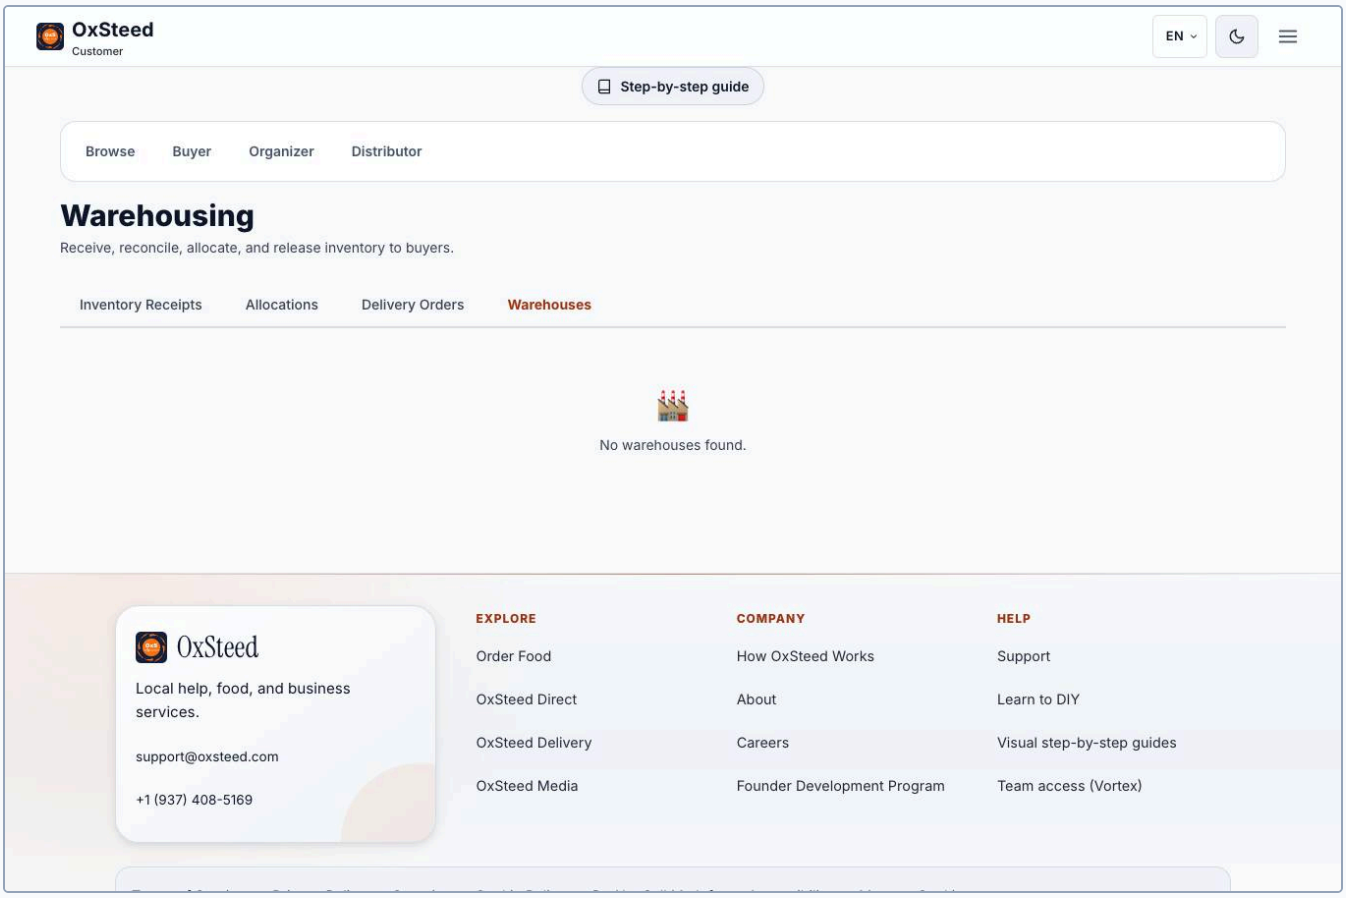

Figure 4. Screen overview. Some controls described in this step are not shown in this synthetic example. *(Image description: Synthetic example: Warehousing)*

Confirm it worked

Each tab shows current data: receipts with expected vs received, allocations with release status, and the warehouse list.

If something goes wrong

Problem	What to do

A receipt shows a shortage that does not match reality.	Contact the warehouse operator or support at /support with the receipt reference; reconciliation is operator-performed.
A tab shows "No receipts found."	No inventory has been received against your account yet. Confirm upstream shipments reached the warehouse.

Need help?

Warehousing or receipt questions: contact support from the in-app support page at /support.
