SOP LIBRARY / BUSINESS **ENGLISH**

Set up a business (launch request, onboarding, franchise)

Guide ID	**business-work-setup**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Business owner
Availability	**Supported**
Online version	/how-it-works/business-work/set-up-a-business

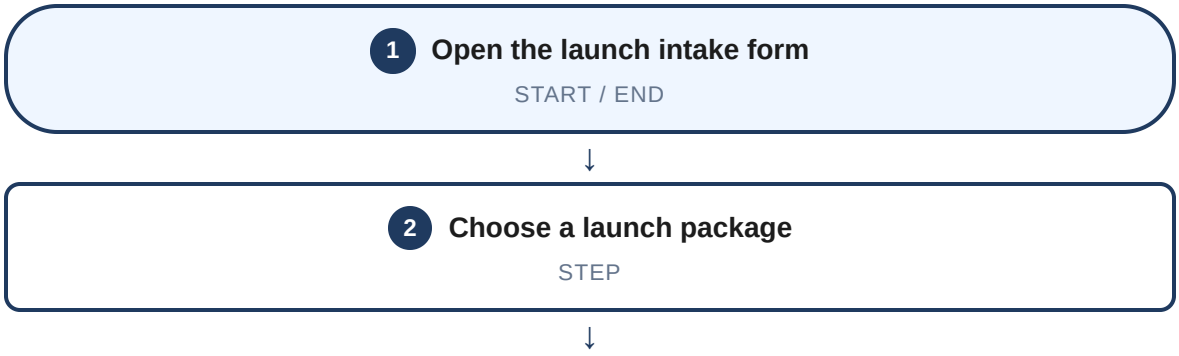

Goal

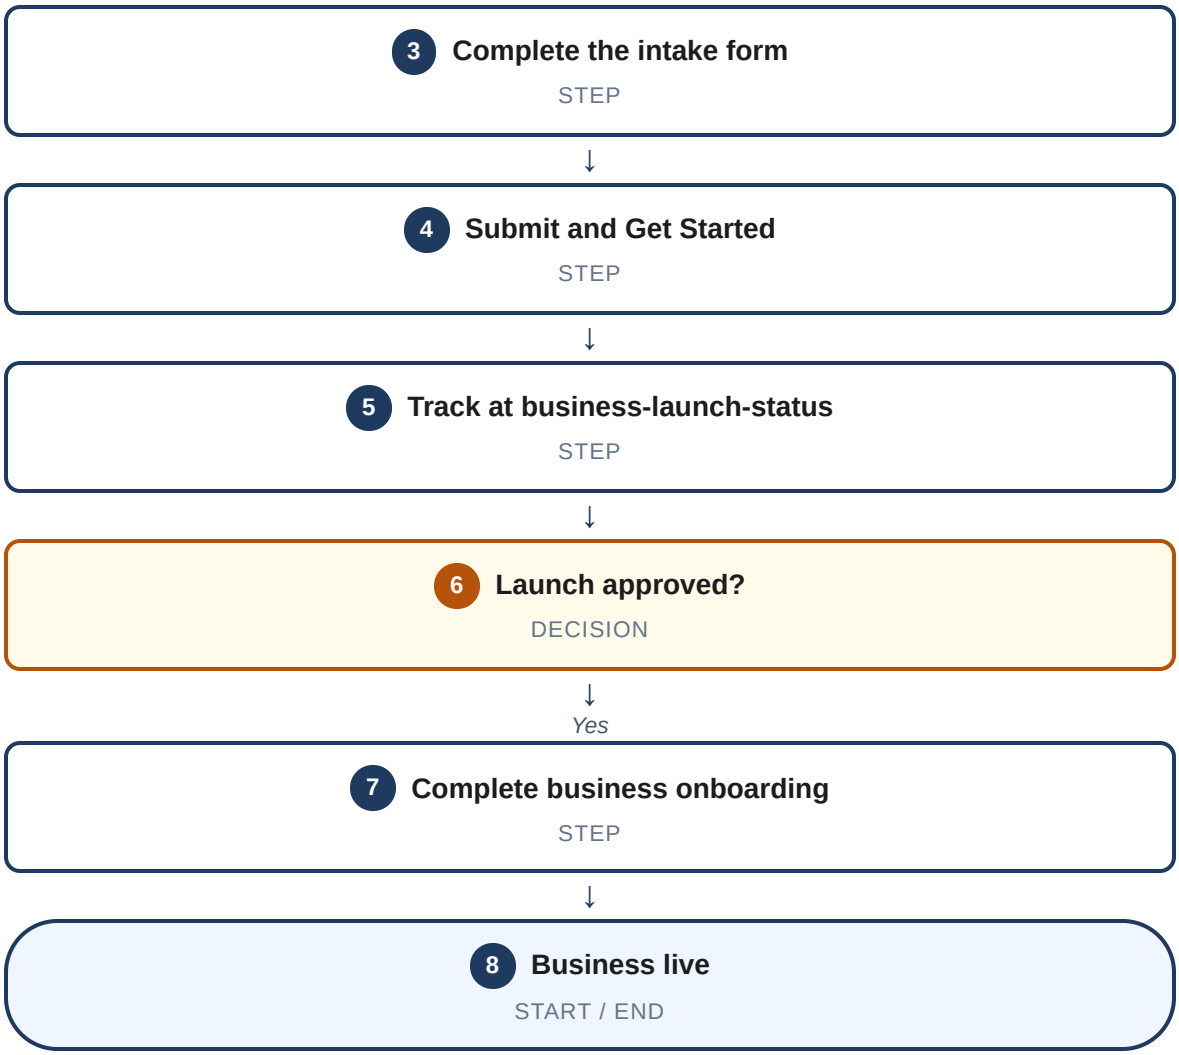

Submit a business launch request, track its progress, and finish onboarding once approved.

Before you start

1. Know your skill or service, your target market, and whether you have a business name.
2. An OxSteed account so your request can be linked to you.

Process map

- *Not yet:* Launch approved? → Complete kickoff steps from the status page
- Complete kickoff steps from the status page → Track at business-launch-status

Text version. 1. Open the launch intake form. 2. Choose a launch package. 3. Complete the intake form steps. 4. Choose Submit and Get Started. 5. Track your request at the launch status page with your email. 6. If the launch is not approved yet, complete the kickoff steps shown on the status page and check back. 7. When approved, complete business onboarding. 8. Your business is live and you can open the business hub.

Steps

Step 1: Open the launch intake form

Open /consulting-intake. This is the public business launch intake: the submit endpoint is rate-limited and open to guests, while status views need you signed in. Launch requests go through a request and approval flow, not instant provisioning.

> **Expected result:** The intake form opens at the package selection step.

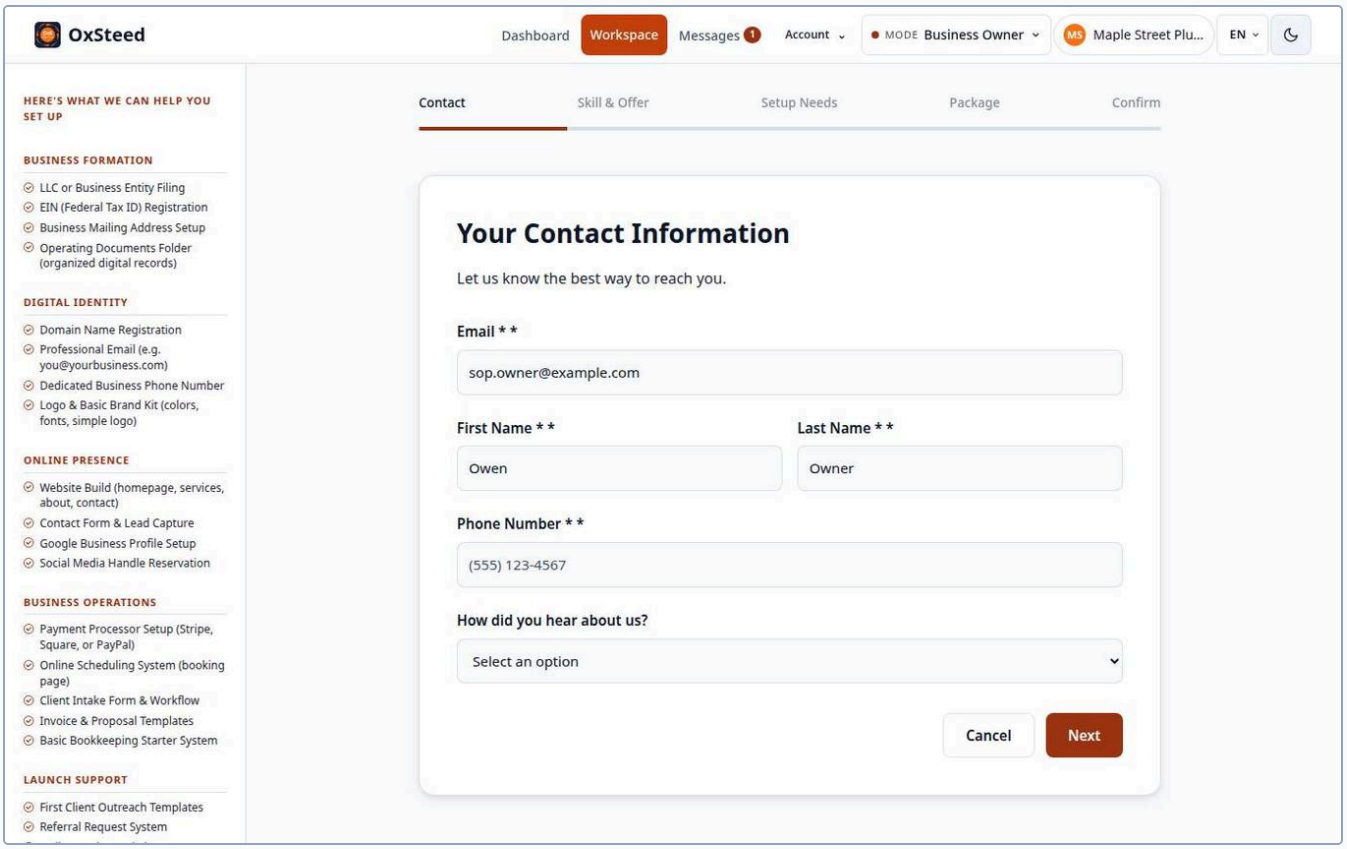

Figure 1. The launch intake form, desktop view. *(Image description: Launch intake form showing the launch package options)*

Step 2: Complete the intake steps

Choose a package, then step through the form with Next and Back: your contact details (Email, First Name, Last Name, Phone Number), your skill or service ("What is your primary skill or service?"), your target market, revenue status, business name ideas, country, business phase, and urgency. The final step shows a review.

> **Expected result:** The review step shows your full intake summary with no missing required fields.

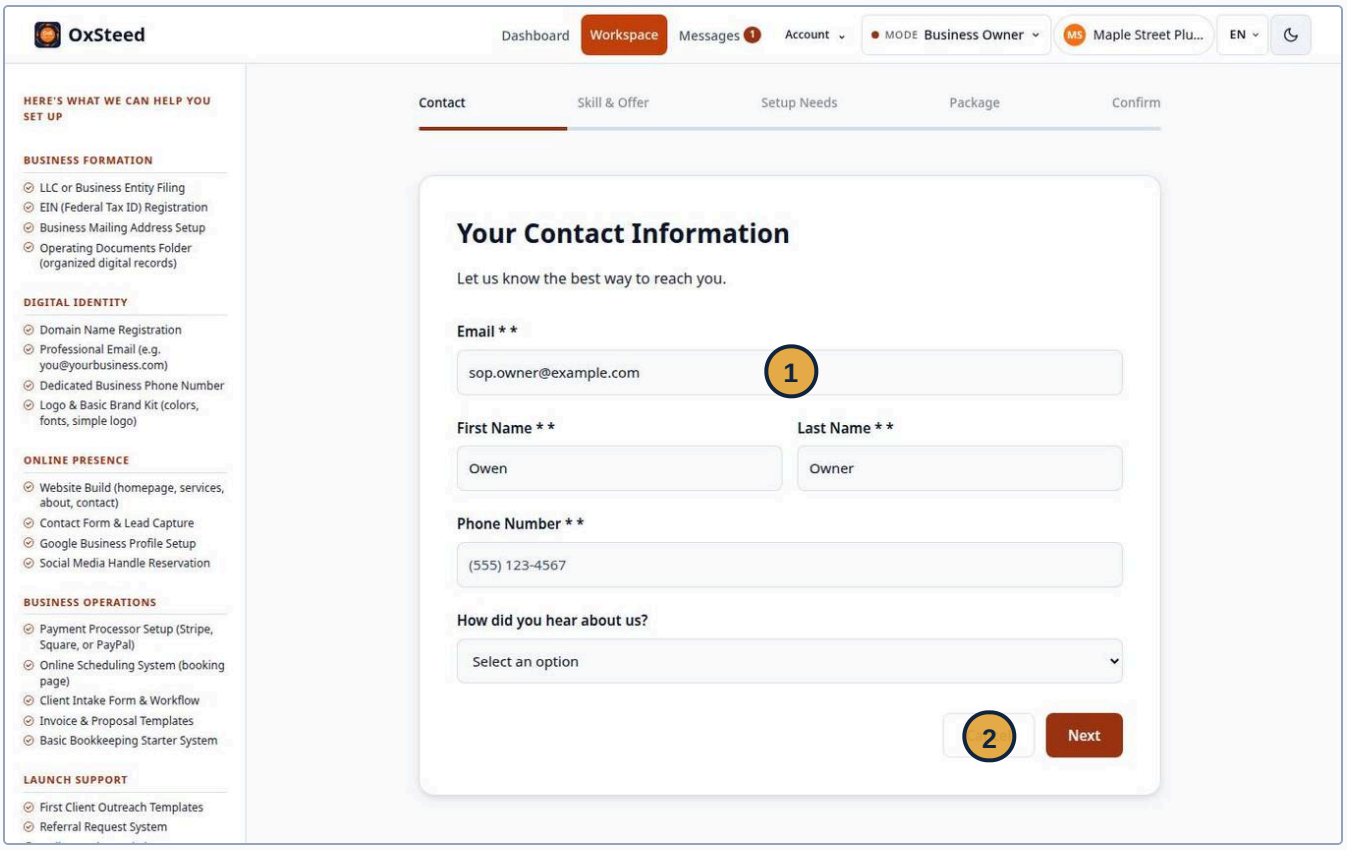

Figure 2. Completing the intake, desktop view. *(Image description: Intake form business details step with skill, market, and business name fields)*

1. **1.** Skill and market fields
2. **2.** Next button

Step 3: Submit and get started

On the review step, choose Submit and Get Started. The button shows Submitting while your request posts. You will get a confirmation with what happens next.

> **Expected result:** A confirmation page appears with your next steps.

1. **1.** Submit and Get Started button

Step 4: Track your launch request

Open /business-launch-status ("Track Your Business Launch"). Enter the email you used on the intake and choose Check Status. Your request card shows Launch progress, the current phase out of 25, and a "What is Next?" list. Choose View details for the full intake and timeline.

> **Expected result:** Your request appears with its current phase and next steps.

State: Launch status page with synthetic request, light mode

Step 5: Complete business onboarding or the franchise track

When your launch is approved, complete onboarding at /business/:businessId/onboarding. If you are applying for a franchise instead, use /franchise/apply and track it at /franchise/status. After onboarding, open the business hub to manage your business.

> **Expected result:** Onboarding completes and your business appears in the business hub.

Confirm it worked

Your business appears in the business hub at /business-hub and you can open its workspace.

If something goes wrong

Problem	What to do
The status page says no intake forms found for your email.	Check you typed the same email used on the intake form. If you submitted as a guest, try the exact address again.

Your request stays pending for days.	The team reviews submissions usually within 24 hours and reaches out by email. Check your inbox and spam for the scheduling link and pre-kickoff questionnaire.

Need help?

If your approved business never appears in the hub, contact OxSteed Support from the /support page.
