Guide ID: account-mode-switching | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Switch between customer, helper, business and other modes

Guide ID	**account-mode-switching**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/switch-modes

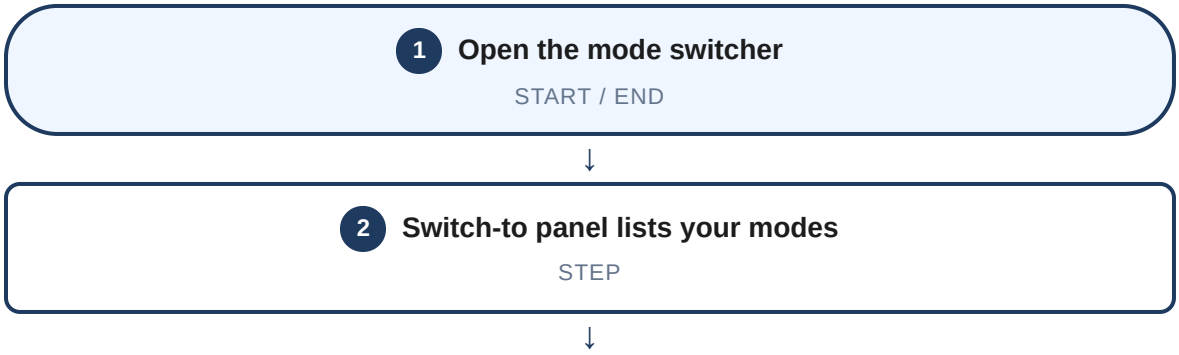

Goal

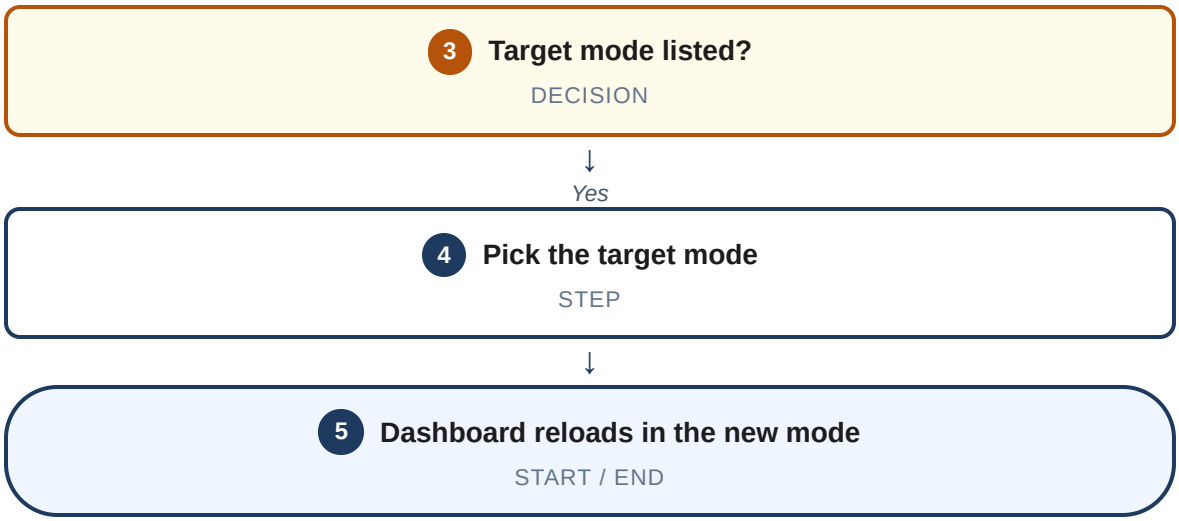

Switch between the modes you belong to (Customer, Helper, Business Owner and granted team modes) without signing out.

Before you start

1. Be signed in to your OxSteed account.
2. Granted modes (business team roles) require a workspace invitation; they do not appear until you accept it.

Process map

- *No:* Target mode listed? → Request or accept a workspace invitation
- *After grant accepted:* Request or accept a workspace invitation → Switch-to panel lists your modes

Text version. 1. In the top navigation, choose the mode button that shows "Mode" and your current mode. 2. The "Switch to" panel lists every mode available to you; your current mode carries a "Current" badge. 3. Choose the mode you want. The button briefly shows "Switching..." and a "Switched to" toast confirms it. 4. Your dashboard reloads for the new mode. If a mode is missing, it is granted by a workspace owner; accept the invitation first.

Steps

Step 1: Open the mode switcher in the navigation

Find the mode switcher button in the top navigation: it shows the label "Mode" with your current mode name next to a colored dot. Choose it to open the switcher panel.

> **Expected result:** The "Switch to" panel opens beneath the button.

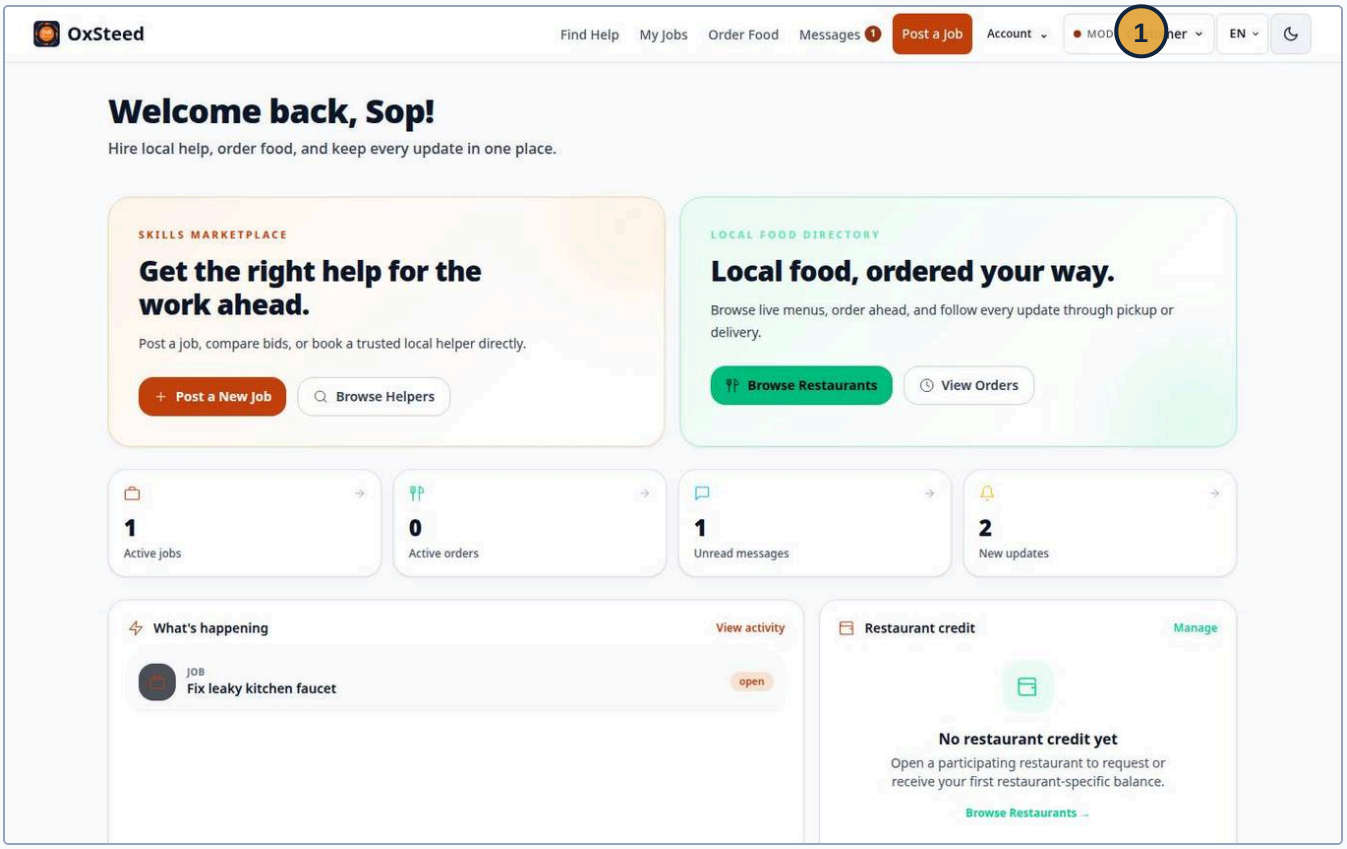

Figure 1. The mode switcher in the top navigation. *(Image description: Top navigation with the mode switcher button highlighted)*

1. **1.** Mode switcher button

Step 2: Pick the mode you want to use

The panel is titled "Switch to" and lists your available modes: self-selectable modes such as Customer, Helper, and Business Owner, plus any granted modes (business team roles) a workspace owner gave you. Your current mode shows a "Current" badge and is disabled. Choose the target mode row; it briefly shows "Switching...".

> **Expected result:** A "Switched to" toast confirms the change and the dashboard reloads.

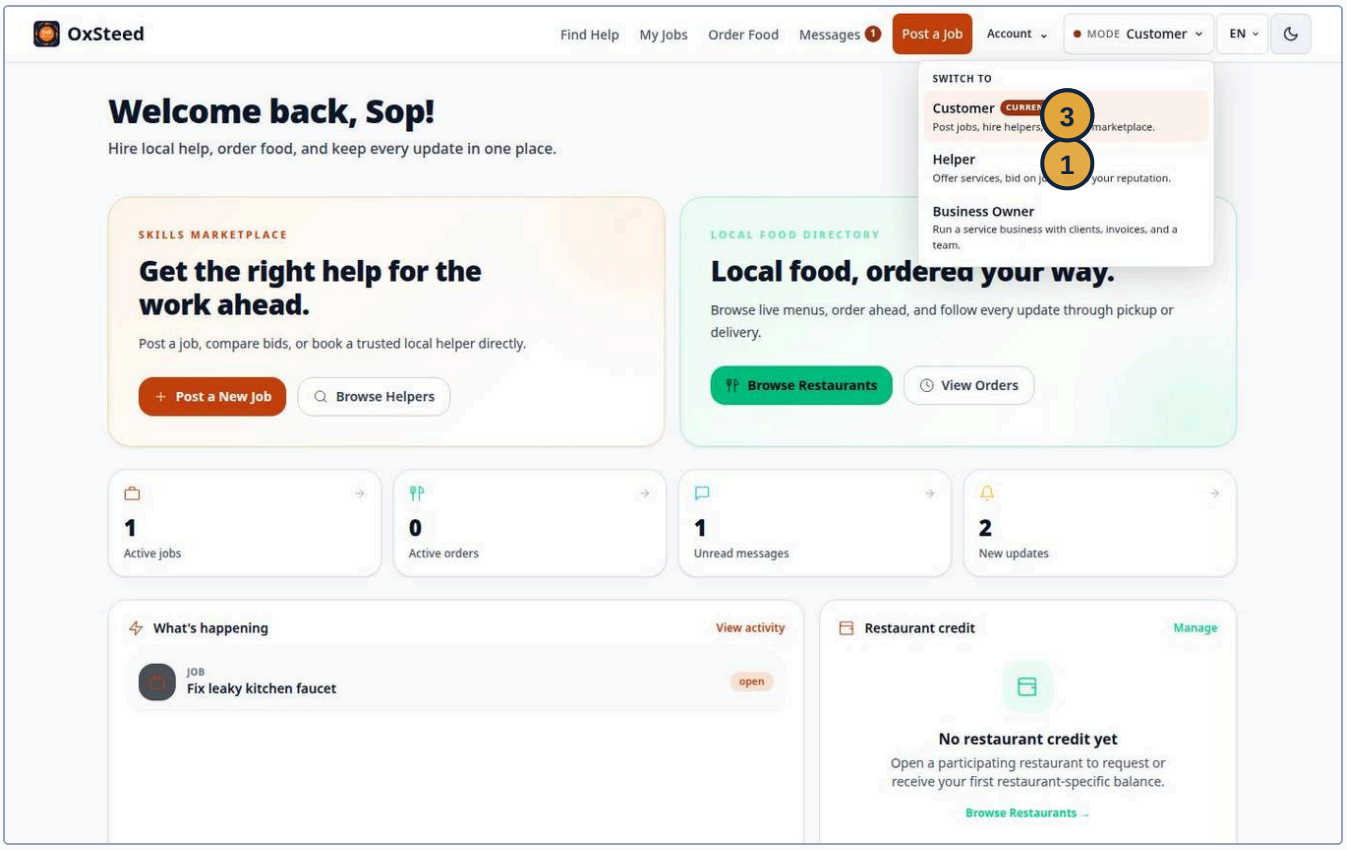

Figure 2. The Switch to panel with your available modes. *(Image description: Switch to panel listing available modes with a Current badge)*

1. **1.** Switch to panel
2. **2.** Current badge
3. **3.** Target mode row

Step 3: Confirm the new mode is active

The mode button in the navigation now shows the new mode name, and the dashboard renders that mode's home screen (for example, Helper shows the helper dashboard). If the wrong dashboard appears, your effective mode may fall back to your original account type; check Settings, Account Type.

> **Expected result:** The navigation shows the new mode and the dashboard matches it.

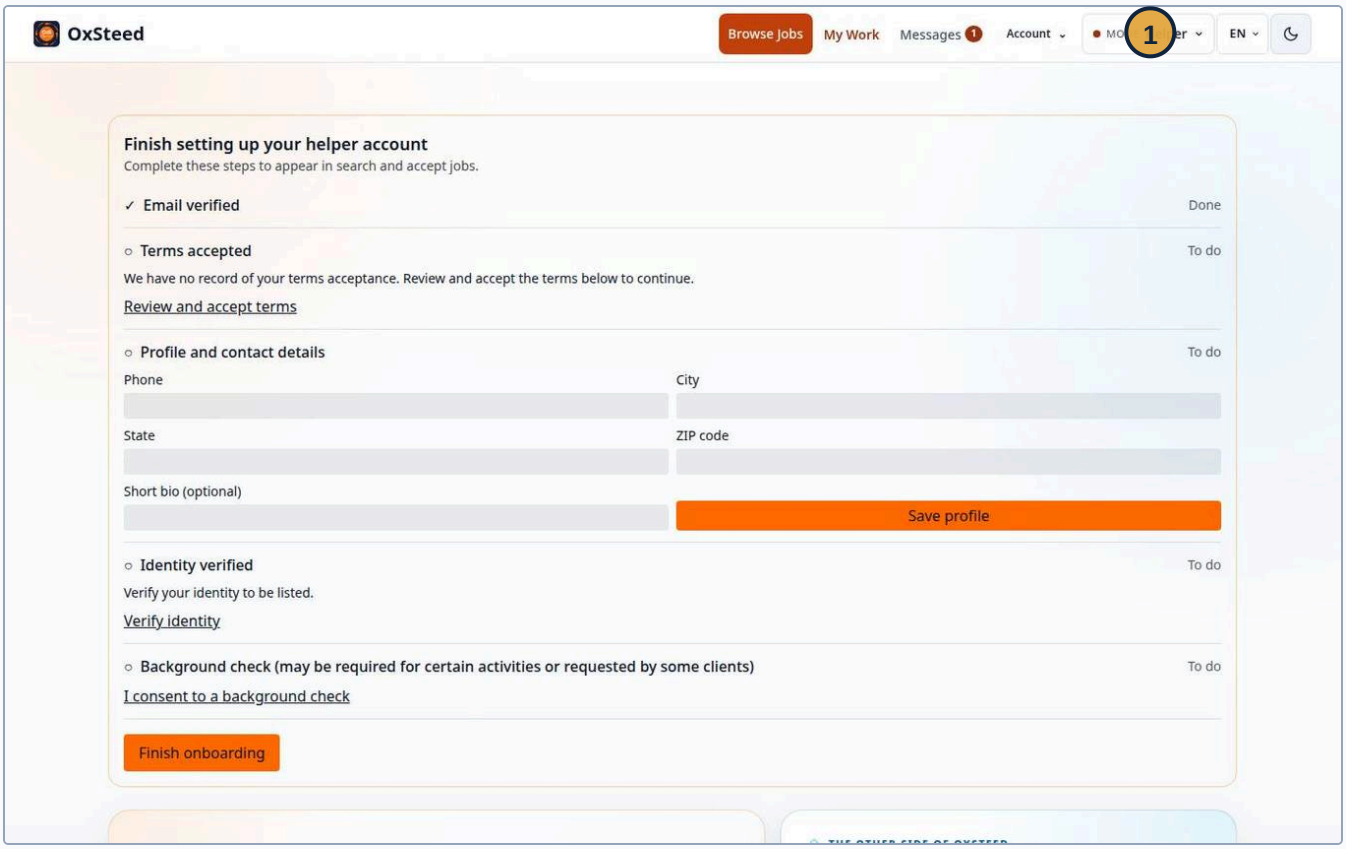

Figure 3. The switcher confirms the new active mode. *(Image description: Dashboard with the mode switcher showing the new mode)*

1. **1.** New current mode

Confirm it worked

The mode button shows the new mode and the dashboard content matches it. A "Switched to" toast appeared at the moment of switching.

If something goes wrong

Problem	What to do

The mode you want is not listed.	Self-selectable modes are Customer, Helper, and Business Owner. Business team roles (Manager, Representative, Employee) are granted, not self-selected: a workspace owner must invite you and you must accept the invitation.
You see "Could not switch."	Reload the page and try again. If it persists, sign out and back in; your granted roles are reloaded on sign in.

Need help?

If a granted mode never appears after you accepted an invitation, contact support from the Help menu or visit /support.

Guide ID: account-password-recovery | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Recover a forgotten password

Guide ID	**account-password-recovery**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/recover-password

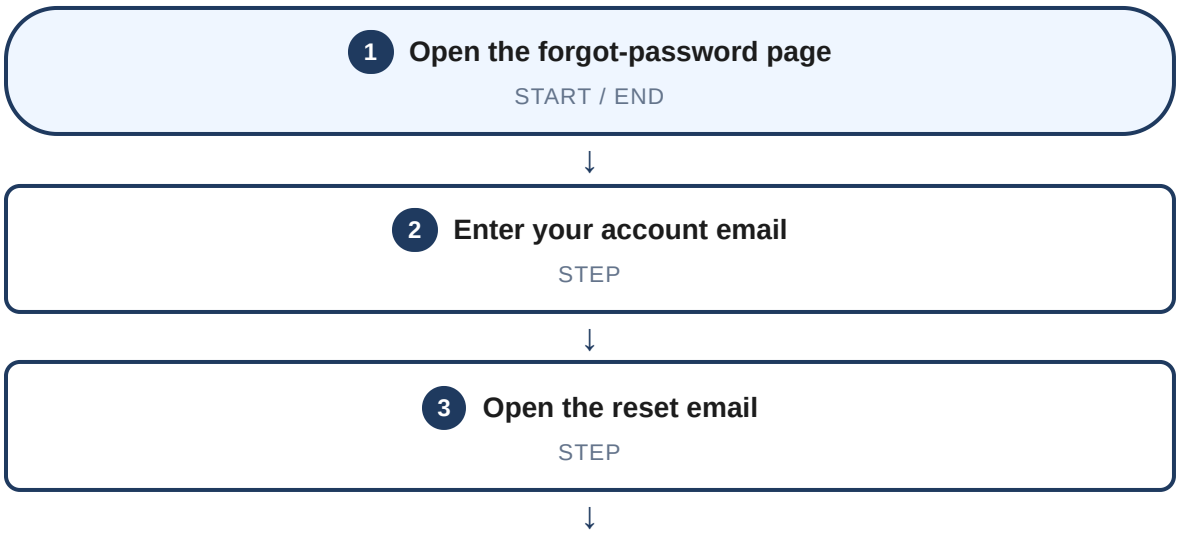

Goal

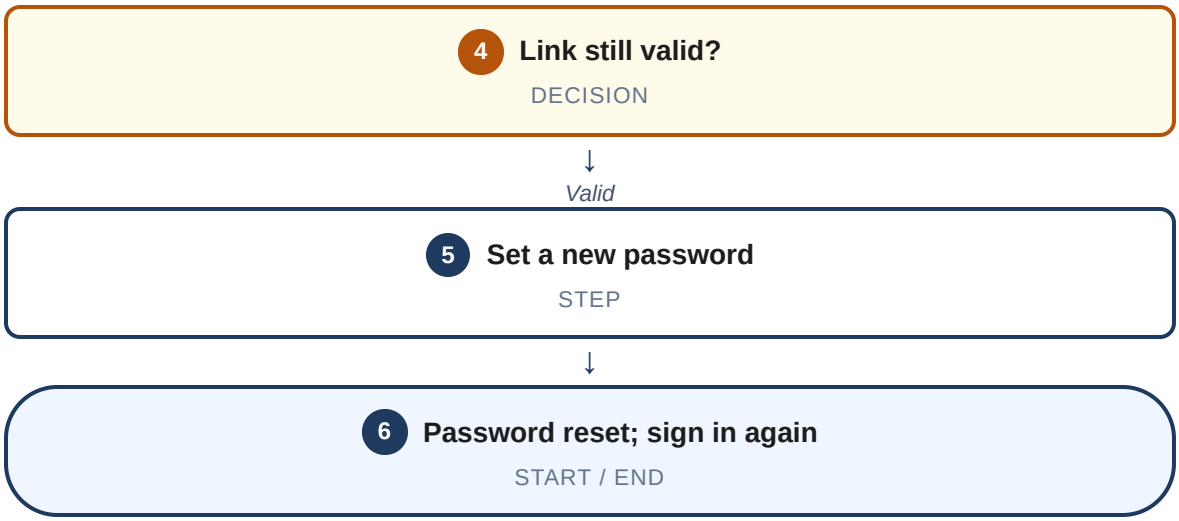

Reset your password with an email link when you cannot sign in.

Before you start

1. Access to the email inbox of your OxSteed account.

Process map

- *Expired or invalid:* Link still valid? → Request a new link
- Request a new link → Open the reset email

Text version. 1. Open the forgot-password page from the sign-in screen. 2. Enter the email address of your account and choose "Send Reset Link". 3. Open the reset email and choose the link. 4. If the link is expired or invalid, request a new one. 5. Enter a new password twice on the "Set New Password" page. 6. Sign in with the new password.

Steps

Step 1: Open the password reset page

From the sign-in page, choose "Forgot password?", or open /forgot-password directly. The page heading is "Reset your password" with the subtitle "Enter your email and we'll send you a link to reset your password."

> **Expected result:** The reset page shows a single Email address field and a "Send Reset Link" button.

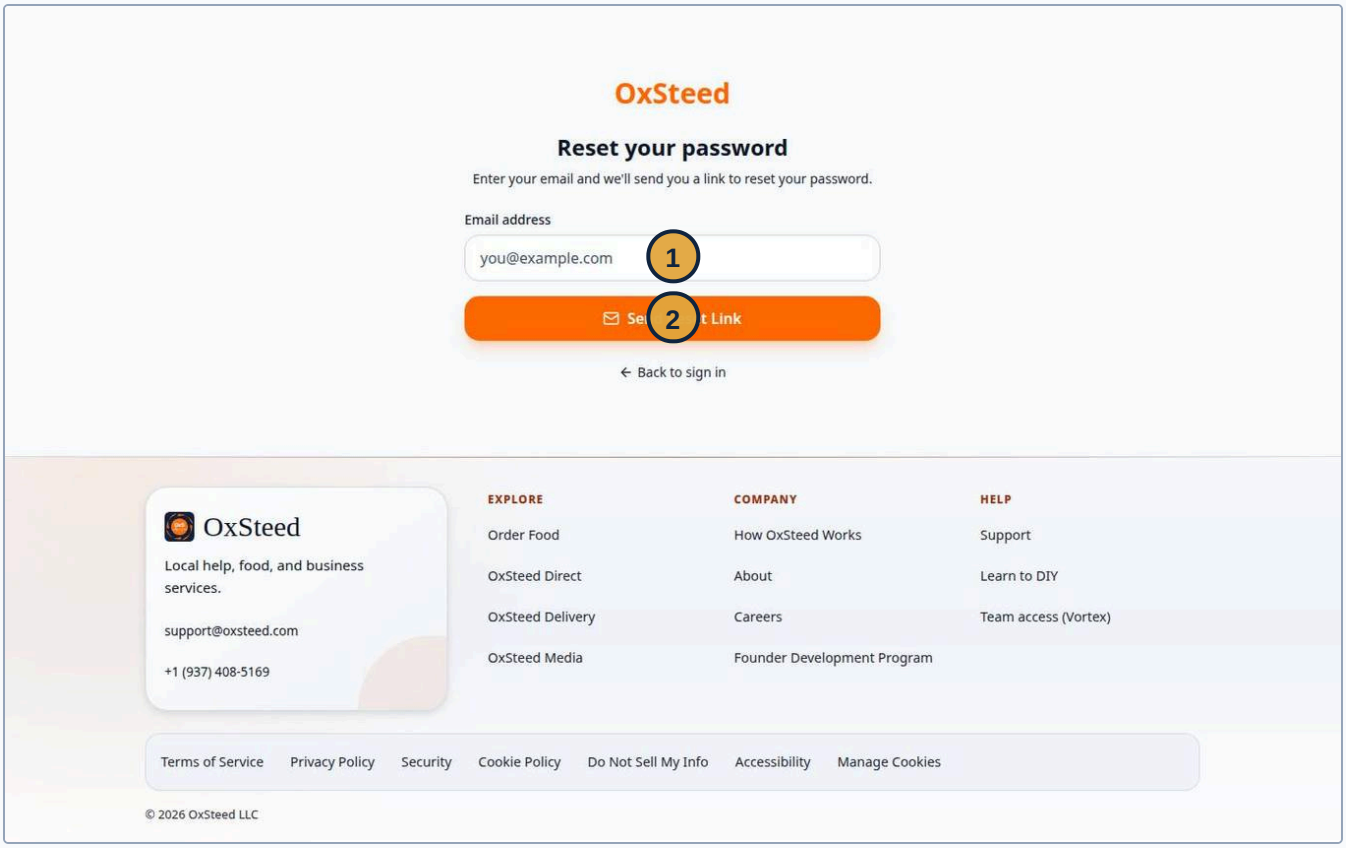

Figure 1. The password reset page, desktop view. *(Image description: Reset your password page with an email field and Send Reset Link button)*

1. **1.** Email address field
2. **2.** Send Reset Link button

Step 2: Request the reset link

Type your account email address (placeholder "you@example.com") and choose "Send Reset Link". A confirmation tells you the link was sent. If you never get it, check your spam folder, then come back and choose "Try again".

> **Expected result:** A confirmation appears that the reset link was sent to your email.

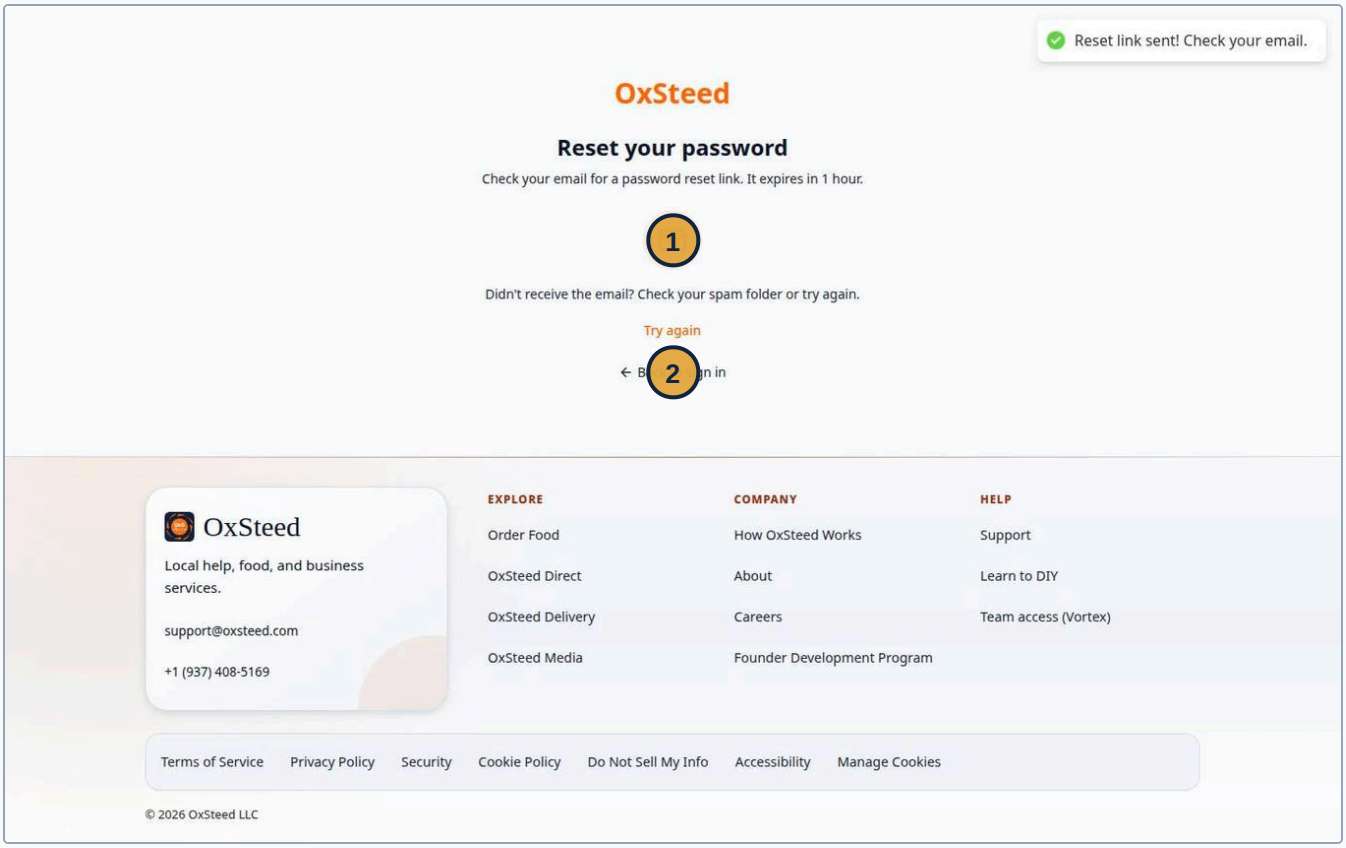

Figure 2. The sent confirmation after requesting the link. *(Image description: Confirmation that the reset link was sent)*

1. **1.** Sent confirmation
2. **2.** Back to sign in link

Step 3: Set a new password from the email link

Open the email and choose the reset link, which opens /reset-password/:token. The page heading is "Set New Password". Type your new password in the New password field and repeat it in the Confirm password field, then choose "Reset Password". The new password must meet the minimum length shown.

> **Expected result:** A success message appears and a "Go to Sign In now" option is shown.

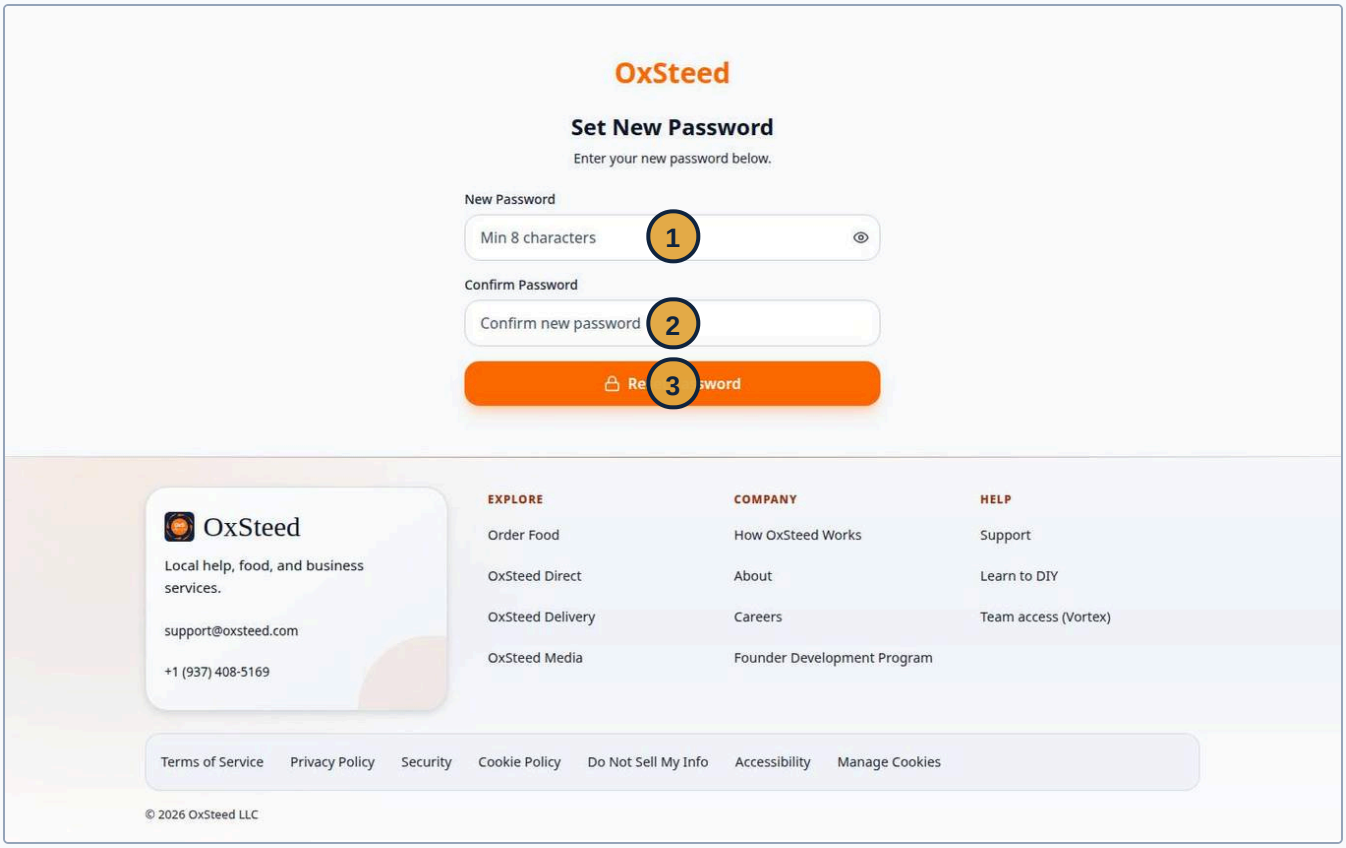

Figure 3. The new password form, desktop view. *(Image description: Set New Password page with new and confirm password fields)*

1. **1.** New password field
2. **2.** Confirm password field
3. **3.** Reset Password button

Confirm it worked

The success screen appears; sign in at /login with your new password. If the link shows as invalid, request a fresh link.

If something goes wrong

Problem	What to do
The reset link shows as invalid or expired.	Reset links expire for security. Request a new one from /forgot-password and use it right away.
No reset email arrives.	Check the spam folder and confirm you typed the exact email registered on the account. Wait a few minutes before requesting again.
The new password is rejected.	Both fields must match and meet the minimum length. Avoid reusing your most recent passwords.

Need help?

If you no longer have access to the registered email, contact support from the Help menu or visit /support.

Guide ID: account-privacy | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Privacy controls, data export, account deletion

Guide ID	**account-privacy**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/privacy-and-data

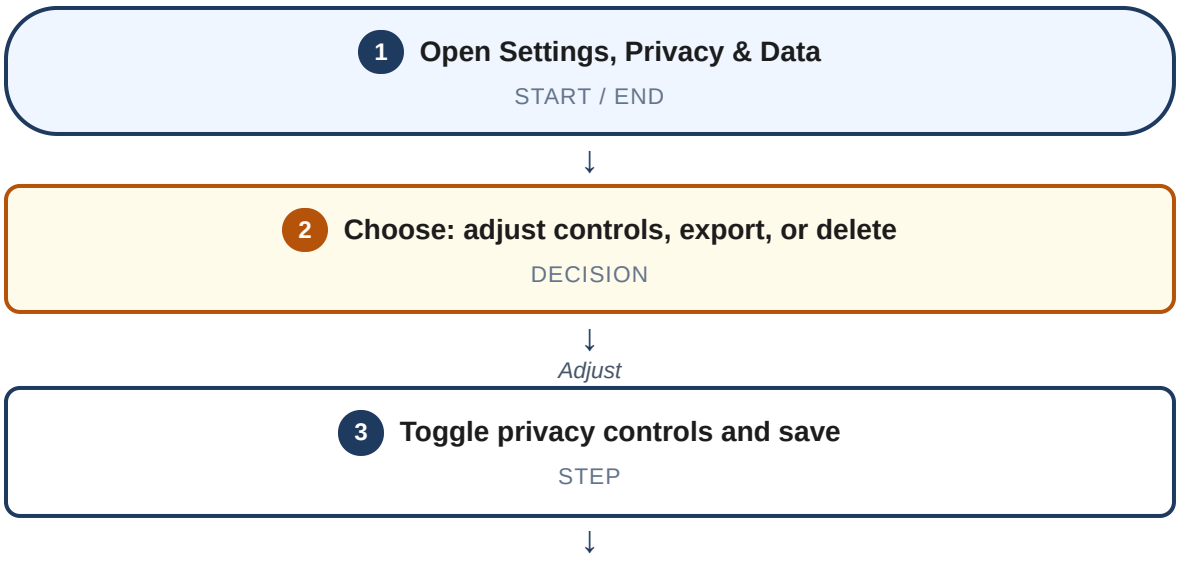

Goal

Control your privacy settings, export your data, or delete your account.

Before you start

1. Be signed in for export and deletion; the policy pages are public.

Process map

4 Privacy change applied

START / END

- *Export:* Choose: adjust controls, export, or delete → Verify password and email code, download export
- *Delete:* Choose: adjust controls, export, or delete → Danger Zone: Delete Account with confirmation
- Verify password and email code, download export → Privacy change applied
- Danger Zone: Delete Account with confirmation → Privacy change applied

Text version. 1. Open Settings and choose the "Privacy & Data" tab. 2. Decide what you want: adjust privacy controls, export your data, or delete your account. 3. For controls, toggle the options (communication, job, live chat, booking visibility) and save. 4. For export, confirm your current password, then enter the six-digit code sent to your email; the export downloads. 5. For deletion, use the "Danger Zone" tab, choose "Delete Account", and confirm in the "Delete Your Account" dialog.

Steps

Step 1: Open the Privacy & Data tab

Choose Settings from your account menu and pick the "Privacy & Data" tab. The page shows privacy preference toggles (for example communication controls, job controls, live chat, and booking visibility). The public legal pages (/privacy, /do-not-sell, /cookie-policy, /terms) are readable without signing in.

> **Expected result:** The privacy toggles load with their current saved states.

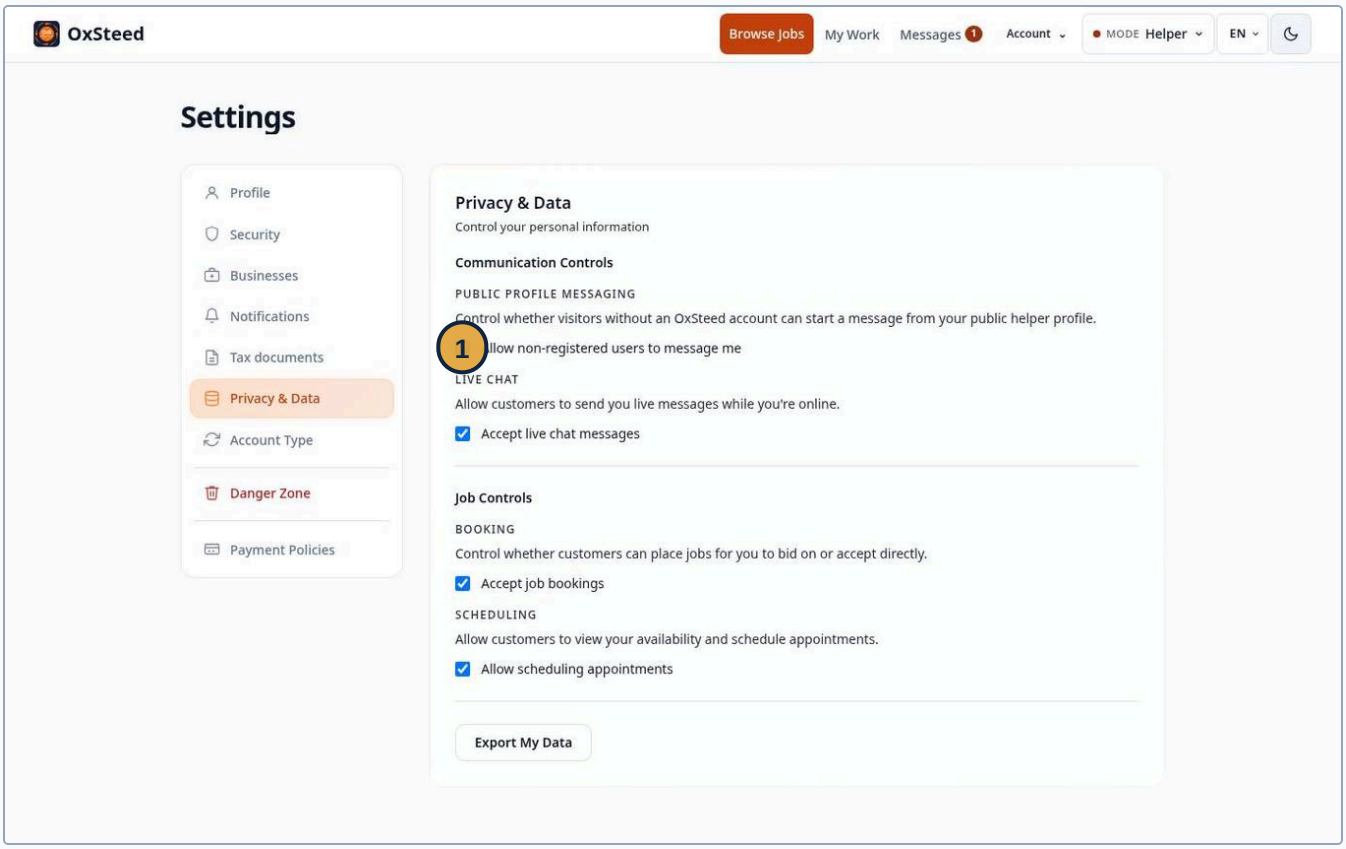

Figure 1. The Privacy & Data tab, desktop view. *(Image description: Privacy and Data tab with privacy toggles)*

1. **1.** Privacy toggles

Step 2: Adjust privacy controls and save

Toggle the controls you want to change (for example who can contact you or see your activity) and choose Save. A confirmation toast shows when the update is stored.

> **Expected result:** The saved states persist after you reload the page.

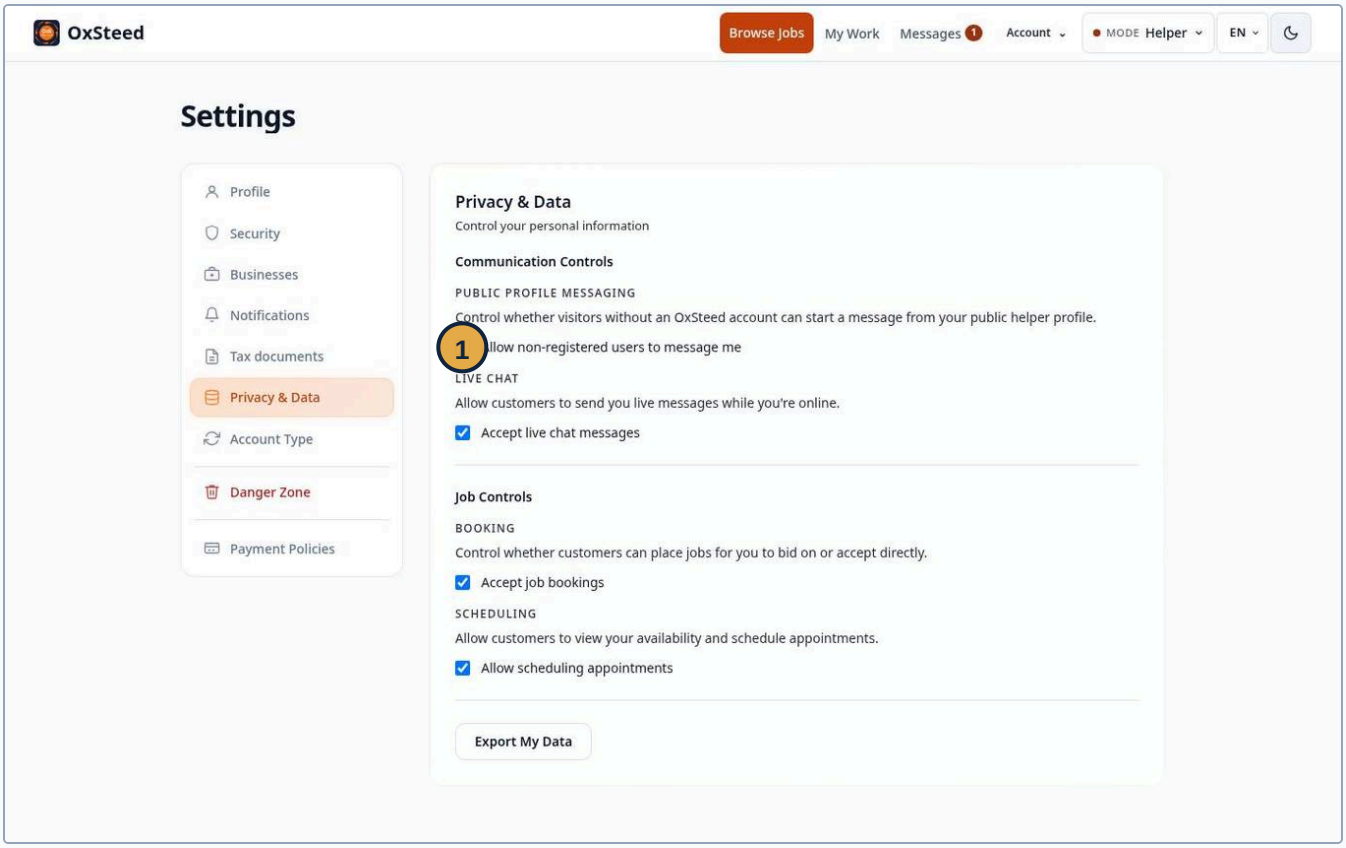

Figure 2. Adjusting privacy controls. *(Image description: Privacy toggles with one changed)*

1. **1.** Save button

Step 3: Export your data with two-step verification

In the Privacy & Data tab, start the data export. First confirm your current password; a verification code is sent to your email ("A verification code was sent to your email."). Enter the six-digit code, then choose the verify-and-export option to download your data export.

> **Expected result:** The export file downloads to your device.

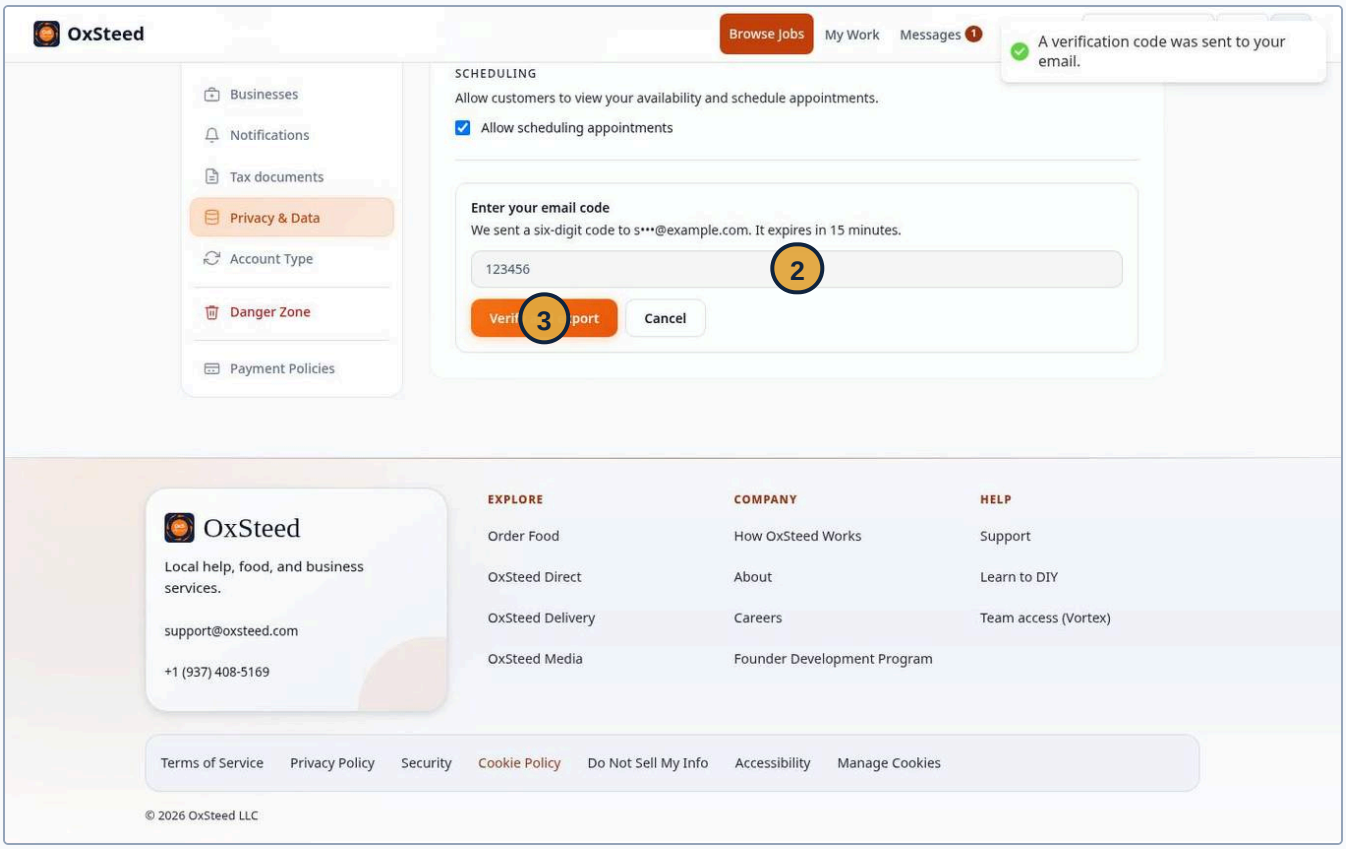

Figure 3. The export verification step, desktop view. *(Image description: Data export verification with code entry)*

1. **2.** Six-digit code field
2. **3.** Verify and export

Step 4: Delete your account from the Danger Zone

Choose the "Danger Zone" tab and choose "Delete Account". A confirmation dialog titled "Delete Your Account" explains what is removed (including active jobs and pending balances if any). Type the confirmation as requested and confirm the deletion. This cannot be undone.

> **Expected result:** Your account is deleted and you are signed out.

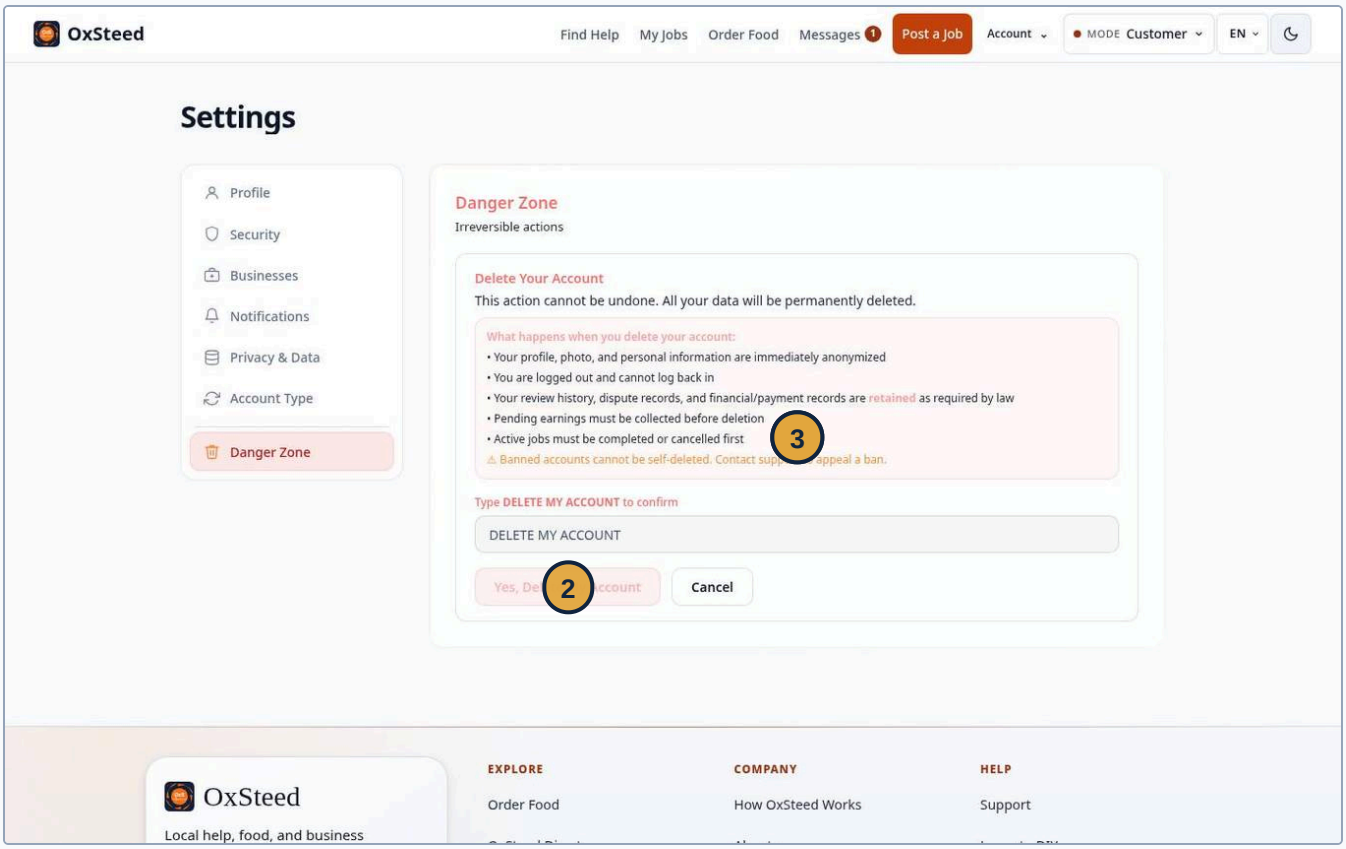

Figure 4. The Delete Your Account confirmation. *(Image description: Danger Zone tab with the delete confirmation dialog)*

1. **1.** Danger Zone title
2. **2.** Delete Account button
3. **3.** Confirmation dialog

Confirm it worked

Privacy toggles keep their new values after a reload; exports download; after deletion you can no longer sign in with that account.

If something goes wrong

Problem	What to do
The export code never arrives.	Check spam, then request a new code. You must enter your current password first; without it no code is sent.
Account deletion is blocked.	The dialog lists blockers such as active jobs or a remaining balance. Finish or cancel those jobs and withdraw balances first, then retry deletion.

Need help?

For data requests you cannot complete yourself, contact support from the Help menu or visit /support.

Guide ID: account-settings | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Manage account settings

Guide ID	**account-settings**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/manage-settings

Goal

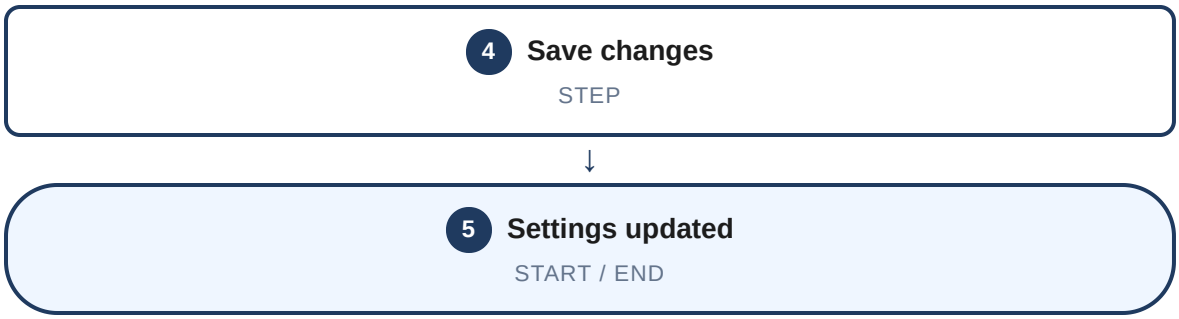

Change your profile, security, notifications, country, businesses, and tax documents from one settings hub.

Before you start

1. Be signed in to your OxSteed account.

Process map

Text version. 1. Open /settings. 2. Pick the tab you need: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, Danger Zone, or Tax documents (helpers only). 3. Edit the fields or toggle the controls on that tab. 4. Save; most changes confirm with a toast. 5. Security changes like 2FA and passkeys take effect immediately.

Steps

Step 1: Open Settings and pick a tab

Choose Settings from your account menu, or open /settings directly. The page shows tabs: Profile, Security, Businesses, Notifications, Privacy & Data, Account Type, and Danger Zone. Helpers also see a Tax documents tab. You can deep-link a tab, for example /settings?tab=tax.

> **Expected result:** The settings page loads with the tab list and the Profile tab selected.

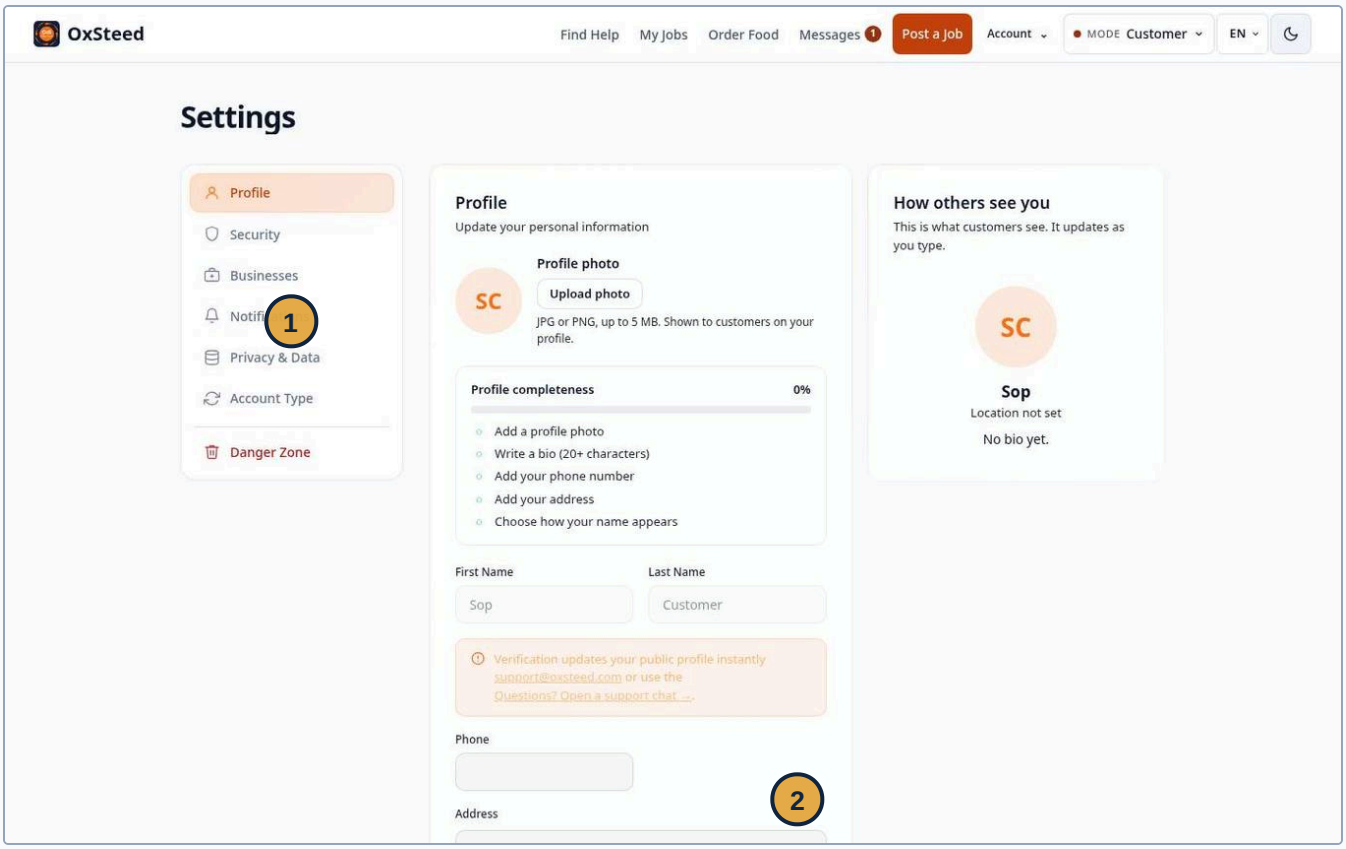

Figure 1. The settings tabs, desktop view. *(Image description: Settings page with the tab list on the side)*

1. **1.** Settings tabs
2. **2.** Active tab content

Step 2: Update your profile or account basics

On the Profile tab, update your name, contact details, and profile photo. On the Account Type tab you can review your "Current Role", see the "Workspaces you belong to", and use "Switch" to move into a granted workspace role.

> **Expected result:** The changed values stay in the fields after saving.

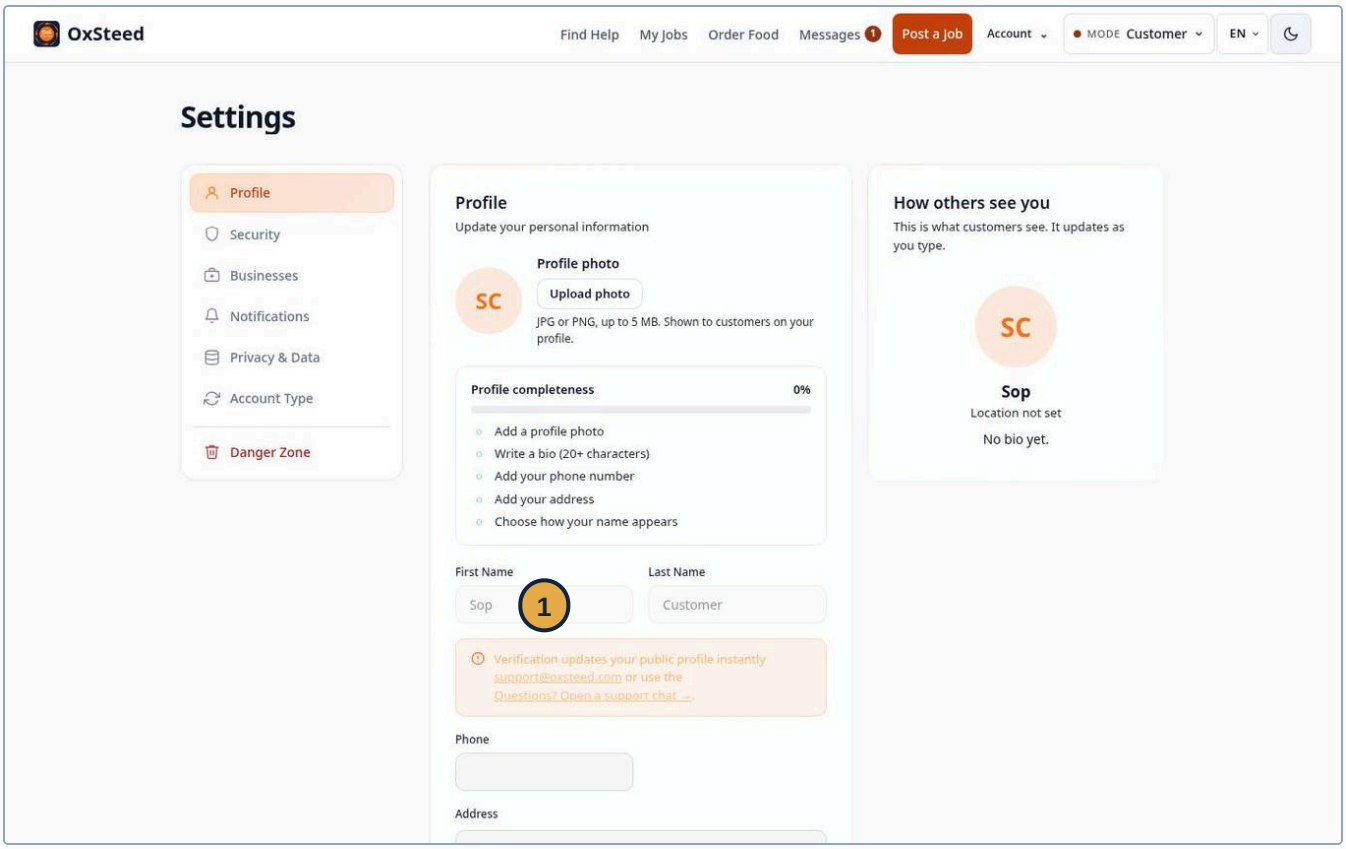

Figure 2. The Profile tab. *(Image description: Profile tab with editable fields)*

1. **1.** Profile fields

Step 3: Manage security: 2FA, passkeys, and sessions

On the Security tab, set up two-factor authentication (TOTP), add or remove passkeys, and review your active sessions. Sessions can be signed out individually from the sessions list. The Notifications tab controls email and push preferences; the country selector sets your marketplace country.

> **Expected result:** Security changes confirm immediately; a new 2FA setup asks you to verify a test code.

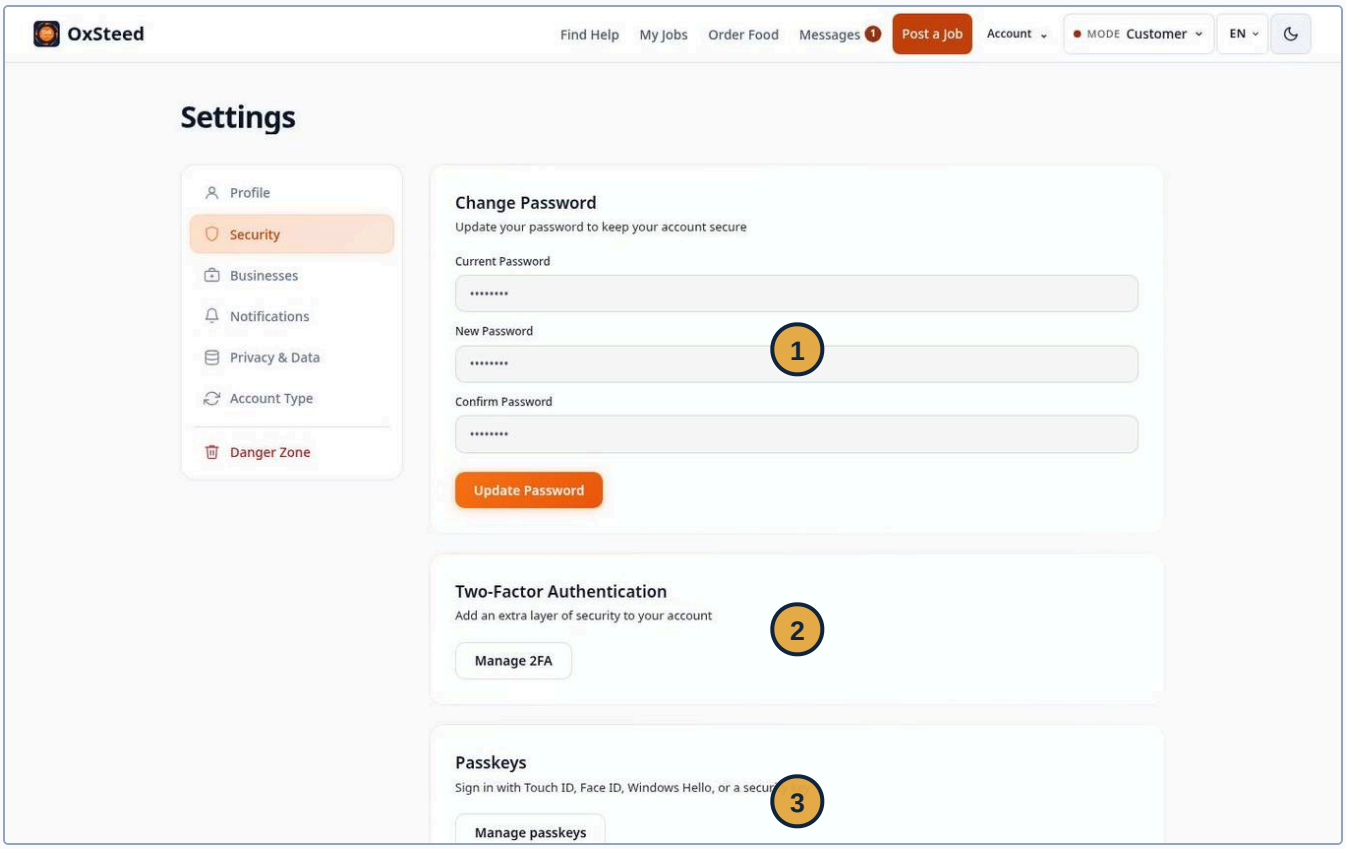

Figure 3. The Security tab: 2FA, passkeys, and sessions. *(Image description: Security tab with two-factor, passkeys, and sessions sections)*

1. **1.** Two-factor setup
2. **2.** Passkeys
3. **3.** Active sessions

Step 4: File tax documents as a helper (W-9)

Helpers: open the Tax documents tab and complete "Tax documents (W-9)". The subtitle explains: "File your W-9 so payouts can be released. Your tax ID is stored encrypted." Payouts are gated until your tax identity is on file.

> **Expected result:** The W-9 shows as filed and the payout tax gate is satisfied.

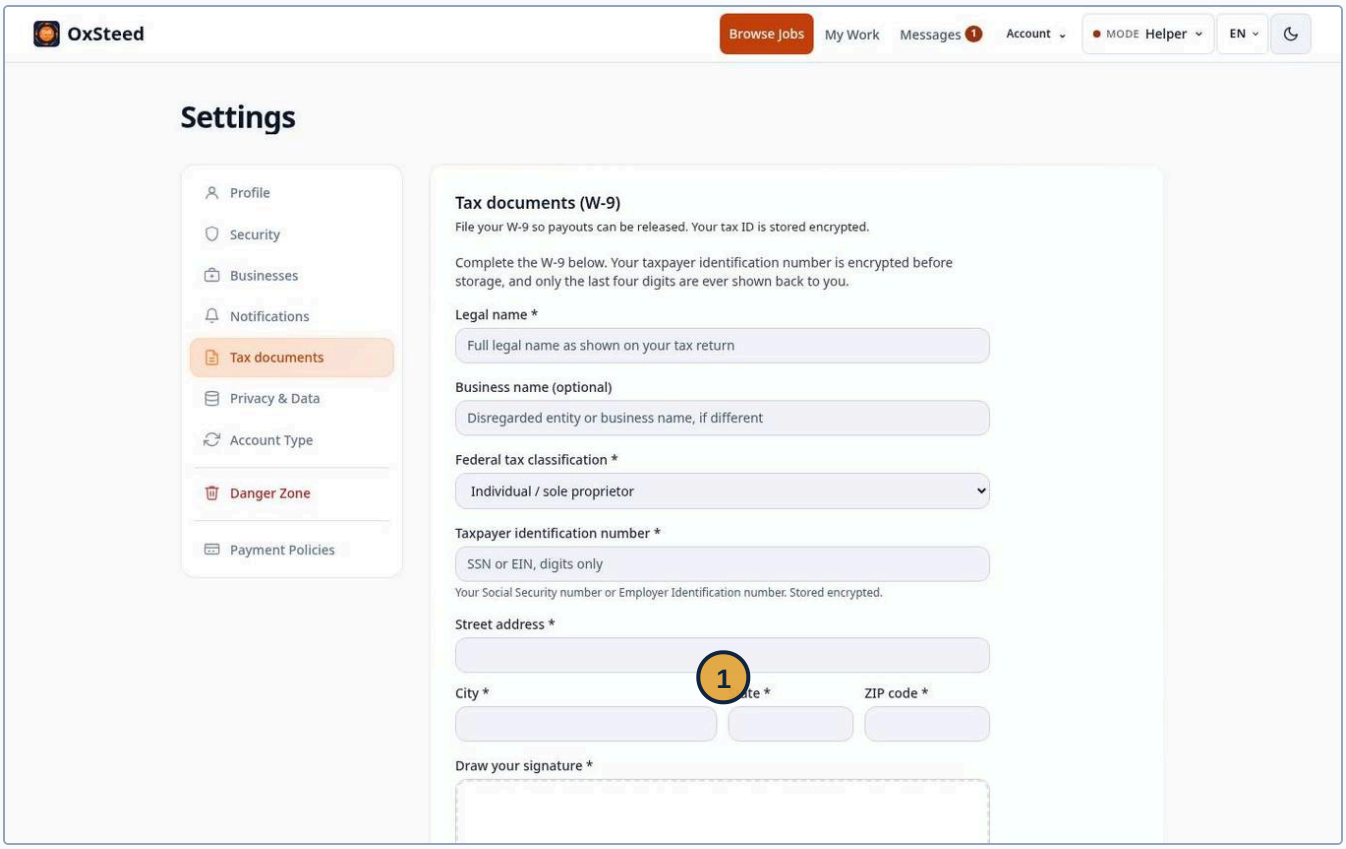

Figure 4. The Tax documents tab for helpers. *(Image description: Tax documents tab with the W-9 form)*

1. **1.** W-9 form

Confirm it worked

Each change confirms with a toast or an updated value. Your Security tab reflects the new 2FA or passkey state immediately.

If something goes wrong

Problem	What to do

You cannot find a setting you expected.	Check every tab; some controls are role-specific (the Tax documents tab is helper-only, businesses live under the Businesses tab).
A save fails with an error.	Check the highlighted field for the validation message, fix it, and save again. If it keeps failing, reload the page and retry.

Need help?

For account or security issues you cannot fix in Settings, contact support from the Help menu or visit /support.

Guide ID: account-signin | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Sign in

Guide ID	**account-signin**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant, Logistics
Availability	**Supported**
Online version	/how-it-works/account/sign-in

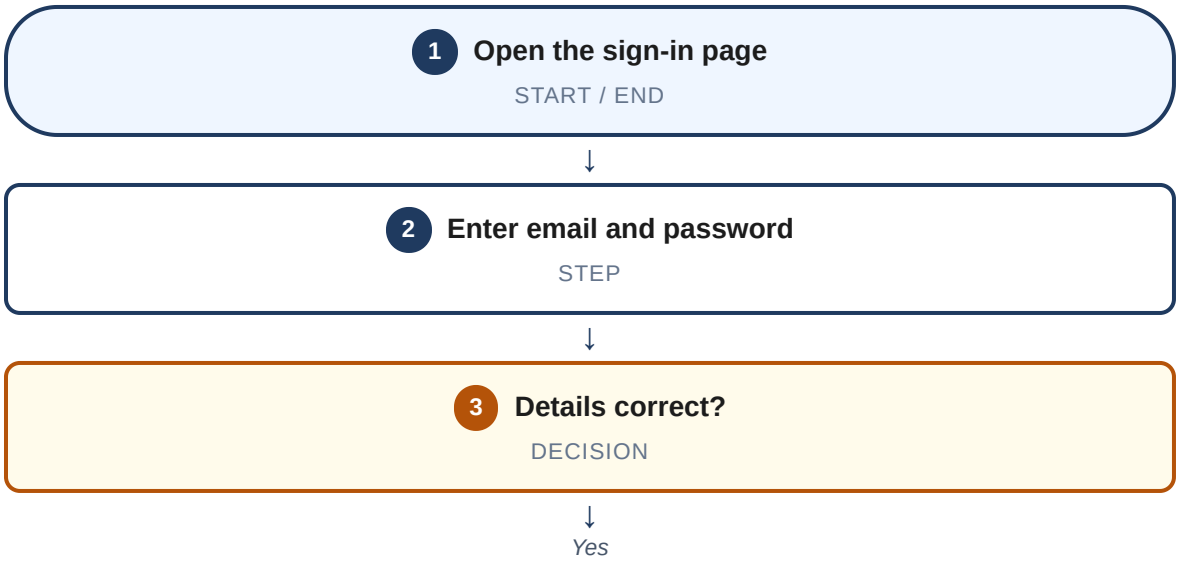

Goal

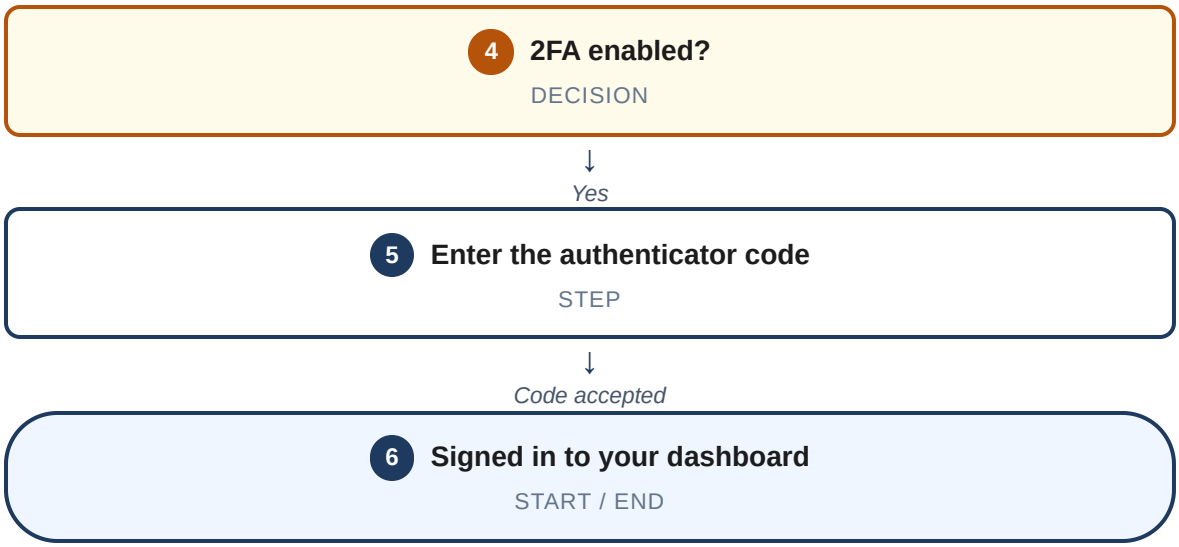

Sign in to your OxSteed account with your email and password, including two-factor and passkey options.

Before you start

1. Have an OxSteed account.
2. If you enabled two-factor authentication, have your authenticator app ready.

Process map

- *No:* Details correct? → Use Forgot password?
- *No:* 2FA enabled? → Signed in to your dashboard
- *Password reset:* Use Forgot password? → Enter email and password

Text version. 1. Open the sign-in page. 2. Enter your email address and password, then choose "Sign in". 3. If the details are wrong, use "Forgot password?" to reset. 4. If two-factor authentication is on, the page switches to "Verify it's you"; enter your Authentication code. 5. You land on your dashboard. Passkey users can sign in with their device instead of typing a password.

Steps

Step 1: Open the sign-in page

Choose "Sign In" in the top navigation, or open /login directly. The page shows the heading "Welcome back" and the subtitle "Sign in to access your local skills marketplace", with an Email address field, a Password field, and a "Sign in" button. New users see a "Join OxSteed" link instead.

> **Expected result:** The sign-in form is visible with empty Email address and Password fields.

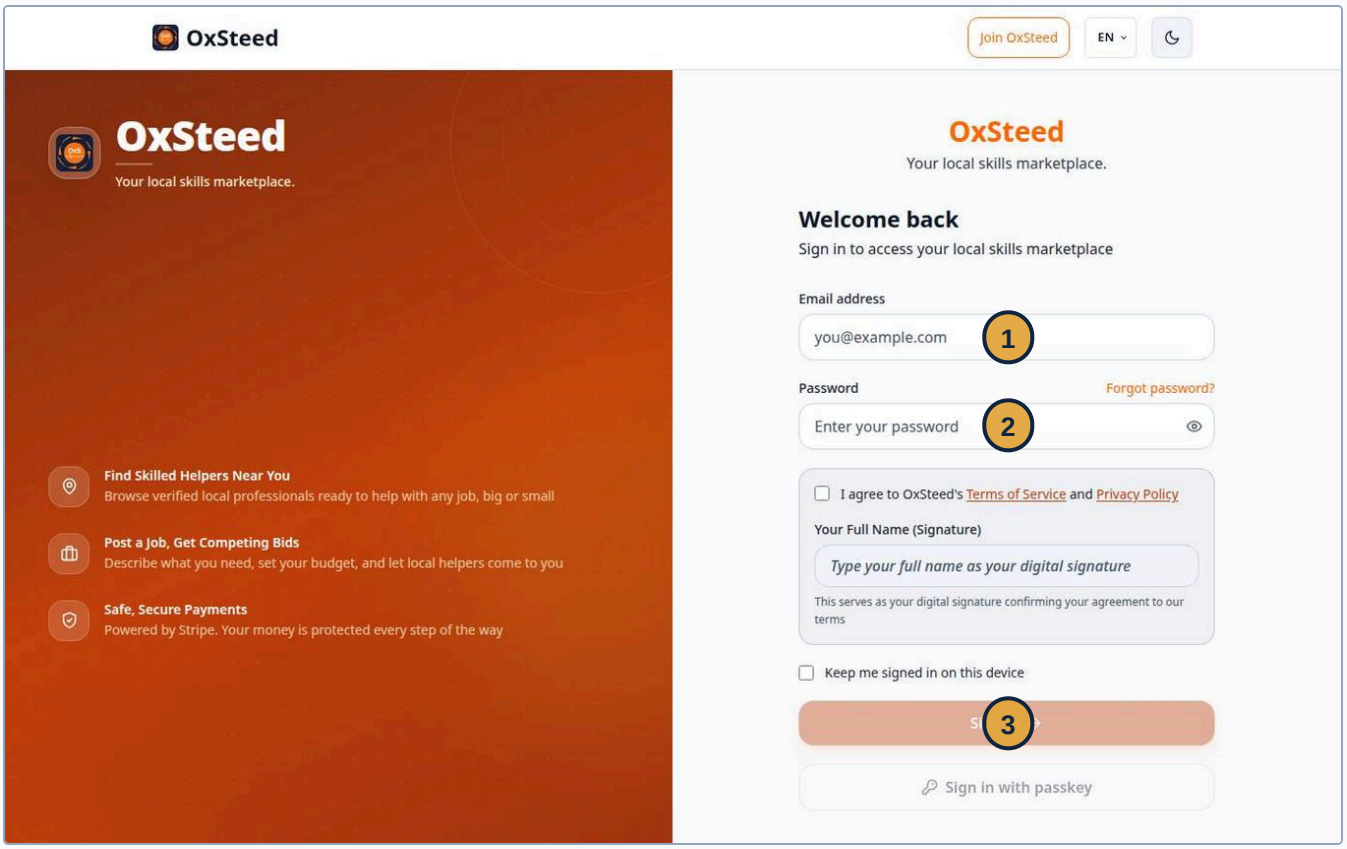

Figure 1. The sign-in page, desktop view. *(Image description: Sign-in page with Welcome back heading and empty email and password fields)*

1. **1.** Email address field
2. **2.** Password field
3. **3.** Sign in button

Step 2: Enter your email and password

Type the email address you registered with into the Email address field (placeholder "you@example.com") and your password into the Password field (placeholder "Enter your password"). Passwords are case sensitive. Use "Show password" if you want to check your typing, then choose "Sign in". The "Forgot password?" link sits next to the password field.

> **Expected result:** The Sign in button shows a loading state, then you are redirected.

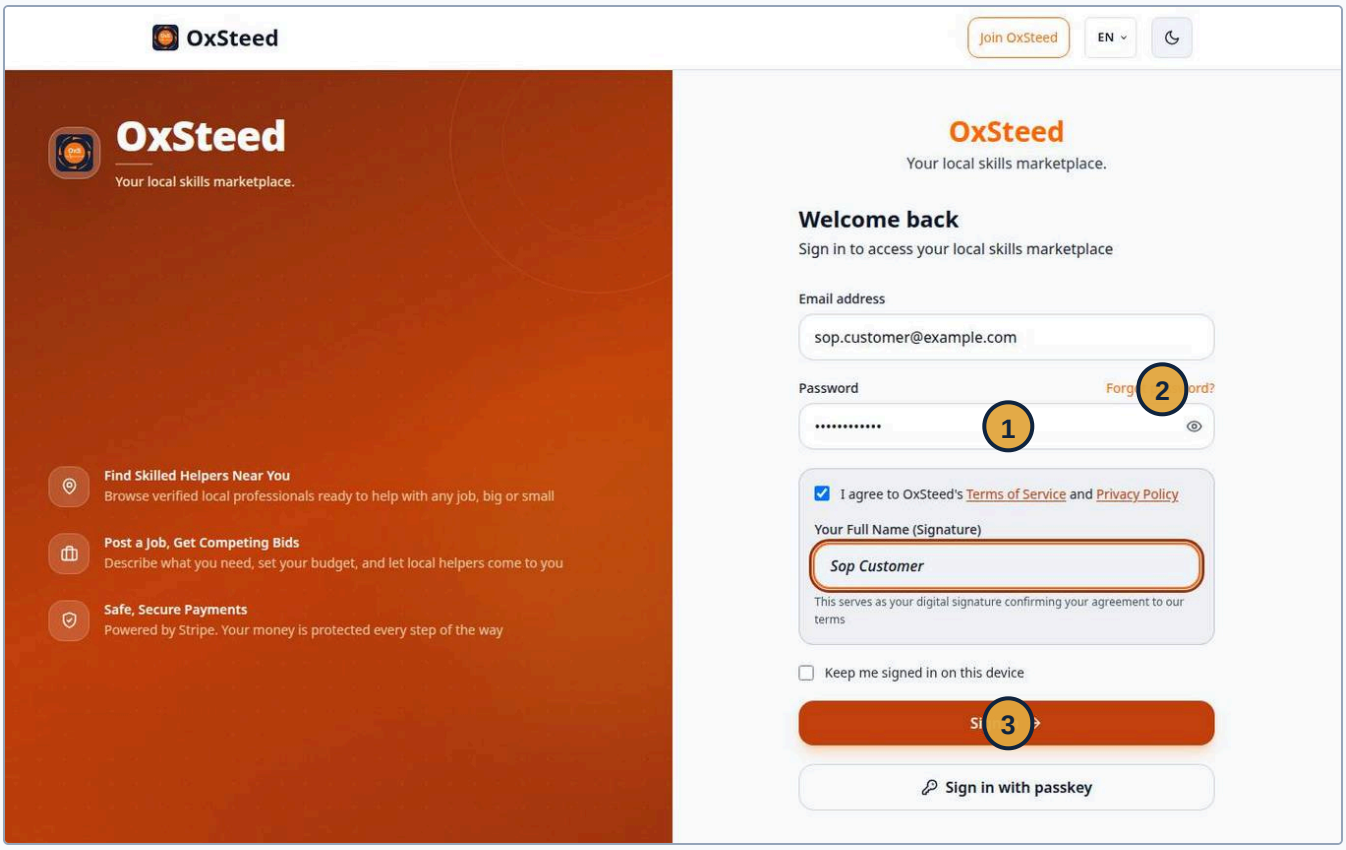

Figure 2. The filled sign-in form before choosing Sign in. *(Image description: Sign-in form with email and password entered)*

1. **1.** Password field
2. **2.** Forgot password? link
3. **3.** Sign in button

Step 3: Complete the two-factor check if prompted

If you enabled two-factor authentication, the page changes to "Verify it's you". Enter the current code from your authenticator app into the Authentication code field and submit. Users with a passkey can choose the passkey option instead of typing a password.

> **Expected result:** The code is accepted and you continue to your dashboard.

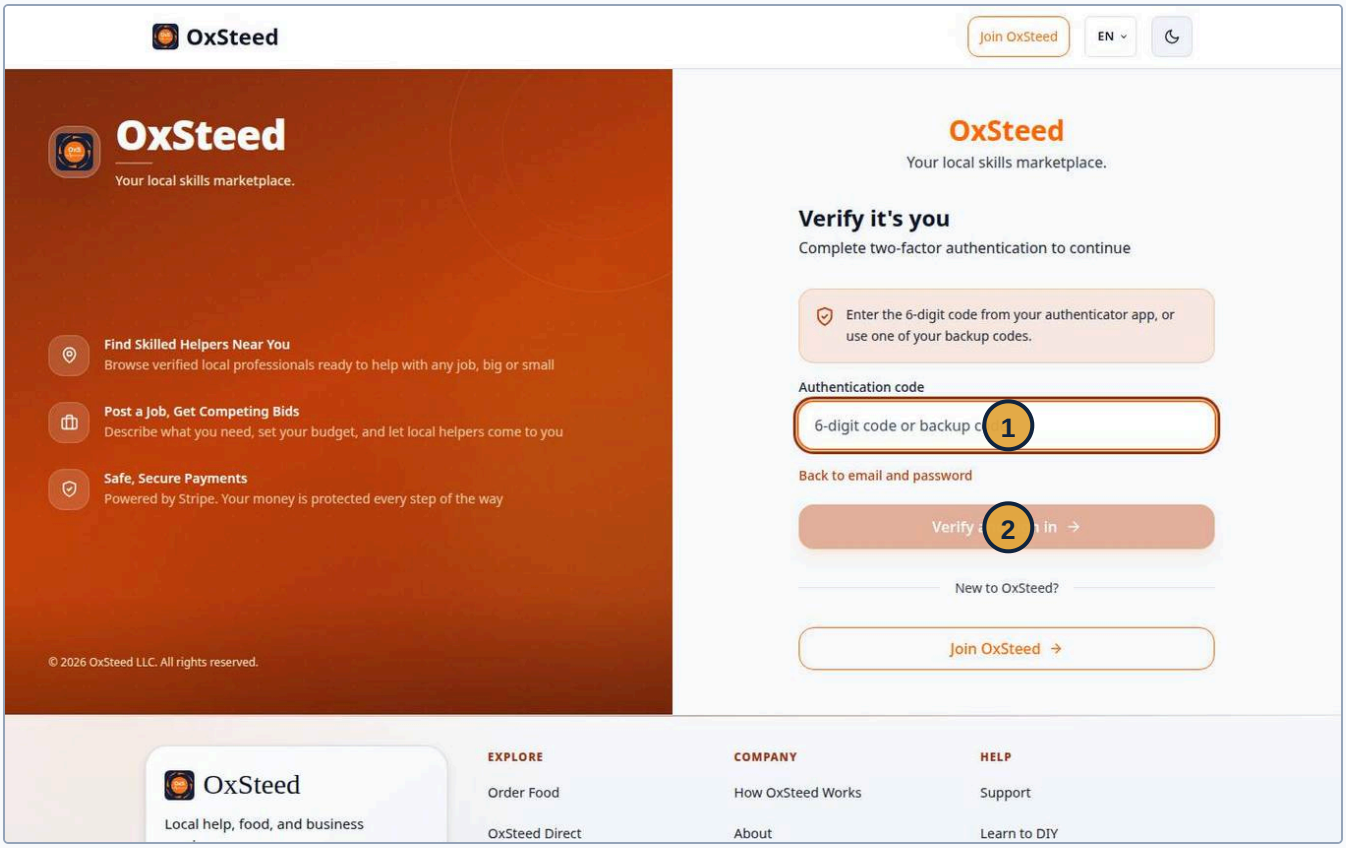

Figure 3. The two-factor step, shown only when 2FA is enabled. *(Image description: Two-factor page titled Verify it is you with an authentication code field)*

1. **1.** Authentication code field
2. **2.** Submit button

Step 4: Confirm you landed on your dashboard

After sign in, your dashboard loads. Open the account menu in the navigation to confirm it shows your name or email. If you expected a different mode (for example Helper instead of Customer), use the mode switcher in the navigation.

> **Expected result:** Your dashboard is visible and the account menu shows your name or email.

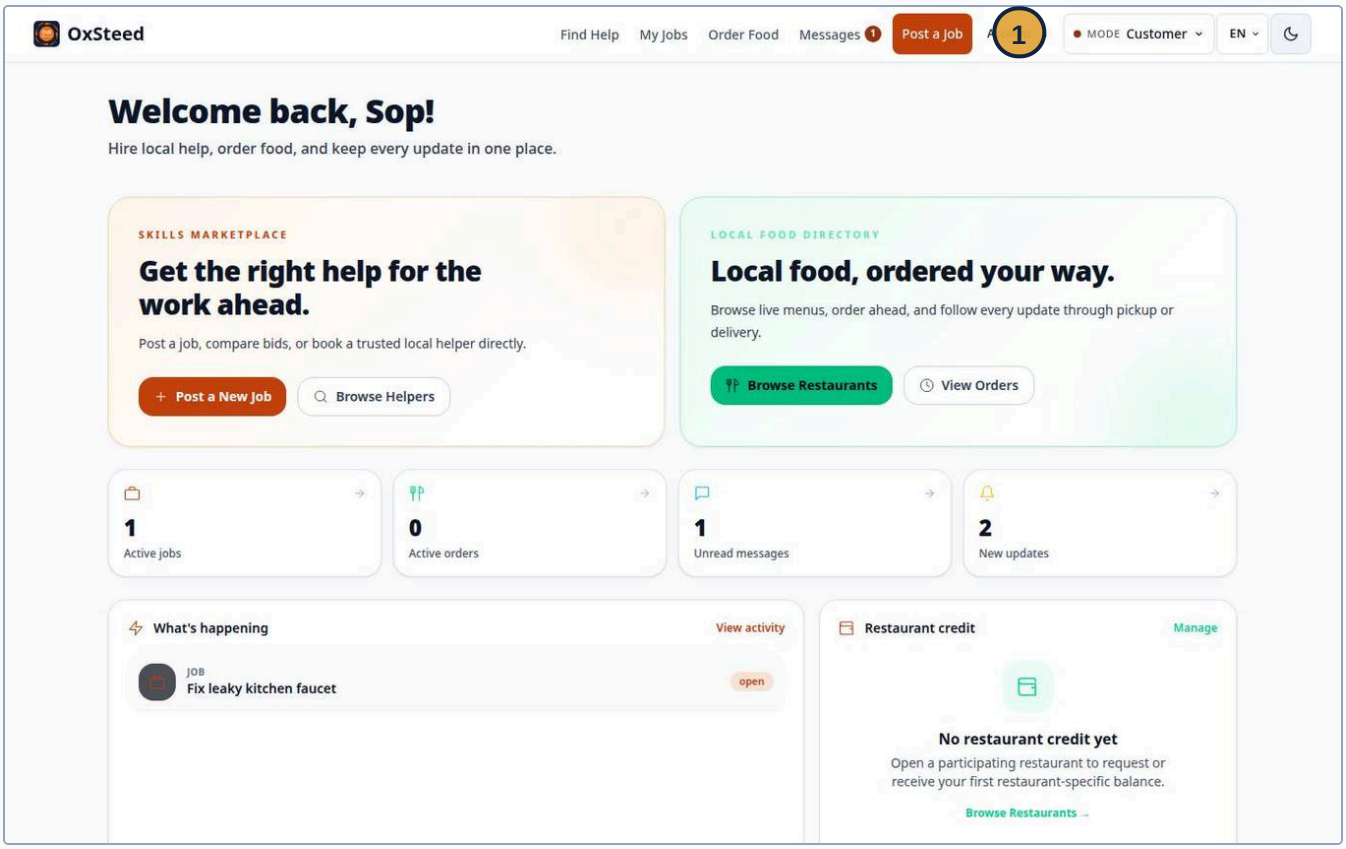

Figure 4. A signed-in dashboard with the account menu. *(Image description: Dashboard with the account menu highlighted)*

1. **1.** Account menu

Confirm it worked

Your dashboard loads and the account menu shows your name or email. Review active sessions anytime under Settings, Security.

If something goes wrong

Problem	What to do

You see "Invalid email or password".	Check for typos and caps lock, then try again. After several failed attempts the sign-in is rate-limited; wait a few minutes or reset the password.
Your two-factor code is rejected.	Make sure your phone clock is set automatically; authenticator codes drift when the clock is off. If you lost the authenticator, use your saved recovery code from the Security tab in Settings.
Passkey sign in fails.	Make sure your browser and device support passkeys and that you use the same device or synced profile where the passkey was created. Fall back to email and password.

Need help?

If you cannot access your account after a password reset, contact support from the Help menu or visit /support.

Guide ID: account-support | **Revision:** 1 | **Area:** Account

SOP LIBRARY / ACCOUNT **ENGLISH**

Get help and track support tickets

Guide ID	**account-support**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant
Availability	**Supported**
Online version	/how-it-works/account/get-support

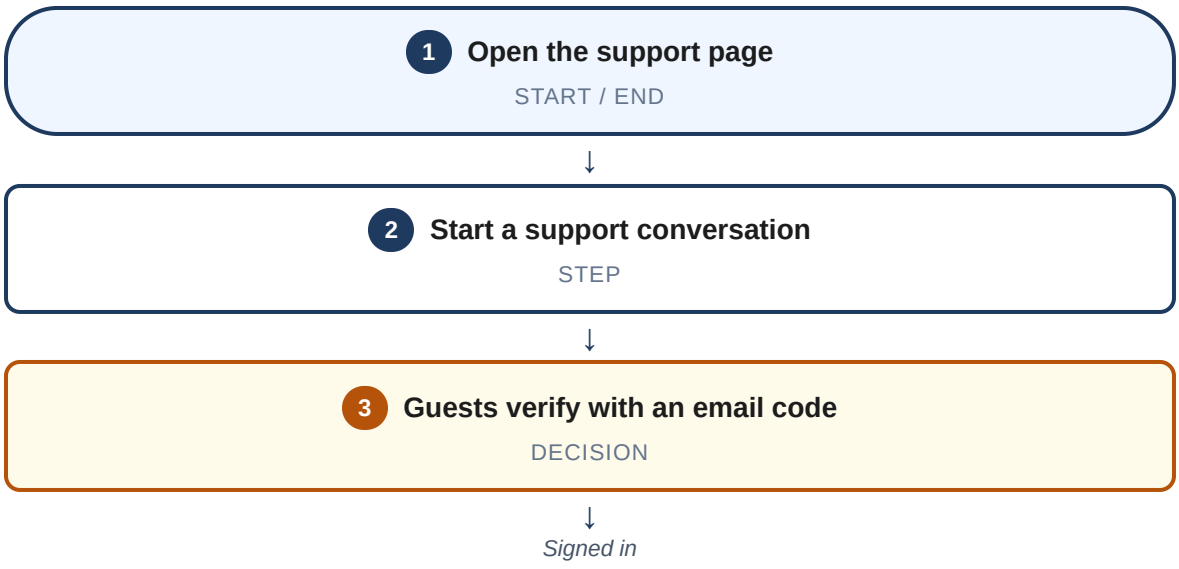

Goal

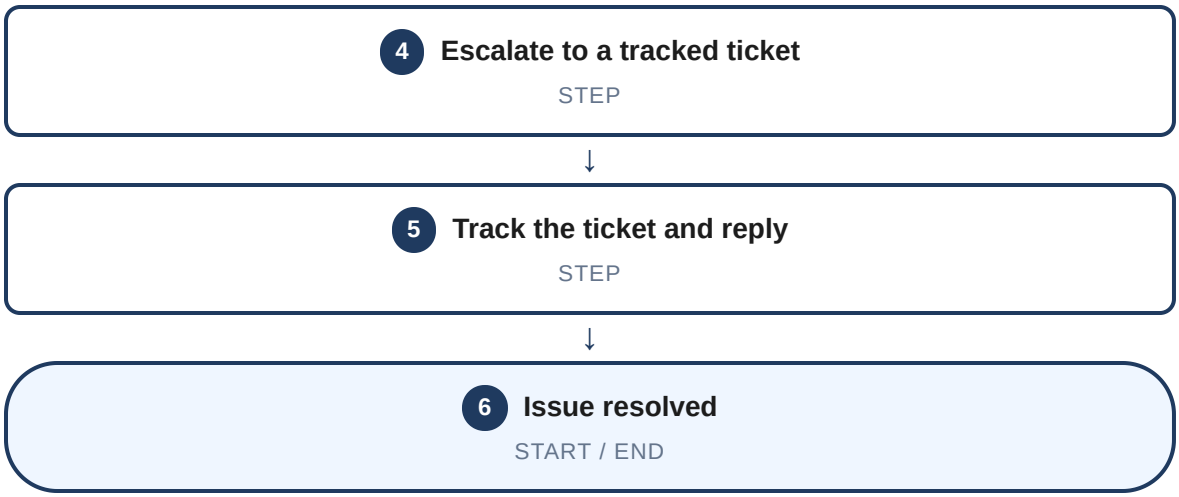

Start a support conversation, escalate it to a tracked ticket, and follow it to resolution.

Before you start

1. Know the job, booking, or order the issue is about, and have photos or receipts ready.

Process map

- *Guest:* Guests verify with an email code → Enter name and email to continue
- Enter name and email to continue → Escalate to a tracked ticket

Text version. 1. Open /support. 2. Start a support conversation and describe the issue; guests verify with an email code first. 3. If the issue needs human follow-up, it is escalated into a tracked ticket and you get a ticket identifier. 4. Track the ticket on /support/my-tickets/:ticketId: read replies under Messages, answer with the Reply box ("Write your reply..."), and reopen it if needed. 5. The ticket closes when the issue is resolved.

Steps

Step 1: Open the support page and start a conversation

Open /support (the Help menu links here). Start a new support conversation and describe what went wrong. The page tells you when escalation is best: "Urgent booking or support failures where normal chat was not enough." Attach an image with "Attach image" when the issue is visible.

> **Expected result:** A support conversation opens and your first message is sent.

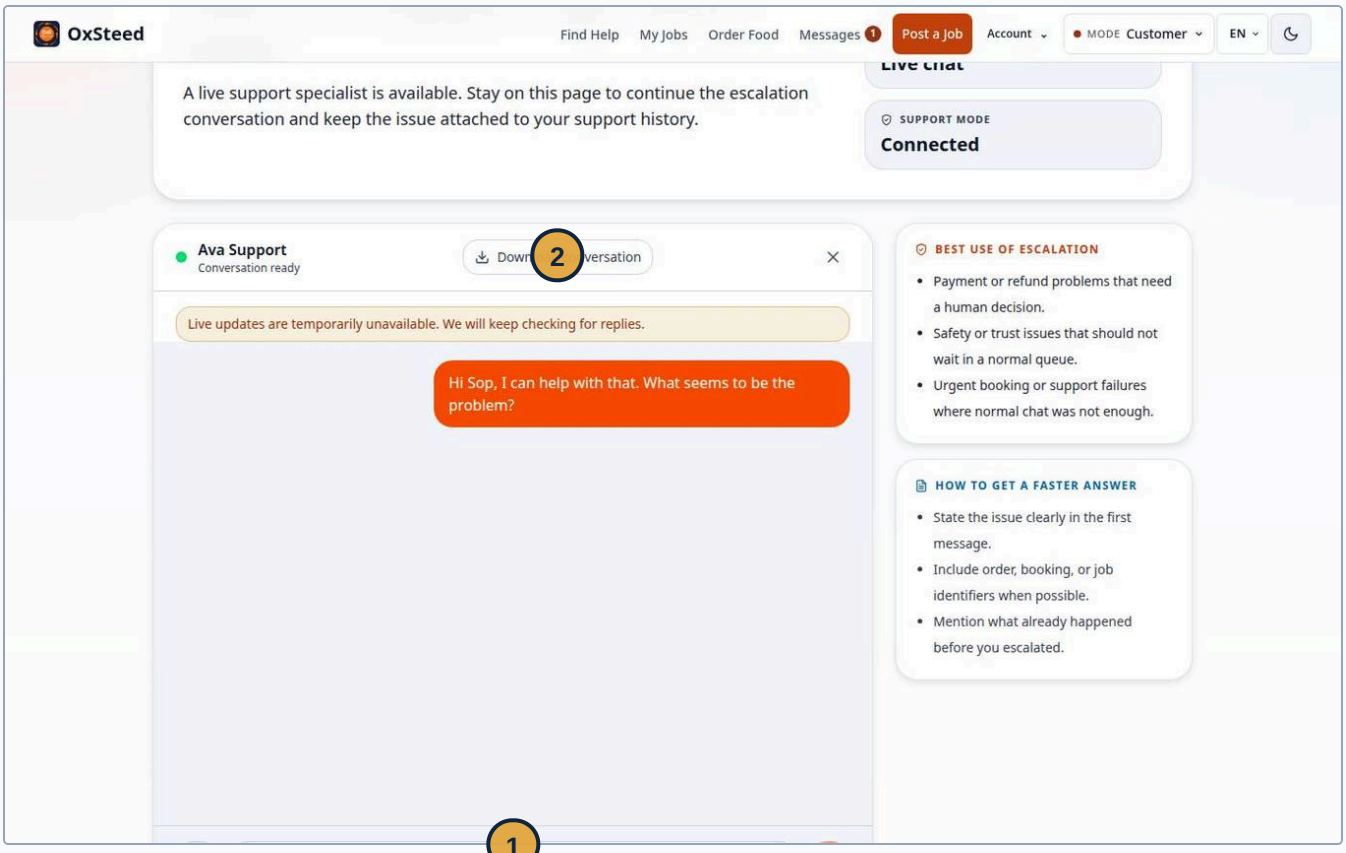

Figure 1. Starting a support conversation, desktop view. *(Image description: Support page with a new conversation composer)*

1. **1.** Conversation composer
2. **2.** Attach image button

Step 2: Escalate to a tracked ticket when needed

For issues that need a human decision (payment or refund problems, safety or trust issues), escalate the conversation. The page explains "What happens after you submit": the escalation becomes a tracked ticket, the team can follow up by email, and "You get a ticket identifier to reference if the issue continues." Save that identifier.

> **Expected result:** You receive a ticket identifier for the tracked ticket.

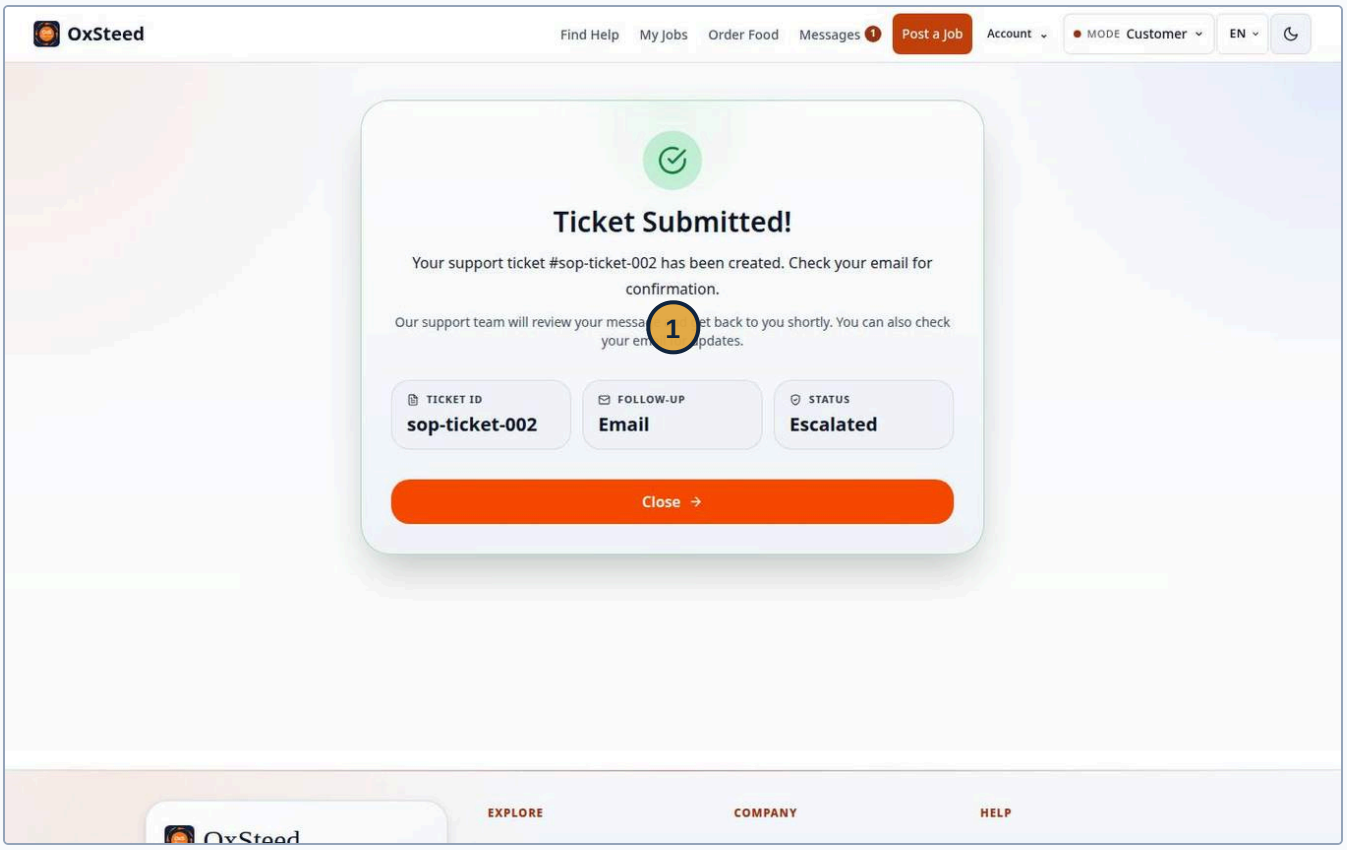

Figure 2. The escalation confirmation with your ticket identifier. *(Image description: Escalation confirmation with the ticket identifier)*

1. **1.** Ticket identifier

Step 3: Track the ticket and reply to the team

Open your ticket (signed-in users: your tickets list; guests: the ticket link from email). The ticket page shows Category, Priority, and Created, with the "Messages" thread. Write in the Reply box (placeholder "Write your reply...") and choose Reply. If the ticket was closed but the issue continues, reopen it from the support center.

> **Expected result:** Your reply appears in the Messages thread and the team is notified.

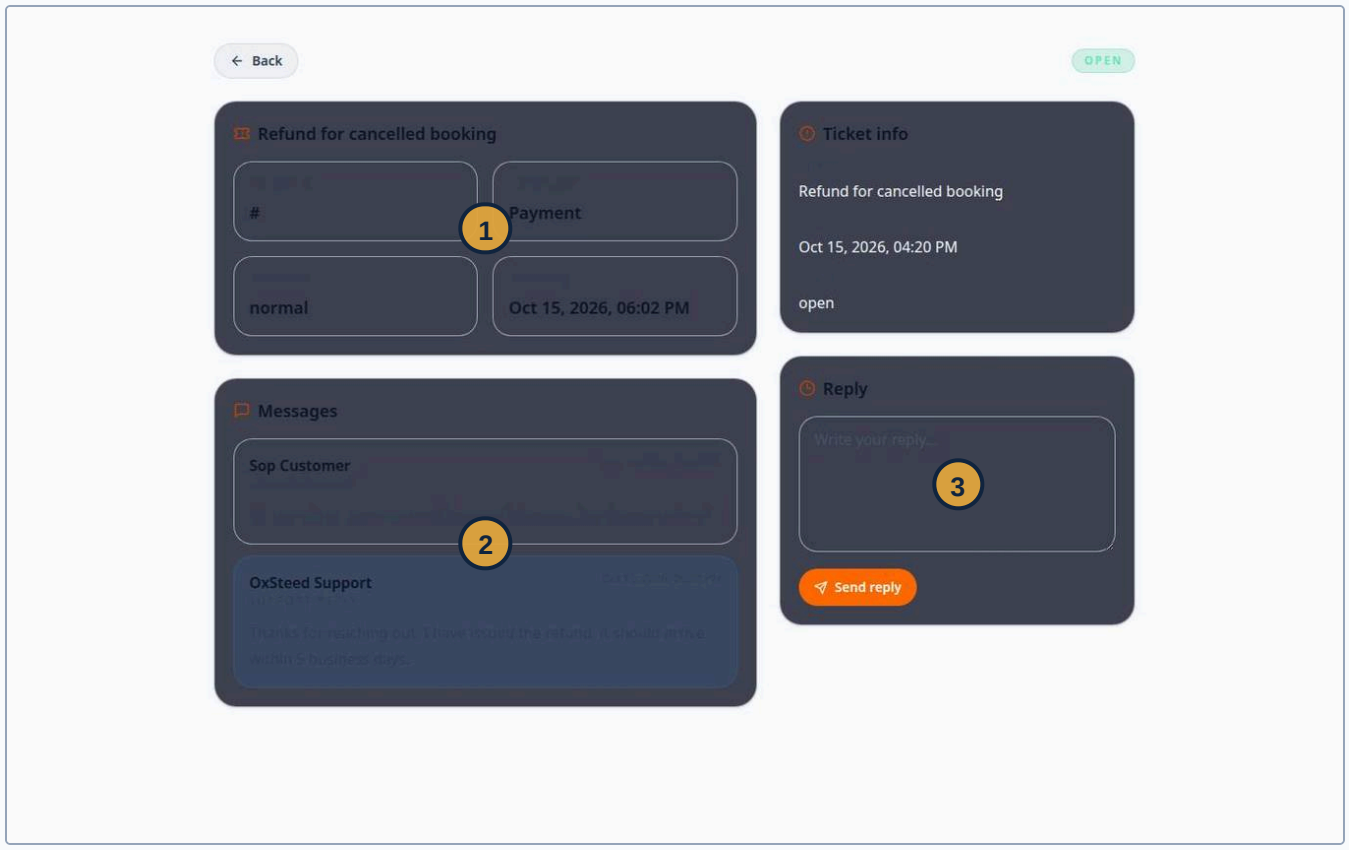

Figure 3. The ticket detail page, desktop view. *(Image description: Ticket detail page with the messages thread and reply box)*

1. **1.** Ticket details
2. **2.** Messages thread
3. **3.** Reply box

Confirm it worked

The ticket page shows your messages and the team's replies; closed tickets say so and can be reopened.

If something goes wrong

Problem	What to do
The conversation will not verify (guest).	Use the exact email you started the conversation with and enter the code before it expires. Choose the resend option if nothing arrives.
The ticket page fails to load.	Reload and check you opened the current ticket link. If the error persists, start a fresh conversation and reference your ticket identifier.

Need help?

For urgent safety issues, use the direct contact option on the escalation page ("Need a faster response?").

Guide ID: hiring-reviews | **Revision:** 1 | **Area:** Hiring

SOP LIBRARY / HIRING **ENGLISH**

Leave and respond to reviews

Guide ID	**hiring-reviews**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Helper, Business owner, Restaurant
Availability	**Supported**
Online version	/how-it-works/hiring/leave-review

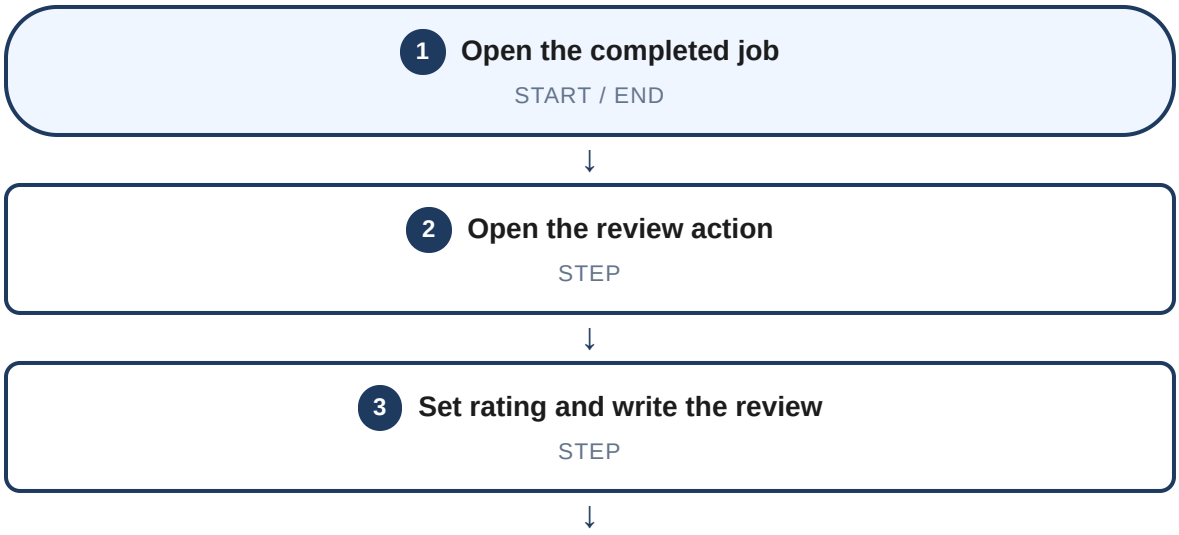

Goal

Leave a review for a finished job and respond to reviews left for you.

Before you start

1. Be signed in to your OxSteed account.
2. The job must be completed before reviews unlock.

Process map

- Open the completed job → Respond to a review left for you
- Respond to a review left for you → Review published

Text version. 1. Open the completed job (/jobs/:id) or order (/orders/:id). 2. Choose the review action to open the review dialog ("Leave a Review"). 3. Pick a Rating and write "Your Review" (and the testimonial where asked). 4. Choose "Submit Review" ("Submitting..." while it saves). 5. When someone reviews you, answer with the response action; responses show as the "Business Response" on the review.

Steps

Step 1: Open the review action on the finished job

On the completed job detail page, choose the review action to open the review dialog titled "Leave a Review". Reviews are eligibility-checked: the action only appears when you are allowed to review that job or order.

> **Expected result:** The "Leave a Review" dialog opens.

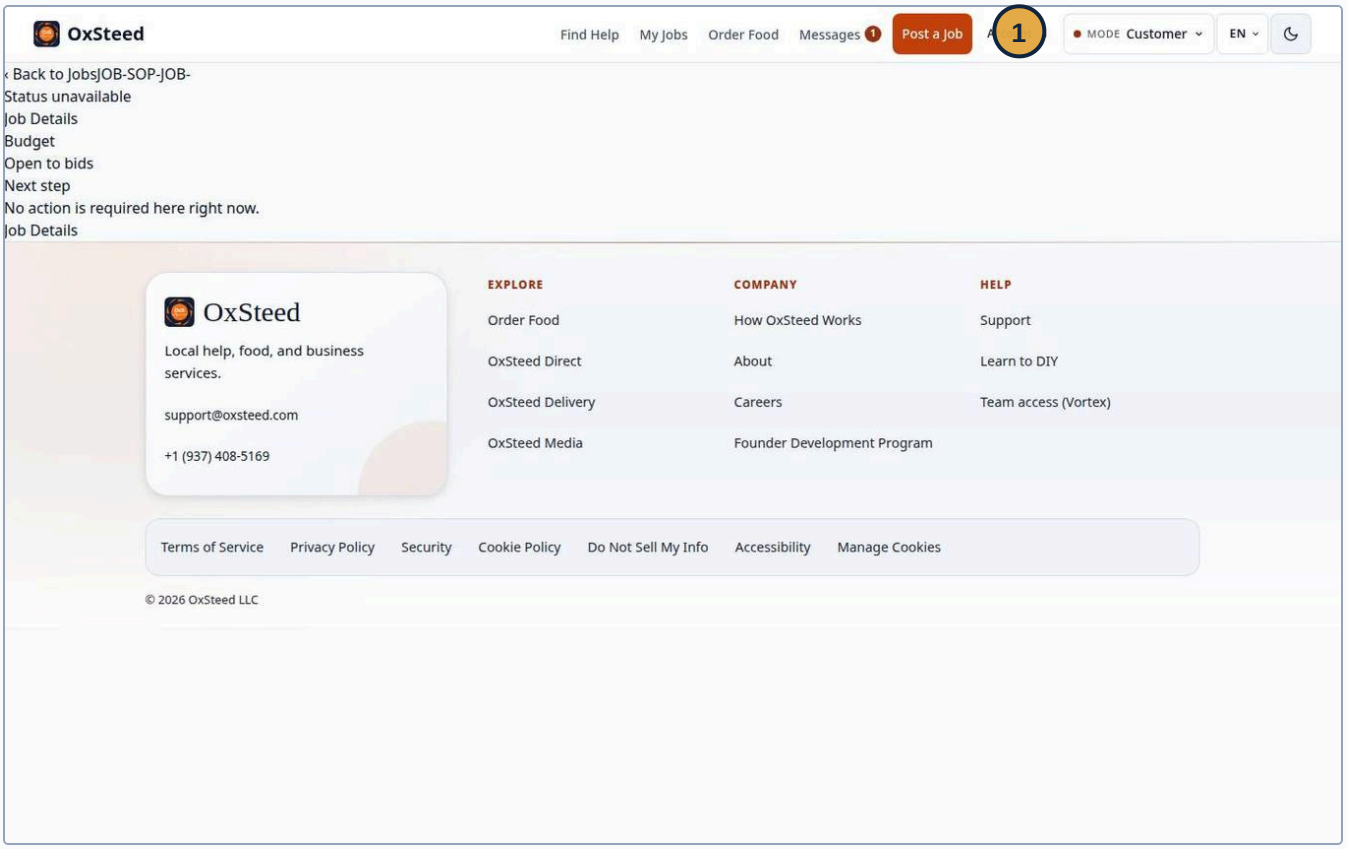

Figure 1. The review action on a completed job. *(Image description: Completed job page with the review action available)*

1. **1.** Review action

Step 2: Set the rating and write your review

Pick the Rating (stars) and write "Your Review". Say what was done, how communication went, and whether you would hire again. The dialog counts characters and requires a rating ("Rating is required") before you can submit.

> **Expected result:** The rating is selected and the review text is complete.

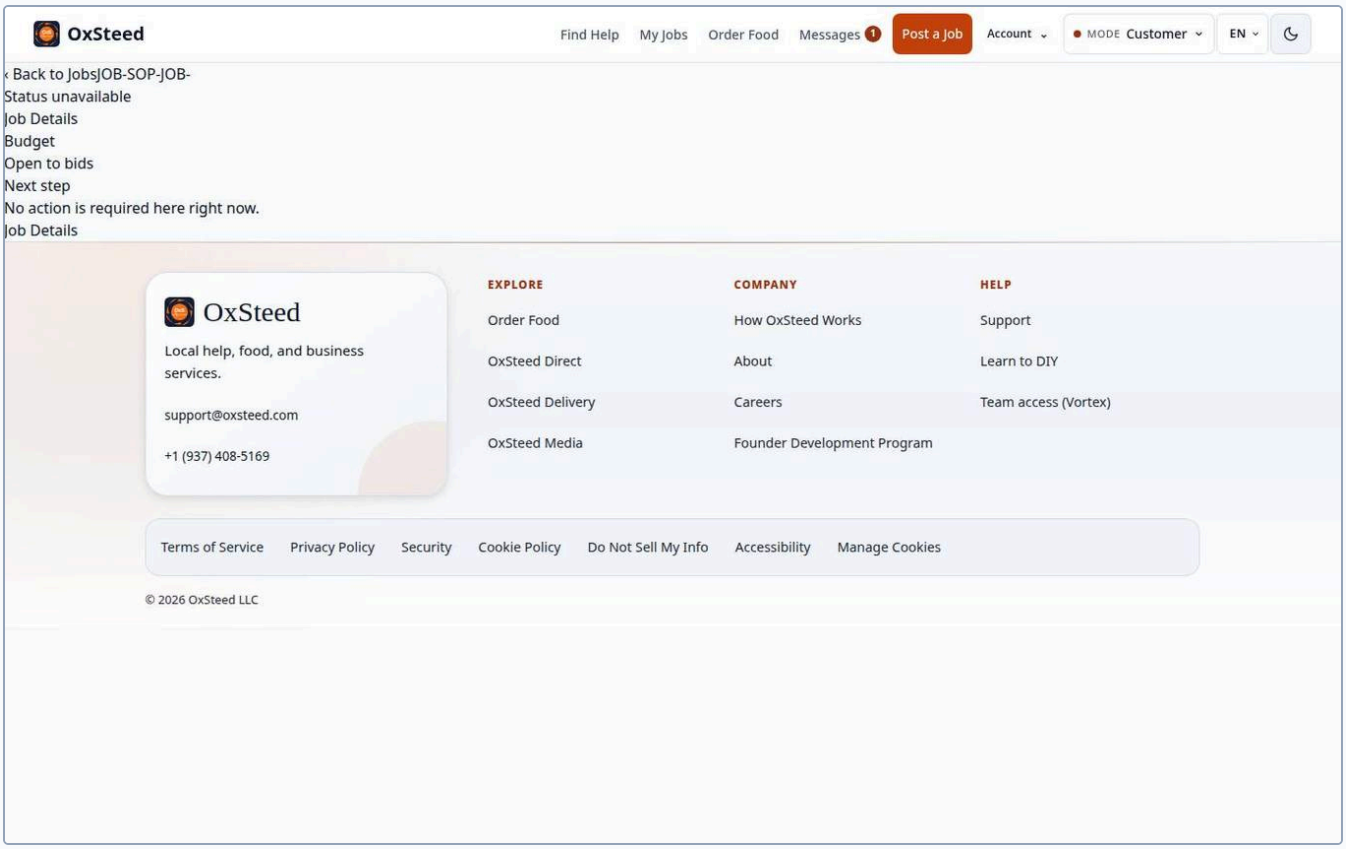

Figure 2. The Leave a Review dialog, desktop view. *(Image description: Leave a Review dialog with rating and review text)*

Step 3: Submit the review

Choose "Submit Review". The button shows "Submitting..." and then a success confirmation. The review appears on the helper's or business's profile and in the job or order history.

> **Expected result:** The review publishes and appears on the profile.

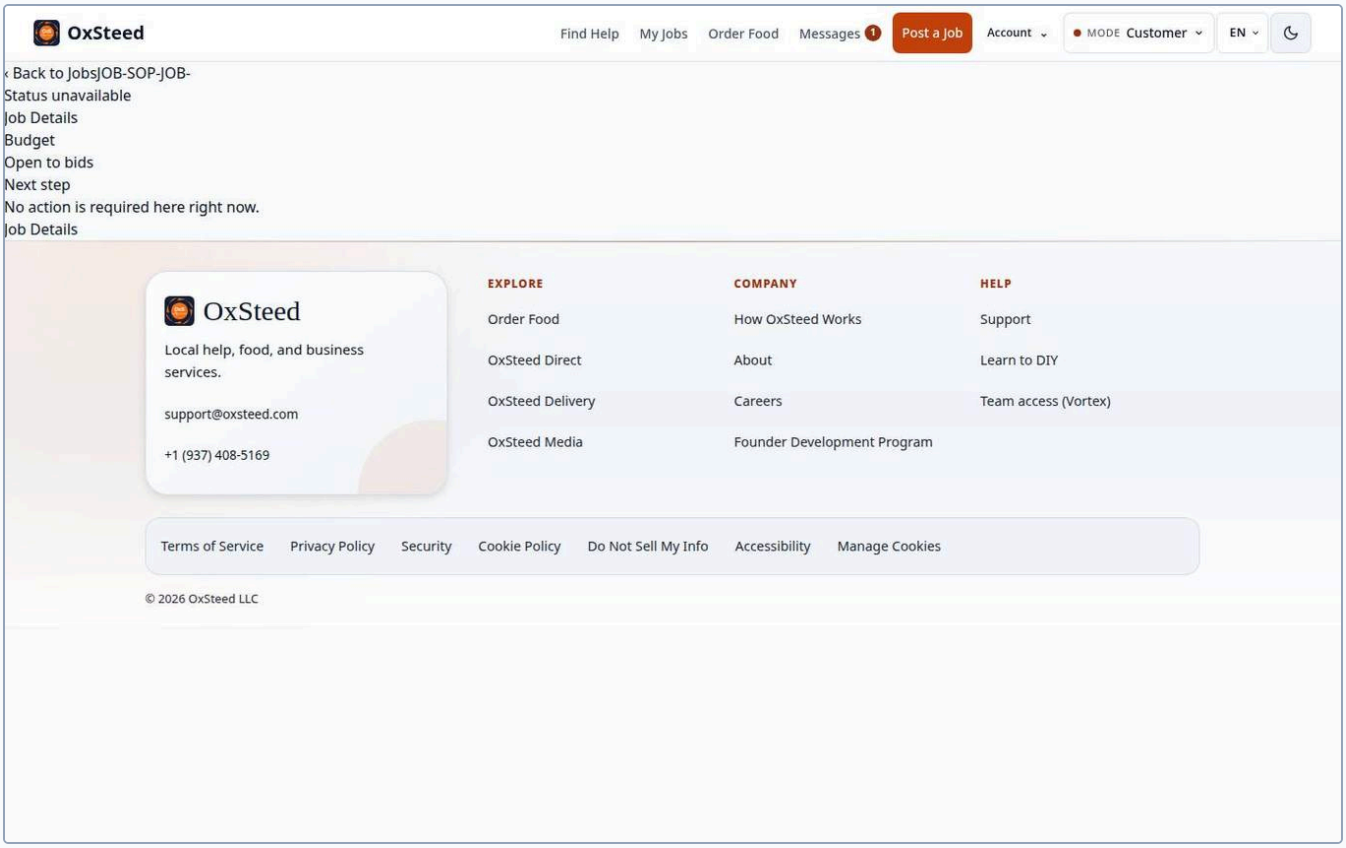

Figure 3. The submitted review confirmation. *(Image description: Review submitted confirmation)*

Step 4: Respond to a review left for you

When a customer reviews you, open the review and use the respond action. Your answer shows as the "Business Response" under the review. Keep it factual and professional; future customers read both sides.

> **Expected result:** Your response appears under the original review.

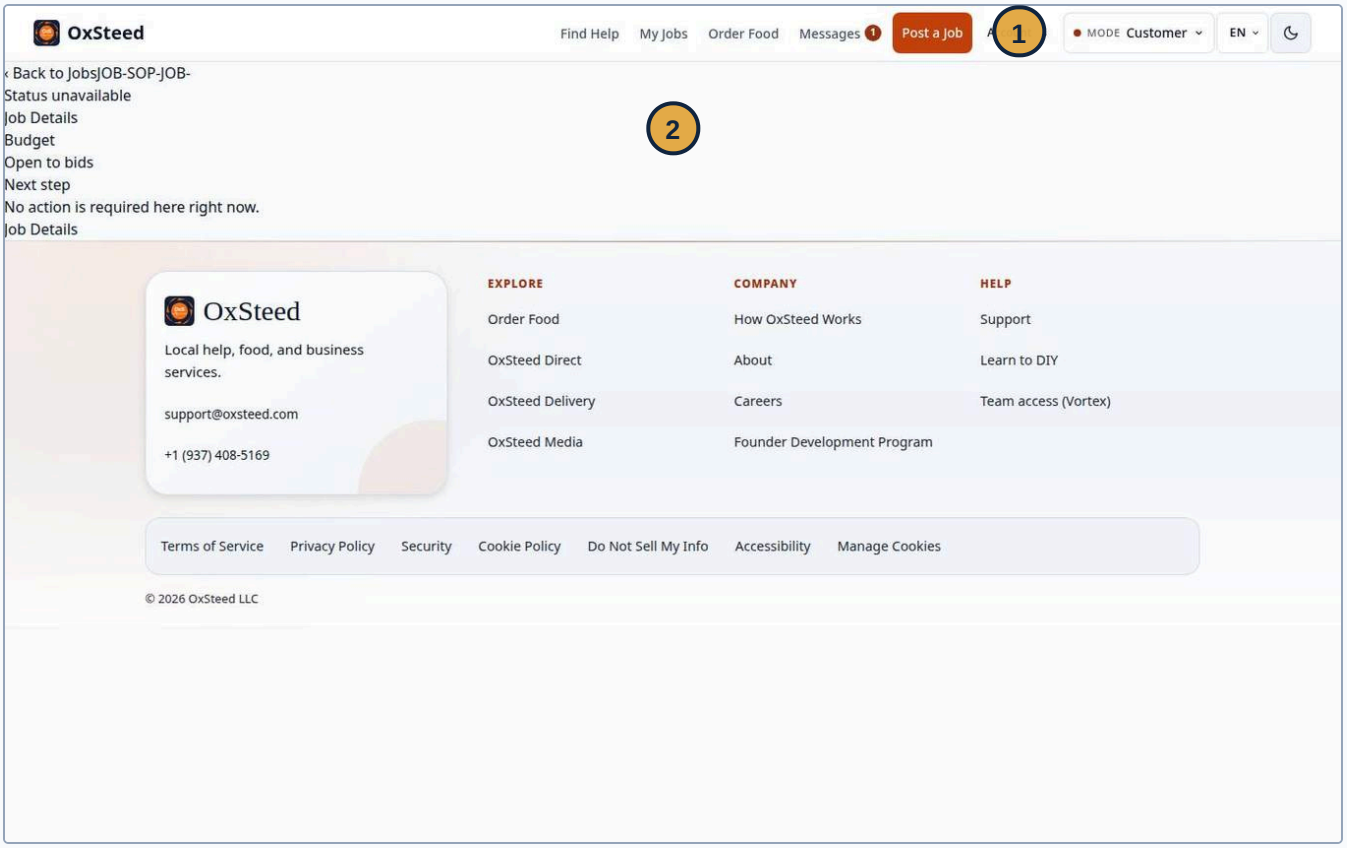

Figure 4. Responding to a review. *(Image description: Review with the respond action and Business Response area)*

1. **1.** Respond action
2. **2.** Business Response area

Confirm it worked

The review appears on the profile with your rating and text; your responses appear as the Business Response. Food order reviews are per order and follow the same pattern.

If something goes wrong

Problem	What to do

The review action does not appear.	Reviews are eligibility-checked and only unlock after completion. Confirm the job is marked complete and that you have not already reviewed it.
The submit fails.	Make sure a rating is selected and the text meets the length limits, then try again.

Need help?

If a review is abusive or wrong, report it through support at /support.

Guide ID: restaurant-cancellations | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Cancel a food order

Guide ID	**restaurant-cancellations**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager, Kitchen staff
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-cancellations

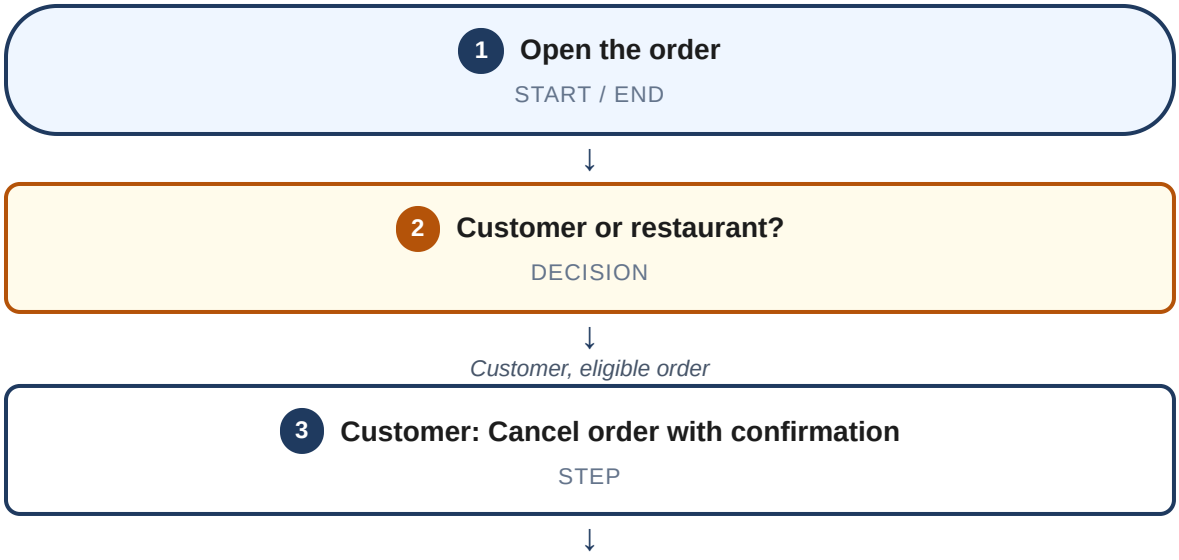

Goal

Cancel an order that cannot be fulfilled, from the customer or the restaurant side, with the right money handling.

Before you start

1. Sign in to your OxSteed account.
2. Open the order you want to cancel.

Process map

- *Customer, food order:* Customer or restaurant? → Food order: ask the restaurant via Get help
- *Restaurant:* Customer or restaurant? → Restaurant: Cancel in the order center
- Food order: ask the restaurant via Get help → Restaurant: Cancel in the order center
- Restaurant: Cancel in the order center → Money follows the cancel (refund or credit)

Text version. Open the order and decide who cancels it. Customers can cancel eligible non-food orders themselves with the "Cancel order" button after confirming. Food orders are cancelled by the restaurant from the order center, or by asking through "Get help with this order". The restaurant cancels from the order center or recalls the ticket in the kitchen. The payment is then refunded or returned to restaurant credit depending on how it was paid.

Steps

Step 1: Open the order

Open the order from /orders or /food/orders/:orderId. The page shows the "Order summary", "Payment details", and the current order status.

> **Expected result:** You can see the order status and whether a cancel option is available.

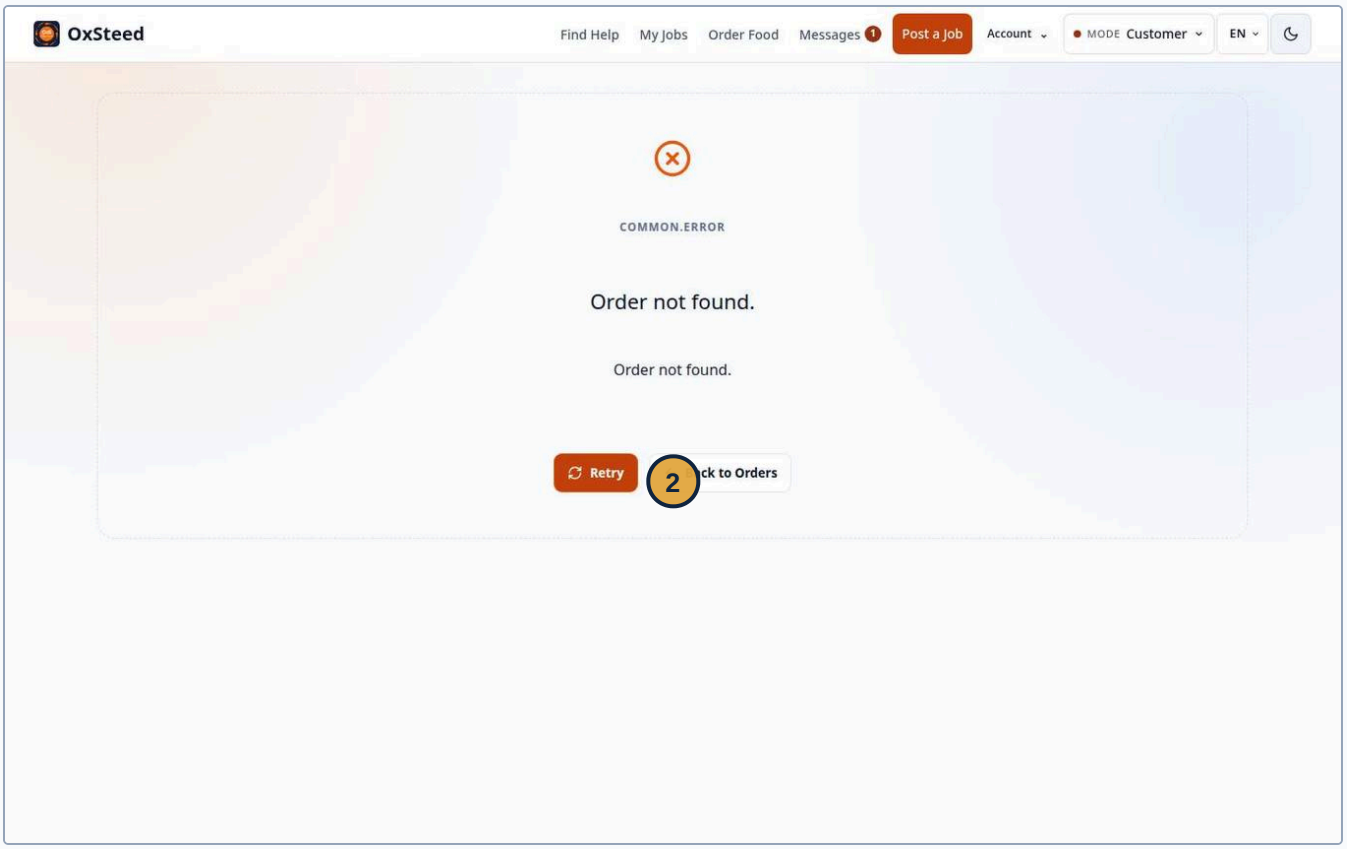

Figure 1. Opening the order, desktop view. *(Image description: Order detail page with the action buttons)*

1. **2.** Order actions

Step 2: Cancel an eligible order as a customer

For non-food orders in "pending" or "paid" status, choose "Cancel order" and confirm in the dialog. The "Cancel order" button only renders while the order is still cancellable; food orders are handled by the restaurant instead.

> **Expected result:** The order status changes to cancelled and you see "Order cancelled".

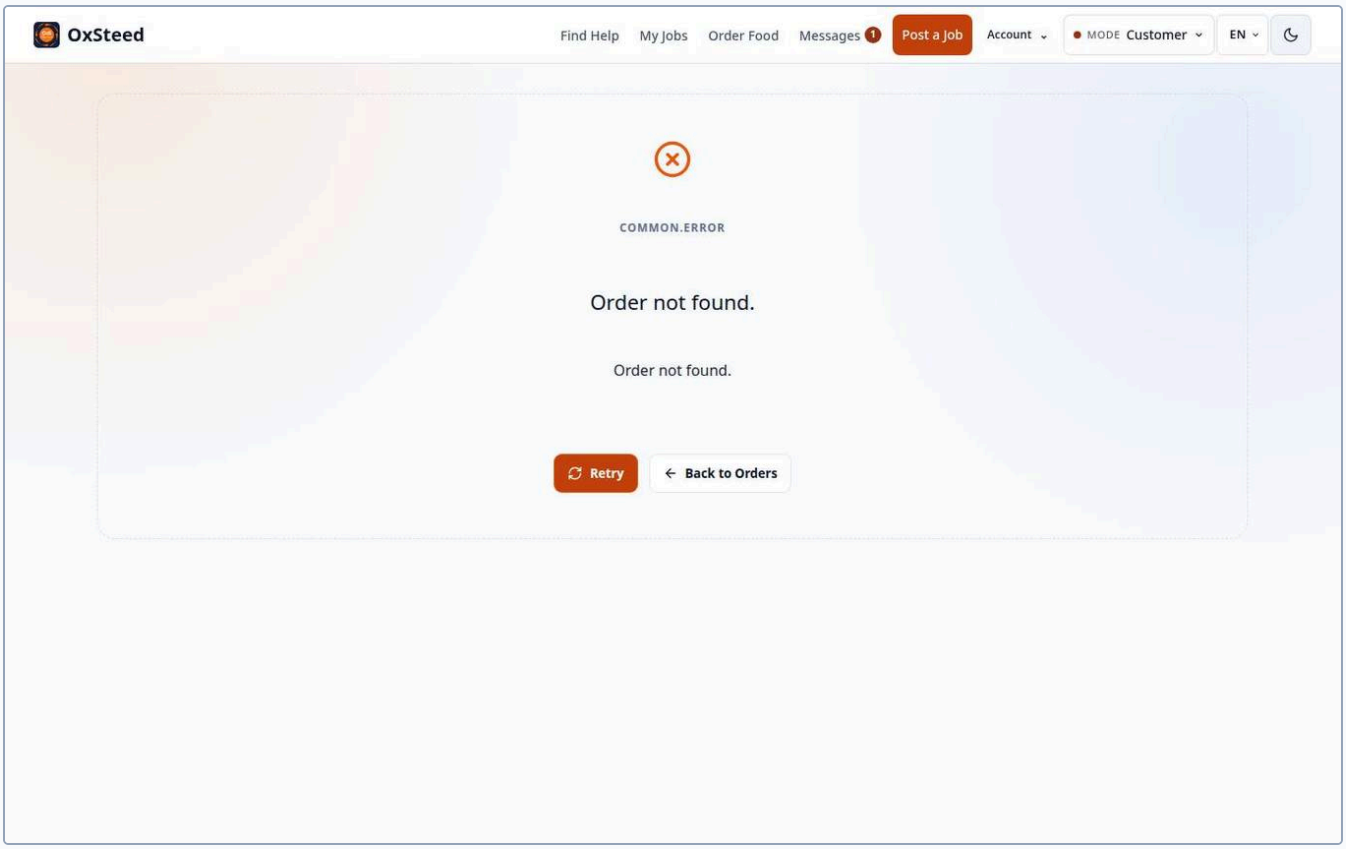

Figure 2. Cancelling as a customer, desktop view. *(Image description: Cancel order button on an order)*

Step 3: Ask the restaurant about a food order

Food orders cannot be cancelled from the order detail page. Choose "Get help with this order" on the order and send a message asking the restaurant to cancel. The restaurant cancels from its side.

> **Expected result:** The restaurant receives your request and cancels the order for you.

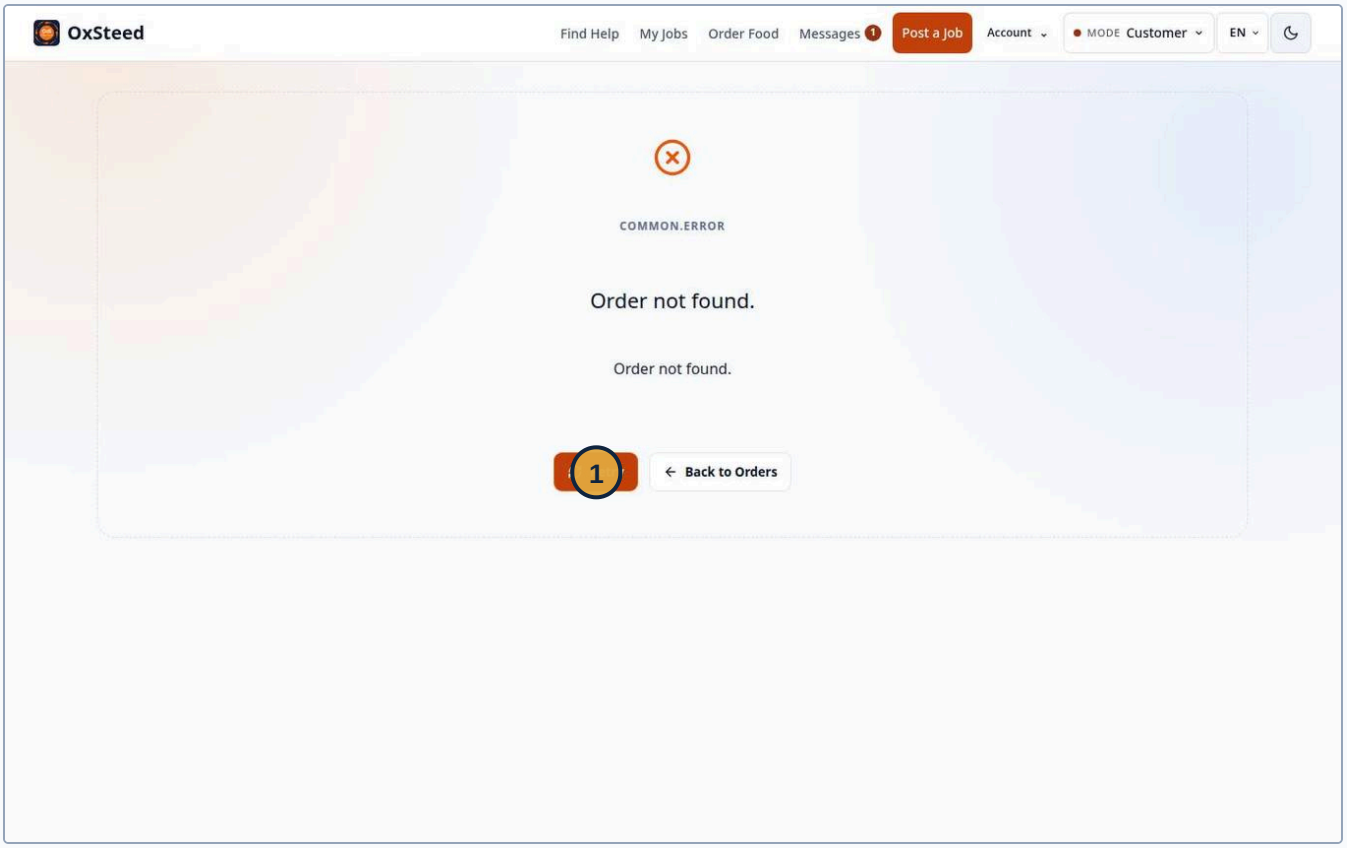

Figure 3. Asking the restaurant, desktop view. *(Image description: Get help with this order panel)*

1. **1.** Get help with this order button

Step 4: Cancel an order in the restaurant order center

On the restaurant dashboard at /restaurants/merchant, open the "Orders" tab ("Manage live service and find every completed, cancelled, or refunded order."). Choose the order ("Select an order", then "Order details"). On orders with status received, accepted, or preparing, choose "Cancel" to set the order to cancelled. Advance other orders with the status button ("Start preparing", "Mark ready", "Complete") instead.

> **Expected result:** The order status becomes cancelled and appears in the "Order history" view.

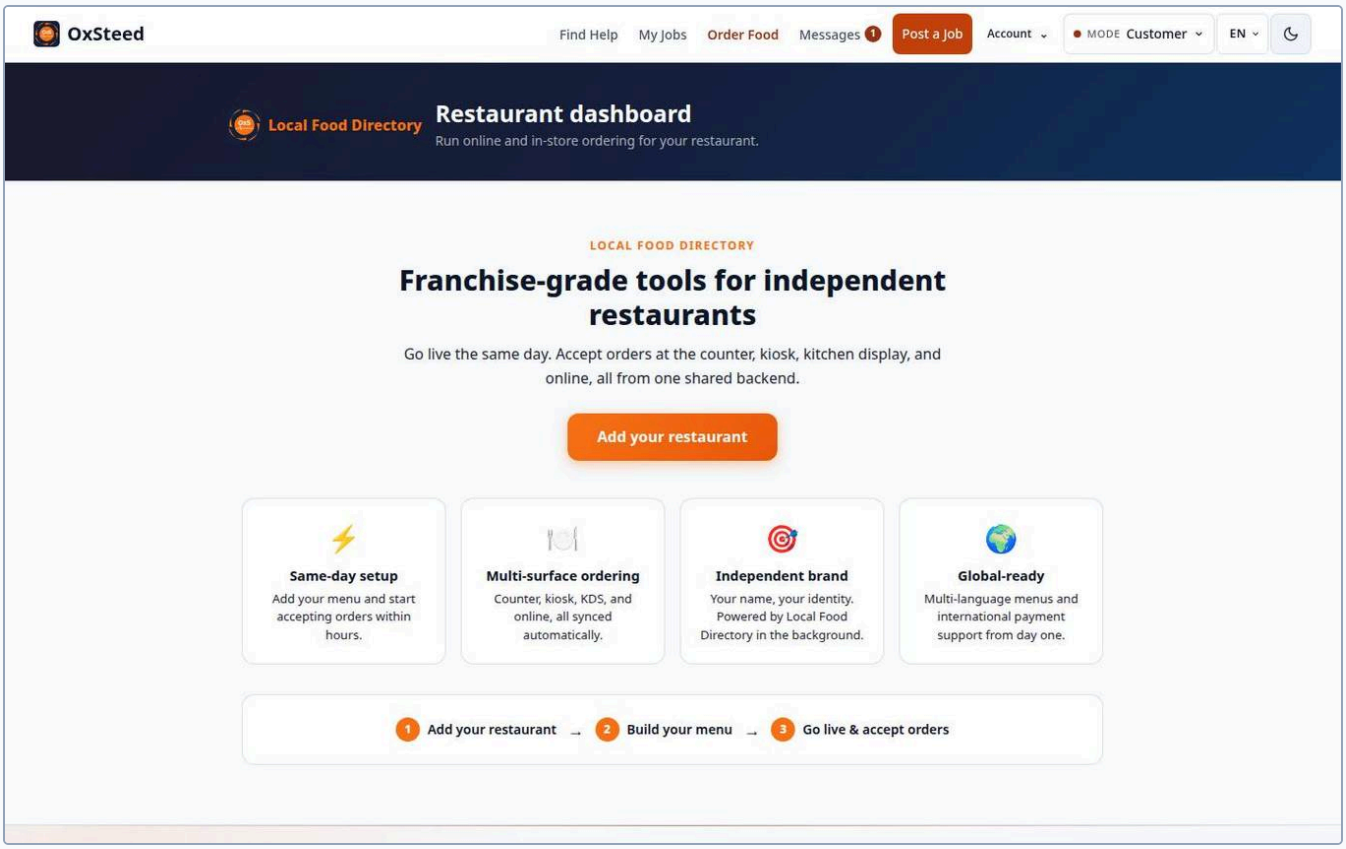

Figure 4. Cancelling in the order center, desktop view. *(Image description: Order center order detail with the Cancel button)*

Step 5: Recall a kitchen ticket if needed

If the ticket is already on the Kitchen display, use "Recall" on the item or "Reopen" on the order so the kitchen stops working it.

> **Expected result:** The kitchen stops preparing the cancelled order.

Figure 5. Recalling a kitchen ticket, desktop view. *(Image description: Kitchen ticket with recall control)*

Step 6: Confirm the money handling

Cancellation does not automatically refund every payment type. Card orders are refunded by cancelling ("Card orders are refunded by cancelling the order. The card refund happens automatically."). Orders paid with Restaurant credit are re-credited to the restaurant wallet; direct or pay-at-restaurant orders are simply marked cancelled. Use the refund guide for refund-specific flows.

> **Expected result:** The order shows "Payment refunded" or the credit returns to the customer wallet.

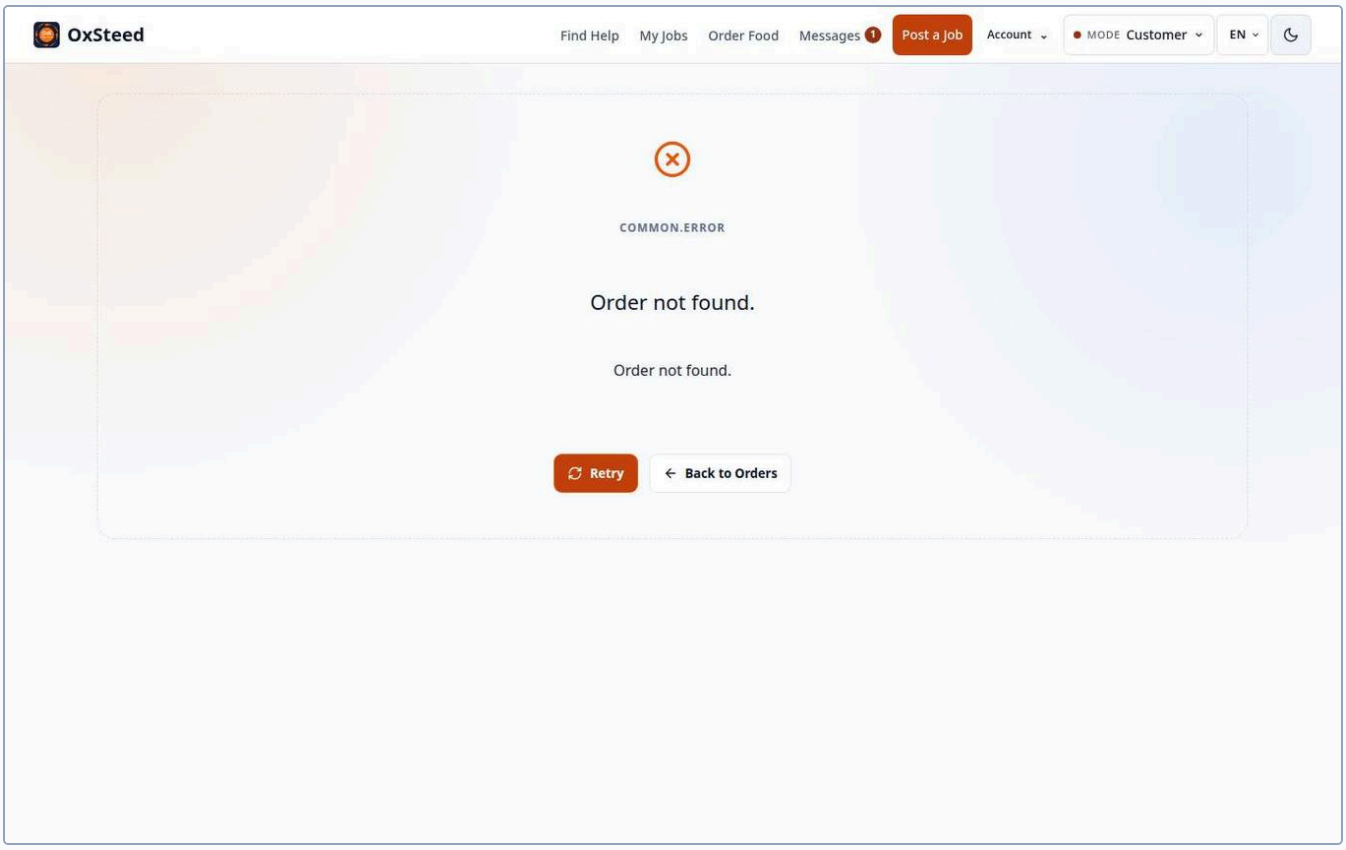

Figure 6. Checking payment status after cancellation, desktop view. *(Image description: Cancelled order showing the payment status)*

Confirm it worked

The order status is cancelled and the payment shows the right follow-up: refunded, re-credited, or marked.

If something goes wrong

Problem	What to do

The "Cancel order" button is missing on a food order.	That is expected: food orders are cancelled by the restaurant. Use "Get help with this order" to ask the restaurant to cancel.
Cancelling failed.	You see "Failed to cancel order" or "Could not update the order." Retry; if the order already moved to ready or completed, it can no longer be cancelled.
The payment was not refunded after cancelling.	Only card payments refund automatically on cancel. Restaurant credit returns to the wallet, and direct payments need the merchant refund flow. See the refunds guide.

Need help?

For cancellation help, use the in-app support page at /support.

Guide ID: restaurant-menus | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Manage menus and items

Guide ID	**restaurant-menus**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-menus

Goal

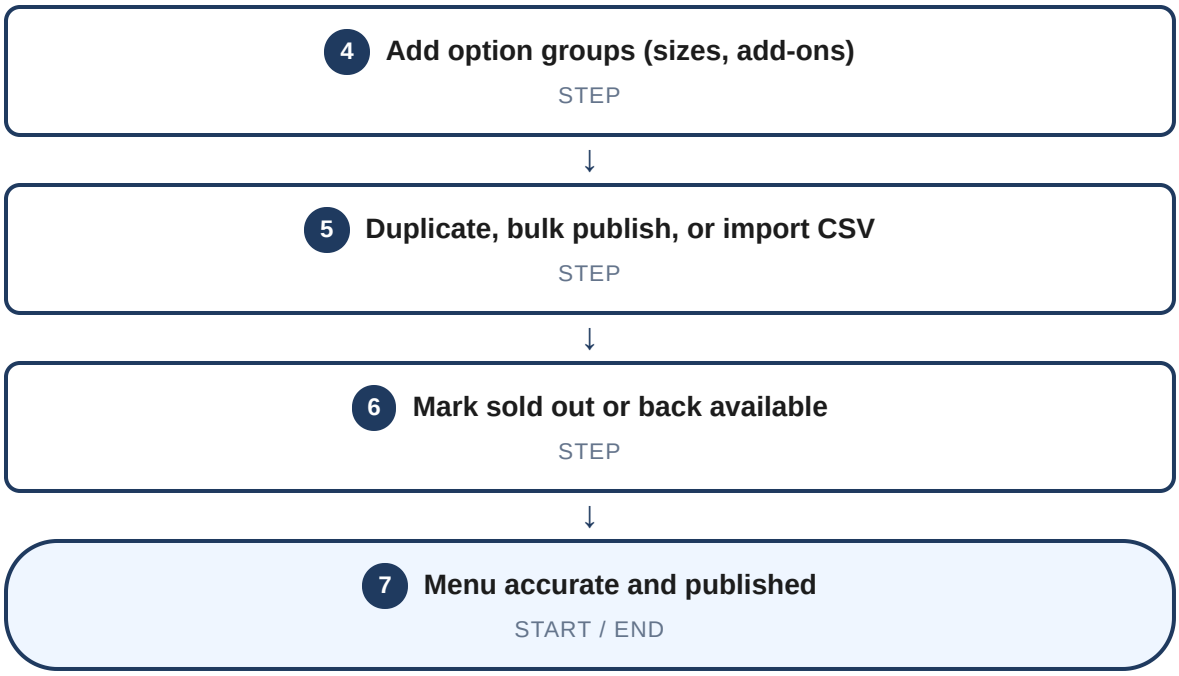

Keep the restaurant menu accurate: add items and categories, set prices, manage options, and publish what customers can order.

Before you start

1. Sign in and open the restaurant dashboard.
2. Finish restaurant setup so you can open the dashboard.

Process map

Text version. Open the Menu tab on the restaurant dashboard. Add categories first, then add items with names, prices, descriptions, and categories. Attach option groups for sizes or add-ons, then duplicate or bulk-publish items, or import a CSV. Mark items sold out or available as stock changes so the menu always matches what the kitchen can make.

Steps

Step 1: Open the Menu tab

On the restaurant dashboard at /restaurants/merchant, choose the "Menu" tab. The menu manager opens with the "Menu" heading and the "Add item" and "Import CSV" buttons.

> **Expected result:** The menu manager lists your current items and categories.

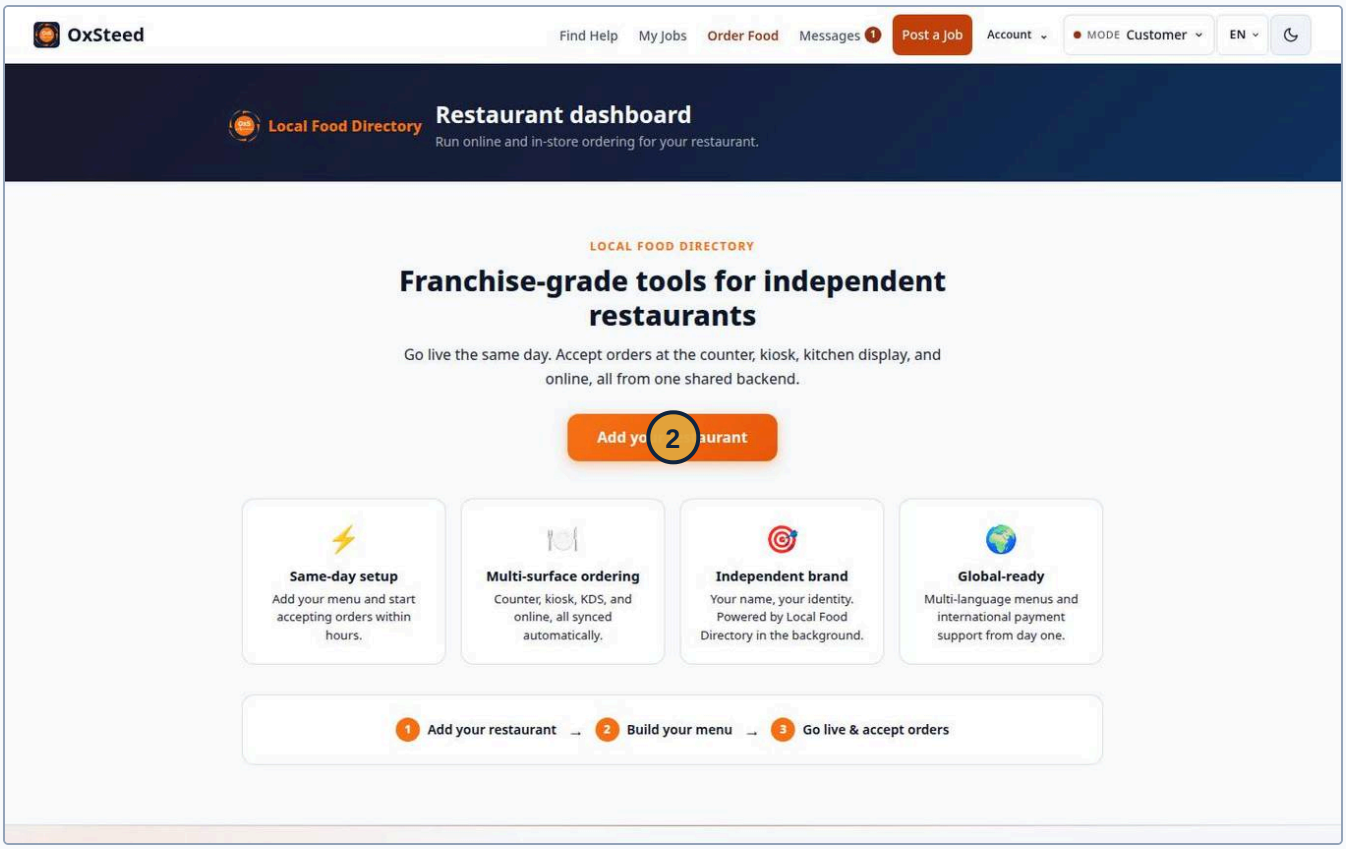

Figure 1. The Menu tab, desktop view. *(Image description: Menu manager tab with the item list)*

1. **2.** Add item and Import CSV buttons

Step 2: Add categories

Use the "Add category" field and enter a name like "Burgers" ("New category name (e.g. Burgers)"). Adding categories first keeps items organized for customers.

> **Expected result:** The new category appears in the item list and in the "Category" dropdown.

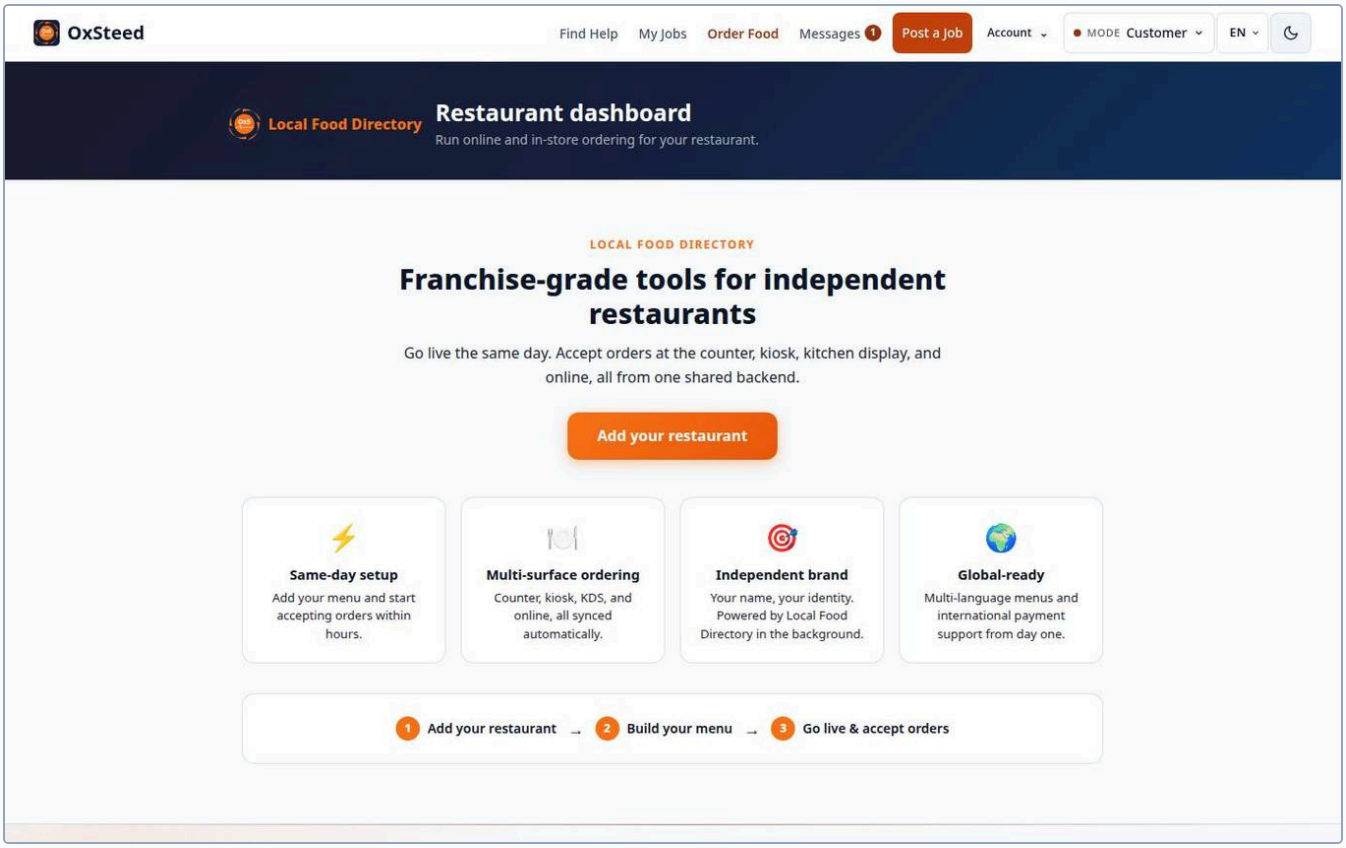

Figure 2. Adding a category, desktop view. *(Image description: Add category field in the menu manager)*

Step 3: Add a menu item

Choose "Add item". In the "New item" editor, enter the "Item name", "Price", "Description", and "Category" ("No category" keeps it uncategorized). Choose "Save". A $0 price shows the warning "This item is priced at $0. Customers can order it for free." and an unusually high price shows "That price looks like a typo" with "The price is correct" to confirm.

> **Expected result:** The item appears in the list with its price and category.

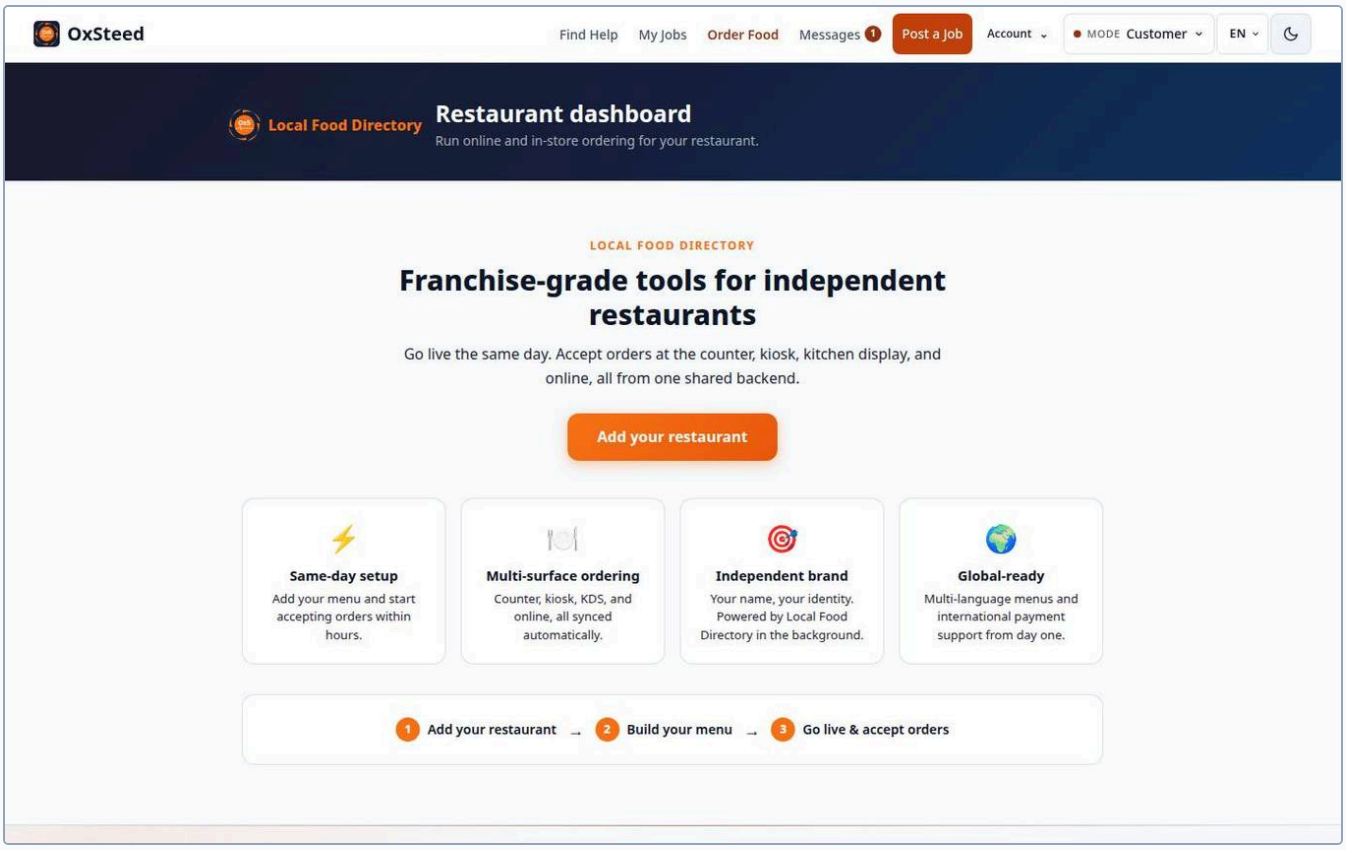

Figure 3. Adding a menu item, desktop view. *(Image description: New item editor with name, price, description, and category)*

Step 4: Add option groups for sizes and add-ons

On an item, choose "Options". Enter the "Option group name (e.g. Size)", the "Max choices", and the "Choices (Name:price in cents, comma separated)" (for example "Small:0, Medium:50, Large:100"). Choose "Save". If an item has no option groups yet you see "No option groups yet. Add sizes, add-ons, or choices before saving."

> **Expected result:** Customers can pick the options when they add the item to their order.

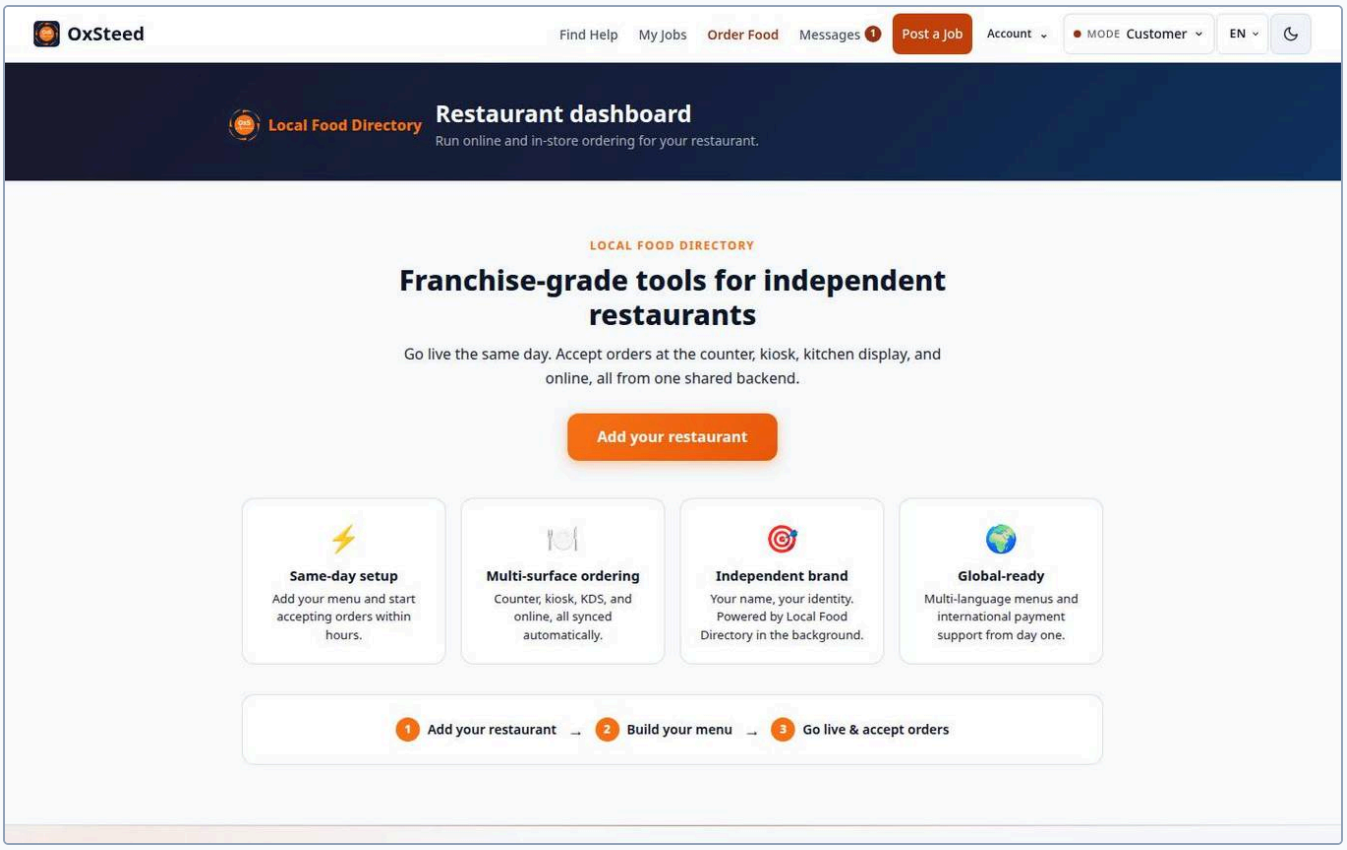

Figure 4. Adding an option group, desktop view. *(Image description: Option group editor with choices)*

Step 5: Duplicate, bulk publish, or import from CSV

Use "Duplicate" on an item to create a draft copy you can rename. Use "Publish" to bulk-publish selected items. For a large menu, choose "Import CSV" and fix any rows flagged with reasons like "missing name", "invalid price", or "price is $0" until you see the import summary.

> **Expected result:** Items move from draft to published so customers can order them.

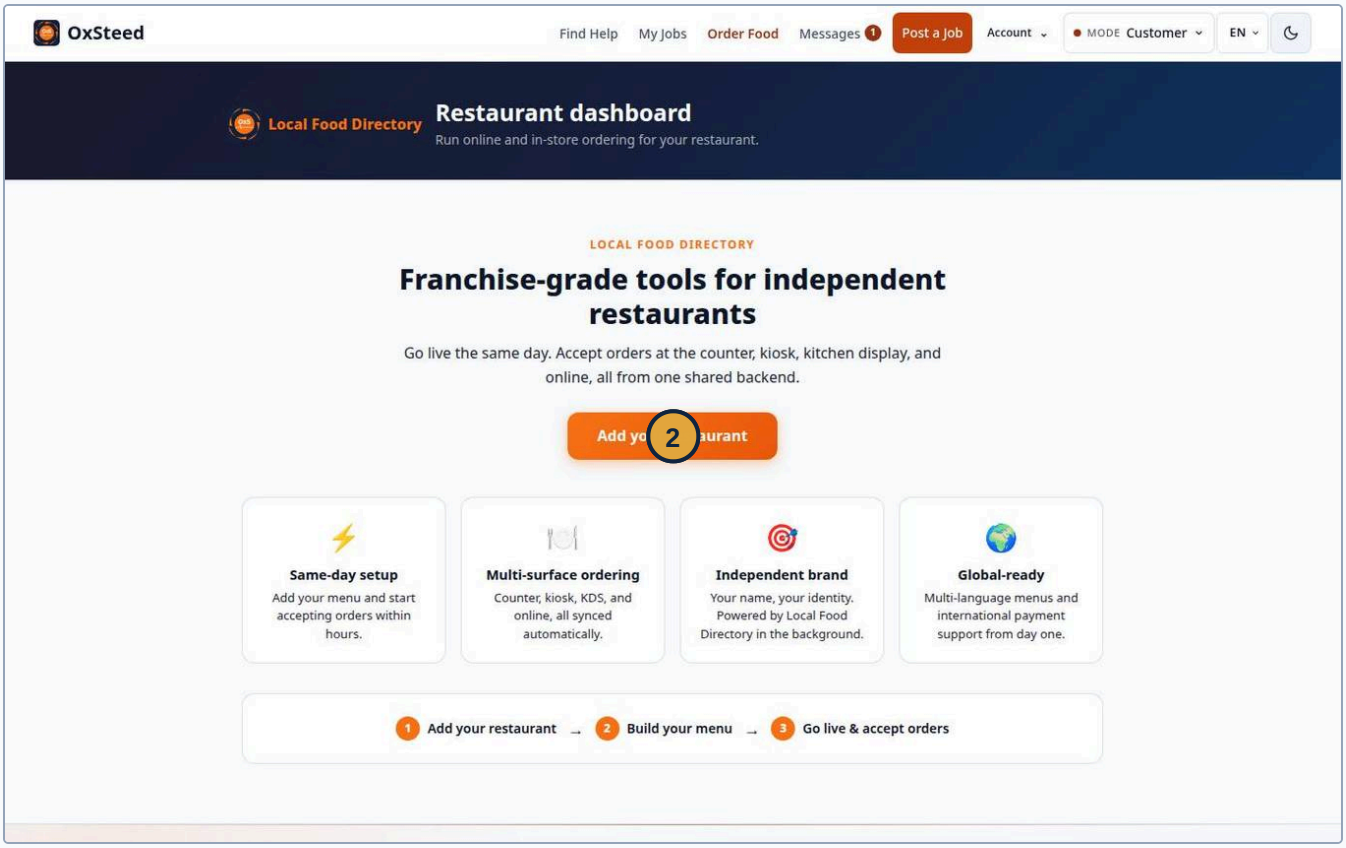

Figure 5. Duplicating and publishing items, desktop view. *(Image description: Item actions including Duplicate and Publish)*

1. **1.** Duplicate action
2. **2.** Publish bulk action

Step 6: Mark items sold out or available

On an item, use "Sold out" when the kitchen cannot make it, and "Available" when it returns. Customers see the "Sold out" badge on the menu and cannot order it while it is marked.

> **Expected result:** The item badge updates immediately on the customer menu.

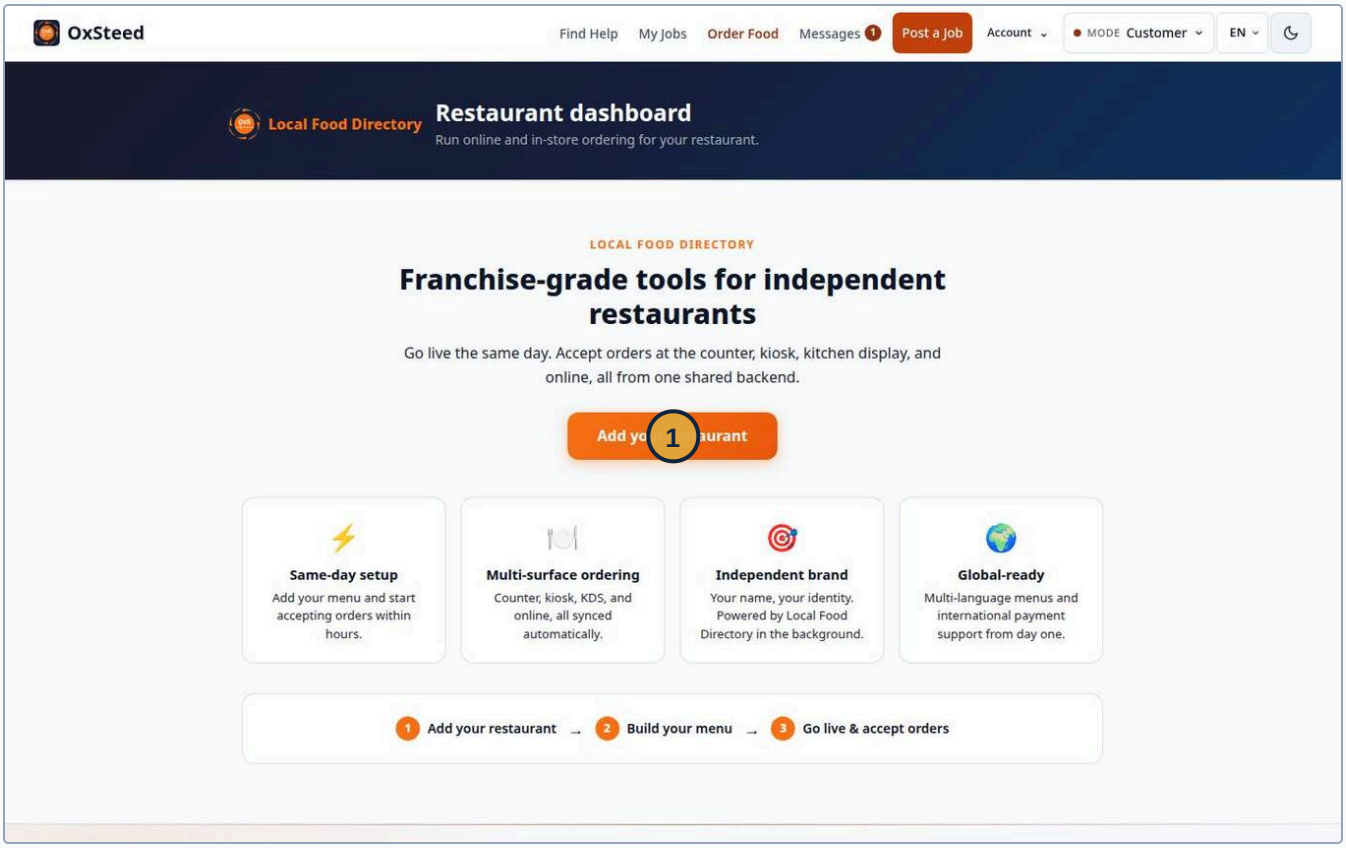

Figure 6. Marking an item sold out, desktop view. *(Image description: Sold out toggle on a menu item)*

1. **1.** Sold out toggle

Confirm it worked

The customer menu shows the current items, options, and availability, with no drafts you meant to publish.

If something goes wrong

Problem	What to do

An item does not appear on the customer menu.	Check that it is published (not a draft) and not marked "Sold out". The Home tab also alerts when "{{count}} draft items are not published".
Saving an item fails.	You see "Could not save. Please try again." Retry after checking your connection; the price fields must be valid numbers.
CSV rows were skipped.	The import lists the reason per row ("missing name", "invalid price", "price over $500 looks like a typo"). Fix the CSV and import again.

Need help?

For menu help, use the in-app support page at /support.

Guide ID: restaurant-pickup-delivery-handoff | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Hand off pickup and delivery orders

Guide ID	**restaurant-pickup-delivery-handoff**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Runner, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-pickup-delivery-handoff

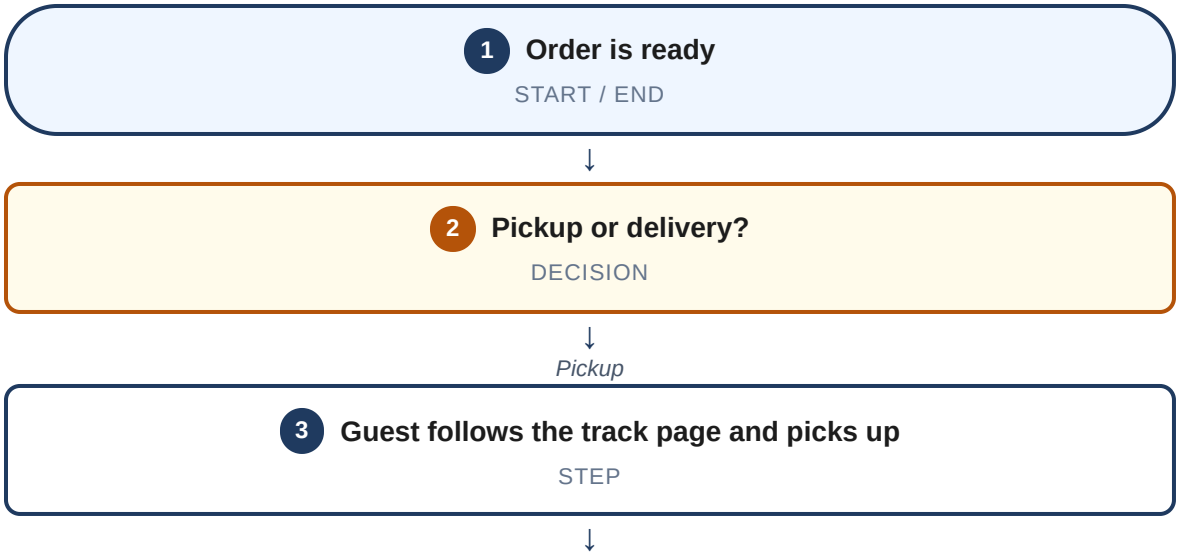

Goal

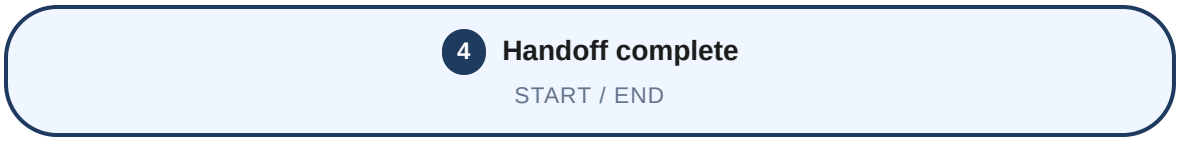

Hand pickup orders to guests and complete runner deliveries with proof, so every order has a clear handoff record.

Before you start

1. The order is marked ready in the kitchen display.
2. Runners: sign in and open the runner page for your restaurant.

Process map

- *Delivery:* Pickup or delivery? → Runner claims the delivery offer
- Runner claims the delivery offer → Runner delivers with proof
- Runner delivers with proof → Runner settles cash and records remittance
- Runner settles cash and records remittance → Handoff complete

Text version. When the kitchen marks an order ready, pickup guests follow the track page to the counter while delivery orders go to the runner page as "New delivery offers". The runner claims the offer, shares live location, starts the delivery, logs proof, and marks it delivered. Cash orders are settled through "Create settlement", "Mark paid", and "Record remittance".

Steps

Step 1: Follow the track page as a guest

Open /food/track/:token ("Track Order"). It shows "Order", "Status", "Ready around", "Payment", "Items", and "Total". When the order is ready, pick it up at the counter. "Print Receipt" gives you the paper record.

> **Expected result:** You know when and where to collect the order, and you have the receipt.

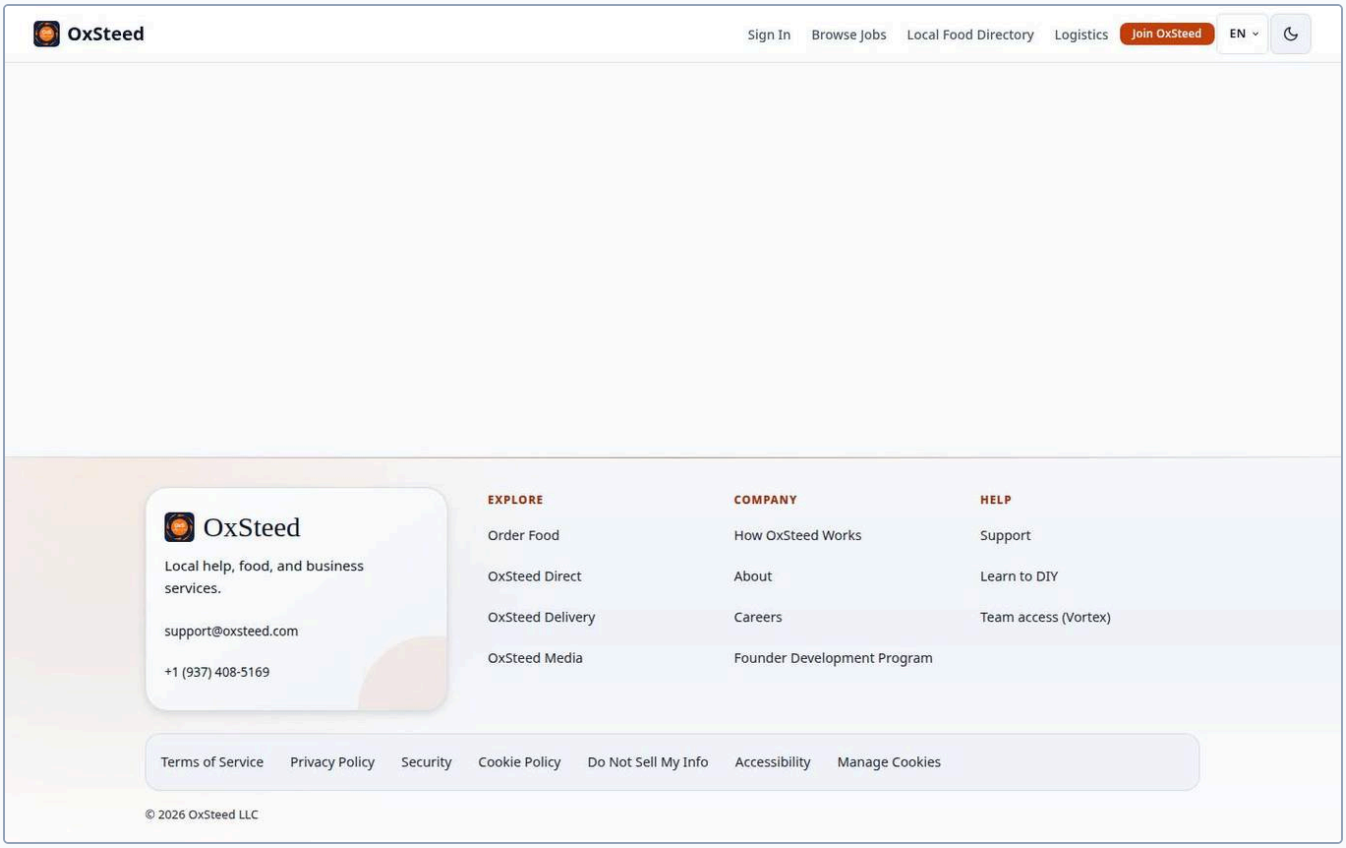

Figure 1. Tracking a pickup order, desktop view. *(Image description: Order tracking page with status and items)*

Step 2: Claim a delivery offer as a runner

Open /restaurants/runner/:restaurantId ("Runner"). Under "New delivery offers", choose "Claim" on an offer (or "Decline" to skip it). The page shows your "Active", "Delivered", "New offers", and "Failed" counts.

> **Expected result:** You see "Task claimed" and the delivery appears under your active tasks.

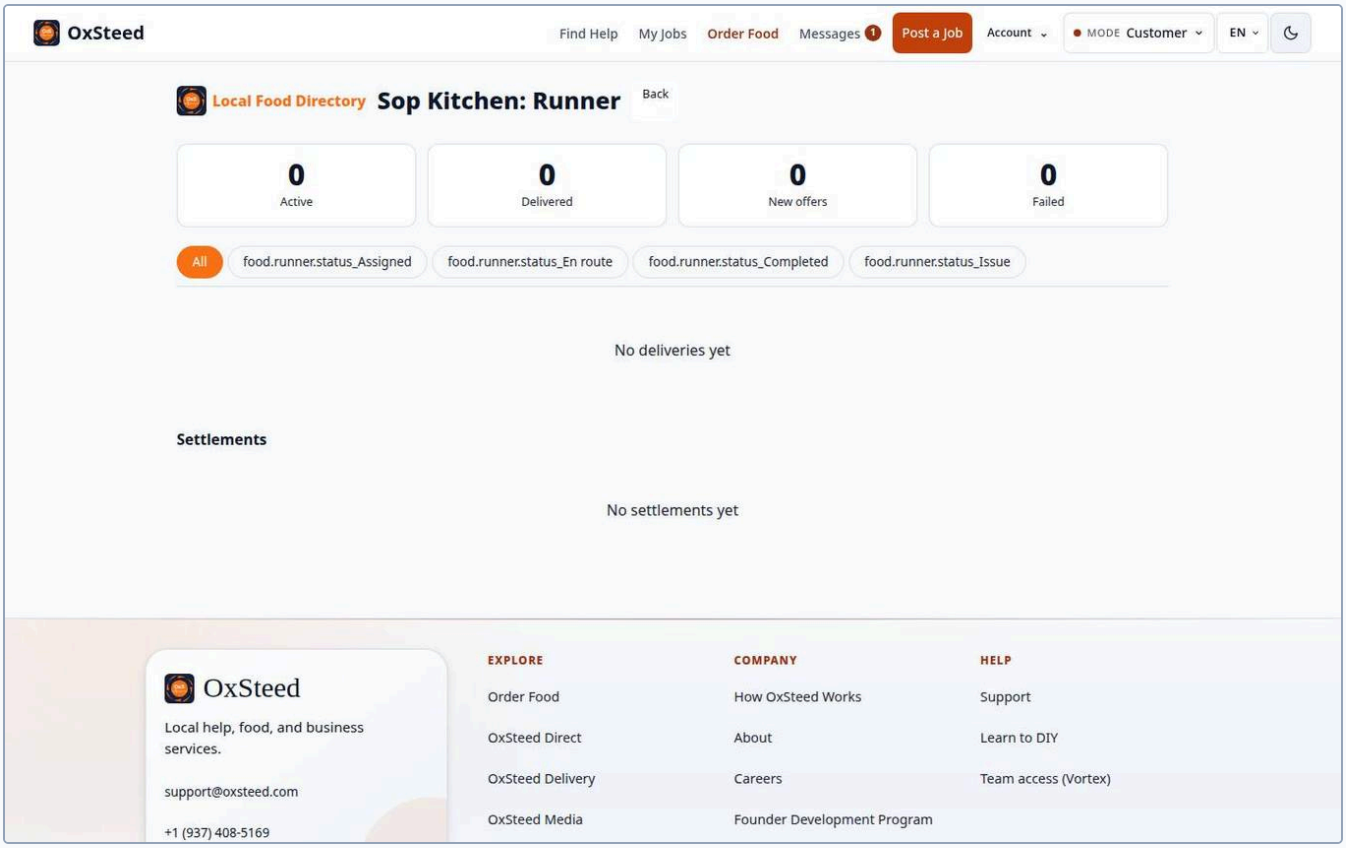

Figure 2. Claiming a delivery, desktop view. *(Image description: Runner page with delivery offers and Claim buttons)*

Step 3: Start the delivery and share your location

Choose "Start delivery" on the claimed task. Choose "Share live location" so the customer sees "Runner nearby" with "location updated Xs ago". Use "Stop sharing" when the delivery is done.

> **Expected result:** The customer tracking page shows your live position.

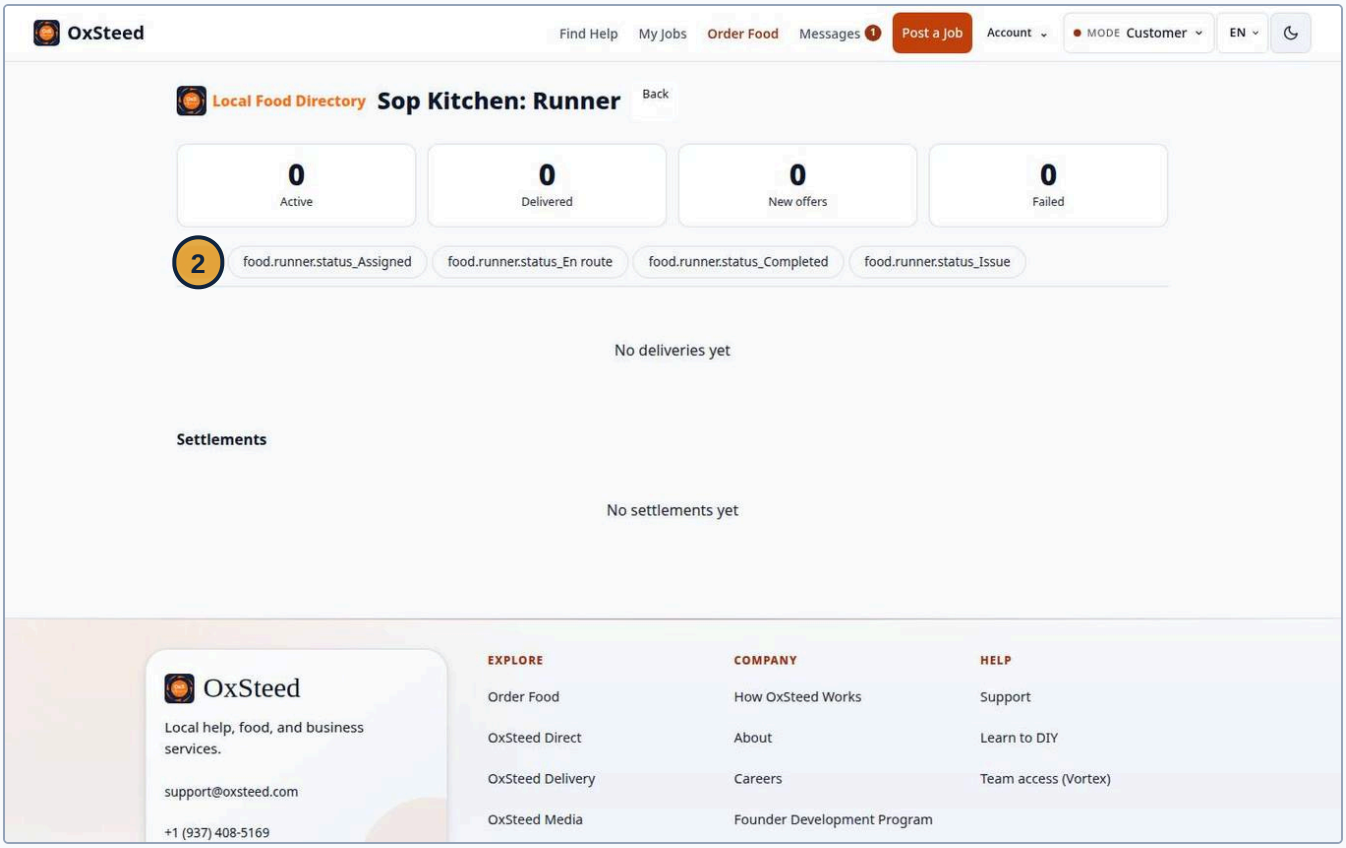

Figure 3. Starting a delivery, desktop view. *(Image description: Active task with Start delivery and location sharing)*

1. **2.** Share live location button

Step 4: Log proof and mark the delivery done

Choose "Log proof" on the task ("Proof for Order"), add a "Note" ("Describe the delivery..."), and choose "Save proof" ("Proof saved"). Then choose "Mark delivered". If something went wrong, use "Report issue" with "Severity" and "Description", then "Submit" ("Issue reported").

> **Expected result:** The delivery completes with proof on record.

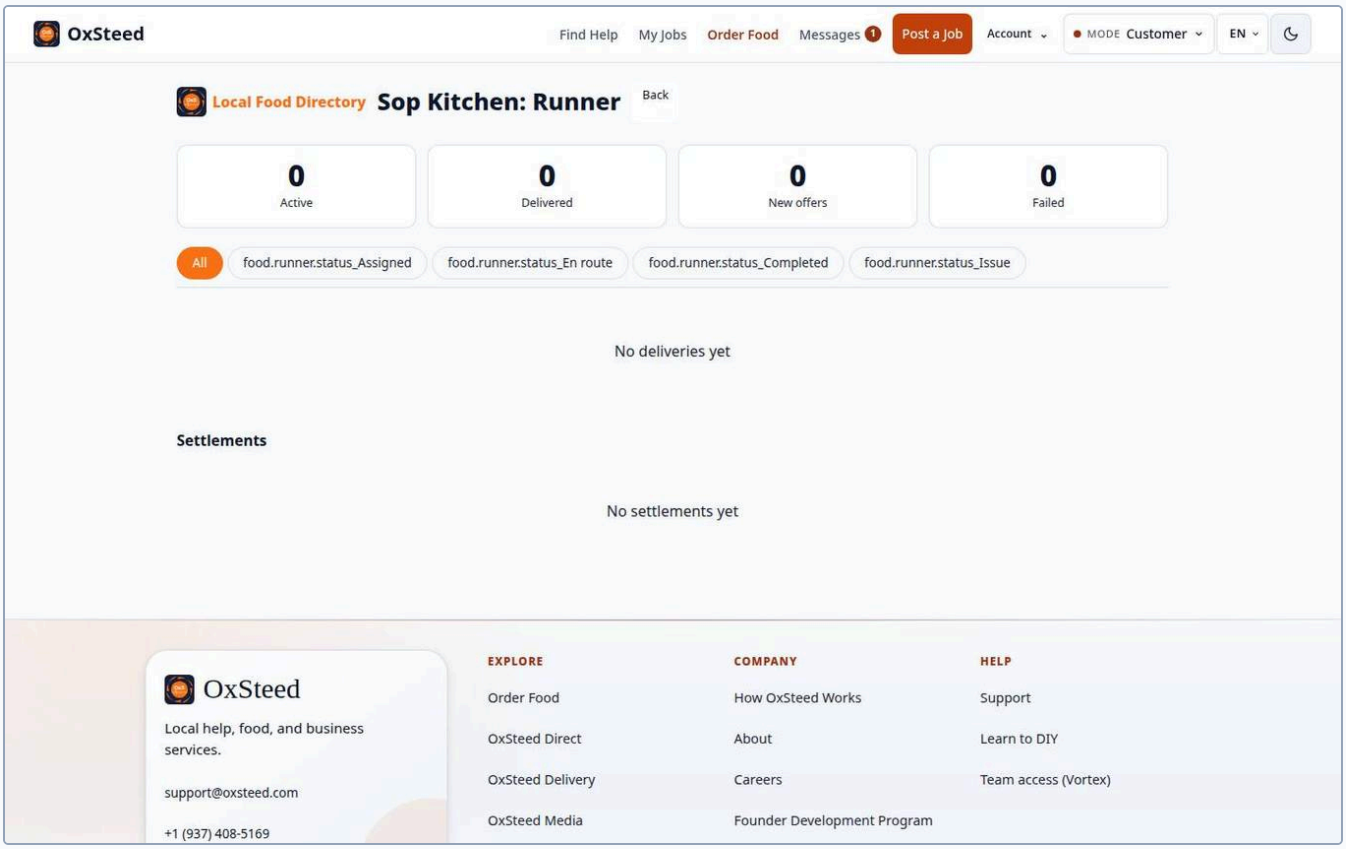

Figure 4. Logging proof of delivery, desktop view. *(Image description: Proof of delivery form)*

Step 5: Settle cash collected on delivery

For cash orders, open "Settlements" and choose "Create settlement" ("Cash collected by the runner (amount)"). The restaurant uses "Approve" and "Mark paid" ("Payment reference"), then the runner uses "Record remittance" ("Cash remitted (expected {{amount}})") so "Cash collected" and "Cash remitted" reconcile.

> **Expected result:** The settlement shows as paid and remitted, with no open cash balance.

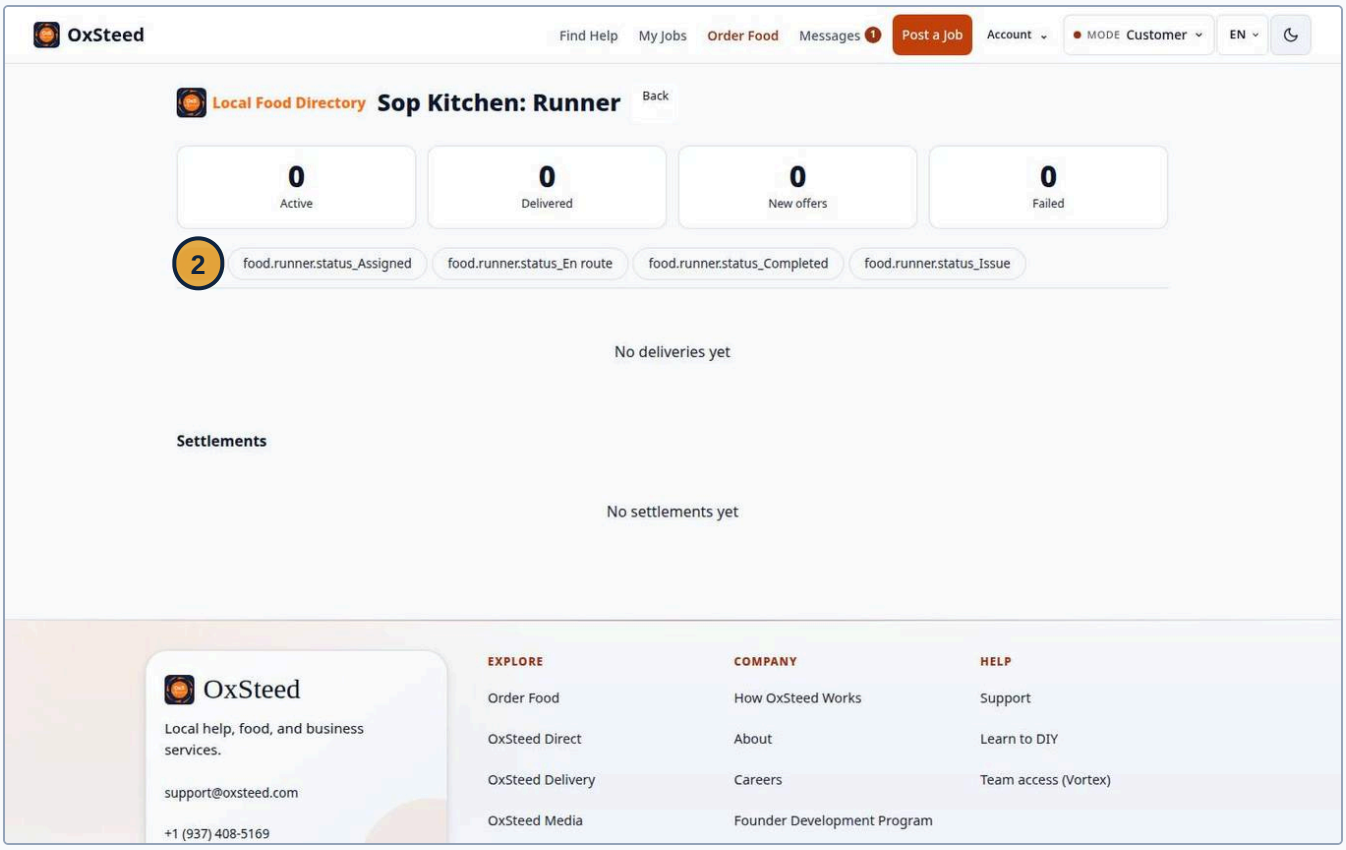

Figure 5. Settling cash, desktop view. *(Image description: Settlements with Create settlement and remittance controls)*

1. **2.** Create settlement button

Confirm it worked

The order shows as handed off: picked up at the counter, or delivered with proof and cash settled.

If something goes wrong

Problem	What to do

The track page says "Order not found".	The link token may be wrong or expired. Open the order from /orders instead, or ask the restaurant for a fresh link.
Location sharing is unavailable on the runner device.	You see "Location sharing is not supported on this device" or "Location permission was denied". Enable location permission in the browser and retry.
Proof of delivery is required but you skipped it.	You see "Proof of delivery is required before completing this task". Choose "Log proof", save the proof, then choose "Mark delivered".

Need help?

For delivery issues, use the in-app support page at /support.

Related guides

Guide ID: restaurant-preparation | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Prepare orders (kitchen)

Guide ID	**restaurant-preparation**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Restaurant owner, Restaurant manager, Kitchen staff
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-preparation

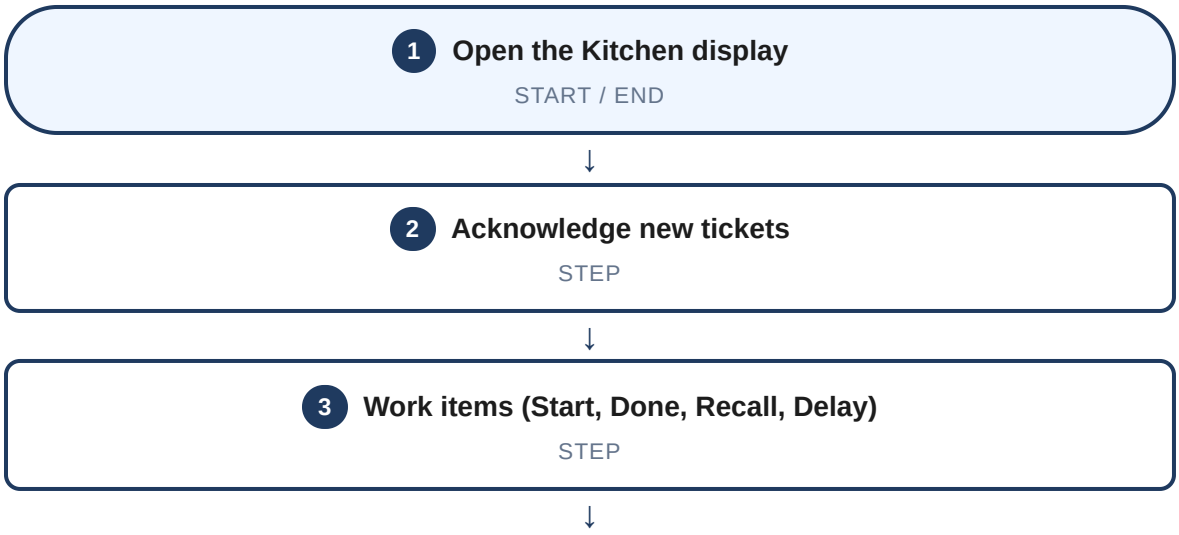

Goal

Run the kitchen display: acknowledge incoming tickets, work items, and hand orders off to guests or runners.

Before you start

1. Sign in with a restaurant role and open the kitchen display.

Process map

- *Quality check passed:* Quality check (if enabled) → Mark ready

Text version. Open the Kitchen display at /restaurants/kitchen/:restaurantId. Acknowledge tickets in the "New" column, then work them in "Preparing" with the item buttons "Start", "Done", "Recall", and "Delay". Send finished orders to "Quality check" if the store uses it, then "Mark ready". For non-delivery orders, choose "Confirm handoff"; delivery orders wait for the runner. The public queue board at /food/queue/:restaurantId shows "Preparing" and "Now ready" to guests.

Steps

Step 1: Open the Kitchen display

Open /restaurants/kitchen/:restaurantId ("Kitchen display"). Tickets are grouped in columns: "New", "Preparing", "Quality check", and "Ready". The hint reads "Update each ticket with the action buttons".

> **Expected result:** Tickets appear in the column matching their current status.

Figure 1. The Kitchen display, desktop view. *(Image description: Kitchen display with tickets in status columns)*

Step 2: Acknowledge and start tickets

On a new ticket, choose "Acknowledge", then "Start preparing" to move it to "Preparing". The fulfillment type ("Takeout", "Dine in", "Delivery", "Kiosk") and table label show on the ticket.

> **Expected result:** The ticket moves to the "Preparing" column.

Figure 2. Acknowledging a ticket, desktop view. *(Image description: A new ticket with the Acknowledge button)*

Step 3: Work each item

Use the item buttons: "Start" when an item goes on, "Done" when it is finished, "Recall" to send it back, and "Delay" to pause it. Splitting a ticket across cooks is also supported from the kitchen actions.

> **Expected result:** Items advance to done and the ticket reflects real kitchen progress.

Figure 3. Working ticket items, desktop view. *(Image description: Ticket in Preparing with Start, Done, Recall, and Delay buttons)*

Step 4: Pass quality check and mark ready

When all items are finished and the store uses quality checks, choose "Ready for check". After the check (or when no check is needed), choose "Mark ready" to move the order to the "Ready" column.

> **Expected result:** The order sits in "Ready" and shows on the guest queue board under "Now ready".

Figure 4. Marking an order ready, desktop view. *(Image description: Ticket with the Mark ready button)*

Step 5: Confirm handoff or hand to the runner

For non-delivery orders, choose "Confirm handoff" (you confirm "Confirm that this order was handed to the guest?"). For delivery orders, the ticket shows "Waiting for runner handoff" until the runner completes the delivery. If an order needs rework, use "Reopen".

> **Expected result:** The order leaves the board as completed, or moves to the runner flow for delivery.

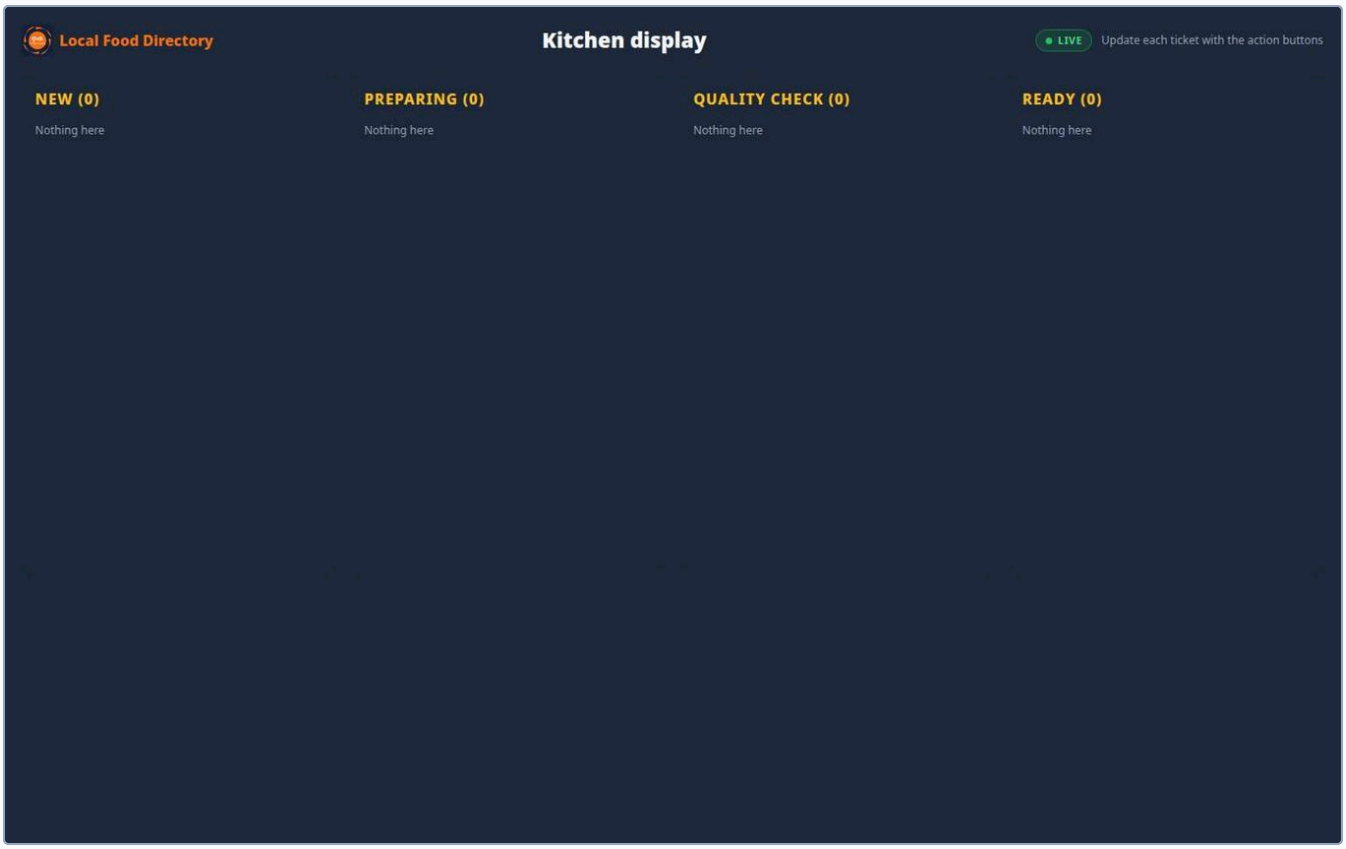

Figure 5. Handing off an order, desktop view. *(Image description: Ready ticket with handoff options)*

Step 6: Check the guest queue board

Open /food/queue/:restaurantId ("Now ready", "Preparing", "None yet"). Guests see order numbers without staff controls; the board can announce "Pay at the counter" and play the ready sound ("Enable ready sound").

> **Expected result:** Guests can see when their order is ready without asking staff.

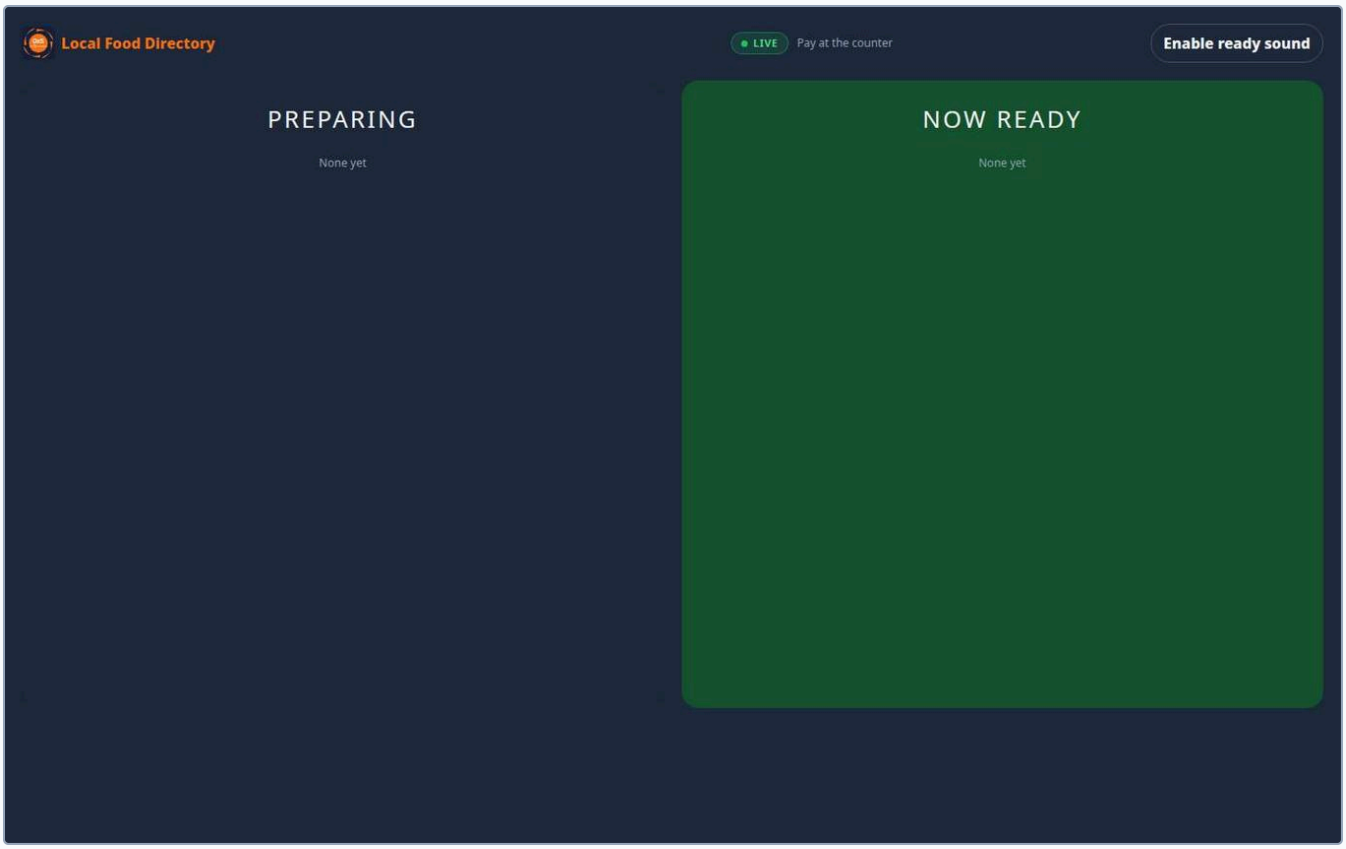

Figure 6. The queue board, desktop view. *(Image description: Public queue board showing ready order numbers)*

Confirm it worked

Tickets move New to Preparing to Ready and off the board, and the queue board mirrors the ready state for guests.

If something goes wrong

Problem	What to do

Actions taken offline have not synced.	The board shows "{{count}} kitchen update waiting to sync" with "Saved on this device. It will sync when the connection returns." Choose "Sync now" once online.
An order was marked ready by mistake.	Use "Reopen" on the ticket and add the reason when prompted; the ticket returns to an earlier stage.

Need help?

For kitchen display issues, use the in-app support page at /support.

Guide ID: restaurant-refund-requests | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Request refunds on restaurant credit and orders

Guide ID	**restaurant-refund-requests**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-refund-requests

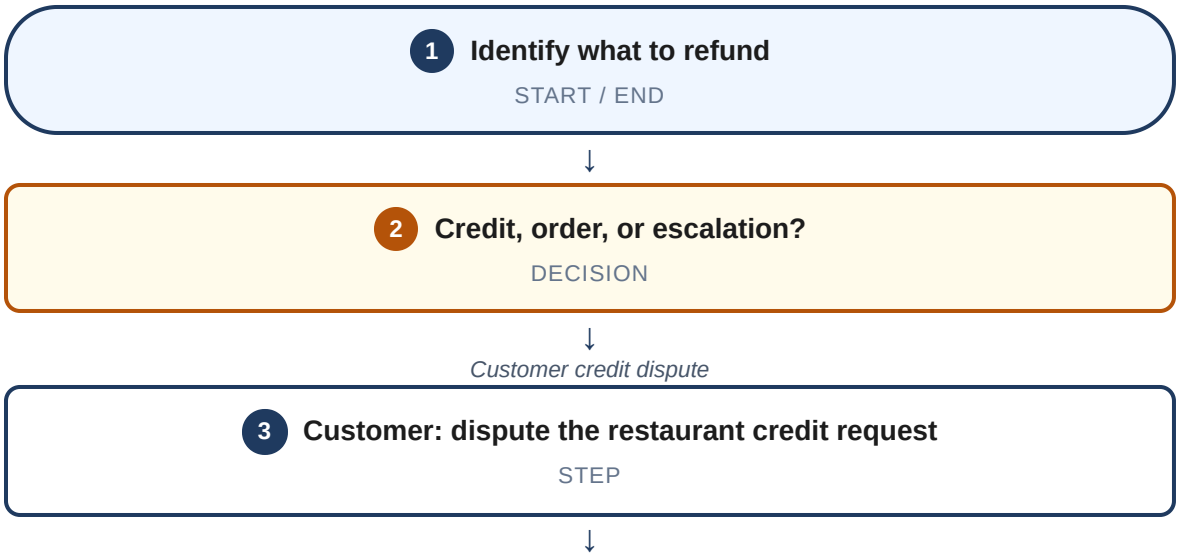

Goal

Get money back the right way: dispute restaurant credit, refund a customer wallet as a restaurant, or refund an order.

Before you start

1. Sign in to your OxSteed account.

Process map

4 Refund resolved

START / END

- *Restaurant credit refund:* Credit, order, or escalation? → Restaurant: refund restaurant credit
- *Order refund:* Credit, order, or escalation? → Restaurant: issue an order refund
- *Stuck or disputed:* Credit, order, or escalation? → Escalate through a support case
- Restaurant: refund restaurant credit → Refund resolved
- Restaurant: issue an order refund → Refund resolved
- Escalate through a support case → Refund resolved

Text version. Identify whether the money is restaurant credit or an order payment. Customers dispute restaurant credit requests from the "Activity" section at /restaurant-credit. Restaurants refund customer credit from the "Restaurant credit" manager with "Refund credit". Restaurants refund orders from the order center with "Refund" (card orders refund through "Cancel"). Escalate through a support case at /restaurants/support/cases/:caseId when the refund is disputed.

Steps

Step 1: Dispute a restaurant credit request as a customer

At /restaurant-credit ("Restaurant credit"), open "Activity" and find the credit request. Choose "Dispute" to open "Dispute this credit request", explain in the "Reason" field (for example "you paid the restaurant, but the credit was never issued"), and choose "Submit dispute". You see "Dispute submitted".

> **Expected result:** The dispute is recorded and the restaurant can see it for review.

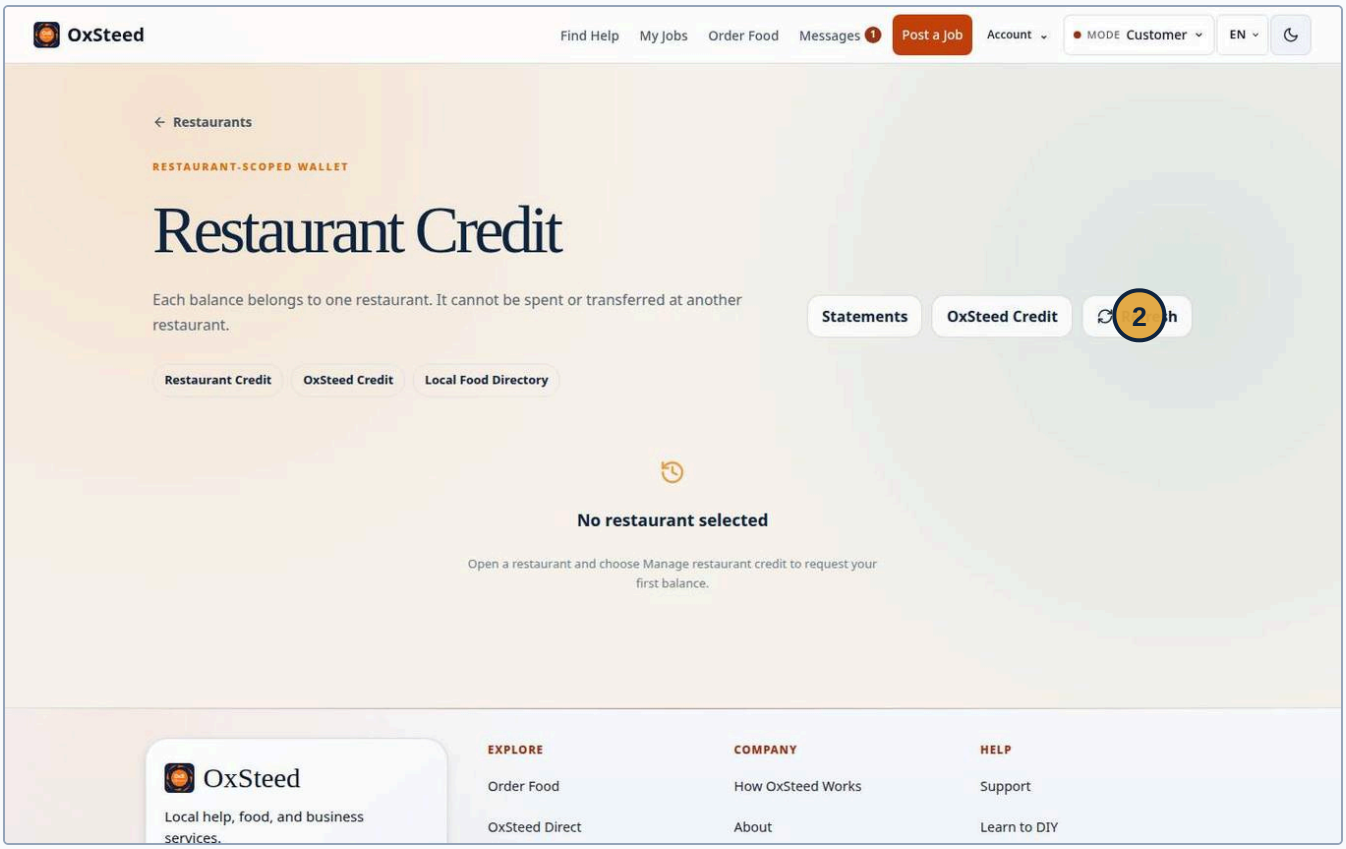

Figure 1. Disputing a credit request, desktop view. *(Image description: Activity list with a Dispute button on a credit request)*

1. **2.** Dispute button

Step 2: Refund customer restaurant credit as a restaurant

On the restaurant dashboard, open the "Restaurant credit" manager ("Customer balances"; "Approve credit only after matching the customer's receipt or confirmation number."). Choose "Refund credit", enter the "Customer email" and "Amount", add a "Reason" ("Why is this credit being refunded?"), then choose "Review refund" and "Yes, refund". Note: this deducts credit from the customer wallet and sends the money back to their card; only credit issued in the last 30 days can be refunded.

> **Expected result:** You see "Refunded X to customer." and the wallet balance drops.

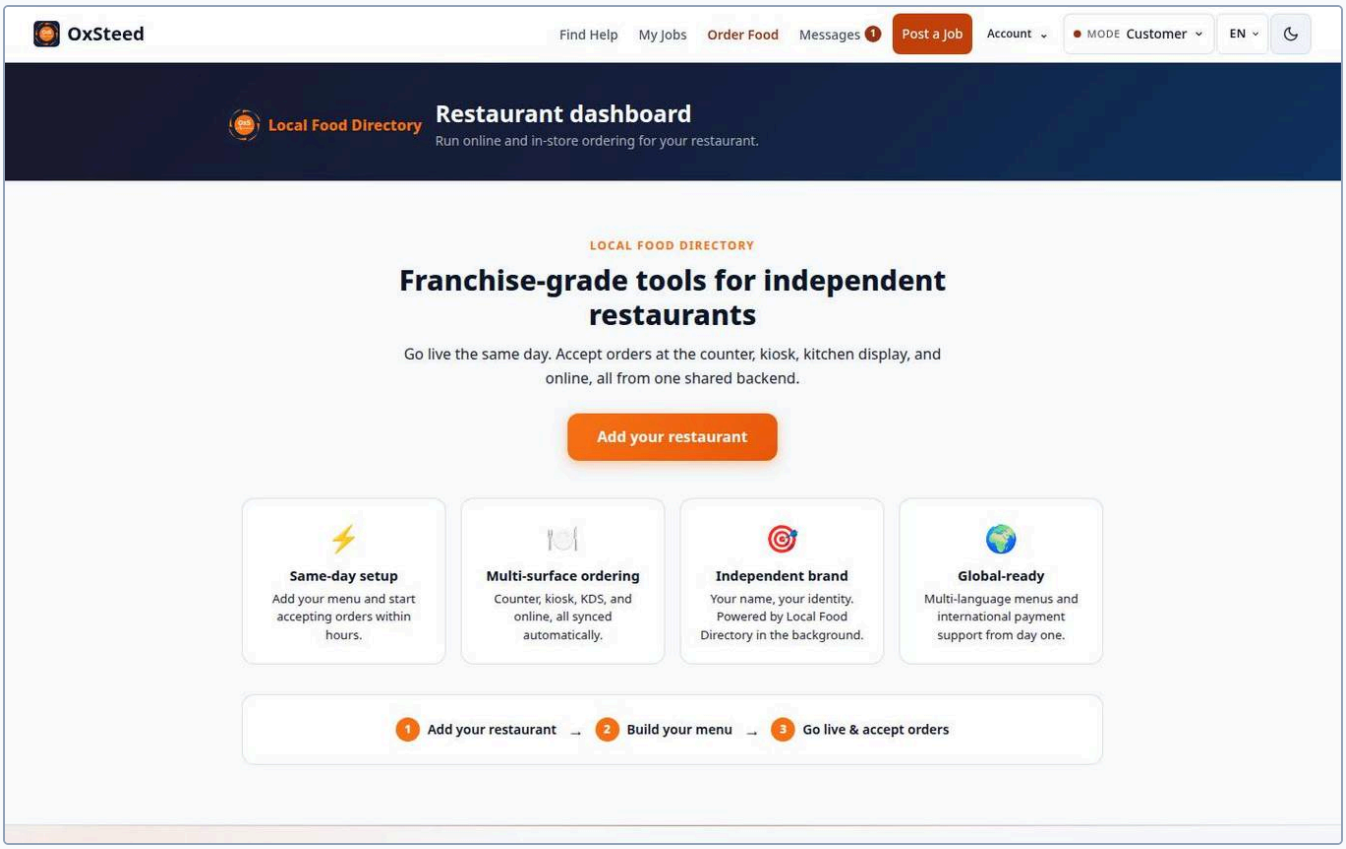

Figure 2. Refunding restaurant credit, desktop view. *(Image description: Refund credit form with email, amount, and reason)*

Step 3: Issue an order refund as a restaurant

In the order center, open the order and choose "Refund". In the "Issue Refund" dialog ("Order total: $X"), enter the amount ("Amount in cents (blank = full)") and a "Reason (required)", then choose "Issue Refund". For online card orders, use "Cancel" instead: "Card orders are refunded by cancelling the order. The card refund happens automatically." Partial refunds are not available for online card orders.

> **Expected result:** You see "Refund issued" and the order shows "Payment refunded".

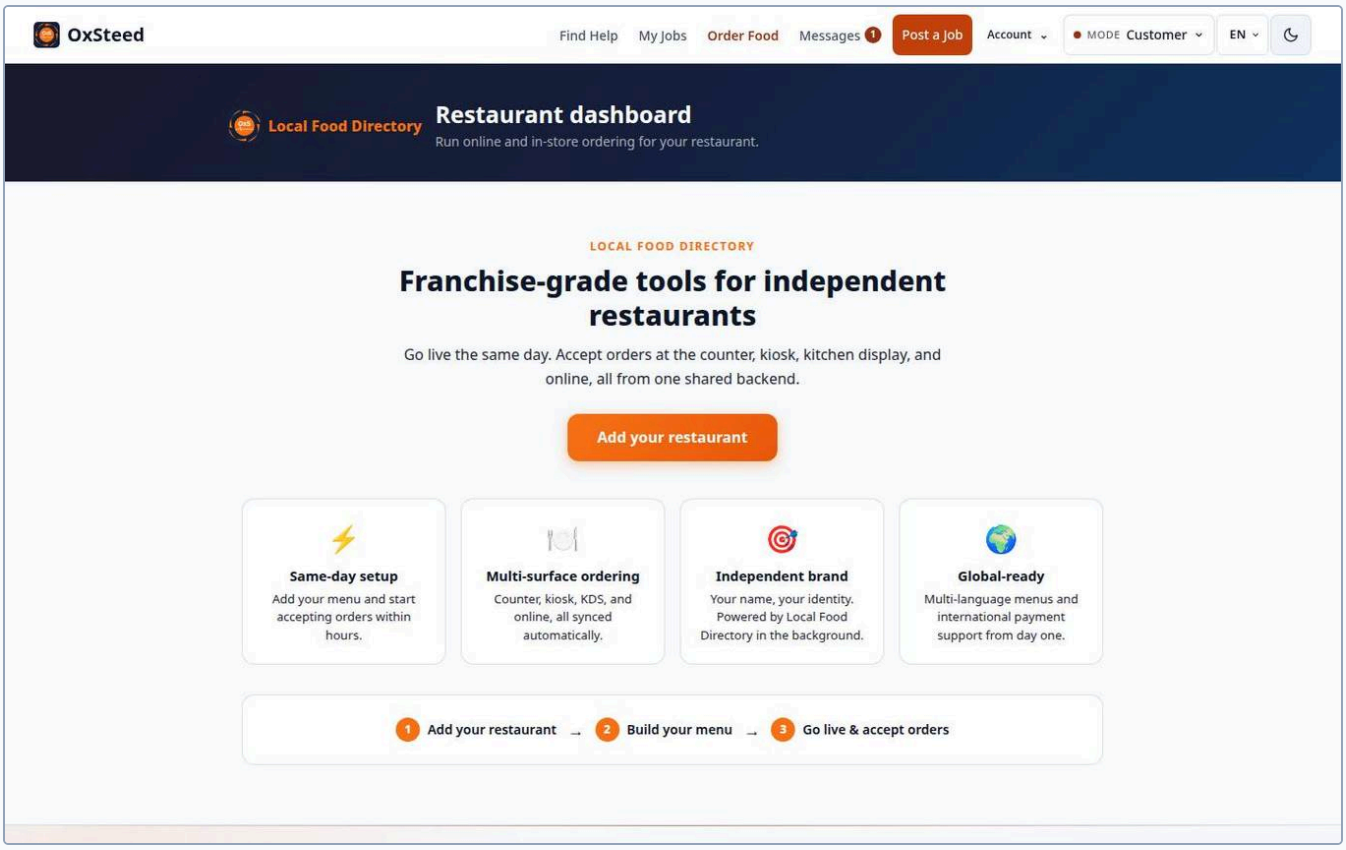

Figure 3. Issuing an order refund, desktop view. *(Image description: Issue refund dialog with amount and reason)*

Step 4: Escalate through a support case

If the refund is disputed or stuck, open the support case at /restaurants/support/cases/:caseId ("Support case"). Review "Case details" ("Issue type", "Status", "Created", "Related order"), then use "Message or proof link" ("Write your reply...", "Paste a receipt / proof link (optional)") and choose "Save update". "Reply sent." confirms the update.

> **Expected result:** The case timeline records your message and the support team can act on it.

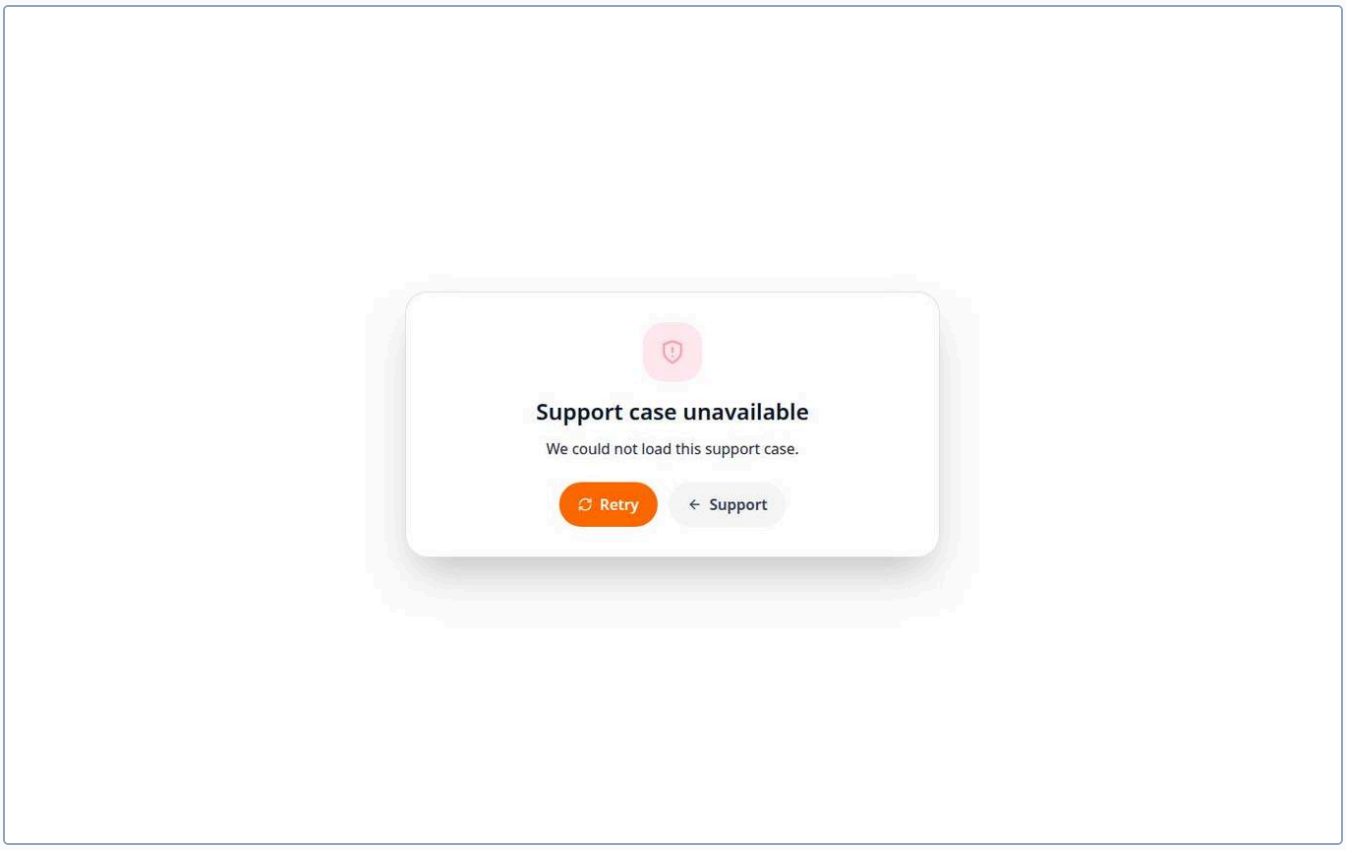

Figure 4. Escalating through a support case, desktop view. *(Image description: Support case with message and proof link fields)*

Confirm it worked

The refund shows as issued, the credit returns to the customer wallet or card, or the support case timeline records the resolution.

If something goes wrong

Problem	What to do

The credit refund failed.	You see "Unable to process this refund." Only credit issued in the last 30 days can be refunded, and if the card refund fails the wallet balance is left untouched. Retry with an eligible amount.
You cannot partially refund an online card order.	That is by design: "Partial refunds are not available for online card orders. Refund the full order or ask support for help."
A direct or pay-at-restaurant order was cancelled but shows no refund.	Those are marked refunded with no automatic money movement. Record the refund with the customer outside OxSteed and note it on the support case.

Need help?

For refund help, use the in-app support page at /support.

Guide ID: restaurant-setup | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Set up a restaurant (merchant onboarding)

Guide ID	**restaurant-setup**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-setup

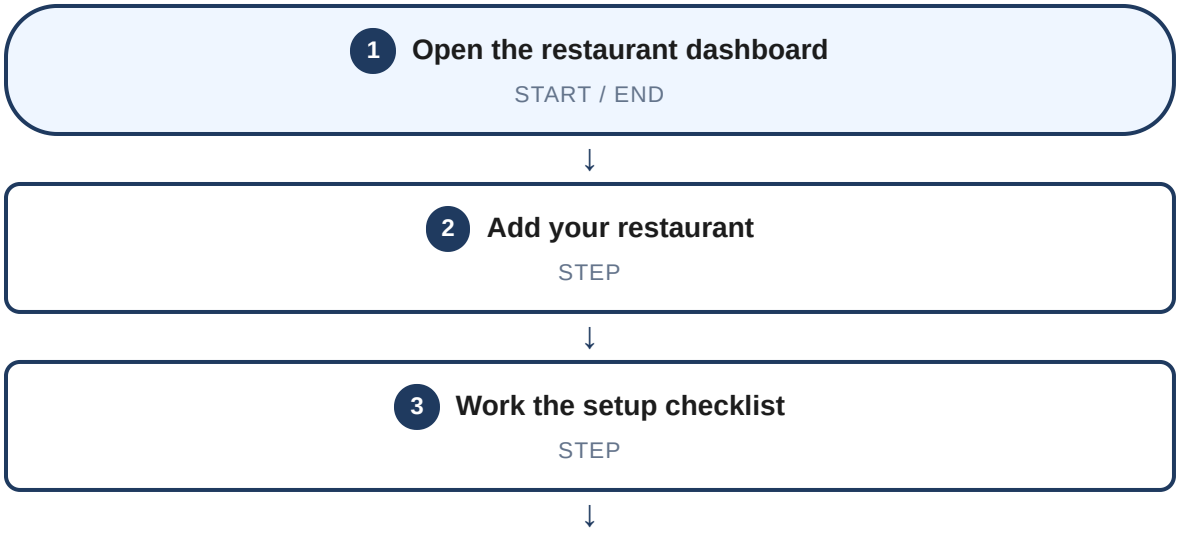

Goal

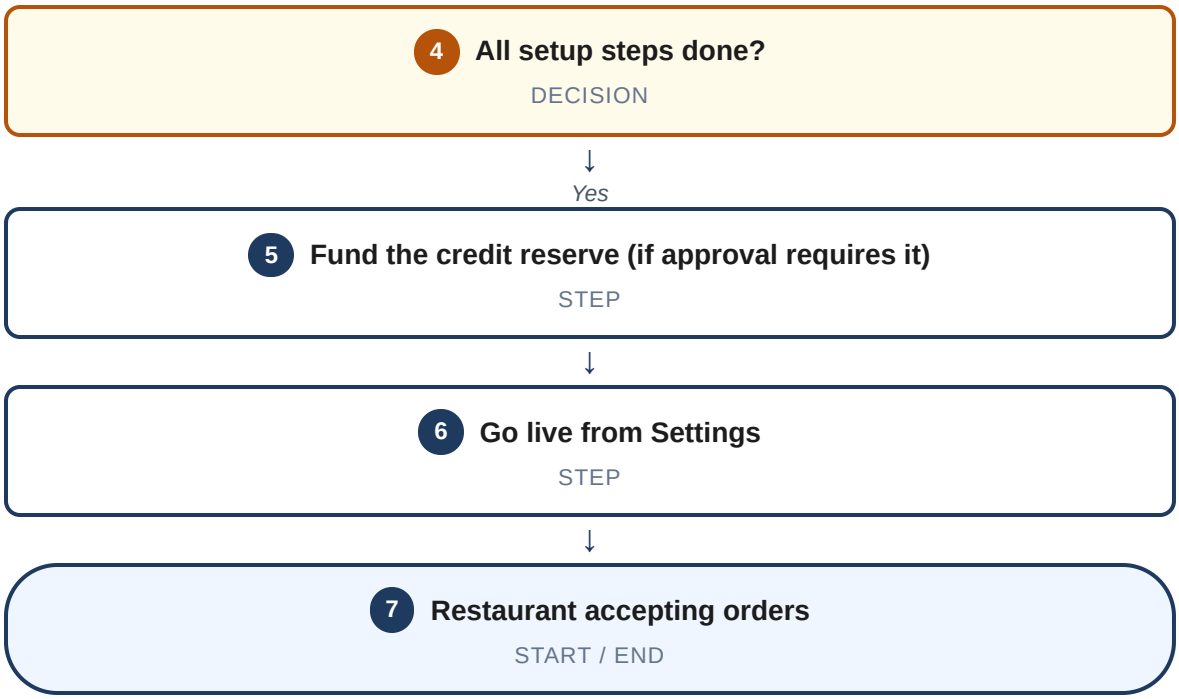

Create a restaurant on OxSteed, finish the setup checklist, fund the credit reserve if needed, and go live for customer ordering.

Before you start

1. Sign in to your OxSteed account.
2. Have your restaurant name, address, currency, and contact details ready.

Process map

- *No, use Fix:* All setup steps done? → Work the setup checklist

Text version. Open the restaurant dashboard at /restaurants/merchant and add your restaurant with the "Create restaurant" form. Work through the "Setup checklist" until every step is complete, using "Fix" on any incomplete step. If the platform credit approval requires it, fund your credit reserve from the funding panel. Then open the Settings tab and choose "Go live" so customers can order.

Steps

Step 1: Open the restaurant dashboard

Open /restaurants/merchant. The page is titled "Restaurant dashboard" with the subtitle "Run online and in-store ordering for your restaurant." If you already manage restaurants, choose one from "Select restaurant"; otherwise continue to the creation form.

> **Expected result:** The restaurant dashboard loads, either with your restaurant list or the "Add your restaurant" form.

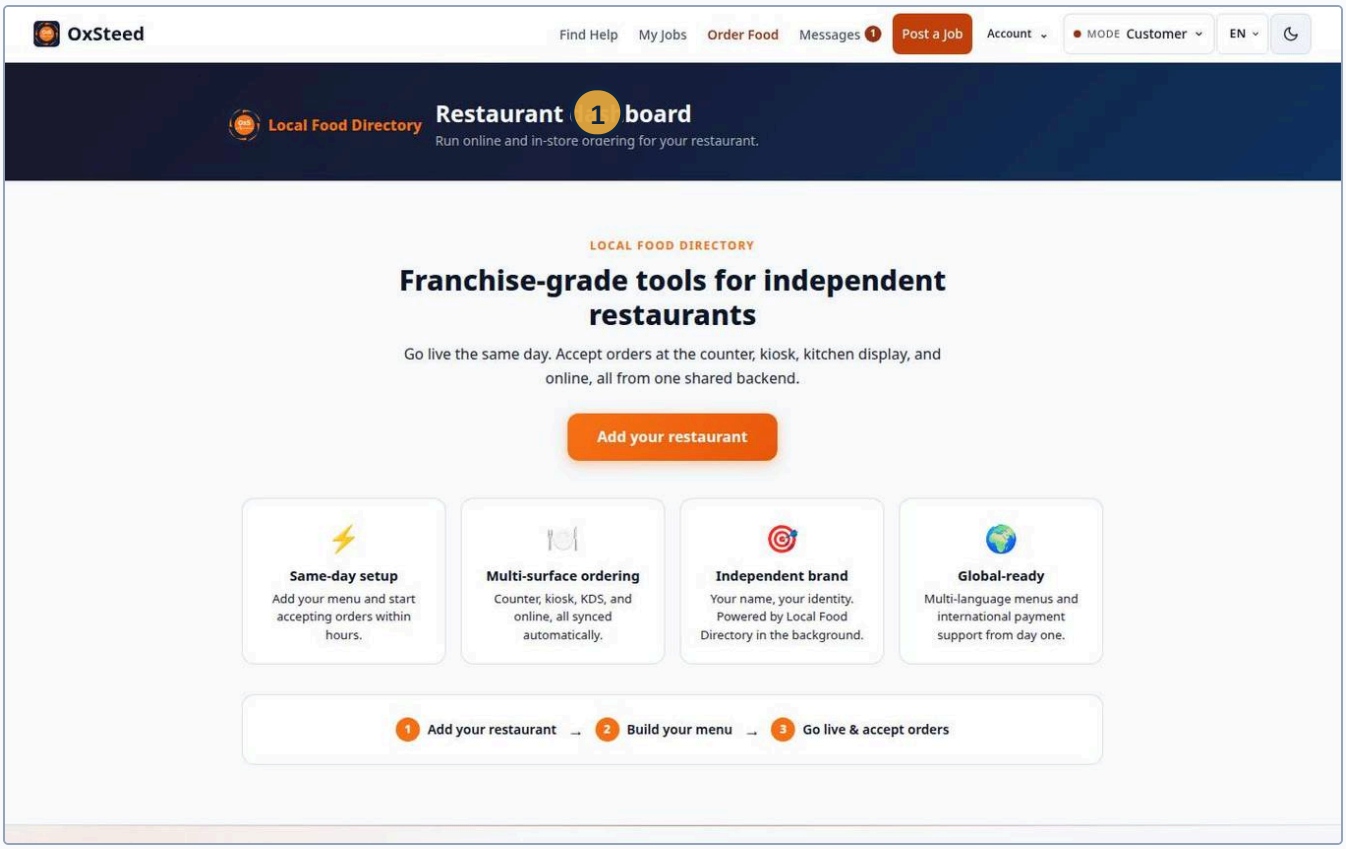

Figure 1. The restaurant dashboard, desktop view. *(Image description: Restaurant dashboard listing the restaurants you manage)*

1. **1.** Page title

Step 2: Create the restaurant

In the "Add your restaurant" form, enter the "Restaurant name", "Description", "Cuisines (comma separated)", "Phone", "Street", "City", "State / Region", "ZIP / Postal code", "Country (2 letters)", "Currency", and "Latitude" / "Longitude". Choose "Create restaurant".

> **Expected result:** You see "Restaurant created. Build your menu, then go live." and the new restaurant appears under "Select restaurant".

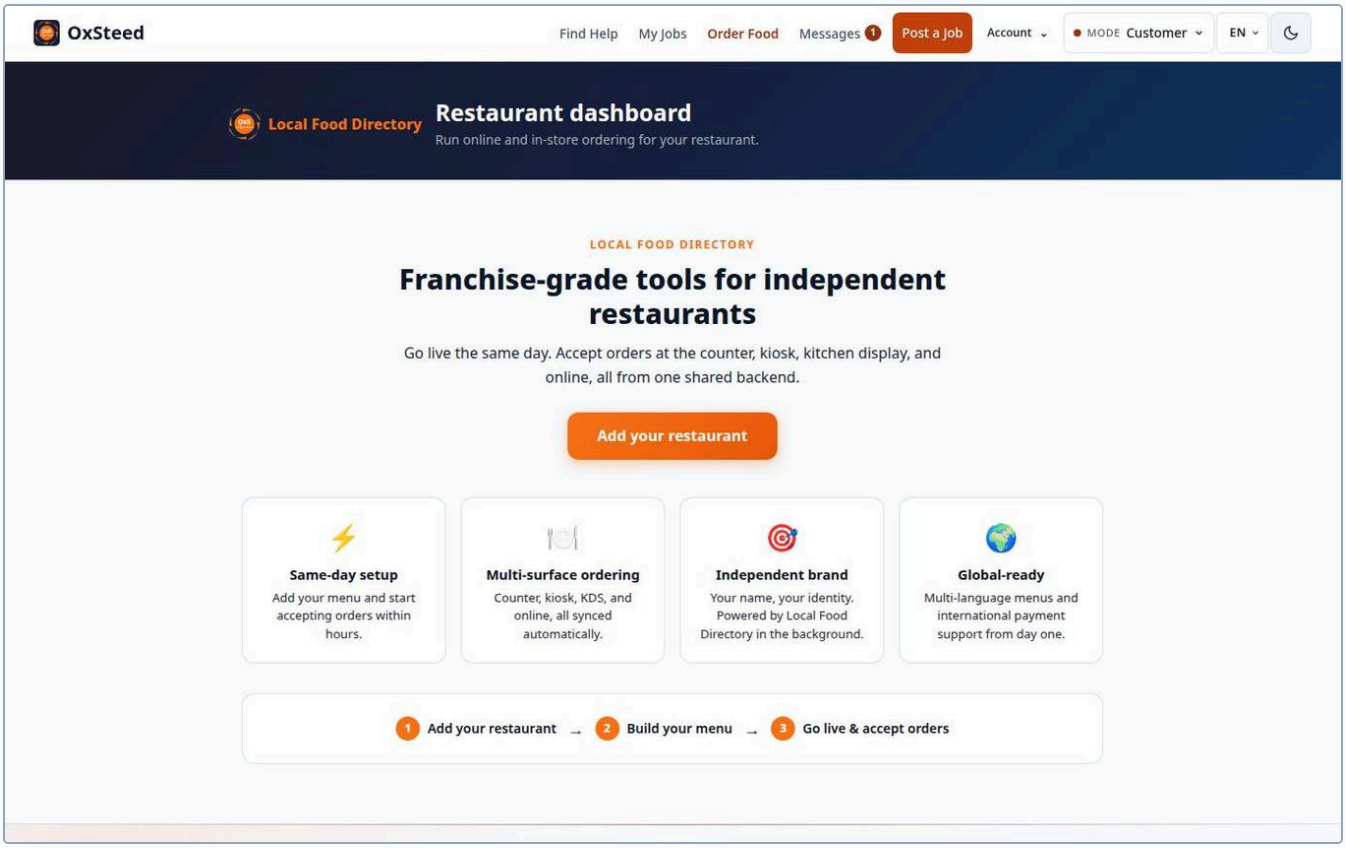

Figure 2. The restaurant creation form, desktop view. *(Image description: The add restaurant form with its fields)*

Step 3: Work the setup checklist

On the Home tab, the "Setup checklist" shows "{{done}} of {{total}} steps complete". Open "Continue setup guide" and use "Fix" next to any incomplete step until the checklist reports "All setup steps are done, you can go live from Settings."

> **Expected result:** Every setup step shows complete and the readiness message appears.

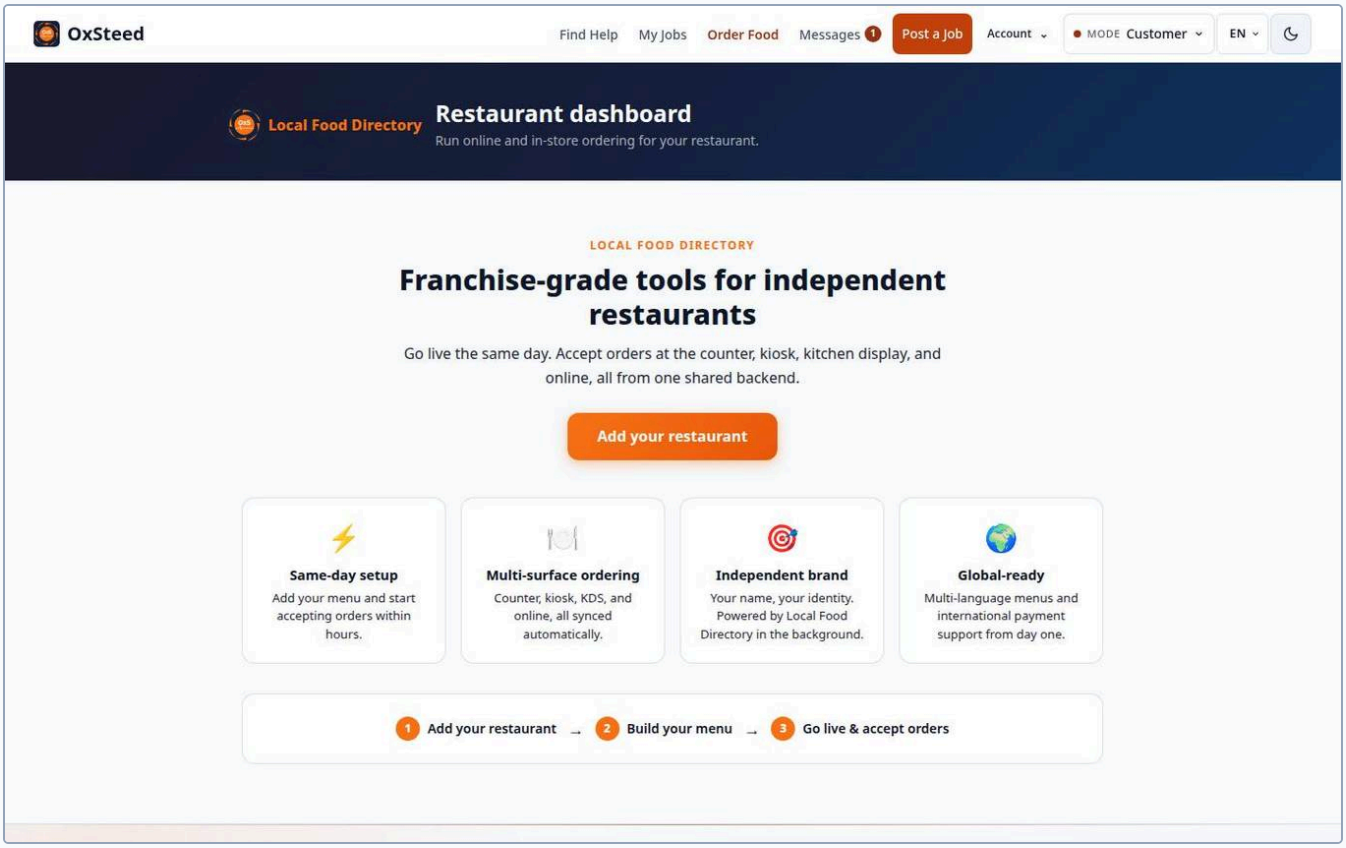

Figure 3. The setup checklist, desktop view. *(Image description: Setup checklist with per-step Fix buttons)*

Step 4: Fund the credit reserve if approval requires it

If the platform credit approval is not yet funded, the "Fund your credit reserve" panel appears: "Your approval is almost complete. Fund your OxSteed Credit reserve to start issuing restaurant credit." Fund by card through the reserve purchase panel, or enter "Amount you sent" plus "Proof of payment" (a "Payment reference (optional)" also helps) and choose "Submit for verification".

> **Expected result:** You see "Funding proof submitted for review." and the funding status moves toward funded.

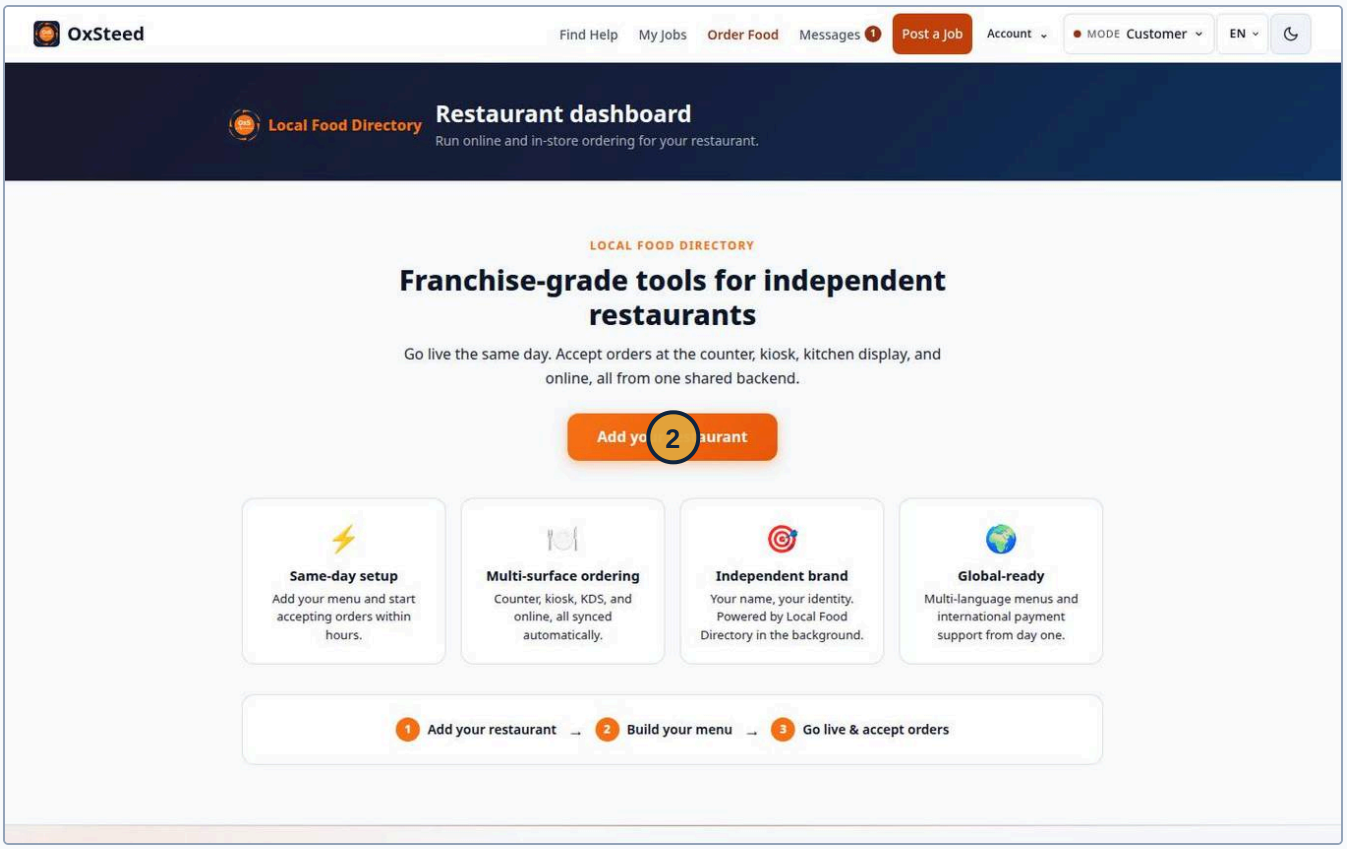

Figure 4. Funding the credit reserve, desktop view. *(Image description: Credit reserve funding panel with proof fields)*

1. **2.** Submit for verification button

Step 5: Go live from Settings

Open the "Settings" tab, then the "Ordering" section ("Take the restaurant live and control where guests can order."). Choose "Go live" (or "Resume orders" if ordering was paused). Confirm the "At a glance" chips read "Online ordering on" and "In-store on".

> **Expected result:** The Home tab shows "You are accepting orders" and customers can see the restaurant at /food.

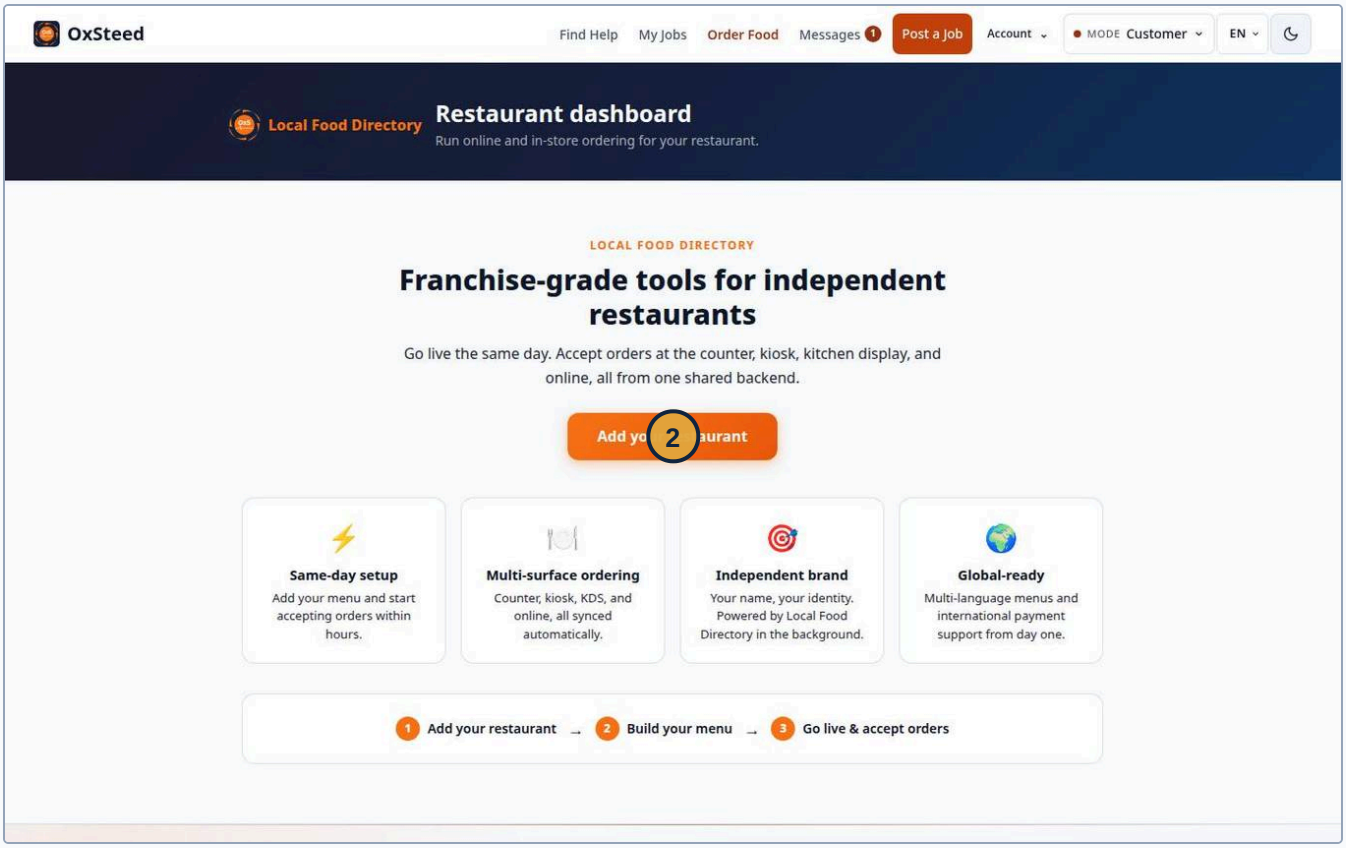

Figure 5. Going live from Settings, desktop view. *(Image description: Settings tab with the Ordering section and Go live button)*

1. **2.** Go live button

Confirm it worked

The Home tab shows "You are accepting orders" and the restaurant appears in the customer directory at /food.

If something goes wrong

Problem	What to do
The restaurant is still not visible to customers after going live.	Check the Home tab alerts: draft menu items must be published (see the menus guide), and the "At a glance" chips must show "Online ordering on".
The "Create restaurant" form fails.	You see "Could not create the restaurant." Verify the "Country (2 letters)" and "Currency" fields are filled correctly, then retry.
A setup checklist step keeps showing as incomplete.	Choose "Fix" on that step and complete the linked task (usually adding menu items or setting hours).

Need help?

For onboarding help, use the in-app support page at /support.

Guide ID: restaurant-staff-tools | **Revision:** 1 | **Area:** Restaurants

SOP LIBRARY / RESTAURANTS ENGLISH

Use POS, inventory, crew, and runner tools

Guide ID	**restaurant-staff-tools**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Restaurant owner, Restaurant manager, Cashier, Runner
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-staff-tools

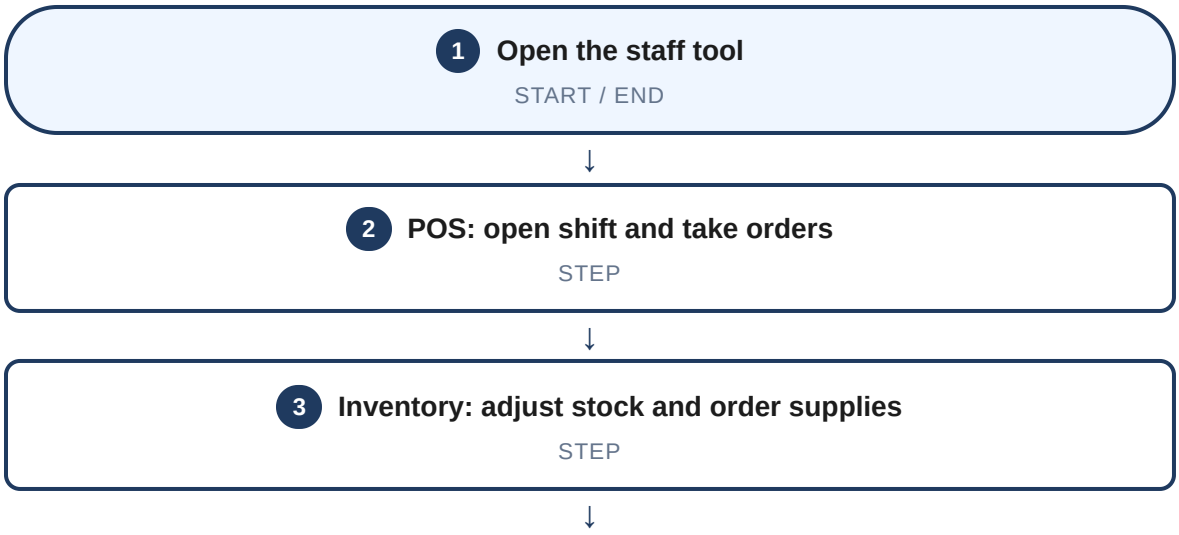

Goal

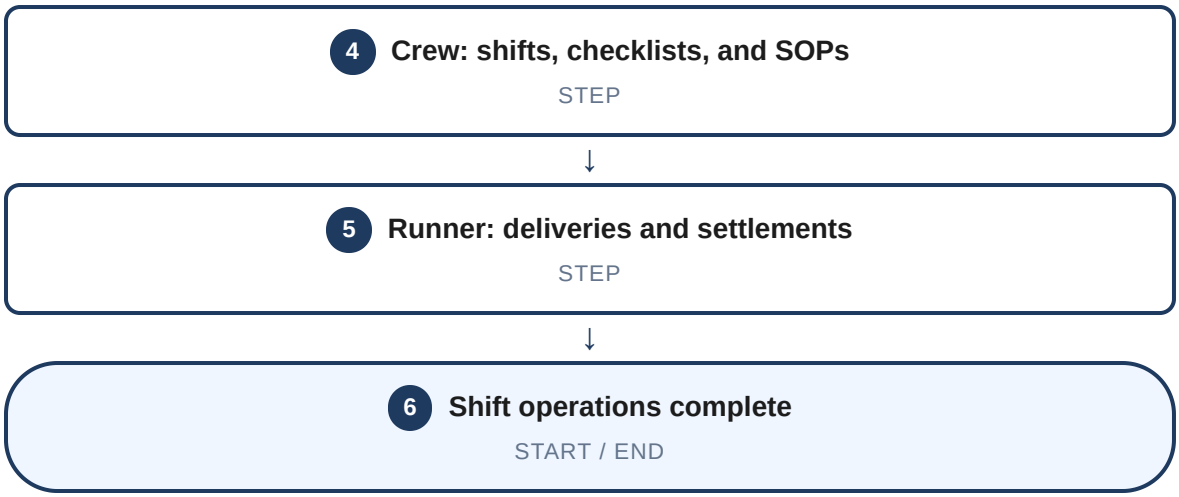

Run in-store operations with the staff tools: take POS orders, track inventory, manage the crew, and run deliveries.

Before you start

1. Sign in with a restaurant role that has the right permissions (some POS payments are manager-only).

Process map

Text version. Open the staff tool you need. In POS, open a shift and take orders with the ticket, then send them to the kitchen and take payment. In Inventory, adjust stock levels, log waste, create purchase orders, and report supplier issues. In Crew, check today's shifts, run checklists, and keep SOPs current. In Runner, claim and complete deliveries and settle cash.

Steps

Step 1: Open a POS shift and take orders

Open /restaurants/pos/:restaurantId ("Point of Sale"). If prompted ("Open POS shift required"), choose "Open shift" ("POS shift opened. You can take orders now."). Add items with "Add to ticket", set the "Table" or "Guest name", then choose "Send to kitchen" ("Order sent to the kitchen").

> **Expected result:** The ticket shows the items and the kitchen receives the order.

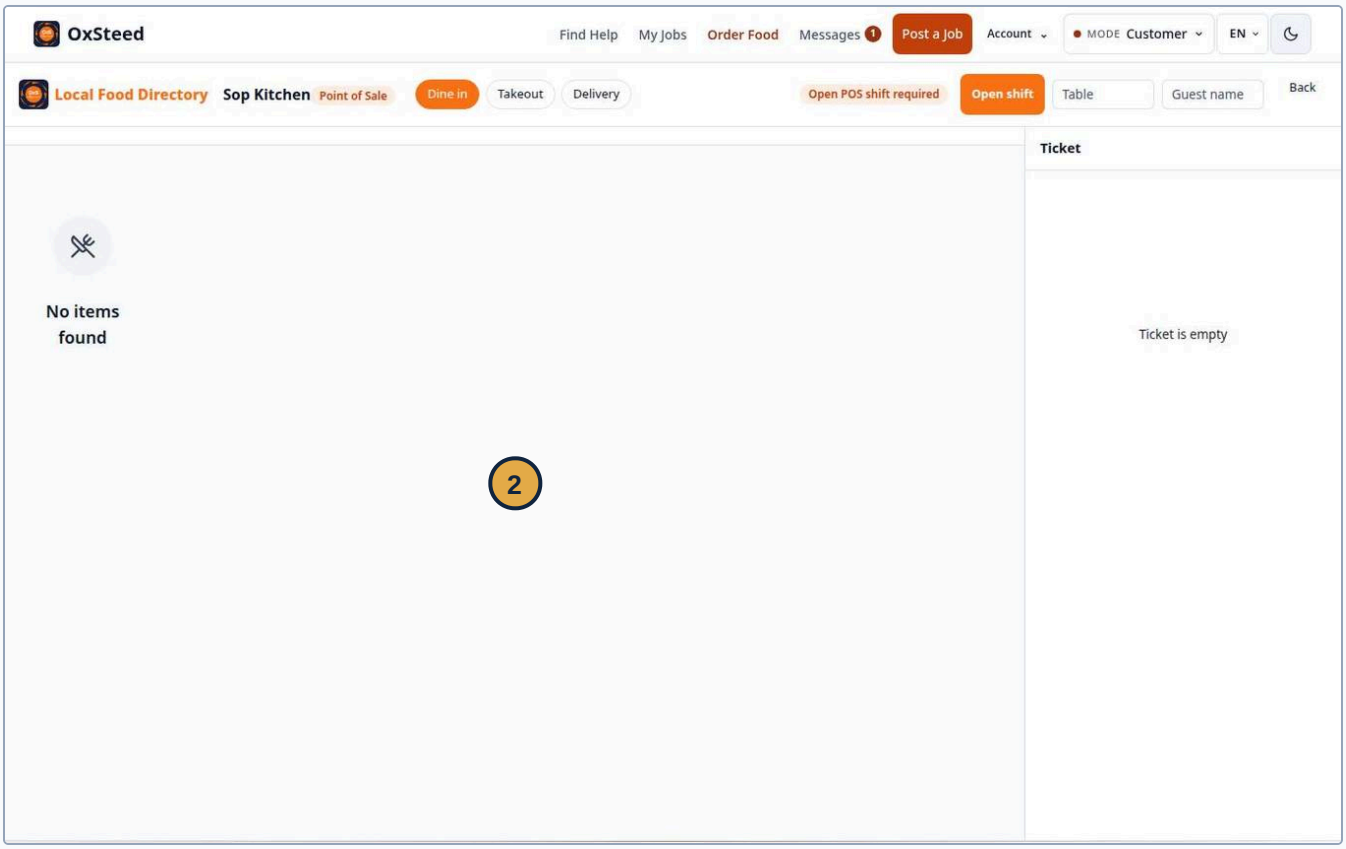

Figure 1. Taking a POS order, desktop view. *(Image description: POS screen with menu items and the ticket)*

1. **2.** Ticket

Step 2: Take payment at the POS

Choose "Pay now" on the ticket. For cash, enter the "Amount given" and hand back the "Change". For OxSteed Credit, enter the "Customer authorization code" (the customer creates an in-store authorization in their OxSteed Credit and gives you the expiring hold ID). Choose "Confirm payment". Note: "Only managers can record POS payments."

> **Expected result:** You see "Order complete" and the payment is recorded.

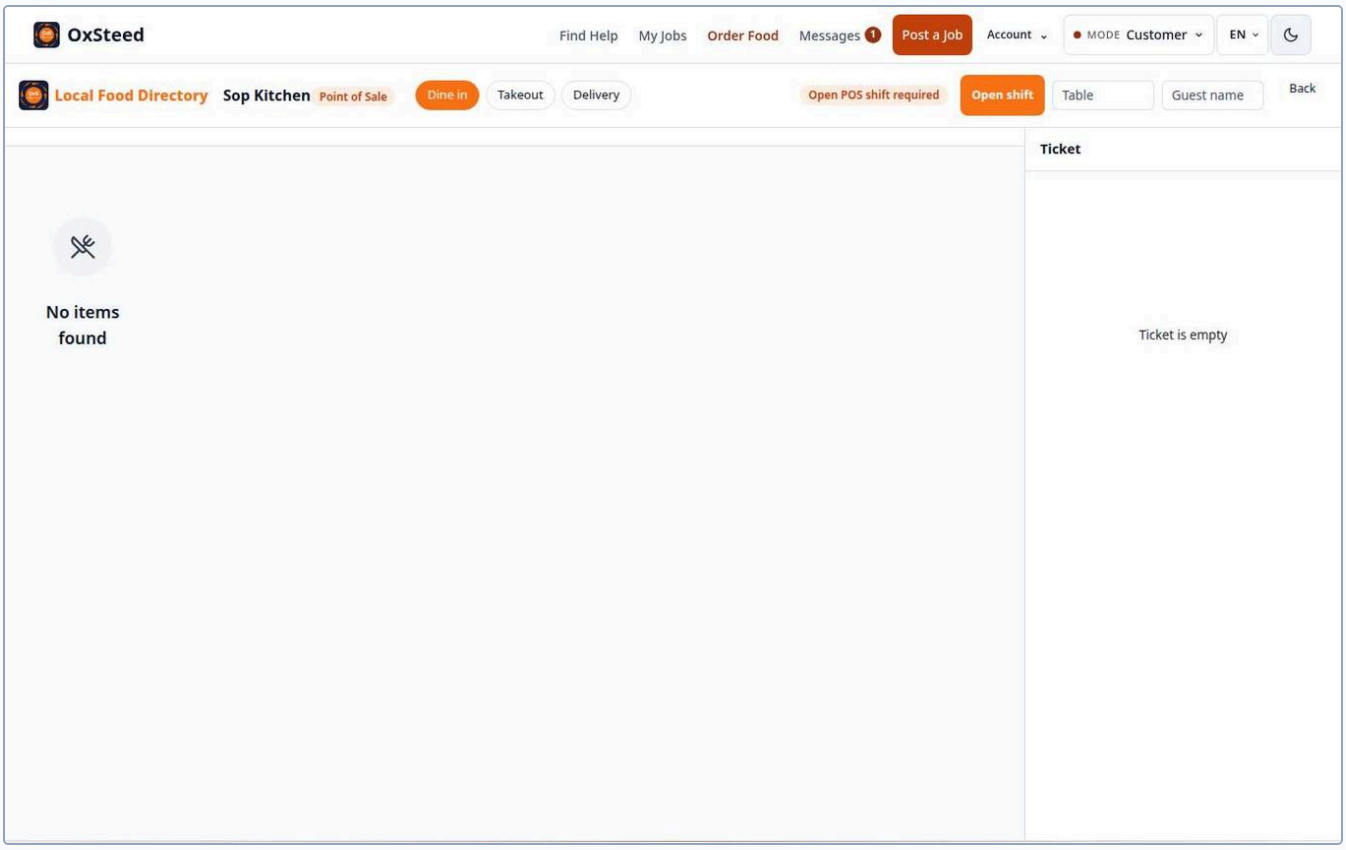

Figure 2. Taking POS payment, desktop view. *(Image description: POS payment panel with payment methods)*

Step 3: Adjust inventory

Open /restaurants/inventory/:restaurantId ("Inventory"). Search with "Search items...". On an item, choose "Adjust" and set the "Type", "Quantity", and "Note", then confirm ("Adjusted"). Use "Log waste" for spoilage ("Select an item to log spoilage or discard").

> **Expected result:** Stock counts update and the "Low stock" count reflects the change.

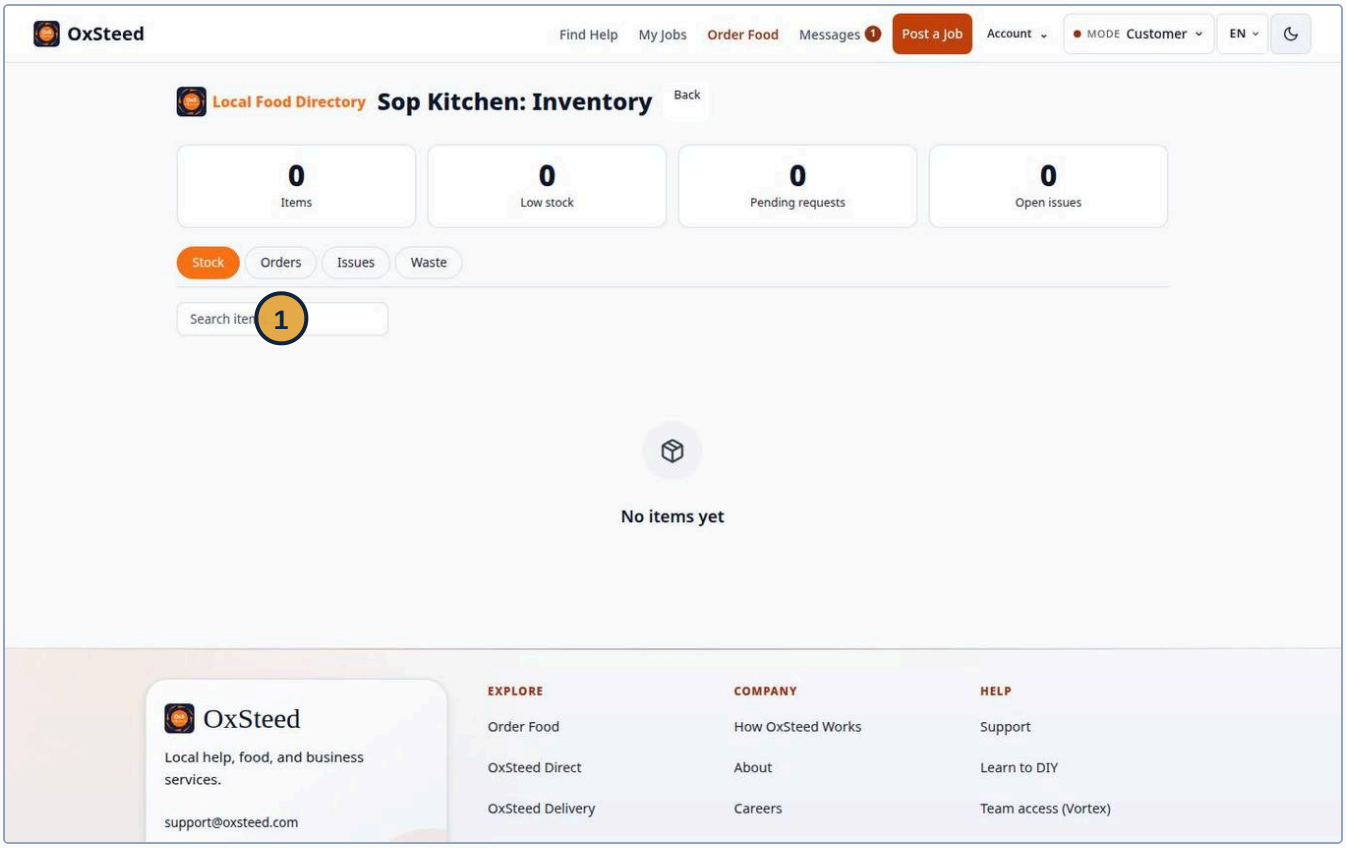

Figure 3. Adjusting inventory, desktop view. *(Image description: Inventory items with the adjust dialog)*

1. **1.** Search items field

Step 4: Order supplies and report supplier issues

In Inventory, choose "New purchase order" to send a supply request ("Request sent"), or "Report supplier issue" with "Supplier", "Description", and "Severity" ("Issue reported").

> **Expected result:** The request appears under "Pending requests" or "Open issues".

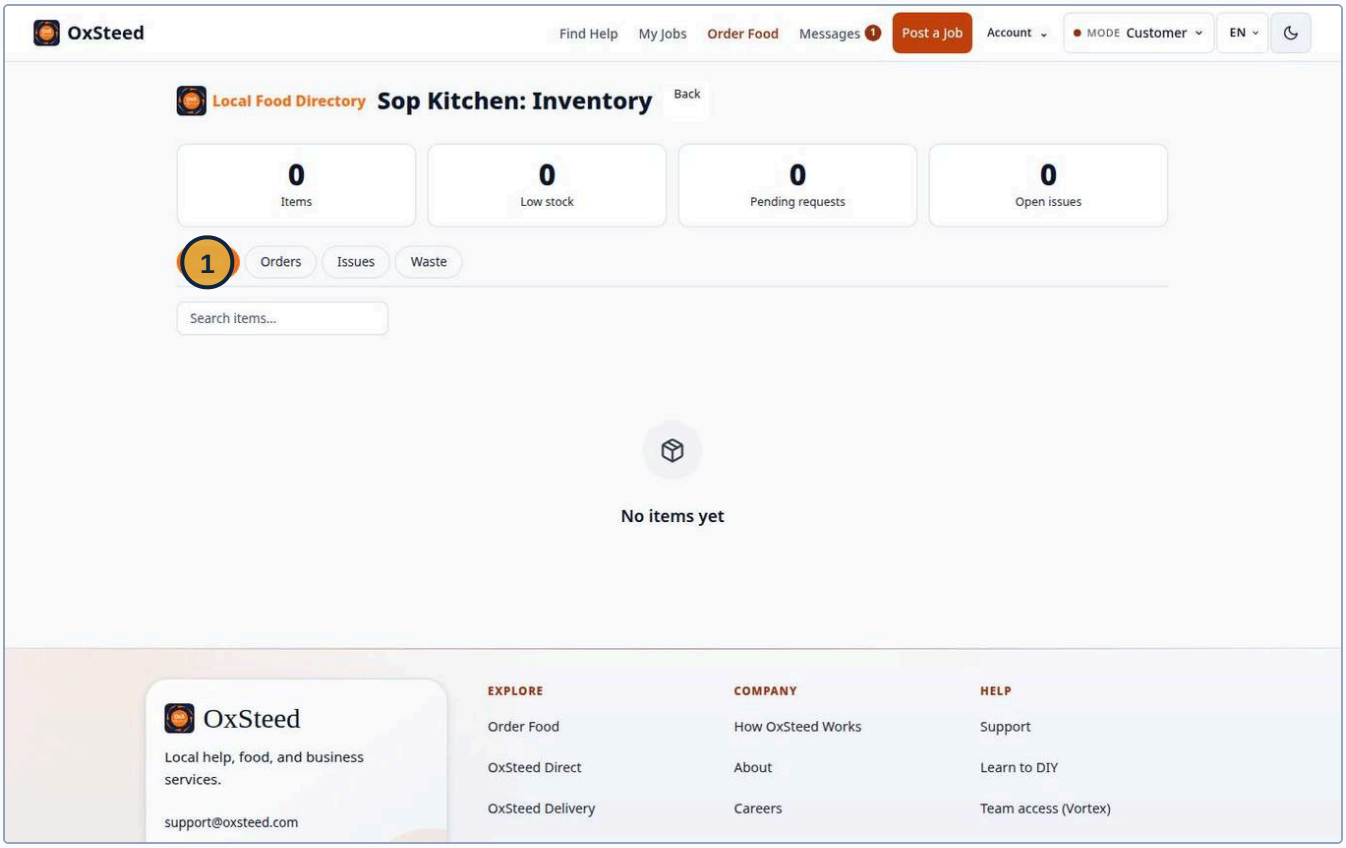

Figure 4. Ordering supplies, desktop view. *(Image description: New purchase order form)*

1. **1.** New purchase order button

Step 5: Run the crew board

Open /restaurants/crew/:restaurantId ("Crew"). Check "Shifts today" and "Open tasks". Use "New checklist" ("Title", "Type", "Create") for daily routines and "Mark complete" when done, and "New SOP" ("Title", "Category", "Content") to document procedures ("SOP created").

> **Expected result:** Shifts, tasks, checklists, and SOPs are current for the day.

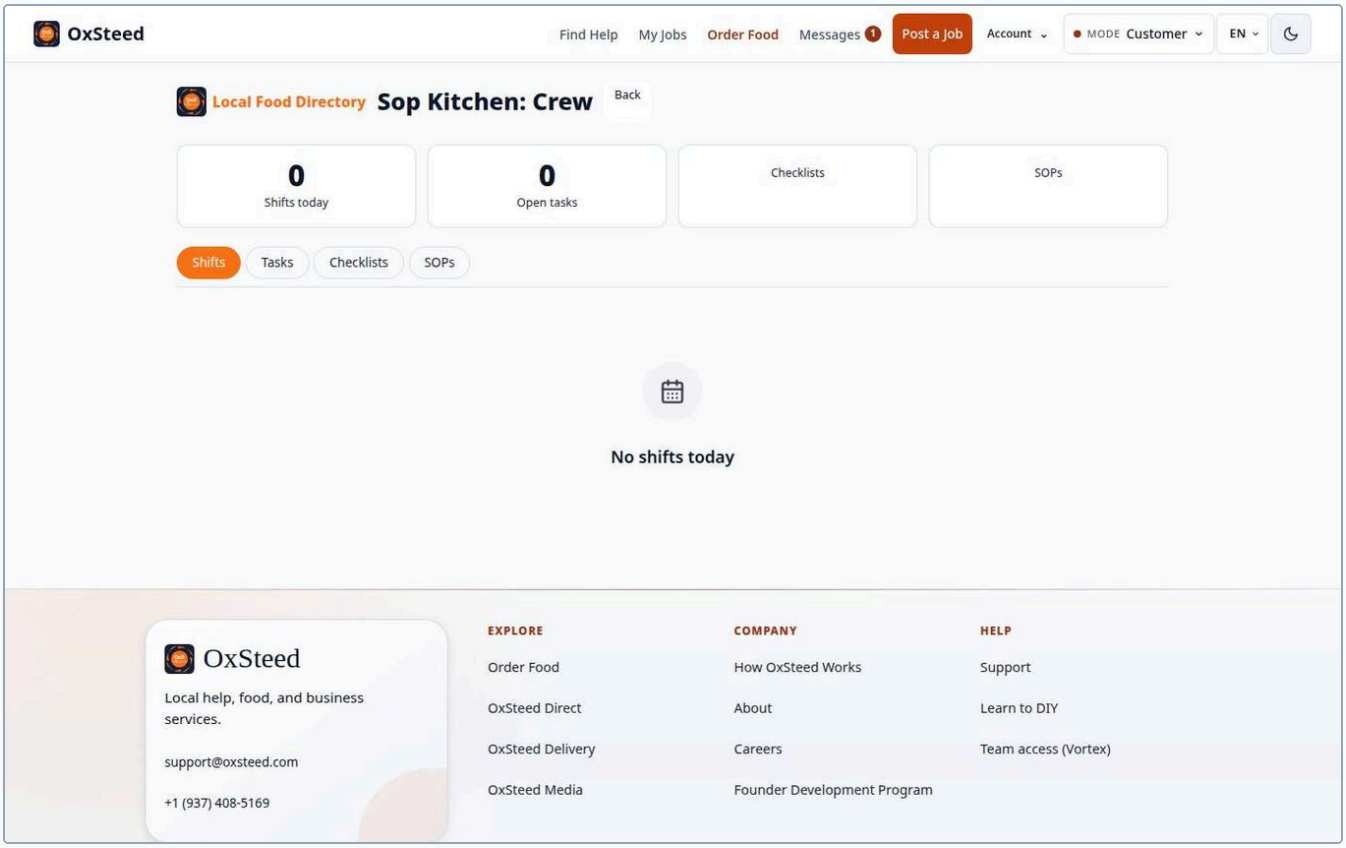

Figure 5. Running the crew board, desktop view. *(Image description: Crew page with shifts, tasks, and checklists)*

Step 6: Run deliveries from the runner page

Open /restaurants/runner/:restaurantId ("Runner"). Claim offers, "Start delivery", "Share live location", "Log proof" with a "Note", "Mark delivered", and settle cash through "Create settlement" and "Record remittance". See the handoff guide for the full runner flow.

> **Expected result:** Deliveries complete with proof and settled cash.

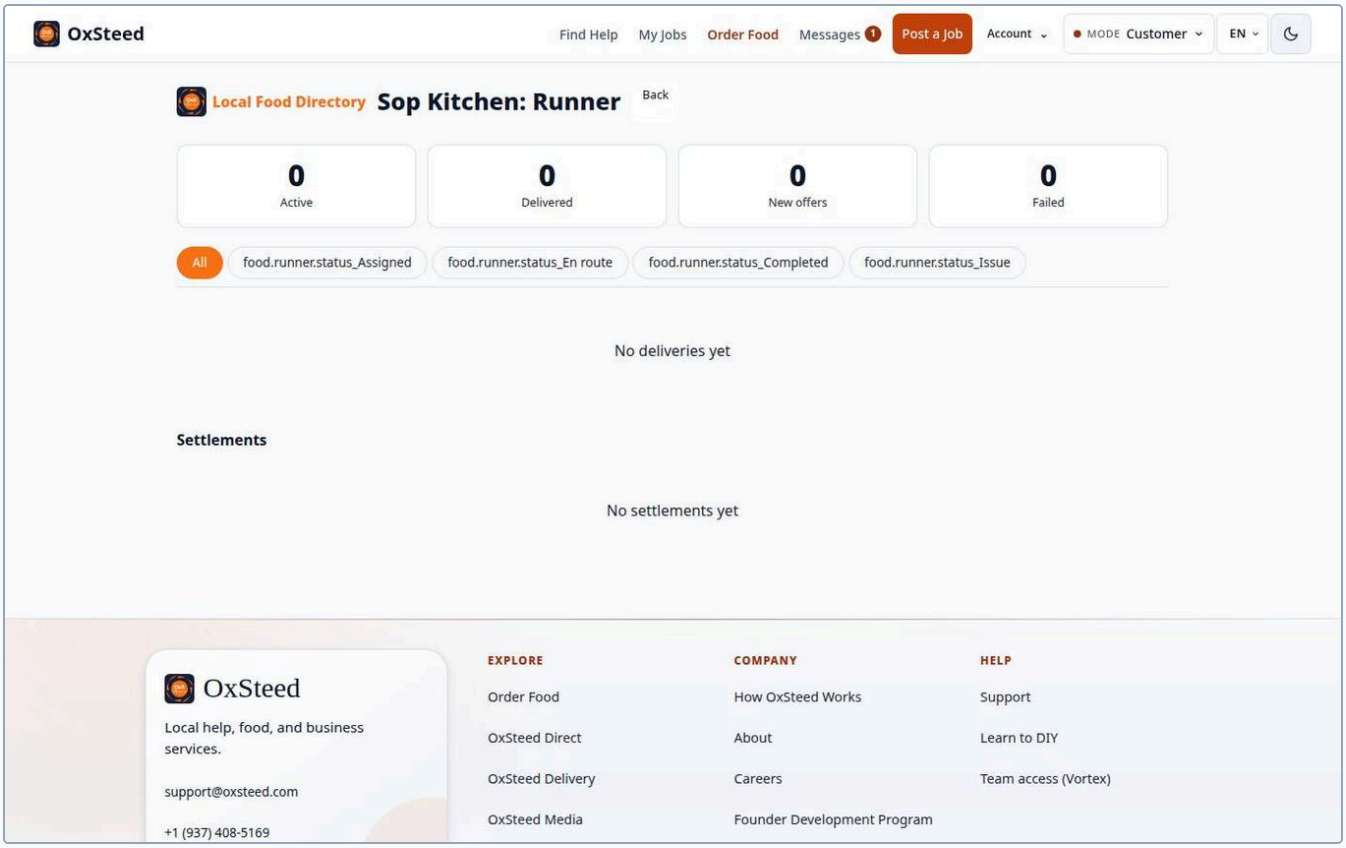

Figure 6. Running deliveries, desktop view. *(Image description: Runner page with delivery tasks)*

Confirm it worked

Orders flow through POS to the kitchen, inventory counts stay current, crew tasks are done, and deliveries complete with proof.

If something goes wrong

Problem	What to do

POS shows "Open POS shift required".	Choose "Open shift". You cannot take orders until a shift is open.
You see "Only managers can record POS payments."	Ask a manager to record the payment, or have your restaurant grant you the right permission.
Card payment is not offered at the POS.	Card payments require a connected POS terminal. Use the POS app for card checkout.
POS actions fail to sync.	You see "Sync degraded: X failed, Y pending, Z unsent". The actions are queued on the device; check the connection and they will sync.

Need help?

For staff tool issues, use the in-app support page at /support.

Configure store settings

Guide ID	**restaurant-store-settings**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/restaurants/restaurant-store-settings

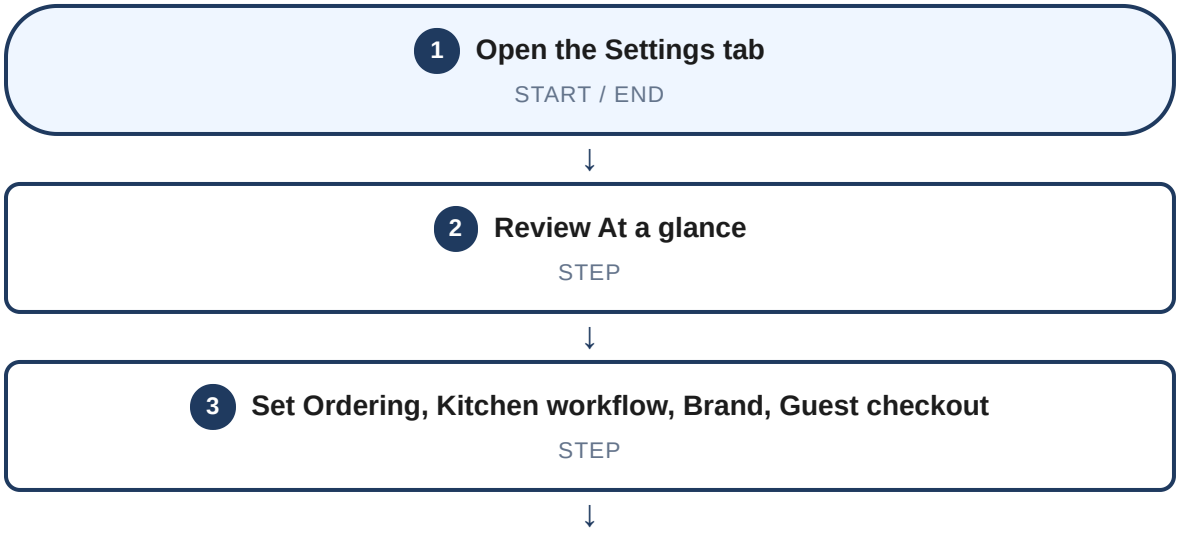

Goal

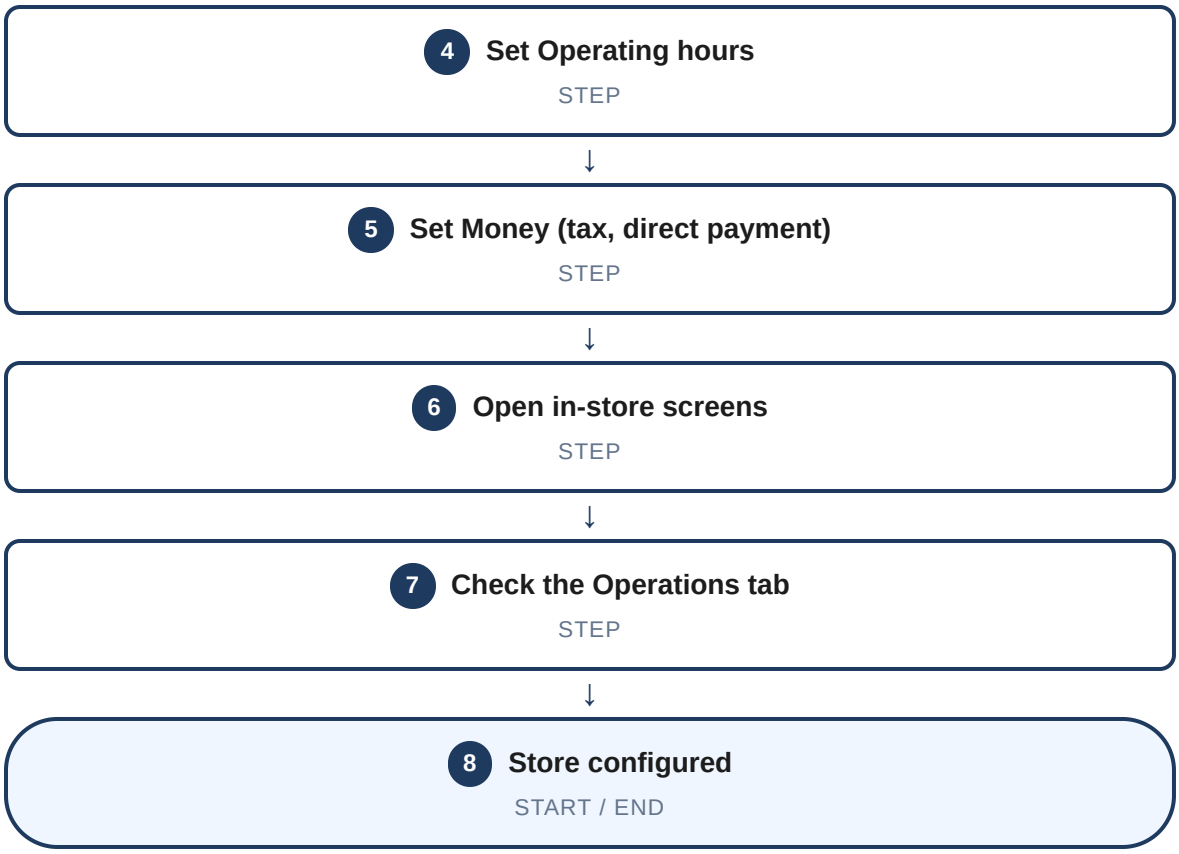

Configure the storefront settings that control ordering, hours, money handling, branding, and in-store screens.

Before you start

1. Sign in and open the restaurant dashboard.
2. Finish restaurant setup.

Process map

Text version. Open the Settings tab on the restaurant dashboard and review the "At a glance" chips. Configure the Ordering section (live status, online and in-store orders, prep time), the Kitchen workflow (quality check, queue removal delay), Brand accent color, and Guest checkout rules. Set Operating hours and save them. Configure the Money section (tax rate, direct payment, QR pay codes), then open the in-store screens (Kitchen display, Queue board, Kiosk) and review the Operations tab checklists and SOPs.

Steps

Step 1: Open the Settings tab and review At a glance

On the restaurant dashboard at /restaurants/merchant, choose the "Settings" tab. The "At a glance" section shows status chips: "Online ordering on" or "Online ordering off", "In-store on" or "In-store off", "Hours x of 7 days" (or "Hours not set"), "Tax x%" (or "Tax not set"), and "Direct payment on" or "Direct payment off".

> **Expected result:** You can see the current live status, hours, tax, and payment configuration at a glance.

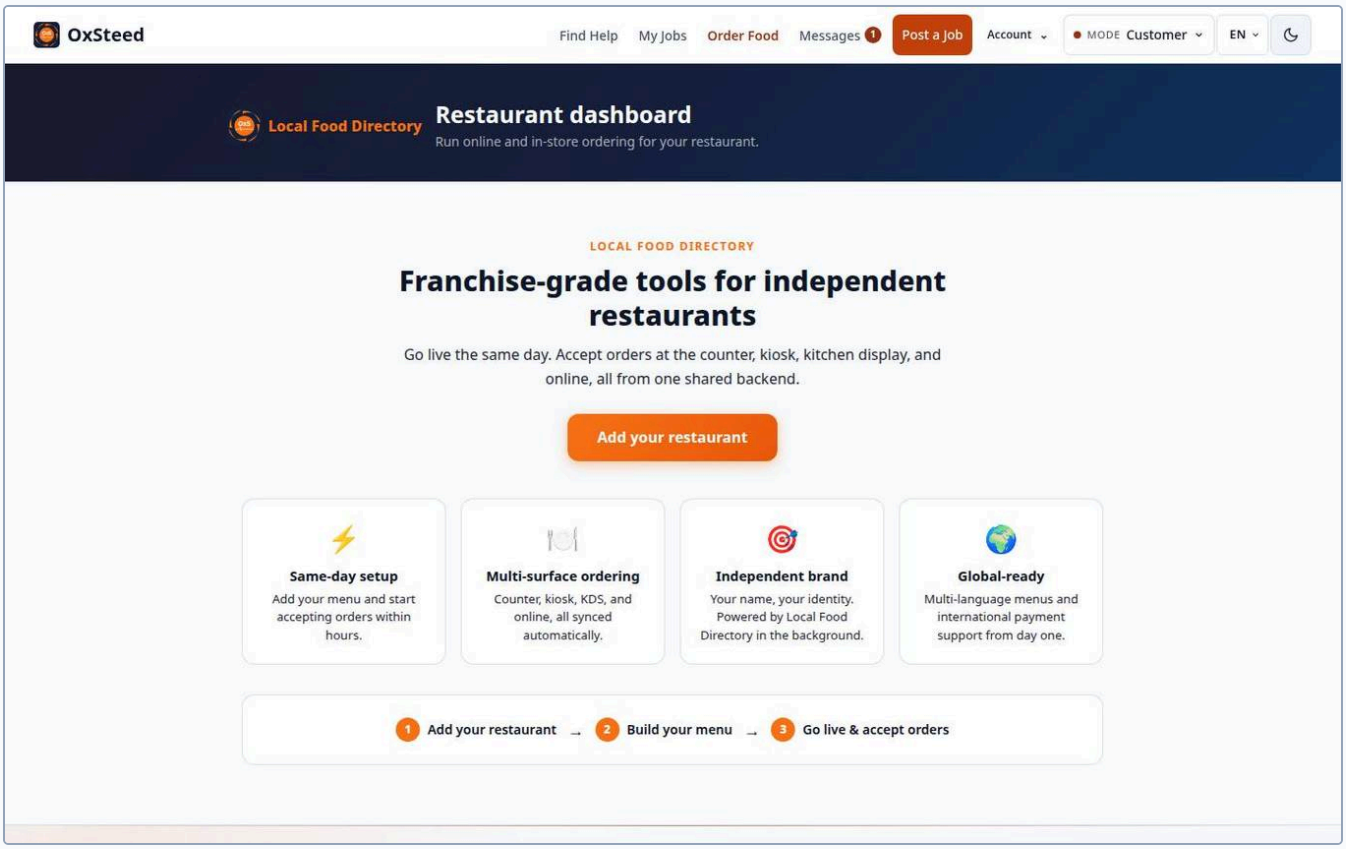

Figure 1. The Settings tab, desktop view. *(Image description: Settings tab with status chips)*

Step 2: Configure ordering, kitchen workflow, brand, and guest checkout

In "Ordering" ("Take the restaurant live and control where guests can order."), toggle "Online orders" and "In-store orders", set "Prep time (minutes)", and use "Go live" or "Pause". In "Kitchen workflow", toggle "Quality check" and set the "Queue removal delay (seconds)". In "Brand", use "Pick a color" to set the "Brand accent (#RRGGBB)" shown on the customer page and receipts. In "Guest checkout", choose whether "Pickup name required" and "Contact for status updates" are on.

> **Expected result:** Ordering, kitchen workflow, brand color, and guest checkout rules match how the store runs.

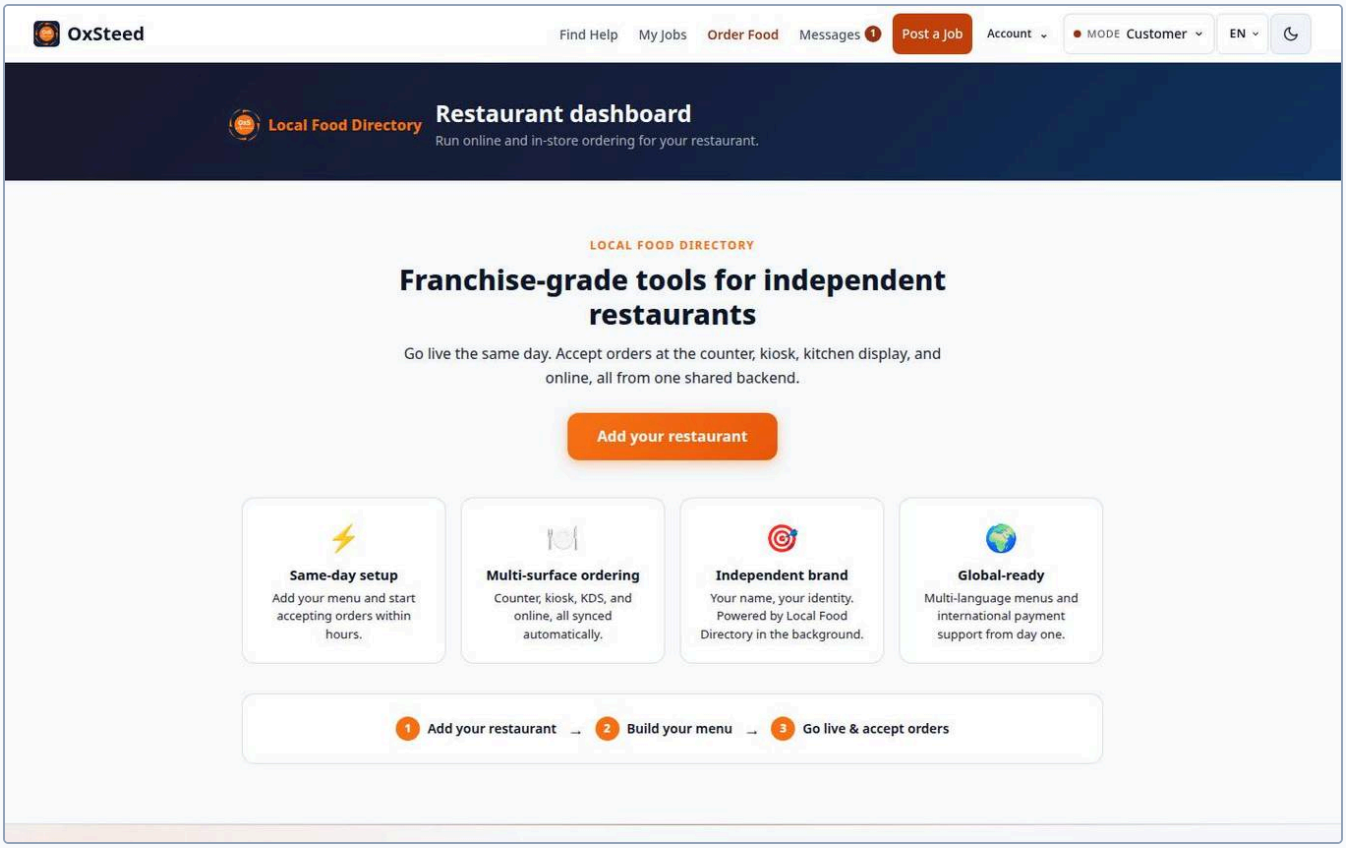

Figure 2. Ordering settings, desktop view. *(Image description: Ordering and kitchen workflow settings)*

Step 3: Set operating hours

In "Operating hours" ("Set hours for each day. Toggle a day off when the restaurant is closed."), set "Opens" and "Closes" per day. Use "Copy Monday to all days" for a uniform schedule, then choose "Save hours".

> **Expected result:** The "At a glance" chip reads "Hours x of 7 days" and customers see the right open status.

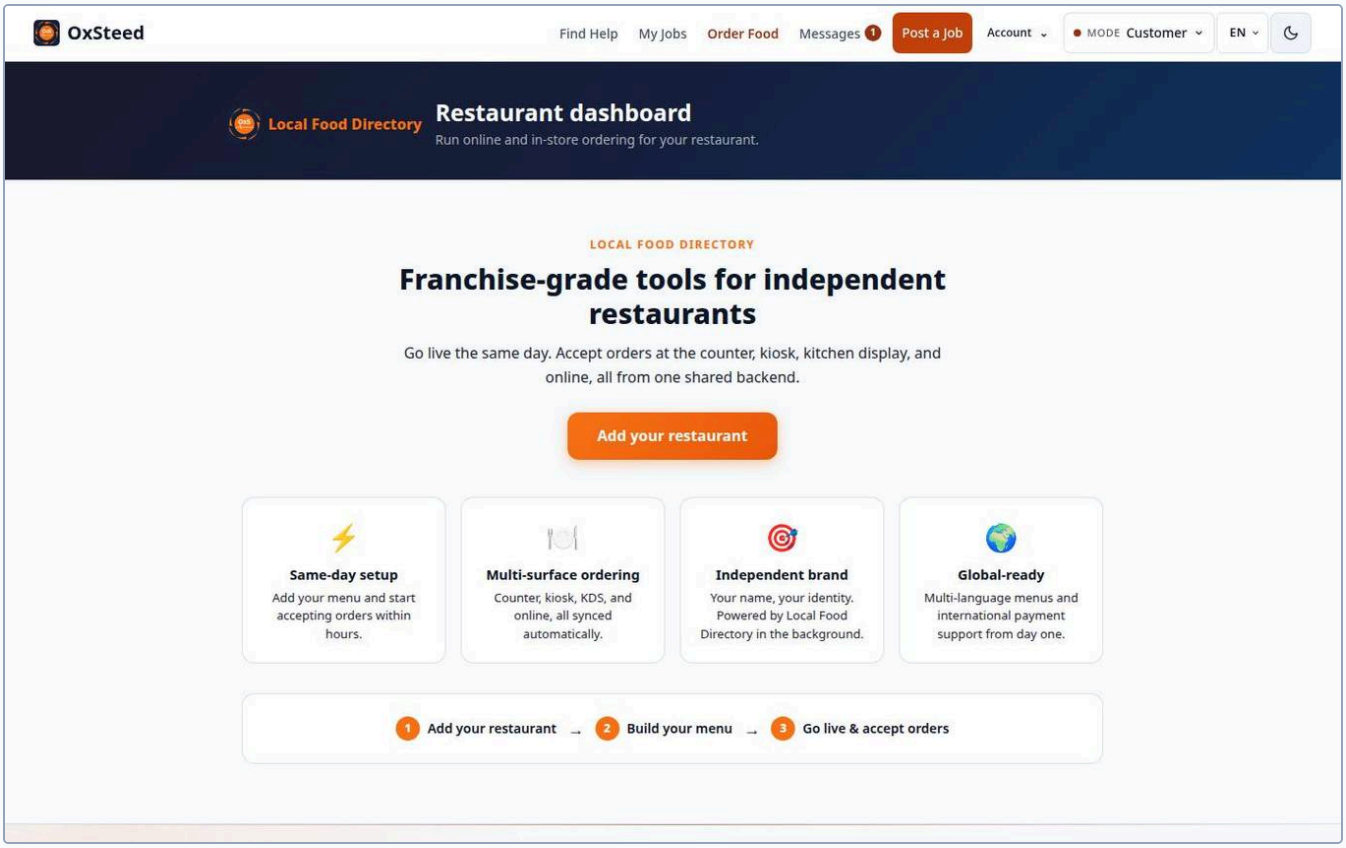

Figure 3. Operating hours, desktop view. *(Image description: Operating hours with per-day open and close times)*

Step 4: Configure money handling

In "Money" ("Sales tax and direct payment options for checkout."), set the "Tax rate (%)" ("Sales tax added to customer orders. Leave blank or 0 when tax does not apply."). In "Direct payment" ("Share one payment account or QR. Customers attach a receipt or confirmation number when they order."), toggle "Direct payment", choose whether to "Require receipt or confirmation", fill the "Payment label" and "Handle / account", and use "Manage QR pay codes" to link your QR payment codes.

> **Expected result:** Tax applies to customer orders and the chosen direct-payment flow is ready at checkout.

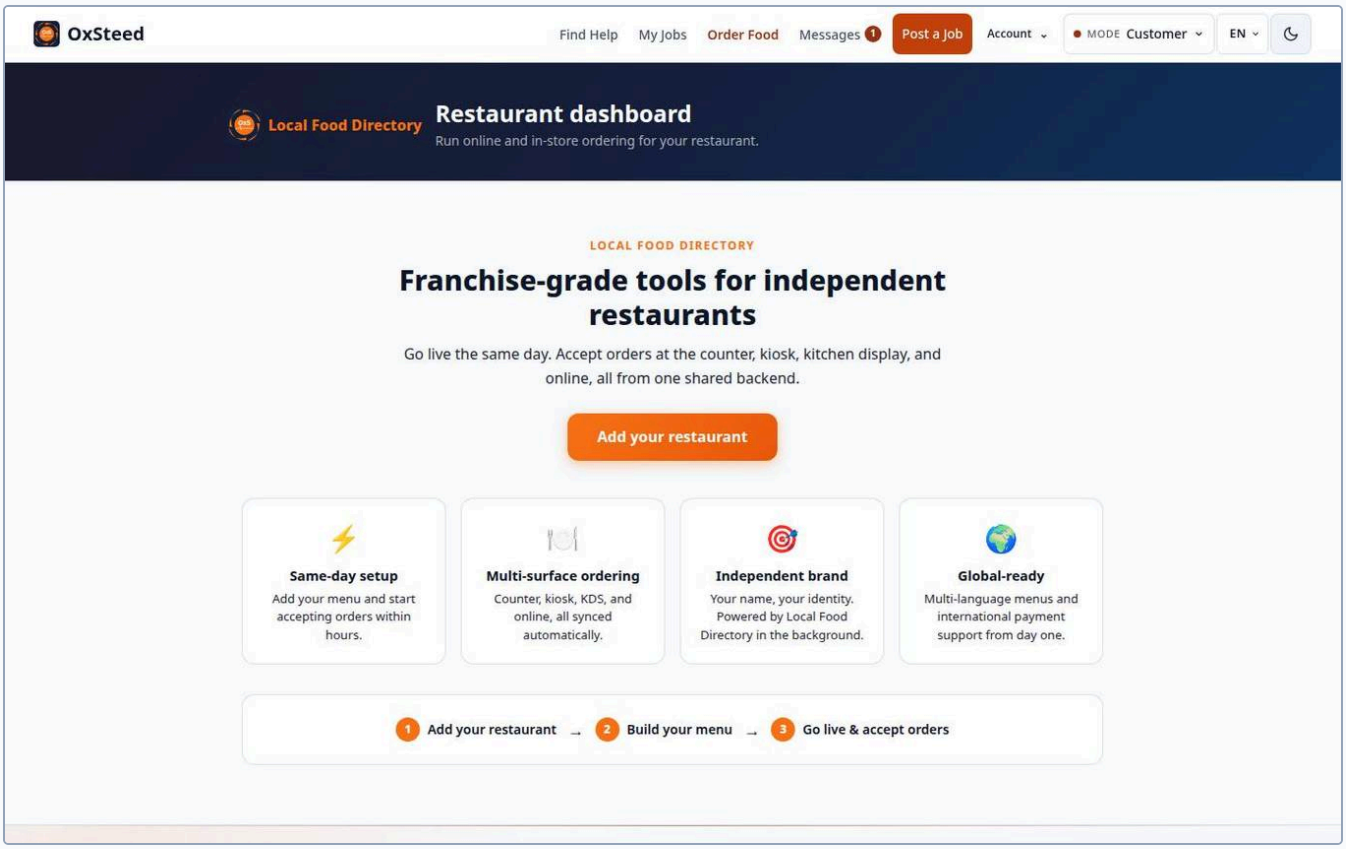

Figure 4. Money settings, desktop view. *(Image description: Money settings with tax rate and direct payment)*

Step 5: Open the in-store screens

In "In-store screens" ("Open these on a kitchen screen or projector, a TV facing your guests, and a tablet for self-ordering."), open "Kitchen display" (/restaurants/kitchen/:restaurantId), "Queue board" (/restaurants/queue/:restaurantId), and "Kiosk" (/restaurants/kiosk/:restaurantId) on the right devices.

> **Expected result:** Each screen shows the live view for your restaurant on its dedicated device.

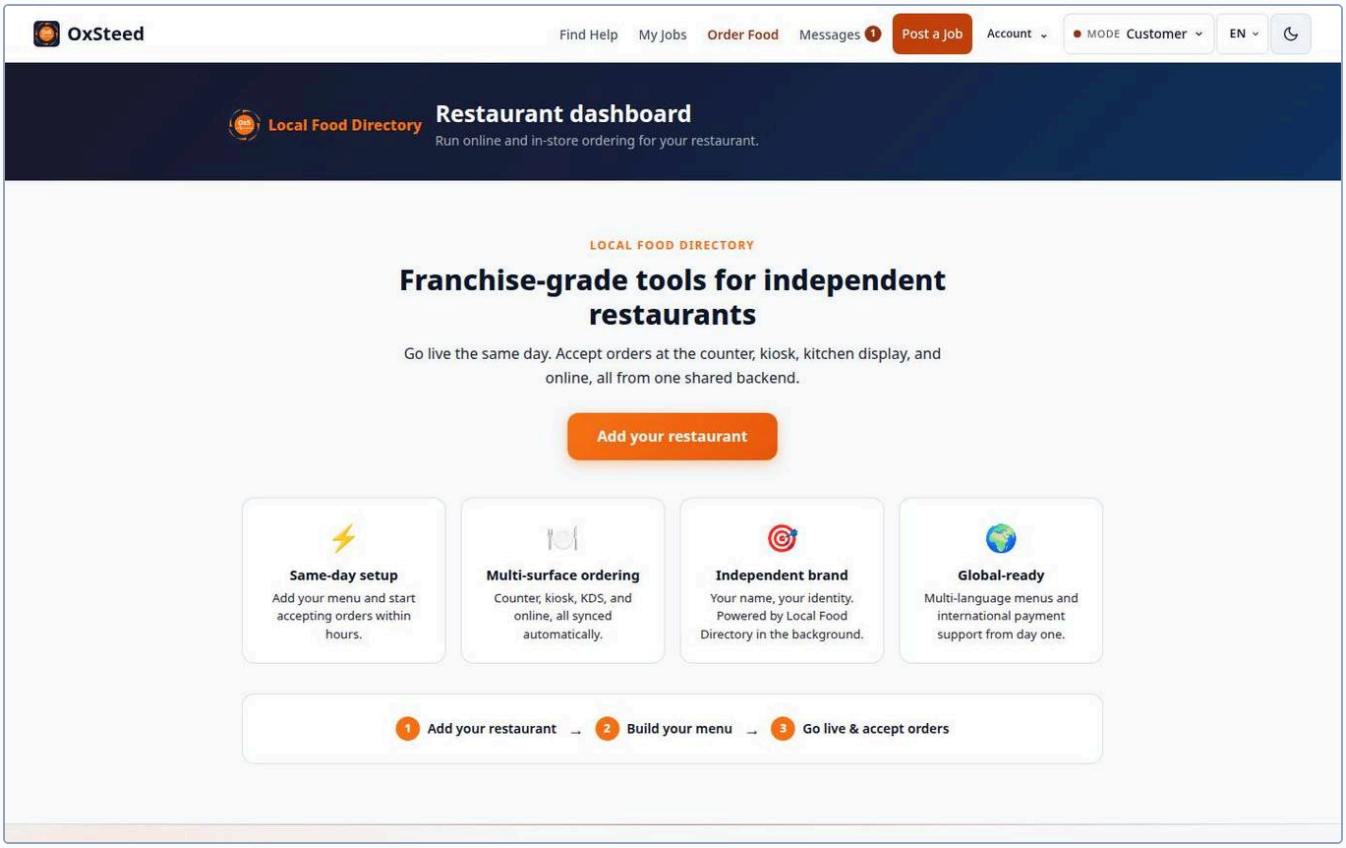

Figure 5. In-store screens, desktop view. *(Image description: In-store screens section with Kitchen display, Queue board, and Kiosk links)*

Step 6: Review the Operations tab

Open the "Operations" tab. Under "Checklists", use "New checklist" ("Checklist name", "Type", "Add suggested starter tasks") and "Start" on opening or closing routines; "Mark complete" finishes a run. Under "SOP library", use "New SOP" ("Title", "Category", "Procedure") to document how your team does things.

> **Expected result:** Opening and closing routines and store procedures are documented for the team.

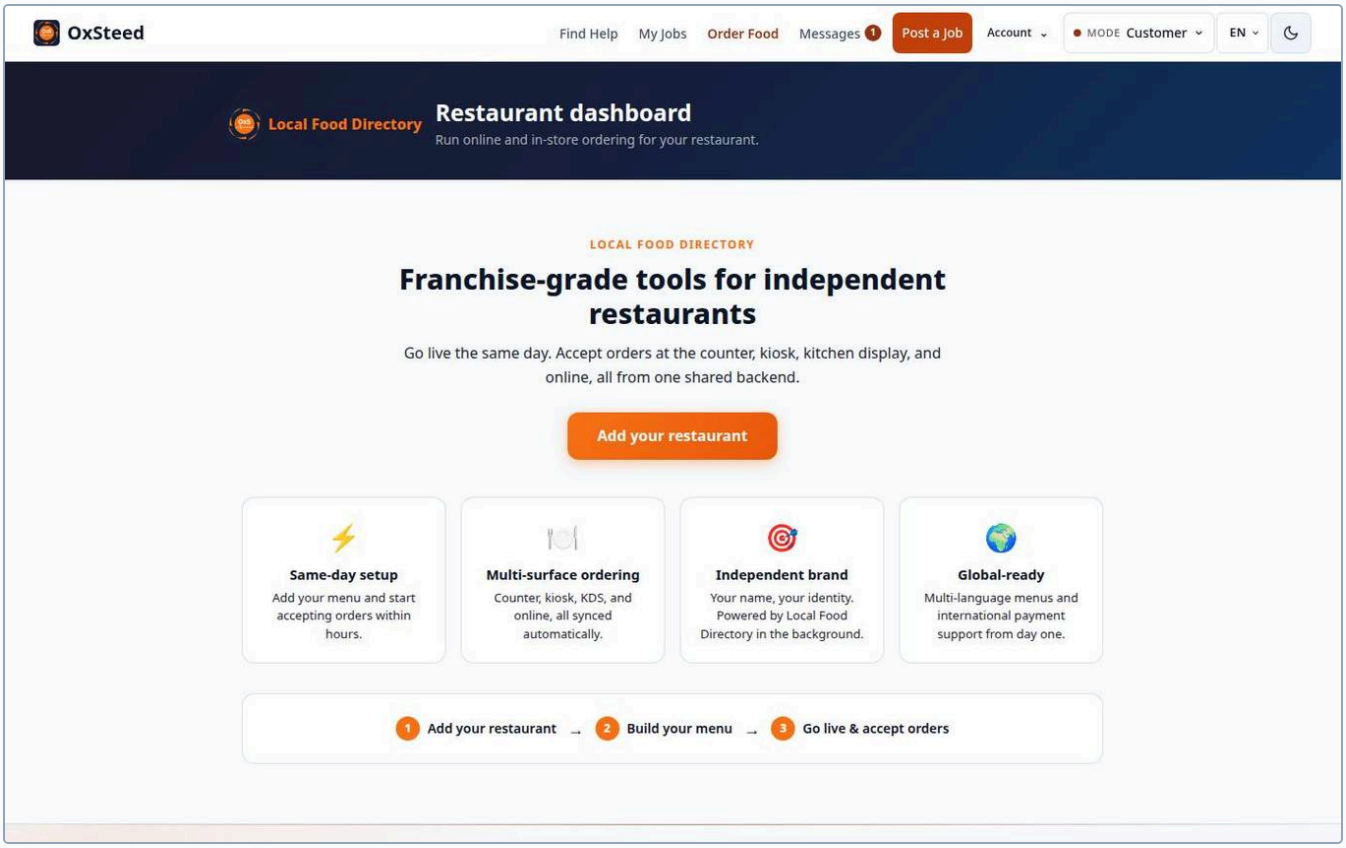

Figure 6. The Operations tab, desktop view. *(Image description: Operations tab with checklists and SOP library)*

Confirm it worked

The Settings tab shows the intended live status, hours, tax, and payment options, and each in-store screen is open on its device.

If something goes wrong

Problem	What to do

Customers cannot order even though the restaurant exists.	In the "Ordering" section, confirm "Go live" was chosen and the "Online orders" toggle is on. The Home tab warns when "Your restaurant is not live yet".
A settings change fails to save.	You see "Could not update the restaurant." Retry; for hours, use "Copy Monday to all days" before "Save hours" if a day was left half-filled.

Guide ID: financial-archives | **Revision:** 1 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Browse archived statements

Guide ID	**financial-archives**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-archives

Goal

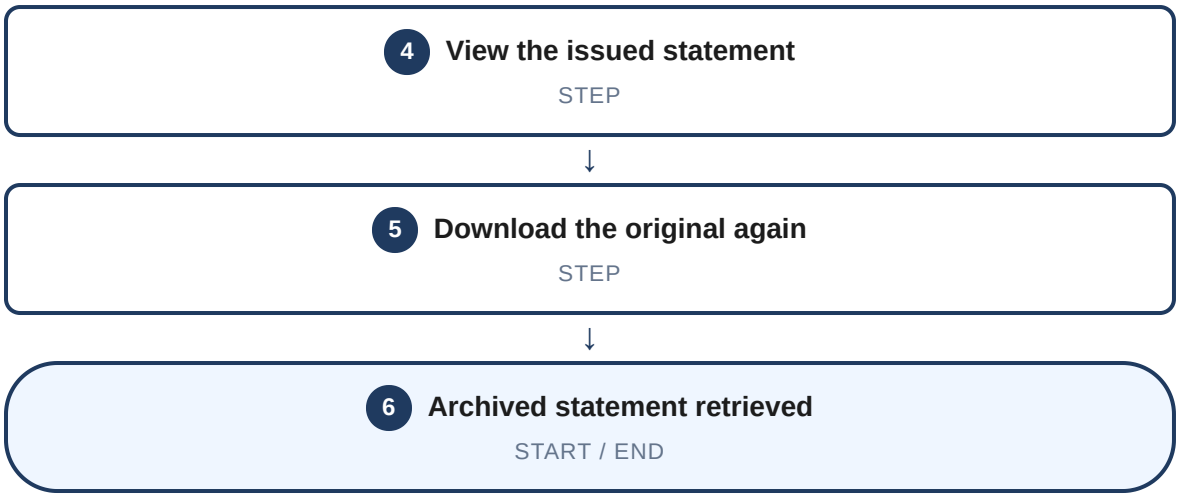

Find issued monthly statements in the archive and view or download the immutable originals.

Before you start

1. Sign in to your OxSteed account.
2. Know which product the statement belongs to (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement).

Process map

Text version. Open a product archive, for example /oxsteed-credit/statements/archive ("Statement archive": "Your issued monthly statements. Originals are immutable; download them again at any time."). Pick the product (OxSteed Credit, Restaurant Credit, helper earnings, business, or restaurant settlement). Find the statement period ("Jan 1 – Jan 31"), open it ("View"), and download the original ("Download issued", "Download CSV"). Each product has its own archive; they never merge.

Steps

Step 1: Open a statement archive

Open one of the archive routes: /oxsteed-credit/statements/archive for OxSteed Credit, /restaurant-credit/statements/archive for Restaurant Credit, /helper-earnings/statements for helper earnings, /business/statements for business statements, or /restaurant-settlement/statements for restaurant settlement. The page is titled "Statement archive".

> **Expected result:** The archive loads with the product selector and the issued statements.

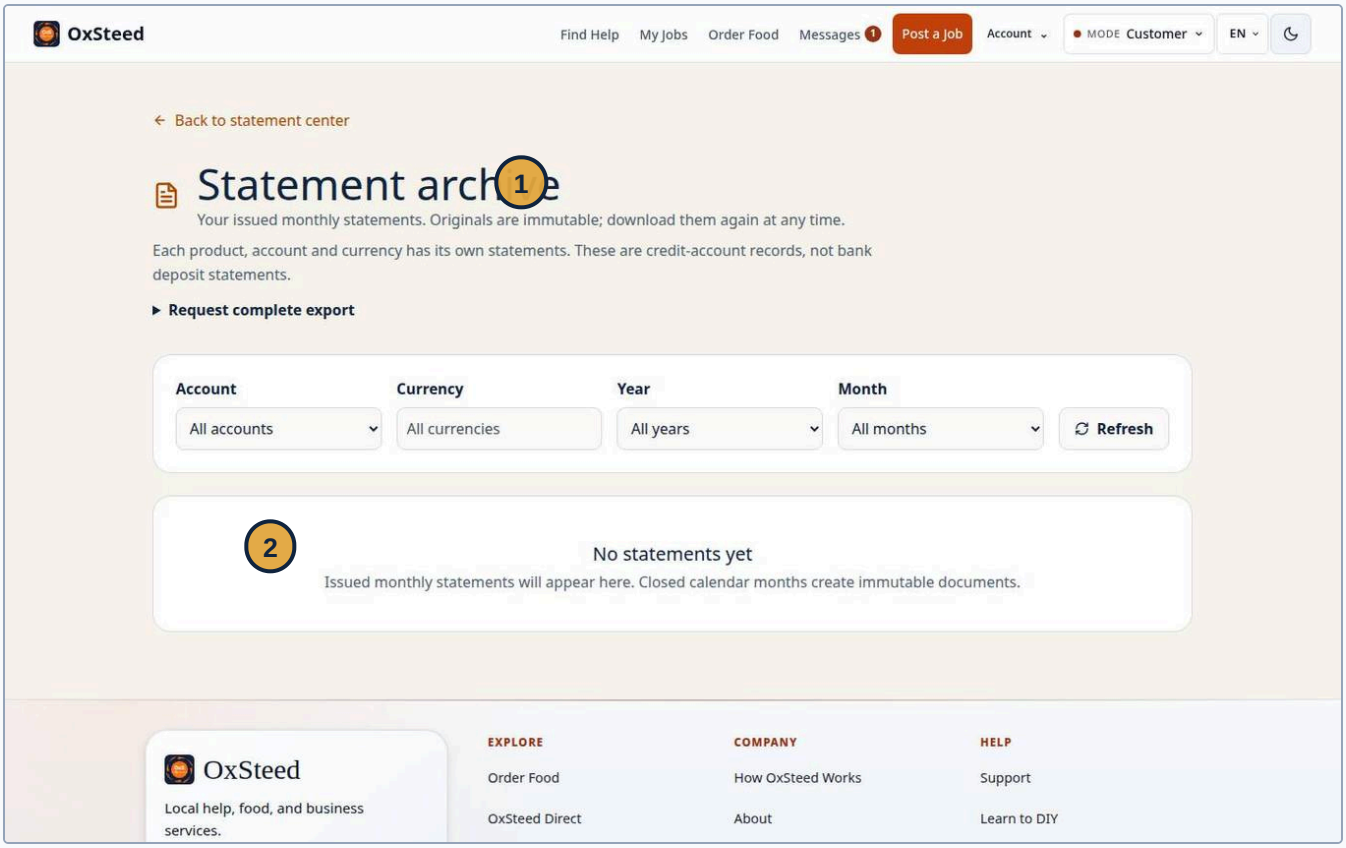

Figure 1. The statement archive, desktop view. *(Image description: Statement archive with issued monthly statements)*

1. **1.** Page title
2. **2.** Product selector

Step 2: Pick the product and find the period

Use the "Product" selector to switch products ("Each product, account and currency has its own statements. These are credit-account records, not bank deposit statements."). Find the statement by its period heading ("Jan 1 – Jan 31"). The totals line uses the product's own accounting vocabulary (for example "Opening payable", "Posted earnings", "Settled payouts and status removals", "Closing payable" for helper earnings).

> **Expected result:** The right statement document is on screen with its totals.

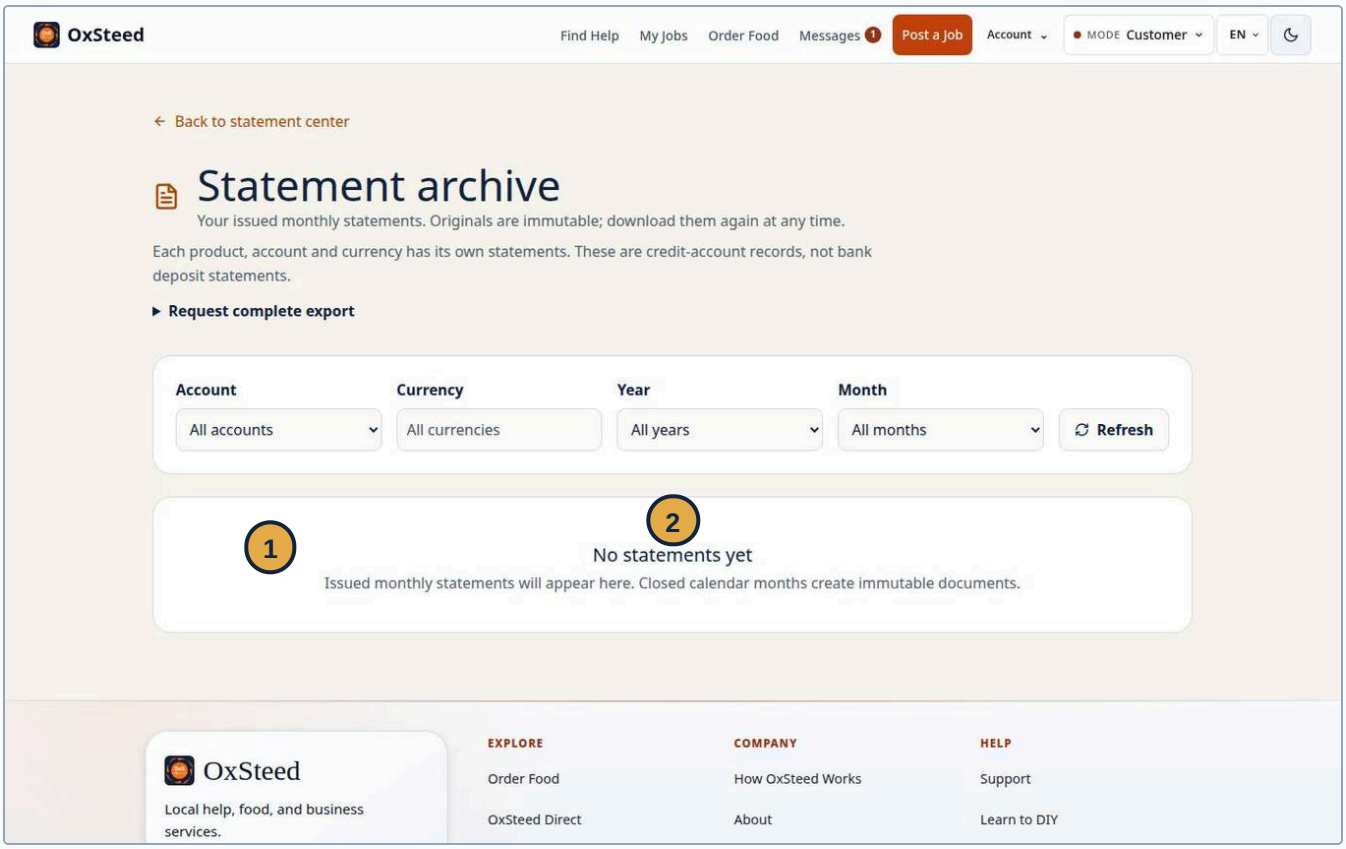

Figure 2. Picking a product and period, desktop view. *(Image description: Product selector and statement periods)*

1. **1.** Product selector
2. **2.** Statement periods

Step 3: View and download the issued statement

Choose "View" on the statement to read the issued document. Use "Download issued" for the immutable original or "Download CSV" for the data. Originals never change; if a statement was amended, the archive marks it and links the correction.

> **Expected result:** The statement opens or downloads with its full transaction history.

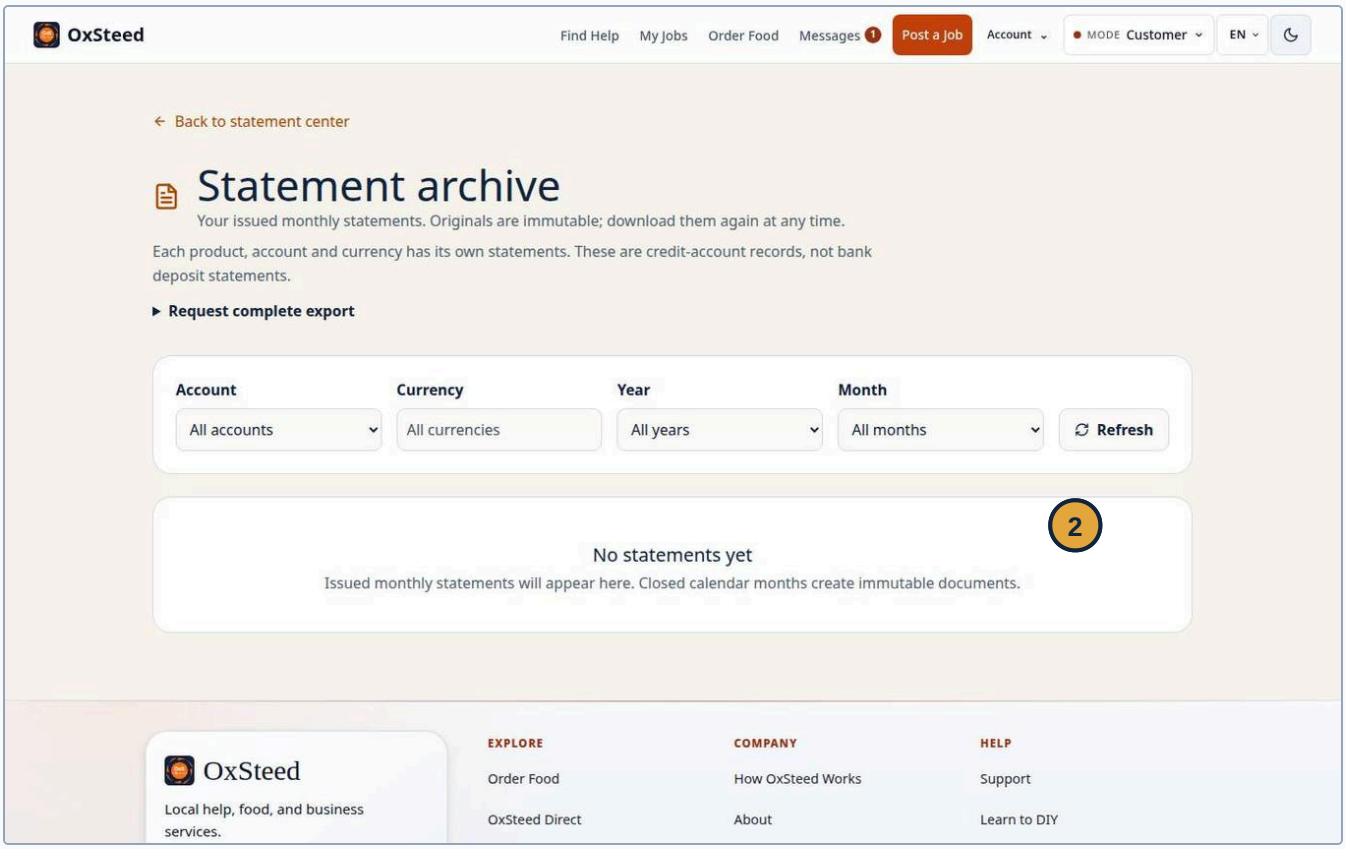

Figure 3. Viewing an issued statement, desktop view. *(Image description: Issued statement with View and Download actions)*

1. **1.** View button
2. **2.** Download issued button

Confirm it worked

You have the issued statement open or downloaded, from the right product archive, with the immutable original.

If something goes wrong

Problem	What to do
The archive shows "No statements yet".	"Issued monthly statements will appear here. Closed calendar months create immutable documents." If you expected one, check the product selector; statements live under their own product.
You cannot find a statement for a different product.	Switch the "Product" selector or open the product's own archive route directly (for example /restaurant-credit/statements/archive).

Need help?

For archive issues, use the in-app support page at /support.

Download statement exports

Guide ID	**financial-downloads**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-downloads

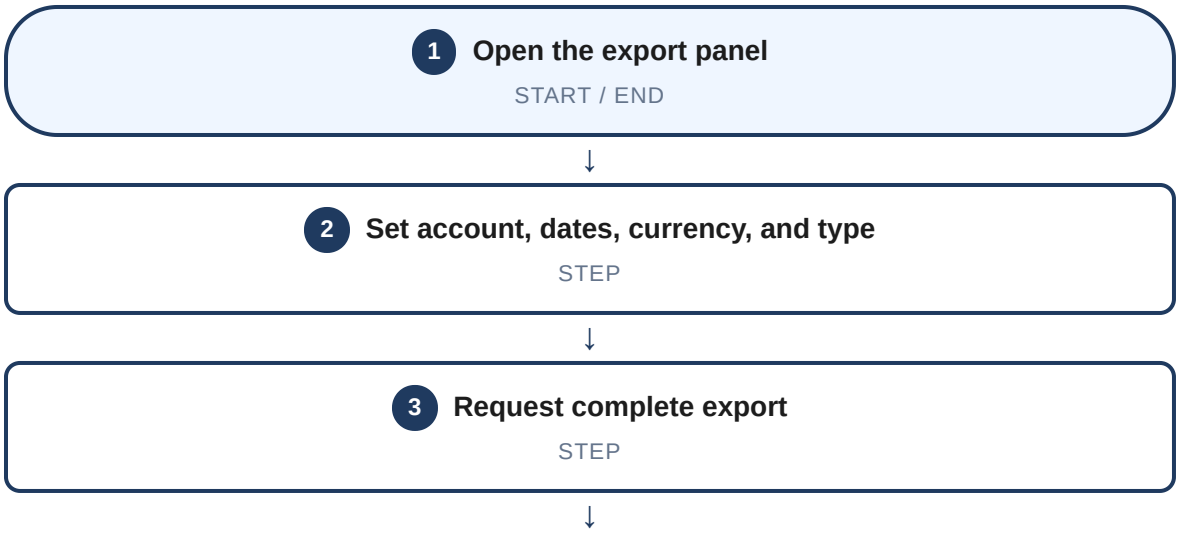

Goal

Export statement data as CSV or PDF for accounting, audits, or taxes.

Before you start

1. Sign in to your OxSteed account.
2. Know the account, date range, and format you need.

Process map

Text version. Open the export panel from a statement archive ("Request complete export") or at /statements/exports/:jobId. Set the "Account", "From", "To", "Currency", and "Type" fields, then submit the export. The export runs as a tracked job; you can cancel it with "Cancel export" or retry it with "Retry export". When it completes, the "Export files" list shows each file with its rows; download them, or open "View export history" for past jobs.

Steps

Step 1: Open the export panel

From a statement archive, expand the export section and choose "Request complete export". You can also track a specific job at /statements/exports/:jobId. The panel heading reads "Request complete export".

> **Expected result:** The export form loads with the account and period fields.

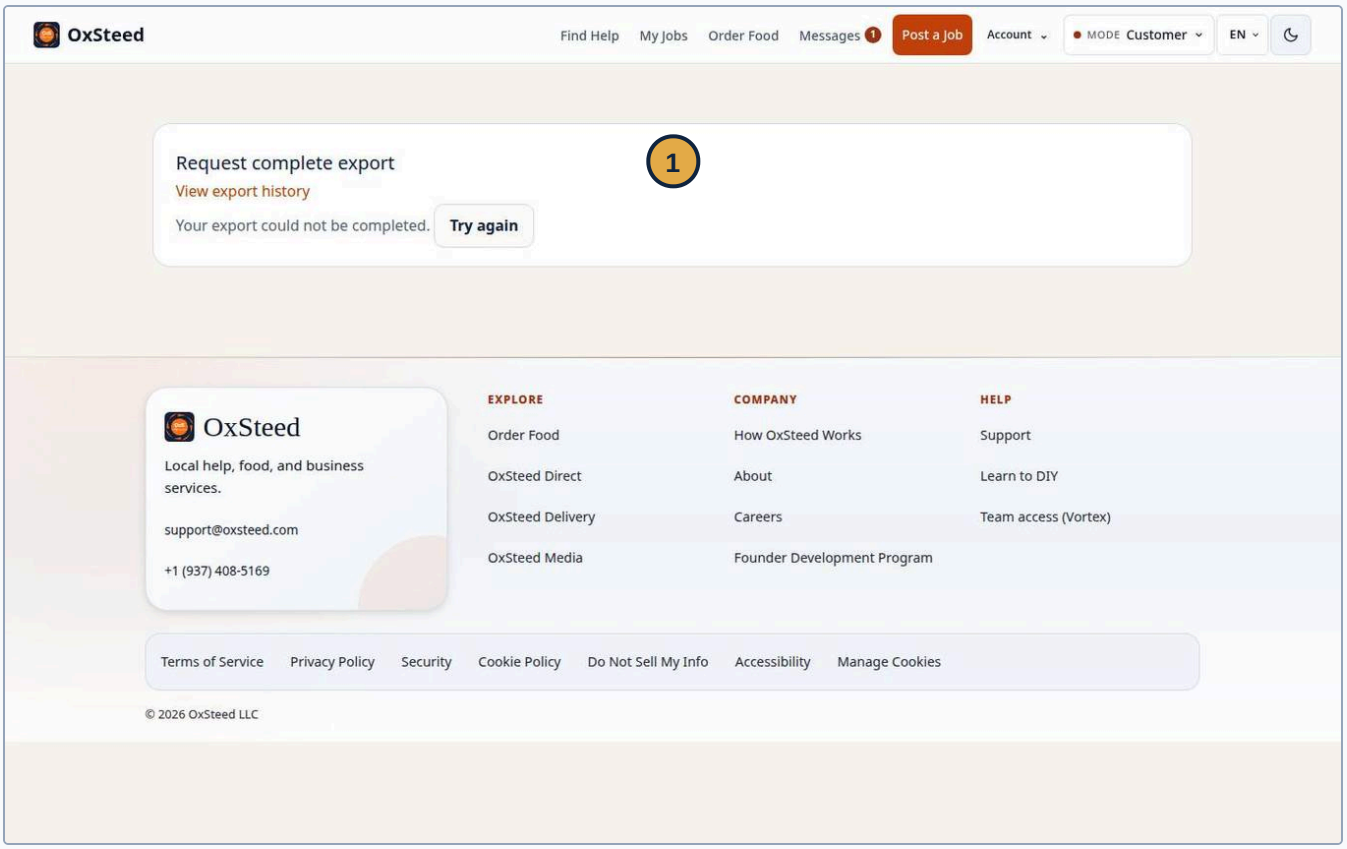

Figure 1. The export panel, desktop view. *(Image description: Export request form)*

1. **1.** Export heading

Step 2: Set the export parameters and submit

Choose the "Account", the "From" and "To" dates, the "Currency" (3-letter code), and the "Type" (format), then choose "Request complete export". For several accounts at once, use the bulk section: check the accounts, pick the "Type", and start the bulk export.

> **Expected result:** The export job starts and shows its pending state.

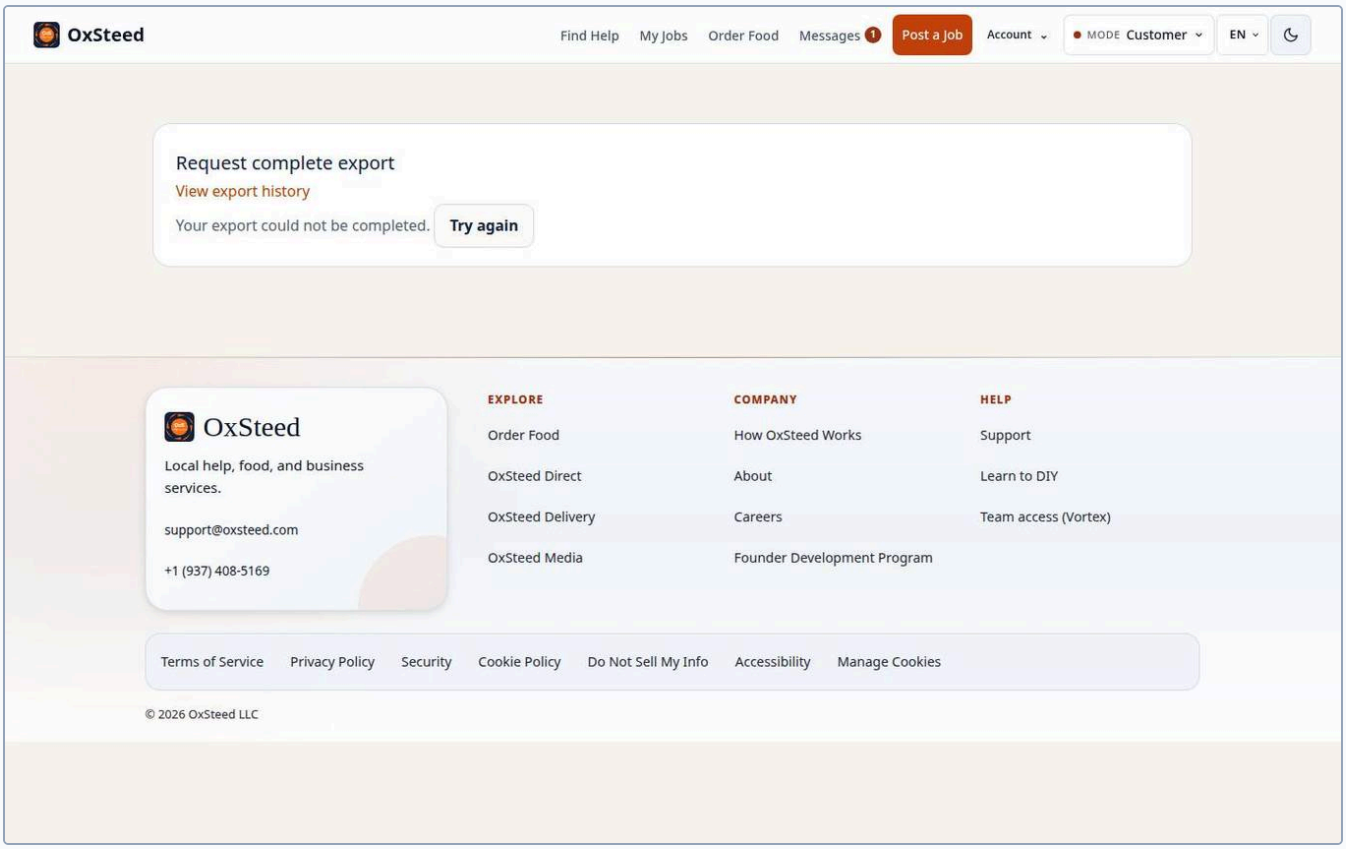

Figure 2. Submitting an export, desktop view. *(Image description: Export form with the submit button)*

Step 3: Track the job and download the files

The job shows its state: pending, complete, failed, or cancelled. While it runs you can use "Cancel export"; if it fails and "Retry export" is offered, use it. When complete, the "Export files" section lists each file ("Download CSV · part", with the row range). Use "View export history" for past jobs.

> **Expected result:** The export files download to your device.

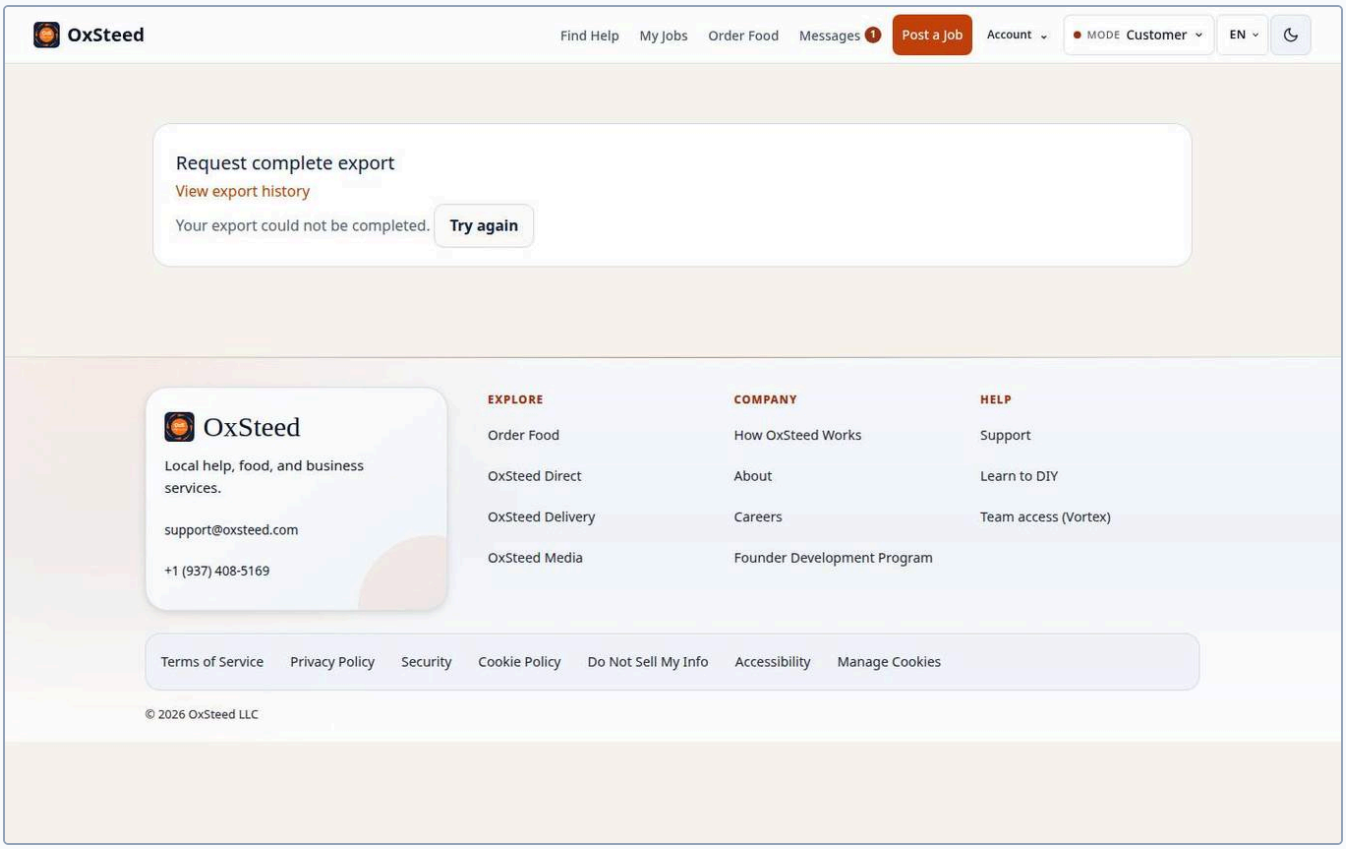

Figure 3. Downloading export files, desktop view. *(Image description: Export files list with download buttons)*

Confirm it worked

The export files are on your device and the history lists the completed job.

If something goes wrong

Problem	What to do
The export fails.	You see "Your export could not be completed." Use "Retry export" if offered, or narrow the date range and request again.

The job is still running.	Large date ranges take longer. You can "Cancel export" and re-request a smaller range, or check "View export history" later.

Need help?

For export issues, use the in-app support page at /support.

Guide ID: financial-restaurant-credit | **Revision:** 1 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

Use Restaurant Credit (per-restaurant wallets)

Guide ID	**financial-restaurant-credit**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Restaurant manager
Availability	**Supported**
Online version	/how-it-works/financial/financial-restaurant-credit

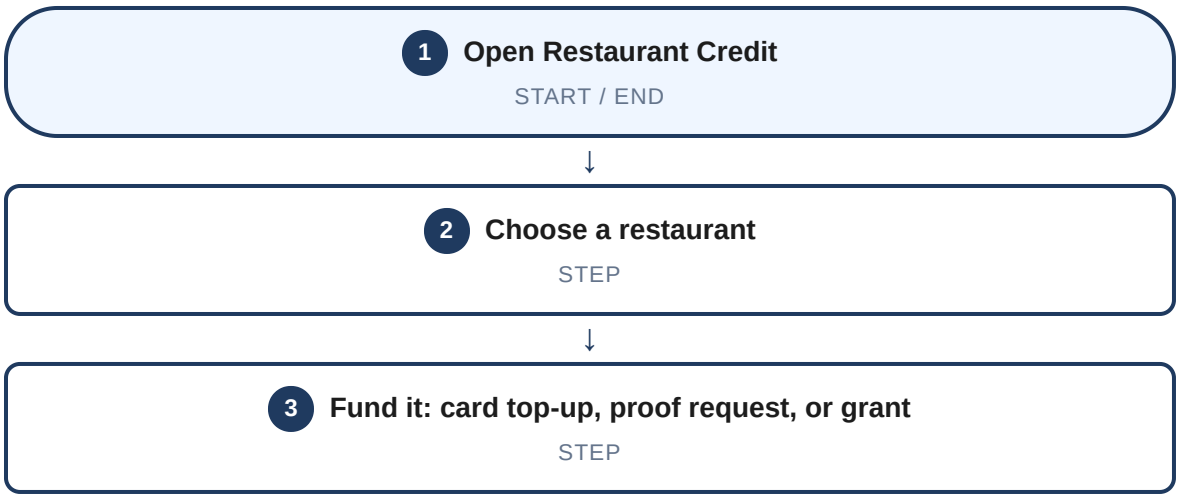

Goal

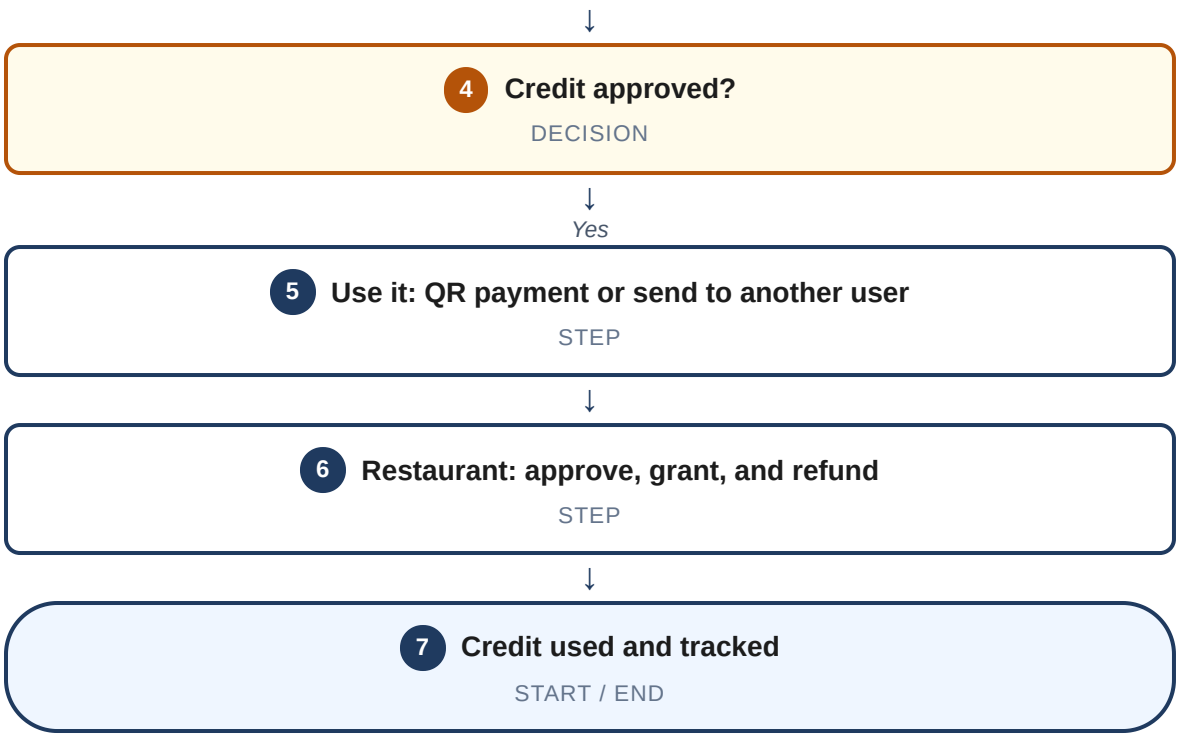

Use per-restaurant credit balances: top up by card, request credit with proof, pay by QR, and send credit, as a customer or a restaurant.

Before you start

1. Sign in to your OxSteed account.
2. Understand the separation: Restaurant Credit is per-restaurant. OxSteed Credit is the platform wallet. They are different systems.

Process map

- *No, correct and retry:* Credit approved? → Fund it: card top-up, proof request, or grant

Text version. Open /restaurant-credit ("Restaurant Credit": "Manage restaurant-scoped credit, payments, transfers, and requests."). Choose a restaurant; each balance belongs to one restaurant and cannot be spent elsewhere. Fund it three ways: "Add money" tops up by card, "Add credit" sends payment proof for approval, or the restaurant grants it directly. Once funded, use "Use credit" to pay by one-time QR, or "More credit options" to "Send credit to another OxSteed user". Restaurants approve requests and grant or refund credit from the "Restaurant credit" manager.

Steps

Step 1: Open Restaurant Credit and choose a restaurant

Open /restaurant-credit. The page notes the scope: "Restaurant-scoped wallet" and "Each balance belongs to one restaurant. It cannot be spent or transferred at another restaurant." Choose the restaurant to see "Available to spend" and the "Restaurant credit actions".

> **Expected result:** You see the wallet for one restaurant with its balance and actions.

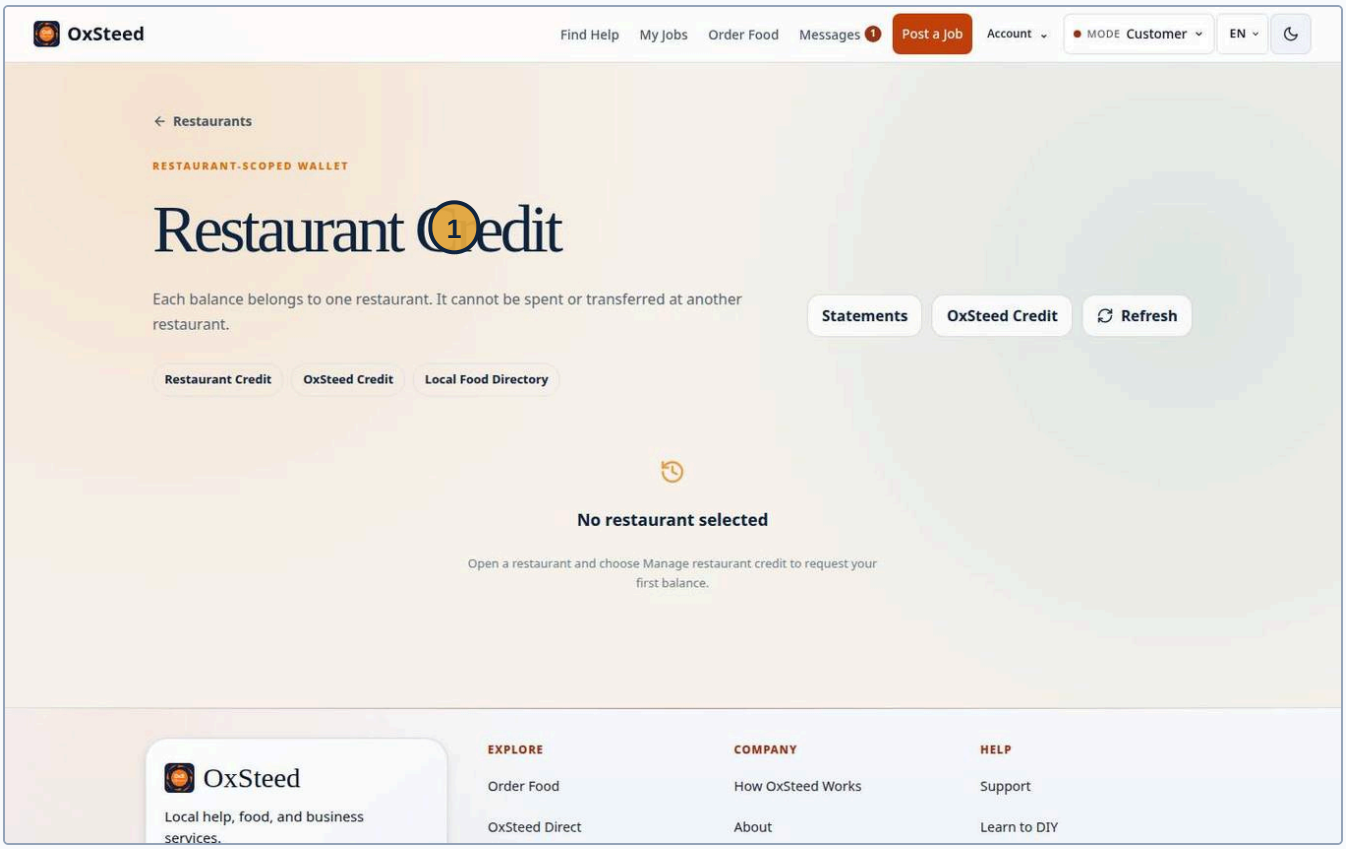

Figure 1. Restaurant Credit, desktop view. *(Image description: Restaurant credit page with balance and actions)*

1. **1.** Page title

Step 2: Top up by card

Choose "Add money" ("Top up with a card"). In the "Add money" dialog, enter the "Amount" within the shown range ("Between X and Y per top-up."; typically $5 to $500 per top-up with a $1,000 per day per restaurant cap). Choose "Continue", complete the card payment step, and for larger top-ups enter the emailed "Verification code" and choose "Verify and continue". You see "Top-up complete. Your wallet has been updated."

> **Expected result:** The wallet balance increases by the topped-up amount.

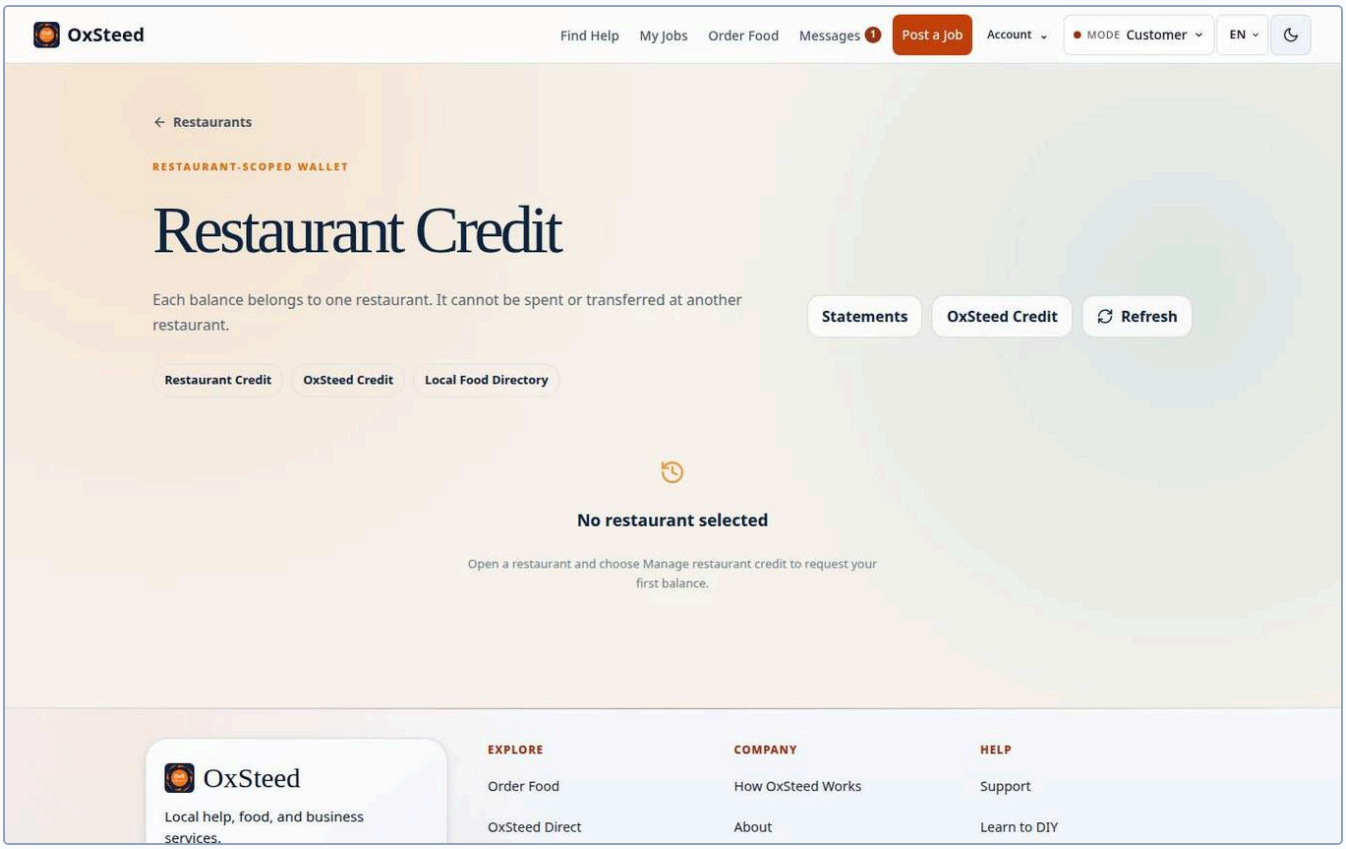

Figure 2. Topping up by card, desktop view. *(Image description: Card top-up dialog with amount field)*

Step 3: Request credit with payment proof

Choose "Add credit" ("Send payment proof for approval"). In "Add restaurant credit" ("Send proof of your payment. The restaurant will add the credit after verifying it."), enter the "Amount you paid", choose "Upload receipt" ("Choose screenshot, receipt, or PDF") or "Enter confirmation" ("Confirmation number or sender name"), add a note if helpful, and choose "Send for approval". Track it under "Add credit requests"; you can "Cancel" a pending request.

> **Expected result:** You see "Credit request sent to the restaurant."

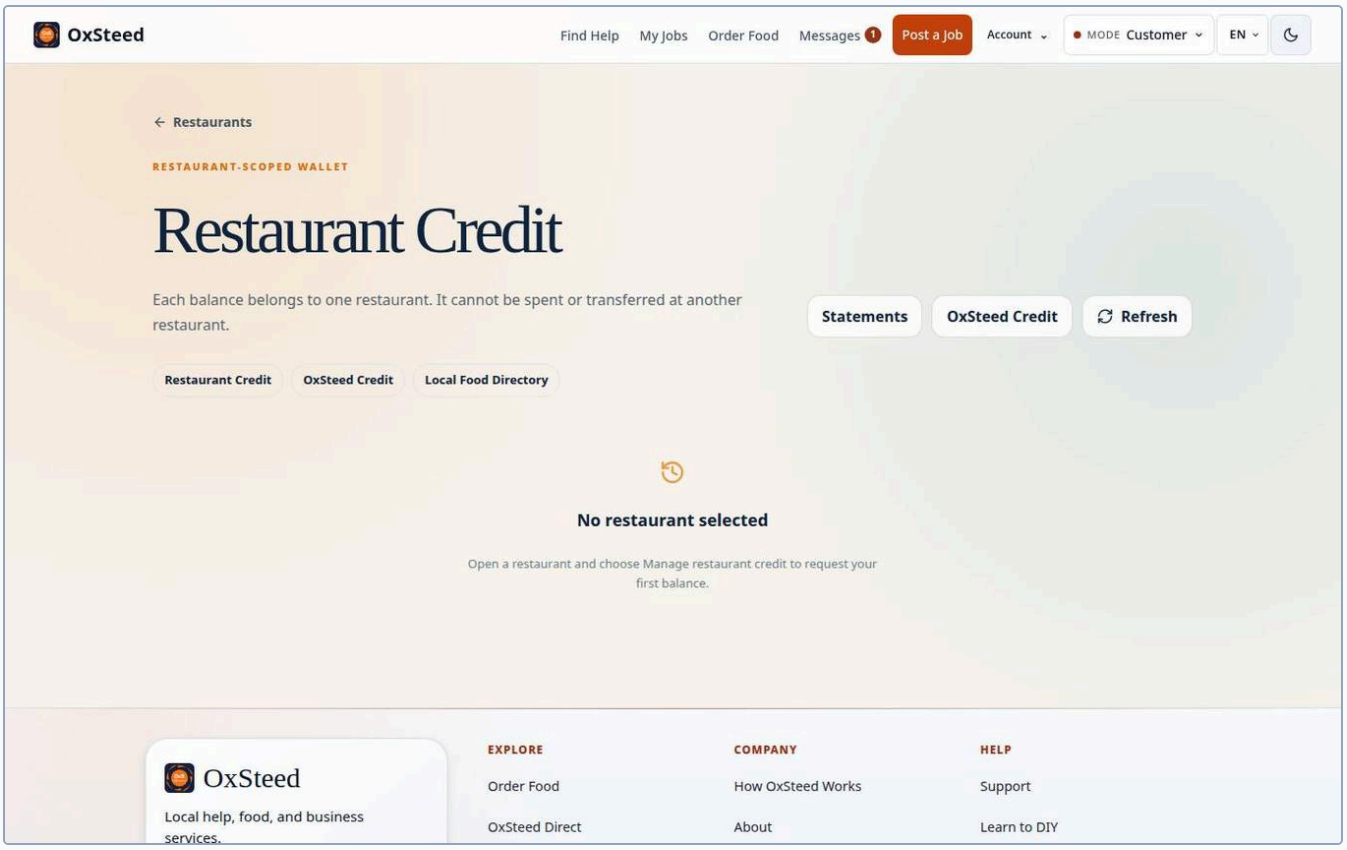

Figure 3. Requesting credit with proof, desktop view. *(Image description: Credit request form with proof options)*

Step 4: Pay with a one-time QR

Choose "Use credit" ("Create a one-time payment QR"). Enter the "Amount" (within "Available: X") and choose "Create payment QR". In "Pay with restaurant credit" ("Show this one-time QR to the restaurant. The reserved amount cannot be spent twice."), show the QR to the staff. Use "Cancel and release credit" if the payment does not go through.

> **Expected result:** The restaurant scans the QR, the hold is captured, and the balance drops by the amount.

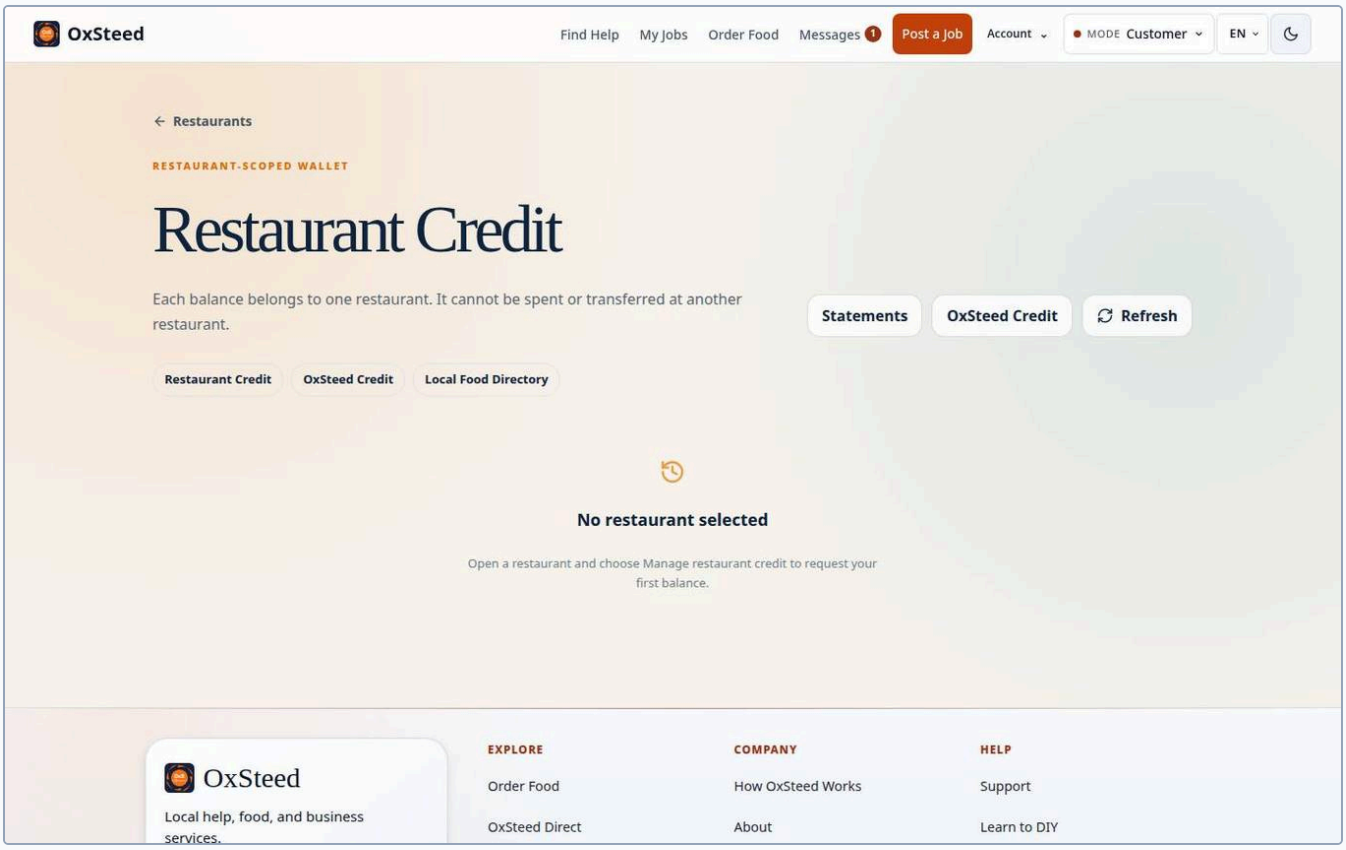

Figure 4. Paying with a one-time QR, desktop view. *(Image description: Payment QR shown to the restaurant)*

Step 5: Send credit to another OxSteed user

Choose "More credit options" then "Send credit to another OxSteed user" ("The recipient can only spend this credit at this restaurant."). Enter the "Recipient's OxSteed email", the amount, and an optional "Memo", then choose "Send credit". You see "Restaurant credit sent."

> **Expected result:** The recipient receives the credit at the same restaurant.

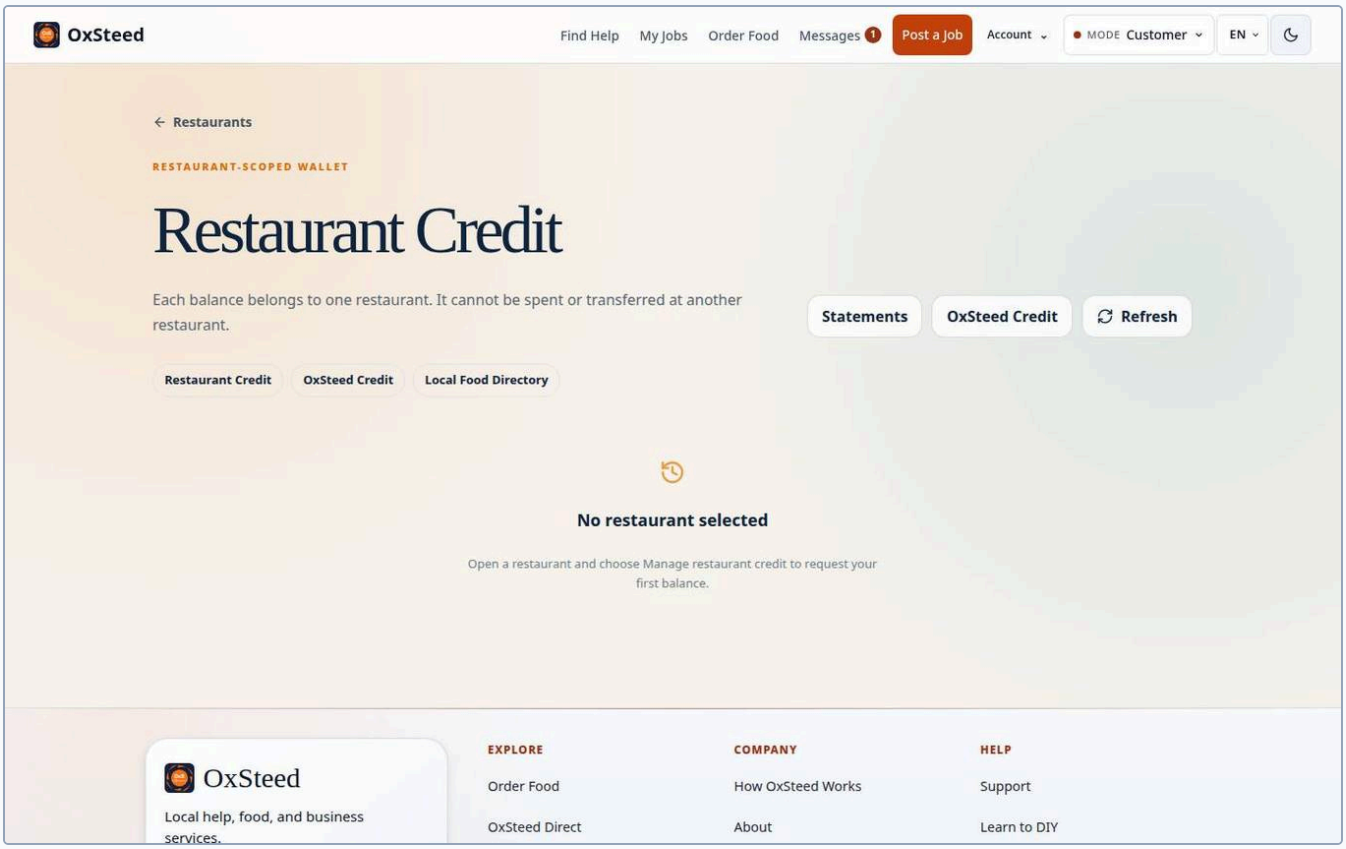

Figure 5. Sending restaurant credit, desktop view. *(Image description: Send credit dialog with recipient email)*

Step 6: Approve or decline credit requests as a restaurant

On the restaurant dashboard, open the "Restaurant credit" manager ("Customer balances"; "Approve credit only after matching the customer's receipt or confirmation number."). On a pending request, use "View receipt" to check the proof, then "Approve credit" ("Payment matched?" then "Yes, add credit") or "Decline" with a reason ("Reason, for example: receipt amount does not match").

> **Expected result:** Approved credit lands in the customer wallet immediately.

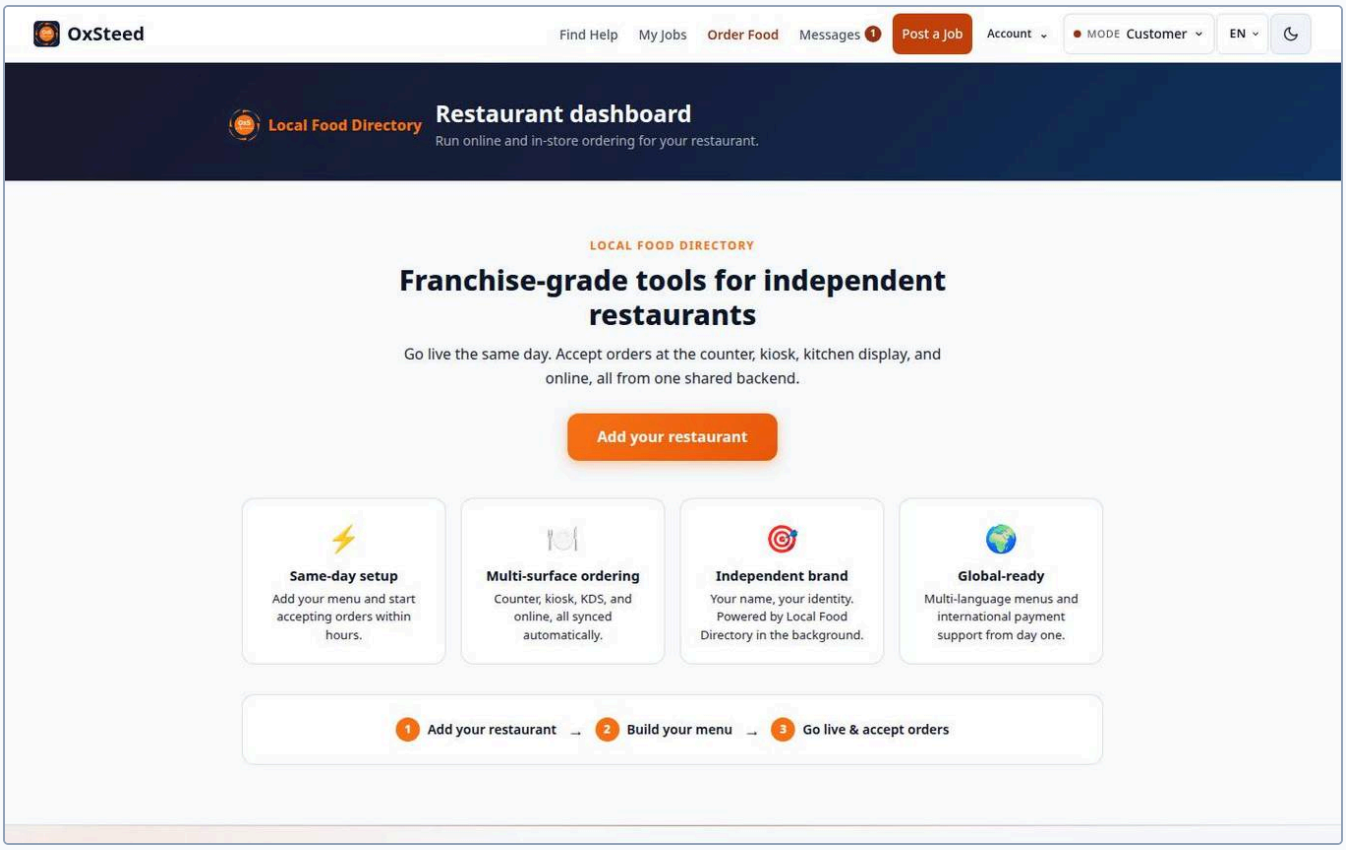

Figure 6. Reviewing credit requests, desktop view. *(Image description: Credit manager with request review actions)*

Step 7: Grant or refund credit as a restaurant

In the manager, choose "Grant credit" for a direct grant: enter "Customer email", "Amount", and a required "Explanation" ("Why is this credit being added? e.g. comp for wrong order"), then "Review grant" and "Yes, grant credit". Choose "Refund credit" to return money: enter "Customer email" and "Amount", add a "Reason", then "Review refund" and "Yes, refund". Refunds deduct the wallet and send money back to the card; only credit issued in the last 30 days can be refunded.

> **Expected result:** The customer wallet updates and every grant records its explanation on the audit trail.

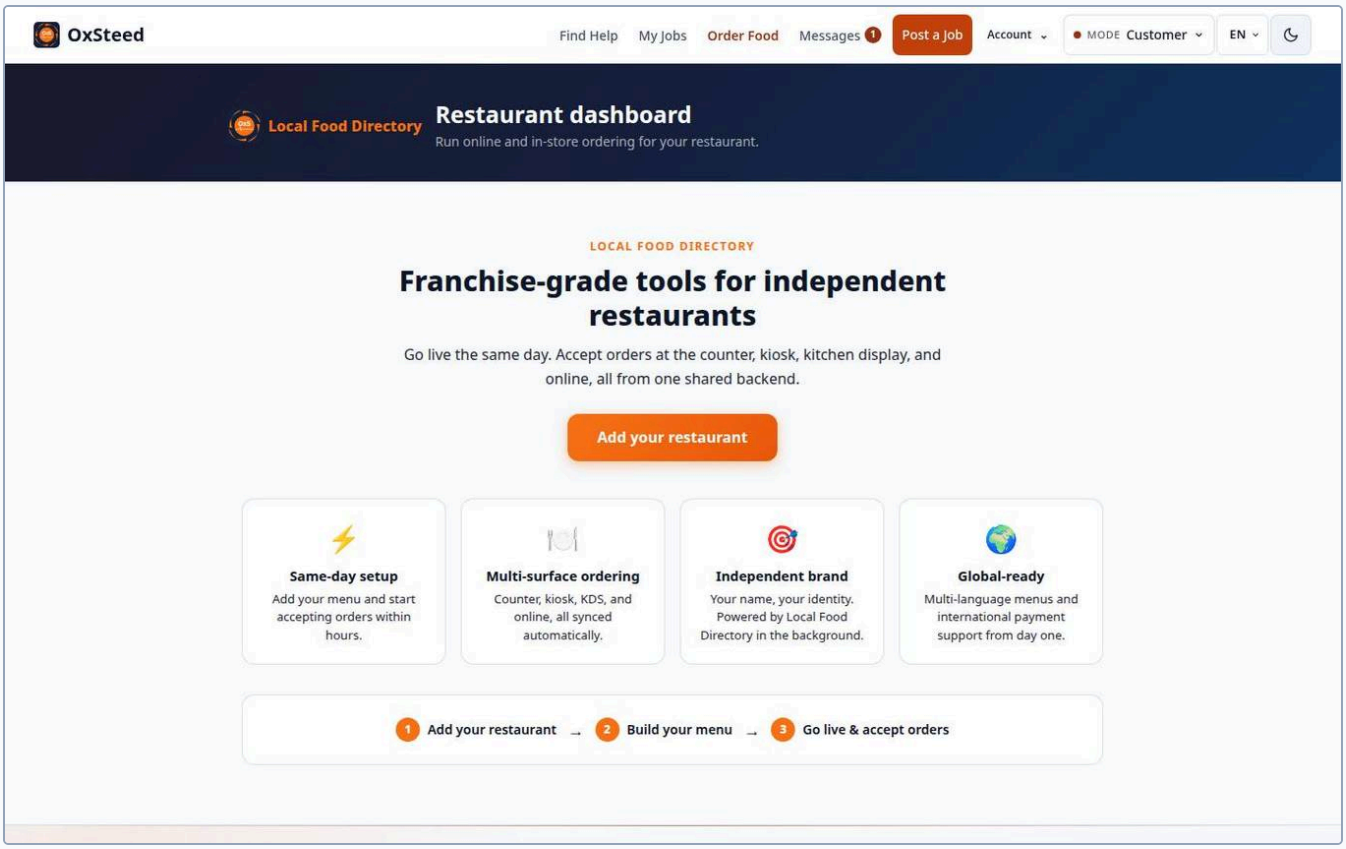

Figure 7. Granting credit, desktop view. *(Image description: Grant credit form with explanation)*

Step 8: Review activity and statements

The "Activity" section shows approved credit, purchases, transfers, and refunds; "Transfer history (X)" lists sends and receives. Follow "Statements" for issued monthly statements, or open /restaurant-credit/statements directly.

> **Expected result:** You can reconcile every balance change with its timestamp and type.

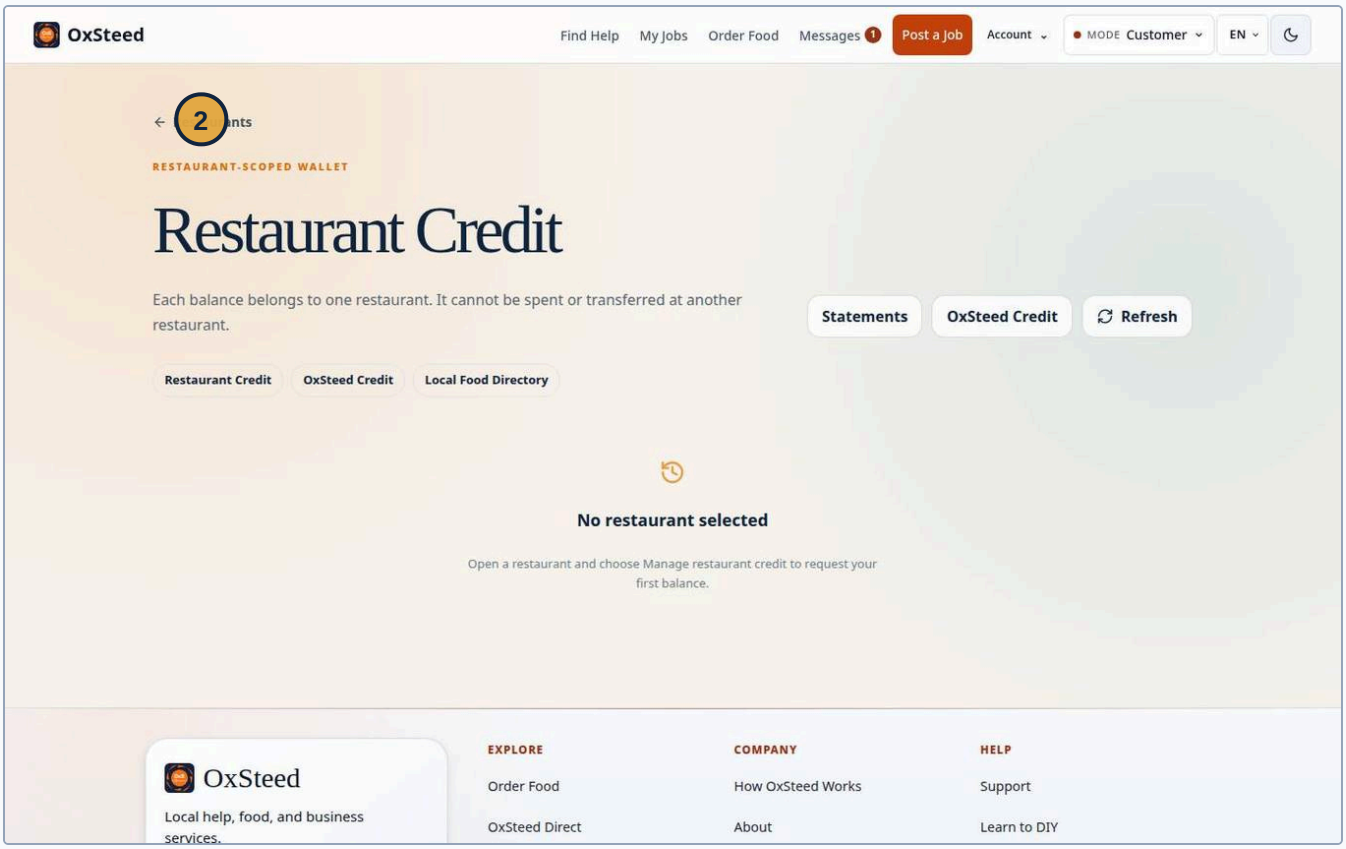

Figure 8. Reviewing activity, desktop view. *(Image description: Activity section with credit events)*

1. **2.** Statements link

Confirm it worked

The restaurant wallet shows the right balance, payments and transfers post to the activity feed, and disputes or refunds resolve.

If something goes wrong

Problem	What to do

Card top-up fails.	You see "The card payment did not go through. Please check the card details and try again." Check the card details and that the amount is within the shown min and max, then retry.
A credit request stays pending.	The restaurant has not verified your proof yet. Use "Cancel" on the request and resubmit with a clearer receipt or the exact confirmation number.
You see "Amount exceeds the available balance."	Lower the QR amount to the available balance, or top up first.
A refund cannot be processed.	Only credit issued in the last 30 days can be refunded. If the card refund fails, the wallet balance is left untouched.

Need help?

Guide ID: financial-statements | **Revision:** 1 | **Area:** Financial records

SOP LIBRARY / FINANCIAL RECORDS ENGLISH

View statements

Guide ID	**financial-statements**
Revision	Revision 1 (generated October 16, 2026)
Intended for	Customer, Restaurant owner, Helper, Business owner
Availability	**Supported**
Online version	/how-it-works/financial/financial-statements

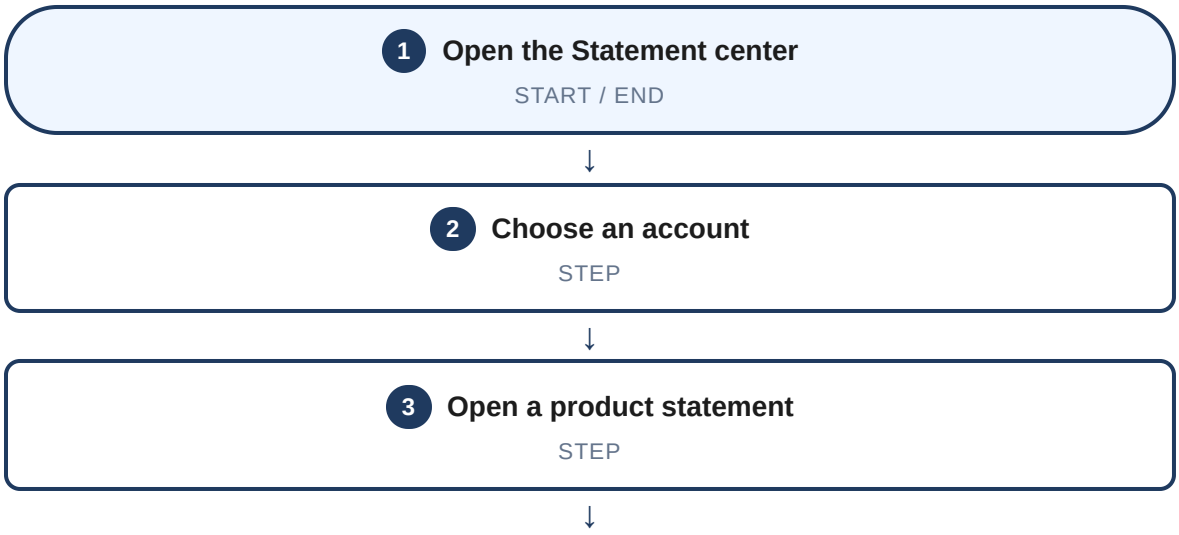

Goal

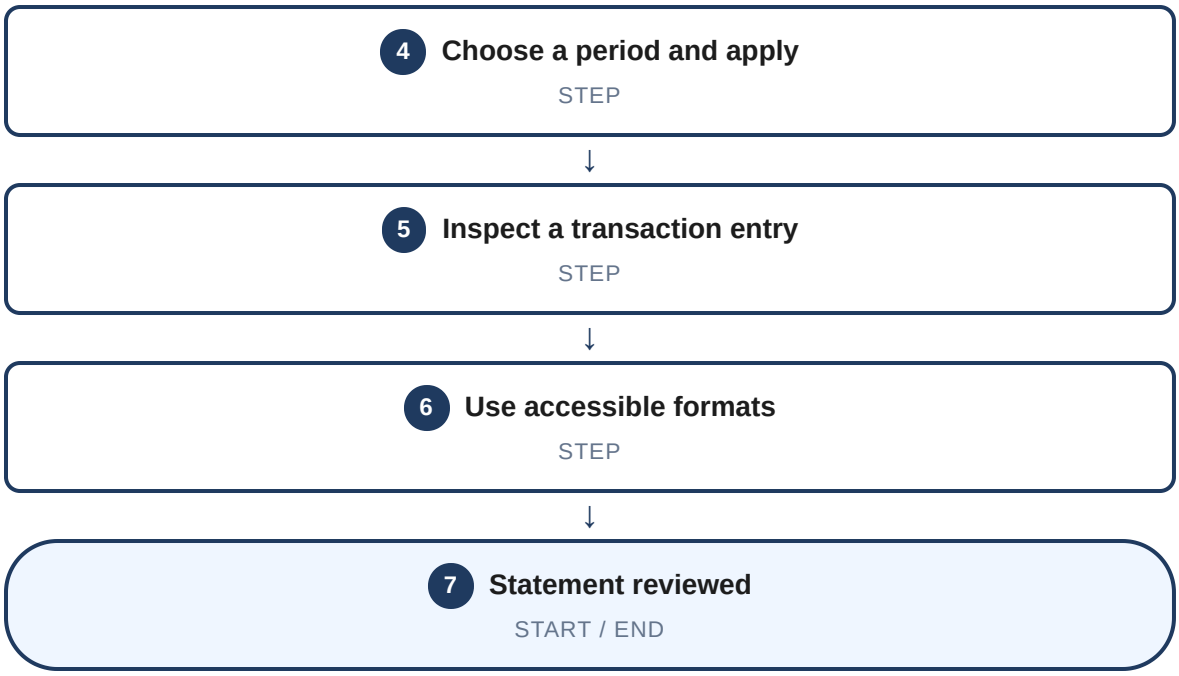

Find and read the right statement: the statement center, product statements, transaction details, and accessible formats.

Before you start

1. Sign in to your OxSteed account.

Process map

Text version. Open /statements ("Statement center": "Choose an account and a period, then review or download your records."). Note "Balances, currencies, and statement types stay separate." Choose an account ("Account and currency"), then open a product statement at /oxsteed-credit/statements or /restaurant-credit/statements ("Account statements": "Choose an account and statement period", then "Apply"). Inspect entries ("Entry details") and report issues. Use the accessible statement page for a tagged PDF, accessible HTML, or CSV.

Steps

Step 1: Open the Statement center and choose an account

Open /statements. The "Statement center" shows "Choose an account" with your statement accounts. Use "Search all records" or "Period activity" to narrow, and "Change account" to switch. The note "Balances, currencies, and statement types stay separate." reminds you each account keeps its own records.

> **Expected result:** The accounts list loads with the selected account's periods.

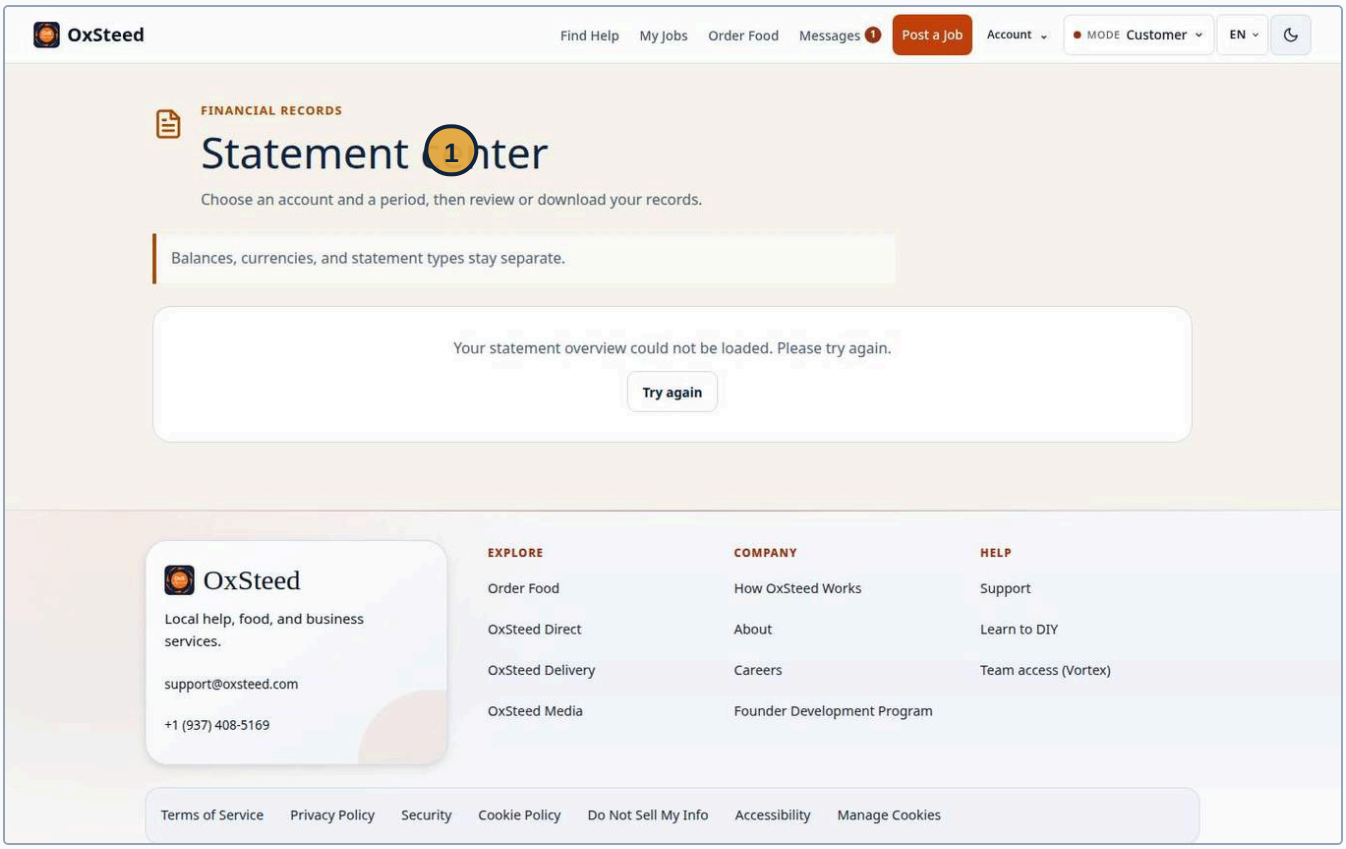

Figure 1. The Statement center, desktop view. *(Image description: Statement center with the account list)*

1. **1.** Page title

Step 2: Open a product statement and choose a period

Open /oxsteed-credit/statements ("OxSteed Credit" statements) or /restaurant-credit/statements ("Restaurant Credit" statements). "Choose an account and statement period" ("Select Apply to generate or retrieve your statement."), then choose "Apply". Dates use UTC; "Closed calendar months create immutable monthly documents on demand. Current or custom periods are interim reports."

> **Expected result:** The "Posted activity" list fills with the period's transactions and "Download PDF" / "Download CSV" appear.

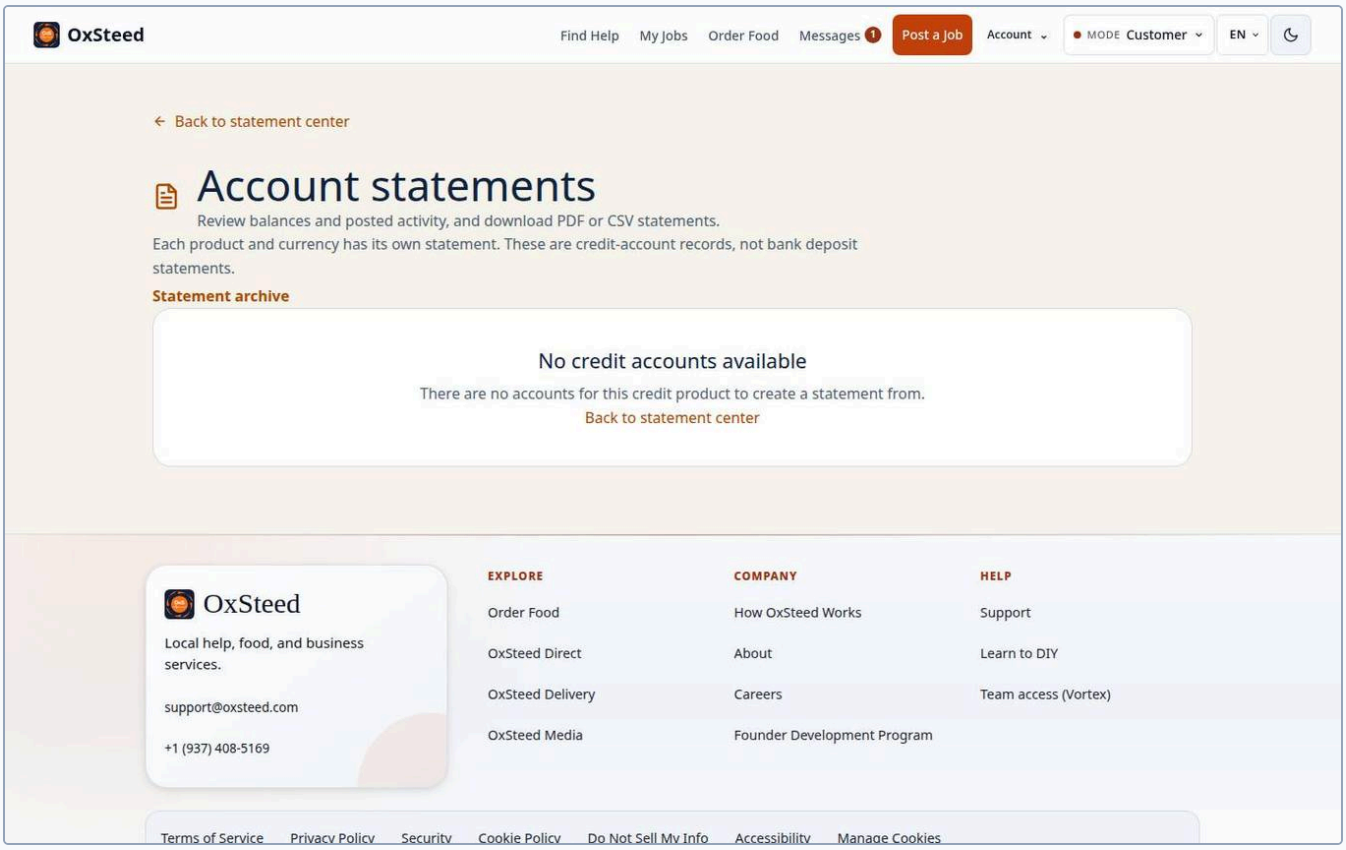

Figure 2. Choosing a statement period, desktop view. *(Image description: Statement page with account and period controls)*

Step 3: Filter and review posted activity

In "Posted activity", each row shows the date, type, "Credit"/"Debit", "Description", and "Balance after". Use "Advanced filters" to narrow by "Activity type", "Min amount"/"Max amount", "Direction" ("Debits and credits", "Debits only", "Credits only"), "Status", or related record ("Food orders", "Top-ups and funding", "Settlements and payouts", "Adjustments", "Refunds"), then "Apply filters".

> **Expected result:** The list shows "{{count}} of {{total}} transactions" matching your filters.

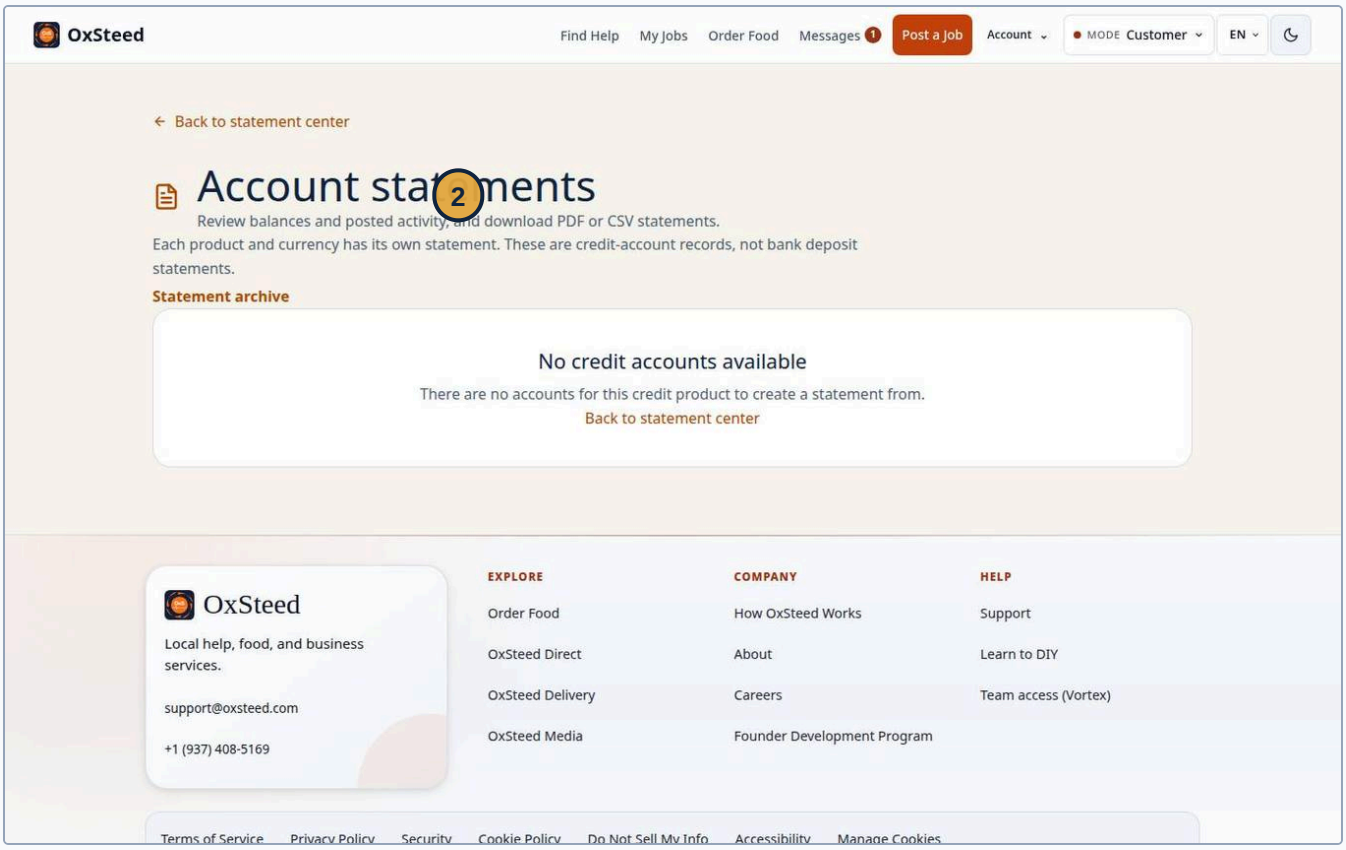

Figure 3. Filtering activity, desktop view. *(Image description: Activity list with the advanced filters panel)*

1. **2.** Posted activity list

Step 4: Inspect a transaction entry

Open an entry to reach /statements/:documentId/entries/:entryId ("Statement transaction": "Entry details"). Review "Posted (UTC)", "Type", "Amount", "Balance after", "Reference", and the related record ("View" opens the linked order or payment). If something looks wrong, use "Report an issue" with a "Reason" and "Details", then "Submit report" ("Tell us what looks wrong. Filing a report never moves money; it opens a case for review.").

> **Expected result:** The entry facts are clear and any issue is filed as a report.

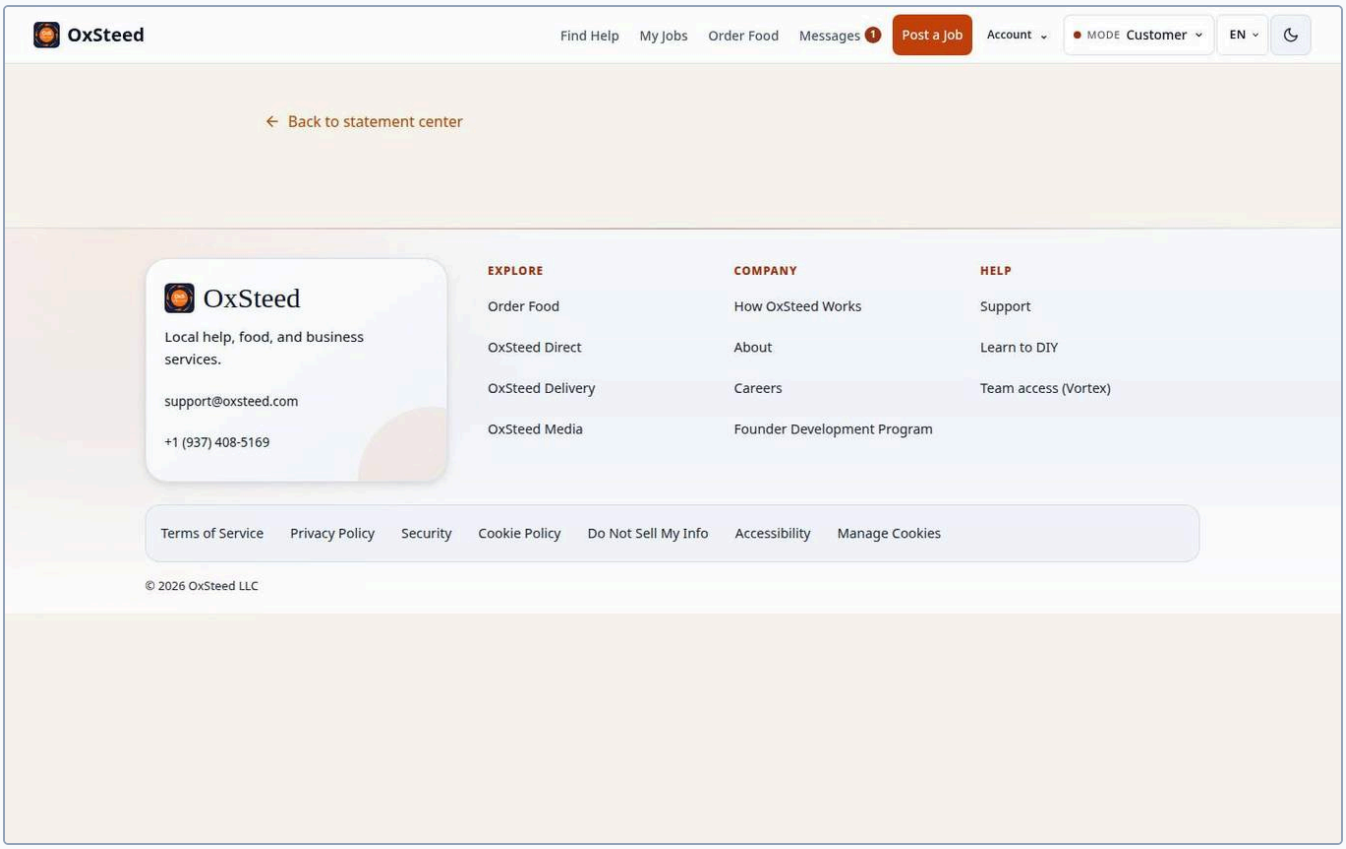

Figure 4. Inspecting an entry, desktop view. *(Image description: Entry details with posted date, type, and amounts)*

Step 5: Use accessible formats

Open /statements/:documentId/accessible ("Accessible statement": "Download a tagged PDF, an accessible HTML version, or a CSV of this statement."). Choose "Download accessible PDF" ("Tagged PDF": "A PDF with a tagged structure for screen readers."), "Open accessible HTML" ("Accessible HTML": "The same statement as a web page with a semantic table, headings, and right-to-left support for Arabic."), or "Download CSV" ("CSV data": "Every transaction row as plain data for spreadsheets and screen readers.").

> **Expected result:** The statement downloads in the format you chose.

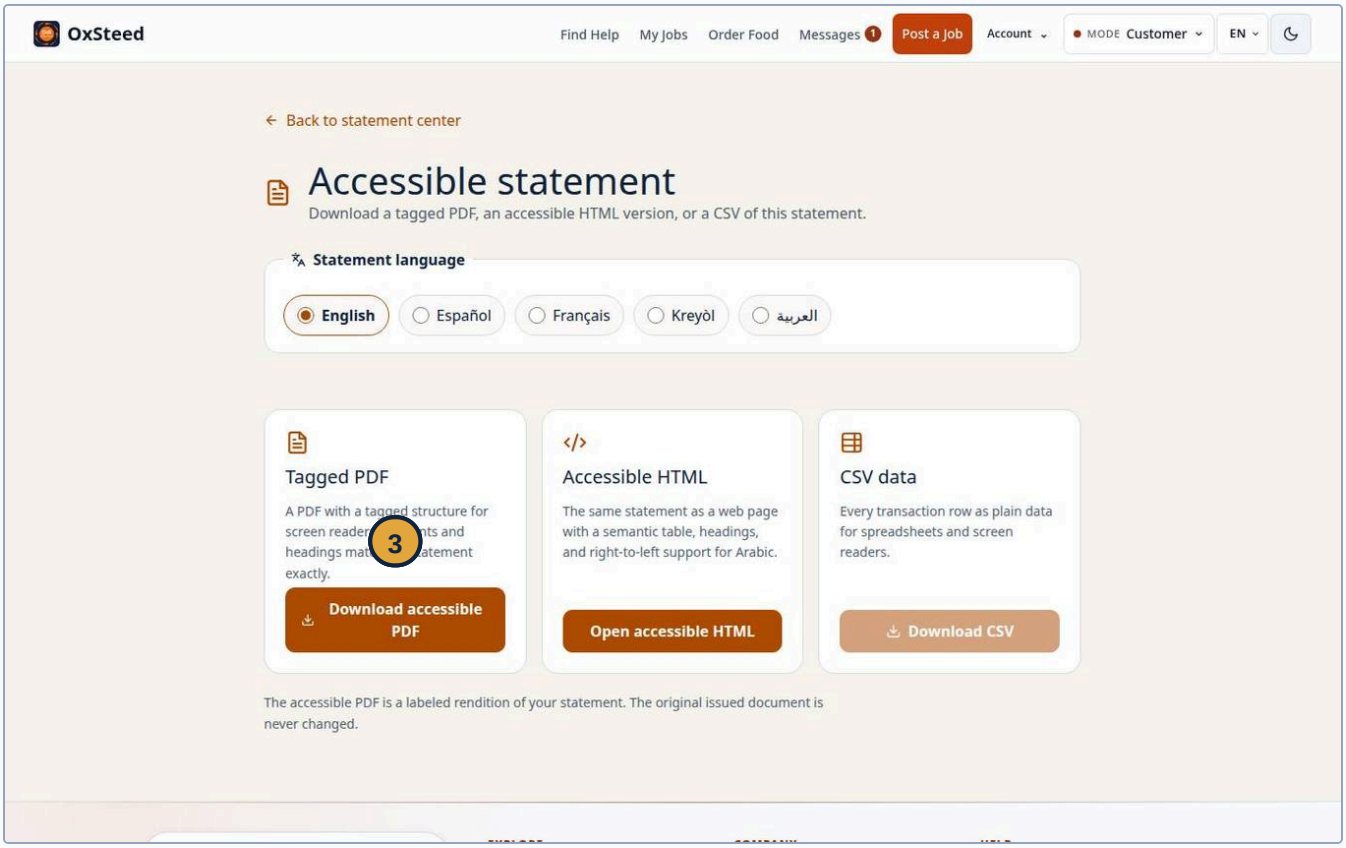

Figure 5. Accessible formats, desktop view. *(Image description: Accessible statement with PDF, HTML, and CSV options)*

1. **1.** Tagged PDF card
2. **2.** Accessible HTML card
3. **3.** CSV data card

Confirm it worked

You can open the right account, period, and entry, and download the statement in a usable format.

If something goes wrong

Problem	What to do
The page shows "No statement accounts are available yet."	Accounts appear here when available to you. If you expect one (for example after a top-up), use "Retry" and check the wallet first.
The period shows "No posted activity in this period".	Widen the From/To range or choose a different account; current or custom periods are interim reports and may legitimately be empty.
A report cannot be opened from an entry.	You see "A report cannot be opened from this statement entry. Contact Support for help." Use the in-app support page at /support instead.

Need help?

For statement issues, use the in-app support page at /support.
