Download statement exports

Guide ID	**financial-downloads**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-downloads

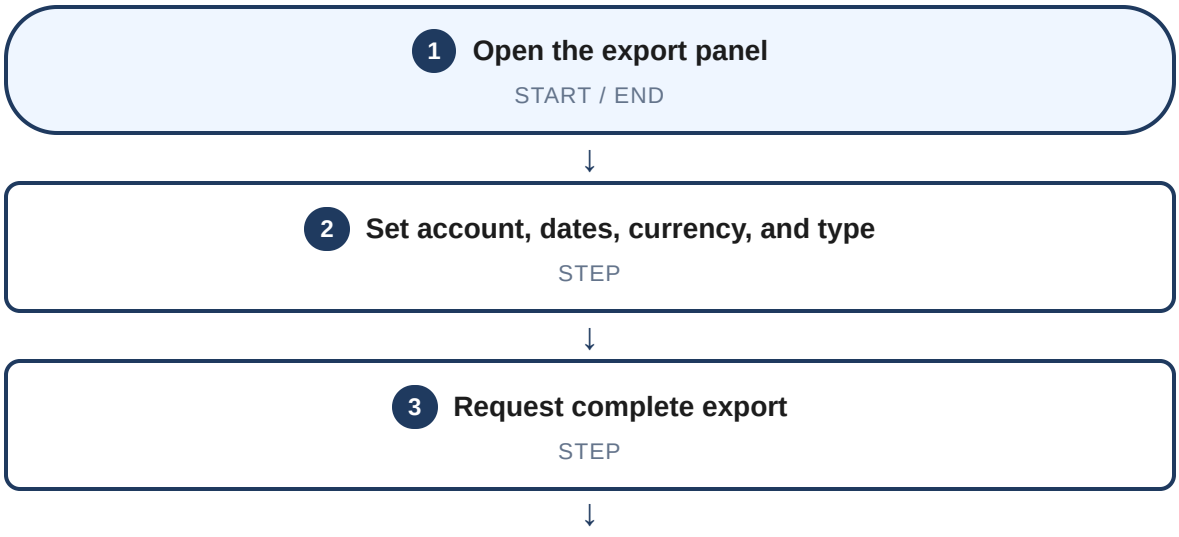

Goal

Export statement data as CSV or PDF for accounting, audits, or taxes.

Before you start

1. Sign in to your OxSteed account.
2. Know the account, date range, and format you need.

Process map

Text version. Open the export panel from a statement archive ("Request complete export") or at /statements/exports/:jobId. Set the "Account", "From", "To", "Currency", and "Type" fields, then submit the export. The export runs as a tracked job; you can cancel it with "Cancel export" or retry it with "Retry export". When it completes, the "Export files" list shows each file with its rows; download them, or open "View export history" for past jobs.

Steps

Step 1: Open the export panel

From a statement archive, expand the export section and choose "Request complete export". You can also track a specific job at /statements/exports/:jobId. The panel heading reads "Request complete export".

> **Expected result:** The export form loads with the account and period fields.

1. **1.** Export heading

Step 2: Set the export parameters and submit

Choose the "Account", the "From" and "To" dates, the "Currency" (3-letter code), and the "Type" (format), then choose "Request complete export". For several accounts at once, use the bulk section: check the accounts, pick the "Type", and start the bulk export.

> **Expected result:** The export job starts and shows its pending state.

Step 3: Track the job and download the files

The job shows its state: pending, complete, failed, or cancelled. While it runs you can use "Cancel export"; if it fails and "Retry export" is offered, use it. When complete, the "Export files" section lists each file ("Download CSV · part", with the row range). Use "View export history" for past jobs.

> **Expected result:** The export files download to your device.

Confirm it worked

The export files are on your device and the history lists the completed job.

If something goes wrong

Problem	What to do
The export fails.	You see "Your export could not be completed." Use "Retry export" if offered, or narrow the date range and request again.

The job is still running.	Large date ranges take longer. You can "Cancel export" and re-request a smaller range, or check "View export history" later.

Need help?

For export issues, use the in-app support page at /support.
