## Goal

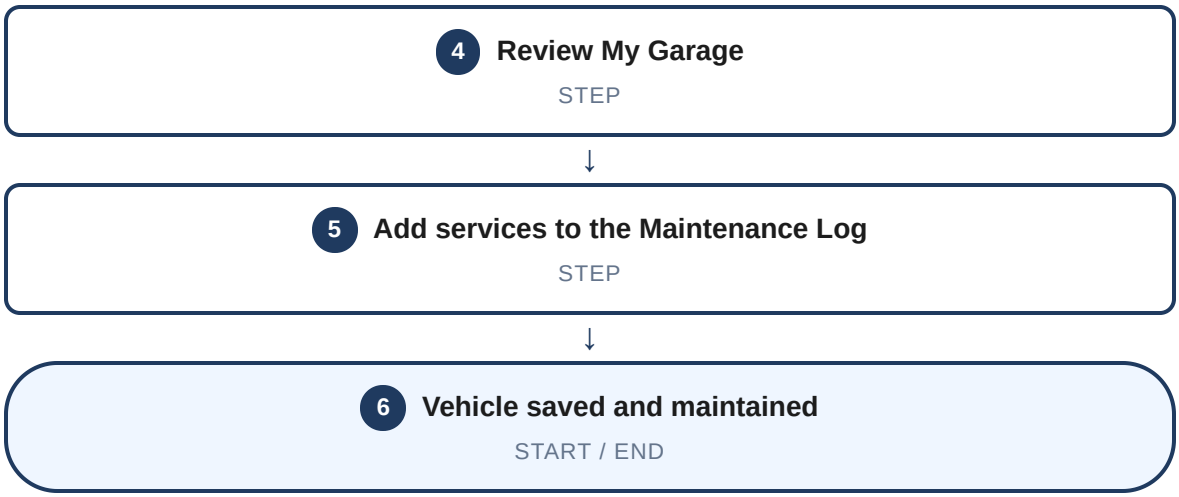

Save vehicles to your garage with NHTSA-verified data and track their maintenance.

## Before you start

1. A signed-in OxSteed account.

## Process map

**Text version.** 1. Open /car-care, titled "Car Care" with the description "Search and save your vehicles. Data from the U.S. NHTSA vPIC API". 2. Find your vehicle: scan or enter the 17-character VIN, or pick Make ("Make (e.g. Toyota)"), Model, and Year. 3. Choose "+ Add to My Garage" ("Vehicle added!" on success; "NHTSA verified" marks verified data). 4. Review "My Garage": edit with "Edit" or remove with "Remove". 5. Use "Maintenance Log" and "+ Add Service" to track services with recurrence.

## Steps

### Step 1: Open Car Care and search for your vehicle

Open /car-care while signed in. The page is titled "Car Care" with the description "Search and save your vehicles. Data from the U.S. NHTSA vPIC API - free government data, always up to date." Use "Scan / Enter VIN" with the 17-character VIN field ("Enter 17-character VIN"), or pick "Make" ("Make (e.g. Toyota)"), "Model", and "Year" from the dropdowns.

**Expected result:** Your vehicle details appear, decoded from NHTSA data.

**Screenshot planned**

Screen: **/car-care**
State: Car Care search with vehicle found, signed in, light mode

## Step 2: Add the vehicle to your garage

Choose "Decode" for a VIN lookup, or fill in Make, Model, Year, and the optional "Nickname". Choose "+ Add to My Garage" (or "+ Add to Garage" from a VIN result). On success you see "Vehicle added!". NHTSA-verified vehicles show the "NHTSA verified" badge.

> **Expected result:** The vehicle appears under "My Garage".

**Screenshot planned**

Screen: **/car-care**
State: Vehicle ready to add, light mode

## Step 3: Manage My Garage

Under "My Garage", each vehicle shows its details and notes ("Notes" are private: "Shop name, current mileage, etc."). Choose "Edit" to change details ("Edit Vehicle", then "Save Changes"), or "Remove" to delete it ("Remove {{name}} from your garage?" with "Keep It" and "Remove" options).

> **Expected result:** Your garage reflects the current vehicle list and notes.

**Screenshot planned**

Screen: **/car-care**
State: My Garage with saved vehicles, light mode

### Step 4: Track maintenance

Use the "Maintenance Log" to record services. Choose "+ Add Service" to open the "Add Car Service" dialog: pick the vehicle ("Vehicle (optional)", or "All vehicles / unspecified"), enter the "Service Name", and set recurrence (weekly, biweekly, monthly, quarterly, every 6 mo, annually, or every N days). Overdue and upcoming services show under "Overdue", "This Week", and "Total Pending".

> **Expected result:** The service is logged and shows in the maintenance schedule.

**Screenshot planned**

Screen: **/car-care**
State: Maintenance Log with services, light mode

## Confirm it worked

Your vehicle is listed in "My Garage" and its services appear in the "Maintenance Log".

## If something goes wrong

| Problem | What to do |
|---|---|
| You see "Failed to add vehicle." | Check the VIN is 17 characters or that make and model are selected, then try again. |
| Your vehicle is not in the NHTSA data. | Enter the make, model, and year manually instead of using VIN decode. |
